AGENDA:

PUBLIC HEARING - 4:30 PM

1. **ROLL CALL AND DECLARATION OF QUORUM**
2. **COMMUNICATION AND REPORTS**
3. **REPORT OF ATTENDANCE AT THE MEETING HELD ON JANUARY 28, 2025**

Workshop
165 Washington Avenue: Mazer, Murphy, Silk, Smith and Stanley present. Barker and Chann absent.
716 Stevens Avenue: Chann, Mazer, Murphy, Silk, Smith, Stanley present. Mazer recused, Barker absent.

Public Hearing
1001 Westbrook Street: Mazer. Murphy, Silk, Smith, and Stanley present. Silk recused, Barker absent.

4. **REPORTS OF DECISIONS AT THE MEETING HELD ON JANUARY 28, 2025**

i. Major Site Plan; 1001 Westbrook Street; City of Portland, Applicant. Stanley motioned, and Smith seconded a motion to waive Site Plan Standard Sec. 14.6.1(B)(3)(a), which requires the construction of sidewalk and curbing along all property frontages, to not require sidewalk and curbing along the property's Jetport Boulevard and Westbrook Street frontage. Vote 4-1 (Chann opposed, Silk recused, and Barker absent). Stanley motioned, and Smith seconded a motion to waive Site Plan Standard Sec. 14.6.2(A)(1) which requires the preservation of significant natural features, to permit the filling of 11,151 square feet of wetlands. Vote 4-1 (Chann opposed, Silk recused, Barker absent). Stanley motioned, and Smith seconded a motion to waive Site Plan Standard Sec. 14.6.2(C)(3)(a), which requires two trees (or one tree and three shrubs) per five vehicle parking spaces, to permit a total of 24 trees within landscaped islands in the proposed parking lot. Vote 5-0 (Silk recused, Barker absent). Stanley motioned, and Smith seconded a motion to waive Technical Manual Standard Sec. 4.5.5 which requires that parking lot landscaped islands measure no less than 8 feet wide, to allow an island width of less than 8 feet. Vote 5-0 (Silk recused, Barker absent). Stanley motioned, and Smith seconded a motion to waive Technical Manual Standard Sec. 5.III, which requires that major site plans comply with the Maine DEP Ch. 500 Flooding Standard, to permit direct discharge of treated stormwater into the Fore River. Vote 5-0 (Silk recused, Barker absent) Stanley motioned, and Smith seconded a motion to approve the major site plan application. Vote 4-1 (Chann opposed, Silk recused, Barker absent). Stanley motioned, and Smith seconded a motion to adopt the draft approval letter as the Planning Board's decision, and to authorize the Board Chair to sign the approval letter as drafted. Vote 4-1 (Chann opposed, Silk recused, Barker absent).

5. **NEW BUSINESS**

i. Major Site Plan; 165 Washington Avenue; Redfern Properties, Applicant. The Planning Board will hold a hybrid public hearing to consider a proposal to develop a new seven-story, mixed-use development with ground-level commercial space, 326 residential units, exterior public amenity spaces, and other associated improvements at 165 Washington Avenue. The subject property totals approximately 1.45 acres and is zoned B-2b Community Business. A project and plan summary is available for viewing on the city's CSS Portal (https://css.portlandmaine.gov/) by referencing Plan Number PL-003143-2024.

ii. Major Site Plan; 125 Thompson's Point Road; CPI Management, LLC and Forefront Partners I, LP, Co-Applicants. The Planning Board will hold a hybrid public hearing to consider a

proposal to develop a new six-story, 255-unit residential building with attached six-story structured parking for 463 vehicles and other associated improvements at 125 Thompson's Point Road. This development was contemplated in the Thompson's Point Master Development Plan. The subject property totals 4.67 acres and is zoned B-5 Urban Commercial. A project and plan summary is available for viewing on the city's CSS Portal (https://css.portlandmaine.gov/) by referencing Plan Number PL-003090-2024.

iii. Institutional Overlay Zone; 716 Stevens Avenue; University of New England, Applicant. The Planning Board will hold a hybrid public hearing to consider a new institutional overlay zone and zoning map amendment for the University of New England's Portland Campus, rezoning the property entirely to B-2 Community Business. The subject property totals approximately 75 acres, and is located within the R-3 and R-5 Residential zones, the I-L and I-H Industrial zones, and the B-2 Community Business zone. A project and plan summary is available for viewing on the city's CSS Portal (https://css.portlandmaine.gov/) by referencing Plan Number ZN-003059-2024.

165 Washington Avenue
Major Site Plan Application
PL-003143-2024
Redfern Properties LLC, Applicant

Submitted to:	Portland Planning Board	**Prepared By:**	Taylor Colbeth
Public Hearing Date:	February 25, 2025	**Date:**	February 21, 2025

I. INTRODUCTION

Redfern Properties LLC and Acorn Engineering have submitted a Major Site Plan application for the construction of a seven-story, mixed-use development containing 325 dwelling units, including 82 workforce housing units on site, 1,800 square feet of ground-level retail space, and 11 parking spaces at 165 Washington Avenue, within the B-2b Community Business zone.

This application is being referred to the Planning Board for compliance with the City of Portland's Land Use Code Site Plan Standards, Section 13.6.

The Planning and Urban Development Department mailed 191 notices advertising this meeting to property owners within 500 feet of the site. A legal advertisement ran in the February 13 and February 14, 2025 edition of the Portland Press Herald.

Applicant: Redfern Properties
Applicant Representatives: Acorn Engineering

Figure 1. An aerial view of the existing site

II. PROJECT DATA

Review	*Applicable Standards*
Site Plan	Section 13.6
Inclusionary Zoning	Section 17.2.3
B-2b Design Review Standards	City of Portland Design Manual (d)

Project Data	
Existing Zoning	B-2b Community Business
Property Size	63,375 SF
Existing Use	Vacant Building (Former Burner Supply warehouse) Surface Parking
Proposed Development Program	Multi-family Residential with Retail

Waver Requests	Applicable Standards
1. Driveway Spacing	**Technical Manual Section 1.5.1.C** *100 feet along arterial and collector streets with posted speeds of 35 mph or less* Applicant is requesting a driveway spacing of 11.43 feet from the nearest abutting driveway.
2. Drive Aisle Width	**Technical Manual Section 1.10.7** *The minimum two-way drive aisle width is 24 feet for standard, right-angle parking, and is otherwise dependent on parking space orientation, as illustrated in Figure I-16A.* Applicant is requesting a drive aisle width of 22.22 feet.

III. PLANNING BOARD WORKSHOP SUMMARY

The Planning Board held an initial workshop on this project on January 28, 2025, where the Board focused primarily on:

1. Renderings.

   Board members asked the applicant to provide renderings of the proposed development from the Washington Avenue sidewalk and the abutting Munjoy Heights development.

   The applicant has provided architectural renderings as seen from various vantage points along Washington Avenue (See Attachments 46-50) and from Munjoy Heights (See Attachment 51).

2. Unit Configurations and workforce housing information.

   Board members requested the application provide unit configurations and additional information on the workforce housing that the applicant states they will provide on-site.

As a response, the applicant submitted the latest architectural plan set that include unit configurations. See Attachments 26-30 for the latest architectural plan set. The applicant has indicated that they plan to provide 82 workforce housing units on-site but has not specified the location or size of those units. The City has drafted a condition of approval to have the applicant submit an updated floor plan detailing the location of the required workforce housing units.

3. Management of deliveries.

   Board members requested additional information on the management of deliveries to the site.

   In response, the applicant has updated the site plan to include three 15-minute loading and unloading parking spaces along the Washington Avenue frontage. The applicant has also indicated that there will be space on the ground floor for mail, food deliveries, and other packages to facilitate deliveries.

4. Expansion of the combined sewer system within Washington Avenue.

   Board members requested additional information on the proposed increased sewer line from 8-inches to 15-inches.

   The applicant has been in coordination with DPW to accommodate the project's nearly 45,000 gallons of proposed daily sewer flows. DPW has determined there is no separated storm drain system close enough to the site to allow the developer to connect the site's stormwater to a separated system. Due to this constraint, DPW is in support of the proposed sewer line increase. For additional information on this increase, see Attachment S1.

5. Controlled access gate.

   Board members requested additional information on the controlled access gate located at the entrance to the proposed parking spaces along Washington Avenue.

   As a response, the applicant has proposed moving the controlled access gate to the rear of the proposed parking area to mitigate impacts to traffic along Washington Avenue. The purpose of this access gate is specifically to control access to the rear of the development site by residents and members of the general public. This area houses utility infrastructure associated with the development, and will primarily be accessed for maintenance purposes.

6. Stormwater maintenance system.

   The board expressed concerns regarding the maintenance of the subsurface sandfilter located in the north courtyard of the proposed development due to its confirmed location.

As a response to this feedback, the applicant has provided additional information on the maintenance of the proposed system. The applicant has indicated that the preferred method for gaining access to the system will be by removing glass panels to the lobby area and moving construction equipment through as necessary. If this method is not feasible, the applicant has indicated that construction equipment can

be transported to the courtyard area by craning the equipment over the three-story section of the building.

IV. EXISTING CONDITIONS AND SURROUNDING AREA

Figure 2. Street View of the Existing Conditions.

The subject property is located within the East End neighborhood and is bounded by Washington Avenue, Mt. Joy Community Orchard, and residential development along the northeast and southeast property boundaries. The lot is zoned B-2b Neighborhood Business, and totals approximately 65,375 square feet (1.501 acres). The site is currently occupied by a vacant warehouse and surface parking lot, formerly the Northern Burner Supply Company. The property is largely flat along Washington Avenue as seen in Figure 2, with a steep slope from northeast to southeast along the rear property line.

The area surrounding the subject property is a mixture of residential and commercial uses, along with community open spaces, including the abutting Mt. Joy Community Orchard. The property also abuts Munjoy Heights, which consists of 29, four-story residential condominiums, and Bayview Heights, a four-story senior housing development. Washington Avenue is a priority corridor for the City and contains a variety of residential and non-residential uses including breweries, retail establishments, and restaurants.

The property is well served by public transportation, with Greater Portland METRO routes 7, 9A, 9B, and the Breez, operating along Washington Avenue. The property is also in close proximity to I-295, with on and off ramps located approximately a quarter-mile from the site.

V. PROPOSED DEVELOPMENT

The proposed development involves the construction of a seven-story mixed-use building with 325 residential units, a 1,800 square foot retail space located on the ground floor, two residential courtyards, and 11 structured parking spaces. The building steps down to three stories along the property's Washington Avenue frontage, and four stories above the parking area, at the south end of

the development site. The retail and residential spaces would have separate entrances, with both having a primary entrance along Washington Avenue.

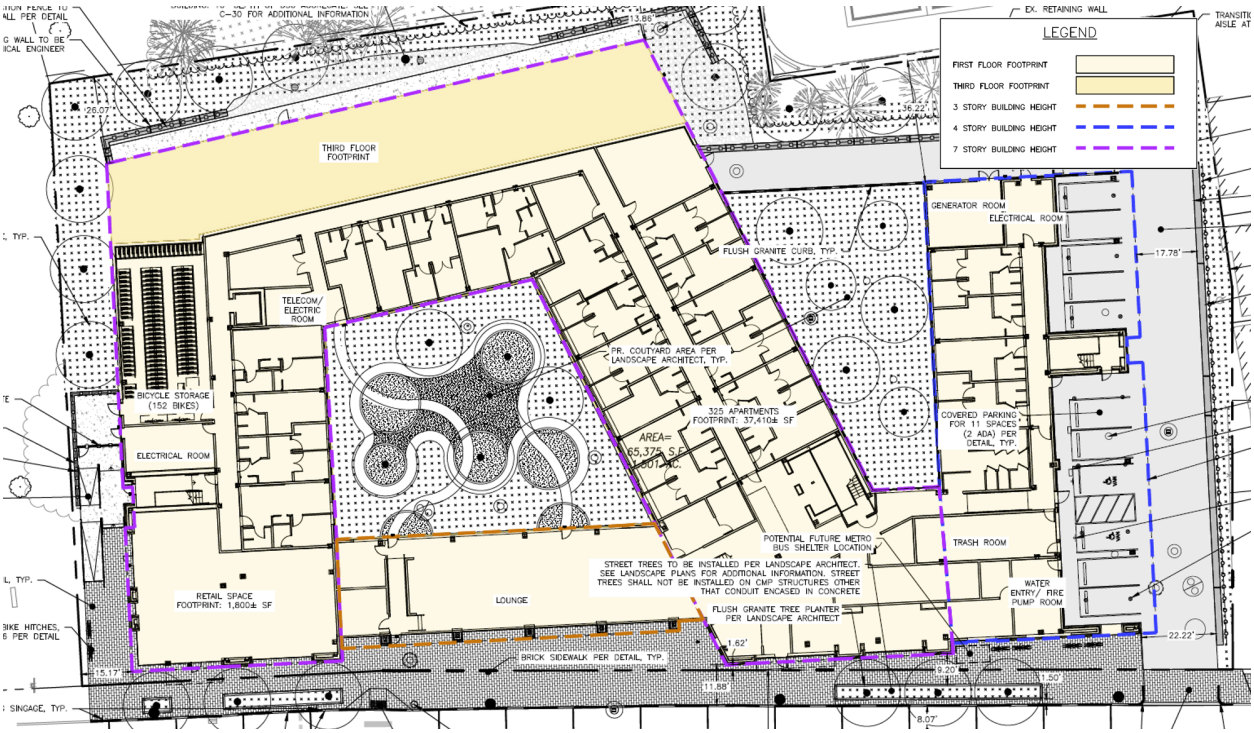

Figure 3. Building Footprint of Varying Stories

The ground floor of the building would feature a retail space, lounge, lobby, a 152-space bicycle storage room, residential units, and utility rooms. The project would include 11 off-street parking spaces, that would be located beneath a cantilevered portion of the building, and accessed via a new driveway at the southern end of the property. The second floor would feature a fitness room, lounge, residential units, and utility rooms. The remaining floors will consist entirely of residential units and utility rooms.

VI. RIGHT, TITLE, & INTEREST

The applicant has demonstrated sufficient right, title and interest to the parcel involved in this application. The subject lot was conveyed with associated rights on June 1, 2023. Conveyance of this parcel is recorded in the Cumberland County Registry of Deeds Book 31303, Page 272. Full Right, Title and Interest documentation is included as Attachment D.

VII. FINANCIAL & TECHNICAL CAPACITY

The applicant has provided a written statement detailing their track record of completing development projects within the City of Portland to demonstrate financial capacity. The applicant has noted that they will supplement this statement with a letter of good financial standing from their financial institution. The provision of this letter has been drafted as a condition of approval. Acorn Engineering is an experienced engineering firm that specializes in civil/site design, environmental services, municipal consulting, and construction administration and has demonstrated experience completing projects of similar scale throughout Portland. Full financial and technical capacity documentation is included as Attachment G.

VIII. ZONING ANALYSIS

The subject property is located within the B-2b Neighborhood Business zone. The purpose of the B-2b zone is to provide neighborhood and community retail, business, and service establishments that are built close to the street while encouraging mixed-use development in areas of moderate to high-density housing in urban neighborhoods along arterials.

Standard	Required	Proposed
Lot area (min)	None	65,375
Street frontage	None	343 ft
Build-to zone	0-10 ft	1.62 ft
Build-to Percentage	100%	100%
Building length as a percentage of street frontage (min)	60%	86.8%
Blank wall area (max)	20 ft	12 ft
Front yard maximum	10 ft	9.77 ft
Rear setback	None	13.86 ft
Yard right	None	27.17 ft
Yard left	None	15.17 ft
Structure height (max)	75 ft	67.85 ft
Maximum lot coverage	None	56.46%
Open space	None	35.96%
Impervious surface ratio (max)	None	64.04%

A. Inclusionary Zoning

As outlined in Section 17.2.3 of the City of Portland's Land Use Code, this application is subject to Inclusionary Zoning standards and is required to provide at least 25% (82) of the units as workforce housing. The applicant has indicated that they plan to provide the required 82 workforce housing units on-site within the development to meet the City's requirement. The City has drafted multiple conditions of approval associated with the project's inclusionary zoning requirements, including the provision of updated floor plans depicting the location of the proposed workforce units; and a requirement that the applicant enter into a workforce housing agreement with the City.

IX. SITE PLAN STANDARDS (Section 13.6)

The proposed development has been reviewed by staff for conformance with the relevant review standards of the City of Portland's Site Plan Ordinance, Section 13.6. Staff comments are below.

1. <u>Transportation Standards (Section 13.6.1)</u>

A. Impact on surrounding street systems

The applicant has provided a traffic movement permit (TMP) completed by a licensed traffic engineer from Barton & Longuidice. The project proposes closing two existing curb cuts along Washington Avenue, and providing only one point of vehicular access to the site. The applicant is also proposing 13 new on-street parking spaces along Washington Avenue, three of which will be 15-minute spaces. It is anticipated that the 15-minute spaces will be utilized for loading and unloading activities and be used to facilitate deliveries to the site.

The City is the delegated lead agency for the TMP and a traffic scoping meeting was held on January 9, 2025, with the City's traffic reviewer and the applicant team. During the meeting, the intersection of Oxford Street and Washington Avenue was identified as a high crash location, but no action is required due to limited opportunities for mitigation improvements. There was a focus on pedestrian conditions, particularly around the condition of the sidewalk between the development site and Walnut Street.

The applicant has since submitted a full Section 7 Traffic Study, including what was prepared as part of the TMP Application. The traffic study was prepared in accordance with state regulations and includes an analysis on pre and post-development conditions related to peak hour traffic generation, vehicle queuing lengths at intersections, and an evaluation of high crash locations. The study was reviewed by the City's third-party traffic reviewer, Tom Errico, P.E. with T.Y. Lin International and was deemed complete. See Attachment T.3 for the full Traffic Study. Based upon the City's review, the City has recommended two conditions of approval associated with the TMP, which would involve reconstruction of the sidewalk along the west side of Washington Avenue, and the installation of a curb extension and rapid rectangular flashing beacon (RRFB) at the proposed crosswalk immediately in front of the proposed development.

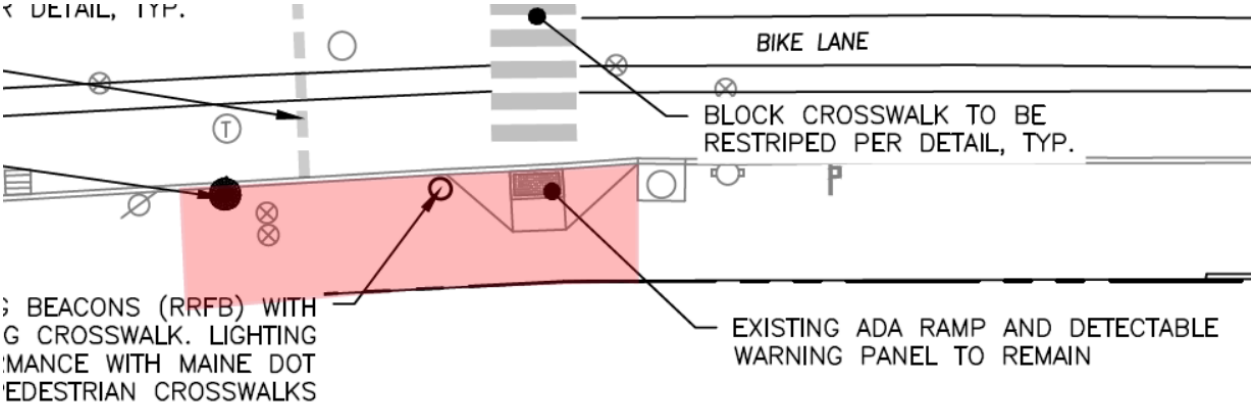

Figure 4: Requested location for sidewalk replacement and curb extension.

Staff Discussion: The applicant is proposing ten additional on-street parking spaces, which as depicted in the applicant's materials, would be unsigned and available for public use. Staff from DPW are asking that these be signed as two-hour parking, and have requested that the applicant provide updated materials to reflect this.

B. Access and circulation

All pedestrian access will be directly from the sidewalk on Washington Avenue. With the proposed closure of two curb cuts, the applicant is proposing to reconstruct the sidewalk along the property's frontage on Washington Avenue. As part of this project, the applicant is proposing to widen the sidewalk to 11.88 feet in order to improve the pedestrian experience. The applicant is also proposing two raised granite tree beds along Washington Avenue. The applicant has requested two waivers associated with the proposed parking:

Waiver Requests:

Waiver Request 1: The applicant is seeking a waiver of *Technical Manual* Section 1.5.1(C) for reduction of driveway spacing from 100-feet to 11.43 from the nearest abutting driveway. This waiver is being requested to allow for the parking area located along the southerly side of the building to be accessed from a driveway that would be 11.43 feet from the nearest abutting driveway.

Staff finds the waiver request appropriate, as it aligns with the development pattern of the surrounding area and supports an urban infill site. Driveways along Washington Street and in the surrounding context are commonly less than 100 feet. The proposed project includes 11 parking spaces designated for residents, which are considered low-turnover spaces. Based on this analysis, and the applicant's supporting materials staff recommends supporting the waiver.

Waiver Request 2: The applicant is seeking a waiver of *Technical Manual* Table 1-16A for reduction in drive aisle width for 90-degree parking from 24-feet to 22.22 feet, a 1.4-foot reduction. This waiver is being requested to allow for the parking area to have a slightly reduced drive aisle width that is more conducive to urban infill development.

Staff finds the waiver request appropriate, as it supports the development of the building and parking area in a manner suited to an urban infill site. The proposed project includes 11 parking spaces designated for residents, with low turnover. A 22.22-foot drive aisle provides sufficient width for vehicle maneuverability and aligns with typical drive aisle dimensions for constrained urban development sites.

The applicant has indicated that trash pick up will occur in the proposed parking area. The applicant has provided turning templates for trash removal vehicles entering and exiting the garage.

Staff Discussion

- The proposed solid waste backing maneuver does not comply with *Technical Manual* Section 1.5.1, Table 1-B.J. The applicant must provide for all vehicles enter and exit the site facing forward.
- The Tree Well detail notes calls out a raised curb, but the site plan calls out flush vertical granite. The applicant shall update their Tree Well detail to be consistent with the site plan.
- The applicant shall provide a Sidewalk Easement to maintain a six-foot clear width from the proposed planters.

C. Public transit access

The proposed project is located along a bus route and is located 150-feet from the nearest bus stop. However, the bus stops near the project do not provide a transit shelter. Per Standard 13.6.1(C), if a development consists of 20 or more dwelling units, the applicant shall provide a transit shelter adjacent to or within the public right-of-way along its frontage, or at a nearby high-volume transit stop without a transit shelter, when the following criteria are met:

- The development is proposed along an existing public transit route on a principal or minor arterial roadway, as shown in the Federal Street Classification Map.

- The nearest existing transit shelter is more than ¼ mile from the site, measured along right-of-way.

Staff Discussion

- Staff have been actively coordinating with the applicant and METRO to provide a transit shelter at one of the existing bus stops within close proximity to the proposed development. City staff recommends installing a transit shelter at the existing METRO bus stop north of the development site along Washington Avenue, adjacent to Mt. Joy Orchard. As a condition of approval, the applicant must finalize any necessary agreements and complete the installation before the issuance of a certificate of occupancy.

D. Parking

In accordance with Section 18.2.1 of the Land Use Code, no off-street vehicle parking is required. Per Table 18-A the multi-family dwellings may provide a maximum of 2 parking spaces per dwelling unit. The applicant is proposing 11 parking spaces (two of which are ADA) within structured parking located on the south side of the proposed development. A total of 20% of the proposed parking spaces will include Level II EV chargers or higher and 50% of the parking spaces will be will be EV ready.

Per Table 18-A multi-family dwelling are required to provide a minimum of 1 bicycle space per 2 dwelling units. The applicant is proposing a bicycle storage room with 152 spaces along with six exterior bike hitches, totaling in 164 bicycle parking spaces, which exceeds the minimum requirement of 163.

The applicant will be responsible for snow removal and has indicated that snow storage will not be located in an area that interferes with pedestrian walkways or stormwater management systems.

Staff consider this standard to be met.

E. Transportation demand management (TDM)

The applicant has provided a TDM Plan that complies with the transportation studies and plans as contained in the *Technical Manual*. The submitted TDM Plan outlines strategies to meet parking and trip reduction rates of up to 10% for residents and staff. Ridesharing and public transit will be coordinated and promoted amongst staff and residents. All new staff and resident orientation will provide information on these options, along with information related to discount programs for the public transit options available. In addition to a public transit discount program, the applicant plans to offer other incentives including effective parking “cash out” to give residents the choice to pay for a parking space off site, working with the City to incentivize bike sharing programs, and offering the best internet access currently available in this location to encourage telecommunicating as a trip reduction strategy. This TDM Plan will be monitored and adjusted as necessary by the designated TDM Coordinator.

Staff consider this standard to be met.

2. Environmental Quality Standards (Section 14.6.2)

A. Preservation of significant natural features

Per Standard 13.6.2(A), all new developments shall preserve and protect significant natural features by incorporating principles of Low-Impact Development (LID) in accordance with the LID standards of the Technical Manual. The applicant has submitted a LID scoring worksheet as part of their second submission.

Staff Discussion:

- The applicant shall provide further clarification for the following selected LID point categories: Provide 1.5 x the required water quality volume and innovative LID site design and/or stormwater improvement.

B. Site landscaping and buffers

The applicant is proposing the removal of 24 trees on-site, including two street trees along Washington Avenue. This is to be supplemented with 31 new trees, including six street trees, and various perennials to supplement the removed vegetation. Per Standard 13.6.2(B), one street tree is required for every 25-35 linear feet of frontage along a city right-of-way. Based on the 343-feet of street frontage of the proposed project, a total of 10 street trees are required. The applicant is also required to provide a minimum of one shade tree per 5,000 square feet of lot area per Standard 13.6.2(B). The applicant is required to plant 13 shade trees and has satisfied this requirement by proposing 31 deciduous trees be planted as a part of the proposed project. Site Plan Standard Sec. 13.6.2.B.4 requires that non-vehicular hardscape have a minimum Solar Reflective Index (SRI) of 33 at time of installation, and an SRI score of no less than 28 after a period of three years. The applicant has indicated that this standard will be met.

The applicant has provided a landscaping plan and tree removal plan included as Attachments 24 & 25.

Staff Discussion

- The applicant has indicated they plan to pay the fee-in-lieu for the remaining four street trees they are required to provide. Per *Technical Manual* Section 4.1.3.B, the applicant Is required to pay $400 per tree into the City's Street Tree Fund, totaling in $1,600.

C. Water quality/storm water management/erosion control

The project is required to comply with MaineDEP Chapter 500 and City of Portland Technical Manual Sections 5 and 6 regulations for stormwater management and erosion control.

- Basic Standards – The project is providing for erosion and sedimentation control measures. As noted by the City of Portland reviewers, the Applicant should review the City's recently updated Technical Manual Section 6, and account for the latest regulations for erosion and sedimentation controls.
- General/Redevelopment Standards – The project is proposing to provide for stormwater treatment using underdrained subsurface sand filters. The Applicant has done a review of the site based on redevelopment standards. The intent for treatment within the City of Portland standard is for treatment to be provided for 50% of the non-roof redeveloped area. In addition, treatment should also be considered for new impervious area. Comparing the pre- and post- development

figures, it appears that most of the treatment is being provided for redeveloped rooftop area. While it appears that an adequate total area is treated, the Applicant should provide a description of how the project meets the City's requirements on the types of areas that are treated, or provide justification for why alternate areas are treated.

- Flooding Standards – The project will be reducing stormwater flows as required by the Flooding Standards.

The applicant has addressed concerns regarding the installation and maintenance of the subsurface sandfilter located in the north courtyard. The applicant has indicated that the lobby area along the Washington Avenue frontage will be utilized to move construction equipment in and out of the courtyard area as necessary. Any equipment that is unable to be transported using the lobby area, a crane will be utilized to transport equipment over the three-story level of the building.

Staff Discussion: The City has reviewed the submitted stormwater management plan and associated materials, and have found that the application generally complies with the City's locally adopted stormwater management requirements. The City has requested that the applicant update their stormwater maintenance agreement to detail how the subsurface sand filter within the proposed courtyard will be maintained, and has also requested that the applicant provide additional information related to the proposed underdrains for the retaining wall at the rear of the property, and information regarding the proposed sewer connection from the building. Additionally, the City is requesting that the applicant submit an updated erosion and sedimentation control plan as required under Sec. 12 of the Technical Manual. These items have been drafted as conditions of approval for the Board's consideration.

3. Public Infrastructure and Community Safety Standards (Section 14.6.3)

A. Consistency with City Master Plans

The proposed project is consistent with the designated zoning, which has been found to be in conformance with the City's comprehensive plan and therefore this standard is considered met.

B. Public Safety and Fire Prevention

The proposed project has been designed to provide adequate emergency vehicle access to the site provided directly from Washington Avenue and from the drive aisle along the southeast side of the site. The proposed building will have a sprinkler system per City code.

The project would provide new site lighting and has been designed to promote natural surveillance and access control. The side yard will also feature a fence with a pedestrian gate that will help to delineate public and private spaces.

Staff consider this standard to be met.

C. Public Utilities

The proposed project does not anticipate overburdening the sewer (project proposes to upsize sewer from 8-inches to 15-inches), storm, and water utility mains within Washington Avenue.

The existing overhead wires along the project frontage will be placed underground. A proposed submersible transformer that is serviced by three-phase primary conduits from a utility pole on Washington Avenue will serve the proposed project. A secondary conduit will extend from the transformer to the building. The applicant has provided ability to serve letters from Central Maine Power (CMP) and Portland Water District (PWD) and has been working with Public Works to relocate and increase the Combined Sewer/Storm Main within Washington Avenue. Justin Pellerin- a Senior Water Engineer at DPW- has provided a letter clarifying the need for an increased sewer main as Attachment S1.

The applicant is proposing an easement to be granted to CMP for the locations of the primary transformer vaults that straddle the private property line and the city right-of-way. The developers are working with a general contractor to determine if temporary construction easements will be necessary during the construction period and will provide supplemental information when available.

Staff consider this standard to be met.

4. Site Design Standards (Section 13.6.4)

A. Massing, ventilation, and wind impact

The applicant has provided an Architectural Design Narrative completed by HOLST Architecture. The building mass has been designed to optimize natural ventilation and daylight for residents by providing two exterior courtyards and a rooftop deck located on the fourth floor, along with a step back on the fifth floor towards the south of the proposed building. The step back also helps to protect the views for the neighboring property.
Staff consider this standard to be met.

B. Shadows

The proposed building is setback 15-feet from the abutting community orchard to the north of the subject property to mitigate shadow impact for the majority of the year. The applicant has provided a shadow study in Attachments 42-45, which complies with the City's requirements, and which demonstrates that the proposed development will have an acceptable impact with respect to shadows on the adjacent public space.

Staff consider this standard to be met.

C. Snow and ice loading

The proposed building does not have any sloped roofs or awnings; this prevents the shedding of snow or ice onto adjacent properties or public ways.

Staff consider this standard to be met.

D. View corridors

This application is not within a protected view corridor, therefore this standard is not applicable.

E. Historic resources

The proposed project does not lie within a designated historic district nor have known archeological resources on the site. Therefore, this standard is not applicable.

F. Exterior lighting

The proposed project includes exterior lighting at the building entrances, along with new street lighting along Washington Avenue that, as proposed, comply with the City's Technical Manual. The applicant has also provided a photometric plan and cut sheets prepared by Reflex Lighting. A full photometric plan has been included as Attachment N.

Staff consider this standard to be met.

G. Noise and vibration

The proposed HVAC system will meet the applicable State and Federal emission requirements and will be screened and directed away from abutters.

Staff consider this standard to be met.

H. Signage and wayfinding

The applicant has noted that building signage will be limited to key areas and constructed as pedestrian scale. The applicant is still determining signage locations and designs. A separate signage permit will be submitted to the City under the separate sign application process.

Staff consider this standard to be met.

I. Zoning-related design standards

The building massing of the building has been designed to optimize natural ventilation and daylight through the inclusion of two exterior courtyards and rooftop amenity deck of the stepped back portion of the building along Washington Avenue. The building also steps down to the South to protect views for the neighboring property and steps back 15' from the adjacent community orchard to the North, mitigating impacts of shadows cast. There are substantial building overhangs and canopies located at the building entrances along Washington Avenue to offer weather protection for pedestrians. The applicant is proposing brick and fiber cement panel for the cladding materials, with most of the brick visible from Washington Avenue and fiber cement panel on the rear (east) of the building and in the residential courtyards. Granite stone veneer is proposed along the base of the building to minimize wear and tear on the façade and large, glazed openings with decorative metallic highlights are used at the street edge.

The applicant has provided a response to the first Design Memo provided by Staff in Attachment AB. The applicant has sufficiently responded to the comments previous provided by specifying façade materials and revising window alignment. See Attachments 46-51 for Renderings and Attachments 1-4 for Material Studies.

X. NEIGHBORHOOD MEETING & PUBLIC COMMENT

The applicant has held two neighborhood meetings. The first was held on December 19, 2024, at 5:30 PM. The in-person meeting was held at the East End Community Center. 20 members of the public were in attendance. Public comment centered on:

- Parking concerns
- Building design and massing

- Proximity to the Roux Institute

A full sign-in sheet and meeting minutes are included as attachments W and X.

The second neighborhood meeting was held on January 8, 2025, at 5:30 PM. The in-person meeting was held at the East End Community Center. Six members of the public were in attendance.

Public comment centered on:

- Parking concerns
- Building design and massing
- Proximity to the Roux Institute

A full sign-in sheet and meeting minutes are included as Attachments AA and BB.

XI. STAFF RECOMMENDATION

Subject to the proposed motions and conditions of approval listed below, Planning & Urban Development Department staff recommends that the Planning Board find that the Major Site Application for 165 Washington Avenue (PL-003143-2024) meets the applicable standards of Portland's Land Use Code.

XII. PROPOSED MOTIONS

A. WAIVERS

On the basis of the application, plans, reports and other information submitted by the applicant, findings and recommendations contained in the Planning Board Report for the public hearing held on February 25, 2025 for application PL-003143-2024 relevant to the Site Plan Standards of the Land Use Code and Portland's Technical and Design Standards, and other regulations, and testimony presented at the Planning Board public hearing:

1. Driveway Spacing

The Planning Board [**finds/does not find**] based upon the Planning Staff's review that extraordinary conditions exist or undue hardship may result from strict compliance with Technical Manual Section 1.5.1.C which states that arterial and collector streets with speeds of 35 mph or less shall have a driveway spacing of 100 feet, that substantial justice and the public interest are secured with the proposed variation in this standard, and that variation is consistent with the intent of the ordinance. The Planning Board [**waives/does not waive]** Technical Manual Section 1.5.1.C to allow a driveway spacing of 11.43 feet from the nearest abutting driveway.

2. Drive Aisle Width

The Planning Board [**finds/does not find**] based upon the Planning Staff's review that extraordinary conditions exist or undue hardship may result from strict compliance with Technical Manual Section 1.10.7 which states that the minimum two-way drive aisle width must be 24 feet for 90-degree parking, that substantial justice and the public interest are secured with the proposed variation in this standard, and that variation is consistent with the intent of the ordinance. The Planning Board [**waives/does not waive]** Technical Manual Section 1.10.7 to allow a two-way drive aisle width of 22.22 feet.

B. SITE PLAN REVIEW

On the basis of the application, plans, reports and other information submitted by the applicant; findings and recommendations contained in the Planning Board Report for the public hearing on February 25, 2025 for application # PL-003143-2024 at 165 Washington Avenue relevant to the site plan regulations; and the testimony presented at the Planning Board hearing, the Planning Board [**finds/does not find**] that the plan is in conformance with the site plan standards of the land use code, subject to the following conditions of approval:

PRIOR TO APPLYING FOR A BUILDING PERMIT

1. The applicant shall update their site plan and stormwater management to address the following outstanding review comments as provided by the City's third-party stormwater reviewer. Updated plans and materials shall be reviewed and approved by the Planning Authority.
    a. The applicant shall provide additional information to clarify the intent and connection locations for the proposed retaining wall underdrains at the rear of the property.
    b. The applicant shall provide an updated profile view of Washington Avenue to confirm that the proposed drop manhole sewer connection is acceptable, and does not conflict with below-grade utilities.
2. The applicant shall provide an updated site plan with turning templates demonstrating that all vehicles entering the site can maneuver and exit the site without performing backing maneuvers onto Washington Avenue. The plan shall be reviewed and approved by the Planning Authority.
3. The applicant shall update the site plan to indicate that the 10 new on-street parking spaces on Washington Avenue will be signed as 2-hour parking. The plan shall be reviewed and approved by the Planning Authority.
4. The applicant shall provide revised tree well details that align with the flush granite curb as shown on the site plan. The plan shall be reviewed and approved by the Planning Authority.
5. The applicant shall provide further clarification for the following selected LID point categories: Provide 1.5 x the required water quality volume and innovative LID site design and/or stormwater improvement. The plan shall be reviewed and approved by the Planning Authority.
6. The applicant shall provide updated building floor plans that identify the location of the proposed workforce housing units to confirm that the proposed units comply with City's Inclusionary Zoning Ordinance. This plan shall be reviewed and approved by the Planning Authority.

PRIOR TO ISSUANCE OF A BUILDING PERMIT

7. The applicant shall provide a comprehensive erosion and sedimentation control (ESC) plan as required under Section 12 of the City's Technical Manual. This plan shall be submitted for review and approved by the Public Works Authority.
8. The applicant shall finalize and update the stormwater maintenance agreement, and as part of this agreement, shall include the Operations and Maintenance Plan for the proposed subsurface sandfilter.
9. The applicant shall provide a public access easement to the City for proposed public sidewalks that extend onto private property, and shall confirm that a minimum of six feet of clear width is provided for pedestrian activity. The draft easement shall be reviewed and approved by the Planning Authority and Corporation Counsel, before being recorded at the Cumberland County Registry of Deeds.

10. The applicant shall enter into an affordable housing agreement (AHA) with the City of Portland, and shall file this agreement as covenant to the 165 Washington Avenue property deed with the Cumberland County Registry of Deeds.

PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY

11. The applicant shall revise the site plan to include the required ten street trees or pay the fee-in-lieu for the remaining four street trees they are required to provide. Per Technical Manual Section 4.1.3.B, the applicant Is required to pay $400 per tree into the City's Street Tree Fund, totaling in $1,600.
12. The applicant shall coordinate with Greater Portland METRO and the Planning Authority to determine an appropriate alternative location for public transit shelter, and shall be responsible for securing access and maintenance rights as required to install a shelter in accordance with Section 1 of the Technical Manual.
13. In the event that the applicant elects to provide a fee in-lieu of providing a portion or all of the required workforce housing units, the applicant shall pay into the City's Jill C. Duson Housing Trust Fund as required under Ch. 14, Sec. 17.2.3.C.6.

XIII. TRAFFIC MOVEMENT PERMIT

On the basis of the application, plans, reports and other information submitted by the applicant; findings and recommendations contained in the Planning Board Report for the public hearing on February 25, 2025 for application PL-003143-2024 at 165 Washington Avenue relevant to the traffic movement permit regulations; and the testimony presented at the Planning Board public hearing, conclusions and recommendations contained in the Planning Board, the Planning Board **[finds/does not find]** that that the plan is in conformance with 23 M.R.S. §704-A and Chapter 305 Rules and Regulations pertaining to Traffic Movement Permits, subject to the following conditions of approval:

PRIOR TO ISSUANCE OF A BUILDING PERMIT

1. The applicant shall update their site plan to include a 5-foot curb extension and provide a Rapid Rectangular Flashing Beacon (RRFB) at the proposed crosswalk location in front of the development, and show sidewalk replacement along the west side of Washington Avenue in the vicinity of the proposed pedestrian crossing as requested by the Department of Public Works and the City's third-party traffic consultant. This plan shall be reviewed and approved by the Public Works Authority.

PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY

2. The applicant shall construct the five-foot curb extension, install the RRFB, and replace sidewalk along the west side of Washington Avenue to the satisfaction of the Public Works Authority.

XIV. PLANNING BOARD DECISION

On the basis of the findings, conclusions and recommendations contained in the Planning Board report for the public hearing on February 25, 2025 related to application PL-003143-2024 for 165 Washington Avenue, which is attached to the draft approval letter and incorporated therein, the Planning Board **[adopts/does not adopt]** the approval letter as drafted as the Planning Board's decision for application PL-003143-2024, and authorizes the Planning Board Chair to sign the approval letter as drafted.

Att. S1

Statement for the planning board on the proposed combined sewer upgrades.

- The applicant identified the need to relocate the City's existing 8" sanitary sewer line along the site's frontage from underneath the sidewalk to under the street in order to facilitate other required utility upgrades. As part of this alignment shift, DPW also identified the need for the applicant to increase the size of the sewer line from 8" to 15" to accommodate the project's nearly 45,000 gallons of proposed daily sewer flows and the proposed storm drain connections from the development site. This capacity upgrade is necessary to provide adequate sewer and stormwater service for this development project. This section of Washington Avenue is located in a combined sewer area. Unfortunately, no separated storm drain system is close enough to the site to allow the developer to connect the site's stormwater to a separated system. As part of recent stormwater management technical manual updates, DPW is requiring the applicant to provide on-site stormwater storage to offset the project's impact on the combined sewer system. This requirement helps ensure that development project's don't adversely affect the City's continued efforts to reduce combined sewer overflows City wide. The applicant's site design is in compliance with the minimum stormwater detention volume requirement. With the stormwater detention being provided by the project and the combined sewer upgrades being proposed, DPW can conclude there is sufficient capacity in the sewer system to accommodate storm and sewer flows for this project.

165 Washington Avenue - Traffic Waiver Review

External Inbox

Tom Errico 10:44 AM (0 minutes ago)

to me, Kristoffer, Jeremiah

Hi Taylor – I have reviewed the information provided by the applicant as it relates to a request for waivers from the city's Technical Standards and have the following comments.

- The project is requesting a wavier for driveway separation. Given that the proposed project driveway will serve only 11 parking spaces with low vehicle turnover, and the abutting driveway serves a low volume residential use, it is my professional opinion the two driveways will function safely. I would note that in conjunction with the project, three existing driveways will be reduced to a single driveway, which is a positive outcome from an access management perspective. Accordingly, I support the request for a waiver.
- The project will be providing a parking aisle width of 22.22 feet and thus does not meet the city standard of 24 feet. In support of the applicant's waiver request, vehicle turning templates have been provided documenting adequate maneuvering space will be provided. Based upon the turning template information and low vehicle turnover, I support the request for a waiver.

Please contact me if you have any questions.

Best regards,

Tom Errico, P.E.

Portland, ME 04101

November 20, 2024

Subject: Major Site Plan Application
165 Washington Avenue, Portland, ME

Mr. Grooms:

On behalf of Redfern Properties, we are pleased to submit a Major Site Plan Application for the proposed redevelopment at 165 Washington Avenue, in Portland Maine (Chart 10, Map D, Lot 1) currently within the Neighborhood Business (B2b) Zoning District. The project proposes to redevelop the vacant lot and construct a new 7 floor multi-family apartment building with 326 dwelling units and a ground floor commercial space. The project will include additional internal residential amenity areas, two exterior courtyard amenity spaces, structured parking below the building, and various infrastructure upgrades.

We are pleased to submit an application which will increase the available housing stock consistent with the City's Comprehensive Plan, provide onsite affordable housing, implement stormwater treatment, improved sanitary sewer main capacity, drop existing overhead wires underground, improve the Washington Avenue streetscape, sidewalk reconstruction, street tree plantings and provide community space along the Washington Avenue corridor.

The project is subject to a Major Site Plan Development approval, along with the City's delegated review authority of a Maine DEP Stormwater Law and Maine DOT Traffic Movement Permit from the Planning Board. We look forward to your review of this project, if you have any questions regarding these application materials, please do not hesitate to reach out.

Sincerely,

Peter Heil, P.E.
Project Manager
Acorn Engineering, Inc.

The following documents and drawings will be uploaded onto the City's electronic submission site per the procedure outlined in the application:

Documents:

- Section A: Cover Letter

Portland, Maine 04101

February 14, 2025

Subject: Tavata – 165 Washington Avenue Redevelopment
Portland, ME
Comment Response Letter

On behalf of Redfern Properties, we are pleased to respond to the comments that we received dated January 15th, 2025 and comments received at the January 28th, 2025 initial Planning Board workshop, related to the proposed redevelopment project located at 165 Washington Avenue in Portland, ME.

Comments Related to Transportation Standards

Impact on Surrounding Street Systems

Overview *– The applicant has provided a traffic movement permit completed by a licensed traffic engineer from Barton & Longuidice. The project proposes closing two curb cuts along Washington Avenue, providing only one point of vehicular access and egress to the site through the structured parking entrance.*

Comment *– The applicant should provide information on the use/management of the on-site parking spaces. This should include providing gate operation details as part of assessing the potential for waiting entry vehicles to block the sidewalk and impact mobility and safety on Washington Avenue.*

Response – The designation for the 11 parking spaces has not been decided at this time. The proposed access gate has been moved to the rear of the drive aisle and will not negatively impact entry vehicles and adversely impact mobility and safety on Washington Avenue.

Comment *– The site plan shall be revised to show the limits of proposed utility trenching/pavement removal. Given the extensive utility work proposed within Washington Avenue, full street width curb to curb replacement of Washington or half street width curb to centerline will be necessary.*

Response – Understood. The pavement trench cut limits have been revised to show a half street width replacement as required.

Comment *– More information to come from our traffic reviewer's TMP scoping meeting with the applicant's traffic engineer.*

Response – Please refer to the attached Section 7 for additional information associated with the TMP and comments received during the scoping meeting.

Access and Circulation

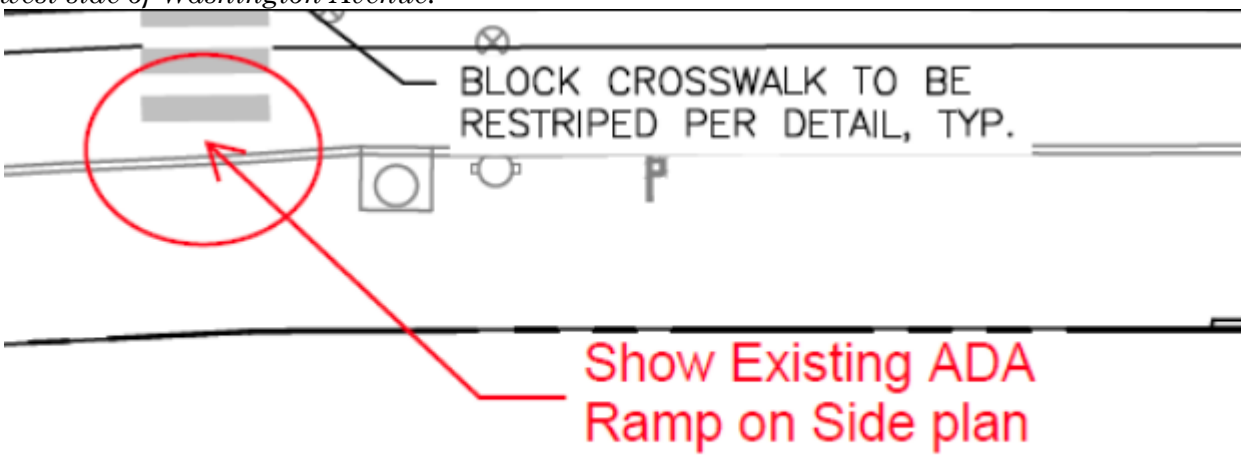
Overview *– All pedestrian access will be directly from the sidewalk on Washington Avenue. With the proposed closure of two curb cuts, the applicant is proposing to redevelop the sidewalk along the property's frontage on Washington Avenue. As part of this redevelopment, the applicant is proposing to widen the sidewalk to improve the pedestrian experience. The applicant is also proposing two raised granite tree beds along Washington Ave.*

Comment *– The site plan and landscape plan shall be revised to match. The landscaped island per architect's site plan are 2-feet tall, but the details included in the plan set are the tree well with a 3-5-inch reveal. In addition, the applicant shall confirm that the location and size of the planters will not impact pedestrian operations and ADA accessibility along Washington Avenue.*

Response – The landscape islands have been revised to be located closer to the Washington Street curbline to allow uniform pedestrian access across the site. The planter edge material is proposed to have a flush curb and will set setback approx. 2' from the Washington Avenue curbline. See the revised Site Plan and Landscape Plan for additional information.

Comment *– The applicant has depicted a trash room on their site plan that enters into the structured parking. Applicant shall provide details on solid waste removal from the site and turning templates shall be provided for truck circulation entering and exiting the garage. The applicant shall also provide information on the timing and frequency of trash pick-ups.*

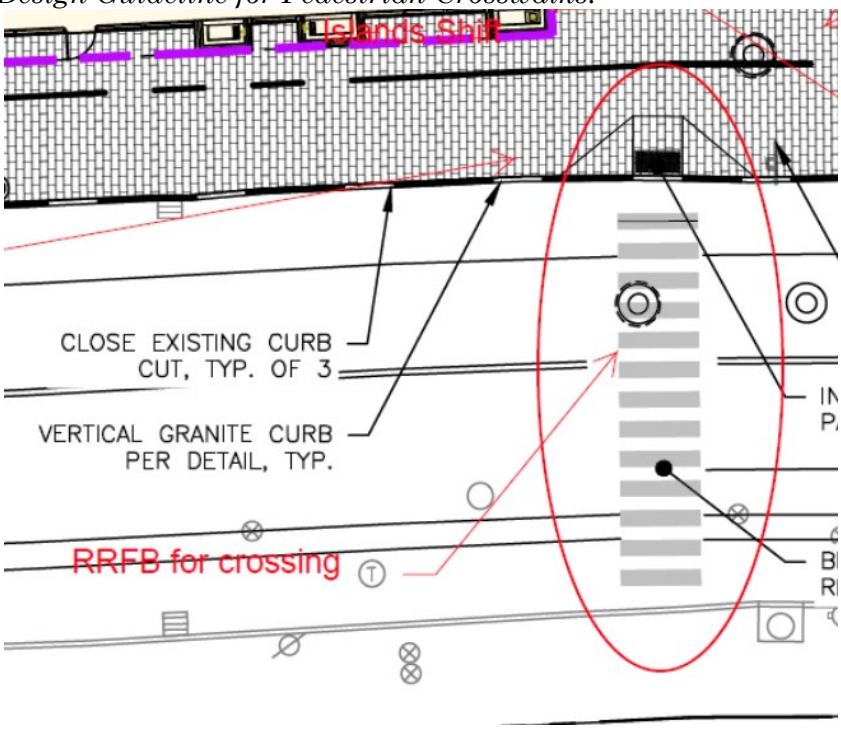
Response –It is our understanding bins will need to be wheeled out of the trash room to the internal driveway in coordination with truck pick up. Trash pickup timing and frequency will be coordinated by the property owner and solid waste removal company to reduce impact on tenants and prevent trash room overflow. See Section AC. Autoturn for trash truck turning movements.



Comment *– In addition, the applicant shall provide turning templates for personal vehicles entering and exiting the garage.*

Response – See Section AC. Autoturn for pedestrian vehicle turning movements entering and exisitng the garage.

Comment *– The applicant shall provide details on how deliveries to the development will be managed.*

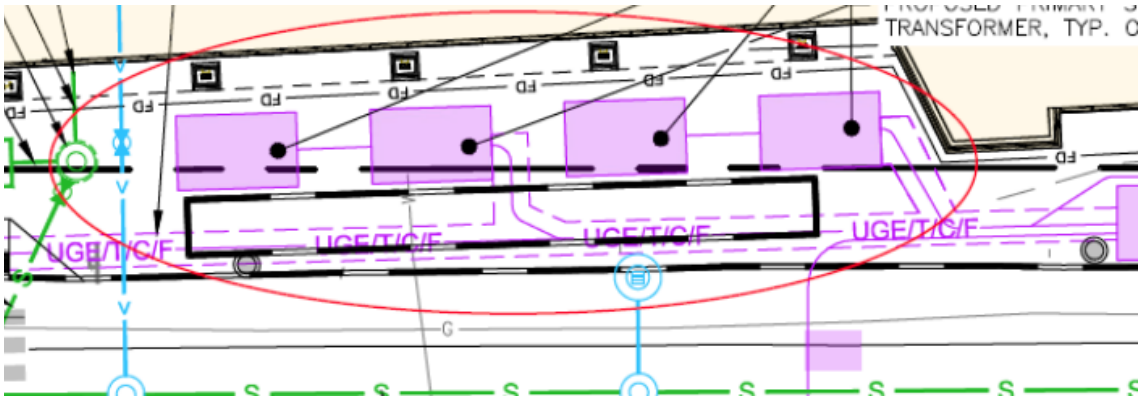


Response – The development proposes (3) 15-minute parking spaces on Washington avenue to be utilizes for delivery services. It is our understanding that there will be space on the ground floor for mail, food deliveries, and other packages to facilitate deliveries.

Comment *– The applicant shall update the site plan to show the existing ADA ramp on the west side of Washington Avenue.*

Response – The existing ADA ramp across the Street on Washington Avenue is shown on the Site Plan. See Sheet C-10 for additional information.

Comment *– The applicant shall provide RRFB for the Washington crossing, and verify that the lighting of the Washington Avenue midblock is compliant with the recently updated Maine DOT Lighting Design Guideline for Pedestrian Crosswalks.*

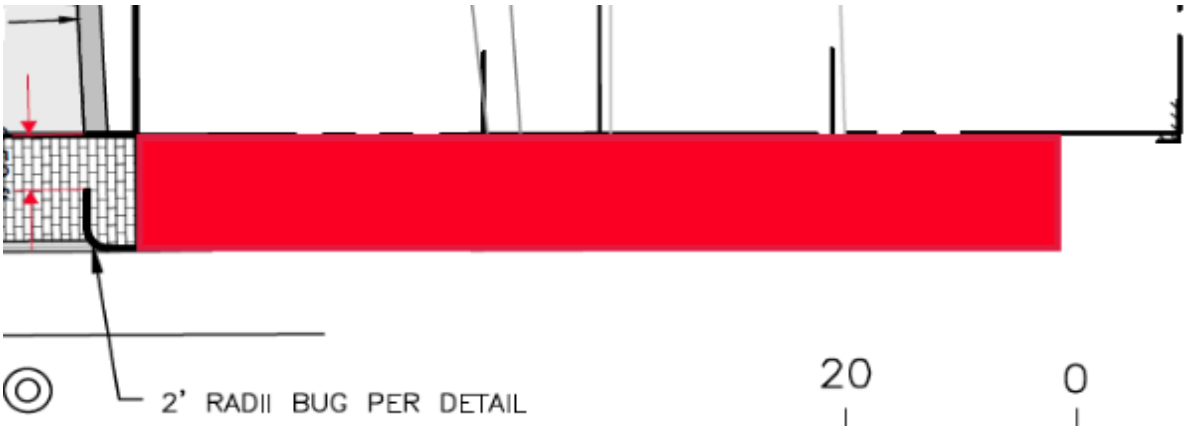


Response –Rectangular Rapid Flashing Beacons (RRFB) are proposed to be installed at the existing midblock crosswalk. Additionally, the lighting at the crosswalk will conform to the

recently updated Maine DOT Lighting Design Guideline for Pedestrian Crosswalks. See below from our lighting designer:
Note that the vertical illuminance in the crosswalk at 5' AFG is based upon the VTTI study referenced in Section 12.1 – fc level should be at least 1.0 with a 4:1 uniformity. We meet that from both the southern approach (1.99 avg, 3.98:1 uniformity) and northern approach (2.4 avg, 3.4:1 uniformity).

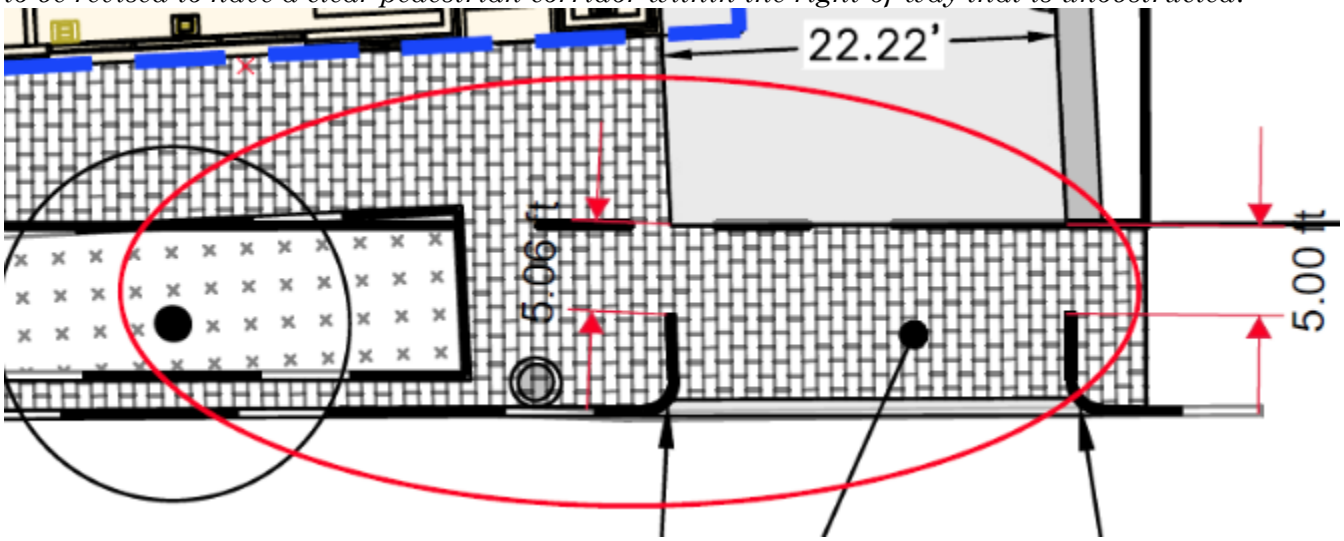
The horizontal illuminance references the AASHTO recommended illuminance for roadway lighting on p. 61. This states that the minimum horizontal illuminance should be minimum 1.0 fc avg (for intermediate land use//minor arterials) or 1.4 min avg (for commercial land use//minor arterials). The project proposes a 1.97 fc avg, 1.97:1 uniformity.

***Comment** – The locations of the transformers and landscaping planters should be swapped to create a consistent pedestrian corridor within the right-of-way.*



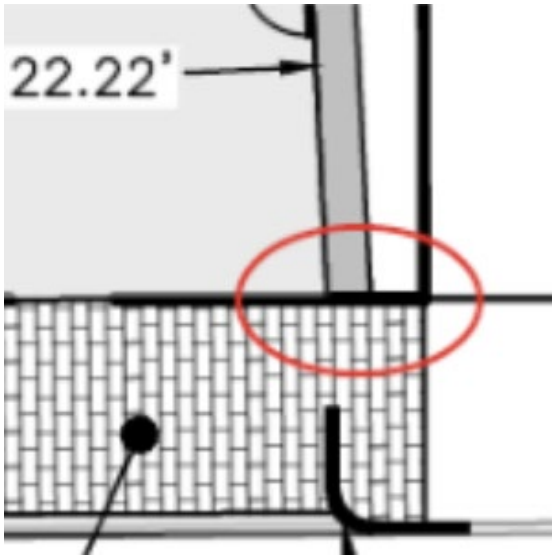
Response – The landscape island adjacent to the subsurface transformers has been eliminated to create a consistent pedestrian corridor across the project frontage. See the revised Landscape Plan and Site Plan for additional information.

***Comment** – The proposed improvements and existing conditions in the City right-of-way shall be dimensioned on the plan view sheets. For example, street, lanes, sidewalk, esplanade, driveways, and other improvements shall include measurements detailing typical widths, and widths where the typical width varies.*



Response – Understood. Please see the Site Plan for dimensions on the proposed improvements and existing conditions in the City right of way.

***Comment** – The sidewalk replacement limit shall extend to the recently replaced ramp at Cove Street and Washington Avenue intersection.*



Response – The sidewalk replacement limits has been updated to extend to the top of the recently replaced ramp at Cove Street. See the Civil Plan Set for additional information.

Comment *– The sidewalk transition across the driveway apron and landscape planters need to be revised to have a clear pedestrian corridor within the right-of-way that is unobstructed.*

Response – The landscape island located near driveway apron has been revised to be located closer to the Washington Street curbline to allow unobstructed pedestrian access across the site frontage.

Comment *– No aspect (including footings) of the proposed retaining wall shall be constructed within street right-of-way.*

Response – The Retaining Wall design limit at this location has been updated to be completely outside Washington Street right-of-way. See the Civil Plan Set for updated information.

Public Transit Access

Overview *– The proposed project is located along a bus route and is located 150-feet from the nearest bus stop. However, the bus stops near the project do not provide a transit shelter. Per Standard 13.6.1(C), if a development consists of 20 or more dwelling units, the applicant shall provide a transit shelter adjacent or within the public right-of-way along its frontage, or at a nearby high-volume transit stop without a transit shelter, when the following criteria are met:*

a. The development is proposed along an existing public transit route on a principal or minor arterial roadway, as shown in the Federal Street Classification Map.

b. The nearest existing transit shelter is more than ¼ mile from the site, measured along right-of-way.

Comment *– The applicant shall review Standard 13.6.1(C) and revise plans to meet this standard.*

Response – The development team is in coordination with City Staff on determining the best location for a new Metro Bus Shelter. Our plans have been updated to include a potential future Metro Bus Shelter location on the project frontage. A meeting with City Staff and METRO is scheduled for February 18th, 2025 and can provide additional information after the METRO meeting and ahead of the final Planning Board hearing scheduled for February 25, 2025.

Parking

Overview *– The applicant is proposing 11 parking spaces (two of which are ADA) within structured parking located on the south side of the proposed development. A total of 20% of the proposed parking spaces will be Level II EV charging or higher and 50% will be will be EV ready. The applicant has requested two waivers associated with this structured parking:*

1. *A reduction of driveway spacing from 100-feet to 11.43-feet from the nearest abutting driveway.*
2. *A reduction in drive aisle width for 90-degree parking from 24-feet to 22.22-feet.*

The applicant is also proposing a bicycle storage room with 152 spaces along with six exterior bike hitches, totaling in 164 bicycle parking spaces.

The applicant will be responsible for snow removal and has dictated that snow storage will not be located in an area that interferes with pedestrian walkways or stormwater management systems.

***Comment** – Has the applicant considered swapping the sides of the building that the retail and parking are on? This would remove the need for a driveway spacing waiver and locate the retail space in an area that is closer to other commercial uses.*

Response – The applicant has considered the retail space location but ultimately believes that the western corner of the building is the preferred location due to the building acting as a gateway for vehicles entering the city from the highway. The retail space will be one of the first commercial uses seen on the left side of Washington Avenue as vehicles pass the Mt Joy Orchard. Additionally, the project is activating street frontage along Washington Avenue with a new brick sidewalk and landscaping islands which will act as a inviting connection to the other commercial uses on Washington Avenue. The driveway waiver for spacing is still being requested, and in conformance with the character of the neighborhood / street within the immediate vicinity of the project.

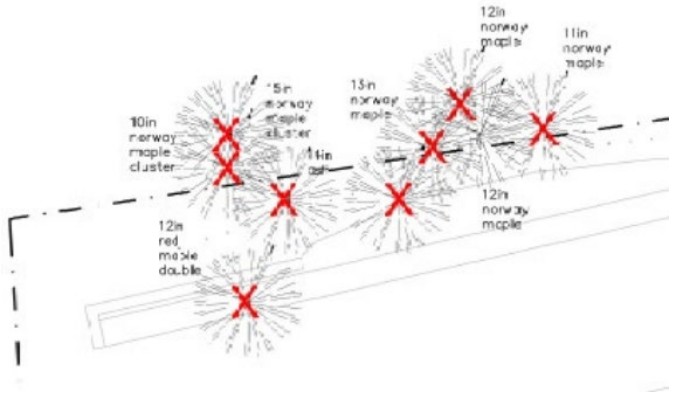
***Comment** – The applicant should provide information on the use/management of the on-site parking spaces. This shall include providing gate operation details as part of assessing the potential for waiting entry vehicles to block the sidewalk and impact mobility and safety on Washington Avenue.*

Response – The proposed vehicular access gate and pedestrian gates have been relocated toward the rear of both side yards to avoid potential conflicts regarding mobility impacts and safety on Washington Avenue. Use/management of the on-site parking spaces is yet to be determined.

Comments Related to Environmental Quality Standards

Preservation of Significant Natural Features

***Overview** – Per Standard 13.6.2(A), all new developments shall preserve and protect significant natural features by incorporating principles of Low-Impact Development (LID) in accordance with the LID standards of the Technical Manual.*



***Comment** – The applicant shall review LID requirements in Section 3 of the Technical Manual and provide a completed LID scoring worksheet as part of the next submission.*

Response – See Section AD. LID Checklist for the updated LID scoring worksheet.

Site Landscaping and Buffers

Overview *– The applicant is proposing the removal of the 37 trees on-site, including two street trees along Washington Avenue. This is to be supplemented with 31 new trees, including six street trees, and various perennials to supplement the removed vegetation. Per Standard 13.6.2(B), one street tree is required for every 25-35 linear feet of frontage along a city right-of-way. Based on the 343-feet of street frontage of the proposed project, a total of 10 street trees are required. The applicant is also required to provide a minimum of one shade tree per 5,000 square feet of lot area per Standard 13.6.2(B). The applicant is required to plant 13 shade trees and has satisfied this requirement by proposing 31 deciduous trees be planted as a part of the proposed project.*

Comment *– The applicant is proposing the removal of trees that extend beyond the retaining wall and property line on the north side of the property. The applicant shall demonstrate why and/or provide information on why these trees are proposed to be removed and if there are opportunities to preserve these existing trees.*

Response – The trees located outside the property line have been updated to remain as part of this project. It is our understanding that some of trees located within the property line will need to be removed to construct the building foundation and retaining walls. See the revised Landscape Plans for additional information.

Comment *– If the applicant is unable to provide additional street trees, the applicant shall meet the street tree requirement through an alternative as outlined in Section 4.1.3 of the Technical Manual.*

Response – The project currently proposes 6 street trees. It is our understanding the applicant will need to contribute $400 per tree to satisfy the remaining street tree requirement.

Comment *– The applicant shall provide confirmation that proposed courtyard trees receive enough solar exposure to be viable in that area.*

Response – The trees within the courtyard have been updated to an understory shade tolerant species. See the Landscape Plan for additional information.

Water Quality, Stormwater Management and Erosion Control

Overview *– The project is required to comply with MaineDEP Chapter 500 and City of Portland Technical Manual Sections 5 and 6 regulations for stormwater management and erosion control.*

- *Basic Standards – The project is providing for erosion and sedimentation control measures. As noted by the City of Portland reviewers, the Applicant should review the City's recently updated Technical Manual Section 6, and account for the latest regulations for erosion and sedimentation controls.*
- *General/Redevelopment Standards – The project is proposing to provide for stormwater treatment using underdrained subsurface sand filters. The Applicant has done a review of the site based on redevelopment standards. The intent for treatment within the City of Portland standard is for treatment to be provided for 50% of the non-roof redeveloped area. In addition, treatment should also be considered for new impervious area. Comparing the pre- and post- development figures, it appears that most of the treatment is being provided for redeveloped rooftop area. While it appears that an adequate total area is treated, the Applicant should provide a description of how the project meets the City's requirements on the types of areas that are treated, or provide justification for why alternate areas are treated.*
- *Flooding Standards – The project will be reducing stormwater flows as required by the Flooding Standards.*

Comment *– The applicant shall review MaineDEP Chapter 500 and the Technical Manual Section 5 and 6. Stormwater management plans and erosion control report and plans shall be updated accordingly.*

Response – The Erosion Control Plan has been updated accordingly. See Section K for additional information.

The proposed stormwater design has been updated to meet the city's requirements and target new impervious areas and specifically the highest pollutant ranking area onsite (Drive Aisle). The stormwater treatment has been revised from the subsurface sand filter in the internal courtyard to a StormFilter BMP located downgradient of the R-Tanks within the drive aisle. Please refer to the revised Stormwater report for additional information.

Comment *– A subsurface sandfilter has been proposed to be located in the center of the building within a plaza area. The stormwater report includes an inspection and maintenance plan which identifies specific maintenance items for the proposed system. It is not clear from the site plan and elevations provided how access will be provided for equipment to maintain the proposed system. Please provide additional confirmation that maintenance access can occur with the access points that will be available.*

Response – It is our understanding in the event that the subsurface system requirements replacement, maintenance equipment will be brought into the courtyard with the use of a crane if necessary. Routine maintenance, including vacuuming and jetting sediment/debris can occur with a hose pulled through the pedestrian doors along the 3-story bar portion of the building with direct access to the maintenance structures.

Comment *– With the subsurface sandfilter location within the plaza area, the outlet stormdrain pipe will be extended beneath a portion of the building. The Applicant should confirm that there will not be any conflict with the foundation depths at this location.*

Response – There are no anticipated conflicts with the foundation limits and the proposed stormdrain outlet under the building, as the storm drain will be a few feet lower than the typical frost depth foundation designs. If needed, the stormwater design could sleeve through the foundation footing. Acorn will continue to monitor as Structural design finalizes prior to issuing plans for construction.

Comment *– Plans have been provided to show the proposed layout of the subsurface sand filter within the courtyard space. The R-Tank plans should be coordinated with the site and grading plans which show a different layout.*

Response – The Stormwater Design has been updated to meet the latest standards in Section 5 of Portland Technical Manual. See attached for the latest Grading Plan and Stormwater Report for additional information. The R-tank design & geometry revisions are currently in coordination with Ferguson and additional information from Ferguson is forthcoming.

Comment *– The private grease trap and storm sewer manhole should be moved from the right-of-way onto private property.*

Response – The private grease trap hase been relocated inside the building and no longer shown inside the right of way. The sewer manhole has also been relocated to the private property. See Sheet C-20 for additional information.

Comments Related to Public Infrastructure + Community Safety Standards

Public Utilities

Overview *– The proposed project does not anticipate overburdening the sewer (project proposes to upsize sewer from 8-inches to 15-inches), storm, and water utility mains within Washington Avenue. The existing overhead wires along the project frontage will be placed underground. A proposed submersible transformer that is serviced by three-phase primary conduits from a utility pole on Washington Avenue will serve the proposed project. A secondary conduit will extend from the transformer to the building.*

The applicant is proposing an easement to be granted to Central Maine Power for the locations of the primary transformer vaults that straddle the private property line and the city right-of-way. The developers are working with a general contractor to determine if temporary construction easements will be necessary during the construction period and will provide supplemental information when available.

Comment *– The applicant shall provide Ability to Serve letters once they are received from the respective companies.*

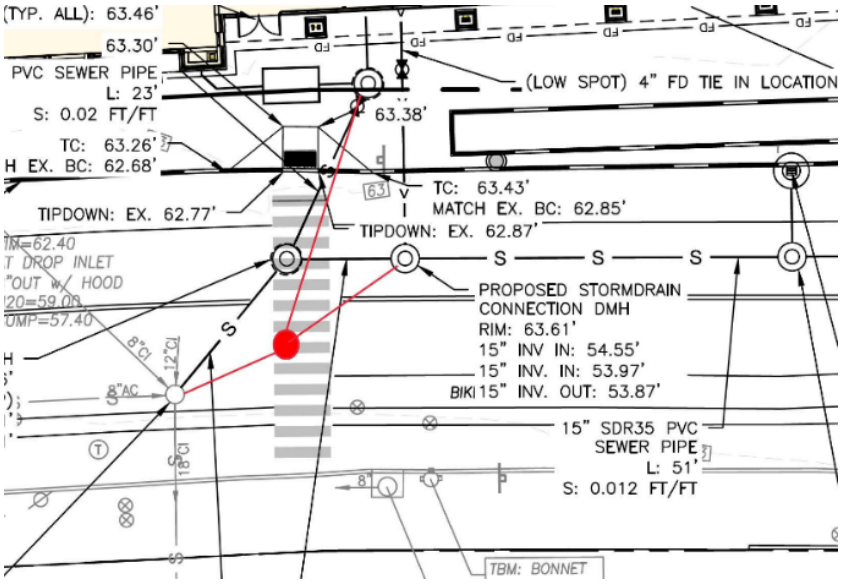
Response – Ability to Serve letters from CMP and Portland Water District are attached within this submission package. The project team has been working with Public Works to relocate and increase the Combined Sewer/Storm Main within Washington Avenue and the stormwater design has been recently updated to meet the new city technical manual updates.

***Comment** – An extensive system of below-grade electrical structures is proposed within the sidewalk. City reviewers recommend that the Applicant add notation to the plans emphasizing the coordination required around installation of these structures prior to the redevelopment of the sidewalk and curbing, and construction of the tree planters, to ensure that the structures are low enough to accommodate these improvements. In addition, the applicant should confirm that there will be adequate depth beneath the tree planter areas for the installation of the proposed duct banks and other utilities.*

Response – Additional notes have been added to the plans to clarify that no tree planters shall be installed above CMP Splice Boxes and 38Y manholes. Lastly, the project team has reached out to CMP regarding the proximity of street trees and primary conduit to further coordinate feasibility and ensure the street trees can be installed over the duct bank.

***Comment** – The applicant shall provide a profile for the proposed Washington Avenue improvements.*

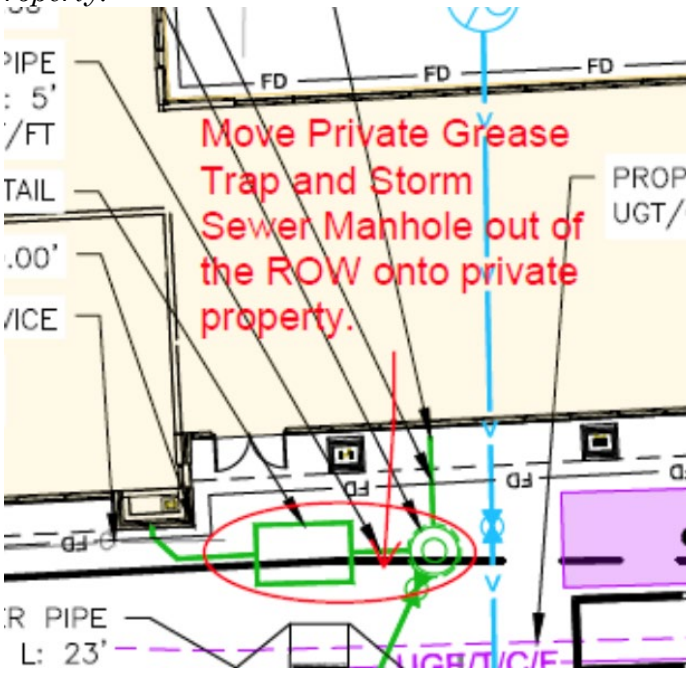
Response – See Sheet C-21 for the profile showing the proposed utility improvements within Washington Avenue.



***Comment** – "SEWER" covers for the proposed storm drainage manholes at connection points into the Washington Avenue combined sewer shall be utilized.*

Response – Stormdrain connections from the site will utilize the city's precast sewer manholes with 'Sewer" covers to connect to the combined system. See Sheet C-30 for additional information.

***Comment** – The City of Portland Precast manhole detail shall be updated to match the most current Technical Manual detail. The detail shown on sheet C-44 depicts steps which are no longer City standard.*



Response – The precast manhole detail has been updated to reflect Portland's most recent Technical Manual detail.

***Comment** – DPW would like the applicant to review a potential alignment shift to the way the proposed 15" sewer enters into the City's existing SMH at the Gould Street intersection. The concern is that the currently proposed pipe angle may cause structural issues with the structure when it is cored into. The alignment shift shown below would shift the proposed 15" connection further away from the existing 12" connection which is scheduled to be plugged a part of the project. Please also note that channel modifications will likely be required in the existing manhole so it can properly receive the new 15" sewer pipe.*

Response – The combined storm/sewer network has been updated to reflect the above geometry and this specific section of the sewer main has been updated to 18". A note has also been added to the plans to modify the existing manhole *channel to accommodate the 18" inlet.*

Comment *– The private grease trap and storm sewer manhole should be moved from the right-of-way onto private property.*

Response – The private sewer manhole has been relocated outside the right of way and the grease trap will be located internally within the retail space. See Sheet C-20 for additional information.

Comments Related to Site Design Standards

Shadow

Overview *– The proposed building is setback 15-feet from the abutting community orchard to the north of the subject property to mitigate shadow impact for the majority of the year. It is our understanding that the applicant has completed a shadow study as part of a different application.*

Comment *– The applicant shall submit a shadow study that uses the most recent renderings and elevations of the proposed project.*

Response – A shadow study using the most recent renderings is included in this submission. See Plans 42 through 45 Shadow Studies for additional information.

Signage and Wayfinding

Overview *– The applicant has noted that building signage will be limited to key areas and constructed as pedestrian scale but has not included a signage plan or details in their submitted materials.*

Comment *– The applicant shall provide more details on the proposed signage for the proposed project for entrances and structured parking.*

Response – It is our understanding pedestrian scale signage locations and designs are still being determined by the developers and a signage permit will be submitted to the City under the separate sign application process.

Design Standards

Overview *– The City has provided a design review memo. The proposed project is not within a historic district or associated with a historic landmark, therefore will not require Historic Preservation review.*

Comment *– See Design Review Memo.*

Response – Attached to this letter are the Reponses from Holst Architecture in regard to the comments received in the Design Memo.

Additional Planning Board Workshop and Staff Report Comment Responses

The below comments were interpreted and recorded from handwritten notes during the January 28, 2025 Planning Board workshop and addressed to provided supplemental information requested from the Board.

Comment – It would be helpful to see renderings of the building from the Washington Street Sidewalk and from Munjoy Heights.

Response – See the updated architectural renderings for additional information.

Comment – It would be helpful to see a site cross section including the new retaining walls and how it interacts with the grade of the site.

Response – See Plan Master Profile – 1 and Master Profile - 2 for additional information.

Comment – Please provide unit configurations and Inclusionary Zoning information

Response – Unit configurations have been included in the latest architectural plan set. Additionally, the project will be required to provide 82 units that meet the inclusionary zoning requirements.

Comment – The applicant will be required to provide a letter from their financial institution prior to a public hearing.

Response – The Financial Capacity letter from a financial institution will be provided prior to the public hearing.

Please let us know if you have any additional questions or comments.

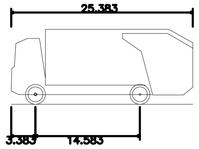
Sincerely,

Pete F. Heil, P.E.
Project Manager
Acorn Engineering, Inc.

1. *Staff recommends that the building entry at the Center Bar Level 01 for the Coworking / Lounge relocate to a more centralized bay with greater sight lines from the public street:* **The door in question is not the building entrance and is only an egress door. The building entrance is located further South, along the Washington Avenue street frontage. See Level 01 Floor Plan for entry location.**

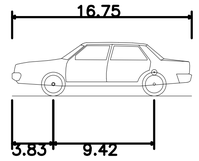
2. *Staff requests that the Applicant submit window specifications that indicate the window transparency to meet .7 or greater for staff review:* **Window transparency called out in material studies and will meet .7 VT requirement.**

3. *Staff requests more information on the proposed exterior façade materials and window specifications and will review resubmitted materials:* **Exterior façade material information provided.**



4. *Staff recommends that the building entry at the Center Bar Level 01 for the Coworking / Lounge relocate to a more centralized bay with greater sight lines from the public street:* **See previous response**

5. *Staff recommends that the applicant explore a symmetrical arrangement of windows at the upper floor of the three-story building module (center bar) facing the street that aligns with the lower level fenestration pattern. In addition, the Applicant is request to revise floor plans or window placement so that windows are fully occupied within each dwelling unit, with windows partitioned between two units not recommended:* **Windows updated for better alignment, see updated elevations and renderings. Windows are fully occupied within each dwelling unit.**



6. *Staff requests that the applicant resubmit additional information for Staff review of exterior façade materials and architectural lighting:* **See previous response**

7. *Staff requests that the applicant respond with how sufficient storage areas will be provided:* **Additional shared storage areas have been added to the plan. See areas on the updated plans provided marked Storage.**

City of Portland ME: Low-Impact Design Requirements				
Owner / applicant name:	Redfern Properties			
Representative name:	Acorn Engineering			
Project address:	165 Washington Avenue			
Project CBL:	010 D001			
Application ID (if known):	PL-003143-2024			
	Maximum Points	**How to Apply**	**Points Awarded**	**LID Standard / Approach**
CORE METHODS: Wetlands, Streams, & Drainage				
Protect natural drainage paths	Required			
Shoreland Zoning	Required			
Meeting DEP and ACOE standards for stream crossings	Required			
Protect wetlands	**12**	Select one option	**12**	Select a site that does not have wetlands or vernal pools = 12pts
				Project maintains a 50' set-back / no-disturb buffer to all wetlands = 10pts
				Project maintains a 25' set-back / no-disturb buffer to all wetlands = 7pts
				Project does not place structures in wetlands and avoids wetlands impacts from construction and stormwater discharges = 5pts
				Project replicates impacted wetlands elsewhere on site or within watershed = 3pt
				Project pays wetlands impact fee = 0pts
Permanently protect stream (intermittent and perennial) and riparian buffers *(exclusive of approved stream crossings; must include a no-disturb zone with markers installed and deed restriction recorded at registry of deeds)*	**12**	Select one option	**12**	Select a site with no streams = 12pts
				Permanently protect all 100ft shoreline buffers = 10pts
				Permanently protect all 75ft shoreline buffers = 7pts
				Permanently protect all 50ft shoreline buffers (intermittent streams) = 6pts
				Permanently protect all 50ft shoreline buffers (required minimum for perennial streams) = 5pts
				Permanently protect all 25ft shoreline buffers (required minimum for intermittent streams) = 5pts
Stream crossings	**12**	Select one option	**12**	Select a site with no streams = 12pts
				Avoid any stream crossings = 10pts
				All stream crossings use a bridge or open bottom culvert structure sized at 1.2 times the bank full width of the stream = 10pts
				All stream crossings use Maine Stream Smart Principles to preserve natural pre-development drainage pathways = 6pts
CORE METHODS: Natural Areas & Habitat				
Preserve threatened or endangered species habitat	Required (Beginning with Habitat Maps at a minimum)			The project does not impact any threatened or endangered species idenfiied on Beginning with Habitat
Protect 30% of trees over 10" DBH	Required (Tree survey required)			The project preserves 30% of trees 10" DBH or greater
Protect intact, contiguous forests and native trees over 10" DBH	**8**	Select one option		All development and land disturbance outside of existing wooded/forested areas (no site clearing in prior 10 years) = 8pts
				Protect 50% of trees over 10" DBH = 6pts
				Protect 40% of trees over 10" DBH = 4pt

CORE METHODS: Soils & Slopes				
USDA Web Soil Survey	Required (provide details how soil limitations will be mitigated)			
Avoid steep slope disturbance	5	Select one option		Selecting a site without slopes 15% or greater = 5pts
				Maintain >20' undisturbed vegetated buffer to all slopes 15% or greater = 3pts
				Maintain 10-20' undisturbed vegetated buffer to all slopes 15% or greater = 2pts
				Maintain 1-10' undisturbed vegetated buffer to all slopes 15% or greater = 1pt
				Disturbance of any slope 15% or greater = 0pts
Protect soils	5	Select one option	5	Redevelopment sites = 5pts
				Detailed, site-specific soil survey; preparation of a Soil Management and Protection Plan; protect highly permeable soils = 5pts
Limit site disturbance and earthwork	8	Select one option		Redevelopment limits disturbance to existing footprint = 8pts
				New development disturbs less than 50% of existing undeveloped site area = 8pts
				New development disturbs less than 75% of existing undeveloped site area = 6pts
			0	New development disturbs greater than 75% of existing undeveloped site area = 0pts
Soil preparation & minimizing compaction	6	Select all options that apply	3	Till soils to a depth of at least 10" prior to revegetation = 3pts
				Organic matter amendments as needed based on soil tests = 3pts
CORE METHODS: Landscaping				
Low-Impact Landscaping	6	Select all options that apply		Redevelopment sites reduce lawn area by 50%, provided no increase in impervious area (lawn becomes landscaping) = 2pt
				New development results in >50% non-impervious developed area is landscaping = 2pt
			2	Use only native vegetation for landscaped areas = 2pts
			2	Using only locally-sourced landscape materials = 2pt
CORE METHODS: Impervious Area & SW Management				
Meeting City's stormwater management standards	Required			
Reduce impervious and increase permeable surfaces	10	Select all options that apply, up to a maximum of 10 points		50% or more of proposed hard surfaces are permeable (porous pavers, permeable concrete, porous asphalt) = 6pts
			4	Minimize parking impervious area by using only the minimum required number of parking spaces, the minimum required parking lot dimensions, maximizing compact spaces and utilizing low-turnover standard parking space width reductions = 4pt
				25% or more of proposed hard surfaces are permeable (porous pavers, permeable concrete, porous asphalt) = 3pts
			2	Minimize roadway impervious area by developing roadways and driveways at the minimum width and using minimum number of curb cuts = 2pt
			2	Reducing the number of driveways by using a shared driveway design = 2pt
			2	Providing transportation alternatives (such as bike share, car share, or similar) = 2pt
Use GI / natural stormwater treatment systems	12	Select all options that apply		Treatment requirements and conveyance achieved through vegetated systems = 6pts
			3	No more than 1-acre of drainage per treatment system = 3pts
				Increase time of concentration on site (1" 25 year storm event) = 3pts
Limit / eliminate salt use	4	Select one option		Detailed winter maintenance agreement, with annual reporting requirement, limiting chloride use (required in UIS watersheds) = 4pts

Bonus Points				
Bonus points are offered for strategies that may go above and beyond typical approaches; may offer particularly innovative site design or engineering ; or may help achieve the larger goal of low-impact development on a regional scale.	10		10	Utilizing structured parking = 10pts
	10			Utilizing a green roof for at least 50% of a newly developed or redeveloped building roof = 10pts
	10			Restoration of previously disturbed natural resources (minimum 500 square feet of restoration) = 10pts
	10			BMPs designed for known water quality impairment within watershed = 10pts
	10			Connecting to City sewer from a site >200 ft from existing City infrastructure = 10pts
	6			Detention of 1.5 times the required volume = 6pts
	6		6	Treatment for 1.5 times the required water quality volume = 6pts
	6		6	Innovative LID site design and/or stormwater improvement - 6pts
	10			Establishing a Traffic Demand Management plan for projects under 50,000ft = 10pts
	Total Possible Points **178**		**Total Points Awarded** **83**	**Minimum points required for approval of LID strategies and techniques** **80**

MAJOR SITE PLAN
GENERAL DOCUMENT AND DRAWINGS CHECKLIST

Please submit each document as a separate PDF file.
Please confirm by electronically checking the boxes in the left-hand column.

** PLEASE FILL OUT AND UPLOAD THE ZONING ASSESSMENT TABLE AND WAIVER TABLE SEPARATELY AS NOTED BELOW **

At the time of application submission, please contact the Department of Public Works regarding E-911 addressing for your project.

GENERAL APPLICATION DOCUMENTS		
Yes	NA	**Project Description** • Cover letter with detailed project description
Yes	NA	**Completed Checklist** (this document)
Yes	NA	**Evidence of Right, Title, and Interest** • Deeds, leases, or purchase and sales agreements
Yes	NA	**Evidence of State or Federal Approvals** • Permits or letters of non-jurisdiction, if applicable
Yes	NA	**Zoning Assessment** (see Zoning Assessment Table) Summary of compliance with use and dimensional standards of the land use code
Yes	NA	**Site Plan Standards Assessment** (see Section 14.6 of the land use code) • Summary of project compliance with site plan standards of the land use code
Yes	NA	**Summary of Existing and/or Proposed Easements or Covenants, applicable.** • Evidence of existing easements and any proposed easements, covenants, public or private rights-of-way
Yes	NA	**Waiver Requests** (see Waiver Table) • Written request for waiver describing request and compliance with applicable waiver standards
Yes	NA	**Financial Capability** • Letter or evidence from a financial institution or third party verifying financial capacity to undertake project
Yes	NA	**Technical Capability** • Evidence of technical capability of applicant and consultants – resumes and/or examples of past projects

MAJOR SITE PLAN
STANDARDS AND SUBMISSION CHECKLIST

Provide assessment of compliance with standards and include supplemental documentation, as applicable.
Please submit each document as a separate PDF file.

TRANSPORTATION	
Yes NA	**Impact on Surrounding Street Systems (14-14.6.1(A))** ● Describe incremental volume of traffic impacts and mitigation measures. If needed
Yes NA	**Access and Circulation (14-14.6.1(B))** Identify and describe the following: ● Site access and internal circulation, including ADA access ● Drive-up features, if applicable ● Loading and servicing needs, routes, and geometry, providing turning templates for delivery vehicles, if applicable ● Sidewalks and condition along street frontages and internal walkways ● Engineered details for ADA ramps and public sidewalks, meeting sidewalk material policy and construction requirements (Technical Manual, Section 1)
Yes NA	**Public Transit (14-14.6.1(C)), if applicable** Identify and describe the following: ● Existing available transit service and proposed transit improvements, including design details, such as easement, pad base, and shelter
Yes NA	**Off-Street Parking (14-14.6.1(D)), if applicable** Identify and describe the following: ● Proposed vehicular and bicycle parking supply (including ADA-compliant parking) in relation to applicable parking requirements in Article 19 of the land use code ● Curb cut separation and parking layout (Technical Manual, Section 1) ● Construction details for bicycle racks ● Management plan for snow storage and removal
Yes NA	**Transportation Demand Management (TDM) (14-14.6.1(E)), if applicable** ● Provide TDM plan drafted in accordance with Technical Manual Section 1 requirements

ENVIRONMENTAL		
Yes	NA	**Preservation of Significant Natural Features (14-14.6.2(A)), if applicable** Identify and describe the following: ● High and moderate value waterfowl and wading habitat ● Aquifers (for Casco Bay Islands) ● Waterbodies (including wetlands, watercourses, significant vernal pools and floodplains) ● Proposed preservation areas and protection measures ● Documentation from environmental compliance consultants and determinations from applicable state and federal agencies
Yes	NA	**Landscape Preservation (14-14.6.2(B))** Identify and describe the following: ● Measures to preserve trees, including within required zoning setbacks (Technical Manual, Section 4) ● Measures to protect existing vegetation during construction
Yes	NA	**Site Landscaping and Buffers (14-14.6.2(C))** Identify and describe the following: ● Overall landscaping approach and consistency with standards ● The use of screening and buffering of service areas and between non-residential and residential uses ● Existing Heritage or Feature Trees on site and measures to preserve ● Compliance with street tree requirements
Yes	NA	**Water Quality, Stormwater Management, and Erosion Control (14-14.6.2(D))** Identify and describe the following: ● Erosion and sedimentation control plan and measures ● Evidence of compliance with Urban Impaired Stream Standards pursuant to DEP Chapter 500 stormwater law, as applicable ● Subsurface sanitary sewage disposal and groundwater protection measures

PUBLIC INFRASTRUCTURE AND COMMUNITY SAFETY	
Yes NA	**Consistency with City Master Plans (14-14.6.3(A))** • Describe proposed easements, rights and improvements to connect or continue off-premises public infrastructure, as applicable
Yes NA	**Public Safety and Fire Prevention (14-14.6.3(B))** Identify and describe the following: • Compliance with Crime Prevention through Environmental Design (CPTED) requirements (Technical Manual, Section 3) • Emergency vehicle access • Consistency with public safety standards (Technical Manual, Section 3)
Yes NA	**Availability and Adequacy of Public Utilities (14-14.6.3(C)) (Technical Manual, Sections 2 & 9)** Identify and describe the following: • Electrical services, including providing underground services • Existing and proposed connections for public utilities and required public utility upgrades • Sewer line connections
SITE DESIGN	
Yes NA	**Massing, Ventilations and Wind Impact (14-14.6.4(A))** Identify and describe the following: • Wind and ventilation impacts on adjoining structures and/or adjacent public spaces, including wind study, if applicable • Bulk, location, or height impacts on adjoining structures
Yes NA	**Shadows (14-14.6.4(B)), if applicable** • Provide shadow analysis of impacts on publicly accessible open space (Technical Manual, Section 11)
Yes NA	**Snow and Ice Loading (14-14.6.4(C))** • Describe building design measures to prevent snow and ice from loading or falling onto adjacent properties or public ways
Yes NA	**View Corridors (14-14.6.4(D)), if applicable** • Describe any protection of designated view corridors (Portland Design Manual, Appendix. 1)
Yes NA	**Historic Resources (14-14.6.4(E)), if applicable** Identify and describe the following: • The site's status as a designated landmark, within a historic district or historic landscape district, or within 100 feet of any designated landmark, historic district, or historic landscape district • Compliance with standards for preservation and documentation of archaeological resources

Yes NA	**Exterior Lighting (14-14.6.4(F))** ● Describe how the proposed site lighting will adhere to photometrics requirements as it relates to light trespass and full cutoff fixture design, pursuant to Technical Manual Section 12
Yes NA	**Noise and Vibration (14-14.6.4(G))** ● Provide data on noise levels for HVAC and other mechanical equipment, such as design specifications, to demonstrate consistency with state and federal noise emissions requirements as well as City code
Yes NA	**Signage and Wayfinding (14-14.6.4(H)), if applicable** ● Provide signage plan showing the location, dimensions, height and setback of all existing and proposed signs ● Provide drawings of all commercial and directional signage on site
Yes NA	**Zone-Related Design Standards (14-14.6.4(I))** ● Address any applicable design review standards by zone, including compliance with Design Manual

MAJOR SITE PLAN
DRAWINGS CHECKLIST

Please upload the following DRAWINGS with the listed details into e-Plan as separate pdfs.

All drawings must be submitted in a 24 x 36 sheet size.

BOUNDARY SURVEY (stamped by a Maine Licensed Surveyor and drawn as per Technical Manual Sec. 13)

SITE PLAN(s) (stamped by a Maine Licensed Professional Engineer) including:

All sheets – Include a title block with project title and the following information:

- Project street address
- Name and address of property owner & applicant
- Licensed design professional, incl firm that produced plans
- North arrow
- Date of preparation and revision history block
- Tax parcel (chart, block, and lot) number

Existing Conditions Plan with the following:

- Existing structures, with distance from primary building façade(s) to the property line
- Approximate location of structures on abutting properties
- All streets and intersections adjacent to the site
- Existing driveways, pedestrian ways, and bicycle infrastructure, including dimensions and materials
- Existing public transit infrastructure
- Existing vehicle & bicycle parking areas
- Existing utilities on site and within adjacent rights-of-way
- Existing grades (two-foot contours preferred)
- Location of water courses, wetlands, and vegetation, or other significant natural features
- Existing soil conditions and location of test pits and borings
- Zoning boundary lines, including overlays
- Location of all existing easements and rights-of-way

Proposed Site Plan with the following:

- Proposed structures, including distance from primary building façade(s) to property lines
- Ground floor area, and finished floor elevations for all buildings
- Any proposed geometric modifications to streets and intersections adjacent to site
- Location, dimensions and materials of all proposed driveways, vehicle, bicycle, & pedestrian access ways with corresponding curb lines
- Engineered specifications/ cross-sections for proposed driveways, sidewalks & paved areas
- Location and dimensions of proposed loading areas, including turning templates
- Proposed transit infrastructure with dimensions/ engineering specifications
- Location of vehicle and bicycle parking with dimensions and engineering specifications
- Location of all snow storage areas
- Exterior lighting (please see Technical Manual Sec. 12 for photometrics requirements)
- Location of fire hydrants

- Location of solid waste management receptacles
- Location of all proposed HVAC and mechanical equipment, including proposed screening, where applicable
- Location of proposed easements and rights-of-way, including dimensions
- Please utilize color-coding and/or hatches and shading to delineate changes between the pre and post development condition as needed

UTILITY PLAN including:

- Proposed electrical infrastructure
- Location, sizing and directional flows of all proposed sewer and stormwater infrastructure
- Location and dimensions of off-premises public or publicly accessible infrastructure adjacent to site
- Electric utility infrastructure

GRADING AND DRAINAGE PLAN including:

- Proposed grades
- Proposed stormwater management measures meeting Technical Manual (Section 5) standards
- Any proposed alteration of a watercourse or wetlands
- Any groundwater protection measures
- Proposed buffers and preservation measures for wetlands or significant natural features

LANDSCAPE PLAN including:

- Existing vegetation to be preserved and preservation measures
- Proposed landscaping, screening, and street trees, including caliper widths for trees
- Planting schedule, including street trees

ARCHITECTURAL PLANS AND RENDERINGS including:

- Exterior building elevations, color renderings, illustrations of all sides
- Axonometric and street-level views for structures greater than three stories in height
- Provide context drawings, if applicable (Design Manual, page 1)
- Floor plans

CONSTRUCTION MANAGEMENT PLAN including:

- Specifics on traffic control, sidewalk sheds, and pedestrian rerouting
- Include a drawing and written narrative

OTHER

- Details and cross-sections, as necessary

ACORN ENGINEERING, INC.

Redfern Properties – 165 Washington Avenue
Major Site Plan Application

Neighborhood Meeting Minutes

January 8th, 2025 / 5:30 pm
East End Community Center
195 North Street, Portland Maine, 04101

Project Team Attendees:

Jonathan Culley (JC): Applicant/Presenter (Redfern Properties)

Haynes Johnston (HJ): Applicant/Presenter (Redfern Properties)

Pete Heil (PH): Civil Engineer/Presenter (Acorn Engineering)

Zach Stevens (ZS): Civil Engineer/Note Taker (Acorn Engineering)

The meeting started at approximately 5:32 pm.

Presentation:

Jonathan Culley:

- Welcome to the Neighborhood Meeting
  - This is the second neighborhood meeting for this project
  - The Planning Board Workshop has been tentatively scheduled for January 28th, 2025
- Overview of Project and Renderings
- Project Overview:
  - The project is proposing a 7-story multi-family apartment building with approximately 325 rooms and a ground floor commercial space.
- Introduction to Project Team
  - Holst Architecture
  - Ryan Senatore Architecture
  - Acorn Engineering
  - Soren Deniord Landscape Architecture
  - Summit Geoengineering
  - Structural Integrity
  - TRC
  - Barton & Loguidice

    - Penobscot General Contractors
- There is an existing housing crisis in Portland, and it is projected to get worse in the upcoming years. Portland is a desirable place to live, and we are looking to help fill that need.
- Overview of building programming including elevations
    - Part of the target tenants are anticipated to include the future Roux Institute Campus students.
    - 25% of units will be deed restricted for medium income earners as required by City Code.
        - This will be the largest project in Portland to meet these demands

Peter Heil:

- Neighborhood Meeting is a city requirement for the Major Site Plan Application.
- A sign-in sheet is available for everyone which will be submitted to the City and becomes public record along with the meeting minutes.
- The Site Plan application has been submitted to the city at the end of November. We are tentatively scheduled for January 28th, 2025, planning board workshop. The agenda has not yet been released but can be found on the City's website, typically the Friday before.
- Programming overview
    - The covered parking area includes 11 spaces
    - The bike room and exterior bike racks include 164 bike spaces
    - Overview of proposed retaining walls and site grading implications
    - The building finish floor elevations will have a step to reduce excavation in the existing slope at the rear of the site
- New Utility infrastructure is proposed
    - The overhead electric will be relocated underground along the project frontage
    - Working in coordination with DPW to relocated existing sanitary sewer lines within Washington Ave.
    - New services to development, including water, sewer, storm, power, communications, and natural gas.
- Landscape Architecture – Soren Deniord is the Landscape Architect
    - Two internal courtyards will contain vegetation and will be designed by a landscape architect.
    - Street trees and programming within the right of way along Washington Avenue will be designed by the landscape architect.
- Stormwater design
    - There is an existing steep slope at the rear of the site that sends water toward the proposed building. The site will be engineered to pick up this stormwater and direct it away from the building.
    - We are proposing to maintain various vegetation to the rear of the lot and preserve trees that can be preserved.
    - New stormwater treatment subsurface BMP installed in internal courtyard to collect and treat roof runoff, with an additional stormwater detention system under the drive aisle to accommodate 100-year storm event.

- Parking
    - To provide some background, the City recode now has a maximum parking requirement. Not a minimum parking requirement. That is why we are proposing 11 parking spaces. The project is relying on multimodal transportation as part of this project. There are two bus stops currently on either side of the project frontage.

Jonathan:

- Parking is a market issue, and we recognize that. The reason this design works (with minimal parking) is because the Roux Institute, which has international students attending school for approximately 18 months, will likely not have cars. We have had preliminary conversations with Roux Development and due to the close proximity of the two projects we are designing a portion of this building with those students in mind.

Haynes:

- Overview of elevations & renderings
    - The proposed building has three portions with different heights
        - 7 story housing section
        - 4 story housing section located over the covered parking
        - 3 story central bar location – this programming is still being finalized.
    - Materials used and architectural finish overview
    - Façade
        - View into Retail Space
        - View into Central Bar area

Jonathan:

- Overview of project schedule
    - The planning board workshop, tentatively scheduled for January 28th. Please keep your eye on the planning board. agenda as this meeting is not confirmed.
    - Planning Board approval is anticipated around March 2025 and hopeful construction start in July 2025.
    - Construction will likely take two years to complete.

<u>Comments, Questions & Answers:</u>

Please note that the following questions and answers were not recorded verbatim and aim to represent and summarize the actual questions, answers, and discussion that took place at the meeting.

Neighbor: Do you think the students will want to live in this building without a car and commute back and forth from the Roux campus? Do you think they will want to ride a bicycle from 165 Washington Avenue to the Roux Campus?

Response: They come to the school for 18 months therefore having a car may not be part of their plan. Our recent projects provide apartments with minimal to no parking and the model does work. Additionally, there is a public bus that will travel back and forth from the Roux Campus.

Neighbor: Who are the 11 parking spaces for? Why did you pick number 11?

Response: We have not finalized who they are for. We picked 11 based on what can fit under the building and the site constraints.

Neighbor: Jonathan, can I put your email on a public blog?

Response: Yes

Neighbor: The 4-story section of the building is directly in front on Munjoy Heights, why?

Response: We wanted to maintain some of the Munjoy heights view lines at this location.

Neighbor: Is it a coincidence that you are building adjacent to Munjoy Heights (as you were the developer on that project as well).

Response: The Northern Burner parcel is a site we have had our eyes on for a long time.

Neighbor: I applaud you for the vision, I think parking is a challenging one. 11 parking spaces seems low, but I love the fact many of the tenants may not need cars. I am concerned tenants will be taking from the existing street parking near the project and it will have a negative impact on our neighborhood.

Response: I understand where your comment is coming from and that is a real possibility. We believe tenants are relying less and less on personal cars and relying more on public transportation. Additionally, the Roux Institute will be providing a parking garage on their campus to accommodate students with cars.

Neighbor: Did the height restrictions for this lot change recently?

Response: Yes, the city re-code was recently released, and it changed the allowable height in the B2b zone to 75' which increased our allowable building height.

Neighbor: How does the building meet the existing slope and what will the side conditions look like when constructed? I believe this is a big question our neighborhood has. I think cross sections and renderings would be helpful at these locations.

Response: Thank you, this building will maintain Jack Path to the rear and will use retaining walls to tie into existing grade. The buildings finish floor steps up as we build into the existing slope on the northeast of the lot, which helps reduce the height in the proposed retaining walls. We have cross sections we can provide.

Neighbor: What does the view of the top of the building look like from the streets uphill of North Street?

Response: The top of the building will likely be visible in the winter months when tree vegetation is sparse.

Neighbor: Can you elaborate on inclusionary zoning?

Response: Portland has an extensive inclusion zoning requirement that requires 25% percentage (82 units in our case) of units to be affordable.

Neighbor: Graduate students do not make a lot of money.

Response: Our building is an apartment that advertises to students. It will not be a dorm. Additionally, the price point for the units is set with students in mind. It should be noted that students attending the Roux Institute will need to make a minimum of $27,000 annually to obtain their student visa.

Neighbor: You will have a lot of people living here. They will have cars and families; their parking needs will encroach on our neighborhood.

Response: The Roux institute will constructing a large parking garage. We do not deny there may be a need for parking.

Neighbor: Where will the Roux Institute garage be located and where will the bike connection bridge be located?

Response: There will be a new pedestrian bridge adjacent to Tukey's Bridge and the Roux Institute garage will be located on their campus. For the students who are at the Roux Institute for 18 months and living in our building for a short time, we believe they will likely not have cars and will have to rely on public transportation. If they do have cars, the parking garage is not far away. This is a similar condition to other cities where you may need to park a few blocks away.

Neighbor: What will the traffic study have for information.

Response: We will have a traffic demand management plan that will provide monitoring including existing traffic counts and crash data at the nearby intersections. It will provide the existing public transportation bus schedules. Then it will take into account what the 325 units impact will be. We will also meet with the city to have a better understanding of if there will be any upgrades to the existing infrastructure.

Neighbor: Washington Avenue is already a heavily used corridor. Hopefully the TDM accurately represents the impacts this project will have.

Response: We believe it will.

Neighbor: Does the Roux Institute have any formal agreements with this project?

Response: Right now, we have no formal agreement. We are currently working closely with them to understand their programming and student's needs. Students have to prove they are making $27,000 annually and we want to provide a comfortable room that meets their income needs.

Neighbor: What percentage of your current tenants on other projects that don't provide off-street parking need to park their cars? People are not coming to Portland to eat because parking is hard to find.

Response: We don't have those numbers. To reiterate, the parking issue is a chance we are taking. If the model does not work, then tenants will not rent an apartment in this building.

Neighbor: Is there a possibility there could be a garage across the street from the project to help Roux Institute students.

Response: No. Roux Institute will provide a garage on their campus and a new pedestrian bridge will provide access to the Roux Institute. We are confident that this building will work and if students have a car, they can park the equivalent of a few blocks away on the Roux Institute.

Neighbor: Even in the colder months of Winter?

Response: I agree there are months where it is colder, and the traveling will be hard on tenants. It would make sense that students would be taking the bus on those days.

Neighbor: The bottom line is not all the tenants will be students, and they will have cars. As a result, they will encroach on the existing on-street parking supply.

Response: I agree this is a real possibility and I encourage anyone to bring this comment to the city. I would like to point out that this project is potentially a risk for us if this model does not work. Additionally, this project is in conformance with the current city code.

Neighbor: In a traditional model, how many parking spaces would this unit count require?

Response: In another building we have parking for about 50% of the tenants, but it is slightly different because it is a condo and not an apartment. I believe that there will be a certain number of tenants who live in this apartment that will not have cars.

Neighbor: How much would a parking garage cost?

Response: This project would simply not work out financially if we removed units and added additional parking. This project is how we create housing in the city. If we provide a bulk of parking on site, the project does not pencil out.

Neighbor: What can you do creatively with Roux and the City to potentially have a safety net for the on-street parking system?

Response: Some of the nearby businesses will be getting an additional 325 tenants and they are excited. We are building this project per the city zoning requirements. We are also concerned about parking, and we are discussing parking arraignments with Roux Institute.

Neighbor: Can the future campus provide parking for non-students?

Response: That is a good question.

Neighbor: A lot of housing is tailored to future people coming to the city. Does that correlate to alleviating the current housing crisis we already have.

Response: We cannot prevent people from coming to the city. We believe a multitude of different types of housing contribute to alleviating the housing crisis in Portland. We need more housing of all types.

Neighbor: Roux is a great positive to Portland.

Response: We agree, we are looking forward to having them.

The meeting concluded at approximately 6:35 pm.

The abovementioned material was as interpreted and recorded from handwritten notes. Please note and relay any discrepancies or disputed information in the recorded minutes to the below address so that they can be reviewed, revised, and resubmitted, as necessary.

PURCHASE AND SALE AGREEMENT

165 WASHINGTON AVENUE, PORTLAND, MAINE

THIS PURCHASE AND SALE AGREEMENT ("Contract" or "Agreement"), made and entered into as of this ~~31st day of May~~ 1st day of June, 2023 (the "Effective Date"), is by and between **RAYMOND H. WATERHOUSE and ALINA WATERHOUSE,** individuals having an address at 105 Partridge Circle, Portland, Maine 04102 (hereinafter collectively referred to as "Seller"), and **REDFERN PROPERTIES LLC,** a Maine limited liability company having an address at P.O. Box 8816, Portland, Maine 04104, or its assigns (hereinafter referred to as "Buyer").

W I T N E S S E T H

WHEREAS, Seller is the record owner of fee simple title to certain real property situated in Portland, Cumberland County, Maine known as 165 Washington Avenue, Portland, Maine, together with certain improvements constructed thereon including a commercial building, and related amenities, facilities, improvements, and appurtenances thereto; and

WHEREAS, the Seller wishes to sell and convey said real property and improvements to Buyer and Buyer wishes to purchase the same from Seller.

NOW THEREFORE, for and in consideration of the foregoing, the sums of money to be paid hereunder, the mutual covenants herein contained, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto covenant, stipulate and agree as follows:

1. Description of Property to be Conveyed. The property which is to be sold and conveyed by Seller and purchased and accepted by Buyer pursuant to this Contract shall consist of the following:

(a) That certain parcel of land lying and being in Portland, Maine, being the property comprised of a 1.53 +/- acre lot identified by the Portland Assessor as Map 10, Block D, Lot 1 and Map 12, Block F, Lot 2, and described in that certain deed to Seller dated September 14, 2007, and recorded in the Cumberland County Registry of Deeds at Book 25470, Page 272, but excepting premises conveyed to Redfern Munjoy, LLC, by deed recorded in Book 31302, Page 177 of said Registry, and being more particularly described in Exhibit A attached hereto and made a part hereof, including all, rights, privileges, easements, hereditaments and appurtenances thereto, and all right, title and interest of Seller in and to the land lying in the bed of any public street, road or avenue in front of or adjoining said property (hereinafter collectively referred to as the "Land");

(b) All buildings, structures, facilities, fixtures, installations and improvements of every kind and description located in, on, over and under the Land, together with the appurtenances thereto including, without limitation, paved parking areas and various drainage and utility structures and improvements (collectively, the "Improvements"); and

(c) All of Seller's right, title and interest, if any, in and to the following (to the extent assignable and to the extent in the Seller's possession or control) and without warranty or representation: (i) all assignable warranties or guaranties given or made in respect of the Improvements; and (ii) all transferable consents, authorizations, variances or waivers, licenses, permits and approvals from any governmental or quasi-governmental agency, department, board, commission, bureau or other entity or instrumentality solely in respect of the Land or the Improvements (collectively, the "Personal Property").

The Land and Improvements are sometimes referred to herein collectively as the "Real Property." The Real Property and the Personal Property are referred to herein collectively as the "Subject Property".

2. Agreement to Sell and Purchase. Seller hereby agrees to sell and convey the Subject Property to Buyer, upon the terms and subject to the conditions set forth in this Contract. Buyer hereby agrees to purchase and accept the Subject Property from Seller, upon the terms and subject to the conditions set forth in this Contract.

3. Earnest Money Deposit. Within three (3) business days after the Effective Date, Buyer shall deposit the sum of [redacted] as the earnest money deposit (which amount shall hereinafter be referred to as the "Initial Earnest Money Deposit") hereunder with The Boulos Company, whose address is One Canal Plaza, Suite 500, Portland, Maine 04101 (hereinafter referred to as the "Escrow Agent"). So much of the Initial Earnest Money Deposit and the Additional Earnest Money Deposit (as hereinafter defined) as may have from time to time been deposited with Escrow Agent hereunder, and any interest earned thereon, are collectively referred to as the "Deposit". Upon Buyer's written request, and subject to the receipt by Escrow Agent of a completed and executed IRS Form W-9 and any other forms or information reasonably requested by the Escrow Agent, the Deposit will be placed in an interest-bearing account. Any interest accrued or accruing on the Deposit shall be and become part of the Deposit. Escrow Agent shall not be responsible for the amount of interest earned on, or charges on, the Deposit. By its counter-execution of this Agreement, Escrow Agent hereby agrees to hold the Deposit in escrow, subject to disbursement in accordance with the terms and provisions of this Contract. In the event Buyer does not elect to timely terminate this Contract pursuant to the express terms herein, the Deposit shall become non-refundable and shall not be returnable to the Buyer under any circumstances except in the event Seller is not able to provide title to the Subject Property as provided in this Contract, or otherwise defaults hereunder, but such Deposit shall, however, be credited to and considered as payment of part of the total Purchase Price (as defined below) at the time of closing hereunder.

Escrow Agent, may, at its option, require the receipt, release and authorization in writing of all parties before releasing the Deposit or delivering or redelivering documents or property to any party or to third parties. In the event a controversy arises over the Deposit, Escrow Agent, at its sole discretion, may tender the funds into court for settlement, after deducting its attorney's fees, court costs, and escrow fees, if any, which have accrued, including any attorney's fees and court costs relating to the tender into court. Seller and Buyer indemnify and hold harmless Escrow Agent and its agents and representatives from all loss or damage they

may sustain in connection with Escrow Agent's performance of these instructions and do hereby jointly and severally release and waive any claims they may have against Escrow Agent, other than any claims a party may have due to the gross negligence, malfeasance or misconduct of Escrow Agent in the performance of its duties hereunder.

4. Purchase Price and Method of Payment. Subject to credits, adjustments and prorations for which provisions are hereinafter expressly made, the total purchase price to be paid by Buyer to Seller for the Subject Property (the "Purchase Price") shall be [redacted] The Purchase Price shall be paid by Buyer to Seller in the manner and at the times as follows:

(i) The Deposit, to the extent paid by Buyer to Escrow Agent hereunder, shall be credited to Seller and considered as payment of part of the Purchase Price for the Subject Property at the time and upon consummation of the closing of the sale and purchase transaction contemplated in this Contract.

(ii) The balance of the Purchase Price shall be paid to Seller by Buyer by wire transfer or other immediately available funds acceptable to Seller, at the time of closing hereunder, subject to credits, adjustments and prorations as expressly provided herein.

5. Title and Survey.

(a) Title Commitment. Buyer shall obtain from a nationally recognized title company (sometimes referred to herein as the "Title Company") a commitment for owner's title insurance for the Real Property (the "Title Commitment"). Within five (5) days after the Effective Date, Seller shall deliver to Buyer copies of surveys of the Land that Seller may have in its possession or control (collectively, the "Existing Survey"). Buyer may order an update of the Existing Survey, or if no Existing Survey exists, a new survey of the Land; provided, however, Buyer must notify Seller of any material objections to the update of the Existing Survey or the new survey prior to the expiration of the Due Diligence Termination Date (as defined below), otherwise Buyer shall be deemed to have waived any right to object to same and any such inconsistencies shall constitute Permitted Exceptions (as defined below).

(b) Buyer's Review of Title Matters. Buyer shall have until the Due Diligence Termination Date to notify Seller in writing of any objection which Buyer may have to any matters reported or shown in the Title Commitment or the exception documents ("Buyer's Objection Letter"). Any matters reported in or shown by the Title Commitment and not timely objected to by Buyer as provided above shall be deemed to be "Permitted Exceptions". On or before the fifth (5th) business day following receipt of Buyer's Objection Letter, Seller shall elect, by delivering written notice of such election to Buyer and Escrow Agent ("Seller's Response") whether or not to cause the Title Company to remove any matters objected to in Buyer's Objection Letter. If Seller fails to deliver Seller's Response within the time frame set forth above, it shall be deemed to be an election by Seller not to cause Title Company to so remove such objections. Notwithstanding the foregoing, Seller shall be obligated to cure and remove without need for a Buyer's Objection Letter all of the following

title exceptions or encumbrances, if any: (i) the liens of any mortgage; (ii) tax liens for delinquent ad valorem real estate taxes; (iii) mechanics liens, judgment liens or other monetary liens; and (iv) broker's liens ("Seller's Mandatory Cure Items"). Seller shall have until Closing to cure and remove any Seller Mandatory Cure Items. If either (a) Seller elects to cause the Title Company to so remove and, at least one (1) day prior to the Closing (the "Cure Deadline"), Seller is unable to remove any exceptions or matters objected to by Buyer; or (b) Seller elects not to cause Title Company to so remove, then Buyer must elect, by delivering written notice of such election to Seller and Escrow Agent on or before (i) the fifth (5^{th}) business day following Buyer's receipt of Seller's Response, or (ii) if no Seller's Response is received by Buyer, the fifth (5^{th}) business day following the date on which Seller shall have been deemed to have responded, as provided above, or (iii) in the event Seller elects to cause the Title Company to so remove and, prior to the Cure Deadline, Seller is unable to remove any exceptions or matters objected to by Buyer, on or before the Cure Deadline, to: (A) terminate this Agreement (in which case Escrow Agent shall return the Deposit to Buyer, and neither party shall thereafter have any rights or obligations to the others hereunder, other than pursuant to any provision hereof which expressly survives the termination of this Agreement); or (B) proceed to a timely Closing without liability to Seller whereupon such objected to exceptions or matters shall be deemed to be Permitted Exceptions. Seller shall be responsible for removing any exceptions or deficiencies to title which first arise between the date upon which Permitted Exceptions are established ("Permitted Exception Date") and Closing unless created by or with the consent of Buyer.

6. Buyer's Due Diligence.

(a) Seller Deliverables. Seller shall deliver to Buyer within five (5) days of the Effective Date the following, if any (the "Property Documents"): Seller's existing survey(s) and/or title reports with respect to the Subject Property; copies of service contracts or management agreements, any environmental reports (including Phase I or Phase II reports) in Seller's possession or control; floor plans and building specifications, insurance information (including a current certificate of insurance regarding property, casualty and general liability insurance for the Subject Property) and property tax statements for the previous two (2) years; copies of certificate(s) of occupancy and any property condition reports.

Buyer agrees to return the foregoing and all such other documents to Seller, without retaining copies, in the event the closing hereunder does not occur.

(b) Inspection Rights. At all reasonable times from and after the Effective Date, Buyer, its agents and representatives shall be entitled at Buyer's sole cost and expense to make investigations with respect to the compliance of the Real Property and the Improvements with all applicable laws, ordinances, rules and regulations; to review any documents or information Buyer has or may receive with respect to the Subject Property; to review any contracts and agreements affecting the Subject Property; to enter onto the Real Property during normal business hours to conduct such inspections and investigations of the condition of the Property as Buyer deems relevant with respect to the operating systems, structural components, and site conditions of the Real Property and Improvements, and perform Phase I and if necessary, Phase II environmental studies, which may include without limitation drilling and borings and the taking of soil samples. Buyer shall at its own expense restore the Real Property

to as close as reasonably possible to its present condition. All such inspections shall be done by qualified inspectors chosen and paid for by Buyer. Seller agrees to reasonably cooperate with Buyer in connection with Buyer's investigations, and shall grant Buyer access to the Real Property at reasonable times upon reasonable prior notice. Buyer shall indemnify, protect, defend and hold harmless Seller from all claims (including, without limitation, any claim for a mechanic's lien or materialman's lien), causes of action, costs, losses, damages and reasonable attorney's fees incurred by Seller in connection with or arising out of any inspections or investigations carried on, by or on behalf of Buyer pursuant to this Section. The foregoing indemnity shall not apply to any claims (including, without limitation, claims that the Real Property has declined in value) or liabilities to the extent the same arise out of or are incurred in connection with (i) the negligence or willful misconduct of the Seller or their agents, consultants or contractors; (ii) the discovery by Buyer or its agents, consultants or contractors of any or pre-existing conditions on the Real Property; (iii) the release (other than by Buyer, its agents, consultants, employees, contractors or representatives) or discovery by Buyer or presence of any pollutants, hazardous waste, hazardous substance or material located on or about the Real Property, except to the extent that Buyer or its agents, consultants, employees, contractors or representatives have exacerbated such condition; (iv) the results, findings, tests or analyses of Buyer's environmental or other physical investigation of the Real Property; or (v) any disclosure or notification made or given by Buyer or any its agents, consultants or contractors to any governmental agency or other party that is required by law based upon the results, findings, tests or analyses of Buyer's environmental or other physical investigation of the Real Property. The provisions of this Section shall survive the Closing or the earlier termination of this Agreement.

(c) Buyer's Termination Right. Buyer shall have the right at any time on or before ninety (90) days after the Effective Date (the "Due Diligence Termination Date") to terminate this Contract if Buyer determines for any reason that the Property Documents or all or any portion of the Subject Property is not acceptable to Buyer in its sole and absolute discretion. Notwithstanding the foregoing, if Buyer's environmental consultant determines that a Phase II report is warranted, the Due Diligence Termination Date shall be extended for up to an additional period of ninety (90) days provided Buyer gives Seller written notice of its intent to so extend prior to the initial Due Diligence Termination Date, and provided Buyer confirms that it has waived all other due diligence conditions, including title review (subject to any Buyer's Objection Letter that may have been sent). If Buyer exercises its right to extend the Due Diligence Termination Date, said extension shall last until the earlier of (i) five (5) business days after Buyer has received the final results of its Phase II testing; and (ii) ninety (90) days after the original Due Diligence Termination Date. If Buyer delivers a written notice to Seller and Escrow Agent exercising its termination right hereunder ("Buyer's Termination Notice") on or before the Due Diligence Termination Date (as it may be extended), then (a) Escrow Agent shall return the Deposit to Buyer; (b) this Contract shall automatically terminate and be of no further force or effect and neither party shall have any further rights or obligations hereunder, other than pursuant to any provision hereof which expressly survive the termination of this Contract; and (c) Buyer shall, upon Seller's request, deliver to Seller copies of all surveys, environmental and other reports undertaken by Buyer with respect to the Subject Property without any representation or warranty of any kind or nature whatsoever, express or implied, about the accuracy, reliability or usefulness of any information contained therein. If Buyer fails to deliver to Seller and Escrow Agent Buyer's Termination Notice on or before the Due Diligence Termination Date, Buyer shall be deemed to have waived its right to terminate this Contract

pursuant to this Section, and [redacted] of the Deposit shall become non-refundable to Buyer (but applicable to the Purchase Price), except in the event of Seller default or inability or refusal to convey title as provided in this Contract.

7. Approval Contingency. This Contract is contingent upon Buyer obtaining all permits and approvals from the City of Portland (the "City") for its proposed use and occupancy of the Subject Property acceptable to Buyer in its sole and absolute discretion (the "Approvals"). An Approval shall not be deemed to have been "obtained" until it has become final and non-appealable, and any periods for challenge to the same (or any conditions to its final effectiveness) shall have expired. Buyer shall use its best efforts to obtain the Approvals as expeditiously as reasonably possible. Seller shall reasonably cooperate with Buyer in connection with Buyer obtaining the Approvals and agrees to execute and deliver all documents reasonably requested by Buyer, at no cost or liability to Seller. Buyer shall have sixty (60) days from the expiration of the Due Diligence Termination Date (the "Approval Date") to obtain the Approvals. If Buyer has not received its Approvals by the Approval Date, then Buyer shall have the right to extend the Approval Date for up to six (6) additional sixty (60) day periods (each, an "Approval Extension Period"), by giving notice to Seller on or before the Approval Date, as it may be extended, on the follow terms and conditions:

(i) If Buyer exercises the first Approval Extension Period, an additional [redacted] of the Deposit (for a total of [redacted]) shall become non-refundable to Buyer (but applicable to the Purchase Price), except in the event of Seller default or inability or refusal to convey title as provided in this Contract;

(ii) If Buyer exercises the second Approval Extension Period, an additional [redacted] Dollars of the Deposit (for a total of [redacted]) shall become non-refundable to Buyer (but applicable to the Purchase Price), except in the event of Seller default or inability or refusal to convey title as provided in this Contract;

(iii) If Buyer exercises the third Approval Extension Period, an additional [redacted] Dollars of the Deposit (for a total of [redacted]) shall become non-refundable to Buyer (but applicable to the Purchase Price), except in the event of Seller default or inability or refusal to convey title as provided in this Contract;

(iv) If Buyer exercises the fourth Approval Extension Period, an additional [redacted] Dollars of the Deposit (for a total of [redacted] shall become non-refundable to Buyer (but applicable to the Purchase Price), except in the event of Seller default or inability or refusal to convey title as provided in this Contract;

(v) If Buyer exercises the fifth Approval Extension Period, Buyer shall deposit with the Escrow Agent an additional [redacted] Dollar deposit (the "Additional Earnest Money Deposit"), and the Deposit (for a total of [redacted]) shall become non-refundable to Buyer (but applicable to the Purchase

Price), except in the event of Seller default or inability or refusal to convey title as provided in this Contract;

(vi) If Buyer exercises the sixth Approval Extension Period, Buyer shall deposit with the Escrow Agent an additional [redacted] Dollar Additional Earnest Money Deposit, and the Deposit (for a total of [redacted] shall become non-refundable to Buyer (but applicable to the Purchase Price), except in the event of Seller default or inability or refusal to convey title as provided in this Contract.

Such portion of the Deposit that is non-refundable as set forth in Section 6(c) above [redacted] and in subparagraphs 7(i) through (vi) above is hereinafter referred to as the "Non-refundable Deposit". At Seller's request, which may be made at any time and from time to time, Escrow Agent shall release the Non-refundable Deposit available as of the date of Seller's request(s) to Seller to, among other things, pay carrying costs of the Real Property, such as taxes, insurance, utilities etc., provided that Seller at the time they first request a release of the Non-refundable Deposit delivers to Buyer a comfort letter or account statement from a financial institution or investment management firm reflecting that Seller maintains accounts with such financial institution or investment management firm in an amount sufficient to fund Seller's obligation to return to Buyer the Non-refundable Deposit (or so much as has been released to Seller from time to time) pursuant to the terms of this Contract. Buyer hereby authorizes Escrow Agent to release the Non-refundable Deposit to Seller from time to time provided such comfort letter or account statement has been received by Buyer.

The Additional Earnest Money Deposit shall be considered part of the Deposit for all purposes of this Contract. If Buyer does not receive the Approvals on or prior to the Approval Date, as it may be extended, or if Buyer at any time prior to the Approval Date, as it may be extended, determines in its sole and absolute discretion that the Approvals will not be suitable or satisfactory for Buyer's proposed use and occupancy of the Subject Property, then Buyer may terminate this Contract by delivering written notice to Seller and Escrow Agent ("Buyer's Approval Termination Notice") exercising its termination right hereunder on or before the Approval Date, as it may be extended, whereupon (a) Escrow Agent shall return so much of the Deposit that is refundable at that time, if any, to Buyer; (b) release so much of the Deposit that is non-refundable at that time, if any, to Seller; and (c) this Contract shall automatically terminate and be of no further force or effect and neither party shall have any further rights or obligations hereunder, other than pursuant to any provision hereof which expressly survive the termination of this Contract. If Buyer fails to deliver to Seller and Escrow Agent Buyer's Approval Termination Notice on or before the Approval Date, as it may be extended, Buyer shall be deemed to have waived its right to terminate this Contract pursuant to this Section.

8. Conveyance of Subject Property and Personal Property; Delivery Free of Tenants and Occupants. At the time of Closing hereunder, Seller shall convey its fee simple interest and estate in and title to the Subject Property by Quitclaim with Covenant Deed, free and clear of any and all liens, security interests, exceptions or encumbrances arising by or though Seller, other than Permitted Exceptions. Seller shall pay for personal property taxes through the Closing Date (as hereinafter defined). Seller agrees to terminate the tenancy and/or occupancy of the any current tenants or occupants of the Subject Property, and to deliver the Subject Property free and

clear of all personal property, inventory, equipment, free-standing shelving, tenants and occupants. If Seller is unable to provide the Subject Property to Buyer free and clear of personal property, inventory, equipment, free-standing shelving, tenants and occupants, by the Closing Date then Seller shall be deemed in default of this Contract and Buyer shall have the right to terminate this Contract whereupon notwithstanding anything in this Contract to the contrary (a) Escrow Agent shall return the entire Deposit to Buyer; and (b) this Contract shall automatically terminate and be of no further force or effect and neither party shall have any further rights or obligations hereunder, other than pursuant to any provision hereof which expressly survive the termination of this Contract.

9. Closing. The sale and purchase transaction contemplated in this Contract shall be closed, and the Purchase Price paid, on the date that is forty-five (45_days after the Approval Date (as it may be extended) (the "Closing Date"). Purchaser shall notify Seller in writing when all Approvals have been obtained. The following documents and items shall be delivered by Seller and Purchaser at Closing, as applicable:

(a) A Quitclaim Deed with Covenant from Seller in form reasonably acceptable to Seller and Buyer, together with applicable conveyance tax forms.

(b) An Owner's Affidavit executed by Seller in the form provided by the Title Company, provided such requested Affidavit does not expand the liability or representations of Seller hereunder beyond the terms of this Contract.

(c) An Affidavit stating that Seller is a Maine resident, or in the alternative, a Certificate of Exemption, Certificate of Reduction or REW-1 filing form.

(d) An Affidavit of Seller stating that Seller is not a "foreign person" as defined in Section 1445(B)(2) of the Internal Revenue Code of 1986, as amended.

(e) All transferable licenses, permits, certificates, approvals, authorizations, variances and consents held by Seller and issued by governmental and quasi-governmental bodies, officers and authorities in respect to the ownership, occupancy, use and operation of the Subject Property in the possession or control of Seller.

(f) Reserved.

(g) Keys.

(h) Appropriate evidence of authorization reasonably satisfactory to the Title Company regarding the consummation of the transaction contemplated by this Contract.

Seller shall pay the following closing costs (a) any and all costs incurred by Seller in performing its obligations under this Contract, and (b) the cost of recording the discharge of any existing mortgage on the Subject Property and any other documents required to be recorded or filed in order to transfer title as provided herein. Buyer shall pay the following closing costs (a) title search and examination charges, and the premium for the Commitment and Lender's and/or Owner's Title Insurance Policy, if any, to be issued pursuant thereto; (b) the cost of the update to the Survey or a new survey, if any; (c) the cost of the brokerage commission payable to The

Boulos Company, (d) the cost of any inspections or investigations of the Subject Property, (e) the cost of recording the Deed and any mortgages or other recorded documents relating to its purchase of the Subject Property, and (f) all costs associated with Buyer's financing of its acquisition, if applicable, it being understood and agreed that obtaining financing is not a condition to Purchaser's obligations hereunder. Seller and Buyer will each pay one-half of the transfer tax payable with respect to the Purchase Price. Each of the respective parties shall bear its own attorneys' fees.

10. Possession and Risk of Loss. Without limiting the provisions of Section 8 of this Contract, possession of the Subject Property shall be delivered by Seller to Buyer at the time of closing hereunder, free and clear of all tenants and occupants. Risk of Loss shall be on Seller until transfer of Property.

11. Prorations. Prorations shall be made as of the Closing Date as if Buyer were in title for the entire Closing Date. The following shall be prorated and adjusted between Seller and Buyer:

(a) Utilities and Operating Expenses. Water, electricity, sewer, gas, telephone and other utility charges based, to the extent practicable, on final meter readings and final invoices.

(b) Assessments. All assessments, general or special, assessed as of the date hereof shall be prorated as of the Closing Date, with Seller being responsible for any installments of assessments that are due and payable prior to the Closing Date and Buyer being responsible for any installments of assessments that are due and payable on or after the Closing Date. All such assessments assessed after the date hereof shall be the sole responsibility of Buyer.

(c) Taxes. All ad valorem real estate and personal property taxes with respect to the Real Property and the Improvements shall be prorated as of the Closing Date, based on the most currently available final tax bill and on a cash basis for the tax year in which the Closing occurs, regardless of the year for which such taxes are assessed.

(d) Other. Such other items as are customarily prorated in transactions of this nature in the county in which the Project is located shall be ratably prorated.

12. Representations, Warranties and Covenants of Seller.

12.1 Seller hereby makes the following representations and warranties to Buyer:

(a) Seller's execution and delivery and performance of this Contract by the undersigned and the performance of its obligations hereunder, including the closing of the sale and purchase transaction contemplated herein on the terms set forth herein, have been duly authorized and directed by Seller and no further consents or approvals are or shall be required as a condition precedent to the consummation and closing of the sale and purchase transaction contemplated herein except as expressly set forth in this

Contract. Seller has taken all necessary action to authorize the execution, delivery and performance of this Contract and upon the execution and delivery of any document to be delivered by Seller on or prior to the Closing, this Contract and such document shall constitute the valid and binding obligation and agreement of Seller, enforceable against Seller in accordance with its terms.

(b) The performance by the Seller of the terms, covenants and conditions contained herein will not conflict with, constitute an event of default under, any agreement or other instrument to which Seller is a party or by which its properties or assets are bound.

(c) Seller is not a party to any leases, agreements, contracts or licenses affecting the Real Property or any use of the Real Property that would not be terminable at will by Buyer without penalty from and after the Closing.

(d) Seller has not received any written notice from any governmental authority that the Real Property, or the present condition, operation or use thereof, violates any applicable laws, rules, regulations, restrictions, covenants, agreements, site plan approvals, zoning or subdivision regulations or any duly issued variances and Seller has no other actual knowledge of any such violation(s).

(e) Seller has received no written notice that there is any pending judicial, municipal or administrative proceedings affecting the Real Property or in which Seller is a party by reason of Seller's ownership of the Real Property or any portion thereof, including, without limitation, proceedings for or involving collections, condemnations, eminent domain, alleged building code, zoning or environmental violations, or personal injuries or property damage alleged to have occurred on the Real Property or by reason of the condition or use of the Real Property and Seller has no other actual knowledge of any such proceedings.

(f) Seller represents that, after the execution of this Contract and until such time as Closing occurs or the Contract expires without performance, it shall not enter into any leases, encumbrances or other arrangements pertaining to the Real Property which shall not be removed or terminated not later than the Closing.

(g) To the best of Seller's knowledge, the Real Property does not contain and has not contained, any Hazardous Substances, other than in amounts that do not violate any applicable law or regulation. "Hazardous Substances" means and refers to any "hazardous substance" as now or hereafter defined in §101(14) of CERCLA or any regulations promulgated under CERCLA; (ii) any "hazardous waste" as now or hereafter defined in the RCRA or regulations promulgated under RCRA; (iii) any substance regulated by the Toxic Substances Control Act (15 U.S.C. §2601 et seq.); (iv) gasoline, diesel fuel, or other petroleum hydrocarbons; (v) asbestos and asbestos containing materials, in any form, whether friable or non-friable; (vi) polychlorinated biphenyls; (vii) radon gas; (viii) lead paint; (ix) any additional substances or materials which are

now or hereafter classified or considered to be hazardous or toxic under local, state or federal environmental laws.

(h) Seller is the sole owner of good, fee simple, marketable and insurable title to all of the Real Property.

(i) There are no options to purchase or rights of first refusal with respect to all or any part of the Real Property and Seller has entered into no contracts for the sale, pledge, hypothecation, assignment, lease or other transfer of all or any part of the Real Property, other than the existing lease to Northern Burner Supply Co., Inc. or its successor tenant, which will be terminated prior to Closing.

(j) Seller has paid, or will pay at or prior to Closing, all taxes (including all real estate, personal property, sales and use taxes), assessments, charges, fees, levies and impositions associated with the Real Property, coming due prior to the Closing Date for periods prior to the Closing Date. Seller knows of no actual or pending imposition of any assessments for public improvements and, to the best of Seller's knowledge, no such improvements have been constructed or planned that would be paid for by means of assessments upon the Real Property.

(k) Seller has received no notice of any claims, demands, suits, or actions arising out of or relating in any way to any water damage, water intrusion, mold growth or mold infestation occurring in, on or about the Real Property.

Seller shall indemnify, defend and hold Buyer and Buyer's members, managers, partners, officers, shareholders, directors and employees harmless from all claims, demands, liabilities, costs or expenses (including, without limitation, reasonable attorneys' fees) arising from or attributable to any breach by Seller of any of its warranties or representations in this Section 12.1 or elsewhere in this Contract, and the representations and warranties set forth herein and this indemnification shall survive the Closing for a period of twelve (12) months.

12.2 Seller covenants and agrees with Buyer as follows:

(a) From the Effective Date until physical possession of the Real Property has been delivered to Buyer, Seller will keep and maintain all of the Real Property in good order and condition, will not permit any waste with respect thereto and shall operate the Real Property in accordance with its current good faith business practices, provided, however, that nothing herein shall require Seller to continue to lease the Real Property to Northern Burner Supply Co., Inc. until Closing.

(b) From the Effective Date until the Closing Date, Seller shall not enter into any new agreements affecting the Subject Property unless such agreements may be terminated not later than the Closing without penalty.

(c) Between the Effective Date and the Closing Date, Seller shall not grant or permit any new encumbrances on or about the Subject Property.

13. Representations and Warranties of Buyer. Buyer represents, covenants and warrants to and agrees with Seller that Buyer has the legal right, power and authority to enter into this Contract and to perform all of its obligations hereunder, and the execution and delivery of this Contract and the performance by Buyer of its obligations hereunder (i) have been duly authorized by all requisite limited liability company action; and (ii) will not conflict with, or result in a breach of, any of the terms, covenants and provisions of the by-laws or articles of organization of Buyer or any law or any regulation, order, judgment, writ, injunction or decree of any court or governmental authority, or any agreement or instrument to which Buyer is a party or by which it is bound. No further consents or approvals are or shall be required as a condition precedent to the consummation and Closing of the sale and purchase transaction contemplated herein except as expressly set forth in this Contract. Buyer has taken all necessary action to authorize the execution, delivery and performance of this Contract and upon the execution and delivery of any document to be delivered by Buyer on or prior to the Closing, this Contract and such document shall constitute the valid and binding obligation and agreement of Buyer, enforceable against Buyer in accordance with its terms.

14. Default

(a) Buyer Default. In the event of any material default on the part of Buyer under this Contract, the Seller shall be entitled, as its sole remedy hereunder, to either (i) retain the Deposit as consideration for its execution of this Contract and in full settlement of, and as liquidated damages for, any and all claims for damages occasioned by Buyer's default, and this Contract shall terminate, expire, cease and become null and void and, thereafter, all parties hereto shall be relieved of any and all further obligations and liabilities to each other under this Contract, other than as to those obligations which specifically survive the termination of this Contract; (ii) enforce specific performance of Buyer's obligations under this Contract.

(b) Seller Default. In the event of any default on the part of Seller under this Contract, the Buyer, as its sole remedy hereunder, may elect any of the following: (i) enforce specific performance of Seller's obligations under this Contract if the nature of Seller's default has not rendered specific performance unavailable, or (ii) if the nature of Seller's default has rendered specific performance unavailable or in Buyer's sole and absolute discretion not desirable or ineffective as a remedy, Buyer shall receive a return of the entire Deposit and Buyer may seek damages; or (iii) waive the breach, or default or other closing condition and proceed to consummate the transaction contemplated hereby without any adjustment of the Purchase Price in accordance with the provisions of this Agreement; or (iv) terminate this Contract, whereupon neither party hereto shall have any further rights or obligations hereunder (except as expressly set forth herein as surviving termination), and the Escrow Agent shall deliver the entire Deposit to Buyer, and Buyer shall recover from Seller all of Buyer's reasonable out-of-pocket expenses incurred to the date of such termination.

15. Litigation and Attorneys' Fees. In the event it shall be necessary for either party to this Contract to bring suit to enforce any provision hereof or for damages on account of any breach of this Contract, then the prevailing party in such suit shall be entitled to recover from the other party its attorney fees and costs in any such litigation and any appeals therefrom.

16. Time of Essence. It is expressly agreed by the parties hereto that time is of the essence of this Contract and in the performance of all conditions, covenants, requirements, obligations and warranties to be performed or satisfied by either party hereto. Waiver of performance or satisfaction of timely performance or satisfaction of any condition, covenant, requirement, obligation or warranty by one party shall not be deemed to be a waiver of the performance or satisfaction of any other condition, covenant, requirement, obligation or warranty unless specifically consented to in writing. Whenever a date specified herein shall fall on a Saturday, Sunday or legal holiday, the date shall be extended to the next business day.

17. Captions and Paragraph Headings. Captions and paragraph headings contained in this Contract are for convenience and reference only and in no way define, describe, extend or limit the scope or content of this Contract nor the intent of any provision hereof.

18. Notices. Any notice or other communication permitted or required to be given hereunder by one party to the other shall be in writing and shall be either (i) hand delivered, (ii) sent by Federal Express or other overnight delivery service, or (iii) sent by email, to the party entitled or required to receive the same at the address specified below or at such other address as may hereafter be designated in writing by any such party, provided that email notice is permitted as an accommodation only and must be followed immediately by other permitted delivery method hereunder.

The respective attorneys for Seller and Buyer are authorized to give notices with the same force and effect as if given by the parties.

19. Governing Law and Binding Effect. This Contract and the interpretation and enforcement of the same shall be governed by and construed in accordance with the laws of the State of Maine and shall be binding upon, inure to the benefit of, and be enforceable by the parties hereto as well as their respective successors, heirs, executors, personal representatives, agents, and assigns.

20. Integrated Contract, Waiver and Modification. This Contract represents the complete and entire understanding and agreement between and among the parties hereto with regard to all matters involved in the purchase and sale transaction contemplated in this Contract and supersedes any and all prior or contemporaneous agreements, whether written or oral. No covenants, agreements, terms, provisions, warranties, statements, representations or undertakings, whether written or oral, made or executed by any party hereto shall be binding on any party hereto, unless specifically set forth or incorporated in this Contract. This Contract may not be modified or amended, nor may any covenant, agreement, condition, requirement, provision, warranty or obligation contained herein be waived, except in writing signed by all parties, or in the event that such modification, amendment or waiver is for the benefit of one or more of the parties hereto and to the detriment of the other or others, then the same must be in writing signed by that party or those parties hereto to whose detriment such modification, amendment or waiver inures.

21. Brokerage. Seller and Buyer hereby acknowledge, represent and warrant to each other that, other than The Boulos Company, who shall be paid by Buyer at Closing pursuant to a separate agreement or agreements, no broker or finder has been employed by either Seller or Buyer in connection with the sale and purchase transaction contemplated in this Contract and that no commission, finder's fee or similar remuneration, by whatever name, is payable by Seller or Buyer or due to any broker or finder in connection with this Contract or the sale and purchase transaction contemplated herein. Seller and Buyer each, respectively, hereby agree to indemnify, defend, save and hold the other harmless from and against the payment of any commissions or fees or claims for commissions or fees as a result of any actions taken or agreements, respectively, made by them with respect to the sale and purchase transaction contemplated in this Contract. The provisions of this Paragraph shall expressly survive any closing or closings hereunder or the termination of this Contract for any reason.

22. Assignment. This Agreement is not assignable by Seller except for the purpose of a like-kind exchange. Buyer shall be entitled to assign its right, title and interest herein to any limited liability company, corporation, partnership or other entity, whether now existing or

hereafter formed, controlled by, controlling or under common control with Buyer (each an "Affiliate"), provided that Redfern Properties, LLC shall remain liable for all obligations of Buyer under this Agreement regardless of any such assignment.

23. Non-Disclosure. Subject at all time to the rights of the parties as set forth in this Contract, unless and until the transaction contemplated hereby is closed, Buyer and Seller shall make no public announcements regarding the terms of this transaction. In any event, Buyer and Seller shall hold all proprietary information obtained by them with respect to each other or the Subject Property in strict confidence and shall not disclose such information to any other person or entity except to the extent necessary to consummate the transaction contemplated hereby.

24. Condemnation. In the event the Subject Property or any material portion or portions thereof shall be taken or condemned or be the subject of a bona fide written threat of condemnation by any governmental authorities or other entity prior to the closing, then the Buyer shall have the option of either (a) terminating this Contract by giving written notice thereof to the Seller, whereupon the Earnest Money Deposit shall be immediately refunded to the Buyer, and this Contract and all rights and obligations created hereunder shall be null and void and of no further force and effect, except as otherwise specified herein, or (b) requiring the Seller to convey the remaining portion or portions of the Subject Property to the Buyer pursuant to the terms and provisions hereof and to transfer and assign to the Buyer at the closing all of the right, title and interest of the Seller in and to any award made or to be made by reason of such condemnation, less amounts expended by Seller in connection therewith prior to such time. The Seller and the Buyer hereby further agree that the Buyer shall have the right to be present in all negotiations with any governmental authorities relating to the Subject Property and to be apprised of the compensation to be paid for any portion or portions thereof condemned by such governmental authorities or other entity.

25. Casualty. Seller will promptly upon receiving actual notice of a casualty, notify Buyer of any fire or other casualty affecting the Subject Property between the date hereof and the Closing. Unless otherwise mutually agreed in writing by Buyer and Seller, as soon as reasonably possible thereafter, subject to Seller's actual receipt of the proceeds, and subject in any event to the terms of any existing mortgage on the Real Property, Seller will commence any necessary repairs as a result of such fire or other casualty, and will provide Buyer with current information concerning insurance coverage therefor (the "Casualty Notice"). Buyer will have the right to terminate this Contract by written notice to Seller within fifteen (15) days following receipt of the Casualty Notice. If Buyer so terminates this Contract then, notwithstanding any provision of this Contract to the contrary, the entire Deposit, other than the portion of the Deposit that has become non-refundable, will be returned to Buyer, and the parties will have no further obligations or liabilities hereunder, except as otherwise expressly provided herein. If Buyer elects not to terminate this Contract, the purchase contemplated herein will be consummated without reduction of the Purchase Price within the later of ten (10) days after the expiration of such fifteen (15) day period or on the Closing Date specified herein, in which event the insurance proceeds will be used for such repairs, to the extent necessary, and Seller will assign transfer and set over to Buyer all of Seller's right, title and interest in and to such insurance proceeds less any amounts actually expended by Seller towards the repair or restoration prior to the date thereof, and Buyer shall receive a credit at Closing in an amount equal to the amount of the insurance deductible under Seller's insurance policy.

26. Execution in Counterparts. This Contract may be executed in counterparts, each of which shall be deemed an original and all such counterparts together shall be deemed to constitute an original instrument. Electronic signatures shall be afforded the full force and effect of original ink signatures.

27. Exchange. At either party's request, the other party shall cooperate to structure the sale of the Subject Property as a tax-deferred exchange under Section 1031 of the Internal Revenue Code, provided that: (a) the requesting party shall reimburse the other party for all resultant additional expenses it pays or incurs, (b) the other party shall not be obligated to take title to any property other than the Subject Property for any period of time, (c) the other party shall not be obligated to execute any notes or mortgages or to incur any liabilities as a result of participating in the exchange, (d) the Closing is not delayed beyond the Closing Date, and (e) the requesting party shall indemnify, defend and hold harmless the other party against claims, costs, loss, or liability arising from or related to the exchange.

[*Signatures appear on following page.*]

IN WITNESS WHEREOF, the parties have caused these presents to be executed as of the day and year first above written.

EXHIBIT "A"

A certain lot or parcel of land, with the building thereon, situated on the easterly side of Washington Avenue in the City of Portland, County of Cumberland and State of Maine and being further bounded and described as follows:

Beginning at an iron set in the ground on the easterly side of said Washington Avenue at land now or formerly of the City of Portland; thence running North 79° 11' 30" East by land now or formerly of said City of Portland 181.49 feet to an iron set in the ground; thence running South 15° 52' East by Poplar Street Ext. (so called) 213.20' to an iron set in the ground at land now or formerly of Dewer Rich; thence running South 74° 21' West by said Rich land 33.23 feet to an iron set in the ground, thence running South 15° 39' East by said Rich land 64.00 feet to an iron set in the ground; thence running North 74° 21' East by said Rich land 33.47 feet to an iron set in the ground on the westerly line of said Poplar Street Ext. (so called); thence running South 15° 52' East by said Poplar Street Ext. (so called) 63.00 feet to an iron set in the ground; thence running South 74° 21' West 115.91 feet to an iron set in the ground; thence running South 82° 30' West 111.71 feet to an iron set in the ground on the easterly side of said Washington Avenue; thence running North 7° 30' West by the Easterly line of said Washington Avenue 254.40 feet to an angle in the easterly line of said Washington Avenue; thence running North 10° 15' 30" West by the easterly line of said Washington Avenue 88.25 feet to an iron set in the ground at land now or formerly of the City of Portland and said point of beginning.

The triangular strip of land lying northwesterly of Lots no. 10 and 20 on the Little, Weeks & Moody Plan was conveyed by the City of Portland to Equipment Leasing Co., Inc. by deed recorded in Cumberland County Registry of Deeds in Book 2695, Page 281.

Also, excepting all those certain premises conveyed by Raymond H. Waterhouse and Alina Waterhouse to Redfern Munjoy, LLC, by deed dated January 14, 2014, recorded in Book 31302, Page 177.

E. Summary of Written Easements

Exiting Easements:

There are no existing easements shown on the plan titled Boundary & Topographic Survey dated July 25, 2023, prepared by Owen Haskell, Inc.

Proposed Easements:

An easement will be granted to Central Maine Power for the locations of the primary transformer vaults that straddle the private property line and City ROW.

The developers are currently working with a general contractor to determine if temporary construction easements may be necessary and will provide supplemental information when available.

Standard to be Waived: Cite Ordinance or Technical Manual Standard	**Cite Standard Language:** Cite specific language of applicable Ordinance or Technical Manual Standard	**Waiver Being Sought:** Describe waiver being sought. Ex. – We are requesting a two-way parking lot drive aisle width of 20' feet.	**Justification for Waiver:** Address specific waiver criteria, if applicable, and document reasons for the waiver request.
Technical Manual 1.5.1.C Driveway Spacing	Driveway Spacing - 100 feet along arterial and collector streets with posted speeds of 35 mph or less	We are requesting a driveway spacing of 11.43 feet from the nearest abutting driveway	Proposes 11 parking spaces & reducing the exist. 3 curb cuts to 1. Minor driveway standards that takes the existing pattern of driveways in the surrounding context into account and limits impact on the street seem more appropriate given street context
Technical Manual Figure 1-16A	90 Degree Parking shall have a drive aisle width of 24 feet	We are requesting a drive aisle width of 22.22 feet	The 11 covered parking spaces are low turn over and tenant will be familiar with the turning movements. We request a 22.22' wide drive aisle which is been approved on similar projects.

G. Financial Capacity

Please refer to the attached letter prepared by the Applicant providing additional information.

120 Exchange Street

Redfern PROPERTIES

Mr. Kevin Kraft
Director, Planning & Urban Development
City of Portland, Maine
389 Congress Street, 4th Floor
Portland, ME 04101

October 29, 2024

Subject: Financial & Technical Capacity - 165 Washington Avenue Site Plan Application

Dear Mr. Kraft:

With respect to Redfern Properties' financial and technical capacity to successfully execute the proposed development at 165 Washington Avenue, we refer you to our long track record of completing substantial development projects in Portland over the last 15 years. In sum, we have completed over $300M in development projects, all in the City of Portland. In each case, we have met our obligations to the City and our lenders. Recent projects include:

- The Casco, 263 apartments in the Old Port District, completed 2024
- Nightingale, mixed-use project with 165 residential apartments in on the former Mercy Hospital Campus, completed 2023
- Erlang, 81 residential units in a converted historic office building in the Arts District, completed 2023
- Hiawatha, 139 apartments in Longfellow Square, completed 2017

If necessary, we can provide a letter from one of our Banks, stating that our loan accounts are in good standing, but our track record is far stronger evidence of our capacity than a non-committal letter from a Bank.

Sincerely,

Jonathan Culley
Managing Partner

H. Technical Capacity

Redfern Properties develops, owns, and operates a portfolio of properties that includes the highest quality rental apartments in Portland. Redfern Properties is committed to developing innovative residential properties and focuses on infill and other "smart-growth" development in creating unique residences and commercial spaces, while making neighborhoods and communities more vibrant and sustainable. Redfern has permitted and constructed numerous recent projects including: The Casco, Nightingale (Mercy Redevelopment), Hiawatha, and the Erlang.

Acorn Engineering specializes in providing urban redevelopment, civil/site design, environmental services, municipal consulting and construction administration. Acorn Engineering, Inc. have successfully designed and permitted more than 20 projects in Portland during the past several years, including: Munjoy Heights, East Bayside Lofts, The Hiawatha, the Erlang, The Nightingale (Mercy Redevelopment), the Casco, Winter Landing (CHOM Affordable Senior Housing), and The Equinox (CHOM Affordable Family Housing).

Soren DeNiord Design Studio (SDDS) is a professional landscape design firm located in Portland, Maine. Their portfolio includes award winning projects ranging in scale from residential to mixed use, commercial and institutional. As stewards of the environment and our clients' resources, we engage in projects with a commitment to sustainability and the intention of artfully responding to each site's unique challenges.

Holst Architecture has been a leader in creating some of the most innovative mixed-use multifamily housing projects for the last 20 years. With thoughtful design solutions, Holst has completed 34 market rate, student, affordable, or Permanent Supportive Housing projects, totaling over 3,300 units of housing. We currently have over half a dozen housing projects that are currently in design or under construction. From groundbreaking towers in downtown Portland, Oregon (937 Condominiums and more recently, Julia West House) to garden style townhomes in Eagle, Idaho (The Clara), we create multifamily housing that raises the bar.

I. Conformity with Land Use Ordinance

The following outline is made in accordance with the City of Portland Code of Ordinances, Chapter 14 Land Use. Specifically, Article 13 Section 6 Site Plan Review Standards.

OVERVIEW
The proposed project has been designed to conform to City standards where possible as demonstrated in the following narrative.

(a) Transportation Standards

1. Impact on Surrounding Street Systems:

   Based on the scale of the proposed project a Traffic Movement Permit has been completed by a licensed traffic engineer. The site is located on Washington Avenue. The project is not anticipated to create any significant hazard to safety on the surrounding street network. Congestion of the intersections is not anticipated. See Section T. Traffic, which includes the Traffic Movement Permit application, detailed analysis, and additional information on the existing and proposed conditions.

2. Access and Circulation:

a. Site Access and Circulation:

This project conforms with the design standards of Section 13.6.1.B as demonstrated in the following narrative:

(i) All site access and internal circulation will be designed in accordance with the standards set forth in Section 1 of the Technical Manual.

(ii) The site does not feature any shared circulation, parking, or transportation infrastructure. There are no anticipated or proposed developments directly abutting the property are at this time.

(iii) A sidewalk exists along Washington Avenue and will provide direct pedestrian access to the site. The sidewalk will be improved and widened as part of the project.

(iv) The proposed project does not abut or include any existing or proposed publicly accessible trails or trail connections.

(v) Egress and access to the site is directly off the sidewalk on Washington Avenue. There are no anticipated conflicts with traffic flows or turning movements.

b. Curb and Sidewalks:

(i) A sidewalk with curbing exists on Washington Avenue and will be reconstructed and widened as part of the proposed project.

(ii) Any disturbance to the sidewalk to accommodate the project will be rebuilt in conformance with the City's Code of Ordinances and the applicable design standards in the City's Technical Manual.

(iii) Not applicable.

(iv) Not applicable.

3. Public Transit Access:

a. The project is located on a bus route with the closest bus stop located on Washington Avenue 150' south of the parcel.

b. Not applicable.

c. Not applicable.

4. Parking:

a. Vehicular parking:

(i) Per table 18-A: Off-street parking maximums for:
a. See Site Plan (Sheet C-10) for the Parking Summary

(ii) Proposed parking spaces are not located within the front and corner side yards of the parcel.

(iii) Parking spaces are designed to conform to the standards set forth in the City of Portland Technical Manual. A waiver is requested to reduce the drive aisle width.

b. Bicycle parking

(i) Per Table 18-A, a minimum of 163 bicycle parking spaces have been provided as part of the proposed project

(ii) N/A

c. Snow Storage:

(i) The client will be responsible for the management of snow removal from the site as necessary during larger storm events.

(ii) Snow storage shall not be located where it interferes with pedestrian walkways or stormwater management systems. Landscaping in designated snow storage areas shall be such that it can withstand the snow pile.

d. Electric Vehicle (EV) charging

(i) A minimum 20% of paring spaces will be Level 2 EV charging or higher. Additionally, 50% will be EV ready. See C-10 for additional information.

5. Transportation Demand Management (TDM):

a. As the project is a mixed-use use consisting of greater than 50,000 sf of GFA, we understand a Transportation Demand Management plan for the project will be required. The development team and traffic engineer are coordinating TDM strategies and a TDM Plan will be forwarded to the City upon completion.

b. The Transportation Demand Management plan will comply with the standards set forth in the City of Portland Technical Manual.

(b) Environmental Quality Standards

1. Preservation of Significant Natural Features:

a. There are no known Significant Natural Features present on the project site.

b. Not applicable.

c. Not applicable.

2. Site landscaping and buffers.

a. On-Site Landscaping

(i) The project proposes 10 trees within the new courtyards and 6 street trees. Plantings including perennials are forthcoming.

(ii) Due to the existing slope on the site and proposed improvements, including retaining walls and building foundations, the existing vegetation and trees are unable to be preserved. The project proposes to replace the existing removed vegetation as shown on the landscaping plans.

(iii) Not Applicable

b. Buffers and screening

(i) The proposed solid waste containers will be located within the proposed building and not viewable from public sidewalks and adjacent streets.

(ii) Not applicable.

(iii) Not applicable

(iv) Not applicable

c. Parking and vehicle display lot landscaping.

(i) Not applicable, all parking proposed is to be covered parking.

(ii) Not applicable.

(iii) Not applicable.

d. Non-vehicular hardscape

(i) All uncovered paving for non-vehicular use shall have a minimum Solar Reflective Index (SRI) of 33 initially and 28 once aged three years

e. Street trees

(i) Please refer to the landscaping plan for the project for the proposed layout of street trees.

(ii) The project proposes to remove the existing street trees due to utility installation, access and circulation conflicts. Proposed street trees will be installed along the project frontage per the landscaping standards of the Technical Manual.

(iii) It is our understanding that there are no existing heritage or feature mature trees located on the property.

3. Water Quality, Stormwater Management and Erosion Control:

a. Stormwater

(i) A proposed stormwater drainage system will collect water on site through a new storm drain network. A portion of the site will be directed to a subsurface sand filter with an R-tank detention system to meet the City's treatment requirements. Another portion of the site will be directed to a detention system to further elevate the sites storage capacity and meet the City's requirements. See the Stormwater Report for additional information.

(ii) Any stormwater that flows onto adjacent lots will not exceed the pre-development flows.

(iii) The stormwater network has been designed to decrease peak flow rates and not overburden the existing downstream capacity. The BMPs will connect to outlet control structures that slowly outlet between 24-48 hours as required.

b. A site-specific Stormwater Management Plan has been developed for the project to show compliance with Section 5 of the Technical Manual, including standards of MEDEP Chapter 500. Please refer to the Stormwater Management Report for this information.

c. The development is not anticipated to pose a contamination risk to groundwater during or after construction. The project will be serviced by a public wastewater system.

d. The existing subsurface and adjacent slope conditions are suitable to support the proposed development. The proposed development shall not adversely impact the development site or any abutting property. Refer to section K Erosion and Sedimentation Control Report for more information.

(c) Public Infrastructure and Community Safety Standards

1. Consistency with City Master Plans:

   a. The project has been designed to be consistent with the City's Zoning Ordinance and off-site infrastructure.

   b. An easement will be granted to Central Maine Power for the locations of the primary transformer vaults that straddle the private property line and City ROW. The developers are currently working with a general contractor to determine if temporary construction easements may be necessary and will provide supplemental information when available.

2. Public Safety and Fire Prevention:

   a. Public Safety Design

      (i) The site has long viewing aisles and minimal spaces obscured from view.

      (ii) Access to the site has been designed to provide adequate emergency vehicle access to the site.

      (iii) This project will provide new site lighting and will promote natural surveillance and access control. Additionally, fences will be utilized on the side yards to provide safety of tennant users and to deter potential offenders and delineate public and private spaces.

   b. Emergency Access
      (i) Access to the site has been designed to comply with the Section 3 Public Safety standards of the Technical Manual.

3. Public Utilities:

   a. Ability to Serve letters have been sent to the respective companies. Responses are forthcoming. The project does not anticipate overburdening the sewer (project proposes to upsize sewer from 8" to 15"), storm, and water utility mains within Washington Avenue.

   b. The existing overhead wires along the project frontage will be dropped underground. A proposed submersible transformer that is serviced by 3-phase primary conduits from a utility pole on Washington Avenue will serve the project. A secondary conduit will extend from the transformer to the building

   c. The building will be served by a proposed 8" sewer service connected to the redesigned 15" VC sewer main within Washington Avenue.

   d. The building will be served by a proposed 8" sewer service connected to the redesigned 15" VC sewer main within Washington Avenue.

   e. A proposed solid waste container will be located within the building and will be screened from view.

(d) Site Design Standards

1. Massing, Ventilation and Wind Impact:

   a. Please refer to Section O, Architectural Design Narrative.

   b. Please refer to Section O, Architectural Design Narrative.

   c. Please refer to Section O, Architectural Design Narrative.

2. Shadows:

   a. Please refer to Section O, Architectural Design Narrative.

3. Snow and Ice Loading:

   a. The proposed building will be designed to reduce/prevent significant amounts of accumulated snow and ice from loading or falling into adjacent properties or public ways.

4. View Corridors:

   a. Please refer to Section O, Architectural Design Narrative.

5. Historic Resources:

    a. The development is not located in a Historic District.

    b. There are no known archaeological resources on the site.

    c. Not applicable

6. Exterior Lighting:

    a. Site Lighting.

        (i) Exterior lighting will be designed to meet the requirements of Section 12 of the Technical Manual. See Section N: Lighting for additional information.

        (ii) Any lighting that may adversely impact the abutting properties will feature side shielding.

    b. Architectural and Specialty Lighting.

        (i) No architectural or specialty lighting is proposed.

        (ii) No up-lighting is proposed.

    c. Street Lighting.

        (i) The project includes street lighting on Washington Avenue. The street lighting will be in conformance with the City's Technical Manual.

7. Noise and Vibration:

    a. The HVAC system will meet the applicable state and federal emissions requirements and will also be screened and directed away from abutters.

8. Signage and Wayfinding:

    a. Signage

        (i) Signage shall be designed to complement the building and its immediate context while conforming to the standards set forth in the City of Portland Land Use Code.

        (ii) Signage shall be designed to complement the building and its immediate context while conforming to the standards set forth in the City of Portland Land Use Code.

        (iii) Signage shall be designed to complement the building and its immediate

context while conforming to the standards set forth in the City of Portland Land Use Code.

(iv) Signage shall be designed to complement the building and its immediate context while conforming to the standards set forth in the City of Portland Land Use Code.

(v) Signage shall be designed to complement the building and its immediate context while conforming to the standards set forth in the City of Portland Land Use Code.

b. Wayfinding

(i) All street and wayfinding signage shall meet the requirements of the Manual on Uniform Traffic Devices (MUTCD) and Chapter 25 of the City Code.

9. Signage and wayfinding:

a. Signage shall be designed to complement the building and its immediate context while conforming to the standards set forth in the City of Portland Land Use Code.

b. Signage shall be designed to complement the building and its immediate context while conforming to the standards set forth in the City of Portland Land Use Code.

10. Design Standards:

a. The project has been designed to meet the standards set forth in the B2b Business Community zoning district. The project proposes to develop the parcel into a new multi-family apartment building with 326 dwelling units, ground floor commercial space, and other site and utility improvements. Please refer to the Site Plan and Architectural Drawings for additional information.

b. The development is not located within a Historic District.

A C O R N
ENGINEERING, INC.

STORMWATER MANAGEMENT REPORT

Prepared For:

Redfern Properties
P.O. Box 8816
Portland, ME 04104

Prepared By:

Acorn Engineering, Inc.
PO Box 3372
Portland, Maine 04104

November 2024
Revised February 2025

INTRODUCTION

Acorn Engineering, Inc. has been retained by Redfern Properties to provide civil engineering services for the proposed redevelopment located at 165 Washington Avenue, Portland, ME 04101. The site is currently comprised of the existing Northern Burner Supply building with gravel and paved surface parking areas. The property consists of approximately 1.50 acres of land. The proposed project anticipated increasing the total impervious area by approximately 14,150 square feet and is subject to stormwater treatment due to the creation of 1,000 square feet of new impervious area.

A stormwater analysis was prepared to demonstrate that the project will meet the requirements set forth by Maine DEP Chapter 500 Basic and General Standards and the following requirements from the City of Portland (the City):

- City of Portland Land Use Ordinance Article 14.6.2.D.
- City of Portland Technical Manual – Section 5 – Portland Stormwater Management Standards and Maine DEP Chapter 500 Stormwater Management.
- City of Portland Code of Ordinances Chapter 32 – Post-Construction Stormwater Management
- DPW Specific Standard: Provide a minimum detention volume of the projected 24 hour daily sanitary flows with a maximum outflow rate of 0.1 CFS per acre until the storage is maximized.

EXISTING CONDITIONS

The proposed project site is located at 165 Washington Avenue. A Boundary & Topographic Survey has been prepared by Owen Haskell, Inc., dated July 25, 2023.

The existing property is covered by approximately 55% impervious surfaces including the existing Northern Burner building, pavement, and gravel parking lots.

The project team is not aware of the presence of any existing significant natural features located on the site. Given the urban setting and existing impervious surfaces, a field inventory of significant natural features was not undertaken. The project is not located within a watershed classified as an Urban Impaired Stream.

PROPOSED DEVELOPMENT

The project proposes demolishing the existing Northern Burner Supply building and associated parking areas and constructing a 325-unit multi-family / mixed use building with commercial space on the first floor. It is anticipated that the building will be a mixture of two-bedroom, one-bedroom and studio units. The project also includes various parking, utility, and landscape improvements.

Proposed drainage improvements include catch basins, roof drains, foundation drains, and field inlets. Treatment is proposed through a StormFilter BMP and storage will be met using

two separated R-tank systems. Ultimately the proposed storm drain network will outlet to the a relocated combined sewer system within Washington Avenue.

The development will be served by the Portland Water District, underground power/cable/communications, natural gas and the municipal sewer system. The project anticipates incorporating Maine DEP approved stormwater Best Management Practices (BMP) to meet the General and Flooding Standards.

For an analysis of water quality, please refer to the following section.

GENERAL STANDARDS – WATER QUALITY

The proposed project was designed to provide primary water quality treatment through the use of a StormFilter BMP. The system has been designed in accordance with the MDEP Proprietary Systems (Appendix B) StormFilter BMP, and the City of Portland Technical Manual (Section 5) Redevelopment Standards.

MaineDEP Chapter 500 Redevelopment standards are utilized to determine the required treatment for this project. The Pollutant Rankings and corresponding Weighted Impact Rankings are outlined below.

Table 1 – Land Use and Pollutant Summary Table: Existing Conditions

Land use	Pollutant Ranking	Existing Area	Weighted Impact
Roads where idling may occur; high use parking lots	5	0.00 ac.	0.00
Other roads; medium use parking lots	4	0.61 ac.	1.62
Other parking lots and driveways; flat roof asphalt rooftops	3	0.23 ac.	0.46
Other rooftops; grassed areas mowed > twice per year; walkways / foot-traffic-only pavement	2	0.00 ac.	0.00
Non-grass landscaped areas; Stormwater treatment / storage systems	1	0.67 ac.	0.45
TOTAL		1.50 ac.	2.53

The corresponding pre-development map can be viewed in Attachment D of this report.

The proposed post development land use rankings are as follows:

Table 2 – Land Use and Pollutant Summary Table: Previously Approved Conditions			
Land use	**Pollutant Ranking**	**Existing Area**	**Weighted Impact**
Roads where idling may occur; high use parking lots	5	0.00 ac.	0.00
Other roads; medium use parking lots	4	0.10 ac.	0.27
Other parking lots and driveways; flat roof asphalt rooftops	3	0.00 ac.	0.00
Other rooftops; grassed areas mowed > twice per year; walkways / foot-traffic-only pavement	2	1.15 ac.	1.53
Non-grass landscaped areas; Stormwater treatment / storage systems	1	0.26 ac.	0.17
TOTAL		1.50 ac.	1.97

The corresponding post-redevelopment map can be viewed in Attachment E of this report.

From Tables 1 & 2 above, the weighted impact for the proposed redevelopment is less than the weight impact for the existing condition, therefore Chapter 500 requires the project provides 0% treatment of the site's developed area for Stormwater Projects. Regardless, the project will need to provide no less than 95% treatment of the site's new impervious area due to the City of Portland stormwater managements threshold of creating 1,000 square feet or greater of new impervious area

Treatment Area

The development shall provide water quality treatment in accordance with the City of Portland for no less than 95% of the new impervious area and 80% of the new developed area. Water quality treatment will be provided through the use of a StormFilter BMP.

Exemptions

It should be noted that the Portland Stormwater Standard Section 5.2.2.B.2 states "Water quality treatment is not required for existing impervious areas which are developed into building roofs unless otherwise required by a state stormwater permit" & Section 5.2.2.B.4 states "Redeveloped public street right of way area is exempt from the treatment, flooding and minimum detention volume requirements".

See Table 3 & 4 below that outlines the stormwater treatment requirement thresholds:

Table 3 – Impervious Area						
Existing Impervious Area	Proposed Impervious Area	Exempt Impervious Area	Impervious Area Subject to Treatment	95% Impervious Area Requirement	Impervious Area Treatment Provided Onsite	Total Impervious Area Treatment Provided
36,133 SF	50,287 SF	28,538 SF	22,214 SF	21,103 SF	22,232 SF (105.3%)	28,565 SF (153.5%)

Table 4 – Developed Area					
Existing Developed Area	Proposed Developed Area	Developed Area Subject to Treatment	80% Developed Area Requirement	Developed Area Treatment Provided Onsite	Total Developed Area Treatment Provided
40,497 SF	60,128 SF	19,631 SF	15,705 SF	32,275 SF (205.5%)	53,518 SF (293.4%)

The project proposes to exceed the 95% new impervious and 80% development treatment requirements. See Attachment G Stormwater Treatment Exhibit for background on Impervious and Developed Area coverages.

It should be noted that upgradient offsite runoff is included within the treatment subcatchment. Although those areas are not needed to meet the projects treatment requirement thresholds for the site.

Water Quality Volume

In accordance with the Volume III: BMPs Technical Design Manual, a water quality volume of 1.0 inches times the tributary impervious area plus 0.4 inches times the tributary vegetated area is required to be treated by the StormFilter BMP. The water quality volume is calculated by the following formula:

(Imp. SF x 1.0") + (Veg. SF x 0.4") = Treatment Volume (CF)

Sub catchment 1.2 is the area that drains toward the StormFilter and the land coverage breakdown is outlined below:

Table 5 – Water Quality Volume Table				
	Upgradient Landscaped Area (SF)	Upgradient Impervious Area (SF)	Total Treatment Volume Required (CF)	Treatment Volume Provided (CF)
StormFilter	24,953	28,565	3,212	3,216

[(28,565 x 1") + (24,953 x 0.4")] = 3,212 CF

The water quality treatment volume was confirmed by using the HydroCAD model. HydroCAD calculations are attached to this report to demonstrate the compliance. The storage volume within the crushed stone, chambers, and filter sand is added together to calculate the water quality volume.

FLOODING STANDARD – WATER QUANTITY

To meet the City's requirement of limiting the burden on the combined sewer main, the project is subject to provide a minimum detention volume of the projected 24 hour daily sanitary flows with a maximum outflow rate of 0.1 CFS per acre until the storage is maximized. The project will utilize R-Tanks that will be wrapped in geotextile fabric and crushed stone to provide storage before being collected by an orifice-controlled outlet control structure and direct to the street.

See below table for the project redevelopment requirements and calculations for water quality volume.

Table 6 – DPW Detention Volume Requirement			
	Projected 24 hour Daily Sanitary Flows	Total Detention Volume Required (CF)	Total Detention Volume Provided (CF)
-	45,600 GPD	6,096 CF	**6,836 CF**
R-Tank 1			3,620 CF*
R-Tank 2	-	-	3,216 CF**
* Detention Volume is measured at the bypass weir wall invert elevation 61.25' ** Detention Volume is measured at the bypass weir wall invert elevation 62.65'			

To meet the 0.1 CFS per acre requirement. An orifice will be installed within the downgradient outlet control structures for each R-Tanks Detention system. The orifice will decrease the flow out of the BMPs to 0.1 CFS per acre and storage will be provided in excess of the project daily sanitary flows. Once the detention volume required has been reached the stormwater will overflow into the outlet pipe and enter the municipal system within Washington Avenue.

The proposed project was modeled using HydroCAD to verify that the post-development conditions do not exceed the pre-development conditions. A 24-hour SCS Type III storm distribution for the 2, 10, and 25-year storm events were used. The corresponding rainfall amounts for these storms are 3.10", 4.60", and 5.80" respectively. Due to the numerous variables, and inherent inaccuracies with the modeling program used to calculate stormwater

runoff it is custom at Acorn Engineering to round to the nearest whole number. However, due to the size of the project, the stormwater runoff shall be rounded to the nearest tenth of a cubic feet per second (cfs).

Time of Concentration (Tc)

The times of concentration for subcatchments in both the pre and post conditions were calculated by entering the flow path with the associated ground cover and slopes. HydroCAD then calculated the Tc's and incorporated the total Tc for each subcatchment into the model. When the calculated Tc was less than six minutes (0.1 hours), a direct entry of six minutes was used as advised by the TR-55 model. Consistent with previous submissions and best practices, the sheet flow length for any Tc path was capped at 150 feet.

Curve Number (CN)

Within the pre-development model, the vegetated areas were considered fair grass, and impervious areas consisted of either roof of existing building or pavement from parking lot.

Pre-Development
- Pavement, Walkways, Roofs – CN 98
- Gravel – CN 96
- 75% Grass Cover – Good, HSG A – CN 39
- Woods/Grass, - Fair, HSG A – 43

Post-Development
- Pavement, Walkways, Roofs – CN 98
- Gravel – CN 96
- >75% Grass Cover (new landscaping) – Good, HSG A – CN 39
- Woods/Grass, - Fair, HSG A – 43

Pre-development Calculations

The pre-development model was modeled in one subcatchment.
- Subcatchment 1 – This tributary area includes the entire parcel that drains toward the municipal storm drain network within Washington Avenue. Impervious area includes gravel, pavement, building roof, and upgradient grass and wooded areas.
    - This tributary area also includes the offsite area upgradient of the site that drains into the parcel. There is a steep hill with grades that range up to 80%. Land cover consists of mostly landscape areas comprised of trees and grass with minimal impervious area in the form of walkways.

A pre-development watershed map developed for this project can be viewed in Attachment A and a copy of the HydroCAD calculations is included within Attachment C, of this report. Point of interest flow rates for the two sub catchments outlined above are as follows:

Table 7 – Pre-Development Peak Stormwater Flows			
	2-Year Storm Event (cfs)	10-Year Storm Event (cfs)	25-Year Storm Event (cfs)
Total Runoff	1.25	3.25	5.10

Post-development Calculations

The post-development model was broken into four separate sub catchments.

- Subcatchment 1.1 – This tributary area includes a section of the building's roof and the central courtyard. The courtyard contains a mix of landscape and impervious coverage. This subcatchment is stored using a subsurface R-Tank Detention System.
- Subcatchment 1.2 - This tributary area includes the south and eastern sides of the site. This area includes the remaining portion of the building roof, a secondary courtyard, and a walkway and stone swale on the eastern side of the site. The area is directed toward a StormFilter BMP that provides treatment and subsurface R-tanks that provide storage under the drive aisle.
    - This area includes a majority of the upgradient offsite runoff mentioned in the predeveloped condition.
- Subcatchment 1.3 – This tributary area includes the northern and western side of the site. This area includes a concrete walkway and the brick location on the projects frontage.
    - This area includes a small portion of the upgradient offsite runoff mentioned in the predeveloped condition.

Total Peak flow rates for the post-development storm events are as follows:

Table 8 – Post-Development Peak Stormwater Flows			
	2-Year Storm Event (cfs)	10-Year Storm Event (cfs)	25-Year Storm Event (cfs)
Total Runoff	0.23	1.52	5.04

The post-development calculations include changes to the land use and the compensation provided by the stormwater BMPs. It should be noted that the project is also reducing the overall impervious area. As a result, the total peak flow rates in the post development are reduced in comparison to the total predevelopment flow rates for the 2, 10, & 25-year storms.

The following table represents a comparison of pre- development and post-development condition peak runoff rates for the proposed development and tributary area.

Table 9 – Comparison of Peak Flows						
POI	2-Year Storm Event (cfs)		10-Year Storm Event (cfs)		25-Year Storm Event (cfs)	
	Pre	Post	Pre	Post	Pre	Post
Total Runoff	1.25	0.23	3.25	1.52	5.10	5.04

A post-development watershed map developed for this project can be viewed in Attachment B, and a copy of the HydroCAD calculations is included within Attachment C of this report.

SOILS

Onsite soil information includes the following:

- Soil Conservation Service Medium Intensity Soil Survey for Cumberland County
- United States Department of Agriculture Web Soil Survey

Given the soils information, listed above, no onsite wastewater is proposed; the applicant does not intend to perform a more intense hydric soil boundary delineation because the waiver requirements set forth in the City of Portland Technical Manual – Section 7 – Soil Survey, Rev. 6/17/11 are met.

The area within and surrounding the project includes soil types listed in the table below. The susceptibility of soils to erosion is indicated on a relative "K" scale of values over a range of 0.02 to 0.69. Higher "K" values indicate more erodible soils.

Table 10 - "K" Value		
Soils Type	**Subsurface**	**Substratum**
Hinckley Loamy Sand	0.17	0.17

The soil "K" value for the soil, listed above, shows a low susceptibility to erosion. The site's susceptibility to erosion is sourced from the Soil Conservation Service Medium Intensity Soil Survey for Cumberland County.

CONCLUSION

The proposed development was designed to meet the requirements implemented by the MDEP under the Stormwater Management Statute (38 M.R.S.A. § 420-D) as well as the City of Portland Technical Manual – Section 5 – Portland Stormwater Management Standards. The proposed project as designed is not anticipated to cause flooding or erosion problems within the subject site, abutters' sites, nor within the right-of-way. Overall, the project will provide an improvement to stormwater runoff and overall management from several perspectives as outlined above.

POST CONSTRUCTION - STORMWATER INSPECTION & MAINTENANCE PLAN

Prepared For:

Redfern Properties
P.O. Box 8816
Portland, ME 04104

Prepared By:

Acorn Engineering, Inc.
PO Box 3372
Portland, Maine 04102

November 2024

Revised February 2025

RESPONSIBLE PARTY

The owner, Redfern Properties and/or their successor shall be responsible for contracting with a qualified stormwater professional to implement the Inspection and Maintenance Plan. The qualified stormwater professional shall maintain a stormwater log (report) summarizing inspections, maintenance, and corrective action taken. The Qualified Stormwater Professional shall annually submit the Stormwater Log to the Engineering Department prior to June 15th.

The following is an example of a qualified stormwater professional that the owner may contract through.

Organization: Peter Heil, PE
Acorn Engineering, Inc
Portland, Maine

Phone: (207) 775-2655

Qualifications:

- Maine Professional Engineering License #15318
- Maine DEP – Certified in Maintenance & Inspection of Stormwater BMP's Cert
- Maine DEP – Certified Third-Party Inspector
- Certified Professional in Erosion and Sediment Control (CPESC) Cert. #7071

The inspection and maintenance criteria are based upon the Maine DEP - Stormwater Management for Maine, Volume III: BMPs Technical Design Manual. Refer to the Grading and Drainage Plan for the location of the BMPs

PURPOSE

This Inspection and Maintenance Plan has been individually tailored to this parcel's stormwater infrastructure, site characteristics, and their respective opportunities and limitations related to reducing the pollutant load on the receiving watershed. The maintenance of a parcel's impervious surfaces and stormwater infrastructure is critical to extending the long-term performance and effectiveness of Best Management Practices (BMPs). The Inspection and Maintenance Plan represents the parcel's minimum activities to meet the permit requirements. The parcel shall still be subject to any applicable Civil Site Plans, Permit Applications, Erosion and Sedimentation Control Plans Reports, Stormwater Management Plans, Inspection and Maintenance Manuals, and all Municipal, State, and Federal rules. The applicant shall be responsible for retaining post construction and maintenance documents for at least 5 years.

OPERATION AND MAINTENANCE ACTIVITY

Catch Basins / Field Inlets:

Catch basins and field inlets shall be inspected to confirm that the structure is operating properly.

- Inspect the presence of accumulated sediment or debris any sediment shall be removed. The equipment shall meet the following minimum specifications; power jet and water source for washing down the storm drain, vacuum attachment for catch basin cleaning, and a liquid handling method to dewater the material.
- Sediment shall be removed when accumulation is within 6 inches of the outfall pipe invert. Legally dispose of accumulated sediment and debris from the bottom of the basin, inlet grates, and inflow channels to the basin.
- If the basin outlet is designed with a hood to trap floatable materials (e.g. Snout), check to ensure watertight seal is working.
- Appropriately dispose of all collected material.

Sweeping:

Annual sweeping of the parking lot following the snow melt, if necessary. Appropriately dispose of all collected material.

Storm Drains:

The storm drain shall be annually inspected for the presence of accumulated sediment or debris. Any sediment shall be removed as required.

- The equipment shall meet the following minimum specifications; power jet and water source for washing down the storm drain, vacuum attachment for catch basin cleaning, and a liquid handling method to dewater the material.
- Inspect and legally dispose of accumulated sediment and debris within the storm drains between basins. Liquids must be decanted on-site and returned to the catch basin.

R-Tank:

The maintenance of the R-Tank system shall be in accordance with the following activities identified below and the Stormwater Drainage System Maintenance Agreement included within Stormwater Report.

- The system should be inspected after every major storm in the first few months to ensure proper function. Thereafter, the system should be inspected annually.
- Inspect and maintain the R-Tanks in accordance with the attached proprietary Operation and Maintenance Plan.

StormFilter:

The maintenance of the StormFilter system shall be in accordance with the following activities identified below and the Stormwater Drainage System Maintenance Agreement included within Stormwater Report.

- The system should be inspected after every major storm in the first few months to ensure proper function. Thereafter, the system should be inspected annually.
- Inspect and maintain the StormFilter in accordance with the attached proprietary Operation and Maintenance Plan.

Vegetated Areas and Embankments:

Inspect all landscaped and or vegetated slopes and embankments on an annual basis. Vegetated areas with bare areas or sparse growth (<90% coverage) shall be revegetated. Mulch shall be applied to landscaped areas, as necessary. Dead or decaying landscaping (ground cover, shrubs, trees etc.) shall be replanted in accordance with the approved Site Plan

INSPECTION AND MAINTENANCE TABLE

Inspection and Maintenance Frequency	Spring or Yearly	Summer	Fall	As Necessary
Catch Basins	X			X
Vegetated Areas & Slopes	X			X
R-Tank System	X			X
StormFilter	X			X
Storm Drains	X			X
Sweeping	X			X

In the above chart, it is assumed the certified stormwater professional will inspect each item in the spring. Inspections outside of the spring visits can likely be conducted by the property manager.

ATTACHED

1. R-Tank Operation and Maintenance
2. StormFilter Operation and Maintenance

Housekeeping Notes

1. **Spill prevention.** Controls must be used to prevent pollutants from construction and waste materials stored on site to enter stormwater, which includes storage practices to minimize exposure of the materials to stormwater. The site contractor or operator must develop, and implement as necessary, appropriate spill prevention, containment, and response planning measures.

   NOTE: Any spill or release of toxic or hazardous substances must be reported to the Department. For oil spills, call 1-800-482-0777 which is available 24 hours a day. For spills of toxic or hazardous material, call 1-800-452-4664 which is available 24 hours a day. For more information, visit the Department's website at : http://www.maine.gov/dep/spills/emergspillresp/

2. **Groundwater protection.** During construction, liquid petroleum products and other hazardous materials with the potential to contaminate groundwater may not be stored or handled in areas of the site draining to an infiltration area. An "infiltration area" is any area of the site that by design or as a result of soils, topography and other relevant factors accumulates runoff that infiltrates into the soil. Dikes, berms, sumps, and other forms of secondary containment that prevent discharge to groundwater may be used to isolate portions of the site for the purposes of storage and handling of these materials. Any project proposing infiltration of stormwater must provide adequate pre-treatment of stormwater prior to discharge of stormwater to the infiltration area, or provide for treatment within the infiltration area, in order to prevent the accumulation of fines, reduction in infiltration rate, and consequent flooding and destabilization.

   See Appendix D for license by rule standards for infiltration of stormwater.

   NOTE: Lack of appropriate pollutant removal best management practices (BMPs) may result in violations of the groundwater quality standard established by 38 M.R.S.A. §465-C(1).

3. **Fugitive sediment and dust.** Actions must be taken to ensure that activities do not result in noticeable erosion of soils or fugitive dust emissions during or after construction. Oil may not be used for dust control, but other water additives may be considered as needed. A stabilized construction entrance (SCE) should be included to minimize tracking of mud and sediment. If off-site tracking occurs, public roads should be swept immediately and no less than once a week and prior to significant storm events. Operations during dry months, that experience fugitive dust problems, should wet down unpaved access roads once a week or more frequently as needed with a water additive to suppress fugitive sediment and dust.

   NOTE: Dewatering a stream without a permit from the Department may violate state water quality standards and the *Natural Resources Protection Act*.

4. **Debris and other materials.** Minimize the exposure of construction debris, building and landscaping materials, trash, fertilizers, pesticides, herbicides, detergents, sanitary waste and other materials to precipitation and stormwater runoff. These materials must be prevented from becoming a pollutant source.

   NOTE: To prevent these materials from becoming a source of pollutants, construction and post-construction activities related to a project may be required to comply with applicable provision of rules related to solid, universal, and hazardous waste, including, but not limited to, the Maine solid waste and hazardous waste management rules; Maine hazardous waste management rules; Maine oil conveyance and storage rules; and Maine pesticide requirements.

5. **Excavation de-watering.** Excavation de-watering is the removal of water from trenches, foundations, coffer dams, ponds, and other areas within the construction area that retain water after excavation. In most cases the collected water is heavily silted and hinders correct and safe construction practices. The collected water removed from the ponded area, either through gravity or pumping, must be spread through natural wooded buffers or removed to areas that are specifically designed to collect the maximum amount of sediment possible, like a cofferdam sedimentation basin. Avoid allowing the water to flow over disturbed areas of the site. Equivalent measures may be taken if approved by the Department.

NOTE: Dewatering controls are discussed in the "Maine Erosion and Sediment Control BMPs, Maine Department of Environmental Protection."

6. **Authorized Non-stormwater discharges.** Identify and prevent contamination by non-stormwater discharges. Where allowed non-stormwater discharges exist, they must be identified and steps should be taken to ensure the implementation of appropriate pollution prevention measures for the non-stormwater component(s) of the discharge. Authorized non-stormwater discharges are:

   (a) Discharges from firefighting activity;

   (b) Fire hydrant flushings;

   (c) Vehicle washwater if detergents are not used and washing is limited to the exterior of vehicles (engine, undercarriage and transmission washing is prohibited);

   (d) Dust control runoff in accordance with permit conditions and Appendix (C)(3);

   (e) Routine external building washdown, not including surface paint removal, that does not involve detergents;

   (f) Pavement washwater (where spills/leaks of toxic or hazardous materials have not occurred, unless all spilled material had been removed) if detergents are not used;

   (g) Uncontaminated air conditioning or compressor condensate;

   (h) Uncontaminated groundwater or spring water;

   (i) Foundation or footer drain-water where flows are not contaminated;

   (j) Uncontaminated excavation dewatering (see requirements in Appendix C(5));

   (k) Potable water sources including waterline flushings; and

   (l) Landscape irrigation.

7. **Unauthorized non-stormwater discharges .** The Department's approval under this Chapter does not authorize a discharge that is mixed with a source of nonstormwater, other than those discharges in compliance with Appendix C (6). Specifically, the Department's approval does not authorize discharges of the following:

   (a) Wastewater from the washout or cleanout of concrete, stucco, paint, form release oils, curing compounds or other construction materials;

(b) Fuels, oils or other pollutants used in vehicle and equipment operation and maintenance;

(c) Soaps, solvents, or detergents used in vehicle and equipment washing; and

(d) Toxic or hazardous substances from a spill or other release.

(8) Additional requirements. Additional requirements may be applied on a site-specific basis.

CONTECH®
ENGINEERED SOLUTIONS

StormFilter Inspection and Maintenance Procedures

The Stormwater Management StormFilter®

Maintenance Guidelines

The primary purpose of the Stormwater Management StormFilter® is to filter and prevent pollutants from entering our waterways. Like any effective filtration system, periodically these pollutants must be removed to restore the StormFilter to its full efficiency and effectiveness.

Maintenance requirements and frequency are dependent on the pollutant load characteristics of each site. Maintenance activities may be required in the event of a chemical spill or due to excessive sediment loading from site erosion or extreme storms. It is a good practice to inspect the system after major storm events.

Maintenance Procedures

Although there are many effective maintenance options, we believe the following procedure to be efficient, using common equipment and existing maintenance protocols. The following two-step procedure is recommended::

1. **Inspection**
   - Inspection of the vault interior to determine the need for maintenance.
2. **Maintenance**
   - Cartridge replacement
   - Sediment removal

Inspection and Maintenance Timing

At least one scheduled inspection should take place per year with maintenance following as warranted.

First, an inspection should be done before the winter season. During the inspection the need for maintenance should be determined and, if disposal during maintenance will be required, samples of the accumulated sediments and media should be obtained.

Second, if warranted, a maintenance (replacement of the filter cartridges and removal of accumulated sediments) should be performed during periods of dry weather.

In addition to these two activities, it is important to check the condition of the StormFilter unit after major storms for potential damage caused by high flows and for high sediment accumulation that may be caused by localized erosion in the drainage area. It may be necessary to adjust the inspection/ maintenance schedule depending on the actual operating conditions encountered by the system. In general, inspection activities can be conducted at any time, and maintenance should occur, if warranted, during dryer months in late summer to early fall.

Maintenance Frequency

The primary factor for determining frequency of maintenance for the StormFilter is sediment loading.

A properly functioning system will remove solids from water by trapping particulates in the porous structure of the filter media inside the cartridges. The flow through the system will naturally decrease as more and more particulates are trapped. Eventually the flow through the cartridges will be low enough to require replacement. It may be possible to extend the usable span of the cartridges by removing sediment from upstream trapping devices on a routine as-needed basis, in order to prevent material from being re-suspended and discharged to the StormFilter treatment system.

The average maintenance lifecycle is approximately 1-5 years. Site conditions greatly influence maintenance requirements. StormFilter units located in areas with erosion or active construction may need to be inspected and maintained more often than those with fully stabilized surface conditions.

Regulatory requirements or a chemical spill can shift maintenance timing as well. The maintenance frequency may be adjusted as additional monitoring information becomes available during the inspection program. Areas that develop known problems should be inspected more frequently than areas that demonstrate no problems, particularly after major storms. Ultimately, inspection and maintenance activities should be scheduled based on the historic records and characteristics of an individual StormFilter system or site. It is recommended that the site owner develop a database to properly manage StormFilter inspection and maintenance programs..

Inspection Procedures

The primary goal of an inspection is to assess the condition of the cartridges relative to the level of visual sediment loading as it relates to decreased treatment capacity. It may be desirable to conduct this inspection during a storm to observe the relative flow through the filter cartridges. If the submerged cartridges are severely plugged, then typically large amounts of sediments will be present and very little flow will be discharged from the drainage pipes. If this is the case, then maintenance is warranted and the cartridges need to be replaced.

Warning: In the case of a spill, the worker should abort inspection activities until the proper guidance is obtained. Notify the local hazard control agency and Contech Engineered Solutions immediately.

To conduct an inspection:

Important: Inspection should be performed by a person who is familiar with the operation and configuration of the StormFilter treatment unit and the unit's role, relative to detention or retention facilities onsite.

1. If applicable, set up safety equipment to protect and notify surrounding vehicle and pedestrian traffic.
2. Visually inspect the external condition of the unit and take notes concerning defects/problems.
3. Open the access portals to the vault and allow the system vent.
4. Without entering the vault, visually inspect the inside of the unit, and note accumulations of liquids and solids.
5. Be sure to record the level of sediment build-up on the floor of the vault, in the forebay, and on top of the cartridges. If flow is occurring, note the flow of water per drainage pipe. Record all observations. Digital pictures are valuable for historical documentation.
6. Close and fasten the access portals.
7. Remove safety equipment.
8. If appropriate, make notes about the local drainage area relative to ongoing construction, erosion problems, or high loading of other materials to the system.
9. Discuss conditions that suggest maintenance and make decision as to whether or not maintenance is needed.

Maintenance Decision Tree

The need for maintenance is typically based on results of the inspection. The following Maintenance Decision Tree should be used as a general guide. (Other factors, such as Regulatory Requirements, may need to be considered).

Please note Stormwater Management StormFilter devices installed downstream of, or integrated within, a stormwater storage facility typically have different operational parameters (i.e. draindown time). In these cases, the inspector must understand the relationship between the retention/detention facility and the treatment system by evaluating site specific civil engineering plans, or contacting the engineer of record, and make adjustments to the below guidance as necessary. Sediment deposition depths and patterns within the StormFilter are likely to be quite different compared to systems without upstream storage and therefore shouldn't be used exclusively to evaluate a need for maintenance.

1. Sediment loading on the vault floor.
   a. If >4" of accumulated sediment, maintenance is required.
2. Sediment loading on top of the cartridge.
   a. If >1/4" of accumulation, maintenance is required.
3. Submerged cartridges.
   a. If >4" of static water above cartridge bottom for more than 24 hours after end of rain event, maintenance is required. (Catch basins have standing water in the cartridge bay.)
4. Plugged media.
   a. While not required in all cases, inspection of the media within the cartridge may provide valuable additional information.
   b. If pore space between media granules is absent, maintenance is required.
5. Bypass condition.
   a. If inspection is conducted during an average rain fall event and StormFilter remains in bypass condition (water over the internal outlet baffle wall or submerged cartridges), maintenance is required.
6. Hazardous material release.
   a. If hazardous material release (automotive fluids or other) is reported, maintenance is required.
7. Pronounced scum line.
   a. If pronounced scum line (say ≥ 1/4" thick) is present above top cap, maintenance is required.

Maintenance

Depending on the configuration of the particular system, maintenance personnel will be required to enter the vault to perform the maintenance.

Important: If vault entry is required, OSHA rules for confined space entry must be followed.

Filter cartridge replacement should occur during dry weather. It may be necessary to plug the filter inlet pipe if base flows is occurring.

Replacement cartridges can be delivered to the site or customers facility. Information concerning how to obtain the replacement cartridges is available from Contech Engineered Solutions.

Warning: In the case of a spill, the maintenance personnel should abort maintenance activities until the proper guidance is obtained. Notify the local hazard control agency and Contech Engineered Solutions immediately.

To conduct cartridge replacement and sediment removal maintenance:

1. If applicable, set up safety equipment to protect maintenance personnel and pedestrians from site hazards.
2. Visually inspect the external condition of the unit and take notes concerning defects/problems.
3. Open the doors (access portals) to the vault and allow the system to vent.
4. Without entering the vault, give the inside of the unit, including components, a general condition inspection.
5. Make notes about the external and internal condition of the vault. Give particular attention to recording the level of sediment build-up on the floor of the vault, in the forebay, and on top of the internal components.
6. Using appropriate equipment offload the replacement cartridges (up to 150 lbs. each) and set aside.
7. Remove used cartridges from the vault using one of the following methods:

Method 1:

A. This activity will require that maintenance personnel enter the vault to remove the cartridges from the under drain manifold and place them under the vault opening for lifting (removal). Disconnect each filter cartridge from the underdrain connector by rotating counterclockwise 1/4 of a turn. Roll the loose cartridge, on edge, to a convenient spot beneath the vault access.

   Using appropriate hoisting equipment, attach a cable from the boom, crane, or tripod to the loose cartridge. Contact Contech Engineered Solutions for suggested attachment devices.

B. Remove the used cartridges (up to 250 lbs. each) from the vault.

Important: Care must be used to avoid damaging the cartridges during removal and installation. The cost of repairing components damaged during maintenance will be the responsibility of the owner.

C. Set the used cartridge aside or load onto the hauling truck.

D. Continue steps a through c until all cartridges have been removed.

Method 2:

A. This activity will require that maintenance personnel enter the vault to remove the cartridges from the under drain manifold and place them under the vault opening for lifting (removal). Disconnect each filter cartridge from the underdrain connector by rotating counterclockwise 1/4 of a turn. Roll the loose cartridge, on edge, to a convenient spot beneath the vault access.

B. Unscrew the cartridge cap.

C. Remove the cartridge hood and float.

D. At location under structure access, tip the cartridge on its side.

E. Empty the cartridge onto the vault floor. Reassemble the empty cartridge.

F. Set the empty, used cartridge aside or load onto the hauling truck.

G. Continue steps a through e until all cartridges have been removed.

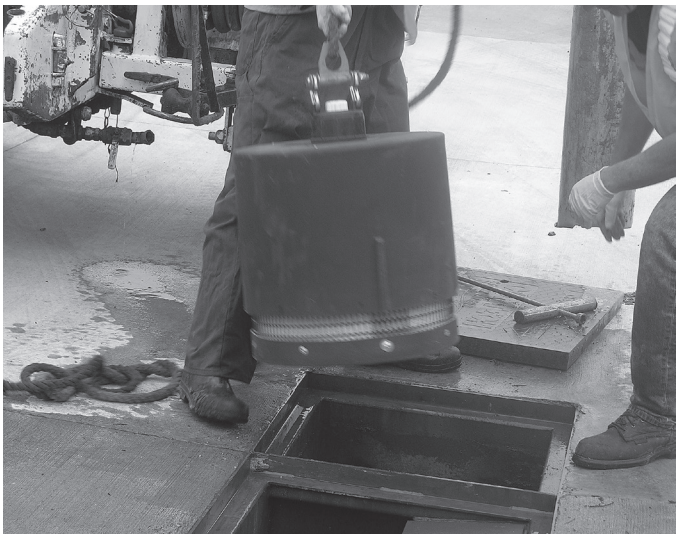
8. Remove accumulated sediment from the floor of the vault and from the forebay. This can most effectively be accomplished by use of a vacuum truck.
9. Once the sediments are removed, assess the condition of the vault and the condition of the connectors.
10. Using the vacuum truck boom, crane, or tripod, lower and install the new cartridges. Once again, take care not to damage connections.
11. Close and fasten the door.
12. Remove safety equipment.
13. Finally, dispose of the accumulated materials in accordance with applicable regulations. Make arrangements to return the used **empty** cartridges to Contech Engineered Solutions.

Material Disposal

The accumulated sediment found in stormwater treatment and conveyance systems must be handled and disposed of in accordance with regulatory protocols. It is possible for sediments to contain measurable concentrations of heavy metals and organic chemicals (such as pesticides and petroleum products). Areas with the greatest potential for high pollutant loading include industrial areas and heavily traveled roads.

Sediments and water must be disposed of in accordance with all applicable waste disposal regulations. When scheduling maintenance, consideration must be made for the disposal of solid and liquid wastes. This typically requires coordination with a local landfill for solid waste disposal. For liquid waste disposal a number of options are available including a municipal vacuum truck decant facility, local waste water treatment plant or on-site treatment and discharge.

Related Maintenance Activities - Performed on an as-needed basis



StormFilter units are often just one of many structures in a more comprehensive stormwater drainage and treatment system.

In order for maintenance of the StormFilter to be successful, it is imperative that all other components be properly maintained. The maintenance/repair of upstream facilities should be carried out prior to StormFilter maintenance activities.

In addition to considering upstream facilities, it is also important to correct any problems identified in the drainage area. Drainage area concerns may include: erosion problems, heavy oil loading, and discharges of inappropriate materials.

R-TANK® OPERATION, INSPECTION AND MAINTENANCE

Operation

Your R-Tank System has been designed to function in conjunction with the engineered drainage system on your site, the existing municipal infrastructure, and/or the existing soils and geography of the receiving watershed. Unless your site included certain unique and rare features, the operation of your R-Tank System will be driven by naturally occurring systems and will function autonomously. However, upholding a proper schedule of Inspection & Maintenance is critical to ensuring continued functionality and optimum performance of the system.

Inspection

Both the R-Tank and all stormwater pre-treatment features incorporated into your site must be inspected regularly. Inspections should be done every six months for the first year of operation, and at least yearly thereafter. Inspections may be required more frequently for pre-treatment systems. You should refer to the manufacturer requirements for the proper inspection schedule.

With the right equipment most inspections and measurements can be accomplished from the surface without physically entering any confined spaces. If your inspection does require confined space entry, you must follow all local, regional, and OSHA requirements.

All maintenance features of your system can be accessed through a covering at the surface. With the lid removed, you can visually inspect each component to identify sediment, trash, and other contaminants within the structure. Check you construction plans to identify the maintenance features engineered into your R-Tank system, which may include:

Upstream Pipes, Inlets, and Manholes

- Working from the structures adjacent the R-Tank toward those farther away, check for debris and sediment in both the structures and the pipes. Be sure to Include all structures that contain pre- treatment systems. Some structures may include a sump.

Maintenance Ports

- Located near the inlet and outlet connections and throughout the system, check sediment depth at each port.

Inspection Ports

- Less common, inspection ports are primarily located within the Treatment Row of an R-Tank System. These should be used to check for sediment deposits but are typically too small to access for backflushing.

Treatment Row

- On installations in 2018 or later, inlet pipes may connect to a row of modules with 12” diameter access holes running horizontally through the module that can be jet vacuumed. Check these rows for accumulation of sediment and debris.

All observations and measurements should be recorded on an Inspection Log kept on file. We’ve included a form you can use at the end of this guide.

Maintenance

For modules taller than 40” the R-Tank System should be back-flushed once sediment accumulation has reached 6”. For modules less than 40” tall, perform maintenance when sediment depths are greater than 15% of the total system height.

If your system includes a Treatment Row with linear access through the modules from the inlet pipe, backflush this area when sediment depths reach 6”.

BEFORE ANY MAINTENANCE IS PERFORMED ON YOUR SYSTEM -
PLUG THE OUTLET PIPE TO PREVENT CONTAMINATION OF THE DOWNSTREAM SYSTEMS.

Begin by cleaning all upstream structures, pipes, and pre-treatment systems containing sediment and/or debris. If your system includes a Treatment Row, this portion of the system should be cleaned with traditional jet-vac equipment. Add a centralizer to the jet for easiest access through the modules.

To back-flush the R-Tank, water is pumped into the system through the Maintenance Ports as rapidly as possible. The turbulent action of the water moving through the R-Tank will suspend sediments which may then be pumped out. If your system includes an Outlet Structure, this will be the ideal location to pump contaminated water out of the system. However, removal of back-flush water may be accomplished through the Maintenance Ports, as well.

For systems with large footprints that would require extensive volumes of water to properly flush the system, you should consider performing your maintenance within 24 hours of a rain event. Stormwater entering the system will aid in the suspension of sediments and reduce the volume of water required to properly flush the system.

STEP BY STEP INSTRUCTIONS FOR INSPECTION AND MAINTENANCE CAN BE FOUND ON THE NEXT PAGE, WITH A MAINTENANCE LOG ON THE LAST PAGE.

INSPECTION

1. Upstream Structures
    a. Remove cover
    b. Use flashlight to detect sediment deposits If present, measure sediment depth
    c. Inspect pipes connecting to R-Tank
        i. If inlet pipes connect to Treatment Row, check sediment depth within these modules
        ii. If access for measurement inside the Treatment Row is difficult, sediment depth can be estimated based on the coverage of the round, 12” opening of the module
    d. Inspect pre-treatment systems (if present)
    e. Record results on Maintenance Log
    f. Replace cover
    g. Repeat for ALL Manholes upstream of R-Tank until no sedimentation is observed and all pre- treatment systems have been checked
2. Maintenance Ports
    a. Remove cap
    b. Use flashlight to detect sediment deposits
    c. If present, measure sediment depth with stadia rod
    d. Record results on maintenance log
    e. Replace cap
    f. Repeat for ALL Maintenance Ports
3. Inspection Port
    a. Remove cap
    b. Use flashlight to detect sediment deposits
    c. If present, measure sediment depth with stadia rod
    d. Record results on Maintenance Log
    e. Replace cap

MAINTENANCE

1. Plug system outlet to prevent discharge of back-flush water
2. Vacuum all upstream structures, inlet pipes, and stormwater pre-treatment systems
3. If a Treatment Row is present, vacuum this row of modules
4. Determine best location to pump out back-flush water. Typically, the outlet structure will work best, but sometimes the Maintenance Ports must be used.
5. Remove cap from Maintenance Port and pump water as rapidly as possible into system through port to suspend sediments, pumping dirty water out of the system from the outlet or nearby Maintenance Port
6. Repeat at all Maintenance Ports until sediment levels are reduced to a satisfactory level
7. Sediment-laden water shall be disposed of per local regulations
8. Replace any remaining caps or covers and remove outlet plug
9. Record the back-flushing event in your Maintenance Log with any relevant specifics

K. EROSION & SEDIMENTATION CONTROL REPORT

Prepared For:

Redfern Properties
P.O. Box 8816
Portland, ME 04104

Prepared By:

Acorn Engineering, Inc.
P.O. Box 3372
Portland, Maine 04104

February 2025

INTRODUCTION

Acorn Engineering, Inc. has been retained by Redfern Properties to provide civil engineering services for the proposed work located at 165 Washington Avenue, Portland, ME 04101. The project proposes to demolish the existing Northern Burner Supply building and associated parking areas and construct a 326-unit multi-family / mixed use building with commercial space on the first floor. It is anticipated that the building will be a mixture of two-bedroom, one-bedroom and studio units. The project also includes various parking, utility, and landscape improvements.

The following Erosion and Sedimentation Control Report was developed in accordance with the City of Portland Technical Manual – Section 12 – Portland Stormwater Management Standards and the Maine DEP Chapter 500 Stormwater Management Appendix A and B (1), Amended August 12, 2015. This narrative also meets the standards required in the Maine DEP's Erosion & Sediment Control BMP's Manual, revised in 2016.

	Plan Submission Requirement	Inspector Requirement	Inspection Report Submittal
Construction Activity > 1 Acres of Disturbance	Comprehensive	Third-Party Inspector	Weekly to Water Resources & Planning
Construction Activity < 1 Acres of Disturbance	Basic	Qualified Professional	Weekly or as specified

The proposed project will disturb approximately 1.50 acres and as such is subject to a Comprehensive Erosion and Sedimentation Control Plan as defined in Section 12 of the City of Portland Technical Manual.

PRE-CONSTRUCTION MEETING

For sites with a Comprehensive Erosion Control Plan, a pre-construction meeting is required. Once an approved Performance Guarantee, if required, is in hand and at least five (5) days prior to commencing Construction Activity, the applicant shall request a pre-construction meeting with the Enforcement Authority. At a minimum, attendance at the meeting is required by the Enforcement Authority and the applicant or their representative in charge of construction. If the representative in charge of construction is not the primary earthwork contractor, a representative of the earth work contractor must also attend the pre-construction meeting. Erosion and sediment controls should be installed for inspection during the pre-construction meeting and must be installed and inspected prior to the start of construction.

1.0 EXISTING CONDITIONS

The proposed project is located at 165 Washington Avenue. A Boundary & Topographic Survey has been prepared by Owen Haskell, Inc. on July 25, 2023.

Abutting Uses:

- North OS-R Zone Land Banks

- East B2b/RN4 Zone Residential
- South B2b/RN4 Zone Multi-Use Commercial/Residential
- West B2b Zone Retail/Residential

A large majority of the existing site is impervious surface that mainly includes the existing Northern Burner Supply building and parking lots. The slope within the existing developed area is relatively flat with steep grades along the rear of the parcel.

1.1 Existing Soils

Onsite soil information includes the following:

- Soil Conservation Service Medium Intensity Soil Survey for Cumberland County

Given the soils information, listed above, no onsite wastewater is proposed; the applicant does not intend to perform a more intense hydric soil boundary delineation because the waiver requirements set forth in the City of Portland Technical Manual – Section 7 – Soil Survey, Rev. 6/17/11;12/8/20 are met.

The area within and surrounding the project includes soil types listed in the table below. The susceptibility of soils to erosion is indicated on a relative "K" scale of values over a range of 0.02 to 0.69. Higher "K" values indicate more erodible soils.

Table 1 - "K" Value

Soils Type	Subsurface	Substratum
Hinkley Loamy Sand	0.17	0.17

The soil "K" value for the soil, listed above, shows a low susceptibility to erosion. The site's susceptibility to erosion is from the Soil Conservation Service Medium Intensity Soil Survey for Cumberland County. Although soil "K" values for the soils show a moderate susceptibility to erosion, implementation of the proposed Erosion & Sedimentation Measures by the contractor will be of the utmost importance given the sustained slope throughout the site.

1.2 Existing Erosion Problems

There are no signs of erosion.

1.3 Critical Areas

There are no critical areas.

1.4 Protected Natural Resource

The client is not aware of the presence of any existing significant natural features located on the site as listed in Section 14-526 (b) 1. of the Land Use Code. The project is not located within a watershed classified as an Urban Impaired Stream by the Maine DEP.

1.5 Previous Construction Activity (5 years)

Acorn Engineering, Inc. is not aware of any construction related activities within the project limits within the past 5 years.

1.6 Timber Harvesting

Acorn Engineering, Inc. is not aware of any timber harvesting within the past five years.

2.0 EROSION CONTROL MEASURES AND SITE STABILIZATION

As part of the site development, the following temporary and permanent erosion and sedimentation control devices shall be implemented. Devices shall be installed as described in this report or within the plan set. See the Maine Erosion and Sediment Control Handbook for Construction: Best Management Practices for further reference.

2.1 Temporary Erosion Control Measures

Erosion and Sedimentation Control BMPs must be in place prior to earth disturbance. For sites with 1 acre or more of disturbance which require a Comprehensive ESC Plan, ESC BMPs should be installed **prior** to the required pre- construction meeting.

The following temporary erosion and sedimentation control measures are planned for the project's construction period:

2.1.1 Crushed stone stabilized construction entrances shall be placed at all access points to the project site where there are disturbed areas. The following specifications shall be followed at a minimum:

- Stone size shall be 2-3 inches or reclaimed or recycled concrete equivalent.
- The thickness of the entrance stone layer shall be no less than 6 inches.
- The entrance shall not be less than 20 feet wide, however not less than the full width of points where ingress or egress occurs. The length shall not be less than 50 feet in length.
- Geotextile fabric (woven or non-woven) shall be placed over the entire entrance area.
- The entrance/exit shall be maintained to the extent that it will prevent the tracking of sediment onto public roadways.

2.1.2 Siltation fence or erosion control berm shall be installed down gradient of any disturbed areas to trap runoff borne sediments until permanent stabilization is achieved. The silt fence or erosion control berm shall be installed per the details provided in the plan set and inspected before and immediately after each rainfall and at least daily during prolonged rainfall. Repairs shall be made if there are any signs of erosion or sedimentation below the fence line or

berm. If there are signs of undercutting at the center or the edges, or impounding of large volumes of water behind the fence or berm, the barrier shall be replaced with a stone check dam.

2.1.3 Hay mulch including hydro seeding is intended to provide cover for denuded or seeded areas until revegetation is established. Mulch placed between April 15th and November 1st on slopes of less than 15 percent shall be covered by fabric netting and anchored with staples in accordance with the manufacturer's recommendation. Mulch placed between November 1st and April 15th on slopes equal to or steeper than 8 percent and equal to or flatter than 2:1 shall use mats or fabric netting and anchored with staples in accordance with the manufacturer's recommendation.

2.1.4 At any time of the year, all slopes greater than 3:1 shall be stabilized with Double Net Erosion Control Blanket Bionet SC150BN by North American Green or Approved Equal, or Erosion Control Mix Slope Protection as detailed within the plans.

2.1.5 Washington Avenue shall be swept to control mud and dust from the construction site as necessary. Add additional stone to the stabilized construction entrance to minimize the tracking of material off the site and onto the surrounding roadways.

2.1.6 During demolition, clearing and grubbing operations, stone check dams shall be installed at any areas of concentrated flow. The maximum height of the check dam shall not exceed 2 feet. The center of the check dam shall be 6 inches below the outer edges of the dam. The contractor shall mulch the side slopes and install stone check dams for all newly excavated ditch lines within 24 hours of their creation.

2.1.7 Silt fence stake spacing shall not exceed 6 feet unless the fence is supported with 14-gauge wire in which case the maximum spacing shall not exceed 10 feet. The silt fence shall be "toed" into the ground.

2.1.8 Storm drain inlet protection shall be provided to storm drains using any of the following: hay bale drop inlet structures, silt fence drop inlet sediment filter, gravel and wire mesh drop inlet sediment filter, or curb inlet sediment filter. Barriers shall be inspected after every rainfall event and repaired as necessary. Sediments shall be removed when accumulation has reached ½ the design height.

2.1.9 Dust control shall be accomplished using any of the following: water, calcium chloride, stone, or an approved MDEP product. Dust control shall be applied as needed to accomplish dust control.

2.1.10 Temporary loam, seed, and mulching shall be used in areas where no other erosion control measure is used. Application rates for seeding are provided at the end of this report.

2.1.11 Stockpiles shall be stabilized within 7 days of formation unless a scheduled rain event occurs prior to the 7-day window, in which case the stockpile shall be stabilized prior to the rain event. Methods of stabilization shall be mulch, erosion control mix, or erosion control blankets/mats. Silt fence or a wood waste compost filter berm shall be placed downhill of any soil stockpile location.

2.1.12 For disturbance between November 1 and April 15, please refer to winter stabilization plan in this report and the Maine Erosion and Sediment Control BMP manual for further information.

2.1.13 It is of the utmost importance that stormwater runoff and potential sediment from the construction site be diverted around the proposed underdrains until the trench is backfilled.

2.1.14 Within 7 days of the cessation of Construction Activities in an area that will not be worked for more than 7 days, stabilize any exposed soil with mulch, or other non-erodible cover. Stabilize areas within 75 feet of a wetland or waterbody within 48 hours of the initial disturbance of the soil or prior to any storm event, whichever comes first.

2.2 Permanent Erosion Control Measures

If the Site or a portion of the Site will not be worked for more than one year or has been brought to final grade, then permanently stabilize the area within 7 days by planting vegetation, seeding, sod, or through the use of permanent mulch, or riprap, or road sub-base. If using vegetation for stabilization, select the proper vegetation for the light, moisture, and soil conditions; amend the Disturbed Area subsoils with topsoil, compost, or fertilizers; protect seeded areas with mulch or, if necessary, erosion control blankets; and schedule sodding, planting, and seeding so to avoid die-off from summer drought and fall frosts. Newly seeded or sodded areas must be protected from vehicle traffic, excessive pedestrian traffic, and concentrated runoff until the vegetation is well-established with 90% cover by healthy vegetation. If necessary, areas must be reworked and restabilized if germination is sparse, plant coverage is spotty, or topsoil erosion is evident. Permanent Stabilization Definitions are as follows:

2.2.1 **Seeded areas:** For seeded areas, permanent stabilization means a 90% cover of the Disturbed Area with mature, healthy plants with no evidence of washing or rilling of the topsoil.

2.2.2 **Sodded areas**: For sodded areas, permanent stabilization means the complete binding of the sod roots into the underlying soil with no slumping of the sod or die-off.

2.2.3 **Permanent mulch:** For mulched areas, permanent mulching means total coverage of the exposed area with an approved mulch material. Erosion control mix may be used as mulch for permanent stabilization according to the approved application rates and limitations.

2.2.4 **Riprap:** For areas stabilized with riprap, permanent stabilization means that slopes stabilized with riprap have an appropriate backing of a well-graded gravel or approved geotextile to prevent soil movement from behind the riprap. Stone must be sized appropriately. It is recommended that angular stone be used.

2.2.5 **Paved areas:** For paved areas, permanent stabilization means the placement of the compacted gravel subbase is completed, provided it is free of fine materials that may runoff with a rain event.

2.2.6 **Ditches, channels, and swales:** For open channels, permanent stabilization means the channel is stabilized with a 90% cover of healthy vegetation, with a well-graded riprap lining, turf reinforcement mat, or with another non- erosive lining such as concrete or asphalt pavement. There must be no evidence of slumping of the channel lining, undercutting of the channel banks, or down-cutting of the channel.

2.2.7 All disturbed areas during construction, not subject to other proposed conditions, shall receive a minimum 4" of loam, limed, and mulched. Erosion control blankets or mats shall be placed over the mulch in areas noted in paragraph 4.1 of this report.

2.2.8 All stormwater devices shall be installed, and tributary areas stabilized prior receiving stormwater.

2.2.9 Refer to the Maine Erosion and Sediment Control BMP manual for additional information.

2.2.10 Remove any temporary control measures, such as silt fence, within 30 days after permanent stabilization is attained. Remove any accumulated sediments and stabilize.

3.0 EROSION AND SEDIMENTATION CONTROL PLAN

3.1 The Erosion and Sedimentation Control Plan (Construction Management Plan) is included within the plan set.

4.0 DETAILS AND SPECIFICATIONS

4.1 Erosion Control Details and Specifications are included in the plan set.

5.0 STABILIZATION PLAN FOR WINTER CONSTRUCTION

Winter Construction consists of earthwork disturbance between the dates of November 1 and April 15. If a construction site is not stabilized with pavement, a road gravel base, 75%

mature vegetation cover or riprap by November 15, then the site shall be protected with over-winter stabilization. Any area not stabilized with pavement, vegetation, mulching, erosion control mix, erosion control mats, riprap, or gravel base on a road shall be considered open.

The contractor shall limit the work area to areas that work will occur in during the subsequent 15 days and so that it can be mulched one day prior to a snow event. The contractor shall stabilize work areas prior to opening additional work areas to minimize areas without erosion control measures.

The following measures shall be implemented during winter construction periods:

5.1 Sediment Barriers

During frozen conditions, sediment barriers may consist of erosion control mix berms or any other recognized sediment barriers as frozen soil prevents the proper installation of hay bales or silt fences.

5.2 Mulching

All areas shall be considered to be denuded until seeded and mulched. Hay and straw mulch shall be applied at a rate of 150 lb. per 1,000 square feet or 3 tons/acre (twice the normal accepted rate of 75-lbs./1,000 s.f. or 1.5 tons/acre) and shall be properly anchored. Erosion control mix must be applied with a minimum 4-inch thickness. Mulch shall not be spread on top of snow. The snow shall be removed down to a one-inch depth or less prior to application. After each day of final grading, the area shall be properly stabilized with anchored hay or straw or erosion control matting. An area shall be considered to have been stabilized when exposed surfaces have been either mulched or adequately anchored so that ground surface is not visible through the mulch. Between the dates of November 1 and April 15, all mulch shall be anchored by either mulch netting, tracking or wood cellulose fiber. The cover will be considered sufficient when the ground surface is not visible through the mulch. After November 1st, mulch and anchoring of all exposed soil shall occur at the end of each final grading workday.

5.3 Soil Stockpiling

Stockpiles of soil or subsoil shall be mulched for over winter protection with hay or straw at twice the normal rate or with a four-inch layer of erosion control mix. This shall be done within 24 hours of stocking and re-established prior to any rainfall or snowfall.

5.4 Seeding

Between the dates of October 15th and April 1st, loam or seed shall not be required. During periods of above freezing temperatures finished areas shall be fine graded and either protected with mulch or temporarily seeded and mulched until the final treatment can be applied. If the date is after November 1st and if the exposed area has not been loamed, final grading with a uniform surface, then the area may be dormant seeded at a rate of 3 times higher than specified for permanent seed and then mulched.

Dormant seeding may be placed prior to the placement of mulch or erosion control blankets. If dormant seeding is used for the site, all disturbed areas shall receive 4" of loam and seed at an application rate of 5 lbs./1,000 s.f. All areas seeded during the winter shall be inspected in the spring for adequate catch. All areas insufficiently vegetated (less than 75% catch) shall be revegetated by replacing loam, seed and mulch. If dormant seeding is not used for the site, all disturbed areas shall be revegetated in the spring.

5.5 Over winter stabilization of disturbed soils

By September 15th, all disturbed soils on areas having a slope less than 15% shall be seeded and mulched. If the disturbed areas are not stabilized by this date, then one of the following actions shall be taken to stabilize the soil for late fall and winter:

- Stabilize the soil with temporary vegetation – By October 1st, seed the disturbed soil with winter rye at a seeding rate of 3lbs per 1,000 s.f., lightly mulch the seeded soil with hay or straw at 75 lbs per 1,000 s.f., and anchor the mulch with plastic netting. Monitor growth of the rye over the next 30 days. If the rye fails to grow at least three inches or fails to cover at least 75% of the disturbed soil before November 1st, then mulch the area for over-winter protection.

- Stabilize the soil with sod – Stabilize the disturbed soil with properly installed sod by October 1st. Proper installation includes pinning the sod onto the soil with wire pins, rolling the sod to guarantee contact between the sod and underlying soil, and watering the sod to promote root growth into the disturbed soil.

- Stabilize the soil with mulch – By November 15th, mulch the disturbed soil by spreading hay or straw at a rate of at least 150 lbs per 1,000 s.f. on the area so that no soil is visible through the mulch. Immediately after applying the mulch, anchor the mulch with plastic netting to prevent wind from moving the mulch off the disturbed soil.

5.6 Over winter stabilization of disturbed slopes

All stone-covered slopes shall be constructed and stabilized by November 15th. All slopes to be vegetated shall be seeded and mulched by September 1st. A slope is considered a grade greater than 15%. If a slope to be vegetated is not stabilized by September 1st, then one of the following action shall be taken to stabilize the slope for late fall and winter:

- Stabilize the soil with temporary vegetation and erosion control mats – By October 1st the disturbed slope shall be seeded with winter rye at a seeding rate of 3 lbs per 1,000 s.f. and then install erosion control mats or anchored mulch over the seeding. If the rye fails to grow at least three inches or fails to cover at least 75% of the slope by November 1st, then the contractor shall cover the slope with a layer of erosion control mix or with stone riprap.

- Stabilize the soil with sod – The disturbed slope shall be stabilized with properly installed sod by October 1st. Proper installation includes the contractor pinning the sod onto the slope with wire pins, rolling the sod to guarantee contact between the sod and underlying soil, and watering the sod to promote root growth into the disturbed soil. The contractor shall not use late-season sod installation to stabilize slopes having a grade greater than 3H:1V or having groundwater seeps on the slope face.

- Stabilize the soil with erosion control mix – Erosion control mix shall be properly installed by November 15th. The contractor shall not use erosion control mix to stabilize slopes having grades greater than 2H:1V or having groundwater seeps on the slope face.

- Stabilize the soil with stone riprap – Place a layer of stone riprap on the slope by November 15th. A registered professional engineer shall be hired to determine the stone size needed for stability on the slope and to design a filter layer for underneath the riprap.

6.0 INSPECTION AND MAINTENANCE

A person with knowledge of erosion and stormwater control, including the standards and conditions in the permit, shall conduct periodic visual inspections of installed erosion control measures. The frequency of inspection shall occur at least once every two weeks, as well as after a "storm event". A "storm event" shall consist 0.5 inches of rain within a 24-hour period. The following Erosion and Sediment Control - Best Management Practices (BMP's) shall inspected in the manner as described.

6.1 Sediment Barriers

Hay bale barriers, silt fences and filter berms shall be inspected and repaired for the following if there are any signs of erosion or sedimentation below them. If there are signs of undercutting at the center or the edges of the barrier, or impounding of large volumes of water behind them, sediment barriers shall be replaced with a temporary check dam. Should the fabric on a silt fence or filter barrier decompose or become ineffective prior to the end of the expected usable life and the barrier is still necessary, the fabric shall be replaced promptly. Sediment deposits should be removed when deposits reach approximately one-half the height of the barrier. Filter berms should be reshaped as needed. Any sediment deposits remaining in place after the silt fence or filter barrier is no longer required should be dressed to conform to the existing grade, prepared and seeded.

6.2 Stabilized Stone Construction Entrances

The exit shall be maintained in a condition that will prevent tracking of sediment onto public rights-of-way. When the control pad becomes ineffective, the stone shall be removed along with the collected soil material and redistributed on site in a stable manner. The entrance should then be reconstructed. The contractor shall sweep or wash pavement at exits, which have experienced mud-tracking on to the pavement or

traveled way. When washing is required, it shall be done on an area stabilized with aggregate, which drains into an approved sediment trapping device. All sediment shall be prevented from entering storm drains, ditches, or waterways.

6.3 Mulched Areas

All mulches must be inspected periodically, in particular after rainstorms, to check for rill erosion. If less than 90% of the soil surface is covered by mulch, additional mulch shall be immediately applied. Nets must be inspected after rain events for dislocation or failure. If washouts or breakage occur, re-install the nets as necessary after repairing damage to the slope. Where mulch is used in conjunction with ornamental plantings, inspect periodically throughout the year to determine if mulch is maintaining coverage of the soil surface. Repair as needed.

6.4 Dust Control

When temporary dust control measures are used, repetitive treatment shall be applied as needed to accomplish control.

6.5 Stormwater Appurtenances

All underdrains, storm drains, and catch basins need to be operating effectively and free of debris.

Erosion and Sedimentation Control Inspections:

Acorn Engineering has personnel qualified to conduct Erosion and Sedimentation Control Inspections. For further information, contact:

Contact: Peter Heil, PE
Telephone: (207) 775-2655

Qualifications:

- Maine Professional Engineering License #15318
- Maine DEP - Certified in Maintenance & Inspection of Stormwater BMP's
- Maine DEP – Certified Third-Party Inspector
- Certified Professional in Erosion and Sediment Control (CPESC) Cert. #7071

The Contractor has sole responsibility for complying with the Erosion and Sedimentation Report/Plan, including control of fugitive dust. The Contractor shall be responsible for any monetary penalties resulting from failure to comply with these standards.

Comprehensive Inspection and Maintenance Requirements:

Erosion and Sedimentation Controls must be inspected, as detailed below, to confirm that BMPs are in place and functioning. Corrective actions must be taken if erosion is occurring or there is a discharge of sediment or turbid water from the construction site.

A. For all sites with one acre or greater of disturbance, the applicant shall retain the services of a qualified professional third-party inspector to inspect the site weekly, for the duration of construction until final site stabilization is in place. For sites less than one acre of disturbance that are required to have a comprehensive erosion and sediment control plan, the applicant shall retain the services of a qualified professional.

B. The inspection is required in order to ensure that all construction and stabilization activities comply with the approved drawings and specifications; that field decisions regarding erosion control implementation, stormwater system installation, and natural resource protection are based on sound engineering and environmental considerations; and that any changes to the development's erosion control plan, stormwater management plan, or final stabilization plan is communicated to the City of Portland for additional review and approval.

C. All areas of disturbance, impervious areas, ESC BMPs, materials storage areas exposed to precipitation, and locations where vehicles enter or exit the Site shall be inspected at least once a week as well as before and within 24 hours after a storm event (rainfall) and prior to completing permanent stabilization measures.

D. For all sites with one acre or greater of disturbance, the inspector will submit weekly written reports to the Stormwater Coordinator(s) in the Water Resources Division of Public Works and the Development Review Coordinator(s) in Planning. Reports must include: project ID, project address, the date(s) and time(s) of inspection(s), site photographs of areas under construction, and the date(s) and approximate duration(s) of any rainfall events in the prior week. The report will identify and describe any erosion problems or discharge of pollutants and what actions will be taken to address these issues and repair any damage to other properties or natural resources, actions to eliminate the erosion source, and actions to prevent future sediment discharges from the area. Sites with less than 1 acre of disturbance may request a waiver to be reviewed and approved by Water Resources, for weekly inspection report submission, as allowed by Chapter 32- 48 of the Code of Ordinances.

E. If ESC BMPs need to be maintained, repaired, or enhanced, the work shall be initiated upon discovery of the problem but no later than the end of the next workday or prior to a precipitation event, whichever comes first. Immediate corrective actions are required to address active discharges of sediment to municipal streets or storm drains or to surface waters. If additional ESC BMPs or significant repair of ESC BMPs are necessary, implementation must be completed prior to any storm event (rainfall) and within 7 calendar All development constructed within the limits of the City of Portland shall have a hydrant within five hundred feet (500') of all structures. days of identification. All measures must be maintained in effective operating condition until areas are permanently stabilized.

F. An inspection log summarizing the inspections and any corrective actions must be maintained. The log must include the name(s) and qualifications of the person making the inspections, the date(s) of the inspections, and major observations about the operation and maintenance of ESC BMPs, materials storage areas, and vehicle access points to the parcel. Inspection documentation must include maintenance needed, ESC BMPs that failed to operate as designed or proved inadequate for a particular location, and location(s) where

additional ESC BMPs are needed. The inspection log must also document what corrective actions are needed and when corrective actions were completed. The inspection log shall be maintained for at least three years from the completion of permanent stabilization.

7.0 IMPLEMENTATION SCHEDULE

The following implementation sequence is intended to maximize the effectiveness of the above described erosion control measures. Contractors should avoid overexposing disturbed areas and limit the amount of stabilization area.

1. Install a stabilized construction entrance in all locations where construction traffic will enter and exit the site.
2. Install perimeter silt fence or erosion control berm.
3. Commence installation of drainage infrastructure.
4. Install all other erosion control devices as necessary throughout the remainder of this schedule.
5. Commence earthwork operations, associated with the roadway construction.
6. Commence installation of utilities.
7. Continue earthwork and grading to subgrade as necessary for construction.
8. Complete installation of drainage infrastructure, as well as other utility work.
9. Complete remaining earthwork operations.
10. Install sub-base and base gravels in paved areas.
11. Install paving, curbing and brickwork.
12. Loam, lime, fertilize, seed and mulch disturbed areas and complete all landscaping.
13. Once the site is stabilized, 90% catch of grass has been obtained, or mulching of landscape areas is complete, remove all temporary erosion control measures.
14. Touch up areas without a vigorous catch of grass with loam and seed.
15. Complete site signage and striping.
16. Execute proper maintenance of all temporary and permanent erosion control measures throughout the project.

The above implementation sequence should be generally followed by the site contractor. However, the contractor may construct several items simultaneously. The contractor shall submit to the owner a schedule of the completion of the work. If the contractor is to commence the construction of more than one item above, they shall limit the amount of exposed areas to those areas in which work is expected to be undertaken during the following 30 days.

The contractor shall re-vegetate disturbed areas as rapidly as possible. All areas shall be permanently stabilized within 7 days of final grading or before a storm event. The contractor shall incorporate planned inlets and drainage systems as early as possible into the construction phase.

8.0 CONCLUSION

The above erosion control narrative is intended to minimize the development impact by implementing temporary and permanent erosion control measures. The contractor shall also refer to the Maine Erosion and Sediment Control BMP manual for additional information.

9.0 ATTACHMENTS

- Temporary Seeding Plan
- Permanent Seeding Plan
- Good Housekeeping and Pollution Prevention Plan
- Medium Intensity Soil Survey for Cumberland County
- Third Party Inspection Form

TEMPORARY SEEDING PLAN

Site Preparation

The seeded areas shall be feasibly graded out to provide the use of equipment for seedbed preparation, seeding, mulch application, and mulch anchoring. If necessary, the site may require additional temporary erosion control measures outlined in the Erosion Control report.

Seedbed Preparation

Fertilizer shall be applied to the site at a rate of 13.8 pounds per 1,000 square feet. The composition of the fertilizer shall be 10-10-10 (N-P2O5-K2O) or equivalent.

Limestone shall be applied to the site at a rate of 138 pounds per 1,000 square feet.

Seeding

The composition and amount of temporary seed applied to a site shall be determined by the following table:

Seed	Pounds / 1,000 S.F.	Recommended Seeding Dates
Winter Rye	2.57	Aug-15 to Oct-1
Oats	1.84	Apr-1 to Jul-1 Aug-15 to Sep-15
Annual Ryegrass	0.92	Apr-1 to Jul-1
Sudangrass	0.92	May-15 to Aug-15
Perennial	0.92	Aug-15 to Sep-15

Mulching

Mulch shall be applied at a rate of 70 lbs – 90 lbs per 1,000 square feet. The mulch shall be installed at a minimum depth of 4 inches. The seeded area shall be mulched immediately after seed is applied. Mulching during the winter season shall be double the normal amount.

Conclusion

Please refer to the Maine Erosion and Sediment Control BMP manual for additional information pertaining to temporary seeding and mulching.

PERMANENT SEEDING PLAN

Site Preparation

The seeded areas shall be feasibly graded out to provide the use of equipment for seedbed preparation, seeding, mulch application, and mulch anchoring. If necessary, the site may require additional temporary erosion control measures outlined in the Erosion Control report.

Seedbed Preparation

Fertilizer shall be applied to the site at a rate of 13.8 pounds per 1,000 square feet. The composition of the fertilizer shall be 10-10-10 (N-P2O5-K2O) or equivalent.

Limestone shall be applied to the site at a rate of 138 pounds per 1,000 square feet.

Seeding

The composition and amount of permanent seed applied to a site shall be determined by the following table:

Seed	Pounds / 1,000 S.F.
Kentucky Bluegrass	0.46
Creeping Red Fescue	0.46
Perennial Ryegrass	0.11
Total	1.03

Mulching

Mulch shall be applied at a rate of 70 lbs – 90 lbs per 1,000 square feet. The mulch shall be installed at a minimum depth of 4 inches. The seeded area shall be mulched immediately after seed is applied. Mulching during the winter season shall be double the normal amount.

Recommendations

Permanent seeding is recommended to be completed in the spring. Later summer seeding is allowed if completed prior to September 1st. If seeding cannot be accomplished during the periods recommended for permanent seeding, then the contractor shall perform temporary seeding per the temporary seeding plan.

Conclusion

Please refer to the Maine Erosion and Sediment Control BMP manual for additional information pertaining to permanent seeding and mulching.

GOOD HOUSEKEEPING AND POLLUTION PREVENTION PLAN

Spill Prevention:

Controls must be used to prevent pollutants from construction and waste materials stored on-Site from entering stormwater, which includes storage practices to minimize exposure of the materials to stormwater. The Site contractor or operator must develop, and implement as necessary, appropriate spill prevention, containment, and response planning measures.

Groundwater protection:

During construction, liquid petroleum products and other hazardous materials with the potential to contaminate groundwater may not be stored or handled in areas of the Site draining to an infiltration area. An infiltration area is any area of the Site that by design or as a result of soils, topography, and other relevant factors accumulates runoff that infiltrates into the soil. Dikes, berms, sumps, and other forms of secondary containment that prevent discharge to groundwater may be used to isolate portions of the Site for the purposes of storage and handling of these materials.

Fugitive sediment and dust:

Actions must be taken to ensure that activities do not result in noticeable erosion of soils or fugitive dust emissions during or after construction. Oil may not be used for dust control, but other water additives may be considered as needed. A stabilized construction entrance shall be included to minimize tracking of mud and sediment. If off-Site tracking occurs, public roads shall be swept immediately and no less than once a week and prior to significant storm events. Operations during dry months, that experience fugitive dust problems, shall wet down unpaved access roads once a week or more frequently as needed with a water additive to suppress fugitive sediment and dust.

Debris and other materials:

Minimize the exposure of construction debris, building and landscaping materials, trash, fertilizers, pesticides, herbicides, detergents, sanitary waste, and other materials to precipitation and stormwater runoff. These materials must be prevented from becoming a pollutant source. Sediment generated by concrete or mortar mixing, brick cutting & saw cutting activities must be contained (e.g., sausage boom, straw bales, etc.) and cleaned up using dry methods (i.e., sweeping or vacuuming) to prevent it from entering drainage structures or water resources. These activities shall be done on vegetated areas whenever possible and away from drainage structures and water resources.

Excavation dewatering:

Excavation dewatering is the removal of water from trenches, foundations, coffer dams, ponds, and other areas within the construction area that retain water after excavation. In most cases the collected water is heavily silted and hinders correct and

safe construction practices. The collected water removed from the ponded area, either through gravity or pumping, must be spread through natural wooded buffers or otherwise treated to collect the maximum amount of sediment possible, like a coffer dam sedimentation or sediment filter bag. Avoid allowing the water to flow over Disturbed Areas of the Site. If the Maine DEP has approved equivalent measures, provide proof of approval. Note that discharge of excavation dewater fluids from the Site must be visually clear (no visible suspended or settleable solids). Any dewatering discharges from a site to the City right-of way or infrastructure are prohibited unless the City has provided approval of a Dewatering Plan and Application submitted by the Contractor. Discharges from the Site into the City's storm drain or sewer system must first obtain City approval through the Dewatering Program, as detailed in the Rules and Regulations for Use of the Sewer System.

Washout from concrete, stucco, paint, curing compounds, or other construction materials:

If washout/cleanout is to be completed on the Site, a designated area(s) shall be established and marked on the Erosion and Sedimentation Control Plan. This area shall be a minimum of 50 feet from all drainage structures, ditches, waterbodies, and resource areas, as well as property boundaries if possible. The area shall not have an outlet to discharge wastes or flows. No detergents shall be used or vehicles washed in this location. A leak-proof pit or container shall be established in the washout area(s), to which washings shall be directed. This area shall be used for washout containment and dewatering by evaporation only. The pit shall not allow infiltration to occur. To prevent clean water from entering the pit, the washout area shall be covered during precipitation events. Inspections of the pit shall be conducted daily to ensure no leaks are present and no discharge is occurring.

Non-stormwater discharges:

Except as allowed or exempted herein, no person shall create, initiate, originate or maintain a non-stormwater discharge to the storm drainage system. Such non-storm water discharges are prohibited, notwithstanding the fact that the City may have approved the connections, drains or conveyances by which a person discharges unallowed storm water discharges to the storm drain system.

Authorized non-stormwater discharges. Where allowed non-stormwater discharges exist, they must be identified, and steps shall be taken to ensure the implementation of appropriate pollution prevention measures for the non-stormwater component(s) of the discharge. Authorized non-stormwater discharges are:

Discharges from firefighting activity

Hydrant flushing if dechlorinated to 0.05 mg/l or less
Vehicle wash water if detergents are not used and washing is limited to the exterior of vehicles (engine, undercarriage, and transmission washing is prohibited)

Dust control runoff if it does not cause erosion

Routine external building washdown, not including surface paint removal, that does not involve detergents

Pavement wash water (where spills/leaks of toxic or hazardous materials have not occurred, unless all spilled material had been removed) if detergents are not used

Uncontaminated air conditioning or compressor condensate

Uncontaminated groundwater or spring water

Foundation or footer drain-water where flows are not contaminated

Uncontaminated excavation dewatering per item 5 Excavation Dewatering

Potable water including waterline flushings

Landscape irrigation

Unauthorized non-stormwater discharges.

Wastewater from the washout or cleanout of concrete, stucco, paint, form release oils, curing compounds, or other construction materials

Fuels, oils, or other pollutants used in vehicle and equipment operation and maintenance

Soaps, solvents, or detergents used in vehicle and equipment washing

Sediment laden discharges

Toxic or hazardous substances from a spill or other release

United States Department of Agriculture

NRCS

Natural Resources Conservation Service

A product of the National Cooperative Soil Survey, a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local participants

Custom Soil Resource Report for Cumberland County and Part of Oxford County, Maine

October 28, 2024

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

Map Scale: 1:754 if printed on A portrait (8.5" x 11") sheet.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Cumberland County and Part of Oxford County, Maine
Survey Area Data: Version 21, Aug 26, 2024

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jun 19, 2020—Sep 20, 2020

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however,

onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Cumberland County and Part of Oxford County, Maine

HIC—Hinckley loamy sand, 8 to 15 percent slopes

Map Unit Setting

National map unit symbol: 2svm9
Elevation: 0 to 1,480 feet
Mean annual precipitation: 36 to 71 inches
Mean annual air temperature: 39 to 55 degrees F
Frost-free period: 140 to 240 days
Farmland classification: Farmland of local importance

Map Unit Composition

Hinckley and similar soils: 85 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Hinckley

Setting

Landform: Kame terraces, outwash plains, kames, eskers, moraines, outwash terraces, outwash deltas
Landform position (two-dimensional): Shoulder, backslope, footslope, toeslope
Landform position (three-dimensional): Head slope, nose slope, side slope, crest, riser
Down-slope shape: Concave, convex, linear
Across-slope shape: Convex, linear, concave
Parent material: Sandy and gravelly glaciofluvial deposits derived from gneiss and/or granite and/or schist

Typical profile

Oe - 0 to 1 inches: moderately decomposed plant material
A - 1 to 8 inches: loamy sand
Bw1 - 8 to 11 inches: gravelly loamy sand
Bw2 - 11 to 16 inches: gravelly loamy sand
BC - 16 to 19 inches: very gravelly loamy sand
C - 19 to 65 inches: very gravelly sand

Properties and qualities

Slope: 8 to 15 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Excessively drained
Runoff class: Very low
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to very high (1.42 to 99.90 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Maximum salinity: Nonsaline (0.0 to 1.9 mmhos/cm)
Available water supply, 0 to 60 inches: Low (about 3.1 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 4e
Hydrologic Soil Group: A
Ecological site: F144AY022MA - Dry Outwash

Hydric soil rating: No

HID—Hinckley loamy sand, 15 to 25 percent slopes

Map Unit Setting

National map unit symbol: 2svmc
Elevation: 0 to 1,460 feet
Mean annual precipitation: 36 to 71 inches
Mean annual air temperature: 39 to 55 degrees F
Frost-free period: 140 to 240 days
Farmland classification: Farmland of local importance

Map Unit Composition

Hinckley and similar soils: 85 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Hinckley

Setting

Landform: Outwash plains, eskers, moraines, outwash terraces, outwash deltas, kame terraces, kames
Landform position (two-dimensional): Backslope
Landform position (three-dimensional): Head slope, nose slope, side slope, crest, riser
Down-slope shape: Concave, convex, linear
Across-slope shape: Convex, linear, concave
Parent material: Sandy and gravelly glaciofluvial deposits derived from gneiss and/or granite and/or schist

Typical profile

Oe - 0 to 1 inches: moderately decomposed plant material
A - 1 to 8 inches: loamy sand
Bw1 - 8 to 11 inches: gravelly loamy sand
Bw2 - 11 to 16 inches: gravelly loamy sand
BC - 16 to 19 inches: very gravelly loamy sand
C - 19 to 65 inches: very gravelly sand

Properties and qualities

Slope: 15 to 25 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Excessively drained
Runoff class: Low
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to very high (1.42 to 99.90 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Maximum salinity: Nonsaline (0.0 to 1.9 mmhos/cm)
Available water supply, 0 to 60 inches: Low (about 3.1 inches)

Interpretive groups

Land capability classification (irrigated): None specified

Land capability classification (nonirrigated): 6e
Hydrologic Soil Group: A
Ecological site: F144AY022MA - Dry Outwash
Hydric soil rating: No

Soil Information for All Uses

Soil Properties and Qualities

The Soil Properties and Qualities section includes various soil properties and qualities displayed as thematic maps with a summary table for the soil map units in the selected area of interest. A single value or rating for each map unit is generated by aggregating the interpretive ratings of individual map unit components. This aggregation process is defined for each property or quality.

Soil Qualities and Features

Soil qualities are behavior and performance attributes that are not directly measured, but are inferred from observations of dynamic conditions and from soil properties. Example soil qualities include natural drainage, and frost action. Soil features are attributes that are not directly part of the soil. Example soil features include slope and depth to restrictive layer. These features can greatly impact the use and management of the soil.

Hydrologic Soil Group

Hydrologic soil groups are based on estimates of runoff potential. Soils are assigned to one of four groups according to the rate of water infiltration when the soils are not protected by vegetation, are thoroughly wet, and receive precipitation from long-duration storms.

The soils in the United States are assigned to four groups (A, B, C, and D) and three dual classes (A/D, B/D, and C/D). The groups are defined as follows:

Group A. Soils having a high infiltration rate (low runoff potential) when thoroughly wet. These consist mainly of deep, well drained to excessively drained sands or gravelly sands. These soils have a high rate of water transmission.

Group B. Soils having a moderate infiltration rate when thoroughly wet. These consist chiefly of moderately deep or deep, moderately well drained or well drained soils that have moderately fine texture to moderately coarse texture. These soils have a moderate rate of water transmission.

Group C. Soils having a slow infiltration rate when thoroughly wet. These consist chiefly of soils having a layer that impedes the downward movement of water or soils of moderately fine texture or fine texture. These soils have a slow rate of water transmission.

Group D. Soils having a very slow infiltration rate (high runoff potential) when thoroughly wet. These consist chiefly of clays that have a high shrink-swell potential, soils that have a high water table, soils that have a claypan or clay layer at or near the surface, and soils that are shallow over nearly impervious material. These soils have a very slow rate of water transmission.

If a soil is assigned to a dual hydrologic group (A/D, B/D, or C/D), the first letter is for drained areas and the second is for undrained areas. Only the soils that in their natural condition are in group D are assigned to dual classes.

Map Scale: 1:754 if printed on A portrait (8.5" x 11") sheet.

Att. L

ACORN ENGINEERING, INC.

Chief Gillespie
City of Portland Fire Department
380 Congress St.
Portland, ME 04101

November 20, 2024

Subject: 165 Washington Avenue – Fire Department Checklist
Section L of Application

On behalf of Redfern Properties, the design team is pleased to respond to the Portland Fire Department Site Review Checklist.

1. Name, address, telephone number of applicant:

   Redfern Properties
   P.O. Box 8816,
   Portland, ME 04101
   (207) 261-5151

2. Name address, telephone number of architect:

   HOLST Architecture
   123 NE 3rd Avenue, Suite 310
   Portland, Oregon 97232
   (503) 233-9856

3. Proposed uses of any structures [NFPA and IBC classification]

   NFPA: Apartment / IBC: R-2

4. Square footage of all structures, including decks [total and per story]

Existing

Existing Building		
Total	Approx. 19,396	**gfa**

Proposed

Multi-Family Building		
1st Floor	28,074	sf
2nd Floor	32,157	sf
3rd Floor	37,447	sf
4th Floor	34,114	sf
5th Floor	25,625	sf
6th Floor	25,625	sf
7th Floor	25,625	sf
Total	Approx. 208,667	**gfa**

5. Elevation of all structures

   The proposed 7-story structure's height will be below the allowable 75 feet within the B-2b zoning district. Please refer to the building elevations provided by the Architect for additional information.

6. Proposed fire protection of all structures

   The proposed buildings will have a sprinkler system per code. Fire flows and requirements for system storage or booster pumping are subject to the fire designer which will be performed prior to the request for a building permit.

7. Hydrant locations

   a. An existing hydrant is located directly west of the existing building on Washington Avenue. Hydrant flow data from the Portland Water District once received may be made available to the Fire Department upon request.

8. Water main size and location

   The proposed Multi-family building will be serviced by a proposed 2" domestic water service connection, a 6" domestic water service connection as well as a 8" fire suppression service from the existing 8" water main within Washinton Avenue.

9. Access to all structures [min. 2 sides]

   Access to the structure is provided directly on Washington Avenue and from the drive isle along the southeast side of the site.

NFPA 1 – Chapter 18 Fire Department Access and Water Supply

18.2 Fire Department Access:

The project site is located in a heavily developed area and is fronted by a public street. The following pavement street width is currently available:

- Washington Avenue: 43 feet

Per NFPA 1 – Chapter 18.2.3.3.1, there will be public street access within 50 feet of at least one exterior door. Per NFPA 1 – Chapter 18.2.3.2.2.1, all first story floors shall be located not more than 450 feet from a Fire Department access road.

City of Portland Technical Manual – Section 3 Public Safety

3.4.1 Every dead-end roadway more than one hundred fifty (150') feet in length shall provide a turnaround at the closed end. Turnarounds shall be designed to facilitate future street connectivity and shall always be designed to the right (refer to Figure I-5).

Response: There are no dead-end roadway conditions more than one hundred fifty feet in length included as part of the proposed project. Please refer to C-10, which provides specifics on the 150 lf fire access lane.

3.4.2 Where possible, developments shall provide access for Fire Department vehicles to at least two sides of all structures. Access may be from streets, access roads, emergency access lanes, or parking areas.

Response: Access to structures onsite is provided directly from Washington Avenue and from the internal drive isle. See the Site Plan for additional information.

3.4.3 Building setbacks, where required by zoning, shall be adequate to allow for emergency vehicle access and related emergency response activities and shall be evaluated based on the following factors:

- *Building Height.*
- *Building Occupancy.*
- *Construction Type.*
- *Impediments to the Structures.*
- *Safety Features Provided.*

Response: The proposed development layout has contemplated emergency access conditions and provides for safe and efficient access along the public street for emergency vehicles.

3.4.4. Fire Dept. access roads shall extend to within 50' of an exterior door providing access to the interior of the structure.

Response: The building will be provided with exterior doors that will be within 50' of a Fire Department access route, namely Washington Avenue.

3.4.5. Site access shall provide a minimum of nine (9) feet clearance height to accommodate ambulance access.

Response: The proposed site maintains the required clearance height of nine feet in all cases.

3.4.6. Elevators shall be sized to accommodate an 80 x 24-inch stretcher.

Response: Elevators will be sized to accommodate an 80 x 24-inch stretcher.

3.4.7. All structures are required to display the assigned street number. Numbers shall be clearly visible from the public right of way.

Response: The site's address is 165 Washington Avenue in Portland Maine. The final address locations will be coordinated with public works as part of the proposed subdivision application process.

Thank you for your review. Please let me know if you have any additional questions or comments.
Sincerely,

Peter Heil, P.E.
Project Manager
Acorn Engineering, Inc.

Department of Public Works
Mike Murray
Director

City of portland

Date: February 21, 2025
Re: Wastewater Capacity Authorization
Address: 165 Washington Avenue
Applicant: Redfern Properties
Planner: Taylor Colbeth

Estimate of Anticipated Wastewater Flows				
Development	**Unit Size**	**Number of Units**	**Gallons per Day per Unit**	**Total Gallons per Day**
Existing Flow to Remain				
Vacant				
Proposed flow				
Employees at place of employment with no showers/ Retail	# Employees	10	12 GPD/Employee	120
Multiple Family Dwelling Units	Efficiency	108	120	12960
Multiple Family Dwelling Units	Studio	128	120	15360
Multiple Family Dwelling Units	1-Bedroom	12	120	1440
Multiple Family Dwelling Units	2-Bedroom	78	180	14040
Net Change				**+ 43,920**
*Values based on STATE OF MAINE: SUBSURFACE WASTEWATER DISPOSAL RULES, most recent edition				

Comments:
The Department of Public Works, which includes the Water Resource Division, have reviewed and determined that the downstream sewers from the project address have the capacity to convey the estimated dry weather wastewater flows which will be generated from this development.

You are also reminded that new connections into the combined sewer system shall be equipped with backflow prevention in accordance with Section 2.6.10 of the City's Technical Manual.

If the City can be of further assistance, please contact me at 207-874-8840 or brad@portlandmaine.gov

Sincerely,

Bradley A. Roland, P.E.,
Senior Project Engineer

N. Lighting

The project proposes exterior lighting at egresses and street lighting on Washington Avenue to that will be in conformance with the City Technical Manual. Please refer to the Photometric Plan and attached cut sheets prepared by Reflex Lighting for additional information.

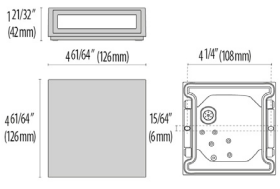
Page 1 of 1

MIMIK 10



Wall sconce series. Fixtures consist of:

- Multi-step powder-coat painting process, optimized against UV rays and corrosion.
- Copper-free precision die-cast aluminum housing and mounting plate.
- Extra-clear, flat, tempered silk-screened soda-lime glass diffuser.
- Micro-prismatic patterned, flat, tempered silk-screened soda-lime glass diffuser (FLAT versions).
- Custom molded, anti-aging gasket(s).
- Stainless steel external hardware.
- Custom MCPCB utilized to maximize heat dissipation and promote a long LED life.
- High-transmittance transparent optics.
- Single (M) or dual (B) light emission.
- IESNA Type III light distribution (FLAT).
- IESNA Type III light distribution.
- 20° x 20° beam angle (C/I).
- Input voltage: 120-277 V (50 / 60 Hz), integral driver.
- Customizing facade faceplate available for MIMIK FLAT versions (ordered separately).
- Consult factory for dimming options, custom finishes (please specify RAL color), and non-cataloged CCT (Kelvin) options.
- Product meets Buy American Act requirements within ARRA.
- 5-year warranty.
- Marine Grade finish.
- Suitable for Natatorium applications.

Top Product Features

- New construction/remodel series; 500 to 6,000 lumens
- Narrow, Medium and Wide distributions; Wall wash with rotatable linear spread lens
- 2700K, 3000K, 3500K, 4000K, 5000K CCT; 80 or 90 CRI
- Universal voltage 120V-277V; Standard 0-10V driver dims to 1%
- Mounting frame converts to remodel that installs from below the ceiling
- Quick Spec emergency backup mounting frames - fast delivery option

Product Specifications

Housing Frame
- Boat shaped galvanized steel plaster frame with adjustable plaster lip
- Accommodates 1/2" to 1-1/2" thick ceilings
- Installs in new construction or from below the finished ceiling (non-accessible) for remodeling (with mounting bars removed)
- Provided with two remodel clips to secure the frame to the ceiling

Universal Mounting Bracket
- Adjusts 2" vertically from above and below the ceiling
- Use with the included mounting bars or with 1/2" Electric Metallic Tube (EMT)
- Removable to facilitate remodeling installation from below the finished ceiling

Mounting Bars
- Captive pre-installed No Fuss™ mounting bars lock to T-grid with screwdriver or pliers
- Centering detents allow for consistent positioning of fixtures

LED Module
- Proximity phosphors over chip on board LEDs provide a uniform source with high efficiency and no pixilation
- Available in 80 or 90 color rendering index (CRI)
- Color accuracy within 3 SDCM provides color consistency and uniformity
- 90 CRI option: R9>50 (refer to chromaticity information for details)
- Available in 2700K, 3000K, 3500K, 4000K and 5000K correlated color temperature (CCT)
- Lumen options include 500, 750, 1000, 1500, 2000, 2500, 3000, 3500, 4000, 4500, 5000, 5500, 6000 lumens (nominal)
- Passive thermal management achieves 60,000 hours at 70% lumen maintenance (L70) in insulated ceilings (IC) and non-IC applications
- Integral diffuse lens provides visual shielding
- Integral connector allows quick connection to housing flex

Reflector
- Self-flanged aluminum reflectors available in narrow, medium or wide distribution patterns
- Medium distribution polymer non-conductive matte white reflector may be used to meet local codes for 'dead front' applications (500 & 750 lumen max. in IC and 2000 lumen max. in Non-IC)
- Wall wash reflector features a rotatable linear spread lens for alignment of vertical illumination
- Reflectors attach to LED module with three speed clamps
- Available in multiple painted or plated finishes

Reflector/Module Retention
- Reflector/module assembly is securely retained in the housing with two torsion springs

Driver
- Field-replaceable constant current driver provides low noise operation
- Universal 120-277VAC 50/60Hz input standard
- Continuous, 1% to 100% dimming with 0-10V analog control
- Optional low-voltage DC driver for use with Distributed Low Voltage Power (DLVP) system
- Distributed Low Voltage Power (DLVP) system combines power, lighting and controls with ease of installation (refer to DLVP Design Guide at www.cooperlighting.com for details)

Canada Options
- 347VAC 50/60Hz; 1% dimming on 0 -10V analog control, for 500, 750, 1000, 1500, 2000, 2500, 3000, 3500, 4000, 4500, 5000 lumen models only
- 347V step down transformer factory installed with the standard "D010" 120V-277V, LED driver on 5500, 6000 lumen models only

Emergency Option
- Provides 90 minutes of standby lighting, meeting most life safety codes for egress lighting
- Available with integral or remote charge indicator and test switch
- Available Self-Test (self-diagnostic) with remote charge indicator and test switch
- Quick Spec emergency ordering option for quick-turn projects

Connected Lighting System
Two WaveLinx connected solutions to choose from. Refer to WaveLinx system specifications and application guides for details.

WaveLinx PRO Tilemount Sensor Kit
- WaveLinx PRO WTA tilemount sensor kit offers daylight dimming, PIR motion sensing, scene and zone configuration, automatic commissioning; and optional RLTS - Real Time Location Services available.

WaveLinx PRO Wireless Node
- WaveLinx PRO WPN wireless node provides luminaire-level control with scene and zone configuration without an integrated sensor; Connects wirelessly with daylight dimming sensor and PIR motion sensor if desired. Use with 0-10V driver only. **Note:** Not compatible with 347V or Chicago plenum.

WaveLinx LITE Tilemount Sensor Kit
- WaveLinx LITE WTK tilemount sensor kit offers daylight dimming and PIR motion sensing, scene and grouping configuration.

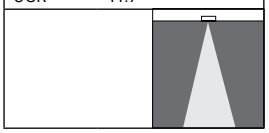
WaveLinx LITE Wireless Node
- WaveLinx LITE WLN wireless node provides luminaire level control with scene and zone configuration without an integrated sensor; Connects wirelessly with daylight dimming sensor and PIR motion sensor if desired. Use with 0-10V driver only. **Note:** Not compatible with 347V or Chicago plenum.

WaveLinx Tilemount Sensor Kits Application
- The WTA and WTK tilemount sensor kits include a control module mounted on the luminaire junction box via 1/2" knock-out, and a tilemount sensor on 54-inch whip; for ceiling installation by direct-mount spring clips or via mounting bracket in octagon ceiling boxes.
- The WTA and WTK tilemount sensor kits may be ordered as factory installed on the luminaire, or ordered separately as a field installed accessory kit.
- **Note: WaveLinx PRO devices are only compatible with the WaveLinx PRO system.**
- **Note: WaveLinx LITE devices are only compatible with the WaveLinx LITE system.**

Junction Box
- Galvanized steel junction box
- 20 in^3 internal volume excluding voltage barrier
- 25 in^3 internal total volume
- Voltage barrier for 0-10V dimming wires (occupies one 1/2" pry-out space)
- Listed for eight #12 AWG (four in, four out) 90˚C conductors and feed-thru branch wiring
- Three 1/2" and two 3/4" trade size pry-outs available
- Three 4-port push wire nuts for mains voltage with 1-port for fixture connection

Compliance
- cULus Certified to UL 1598 / C22.2 No. 250.0, suitable for damp locations and wet locations in covered ceilings only
- Emergency options provided with UL Listed emergency drivers to UL 924 / C22.2 No. 141, suitable for indoor/damp locations
- IP20 - Above finished ceiling; IP65 - Below finished ceiling
- Non-Insulated ceiling (Non-IC) rated for 2500, 3000, 3500, 4000, 4500, 5000, 5500, 6000 lumen models (insulation must be kept 3" from top and sides)
- Insulated ceiling (IC) rated for 500, 750, 1000, 1500, 2000 lumen models and suitable for direct contact with air permeable insulation* (IC models are also suitable for Non-IC installations)
- Non-IC marked spacing required for 4500, 5000, 5500, 6000 lumen models
  - Marked Spacing Center to Center of Adjacent Luminaires = 36"
  - Center of Luminaire to Building Member = 18"
  - Minimum overhead = 0.5"
- Airtight per ASTM-E283-04
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- EMI/RFI emissions FCC CFR Title 47 Part 15 Class A at 120/277V
- Contains no mercury or lead and RoHS compliant
- Photometric testing completed in accordance of IES LM-79-08
- Lumen maintenance projection in accordance of IES LM-80-08 and TM-21-11
- 500, 750, 1,000, 1,500 and 2,000 lumen, 90 CRI, ICAT models may be used to comply with State of California Title 24 residential code, per JA8 certification standards
- May be used to comply with State of California Title 24 non-residential code as a dimmable LED luminaire
- ENERGY STAR® certified, reference certified light fixtures database

*Not for use in direct contact with spray foam insulation, consult NEMA LSD57-2013



Warranty
- Five year limited warranty, consult website for details. www.cooperlighting.com/legal

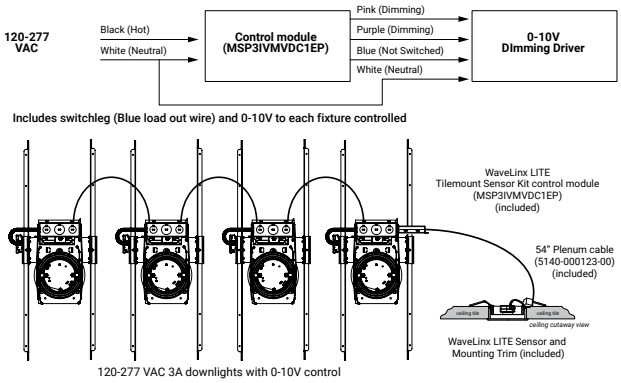
Connected Solutions



WaveLinx LITE - WTK Tilemount Sensor

WaveLinx LITE devices only compatible with the WaveLinx LITE system.

- Intuitive Android™ or Apple® iOS® app for basic system code compliant set up and configuration via Bluetooth
- Up to 28 unique areas per project site (WaveLinx LITE Bluetooth network)
- Up to 50 devices for an area, any one of 16 control zones, up to 6 occupancy sets, and custom lighting scenes
- Automatic occupancy or vacancy, sensor sensitivity, daylight dimming, etc. configurable through the app
- Refer to the WaveLinx system specifications for details

Device Security | Manual Dimmer | Occupancy Sensor | Daylighting Control | Manually Switched ON/OFF | Tuning Control | Lumen Maintenance Control | Scenes

WaveLinx LITE WTK Tilemount Wiring Diagram

WaveLinx LITE Bluetooth Enabled System

WaveLinx PRO – WTA Tilemount Sensor

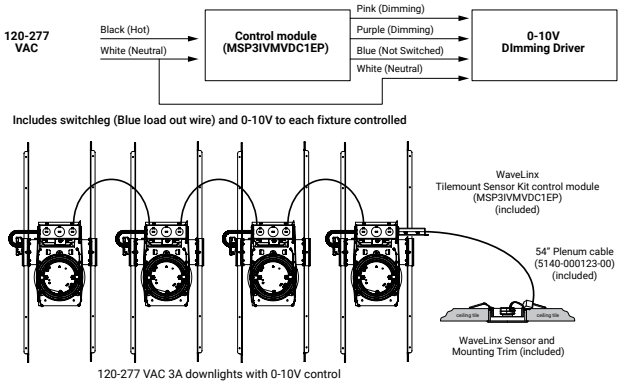
WaveLinx PRO devices only compatible with the WaveLinx PRO system.

- WaveLinx PRO tilemount functionality configures zones and customizes settings from one secure mobile app
- Automatic code commissioning that meets the strictest codes
- Fixtures and sensors integrate with Wireless Area Controller, Wall Stations, and Control Devices
- Stand-Alone Offices or Entire Building Network Installations

Downlights with tilemount sensor wireless communication
Highly efficient LED fixtures

WaveLinx Area Controller
Provides centralized coordination of multiple area control options

Wireless Wall Station/Receptacle
Provides customized wireless control of each area



Mobile Applications
Provides personalized, local control from a tablet or smartphone

ARCHITECTURAL DESIGN NARRATIVE
November 20, 2024

CONTENTS

I. Proposal ..... page 2
II. Site Plan Narrative ..... page 3
III. Technical Standards and Design Guidelines ..... page 8

I. PROPOSAL

Project Location: 165 Washington Ave, Portland, ME 04101

The proposed building is a new, 7-story, mixed-use housing project of approximately 207,496 square feet. The project includes tuck-under parking, retail shell space, resident amenities, and 326 housing units broken down into 108 efficiency units, 128 studios, 12 1-bedroom units, and 78 2-bedroom units. The building massing is designed to optimize natural ventilation and daylight for residents by including two exterior courtyards and providing a roof-top amenity deck atop a stepped-down middle portion of its massing. The building also steps down to the South to protect views for the neighboring property and steps back 15' from the adjacent community orchard to the North, mitigating any impact of shadows cast for most of the year. The building's primary cladding materials include a mix of brick and fiber cement panel, with most of the brick visible from Washington Ave and fiber cement panel located on back (East) of the building and in the residential courtyards. Granite stone veneer is used along the base of the building to minimize wear and tear on the façade and large, glazed openings with decorative metallic highlights are used at the street edge to offer warmth and visual interest. Additionally, there are substantial building overhangs and canopies located at building entrances to offer weather protection for pedestrians.

II. SITE PLAN NARRATIVE

LAND USE CODE - Chapter 14
14.6.4 Site Design Standards

A. Massing, ventilation, and wind impact.
1. The bulk, location, or height of proposed buildings and structures shall not result in health or safety problems from a reduction in ventilation to abutting structures or changes to the existing wind climate that would result in unsafe wind conditions for users of the site and/or adjacent public spaces.

2. The bulk, location, or height of proposed buildings and structure shall minimize, to the extent feasible, any substantial diminution in the value or utility to neighboring structures under different ownership and not subject to a legal servitude in favor of the site being developed.

3. Development shall locate all HVAC venting mechanisms to direct exhaust away from public spaces and residential properties directly adjacent to the site.

Response: The building maintains enough distance from all existing neighboring buildings so as not to create any health or safety problems due to reduced ventilation or unsafe wind conditions.

Per the design narrative (previous page), the massing of the building steps down from 7 stories to 4 stories at the South portion to avoid obstructing views from the neighboring condominium development.

No HVAC venting mechanisms that create direct exhaust from the building will be located near public spaces and residential properties directly adjacent to the site.

B. Shadow.
All development outside the B-3, B-5, B-6 and B-7 zones shall be designed to avoid and/or mitigate the adverse impacts of shadows cast by new structures

or building additions from falling on publicly accessible open space in accordance with the shadow standards of the Technical Manual.

Response: The building is designed to mitigate the impacts of shadow on the public spaces surrounding the property, including the zoned OS property to the North where there's currently a public orchard. Dates used to analyze the impacts of shading are outlined in the City of Portland Technical Manual, Section 11 (March 21st, June 21st, May 6th, and December 21st).

C. Snow and ice loading.
All development shall be designed to prevent significant amounts of accumulated snow and ice from loading or falling onto adjacent properties or public ways.

Response: The proposed building does not have any sloped roofs or awnings to prevent the shedding of snow or ice onto adjacent properties or public ways. Any measurable snow event would require the snow to be trucked off site by the property management company (Redfern).

D. View corridors.
The massing, location, and height of development shall not substantially obstruct public view corridors identified in the Downtown Vision View Corridor Protection Plan.

Response: Development is outside the Downtown Vision View Corridor Protection Plan.

E. Historic resources.
1. When developments affect designated landmarks or lie within designated historic districts or historic landscape districts, such development shall be required to obtain a Certificate of Appropriateness under Article 17.

2. When any part of a proposed development is within 100 feet of any designated landmark, historic district, except the India Street Historic District, or historic landscape district, such development shall be generally compatible

with the major character-defining elements of the landmark or portion of the district in the immediate vicinity of the proposed development. Character-defining elements of landmarks and historic districts are identified in the historic resources inventory and respective historic district designation reports. For the purposes of this provision, "compatible" design shall be defined as design which respects the established building patterns and visual characteristics that exist in a given setting and, at the same time, is a distinct product of its own time. To aid the review authority in its deliberations, Historic Preservation staff shall provide a written analysis of the proposed development's immediate context, identifying the major character defining elements and any established building patterns that characterize the context.

3. All development shall document and protect state or local archaeological resources known to exist or discovered on the site.

a. Protection shall include leaving archaeological resources untouched beneath a new development through adaptation of foundation design or architectural layout.

b. Where the applicant can demonstrate that complete protection is not feasible, the applicant shall excavate and document archeological resources. Such measures shall be conducted in consultation with the City's historic preservation program and Maine Historic Preservation Commission. For resources of state significance, excavation and documentation shall be conducted by a qualified professional, in coordination with Maine Historic Preservation Commission. Local archeological resources may or may not be recognized by the Maine Historic Preservation Commission as significant and shall include the following:

i. Original seawall structure located landward of Commercial Street.

ii. Inactive historic family cemetery plots.

iii. Historic railroad beds including but not limited to the Portland Lewiston interurban railroad.

iv. Original structure and/or landforms associated with the Cumberland and Oxford Canal.

v. Buried portions of colonial and post-colonial period structures or built features located on the Portland Peninsula predating the Great Fire of 1866.

vi. Pre-colonial occupation sites identified by shell middens or other evidence.

vii. Sites listed or eligible for listing on the National Register of Historic Places.

c. In order to preserve archeological resources, the review authority may waive standards listed in the City of Portland Technical Manual where necessary if it is determined that such a waiver would not jeopardize the health, safety, or welfare of the development's occupants, the public, or the natural environment.

Response: The building site does not lie within a designated historic district nor is within 100 feet away from one. No known archaeological resources exist on the site and full compliance with section 3.a-c of this chapter will be adhered to if archaeological resources are discovered during construction of the building.

F. Exterior Lighting.

1. Site lighting

a. All exterior site lighting shall be full cutoff with no light emitted above the horizontal plane or spilled onto adjacent properties and streets. Illumination levels shall be adequate but not excessive for the safety, comfort, and convenience of occupants and users of the site, and shall conform to the lighting standards of the Technical Manual.

b. Where light from a proposed development may adversely impact adjacent residential properties, exterior lighting shall employ house side shielding.

2. Architectural and specialty lighting.

a. Architectural and specialty lighting of such features as architectural details, monuments, public art, or other site features shall be designed to illuminate specific details or attributes only and shall meet the lighting standards of the Technical Manual.

b. Up-lighting by any method is prohibited except for public buildings and parklands; clock towers and steeples; landscape features; designated historic landmarks; flags of state, federal, or national jurisdictions; and public art. Such light fixtures, brackets, conduits, and all other components shall be designed by a lighting professional and shall be scaled and placed to minimize their visibility and installed in accordance with the lighting standards of the Technical Manual.

3. Street lighting. All development shall provide municipal street lighting adequate for the safety and comfort of pedestrians and motorists and, where applicable, conforming to specific lighting district requirements as specified in the street lighting standards of the Technical Manual.

Response: See included lighting plan for photometrics and cut sheets of lighting fixtures proposed.

III. TECHNICAL STANDARDS AND DESIGN GUIDELINES

DESIGN MANUAL

Development in the B-1, B-1b, B-2, B-2b shall meet the following guidelines in order to meet the Site Plan Standards.

1. Building location and form*.*

Buildings shall be located near the street so as to create an urban street wall. An urban street wall is created by a pattern of buildings which line the street in a consistent manner, thereby establishing a desirable spatial relationship between the building in the commercial district and the major object. Location is one of several related factors defining the street environment.

Building Form, including height, bulk, and massing, contribute to the development of a street wall. The desired condition is to have the building frame and enclose the street, which is achieved by providing building height that is proportionate to the width of the adjoining major street. A ratio of building height to street width of one-to-two creates a strong "room-like" street, while a one- to-three ratio provides good street definition and proportion. Shorter buildings of one story facing broad streets will not achieve the desired relationship.

In the B-2b zone, buildings adjacent to streets should approach 1:2 height to street width, with a minimum of 1:3. For a fifty-foot street right-of-way, therefore, a minimum height of 15' is required, with 25' height preferred. An eighty-foot right-of-way requires about 27' to achieve the 1:3 proportion., with 40'-height preferred. Obviously, buildings located as close as possible to the street right-of- way will provide better definition and proportion than buildings set further back.

Response: The proposed building is located within the required front setback per the B-2b dimensional standards and is continuous across most of the street facing property line creating a continuous street wall. The building steps in height along Washington Avenue but maintains a minimum 1:2 height to street ratio along the entire street facing frontage. 110 feet of the building frontage

maintains a 1:2 ratio with Washington Avenue's 65' wide right-of-way and the rest of the building exceeds the ratio in height. This stepping in height helps to break up the scale of the development while maintaining a continuous urban street wall.

***2. Building Function**.*

An urban street and business district requires a substantial intensity and variety of uses. It is beneficial to have mixed uses within portions of buildings situated near the street. For example, a retail first floor might have office or residential on the second or third floors. This provides both the scale of building height desired, as well as the economic vitality of the business district.

Response: The ground floor of the building will have a variety of active uses. The NW corner will have retail space while the rest of the building's ground floor spaces will have resident-focused amenities including coworking spaces, study lounges, office, and lobby space. Additional active use amenity space will be located on the second floor which includes study and coworking spaces, as well as a fitness room and 4th floor roof deck. Any inactive uses along the ground floor street edge have been minimized as much as possible.

***3. Orientation of buildings and their entrances to the street**.*

Major building entries shall be designed and located to provide the primary building access oriented to the public street and sidewalk. Doorways should be prominent and obvious in appearance, so as to attract the users toward the entry. Major entry features should primarily address the street, with entry courts, display windows, signage, lights, walkways, and vestibules, as appropriate. Major entries should be adjacent to, or very close to, the street and public sidewalk.

Response: All building entrances face the public street and major entrances have an overhead canopy for weather protection.

***4. Windows**.*

Windows shall be located in all building facades visible from the public way, especially on building facades along the major public street. Retail uses

with store fronts are the most desirable feature for locations adjacent to the public sidewalk; and active, transparent (minimum visible transmittance (VT) of .7 or greater), and interesting windows contribute the maximum value. Limitations on transparency, such as dark or reflective glass, or interior coverings, should be avoided. Where uses (such as office) are not conducive to transparent viewing from the public way, windows can still convey a sense of activity and presence along the street. Even these more private windows can convey occupancy and habitation when lighted from within, as during evening hours, even if the interior is screened from view.

Response: All ground floor active use spaces have glazed storefront windows facing the street with maximum transparency. The office spaces will remain transparent with glazed storefront windows but will have interior shades for occupants to control for light and privacy when appropriate.

5. Building character, detail, scale, and graphic qualities.

Building design will include various architectural and graphic amenities to provide a strong presence along a street and relate a building to its community. Awnings, canopies, and flags may be utilized to highlight entryways and to further identify the activity and identity of a use. Facade lighting may be used to highlight entryways or to provide visual interest along an otherwise blank facade Building scale, roof pitch, architectural detail, and fenestration shall be designed to complement and be compatible with surrounding residential and commercial buildings.

Response: Awnings are used to highlight major building and retail entrances, and lighting will be included in these areas as well as in building overhangs along the street frontage to provide a comfortable pedestrian experience. Large, glazed openings on the ground floor will provide light and visual interest during day and night and fenestration patterning has been designed to match the commercial character of the neighborhood.

6. Signage and building entrances.

*Building entrances and building signage in the B-1, B-1b, and B-2b zones will be designed and constructed at the pedestrian scale. *We may need to revise the Sign Ordinance for allowed height and dimension of signs.*

Response: Building signage will be limited to key areas and constructed at the pedestrian scale.

7. Development relationship to street.

Building facades and site amenities shall form a cohesive wall of enclosure along a street. Where buildings are not located at the street line, site amenities, including masonry walls, fences, and landscaping, shall be placed along the street to provide a sense of enclosure or definition.

Response: The entire building façade is located at the street line with sidewalk paving continuing up to the building's facade.

8. Parking lots.

Parking Lots shall be screened from view of the public way. Landscaping or fencing shall be used to screen parking lots from public ways and residential neighbors. Where parking is located within the front yard (or side yard of a corner lot), a landscaped buffer or fence shall be placed along the street line to distinguish the private space from the public space and to help define the street wall.

Parking lots shall be screened from neighboring properties. A densely planted landscape buffer or fencing shall be installed to protect neighboring properties from the impacts associated with the parking lot and the use it serves.

Crosswalks shall be provided within parking lots and across entrance driveways, directing pedestrians to building entrances.

Street trees shall be planted along property street frontage 25ft. on center.

Response: The parking lot is located along the side yard where the building will screen parked cars from the street and will have planting to screen it from the

neighboring property. Street trees will be located along the street frontage at a maximum of 25 feet on-center where possible.

***9. Transit connections**.*

Development proposed along established transit corridors must design uninterrupted access from the proposed development to the transit stop. An easement to place a transit shelter may be requested for development located along a transit corridor.

Response: The closest transit stops are located approximately 150 feet to the South and approximately 300 feet to the North and the building will have uninterrupted access to these two locations.

END

P. Utilities

Please see below for the proposed utility breakdown as part of the redevelopment of 165 Washington Avenue.

Water:

The proposed development will be served by an 8" fire suppression, 6" domestic, and a 2" domestic water service. The 6" domestic will serve the residential units and the 2" domestic will serve the first-floor commercial space. The proposed services will tap into the existing 8" Cast Iron pipe water main within Washington Avenue.

Sewer:

The project proposed to relocate the existing 8" Sewer Main in the Washington Avenue sidewalk to the street from Cove Street to Gould Street and upsize to a 15" PVC SDR pipe. The proposed development will be served by two 8" sewer service connections to the new combined 15" PVC combined sewer main in Washington Avenue.

Stormwater:

Please refer to the Stormwater Report for additional information.

UGE/T/C:

It is assumed the existing overhead wires along the project frontage, on Washington Avenue, will be dropped underground. The development will require a proposed submersible transformer that is serviced by 3-phase primary conduits from a utility pole on Washington Avenue. A secondary conduit will extend from the transformer to the building.

Gas:

There is an existing 4" HDPE gas main located within Washington Avenue. The project will have a new gas service connecting into this main, with any meters located on the side of the building.

Ability to serve letters have been sent out to the respective utility companies in accordance with the City of Portland Code of Ordinances Chapter 14 Land Use Code. Responses received thus far from the utility companies can be found attached.

ACORN ENGINEERING, INC.

November 14, 2024

Subject: 165 Washington Avenue Redevelopment
Ability to Serve Request

Mr. Roland:

On behalf of Redfern Properties, we are pleased to submit the following request for Portland Department of Public Work's ability to serve at a proposed project at 165 Washington Avenue in Portland, Maine. It is our understanding that the project proposes to construct a new multi-family apartment building with 326 dwelling units with ground floor commercial space. Along with the proposed building, the project would include additional amenity space, associated structured parking below the building and infrastructure upgrades.

The development will upsize the existing 8" combined sewer main along the project frontage to a 15" combined sewer main and proposes to move the sewer alignment into the street. Additionally, the project will incorporate two new 8" sewer service connections and two new stormwater network connections to the 15" sewer main. Please refer to the attached Utility Plan & Grading Plan for additional information.

Based upon Section 4 of the *Maine Subsurface Wastewater Disposal Rules*, the table below outlines the proposed flow. The proposed project is anticipated to increase the net flow by approximately **46,260** gallons per day (GPD). It should be noted that these values were developed using conservative estimates from the State of Maine Subsurface Wastewater Disposal Rules. We will provide any changes to the anticipated sewage demand as the project design progresses.

Estimate of Anticipated Daily Flows			
Development	Unit Size	Gallons per Day per Unit	Total Gallons per Day (GPD)
Existing Flow			
Northern Burner Supply Company, Inc. (Vacant)	-	-	Unknown
Total Gallons per Day (Existing)			-
Proposed Flow			
Residential	(108) Efficiency Units	120 GPD/ Unit	12,960
Residential	(128) Studio Units	120 GPD/ Unit	15,360
Residential	(12) 1-Bedroom Units	120 GPD/ Unit	1,440
Residential	(78) 2 Bedroom Units	210 GPD / Unit	16,380
Retail	10 Employees	12 GPD / Employee	120
Total Gallons per Day (Proposed)			**46,260 GPD**
Net Change			**+46,260 GPD**
*Values based on Chapter 241 State of Maine: Subsurface Wastewater Disposal Rules, most recent edition			

On behalf of the client, we are requesting DPW's ability to serve the project.

I have attached a Boundary and Topographic Survey created by Owen Haskell, Inc., to facilitate your review, as well as a preliminary utility and grading plan developed by our office. Please do not hesitate to contact me or the office for any questions or clarifications.

Sincerely,

Peter Heil, PE
Project Manager

Portland, Maine 04103

October 28, 2024

Subject: 165 Washington Avenue Redevelopment
Re: Ability to Serve Request

Katherine,

On behalf of Redfern Properties, we are pleased to submit the following request for Central Maine Power's ability to serve at a proposed project at 165 Washington Avenue in Portland, Maine. It is our understanding that the project proposes to construct a new multi-family apartment building with approximately 325 dwelling units with ground floor commercial space. Along with the proposed building, the project would include additional amenity space, associated structured parking below the building and infrastructure upgrades.

It is assumed the existing overhead wires along the project frontage will be dropped underground. The development will likely require a submersible transformer that is serviced by 3-phase primary conduits from a utility pole on Washington Avenue. A secondary conduit will extend from the transformer to the building.

On behalf of the client, we are requesting the following information:

1. Additional information, such as utility mapping confirming single and three-phase power locations along Washington Avenue.
2. Existing easements for underground services currently crossing the proposed development.
3. Alternative connection locations from the development to the existing system.
4. CMP's proposed infrastructure improvements within the project vicinity.
5. CMP's ability to serve the project.
6. Access requirements to the CMP meters.
7. Please send a list of communication/telecom providers that are located on the utility poles in front of the 165 Washington Avenue,

I have attached a Boundary and Topographic Survey created by Owen Haskell, Inc., to facilitate your review, as well as a preliminary utility plan developed by our office. Forthcoming electrical loading computations and final metering will be performed by the project's M.E.P designer &/or architect. Please do not hesitate to contact me or the office for any questions or clarifications.

Sincerely,

Acorn Engineering, Inc

RE: 165 Washington Ave - Portland, ME
Letter of Ability to Serve Request

SAP TBD

Project Description:
The developer proposes to construct a seven story multi-family apartment building with approximately multi- story 325 dwelling units with ground floor commercial space. Along with the proposed building, the project would include additional amenity space, associated structured parking below the building and infrastructure upgrades

CMP has the ability to serve the proposed project in accordance with our CMP Handbook (web link below). We can provide you the desired transformers per your request and city approval, in accordance with our CMP Handbook of Standard Requirements. If you have any questions on the process, or need help in completion of the documents, please contact CMP at 800-565-3181

Here is our typical process for getting your service installed. If you have any questions, please let us know. The underlined links will redirect you to the appropriate site for additional information.

Service Milestones for Three Phase Services and CT Rated Single Phase Services:

- Call 800-750-4000 option 4 to establish a new account (if needed) and an SAP work order. Please provide both of these to me. You will need multiple notifications set up but until we understand the build out we need only one to get started.
- Submit Load information. Please complete the attached EDET (excel file) using load information. Please complete this and email back to me. If the loads are over 500 kw, more in depth load studies may be required with our Distribution Planning and Transmission Planning Departments. Be advised that these may involve more detailed load information, a load study agreement (signed contract), as well as other items. This additional study process may add up to two additional months to completion of the job.
- Submit the easement information worksheet, including where any CMP structures may be on ANY private property (Poles, Wires, Anchors). You are responsible for obtaining all information for all required easements. Please complete this form and either email or fax back to me.
- Submit any electronic drawings (PDF (preferred) or DWG files) of the site layout and proposed electrical connections.
- For Primary Metered installations (including PV), please have the access road in for pole staking.
- Preliminary meetings with CMP Advisor and Engineer to determine details of job (I will need to schedule with your electrician/contractor-please let me know who this is)

- Field planner design appointment scheduled once the preliminary information is complete. This will allow us to cost out the job and develop a CMP Invoice. The invoice is typically generated 5-6 weeks after the design appointment. This expires after 90 days from the invoice date.
- Submit completed W9 so that your bill can be properly processed. This is a new CMP process.
- CMP submits invoice to the customer for payment (typically via email). Payment received from customer.
- Easements (based on easement information worksheet) sent out, signed and originals returned to CMP.
- Job scheduled for completion after payment, easements and the electrical inspection have been received.

There are additional requirements for primary metered Solar Service Installations listed in the Chapter 324 Interconnections section below. Please refer to CMP Installation Checklists for other installations.

This process can take several months, depending upon several factors including transformer or materials delivery, return of completed paperwork, and other jobs in the system that may be ahead of yours. In addition, contact with the other utilities, including telephone and cable, should be commenced as soon as practical. They may have additional work or charges in addition to the CMP work required to bring your project on line.

As you may be aware, there are global supply chain issues impacting the utility industry. CMP is closely monitoring and managing their inventory in order to serve our customers. Larger submersible and pad mount transformers may not be readily available for the date that you will need to be energized. Please consider this as part of your construction plan. The energy service advisor will continue to work closely with you and let you know as soon as the transformer becomes available. Should you have any questions or concerns throughout this process, please do not hesitate to contact your ESA directly at the number or email provided.

Please complete the attached forms (the specific instructions are on each form). Please email them at your earliest convenience. If you are returning an Easement Form, a 1190 or State Permit please be sure to send those documents to lineclerknewservice@cmpco.com, All W9's should be sent to gettingconnected@cmpco.com. All other forms including the EDET (load sheet) and technical information should be sent to me.

For your convenience, here is a link to the CMP Website which contains our Handbook with details on most service requirements: CMP Handbook of Standard Requirements Additional resources include our CMP Metering Supplement is our Distribution Construction Standards: CMP Distribution Construction Standards CMP Distribution Construction Standards.

You will be responsible for installing the customer connections, conduits, and metering in accordance with the CMP Handbook of Standard Requirements The transformer will be sized based on your submitted load sheets.

Your deposit amount will be typically based on an estimated two month bill, calculated from your completed load sheet unless otherwise determined by CMP.

In addition, we have recently added on an online map that shows single phase and three phase power locations within CMP. Here is that link: CMP ArcGIS Information

Metering:

All metering (including locations) must be preapproved by CMP. If you have any questions, please consult the CMP Handbook of Standard Requirements and our CMP Metering Supplement.

Chapter 324 Interconnections:

Please be advised that if you plan to install solar/wind/hydro generation, you must complete an application under the MPUC mandated Chapter 324 Interconnection Standards. If you go to Chapter 324 Interconnection Standards and follow the instructions for the Small Generator Interconnection Procedures, CMP can do this work in parallel to your

service request that will be handled by me. If you project is under 660 KW You will be able to have a Customer Net Energy Billing contract. Information concerning Customer Net Energy Billing can be accessed thru the Chapter 324 website or by clicking here: Net Energy Billing

Reallocation/Line Extensions:

Recently, changes were made to the three-phase construction policy, which require CMP to reallocate construction costs paid by customers. If applicable, those projects identified as "developments" do not qualify for reallocation of funds. Please see this document at our website for details about the reallocation conditions. Any reallocation charges will be specifically denoted on your invoice. The website address for this is: Polyphase Line Extension.

This line extension will be part of Central Maine Power's distribution system. In the event the property served under this Agreement is sold or otherwise conveyed, all rights and obligations of the Agreement shall stay with the property. Please note that if you rent or lease this property to another and you want to receive the reimbursement payments, you must make special arrangements with the Central Maine Power Company. Otherwise, any reimbursement payments will be sent to the "Customer" taking service at the service location.

Electricity Supplier Information:

Central Maine Power Company (CMP) will provide your facility with electric delivery service. If you don't already have a provider, you will need to make arrangements with a competitive electricity provider in order to receive electricity supply for your facility. In the event you fail to choose a competitive electricity provider, you will receive Standard Offer service arranged by the Maine Public Utilities Commission. If you wish to be served by a competitive electricity provider immediately upon establishment of delivery service, you must arrange for this service directly through your chosen competitive electricity provider, who must enroll your account no later than 5 PM on the business day prior initiation of delivery service by CMP. An up-to-date list of competitive suppliers can be found at the:

1. Maine Public Utilities Commission (MPUC) web site- **Maine PUC**
2. By calling the MPUC at (207) 287-3831

ACORN ENGINEERING, INC.

Portland Water District
Attn: MEANS Department
225 Douglass Street
Portland, Maine 04104

October 28, 2024

RE: 165 Washington Avenue Redevelopment
Ability to Serve Request

To Whom It May Concern:

On behalf of Redfern Properties, we are pleased to submit the following request for Portland Water District's ability to serve at a proposed project at 165 Washington Avenue in Portland, Maine. It is our understanding that the project proposes to construct a new multi-family apartment building with approximately 327 dwelling units with ground floor commercial space. Along with the proposed building, the project would include additional amenity space, associated structured parking below the building and infrastructure upgrades.

It is assumed the development will require an 8" fire suppression, 6" domestic, and a 2" domestic water service. It is assumed the 6" domestic will likely be used for the residential units and the 2" domestic for the first-floor commercial spaces. The existing water main within Washington Avenue is 8", material and age of pipe is unknown at this time. Please refer to the Utility Plan for additional information. Based upon Section 4 of the *Maine Subsurface Wastewater Disposal Rules*, the table below outlines the proposed flow.

Estimate of Anticipated Daily Flows			
Development	Unit Size	Gallons per Day per Unit	Total Gallons per Day (GPD)
Existing Flow			
Northern Burner Supply Company, Inc. (Vacant)	-	-	Unknown
Total Gallons per Day (Existing)			-
Proposed Flow			
Residential	(108) Efficiency Units	120 GPD/ Unit	12,960
Residential	(129) Studio Units	120 GPD/ Unit	15,480
Residential	(12) 1-Bedroom Units	120 GPD/ Unit	1,440
Residential	(78) 2 Bedroom Units	210 GPD / Unit	16,380
Retail	10 Employees	12 GPD / Employee	120

Total Gallons per Day (Proposed)	46,380 GPD
Net Change	**+46,380 GPD**
*Values based on Chapter 241 State of Maine: Subsurface Wastewater Disposal Rules, most recent edition	

The proposed project is anticipated to increase the net flow by approximately **46,380** gallons per day (GPD). It should be noted that these values were developed using conservative estimates from the State of Maine Subsurface Wastewater Disposal Rules. We will provide any changes to the anticipated sewage demand as the project design progresses.

On behalf of the client, we are requesting the following information:

1. Additional information, such as utility mapping within Washington Avenue and confirmation of the location and size of the services to the existing property.
2. PWD's proposed infrastructure improvements within the project vicinity.
3. Flow data for adjacent hydrants.
4. PWD's ability to serve the project.
5. Any project related offsite water main improvements.

I have attached a Boundary and Topographic Survey created by Owen Haskell, Inc., to facilitate your review, as well as a preliminary utility plan developed by our office. Please do not hesitate to contact me or the office for any questions or clarifications.

Sincerely,

Peter Heil, PE
Project Manager
Acorn Engineering, Inc.

Portland Water District

FROM SEBAGO LAKE TO CASCO BAY

December 6, 2024

Zach Stevens, P.E.
Acorn Engineering, Inc.

Re: 165 Washington Avenue, PO
Ability to Serve with PWD Water

Dear Mr. Stevens:

The Portland Water District has received your request for an Ability to Serve Determination for the noted site submitted on October 31, 2024. Based on the information provided per plans dated December 6, 2024, we can confirm that the District will be able to serve the proposed project as further described in this letter. **Please note that this letter constitutes approval of the water system as currently designed and is valid for eighteen (18) months after the date of issue. Any changes affecting the approved water system will require further review and approval by PWD.**

Conditions of Service

The following conditions of service apply:

- Three new services may be installed from the water main in Washington Avenue: a new 1-inch copper domestic service with a 5/8-inch meter for the commercial portion of the project, a new 6-inch ductile-iron domestic service with a 4-inch compound meter for the residential portion, and a new 8-inch ductile-iron fire service. The service should enter through the property's frontage on Washington Avenue at least 10-feet from any side property lines.
- An approved backflow prevention device must be installed on each service line: a nontestable dual-check backflow preventer for the 1-inch service and testable double-check backflow preventers for the 6-inch and 8-inch services, directly after the meter or before the sprinkler riser prior to service activation.
- Please note that only one meter and one bill will be associated to each domestic service line. This one master meter would be located in a common space that all tenants could gain access to if necessary.
- An irrigation system has not been included in the sizing of services for this project.
- The Portland Water District does not have record of any other existing infrastructure in public roads and recommends a survey and test pitting be performed by the development team prior to construction. Any conflicts that arise during construction are at the risk of the developer and may result in job shutdown until new plans are submitted by the developer and reviewed and approved by PWD.

Prior to construction, the owner or contractor will need to complete a Service Application and pay all necessary fees for each proposed service. When the project is ready for construction, an Application for each service can be requested by contacting the MEANS Group at MEANS@pwd.org or 207-774-5961 ext. 3199. Once a completed Application has been submitted with payment, please allow seven (7) days for processing.

225 DOUGLASS STREET P.O. BOX 3553 PORTLAND, MAINE 04104-3553
PHONE: 207.774.5961 FAX: 207.761.8307 WEB: WWW.PWD.ORG

Existing Site Service

According to District records, the project site does not currently have existing water service.

Water System Characteristics

According to District records, there is an 8-inch diameter cast-iron water main in Washington Avenue and a public fire hydrant directly across the street from the site. The estimated static pressure in the area is 81 psi.

Public Fire Protection

The installation of new public hydrants to be accepted into the District water system will most likely not be required. It is your responsibility to contact the City of Portland Fire Department to ensure that this project is adequately served by existing and/or proposed hydrants.

Domestic Water Needs

The data noted above indicates there should be adequate pressure and volume of water to serve the domestic water needs of your proposed project. Based on the high water pressure in this area, we recommend that you consider the installation of pressure reducing devices that comply with state plumbing codes.

Private Fire Protection Water Needs

You have indicated that this project will require water service to provide private fire protection to the site. Please note that the District does not guarantee any quantity of water or pressure through a fire protection service. Please share these results with your sprinkler system designer so that they can design the fire protection system to best fit the noted conditions. If the data is out of date or insufficient for their needs, please contact MEANS to request a hydrant flow test and we will work with you to get more complete data.

Should you disagree with this determination, you may request a review by the District's Internal Review Team. Your request for review must be in writing and state the reason for your disagreement with the determination. The request must be sent to MEANS@PWD.org or mailed to 225 Douglass Street, Portland Maine, 04104 c/o MEANS. The Internal Review Team will undertake review as requested within 2 weeks of receipt of a request for review.

If the District can be of further assistance in this matter, please let us know.

Sincerely,
Portland Water District

Robert A. Bartels, P.E.

RE: 165 Washington Avenue Redevelopment
Ability to Serve Request

Dear Mr. Carpenter:

On behalf of Redfern Properties, we are pleased to submit the following request for Unitil's ability to serve at a proposed project at 165 Washington Avenue in Portland, Maine. It is our understanding that the project proposes to construct a new multi-family apartment building with approximately 327 dwelling units with ground floor commercial space. Along with the proposed building, the project would include additional amenity space, associated structured parking below the building and infrastructure upgrades.

There is an existing gas main located within the Washington Avenue sidewalk along the project frontage. Size, material, age are unknown at this time. The project will have a new gas service connecting into this main, with any meters located to the side of the building.

On behalf of the client, we are requesting the following information:

1. Any additional gas lines within Washington Avenue.
2. Confirmation of the existing building service tap location & size.
3. Unitil's proposed infrastructure improvements within the project vicinity.
4. Unitil's ability to serve the project.
5. Any project related offsite main improvements.

I have attached a Boundary and Topographic Survey created by Owen Haskell, Inc., to facilitate your review, as well as a preliminary utility plan developed by our office. Please do not hesitate to contact me or the office for any questions or clarifications.

Sincerely,

Peter F. Heil, PE
Project Manager
Acorn Engineering, Inc.

Subject/Description of project: 165 Washington Avenue, Portland - Ability to Serve Request

Re: Natural Gas Ability to Serve Response

Dear Zachary and Peter,

Thank you for your interest in using natural gas for the above referenced project.

This is to confirm that Unitil has a 4 inch HDPE natural gas in front of the property at 165 Washington Avenue, Portland.

Once the gas load is available please send that along and we can size any new gas mains, services and/or meter(s) that will be needed.

If you have any further questions or require additional information, please contact me at 207-541-2543 or email at carpenters@unitil.com.

Sincerely,

Scott Carpenter

Q. Construction Management Plan

Project Address: 165 Washington Avenue, Portland, ME

Project Description:

The project proposes to demolish the existing Northern Burner Supply building and construct a new multi-family / mixed-use apartment building with 326 dwelling units with ground floor commercial space. Along with the proposed building, the project would include additional amenity space, associated structured parking below the building and infrastructure upgrades.

Project Team Summary:

Owner:	Redfern Properties
General Contractor:	Penobscot General Contractors
Civil Engineer:	Acorn Engineering, Inc.
Architect:	HOLST Architecture
Structural Engineer:	Structural Integrity

The Owner/GC and all subcontractors will work with the City of Portland and adjacent landowners to minimize any project impacts.

The GC will remain responsible for enforcement of all compliance with 1) all contract plans and specifications in their scope of work and 2) all site working conditions and safety requirements, day and night, for both persons and property, in each case for the duration of their work. These include OSHA, NIOSH, U.S. EPA, local ordinance and any other applicable governmental regulations. Both the Owner/GC and any subcontractors will remain responsible for safeguarding the general public.

The GC shall review all permits and conditions associated with the project. The GC will prepare a Construction Management Plan their means and methods to be taken during construction.

The following outline has been developed in accordance with the City of Portland Construction Management Plan General Template and shall be referenced by the GC during construction.

A. Construction Management Principles

The control of noise, vibrations, ground movement, truck traffic, and other construction related factors will be of utmost importance. Care shall be taken to minimize these effects in the best interest of neighbors and the general public. GC to ensure that work hours conform to the City of Portland's Ordinance.

B. Development Review of Construction Management Plan

Logistics and safety program shall be submitted at or prior to the preconstruction meeting by the GC with all pertinent information required by the Maine Department of Transportation's Traffic Control Plan Standard Specification 652.3.3.

C. Performance Guarantees, Inspection Fees, Preconstruction Meeting, and Permits

Guarantees and fees will be paid at the time of the respective application. Sections 14-530 and 13-532 will be complied with all necessary permits will be obtained prior to work.

1. Street Opening and Street Occupancy Permits:

   Required permits regarding street opening and occupancy will be obtained from the Department of Public Works. The requests shall conform to the approved Construction Management Plan.

2. Blasting:

   Although not anticipated, if blasting occurs, it shall conform to Article VIII. In Chapter 14 of the City Code and Section 3.7 in the City's Technical Manual.

3. Building Code:

   Employ the best practices, as applicable, of Chapter 33 Safeguards During Construction, from the 2009 International Building Code.

D. Construction Administration and Communication

The Contractor will work closely with adjacent abutters, businesses, and all parties informed, as far in advance as possible, of scheduled work, particularly work anticipated to cause significant noise, vibrations, or dust. Communication in order to comply with all agreements, ordinances, and special permits will be of the utmost importance. Contractor contact information shall be posted on a sign on the construction fence along Washington Avenue frontage. Additional signage necessary for communication shall be provided but will be temporary and removed upon completion of the project. The contact information for the project personnel is:

Haynes Johnston
Redfern Properties
(207) 261-5151

GC and Subcontractor information will be posted along Washington Avenue frontage once contracted.

E. Construction Schedule

The GC shall submit a construction timeline at or prior to the preconstruction meeting. Construction may occur during the daytime hours as defined in Section 17-18 of the Construction Activities for Building permit and City Code Section 25-129, Noise, dust and debris. Between September 1 and May 31, the following year, no person shall engage in construction activities generating noise exceeding 50 decibels, between the hours of 7 pm and 7 am of the following day within 500 feet of any buildings. From June 1 to August 31, construction activity may continue until 8 pm. No construction activity shall begin before 8 am on a Saturday, Sunday, or legal holiday. Extended hours or night work may be requested for special circumstances and street utility work if needed. These requests will be subject to approval by the Public Works Authority.
Due to the limited space within the project parcel, deliveries will need to be stored in an

alternate location or deliveries must be small enough to fit within the property. Deliveries will be scheduled between 7 am and 5 pm.

The estimated timeframe of the proposed project is outlined below:

Project Start Date:	2025
Project End Date:	2027

A more detailed work schedule shall be provided by the GC at or before the pre-construction meeting with the City.

F. Security & Public Safety

1. The GC will provide all fencing and other barriers, with the intent of separating pedestrian and vehicle circulation from the construction site. Construction entrances per detail shall be installed.

2. Structures undergoing construction, alteration, or demolition operations, including those in underground locations, shall comply with NFPA 1 Chapter 16. *Safeguarding Construction, Alteration, and Demolition Operations.*

3. Fire Safety Program: Prior to construction, an overall construction and demolition fire safety program shall be developed. Essential items to be emphasized include the following:
    - Good Housekeeping
    - On-site security
    - Installation of new fire protection systems as construction progresses
    - Preservation of existing systems during demolition
    - Organization and training of an on-site fire brigade
    - Development of a pre-fire plan with the local fire department
    - Rapid communication
    - Consideration of special hazards resulting from previous occupancies
    - Protection of existing structures and equipment from exposure fires resulting from construction, alteration, and demolition operations.

4. Blasting, if required, shall conform with all measures of Article VIII. Regulation of Explosives in the Land Use Code and Section 3.7 Standards for Blasting and Regulation of Explosives in Portland's Technical Manual.

5. Temporary security lighting shall be shown on the Construction Management Plan, and all fixtures shall be full cutoffs.

G. Construction Permitting and Traffic Control Plans

1. Construction Activity in Public Streets

   Construction activity in the public right-of-way shall be compliant with Chapter 25 Article VII of the City Code. At no time will it be permissible for construction activity including delivery vehicle to close or block streets or affect public safety access without prior notice and approval of the Department of Public Works.
2. Sewer and Stormwater

Sewer and stormwater system connections are controlled by Chapters 24 and 32 of the City code of Ordinance. Required permits for new connections and/or abandonment of existing connections are available through the Street Opening Clerk at the Department of Public Works. Rules and Regulations for these utility systems are available through the City Engineer's office of the Department of Public Works and in Section II of the Technical Manual. This will apply to the new connections within Washington Avenue.

3. Traffic Control Plans

Construction activity that impacts the existing public street system must be controlled to protect the safety of the construction workers and all modes of the traveling public. The contractor shall submit a satisfactory "Maintenance of Traffic" (MOT) plan prior to any street opening permit approval. This document shall contain all pertinent information from the Maine Department of Transportation's Traffic Control Plan Standard Specification 652.3.3.

The MOT will address the work required for utility connections in Washington Avenue. Traffic will be channelized utilizing drums and cones. Proper signage will be installed prior to the through work zone. Alternating traffic will be controlled with flaggers. Trenches will be patched with pavement daily.

The MOT plan shall provide for the safe passage of the public through or along the construction work zone. It may be permissible to close a portion of Washington Avenue during utility connections and/or detour a mode of traffic when absolutely necessary for safety. All requests shall be subject to City approval. MOT plans shall employ the appropriate techniques and devices as called for in the latest edition of the Manual on Uniform Traffic Control Devices (MUTCD). In addition:

- Construction speed signing may be used as needed to slow traffic.
- Traffic Control signs shall not be placed where they would create any obstructions to bicycles or pedestrians.
- Flaggers will be utilized when necessary.

All existing modes of travel in the work zone area shall be accommodated if impacted by the activity. The safe passage of pedestrians, bicyclists, transit providers, and motorists are of equal importance when planning and laying out the work zone; no pre-existing travel mode may be eliminated without the express approval of the Department of Public Works. The MOT should also address on-street parking impacts, including deliveries and parking for adjoining businesses and property owners, analysis of roadway capacity or diversion capacity if street closure or change to roadway capacity is required, and coordination with other on-going or future construction or utility projects in the vicinity.

- Traffic control bicycle and pedestrian facilities or routes through work zones shall be maintained until the bicycle and pedestrian facilities or routes are ready for safe operation. Traffic control will not be removed to allow auto travel at the expense of bicycle and pedestrians.
- Barrier systems utilized to separate the construction activity from the public street and /or sidewalk shall not inhibit sight distances, particularly for visibility of pedestrians and bicyclists.

- ADA compliance in all capacities shall be maintained.

Use of public parking spaces on Washington Avenue shall not be permissible. The blockage of any portion of sidewalk for the purpose of construction activity shall require an occupancy permit and appropriate fee as assessed by the Department of Public Works.

H. Site Management and Controls

1. Regular trash and debris shall be managed appropriately, and its removal shall comply with all local, state, and federal regulations.

2. Street cleaning and sweeping shall be followed as outlined in the erosion and sedimentation control notes and report. Damage to the street shall be avoided and shall be the responsibility of the contractor.

3. Dust shall be controlled and shall comply with Section 25-129 and the erosion and sedimentation control notes, plan, and details.

4. Noise shall be controlled and shall comply with Section 17-18 and Section 25-129.

5. Rodent Control shall be provided, if applicable, by a professional exterminator and shall be consistent with Chapter 22 of the City Code.

6. Snow and Ice Removal shall be provided. Pursuant to Section 25-173, the Contractor shall ensure a safe means of travel within the work zone by the following steps:

    a. Snow/ice removal or commence automatically from 1" or greater of snow or ice
    b. Remove snow as needed within the work zone, including parking spaces. Driveways and site lines shall not be blocked by piles of snow.
    c. Clear all walks and ramps within the work zone
    d. Sand or salt as needed
    e. Clear all basin or drainage to help snow melt
    f. The above steps shall be carried out Sunday-Saturday including holidays.

I. Erosion Control and Preservation of Trees

1. The Contractor shall install all erosion and sedimentation controls as outlined in the plan set, and the approved erosion and sedimentation control report, prior to the pre-construction meeting for inspection by the City. The Contractor shall regularly inspect the control measures, no less than weekly and after storm events (0.5" or more in 24 hours). Additionally, temporary or permanent stormwater management systems shall be inspected and maintained to ensure working order. The Contractor shall document all inspection activities and corrective actions and be prepared to provide these documents for inspection by the City, Maine Department of Environmental Protection (MDEP) or the U.S. Environmental Protection Agency (EPA) upon request.

2. Due to the existing sparse landscaping on site, no protection during construction will be necessary.

3. Stored materials shall be identified and avoid being located under/near trees.

J. Construction Staging Area

1. The Contractor shall submit a plan with locations depicted for the location of material staging areas, the location of on-site temporary construction trailers, the location of on-site truck delivery holding areas, the location of on-site truck washing stations, masonry mixing stations, the general location of the construction security fence and the general location of temporary construction dumpsters. This plan shall be submitted at or prior to the pre-construction meeting. Any open storage areas shall be shown on the plan.

2. Delivery Truck Holding Areas On-Site: The majority of materials delivered to the site will be scheduled such that they are able to be off-loaded immediately. On days when the construction activities require multiple truck deliveries, these deliveries will be carefully scheduled so that there is always adequate on-site area for the holding of trucks until they can be unloaded. Once at the site all vehicles will be brought within the fence line and will make every attempt to avoid queuing on public streets. If, for any reason, on-site holding of trucks is not feasible, an off-site location must be designated and shown on the submitted plan referenced above in J.1.

3. All deliveries for materials shall comply with the City's noise requirements.

K. Parking During Construction

1. Adequate parking for construction workers shall be provided on site or arrangements for off-street parking at an off-site location shall be provided.

2. Truck Routes and Volumes: The following quantities are estimated as part of the reconstruction:

    - Gravel & Stone – Approx. 617 CY. Earthwork subcontractor(s) pit to project site.
    - Hot Mix Asphalt – Approx. 172 tons. Paving subcontractor(s) pit to project site.

L. Dewatering Plans

1. A basic dewatering plan for any construction work is required and shall be submitted by the Contractor. The plan must cover construction sites where groundwater is not expected but the impact of rainwater may require dewatering. The plan must include operating procedures, equipment to be used, including filters, erosion and sediment control measures, or other methods of removing sediment from approved discharges.

2. For construction work that will require frequent dewatering of groundwater from site, a dewatering plan must be prepared by the Contractor and approved by the Department of Public Works. Groundwater and/or soil testing may be required to determine course of action if treatment is necessary. Approval for all discharges to City infrastructure is required. The proposed plan must address the following:

    - Project duration, discharge location, storage equipment on-site, dewatering schematic, and emergency contact.

- General requirements include trained staff on-site for all approve discharges and required site log for documentation of all discharges.
- Storage and/or treatment process should include proper settling time and maintain proper use of filtering medium as required.
- Contingency/maintenance plan for all dewatering equipment devices and filtration mediums.

Any water that is removed from an excavation must be pumped from a perforated device buried in crush stone prior discharge and/or prior to storage and treatment. There will be no discharge allowed during precipitation events.

M. Special Measures as Necessary

No special measures are necessary for the proposed reconstruction.

R. Solid Waste Disposal

The proposed multi-family building will utilize an interior trash room. Please refer to the attached architectural plan for more information. Bins will be rolled out to the curb and collected by a private hauler, to be contracted for removal services.

S. Parking Analysis

Per Land Use ReCode Section 18-A Off Street Parking Table Maximums. The project does not require any parking onsite and the maximum allowed parking onsite is calculated below.

Residential: 1 space per 2 dwelling units (325 units) = 650 Parking Spaces

Retail: 1 Space per 300 SF of Floor Area = 6 Spaces

Total Maximums Parking Spaces allowed = 656 Spaces

The project proposes 11 parking spaces on site, including 2 ADA parking spaces, and 2 EV parking spaces under the building, significantly below the maximum allowed parking spaces and plans to implement strategies identified in the attached Transportation Demand Management Plan to promote multi-modal transportation options, including biking and walking.

Per Land Use ReCode Section 18-A Off Street Parking Table, the require bicycle parking space for residential units are 1 space per every 2 dwelling units, which results in 163 bike spaces required for the project. Please refer to C-10 for the locations of the bike racks, including internal bike room and external bike racks to meet the demand.

All mixed-use developments more than 50,000 SF shall be required to design and implement a Transportation Demand Management (TDM) Plan. Please refer to the attached Section T: Traffic for additional information.

Traffic Movement Permit

Please take notice that

Redfern Properties, LLC
120 Exchange St, Suite 330, Portland, ME 04101
(207) 261-5303

Are intending to file a Maine Department of Transportation Traffic Movement Permit with the City of Portland under their delegated review authority pursuant to the provisions of 23 M.R.S.A. § 704 - A on or about

November 20, 2024

The application is for the development of a 7-floor multi-use building with 326 apartment units and 1,800sf of retail space located at 165 Washington Avenue in the City of Portland. The project is anticipated to generate the following peak hour trips:

AM Peak Hour (Street) = 98
PM Peak Hour (Street) = 99
Saturday Peak Hour = 109

At the following location:

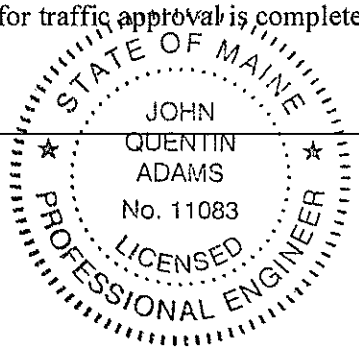
165 Washington Ave
Portland, ME 04101

Any interested party may request in writing to participate in the scoping meeting for the subject project no later than 20 days after the application is found by the City to be complete and is accepted for processing. Public comments on the application pertaining to either congestion or safety will be accepted throughout the processing of the application.

The application will be filed for public inspection at the City of Portland's Planning and Urban Development office during normal working hours.

Written public comments concerning congestion or safety only, may be sent to the Department of Transportation, State Traffic Engineer, 16 State House Station, Augusta, Maine 04333

1/2000



CERTIFICATION

The traffic engineer responsible for preparing this application and/or attaching pertinent site and traffic information hereto, by signing below, certifies that the application for traffic approval is complete and accurate to the best of his/her knowledge.

Section 1

1

1A. Site Plan

Redfern Properties LLC, is proposing the construction of a 208,667sf mixed-use residential and commercial building on the 1.31-acre parcel addressed 165 Washington Avenue in the City of Portland. Of the total acreage, 1.31 acres are developable. The project will construct a 7-floor multi-use building with 326 apartment units and 1,800sf of retail space on the ground level. Access to the site will be provided via a single driveway entrance, which intersects with the eastern side of Washington Avenue 120 feet north of East Cove Street.

The project will provide storage for 163 bicycles and 11 vehicle parking spaces, 2 of which will be signed and striped as handicapped.

1B. Existing & Proposed Uses

Existing

The existing development parcel is occupied by a vacant building that formerly was occupied by Northern Burner Supply, a wholesale distributor of heating and electrical supplies. Access to the existing site is provided by two driveway entrances that intersect with the eastern side of Washington Avenue, both of which will be removed with the development of the proposed project.

Proposed

The proposed development will construct a 7-floor multi-use building with 326 apartment units and 1,800sf of retail space on the ground level. Access to the site will be provided via a single driveway entrance, which intersects with the eastern side of Washington Avenue 120 feet north of East Cove Street.

The project will provide storage for 163 bicycles and 11 vehicle parking spaces, 2 of which will be signed and striped as handicapped.

1C. Regional Mapping

For the regional mapping analysis, we have established a study area with a ¼-mile radius from the site entrance at Main Street. The study area is based on MaineDOT's requirements for an urban/suburban development area.

Pedestrian & Bicycle Trip Origins/Destinations

Portland, within a ¼-mile radius of the site entrance, generally consists of residential, retail, and commercial land uses. It is assumed that these existing residential dwellings could be pedestrian/bicycle trip origins and that the pedestrian/bicycle destinations would be the retail and commercial institutional land uses generally located around Washington Avenue, Anderson Street, and Marginal Way.

Pedestrian Infrastructure

A review of existing pedestrian and bicycle infrastructure was completed using Google Earth and field surveys. Our surveys show that within the ¼-mile study radius, there are existing sidewalks on one or both sides of most streets. The existing sidewalks and crosswalks are illustrated in the *Regional Mapping Plan* attached in *Section A of the appendix*.

Bicycle Infrastructure
A review of existing pedestrian and bicycle infrastructure was completed using Google Earth, as well as field surveys. Our surveys show that within the ¼-mile study radius, there are striped bicycle lanes on the southbound Washington Avenue travel lane between Back Cove Trail and Walnut Street, on the northern side of Fox Street between Washington Avenue and Anderson Street, and on both sides of Marginal Way for the length of the study area. The existing bike lanes are illustrated in the *Regional Mapping Plan* attached in *Section A of the appendix*.

Bus Infrastructure
From a survey of Google Earth, we have identified the existing bus stops within the study area. The *Regional Mapping Plan* attached in *Section A of the appendix* illustrates the locations of the bus stops. The plan shows that there are existing bus stops on both sides of Washington Avenue within the vicinity of the development site.

Pedestrian Infrastructure Gaps
As shown in the *Regional Mapping Plan*, there are no significant gaps in the pedestrian sidewalk infrastructure.

1D. Proposed Uses in the General Vicinity of the Proposed Development

Traffic generated by projects that have been approved by the Local Planning Board and/or the Maine Department of Transportation, yet are not opened, must be included in the estimate of pre-development traffic. The City of Portland has been consulted to identify any and all development projects whose trips may impact the study area. The City identified 5 projects which potentially impact the study area:

- Roux Institute – 1 Bean Pot Circle
- St. Lawrence Performing Arts Center
- 70 Thames Street
- 385 Congress Street
- 58 Fore Street

Project and traffic information for each of the five identified projects is provided below:

Roux Institute
Traffic estimates prepared for the Roux Institute show that **18** AM peak hour trips and **21** PM peak hour trips will travel north on Washington Avenue to I-295, and **1** AM peak hour trip and **19** PM peak hour trips will travel from I-295 south on Washington Avenue.

St. Lawrence Performing Arts Center
Friends of St. Lawrence Church are proposing a 401-seat building expansion to the existing St. Lawrence Arts Center located at 76 Congress Street. Site trip assignments, prepared by Traffic Solutions in support of the proposed project, estimate **10** trips will travel directionally on Walnut Street to the proposed St. Lawrence Arts Center site from the Washington Avenue corridor in the "pre-event" peak hour, assumed to be the PM peak hour.

70 Thames Street is a 3-story mixed-use building composed of 43,730sf of office space, 2,00sf of retail space, and 8,315sf (300 seats) of restaurant space. Gorrill Palmer's traffic estimates show that the site produces **63 trips** in the AM peak hour and **129** trips in the PM peak hour. The approximate entry and exit trips, based on the data provided in ITE, are provided below:

AM Peak Hour:	**PM Peak Hour:**
Enter = 51	Enter = 56
Exit = 12	Exit = 73

385 Congress Street provides 156 hotel rooms and 9 residential condominiums. The TDM prepared for the project shows that the site will generate **49 trips** in the AM peak hour and **34 trips** in the PM peak hour. The trips are broken down into entry and exit trips below:

AM Peak Hour:	**PM Peak Hour:**
Enter = 19	Enter = 15
Exit = 30	Exit = 19

58 Fore Street is composed of a 128-room hotel, 43 condominium units, 4,928sf of retail space, 18,083sf of food & beverage, and a 19,697sf spa. Gorrill Palmer's traffic estimates show that the site is expected to generate **419 trips** in the AM peak hour and **565 trips** in the PM peak hour. The approximate entry and exit trips, which have been prepared based on the data provided in the TDM plan, are provided below:

AM Peak Hour:	**PM Peak Hour:**
Enter = 226	Enter = 283
Exit = 193	Exit = 282

1E. Site Trip Generation

Trip generation for the proposed 326 apartment units and 1,800sf of commercial space was determined based on the trip generation rates provided in the 11th edition of the Institute of Transportation Engineers (ITE) *Trip Generation Manual*. The ITE Manual provides numerous land use codes (LUC) and the average volume of site generated trips produced by each category.

Trip generation calculations for the 326 apartment units were prepared using *LUC #221—Multi-Family Housing (Mid-Rise)*, which ITE describes as "*apartments and condominiums located in a building that has between four and 10 floors of living space. Access to individual dwelling units is through an outside building entrance, a lobby, an elevator, and a set of hallways.*"

Trip generation calculations for the 1,800sf of commercial spaces were prepared using *LUC #932 – High-Turnover (Sit-Down) Restaurant*, defined by ITE as "*full-service eating establishments with a typical duration of stay of 60 minutes or less. This restaurant is usually moderately priced, frequently belongs to a restaurant chain, and is commonly referred to as casual dining. Generally, the restaurants serve lunch and dinner; they may also be open for breakfast and are sometimes open 24 hours a day.*"

In the *Trip Generation Manual*, for LUC #221 and LUC #932, ITE provides the *Average* trip generation rate and the *Fitted Curve* trip generation rate. MaineDOT guidelines state that when $R^2 \geq 0.80$, the *Fitted Curve* trip generation rate shall be used. The trip generation calculations for the apartment units and commercial space are provided below in Table 1.1 and Table 1.2:

Table 1.1 ITE Trip Generation Calculations (Dense Multi-Use Urban)							
Land Use	**Multifamily Housing (Mid-Rise) Not Close to Rail Transit - LUC 221**						
Time Period	**Dwelling Units (X)**	**R^2**	**Fitted Curve Equation/ Avg. Rate**	**Trips Generated (T)**	**Distribution Entering / Exiting**	**Enter**	**Exit**
Weekday	326	n/a	2.93	955	50% / 50%	478	477
AM Weekday Peak Hour (Street)	326	0.96	T = 0.25(X) + 5.35	87	15% / 85%	13	74
PM Weekday Peak Hour (Street)	326	0.97	T = 0.29(X) - 6.26	88	73% / 27%	64	24
AM Weekday Peak Hour (Generator)	326	0.69	0.23	75	17% / 83%	13	62
PM Weekday Peak Hour (Generator)	326	0.78	0.24	78	63% / 37%	49	29
Saturday Peak Hour*	326	n/a	0.27	88	50% / 50%	44	44

*ITE does not provide trip distribution for Saturday peak hour. Assumed to be 50/50.

Table 1.2 ITE Trip Generation Calculations (General Urban/Suburban)						
Land Use	**High-Turnover (Sit-Down) Restaurant - LUC 932**					
Time Period	**Sq. Footage (1k)**	**Avg. Trip Generation Rate (Trips Per 1k Sf)**	**Trips Generated**	**Distribution Entering / Exiting**	**Enter**	**Exit**
Weekday	1.8	107.20	193	50% / 50%	97	96
AM Weekday Peak Hour (Street)	1.8	9.57	18	55% / 45%	10	8
PM Weekday Peak Hour (Street)	1.8	9.05	17	61% / 39%	11	6
AM Weekday Peak Hour (Generator)	1.8	13.68	25	57% / 43%	15	10
PM Weekday Peak Hour (Generator)	1.8	16.35	30	51% / 49%	16	14
Saturday Peak Hour	1.8	11.19	21	51% / 49%	11	10

Summarizing the trip generation calculations shown in the preceding tables, Table 1.3, following, provides the trip generation calculations for the proposed development:

Table 1.3 ITE Trip Generation Summary			
Time Period	**Total Trips**	**Enter**	**Exit**
Weekday	1148	575	573
AM Weekday Peak Hour (Street)	105	23	82
PM Weekday Peak Hour (Street)	105	75	30
AM Weekday Peak Hour (Generator)	100	28	72
PM Weekday Peak Hour (Generator)	108	65	43
Saturday Peak Hour	109	55	54

The preceding table shows that the proposed multi-use building is expected to generate 105 trips during the AM peak hour of the adjacent street, and 105 trips during the PM peak hour of the adjacent street. During the peak hours of the generator, the site is expected to produce 100 trips in the AM and 108 trips in the PM. During the Saturday peak hour, the development is expected to generate 109 trips.

1F. Net New Trips

MaineDOT Traffic Movement Permit Regulations allow for trip generation credits to be taken for on-site uses that are displaced by the development of a site which were operational within the past 10 years. Within the past 10 years, the site was occupied by Northern Burner Supply Company, a heating and air conditioning/HVAC wholesale distributer store. The development was located in a 9,500sf building which will be removed with the development of the project. The trip generation estimates for Northern Burner Supply Co., which were prepared using ITE's LUC #110 – General Light Industrial, are provided below in Table 1.4:

Table 1.4
ITE Trip Generation Calculations (General Urban /Suburban)

Land Use	General Light Industrial - LUC 110					
Time Period	**Sq. Footage (1k)**	**Avg. Trip Generation Rate (Trips Per 1k Sf)**	**Trips Generated**	**Distribution Entering / Exiting**	**Enter**	**Exit**
Weekday	9.5	4.87	46	50% / 50%	23	23
AM Weekday Peak Hour (Street)	9.5	0.74	7	88% / 12%	6	1
PM Weekday Peak Hour (Street)	9.5	0.65	6	14% / 86%	1	5
AM Weekday Peak Hour (Generator)	9.5	0.91	9	87% / 13%	8	1
PM Weekday Peak Hour (Generator)	9.5	0.80	8	18% / 82%	1	7
Saturday Peak Hour		Closed				

Table 1.4 shows that the site's prior use generated 7 trips during the AM peak hour of the adjacent street and 6 trips during the PM peak hour of the adjacent street. During the AM and PM peak hours of the generator, the site produced 9 trips and 8 trips, respectively.

Taking credit for the site's prior use, Table 1.5, following, presents the net new site trip generation:

Table 1.5
Net New Trip Generation Calculations

Time Period	Proposed Trip Generation			Existing Trip Generation			Net New Trip Generation		
	Total	**Enter**	**Exit**	**Total**	**Enter**	**Exit**	**Total**	**Enter**	**Exit**
Weekday	1148	575	573	-46	-23	-23	1102	552	550
AM Weekday Peak Hour (Street)	105	23	82	-7	-6	-1	98	17	81
PM Weekday Peak Hour (Street)	105	75	30	-6	-1	-5	99	74	25
AM Weekday Peak Hour (Generator)	100	28	72	-9	-8	-1	91	20	71
PM Weekday Peak Hour (Generator)	108	65	43	-8	-1	-7	100	64	36
Saturday Peak Hour	109	55	54	0	0	0	109	55	54

The preceding table shows that the proposed multi-use building is expected to generate 98 net new trips during the AM peak hour of the adjacent street, and 99 net new trips during the PM peak hour of the adjacent street. During the peak hours of the generator, the site is expected to produce 91 net new trips in the AM and 100 net new trips in the PM. During the Saturday peak hour, the development is expected to generate 109 net new trips.

1G. Trip Adjustments

It is assumed that a certain number of trips generated by the proposed apartment units will also visit the proposed restaurant located on the ground floor. We have calculated the internally captured (shared) trips for proposed developments using the approach recommended by the ITE *Trip Generation Handbook*, which recommends using the NCHRP Report 684 methodology. The NCHRP Report 684 determines the internally captured trips between office, retail, restaurant, cinema/entertainment, residential, and hotel land uses.

The NCHRP spreadsheets, *attached in Section A of the appendix*, have been prepared by inputting the net new trips generated by the proposed residential and restaurant uses. The outputs of the spreadsheets are summarized below in Table 1.6:

Table 1.6
NCHRP Report 684 Summary

Time Period	Internal Capture Percentages			External Vehicle Trips		
	Total	Enter	Exit	Total	Enter	Exit
AM Weekday Peak Hour (Street)	4%	12%	2%	94	15	79
PM Weekday Peak Hour (Street)	6%	4%	12%	93	71	22
Saturday Peak Hour	7%	7%	7%	101	51	50

Table 1.6 shows that with the internally captured trips accounted for, the site is expected to produce 94 net new trips in the AM peak hour, 93 net new trips in the PM peak hour, and 101 net new trips in the PM peak hour.

While the Saturday peak hour is the site's highest trip generator, by 6 trips, the most critical study time periods are the AM and PM peak hours of the street due to the higher directional traffic volumes on the existing roadway. Accordingly, in this analysis, we will be studying the AM and PM peak hours of the street. To be conservative in our analyses, in this application, we will be completing the traffic analysis using the unadjusted site generated trips shown in Table 1.3

1H. Site Trip Distribution

Vehicle trips generated by the proposed multi-use building have been assigned to and from the site during the AM and PM peak hours based on the entering and exiting distribution patterns provided by ITE. The entering and exiting distributions for LUC #221 are provided in Table 1.7, and the entering and exiting distributions for LUC #932 are provided in Table 1.8.

Table 1.7
ITE Trip Generation Calculations

Land Use	LUC #221
Time Period	Distribution Entering / Exiting
AM Weekday Peak Hour (Street)	15% / 85%
PM Weekday Peak Hour (Street)	73% / 27%

Table 1.8 ITE Trip Generation Calculations			
Land Use	**LUC #932**		
Time Period	**Distribution Entering / Exiting**		
AM Weekday Peak Hour (Street)	55%	/	45%
PM Weekday Peak Hour (Street)	61%	/	39%

1J. Site Trip Assignment

Trips generated by the proposed development in the AM and PM peak hour time periods have been assigned to and from the development site following the existing traffic patterns recorded at the intersection of Washington Avenue at Eastern Promenade and Washington Avenue at Walnut Street/Fox Street. The turning movement counts, collected in October of 2024, are attached in *Section A of the appendix* and illustrated in **Figure 1**, which is also attached in *Section A of the appendix*. The trip assignment percentages are provided below in Table 1.9:

Table 1.9 Percent Site Trip Assignment		
Approach (To/From)	**AM Peak Hour**	**PM Peak Hour**
Eastern Promenade	12%	11%
Washington Ave (North)	30%	30%
Walnut St	7%	9%
Washington Ave (South)	40%	34%
Fox St	11%	16%

The site generated trips have been assigned through the intersections, to/from the site, following the percentages shown in Table 1.6. **Figure 2**, attached in *Section A of the appendix*, illustrates the site trip assignment.

Section 2

2

2A. Crash Analysis

MaineDOT's Office of Safety, Crash Records Section, has provided crash data for the latest three-year period (2021 – 2023) for the section of Washington Avenue between the Eastern Promenade and Fox Street/Walnut Street intersections. A summary of the crash report is provided below, and additional crash data outside of the study area is included in *Section B of the appendix*.

Table 2.1
2021 - 2023 Crash Summary
Washington Ave btw. Fox St and Eastern Promenade

#	Location		Total Crashes	Critical Rate Factor
1	Washington Ave @	Site	0	0.00
2	Washington Ave @	Walnut St	5	1.05
3	Washington Ave @	Eastern Promenade	5	1.08
4	Washington Ave @	Fox St	3	0.62
4	Washington Ave btw.	Fox St and Walnut St	0	0.00
6	Washington Ave btw.	Walnut St and Site	6	0.97
7	Washington Ave btw.	Site and Eastern Prom	2	0.47

MaineDOT considers any roadway intersection or segment a high crash location (HCL) if both of the following criteria are met:

- ***8 or more crashes in the most recent three-year period***
- ***A Critical Rate Factor greater than or equal to 1.00***

As shown in the preceding table, there are no high crash locations within the defined study area.

2B. Pedestrian & Bike Crash Analysis

A review of MaineDOT's Public Map Viewer shows that 0 bicycle crashes and 0 pedestrian crashes occurred in the study area.

Section 3

3

3A. Entrance/Exit Location

The development site will be accessed via a single driveway entrance, which intersects with the eastern side of Washington Avenue 120 feet north of East Cove Street.

3B. Entrance & Exit Plan View

Intersection sight distances were directionally recorded from the proposed site entrance in accordance with the criteria established within the MaineDOT's *Highway Driveway and Entrance Rules* publication, which require the following minimum sight distances for non-mobility roadways based upon the posted speed limit:

MaineDOT Sight Distance Standards	
Posted Speed Limit	**Minimum Sight Distance**
25 mph	**200 feet**
30 mph	250 feet
35 mph	305 feet
40 mph	360 feet
45 mph	425 feet
50 mph	495 feet

The section of Washington Avenue fronting the proposed site driveway is posted at 25 mph, requiring an unobstructed sight distance of 200 feet. In accordance with *Highway Driveway and Entrance Rules,* sight distance measurements were recorded using the following procedures: "*Sight distance is measured to and from the point on the centerline of the proposed access that is located 10 feet from the edge of traveled way. The height of the hypothetical person's view is considered to be 3½ feet above the pavement, and the height of the object being viewed is considered to be 4¼ feet above the pavement.*"

The field measurements recorded from the proposed site entrance looking directionally onto Washington Avenue indicate that existing sight distances are in excess of the minimum standard based on the 25 mph posted speed limit. Looking left, we recorded a sight distance of 225 feet; looking right, we recorded a measurement in excess of 400 feet.

3C. Entrance/Exit Design

The proposed project, including any required off-site improvements, will be designed and constructed as directed by the City of Portland.

3D. Entrance/Exit Criteria

This site driveway will be designed to meet the requirements of the City of Portland's Technical Standards.

Section 4

4

4. Title, Right or Interest

A PURCHASE AND SALE AGREEMENT, signed and dated July 1, 2023, provides documentation of Redfern Properties, LLC's ownership in the property portrayed in the *Boundary & Topographic Survey*, dated July 25, 2023, prepared by Owen Haskell, Inc. and attached in *Section E of the appendix*. The P&SA is attached in *Section C of the appendix*.

Section 5

5

5. Public or Private Right-of-way

The *Boundary & Topographic Survey* plan, dated July 25, 2023, prepared by Owen Haskell, Inc., and attached in *Section E of the appendix*, indicates that there are no easements on the development parcel.

Section 6

6

6. Schedule

Redfern Properties LLC is anticipating the start of construction in 2025 with a spring 2027 completion.

Section 6½

6½ A EXISTING & PROJECTED TRAFFIC VOLUMES

6A-1. Existing Traffic Volumes

Manual turning movement traffic counts were conducted at the signalized intersection of Washington Avenue at Fox Street/Walnut Street and the unsignalized intersection of Washington Avenue at Eastern Promenade on October 16, 2024, during the weekday AM and PM peak hours.

All vehicular traffic entering the study intersections was recorded in 15-minute intervals; the AM traffic data was recorded between 7:00 and 9:00 AM, and the PM traffic data was recorded between 3:00 and 6:00 PM. From a summary of the data, peak hour time periods were established for the *"peak"* commuter travel periods. At the intersection of Washington Avenue at Fox Street/Walnut Street, the AM peak hour begins at 7:45 AM, and the PM peak hour begins at 4:15 PM. At the intersection of Washington Avenue and Eastern Promenade, the AM peak hour begins at 7:30 AM, and the PM peak hour begins at 4:15 PM. The turning movement count reports are attached in *Section A of the appendix*.

The 2024 traffic volumes are illustrated in Figure 1, attached in *Section A of the appendix*.

6½ A-2. Seasonal Adjustments

Traffic data collected during the month of October requires a seasonal adjustment to reflect the "*peak*" travel conditions found during the summer months of July and August. MaineDOT provides Weekly Mean Factors for adjusting traffic volumes collected outside of the peak time periods.

MaineDOT utilizes highway classifications of I, II, or III for all State and Local roadways. MaineDOT's 2023 Count Book classifies Washington Avenue, Eastern Promenade, Walnut Street, and Fox Street as Group I roadways. **Group I** *roadways or urban roads are those which carry commuter traffic and exhibit little seasonal change in traffic volumes.* The Group I classification indicates that the roadways at the study intersections will experience minimal seasonal fluctuation.

In accordance with MaineDOT's 2023 Weekly Group Mean Factors, we have applied a seasonal adjustment factor of 1.046 to the traffic volumes recorded at both study intersections.

6½ A-3. Annual Adjustments

This traffic study has been prepared based on a projected build-out year of 2027. MaineDOT's traffic counts recorded on Washington Avenue southeast of Anderson Street show that traffic volumes on Washington Avenue have experienced negative annual growth between 2014 (AADT 5,623) and 2022 (AADT 4680). To be conservative in this study, we will apply a 1% annual growth rate to the recorded traffic volumes (factor of 1.0303).

Figure 3, attached in *Section A of the appendix*, depicts the 2027 design hour traffic volumes, including the seasonal and annual adjustments.

6½ A-4. Other Development Trips

Traffic generated by projects that have been approved by the Local Planning Board and/or the Maine Department of Transportation, yet are not opened, must be included in the estimate of pre-development traffic. The City of Portland has been consulted to identify any and all development projects whose trips may impact the study area. The City has identified 5 projects which may impact the study area:

- Roux Institute – 1 Bean Pot Circle
- St. Lawrence Performing Arts Center
- 70 Thames Street
- 385 Congress Street
- 58 Fore Street

Project and traffic information for each of the five identified projects is provided below:

Roux Institute
Traffic estimates prepared for the Roux Institute show that **18** AM peak hour trips and **21** PM peak hour trips will travel north on Washington Avenue to I-295, and **1** AM peak hour trip and **19** PM peak hour trips will travel from I-295 south on Washington Avenue.

St. Lawrence Performing Arts Center
Friends of St. Lawrence Church are proposing a 401-seat building expansion to the existing St. Lawrence Arts Center located at 76 Congress Street. Site trip assignments, prepared by Traffic Solutions in support of the proposed project, estimate **10** trips will travel directionally on Walnut Street to the proposed St. Lawrence Arts Center site from the Washington Avenue corridor in the "pre-event" peak hour, assumed to be the PM peak hour.

70 Thames Street is a 3-story mixed-use building composed of 43,730sf of office space, 2,00sf of retail space, and 8,315sf (300 seats) of restaurant space. Gorrill Palmer's traffic estimates show that the site produces **63 trips** in the AM peak hour and **129** trips in the PM peak hour. The approximate entry and exit trips, based on the data provided in ITE, are provided below:

AM Peak Hour:	**PM Peak Hour:**
Enter = 51	Enter = 56
Exit = 12	Exit = 73

385 Congress Street provides 156 hotel rooms and 9 residential condominiums. The TDM prepared for the project shows that the site will generate **49 trips** in the AM peak hour and **34 trips** in the PM peak hour. The trips are broken down into entry and exit trips below:

AM Peak Hour:	**PM Peak Hour:**
Enter = 19	Enter = 15
Exit = 30	Exit = 19

58 Fore Street is composed of a 128-room hotel, 43 condominium units, 4,928sf of retail space, 18,083sf of food & beverage, and a 19,697sf spa. Gorrill Palmer's traffic estimates show that the site is expected to generate **419 trips** in the AM peak hour and **565 trips** in the PM peak hour. The approximate entry and exit trips, which have been prepared based on the data provided in the TDM plan, are provided below:

AM Peak Hour:	**PM Peak Hour:**
Enter = 226	Enter = 283
Exit = 193	Exit = 282

6½ A-5. Other Development Site Trip Assignment

Traffic generated by the other development sites has been assigned through the study intersections following the existing traffic patterns and/or the assumptions listed below:

Roux Institute

The trips traveling north and south on Washington Avenue have been assigned through the study intersections following the traffic patterns illustrated in Figure 1. The Roux Institute's site trip assignment is provided in **Figure 4**, attached in *Section A of the appendix*.

St. Lawrence Performing Arts Center

The traffic figure, prepared by Traffic Solutions and *attached in Section A of the appendix*, shows that 10 trips will travel east, via Walnut Street, from Washington Avenue during the PM peak hour. We have assigned the trips through the study intersections following the traffic patterns illustrated in Figure 1. The St. Lawrence site trip assignment is depicted in **Figure 5**, attached in *Section A of the appendix*.

70 Thames Street & 58 Fore Street

Based on the roadway network adjacent to these sites and the easiest routes to I-295, we have assumed that 20% of the sites entering and exiting trips will travel through the intersection of Washington Avenue, Fox Street, and Walnut Street. We have then assigned them through the study intersections following the existing traffic patterns shown in Figure 1. The 70 Thames Street and 58 Fore Street other development site trip assignments are provided in **Figure 6** and **Figure 7**, respectively, attached in *Section A of the appendix*.

385 Congress Street

Based on the adjacent roadway network and the most convenient route to I-295, we have assumed that 10% of the sites entering and exiting trips will travel through the intersection of Washington Avenue, Fox Street, and Walnut Street. We have then assigned them through the study intersections following the existing traffic patterns shown in Figure 1. The 385 Congress Street site trip assignment is provided in **Figure 8**, attached in *Section A of the appendix*.

6½ A-6. 2027 Pre-Development Traffic

2027 pre-development traffic estimates, illustrated in **Figure 9** and *attached in Section A of the appendix*, have been prepared by combining the 2027 design hour traffic volumes shown in Figure 3 with the other development trips shown in Figures 4, 5, 6, 7, and 8.

6½ A-7. 2027 Post-Development Traffic

The 2027 post-development traffic volumes are provided in **Figure 10**, attached in *Section A of the appendix*. This figure has been prepared by combining the 2027 pre-development traffic volumes shown in Figure 9 with the site trip assignment shown in Figure 2.

6½ B Analysis

6½ B-2. Capacity Analysis

A capacity analysis of the 2027 pre- and post-development traffic conditions has been performed for the 3 identified study intersections listed below:

1. Washington Avenue @ Eastern Promenade
2. Washington Avenue @ Walnut Street/Fox Street

3. Washington Avenue @ Site Entrance

Within the capacity analysis, we review the level of service (LOS) for the vehicle movements at each of the study intersections. LOS is a measurement of the delay experienced by stopped vehicles at an intersection. LOS rankings are similar to the academic grading system, where an "A" is very good with little delay, and an "F" represents very poor conditions. The following chart presents the relationship between delay and LOS for signalized and unsignalized intersections.

Level of Service Criteria for Signalized Intersections		Level of Service Criteria for Unsignalized Intersections	
Level of Service	**Total Control Delay (sec/veh)**	**Level of Service**	**Total Control Delay (sec/veh)**
A	Up to 10.0	A	Up to 10.0
B	10.1 to 20.0	B	10.1 to 15.0
C	20.1 to 35.0	C	15.1 to 25.0
D	35.1 to 55.0	D	25.1 to 35.0
E	55.1 to 80.0	E	35.1 to 50.0
F	Greater Than 80.0	F	Greater Than 50.0

The capacity analysis was performed using Synchro 12 inputs and SimTraffic 12 reporting outputs. The results are based upon 7 SimTraffic runs, averaging 5 runs with the lowest and highest run removed. The SimTraffic reports are included in *Section D of the appendix.*

Table B1, following, summarizes the results of the capacity analysis completed for the AM and PM peak hours of the 2027 pre- and post-development conditions.

Table B2 Level of Service Summary								
Approach/Lane	2027 Pre-Development				2027 Post-Development			
	AM Peak Hour		PM Peak Hour		AM Peak Hour		PM Peak Hour

Overall	***-***	***n/a***	***-***	***n/a***	***2.4***	***A***	***2.2***	***A***

1. Washington Ave @ Fox St/Walnut St

The capacity analysis shows that the proposed development has minimal impact on the signalized intersection of Washington Avenue, Fox Street, and Walnut Street. In the pre-development and post-development peak hours, the level of delay at the intersection of Washington Avenue, Fox Street, and Walnut Street is expected to remain similar.

Overall, the intersection will continue to operate at an LOS C in the AM and PM peak hours, with minor increases in the overall intersection delay.

2. Washington Ave @ Eastern Prom

The analysis shows that during the pre- and post-development peak hours, the Eastern Promenade approach will continue operating at LOS B, while the Washington Avenue approaches will remain at LOS A. Overall, the intersection is projected to operate at LOS A with very minor changes in LOS.

3. Washington Ave @ Site

At the site's intersection with Washington Avenue, the capacity analysis shows that Washington Avenue approaches will operate at LOS A while the site entrance will operate at LOS B in the AM peak hour and LOS A in the PM peak hour.

Overall, the intersection will operate at an LOS A with an average delay of 2.4 seconds and 2.2 seconds in the AM and PM peak hours, respectively.

6½ B-3. Vehicle Queuing Analysis

In addition to outputting the vehicle delay, SimTraffic also provides vehicle queue reports, which show the expected average queue, 95th percentile queue, and maximum queue. For the 2027 pre- and post-development conditions, the 95th percentile vehicle queue results are summarized in Table B2, below, while the average and maximum vehicle queues are included in the SimTraffic reports provided in *Section D of the appendix*.

Table B2
95th Percentile Vehicle Queue Summary

Approach/Lane	Storage Length (ft.)	2027 Pre-Development		2027 Post-Development	
		AM Peak Hour	PM Peak Hour	AM Peak Hour	PM Peak Hour
		Queue Length (ft)	Queue Length (ft)	Queue Length (ft)	Queue Length (ft)

Washington Ave - SB Left/Thru	n/a	-	-	67	71

1. Washington Ave @ Fox St/Walnut St

The vehicle queuing analysis shows the 30-foot Washington Avenue left-turn lanes are exceeded by 1-2 vehicle lengths (25' per vehicle) in the pre-development and post-development peak hours.

2. Washington Ave @ Eastern Prom
The vehicle queuing analysis shows that the vehicle queues at the intersection of Washington Avenue and Eastern Promenade will remain similar in the pre- and post-development peak hours.

3. Washington Ave @ Site
At the site's intersection with Washington Avenue, the queuing analysis shows that vehicle queues of 67 and 65 feet are anticipated in the post-development AM and PM peak hours, respectively.

6½ C Summary

6½ C-1. Capacity Analysis

A capacity of the 2027 pre- and post-development traffic conditions has been performed for the 3 identified study intersections: Washington Avenue @ Eastern Promenade, Washington Avenue @ Walnut Street/Fox Street, and Washington Avenue @ Site.

1. Washington Ave @ Fox St/Walnut St
The capacity analysis shows that the proposed development has minimal impact on the signalized intersection of Washington Avenue, Fox Street, and Walnut Street. In the pre-development and post-development peak hours, the level of delay at the intersection of Washington Avenue, Fox Street, and Walnut Street is expected to remain similar.

Overall, the intersection will continue to operate at an LOS C in the AM and PM peak hours, with minor increases in the overall intersection delay.

2. Washington Ave @ Eastern Prom
The analysis shows that during the pre- and post-development peak hours, the Eastern Promenade approach will continue operating at LOS B, while the Washington Avenue approaches will remain at LOS A. Overall, the intersection is projected to operate at LOS A with very minor changes in LOS.

3. Washington Ave @ Site
At the site's intersection with Washington Avenue, the capacity analysis shows that Washington Avenue approaches will operate at LOS A while the site entrance will operate at LOS B in the AM peak hour and LOS A in the PM peak hour.

Overall, the intersection will operate at an LOS A with an average delay of 2.4 seconds and 2.2 seconds in the AM and PM peak hours, respectively.

6½ C-3. Vehicle Queuing Analysis

A vehicle queueing analysis was completed for the 2027 pre- and post-development conditions at each of the three study intersections.

1. Washington Ave @ Fox St/Walnut St
The vehicle queuing analysis shows the 30-foot Washington Avenue left-turn lanes are exceeded by 1-2 vehicle lengths (25' per vehicle) in the pre-development and post-development peak hours.

2. Washington Ave @ Eastern Prom
The vehicle queuing analysis shows that the vehicle queues at the intersection of Washington Avenue and Eastern Promenade will remain similar in the pre- and post-development peak hours.

3. Washington Ave @ Site

At the site's intersection with Washington Avenue, the queuing analysis shows that vehicle queues of 67 and 65 feet are anticipated in the post-development AM and PM peak hours, respectively.

- **PURCHASE & SALE AGREEMENT**

PURCHASE AND SALE AGREEMENT

165 WASHINGTON AVENUE, PORTLAND, MAINE

THIS PURCHASE AND SALE AGREEMENT ("Contract" or "Agreement"), made and entered into as of this ~~31st day of May~~ 1st day of June, 2023 (the "Effective Date"), is by and between **RAYMOND H. WATERHOUSE and ALINA WATERHOUSE,** individuals having an address at 105 Partridge Circle, Portland, Maine 04102 (hereinafter collectively referred to as "Seller"), and **REDFERN PROPERTIES LLC,** a Maine limited liability company having an address at P.O. Box 8816, Portland, Maine 04104, or its assigns (hereinafter referred to as "Buyer").

W I T N E S S E T H

WHEREAS, Seller is the record owner of fee simple title to certain real property situated in Portland, Cumberland County, Maine known as 165 Washington Avenue, Portland, Maine, together with certain improvements constructed thereon including a commercial building, and related amenities, facilities, improvements, and appurtenances thereto; and

WHEREAS, the Seller wishes to sell and convey said real property and improvements to Buyer and Buyer wishes to purchase the same from Seller.

NOW THEREFORE, for and in consideration of the foregoing, the sums of money to be paid hereunder, the mutual covenants herein contained, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto covenant, stipulate and agree as follows:

1. Description of Property to be Conveyed. The property which is to be sold and conveyed by Seller and purchased and accepted by Buyer pursuant to this Contract shall consist of the following:

(a) That certain parcel of land lying and being in Portland, Maine, being the property comprised of a 1.53 +/- acre lot identified by the Portland Assessor as Map 10, Block D, Lot 1 and Map 12, Block F, Lot 2, and described in that certain deed to Seller dated September 14, 2007, and recorded in the Cumberland County Registry of Deeds at Book 25470, Page 272, but excepting premises conveyed to Redfern Munjoy, LLC, by deed recorded in Book 31302, Page 177 of said Registry, and being more particularly described in Exhibit A attached hereto and made a part hereof, including all, rights, privileges, easements, hereditaments and appurtenances thereto, and all right, title and interest of Seller in and to the land lying in the bed of any public street, road or avenue in front of or adjoining said property (hereinafter collectively referred to as the "Land");

(b) All buildings, structures, facilities, fixtures, installations and improvements of every kind and description located in, on, over and under the Land, together with the appurtenances thereto including, without limitation, paved parking areas and various drainage and utility structures and improvements (collectively, the "Improvements"); and

(c) All of Seller's right, title and interest, if any, in and to the following (to the extent assignable and to the extent in the Seller's possession or control) and without warranty or representation: (i) all assignable warranties or guaranties given or made in respect of the Improvements; and (ii) all transferable consents, authorizations, variances or waivers, licenses, permits and approvals from any governmental or quasi-governmental agency, department, board, commission, bureau or other entity or instrumentality solely in respect of the Land or the Improvements (collectively, the "Personal Property").

The Land and Improvements are sometimes referred to herein collectively as the "Real Property." The Real Property and the Personal Property are referred to herein collectively as the "Subject Property".

2. Agreement to Sell and Purchase. Seller hereby agrees to sell and convey the Subject Property to Buyer, upon the terms and subject to the conditions set forth in this Contract. Buyer hereby agrees to purchase and accept the Subject Property from Seller, upon the terms and subject to the conditions set forth in this Contract.

3. Earnest Money Deposit. Within three (3) business days after the Effective Date, Buyer shall deposit the sum of [redacted] as the earnest money deposit (which amount shall hereinafter be referred to as the "Initial Earnest Money Deposit") hereunder with The Boulos Company, whose address is One Canal Plaza, Suite 500, Portland, Maine 04101 (hereinafter referred to as the "Escrow Agent"). So much of the Initial Earnest Money Deposit and the Additional Earnest Money Deposit (as hereinafter defined) as may have from time to time been deposited with Escrow Agent hereunder, and any interest earned thereon, are collectively referred to as the "Deposit". Upon Buyer's written request, and subject to the receipt by Escrow Agent of a completed and executed IRS Form W-9 and any other forms or information reasonably requested by the Escrow Agent, the Deposit will be placed in an interest-bearing account. Any interest accrued or accruing on the Deposit shall be and become part of the Deposit. Escrow Agent shall not be responsible for the amount of interest earned on, or charges on, the Deposit. By its counter-execution of this Agreement, Escrow Agent hereby agrees to hold the Deposit in escrow, subject to disbursement in accordance with the terms and provisions of this Contract. In the event Buyer does not elect to timely terminate this Contract pursuant to the express terms herein, the Deposit shall become non-refundable and shall not be returnable to the Buyer under any circumstances except in the event Seller is not able to provide title to the Subject Property as provided in this Contract, or otherwise defaults hereunder, but such Deposit shall, however, be credited to and considered as payment of part of the total Purchase Price (as defined below) at the time of closing hereunder.

Escrow Agent, may, at its option, require the receipt, release and authorization in writing of all parties before releasing the Deposit or delivering or redelivering documents or property to any party or to third parties. In the event a controversy arises over the Deposit, Escrow Agent, at its sole discretion, may tender the funds into court for settlement, after deducting its attorney's fees, court costs, and escrow fees, if any, which have accrued, including any attorney's fees and court costs relating to the tender into court. Seller and Buyer indemnify and hold harmless Escrow Agent and its agents and representatives from all loss or damage they

may sustain in connection with Escrow Agent's performance of these instructions and do hereby jointly and severally release and waive any claims they may have against Escrow Agent, other than any claims a party may have due to the gross negligence, malfeasance or misconduct of Escrow Agent in the performance of its duties hereunder.

4. Purchase Price and Method of Payment. Subject to credits, adjustments and prorations for which provisions are hereinafter expressly made, the total purchase price to be paid by Buyer to Seller for the Subject Property (the "Purchase Price") shall be [redacted] The Purchase Price shall be paid by Buyer to Seller in the manner and at the times as follows:

(i) The Deposit, to the extent paid by Buyer to Escrow Agent hereunder, shall be credited to Seller and considered as payment of part of the Purchase Price for the Subject Property at the time and upon consummation of the closing of the sale and purchase transaction contemplated in this Contract.

(ii) The balance of the Purchase Price shall be paid to Seller by Buyer by wire transfer or other immediately available funds acceptable to Seller, at the time of closing hereunder, subject to credits, adjustments and prorations as expressly provided herein.

5. Title and Survey.

(a) Title Commitment. Buyer shall obtain from a nationally recognized title company (sometimes referred to herein as the "Title Company") a commitment for owner's title insurance for the Real Property (the "Title Commitment"). Within five (5) days after the Effective Date, Seller shall deliver to Buyer copies of surveys of the Land that Seller may have in its possession or control (collectively, the "Existing Survey"). Buyer may order an update of the Existing Survey, or if no Existing Survey exists, a new survey of the Land; provided, however, Buyer must notify Seller of any material objections to the update of the Existing Survey or the new survey prior to the expiration of the Due Diligence Termination Date (as defined below), otherwise Buyer shall be deemed to have waived any right to object to same and any such inconsistencies shall constitute Permitted Exceptions (as defined below).

(b) Buyer's Review of Title Matters. Buyer shall have until the Due Diligence Termination Date to notify Seller in writing of any objection which Buyer may have to any matters reported or shown in the Title Commitment or the exception documents ("Buyer's Objection Letter"). Any matters reported in or shown by the Title Commitment and not timely objected to by Buyer as provided above shall be deemed to be "Permitted Exceptions". On or before the fifth (5th) business day following receipt of Buyer's Objection Letter, Seller shall elect, by delivering written notice of such election to Buyer and Escrow Agent ("Seller's Response") whether or not to cause the Title Company to remove any matters objected to in Buyer's Objection Letter. If Seller fails to deliver Seller's Response within the time frame set forth above, it shall be deemed to be an election by Seller not to cause Title Company to so remove such objections. Notwithstanding the foregoing, Seller shall be obligated to cure and remove without need for a Buyer's Objection Letter all of the following

title exceptions or encumbrances, if any: (i) the liens of any mortgage; (ii) tax liens for delinquent ad valorem real estate taxes; (iii) mechanics liens, judgment liens or other monetary liens; and (iv) broker's liens ("Seller's Mandatory Cure Items"). Seller shall have until Closing to cure and remove any Seller Mandatory Cure Items. If either (a) Seller elects to cause the Title Company to so remove and, at least one (1) day prior to the Closing (the "Cure Deadline"), Seller is unable to remove any exceptions or matters objected to by Buyer; or (b) Seller elects not to cause Title Company to so remove, then Buyer must elect, by delivering written notice of such election to Seller and Escrow Agent on or before (i) the fifth (5^{th}) business day following Buyer's receipt of Seller's Response, or (ii) if no Seller's Response is received by Buyer, the fifth (5^{th}) business day following the date on which Seller shall have been deemed to have responded, as provided above, or (iii) in the event Seller elects to cause the Title Company to so remove and, prior to the Cure Deadline, Seller is unable to remove any exceptions or matters objected to by Buyer, on or before the Cure Deadline, to: (A) terminate this Agreement (in which case Escrow Agent shall return the Deposit to Buyer, and neither party shall thereafter have any rights or obligations to the others hereunder, other than pursuant to any provision hereof which expressly survives the termination of this Agreement); or (B) proceed to a timely Closing without liability to Seller whereupon such objected to exceptions or matters shall be deemed to be Permitted Exceptions. Seller shall be responsible for removing any exceptions or deficiencies to title which first arise between the date upon which Permitted Exceptions are established ("Permitted Exception Date") and Closing unless created by or with the consent of Buyer.

6. Buyer's Due Diligence.

(a) Seller Deliverables. Seller shall deliver to Buyer within five (5) days of the Effective Date the following, if any (the "Property Documents"): Seller's existing survey(s) and/or title reports with respect to the Subject Property; copies of service contracts or management agreements, any environmental reports (including Phase I or Phase II reports) in Seller's possession or control; floor plans and building specifications, insurance information (including a current certificate of insurance regarding property, casualty and general liability insurance for the Subject Property) and property tax statements for the previous two (2) years; copies of certificate(s) of occupancy and any property condition reports.

Buyer agrees to return the foregoing and all such other documents to Seller, without retaining copies, in the event the closing hereunder does not occur.

(b) Inspection Rights. At all reasonable times from and after the Effective Date, Buyer, its agents and representatives shall be entitled at Buyer's sole cost and expense to make investigations with respect to the compliance of the Real Property and the Improvements with all applicable laws, ordinances, rules and regulations; to review any documents or information Buyer has or may receive with respect to the Subject Property; to review any contracts and agreements affecting the Subject Property; to enter onto the Real Property during normal business hours to conduct such inspections and investigations of the condition of the Property as Buyer deems relevant with respect to the operating systems, structural components, and site conditions of the Real Property and Improvements, and perform Phase I and if necessary, Phase II environmental studies, which may include without limitation drilling and borings and the taking of soil samples. Buyer shall at its own expense restore the Real Property

to as close as reasonably possible to its present condition. All such inspections shall be done by qualified inspectors chosen and paid for by Buyer. Seller agrees to reasonably cooperate with Buyer in connection with Buyer's investigations, and shall grant Buyer access to the Real Property at reasonable times upon reasonable prior notice. Buyer shall indemnify, protect, defend and hold harmless Seller from all claims (including, without limitation, any claim for a mechanic's lien or materialman's lien), causes of action, costs, losses, damages and reasonable attorney's fees incurred by Seller in connection with or arising out of any inspections or investigations carried on, by or on behalf of Buyer pursuant to this Section. The foregoing indemnity shall not apply to any claims (including, without limitation, claims that the Real Property has declined in value) or liabilities to the extent the same arise out of or are incurred in connection with (i) the negligence or willful misconduct of the Seller or their agents, consultants or contractors; (ii) the discovery by Buyer or its agents, consultants or contractors of any or pre-existing conditions on the Real Property; (iii) the release (other than by Buyer, its agents, consultants, employees, contractors or representatives) or discovery by Buyer or presence of any pollutants, hazardous waste, hazardous substance or material located on or about the Real Property, except to the extent that Buyer or its agents, consultants, employees, contractors or representatives have exacerbated such condition; (iv) the results, findings, tests or analyses of Buyer's environmental or other physical investigation of the Real Property; or (v) any disclosure or notification made or given by Buyer or any its agents, consultants or contractors to any governmental agency or other party that is required by law based upon the results, findings, tests or analyses of Buyer's environmental or other physical investigation of the Real Property. The provisions of this Section shall survive the Closing or the earlier termination of this Agreement.

(c) Buyer's Termination Right. Buyer shall have the right at any time on or before ninety (90) days after the Effective Date (the "Due Diligence Termination Date") to terminate this Contract if Buyer determines for any reason that the Property Documents or all or any portion of the Subject Property is not acceptable to Buyer in its sole and absolute discretion. Notwithstanding the foregoing, if Buyer's environmental consultant determines that a Phase II report is warranted, the Due Diligence Termination Date shall be extended for up to an additional period of ninety (90) days provided Buyer gives Seller written notice of its intent to so extend prior to the initial Due Diligence Termination Date, and provided Buyer confirms that it has waived all other due diligence conditions, including title review (subject to any Buyer's Objection Letter that may have been sent). If Buyer exercises its right to extend the Due Diligence Termination Date, said extension shall last until the earlier of (i) five (5) business days after Buyer has received the final results of its Phase II testing; and (ii) ninety (90) days after the original Due Diligence Termination Date. If Buyer delivers a written notice to Seller and Escrow Agent exercising its termination right hereunder ("Buyer's Termination Notice") on or before the Due Diligence Termination Date (as it may be extended), then (a) Escrow Agent shall return the Deposit to Buyer; (b) this Contract shall automatically terminate and be of no further force or effect and neither party shall have any further rights or obligations hereunder, other than pursuant to any provision hereof which expressly survive the termination of this Contract; and (c) Buyer shall, upon Seller's request, deliver to Seller copies of all surveys, environmental and other reports undertaken by Buyer with respect to the Subject Property without any representation or warranty of any kind or nature whatsoever, express or implied, about the accuracy, reliability or usefulness of any information contained therein. If Buyer fails to deliver to Seller and Escrow Agent Buyer's Termination Notice on or before the Due Diligence Termination Date, Buyer shall be deemed to have waived its right to terminate this Contract

pursuant to this Section, and [redacted] of the Deposit shall become non-refundable to Buyer (but applicable to the Purchase Price), except in the event of Seller default or inability or refusal to convey title as provided in this Contract.

7. Approval Contingency. This Contract is contingent upon Buyer obtaining all permits and approvals from the City of Portland (the "City") for its proposed use and occupancy of the Subject Property acceptable to Buyer in its sole and absolute discretion (the "Approvals"). An Approval shall not be deemed to have been "obtained" until it has become final and non-appealable, and any periods for challenge to the same (or any conditions to its final effectiveness) shall have expired. Buyer shall use its best efforts to obtain the Approvals as expeditiously as reasonably possible. Seller shall reasonably cooperate with Buyer in connection with Buyer obtaining the Approvals and agrees to execute and deliver all documents reasonably requested by Buyer, at no cost or liability to Seller. Buyer shall have sixty (60) days from the expiration of the Due Diligence Termination Date (the "Approval Date") to obtain the Approvals. If Buyer has not received its Approvals by the Approval Date, then Buyer shall have the right to extend the Approval Date for up to six (6) additional sixty (60) day periods (each, an "Approval Extension Period"), by giving notice to Seller on or before the Approval Date, as it may be extended, on the follow terms and conditions:

(i) If Buyer exercises the first Approval Extension Period, an additional [redacted] of the Deposit (for a total of [redacted]) shall become non-refundable to Buyer (but applicable to the Purchase Price), except in the event of Seller default or inability or refusal to convey title as provided in this Contract;

(ii) If Buyer exercises the second Approval Extension Period, an additional [redacted] Dollars of the Deposit (for a total of [redacted]) shall become non-refundable to Buyer (but applicable to the Purchase Price), except in the event of Seller default or inability or refusal to convey title as provided in this Contract;

(iii) If Buyer exercises the third Approval Extension Period, an additional [redacted] Dollars of the Deposit (for a total of [redacted]) shall become non-refundable to Buyer (but applicable to the Purchase Price), except in the event of Seller default or inability or refusal to convey title as provided in this Contract;

(iv) If Buyer exercises the fourth Approval Extension Period, an additional [redacted] Dollars of the Deposit (for a total of [redacted] shall become non-refundable to Buyer (but applicable to the Purchase Price), except in the event of Seller default or inability or refusal to convey title as provided in this Contract;

(v) If Buyer exercises the fifth Approval Extension Period, Buyer shall deposit with the Escrow Agent an additional [redacted] Dollar deposit (the "Additional Earnest Money Deposit"), and the Deposit (for a total of [redacted]) shall become non-refundable to Buyer (but applicable to the Purchase

Price), except in the event of Seller default or inability or refusal to convey title as provided in this Contract;

(vi) If Buyer exercises the sixth Approval Extension Period, Buyer shall deposit with the Escrow Agent an additional [redacted] Dollar Additional Earnest Money Deposit, and the Deposit (for a total of [redacted] shall become non-refundable to Buyer (but applicable to the Purchase Price), except in the event of Seller default or inability or refusal to convey title as provided in this Contract.

Such portion of the Deposit that is non-refundable as set forth in Section 6(c) above [redacted] and in subparagraphs 7(i) through (vi) above is hereinafter referred to as the "Non-refundable Deposit". At Seller's request, which may be made at any time and from time to time, Escrow Agent shall release the Non-refundable Deposit available as of the date of Seller's request(s) to Seller to, among other things, pay carrying costs of the Real Property, such as taxes, insurance, utilities etc., provided that Seller at the time they first request a release of the Non-refundable Deposit delivers to Buyer a comfort letter or account statement from a financial institution or investment management firm reflecting that Seller maintains accounts with such financial institution or investment management firm in an amount sufficient to fund Seller's obligation to return to Buyer the Non-refundable Deposit (or so much as has been released to Seller from time to time) pursuant to the terms of this Contract. Buyer hereby authorizes Escrow Agent to release the Non-refundable Deposit to Seller from time to time provided such comfort letter or account statement has been received by Buyer.

The Additional Earnest Money Deposit shall be considered part of the Deposit for all purposes of this Contract. If Buyer does not receive the Approvals on or prior to the Approval Date, as it may be extended, or if Buyer at any time prior to the Approval Date, as it may be extended, determines in its sole and absolute discretion that the Approvals will not be suitable or satisfactory for Buyer's proposed use and occupancy of the Subject Property, then Buyer may terminate this Contract by delivering written notice to Seller and Escrow Agent ("Buyer's Approval Termination Notice") exercising its termination right hereunder on or before the Approval Date, as it may be extended, whereupon (a) Escrow Agent shall return so much of the Deposit that is refundable at that time, if any, to Buyer; (b) release so much of the Deposit that is non-refundable at that time, if any, to Seller; and (c) this Contract shall automatically terminate and be of no further force or effect and neither party shall have any further rights or obligations hereunder, other than pursuant to any provision hereof which expressly survive the termination of this Contract. If Buyer fails to deliver to Seller and Escrow Agent Buyer's Approval Termination Notice on or before the Approval Date, as it may be extended, Buyer shall be deemed to have waived its right to terminate this Contract pursuant to this Section.

8. Conveyance of Subject Property and Personal Property; Delivery Free of Tenants and Occupants. At the time of Closing hereunder, Seller shall convey its fee simple interest and estate in and title to the Subject Property by Quitclaim with Covenant Deed, free and clear of any and all liens, security interests, exceptions or encumbrances arising by or though Seller, other than Permitted Exceptions. Seller shall pay for personal property taxes through the Closing Date (as hereinafter defined). Seller agrees to terminate the tenancy and/or occupancy of the any current tenants or occupants of the Subject Property, and to deliver the Subject Property free and

clear of all personal property, inventory, equipment, free-standing shelving, tenants and occupants. If Seller is unable to provide the Subject Property to Buyer free and clear of personal property, inventory, equipment, free-standing shelving, tenants and occupants, by the Closing Date then Seller shall be deemed in default of this Contract and Buyer shall have the right to terminate this Contract whereupon notwithstanding anything in this Contract to the contrary (a) Escrow Agent shall return the entire Deposit to Buyer; and (b) this Contract shall automatically terminate and be of no further force or effect and neither party shall have any further rights or obligations hereunder, other than pursuant to any provision hereof which expressly survive the termination of this Contract.

9. Closing. The sale and purchase transaction contemplated in this Contract shall be closed, and the Purchase Price paid, on the date that is forty-five (45_days after the Approval Date (as it may be extended) (the "Closing Date"). Purchaser shall notify Seller in writing when all Approvals have been obtained. The following documents and items shall be delivered by Seller and Purchaser at Closing, as applicable:

(a) A Quitclaim Deed with Covenant from Seller in form reasonably acceptable to Seller and Buyer, together with applicable conveyance tax forms.

(b) An Owner's Affidavit executed by Seller in the form provided by the Title Company, provided such requested Affidavit does not expand the liability or representations of Seller hereunder beyond the terms of this Contract.

(c) An Affidavit stating that Seller is a Maine resident, or in the alternative, a Certificate of Exemption, Certificate of Reduction or REW-1 filing form.

(d) An Affidavit of Seller stating that Seller is not a "foreign person" as defined in Section 1445(B)(2) of the Internal Revenue Code of 1986, as amended.

(e) All transferable licenses, permits, certificates, approvals, authorizations, variances and consents held by Seller and issued by governmental and quasi-governmental bodies, officers and authorities in respect to the ownership, occupancy, use and operation of the Subject Property in the possession or control of Seller.

(f) Reserved.

(g) Keys.

(h) Appropriate evidence of authorization reasonably satisfactory to the Title Company regarding the consummation of the transaction contemplated by this Contract.

Seller shall pay the following closing costs (a) any and all costs incurred by Seller in performing its obligations under this Contract, and (b) the cost of recording the discharge of any existing mortgage on the Subject Property and any other documents required to be recorded or filed in order to transfer title as provided herein. Buyer shall pay the following closing costs (a) title search and examination charges, and the premium for the Commitment and Lender's and/or Owner's Title Insurance Policy, if any, to be issued pursuant thereto; (b) the cost of the update to the Survey or a new survey, if any; (c) the cost of the brokerage commission payable to The

Boulos Company, (d) the cost of any inspections or investigations of the Subject Property, (e) the cost of recording the Deed and any mortgages or other recorded documents relating to its purchase of the Subject Property, and (f) all costs associated with Buyer's financing of its acquisition, if applicable, it being understood and agreed that obtaining financing is not a condition to Purchaser's obligations hereunder. Seller and Buyer will each pay one-half of the transfer tax payable with respect to the Purchase Price. Each of the respective parties shall bear its own attorneys' fees.

10. Possession and Risk of Loss. Without limiting the provisions of Section 8 of this Contract, possession of the Subject Property shall be delivered by Seller to Buyer at the time of closing hereunder, free and clear of all tenants and occupants. Risk of Loss shall be on Seller until transfer of Property.

11. Prorations. Prorations shall be made as of the Closing Date as if Buyer were in title for the entire Closing Date. The following shall be prorated and adjusted between Seller and Buyer:

(a) Utilities and Operating Expenses. Water, electricity, sewer, gas, telephone and other utility charges based, to the extent practicable, on final meter readings and final invoices.

(b) Assessments. All assessments, general or special, assessed as of the date hereof shall be prorated as of the Closing Date, with Seller being responsible for any installments of assessments that are due and payable prior to the Closing Date and Buyer being responsible for any installments of assessments that are due and payable on or after the Closing Date. All such assessments assessed after the date hereof shall be the sole responsibility of Buyer.

(c) Taxes. All ad valorem real estate and personal property taxes with respect to the Real Property and the Improvements shall be prorated as of the Closing Date, based on the most currently available final tax bill and on a cash basis for the tax year in which the Closing occurs, regardless of the year for which such taxes are assessed.

(d) Other. Such other items as are customarily prorated in transactions of this nature in the county in which the Project is located shall be ratably prorated.

12. Representations, Warranties and Covenants of Seller.

12.1 Seller hereby makes the following representations and warranties to Buyer:

(a) Seller's execution and delivery and performance of this Contract by the undersigned and the performance of its obligations hereunder, including the closing of the sale and purchase transaction contemplated herein on the terms set forth herein, have been duly authorized and directed by Seller and no further consents or approvals are or shall be required as a condition precedent to the consummation and closing of the sale and purchase transaction contemplated herein except as expressly set forth in this

Contract. Seller has taken all necessary action to authorize the execution, delivery and performance of this Contract and upon the execution and delivery of any document to be delivered by Seller on or prior to the Closing, this Contract and such document shall constitute the valid and binding obligation and agreement of Seller, enforceable against Seller in accordance with its terms.

(b) The performance by the Seller of the terms, covenants and conditions contained herein will not conflict with, constitute an event of default under, any agreement or other instrument to which Seller is a party or by which its properties or assets are bound.

(c) Seller is not a party to any leases, agreements, contracts or licenses affecting the Real Property or any use of the Real Property that would not be terminable at will by Buyer without penalty from and after the Closing.

(d) Seller has not received any written notice from any governmental authority that the Real Property, or the present condition, operation or use thereof, violates any applicable laws, rules, regulations, restrictions, covenants, agreements, site plan approvals, zoning or subdivision regulations or any duly issued variances and Seller has no other actual knowledge of any such violation(s).

(e) Seller has received no written notice that there is any pending judicial, municipal or administrative proceedings affecting the Real Property or in which Seller is a party by reason of Seller's ownership of the Real Property or any portion thereof, including, without limitation, proceedings for or involving collections, condemnations, eminent domain, alleged building code, zoning or environmental violations, or personal injuries or property damage alleged to have occurred on the Real Property or by reason of the condition or use of the Real Property and Seller has no other actual knowledge of any such proceedings.

(f) Seller represents that, after the execution of this Contract and until such time as Closing occurs or the Contract expires without performance, it shall not enter into any leases, encumbrances or other arrangements pertaining to the Real Property which shall not be removed or terminated not later than the Closing.

(g) To the best of Seller's knowledge, the Real Property does not contain and has not contained, any Hazardous Substances, other than in amounts that do not violate any applicable law or regulation. "Hazardous Substances" means and refers to any "hazardous substance" as now or hereafter defined in §101(14) of CERCLA or any regulations promulgated under CERCLA; (ii) any "hazardous waste" as now or hereafter defined in the RCRA or regulations promulgated under RCRA; (iii) any substance regulated by the Toxic Substances Control Act (15 U.S.C. §2601 et seq.); (iv) gasoline, diesel fuel, or other petroleum hydrocarbons; (v) asbestos and asbestos containing materials, in any form, whether friable or non-friable; (vi) polychlorinated biphenyls; (vii) radon gas; (viii) lead paint; (ix) any additional substances or materials which are

now or hereafter classified or considered to be hazardous or toxic under local, state or federal environmental laws.

(h) Seller is the sole owner of good, fee simple, marketable and insurable title to all of the Real Property.

(i) There are no options to purchase or rights of first refusal with respect to all or any part of the Real Property and Seller has entered into no contracts for the sale, pledge, hypothecation, assignment, lease or other transfer of all or any part of the Real Property, other than the existing lease to Northern Burner Supply Co., Inc. or its successor tenant, which will be terminated prior to Closing.

(j) Seller has paid, or will pay at or prior to Closing, all taxes (including all real estate, personal property, sales and use taxes), assessments, charges, fees, levies and impositions associated with the Real Property, coming due prior to the Closing Date for periods prior to the Closing Date. Seller knows of no actual or pending imposition of any assessments for public improvements and, to the best of Seller's knowledge, no such improvements have been constructed or planned that would be paid for by means of assessments upon the Real Property.

(k) Seller has received no notice of any claims, demands, suits, or actions arising out of or relating in any way to any water damage, water intrusion, mold growth or mold infestation occurring in, on or about the Real Property.

Seller shall indemnify, defend and hold Buyer and Buyer's members, managers, partners, officers, shareholders, directors and employees harmless from all claims, demands, liabilities, costs or expenses (including, without limitation, reasonable attorneys' fees) arising from or attributable to any breach by Seller of any of its warranties or representations in this Section 12.1 or elsewhere in this Contract, and the representations and warranties set forth herein and this indemnification shall survive the Closing for a period of twelve (12) months.

12.2 Seller covenants and agrees with Buyer as follows:

(a) From the Effective Date until physical possession of the Real Property has been delivered to Buyer, Seller will keep and maintain all of the Real Property in good order and condition, will not permit any waste with respect thereto and shall operate the Real Property in accordance with its current good faith business practices, provided, however, that nothing herein shall require Seller to continue to lease the Real Property to Northern Burner Supply Co., Inc. until Closing.

(b) From the Effective Date until the Closing Date, Seller shall not enter into any new agreements affecting the Subject Property unless such agreements may be terminated not later than the Closing without penalty.

(c) Between the Effective Date and the Closing Date, Seller shall not grant or permit any new encumbrances on or about the Subject Property.

13. Representations and Warranties of Buyer. Buyer represents, covenants and warrants to and agrees with Seller that Buyer has the legal right, power and authority to enter into this Contract and to perform all of its obligations hereunder, and the execution and delivery of this Contract and the performance by Buyer of its obligations hereunder (i) have been duly authorized by all requisite limited liability company action; and (ii) will not conflict with, or result in a breach of, any of the terms, covenants and provisions of the by-laws or articles of organization of Buyer or any law or any regulation, order, judgment, writ, injunction or decree of any court or governmental authority, or any agreement or instrument to which Buyer is a party or by which it is bound. No further consents or approvals are or shall be required as a condition precedent to the consummation and Closing of the sale and purchase transaction contemplated herein except as expressly set forth in this Contract. Buyer has taken all necessary action to authorize the execution, delivery and performance of this Contract and upon the execution and delivery of any document to be delivered by Buyer on or prior to the Closing, this Contract and such document shall constitute the valid and binding obligation and agreement of Buyer, enforceable against Buyer in accordance with its terms.

14. Default

(a) Buyer Default. In the event of any material default on the part of Buyer under this Contract, the Seller shall be entitled, as its sole remedy hereunder, to either (i) retain the Deposit as consideration for its execution of this Contract and in full settlement of, and as liquidated damages for, any and all claims for damages occasioned by Buyer's default, and this Contract shall terminate, expire, cease and become null and void and, thereafter, all parties hereto shall be relieved of any and all further obligations and liabilities to each other under this Contract, other than as to those obligations which specifically survive the termination of this Contract; (ii) enforce specific performance of Buyer's obligations under this Contract.

(b) Seller Default. In the event of any default on the part of Seller under this Contract, the Buyer, as its sole remedy hereunder, may elect any of the following: (i) enforce specific performance of Seller's obligations under this Contract if the nature of Seller's default has not rendered specific performance unavailable, or (ii) if the nature of Seller's default has rendered specific performance unavailable or in Buyer's sole and absolute discretion not desirable or ineffective as a remedy, Buyer shall receive a return of the entire Deposit and Buyer may seek damages; or (iii) waive the breach, or default or other closing condition and proceed to consummate the transaction contemplated hereby without any adjustment of the Purchase Price in accordance with the provisions of this Agreement; or (iv) terminate this Contract, whereupon neither party hereto shall have any further rights or obligations hereunder (except as expressly set forth herein as surviving termination), and the Escrow Agent shall deliver the entire Deposit to Buyer, and Buyer shall recover from Seller all of Buyer's reasonable out-of-pocket expenses incurred to the date of such termination.

15. Litigation and Attorneys' Fees. In the event it shall be necessary for either party to this Contract to bring suit to enforce any provision hereof or for damages on account of any breach of this Contract, then the prevailing party in such suit shall be entitled to recover from the other party its attorney fees and costs in any such litigation and any appeals therefrom.

16. Time of Essence. It is expressly agreed by the parties hereto that time is of the essence of this Contract and in the performance of all conditions, covenants, requirements, obligations and warranties to be performed or satisfied by either party hereto. Waiver of performance or satisfaction of timely performance or satisfaction of any condition, covenant, requirement, obligation or warranty by one party shall not be deemed to be a waiver of the performance or satisfaction of any other condition, covenant, requirement, obligation or warranty unless specifically consented to in writing. Whenever a date specified herein shall fall on a Saturday, Sunday or legal holiday, the date shall be extended to the next business day.

17. Captions and Paragraph Headings. Captions and paragraph headings contained in this Contract are for convenience and reference only and in no way define, describe, extend or limit the scope or content of this Contract nor the intent of any provision hereof.

18. Notices. Any notice or other communication permitted or required to be given hereunder by one party to the other shall be in writing and shall be either (i) hand delivered, (ii) sent by Federal Express or other overnight delivery service, or (iii) sent by email, to the party entitled or required to receive the same at the address specified below or at such other address as may hereafter be designated in writing by any such party, provided that email notice is permitted as an accommodation only and must be followed immediately by other permitted delivery method hereunder.

The respective attorneys for Seller and Buyer are authorized to give notices with the same force and effect as if given by the parties.

19. Governing Law and Binding Effect. This Contract and the interpretation and enforcement of the same shall be governed by and construed in accordance with the laws of the State of Maine and shall be binding upon, inure to the benefit of, and be enforceable by the parties hereto as well as their respective successors, heirs, executors, personal representatives, agents, and assigns.

20. Integrated Contract, Waiver and Modification. This Contract represents the complete and entire understanding and agreement between and among the parties hereto with regard to all matters involved in the purchase and sale transaction contemplated in this Contract and supersedes any and all prior or contemporaneous agreements, whether written or oral. No covenants, agreements, terms, provisions, warranties, statements, representations or undertakings, whether written or oral, made or executed by any party hereto shall be binding on any party hereto, unless specifically set forth or incorporated in this Contract. This Contract may not be modified or amended, nor may any covenant, agreement, condition, requirement, provision, warranty or obligation contained herein be waived, except in writing signed by all parties, or in the event that such modification, amendment or waiver is for the benefit of one or more of the parties hereto and to the detriment of the other or others, then the same must be in writing signed by that party or those parties hereto to whose detriment such modification, amendment or waiver inures.

21. Brokerage. Seller and Buyer hereby acknowledge, represent and warrant to each other that, other than The Boulos Company, who shall be paid by Buyer at Closing pursuant to a separate agreement or agreements, no broker or finder has been employed by either Seller or Buyer in connection with the sale and purchase transaction contemplated in this Contract and that no commission, finder's fee or similar remuneration, by whatever name, is payable by Seller or Buyer or due to any broker or finder in connection with this Contract or the sale and purchase transaction contemplated herein. Seller and Buyer each, respectively, hereby agree to indemnify, defend, save and hold the other harmless from and against the payment of any commissions or fees or claims for commissions or fees as a result of any actions taken or agreements, respectively, made by them with respect to the sale and purchase transaction contemplated in this Contract. The provisions of this Paragraph shall expressly survive any closing or closings hereunder or the termination of this Contract for any reason.

22. Assignment. This Agreement is not assignable by Seller except for the purpose of a like-kind exchange. Buyer shall be entitled to assign its right, title and interest herein to any limited liability company, corporation, partnership or other entity, whether now existing or

hereafter formed, controlled by, controlling or under common control with Buyer (each an "Affiliate"), provided that Redfern Properties, LLC shall remain liable for all obligations of Buyer under this Agreement regardless of any such assignment.

23. Non-Disclosure. Subject at all time to the rights of the parties as set forth in this Contract, unless and until the transaction contemplated hereby is closed, Buyer and Seller shall make no public announcements regarding the terms of this transaction. In any event, Buyer and Seller shall hold all proprietary information obtained by them with respect to each other or the Subject Property in strict confidence and shall not disclose such information to any other person or entity except to the extent necessary to consummate the transaction contemplated hereby.

24. Condemnation. In the event the Subject Property or any material portion or portions thereof shall be taken or condemned or be the subject of a bona fide written threat of condemnation by any governmental authorities or other entity prior to the closing, then the Buyer shall have the option of either (a) terminating this Contract by giving written notice thereof to the Seller, whereupon the Earnest Money Deposit shall be immediately refunded to the Buyer, and this Contract and all rights and obligations created hereunder shall be null and void and of no further force and effect, except as otherwise specified herein, or (b) requiring the Seller to convey the remaining portion or portions of the Subject Property to the Buyer pursuant to the terms and provisions hereof and to transfer and assign to the Buyer at the closing all of the right, title and interest of the Seller in and to any award made or to be made by reason of such condemnation, less amounts expended by Seller in connection therewith prior to such time. The Seller and the Buyer hereby further agree that the Buyer shall have the right to be present in all negotiations with any governmental authorities relating to the Subject Property and to be apprised of the compensation to be paid for any portion or portions thereof condemned by such governmental authorities or other entity.

25. Casualty. Seller will promptly upon receiving actual notice of a casualty, notify Buyer of any fire or other casualty affecting the Subject Property between the date hereof and the Closing. Unless otherwise mutually agreed in writing by Buyer and Seller, as soon as reasonably possible thereafter, subject to Seller's actual receipt of the proceeds, and subject in any event to the terms of any existing mortgage on the Real Property, Seller will commence any necessary repairs as a result of such fire or other casualty, and will provide Buyer with current information concerning insurance coverage therefor (the "Casualty Notice"). Buyer will have the right to terminate this Contract by written notice to Seller within fifteen (15) days following receipt of the Casualty Notice. If Buyer so terminates this Contract then, notwithstanding any provision of this Contract to the contrary, the entire Deposit, other than the portion of the Deposit that has become non-refundable, will be returned to Buyer, and the parties will have no further obligations or liabilities hereunder, except as otherwise expressly provided herein. If Buyer elects not to terminate this Contract, the purchase contemplated herein will be consummated without reduction of the Purchase Price within the later of ten (10) days after the expiration of such fifteen (15) day period or on the Closing Date specified herein, in which event the insurance proceeds will be used for such repairs, to the extent necessary, and Seller will assign transfer and set over to Buyer all of Seller's right, title and interest in and to such insurance proceeds less any amounts actually expended by Seller towards the repair or restoration prior to the date thereof, and Buyer shall receive a credit at Closing in an amount equal to the amount of the insurance deductible under Seller's insurance policy.

26. Execution in Counterparts. This Contract may be executed in counterparts, each of which shall be deemed an original and all such counterparts together shall be deemed to constitute an original instrument. Electronic signatures shall be afforded the full force and effect of original ink signatures.

27. Exchange. At either party's request, the other party shall cooperate to structure the sale of the Subject Property as a tax-deferred exchange under Section 1031 of the Internal Revenue Code, provided that: (a) the requesting party shall reimburse the other party for all resultant additional expenses it pays or incurs, (b) the other party shall not be obligated to take title to any property other than the Subject Property for any period of time, (c) the other party shall not be obligated to execute any notes or mortgages or to incur any liabilities as a result of participating in the exchange, (d) the Closing is not delayed beyond the Closing Date, and (e) the requesting party shall indemnify, defend and hold harmless the other party against claims, costs, loss, or liability arising from or related to the exchange.

[*Signatures appear on following page.*]

IN WITNESS WHEREOF, the parties have caused these presents to be executed as of the day and year first above written.

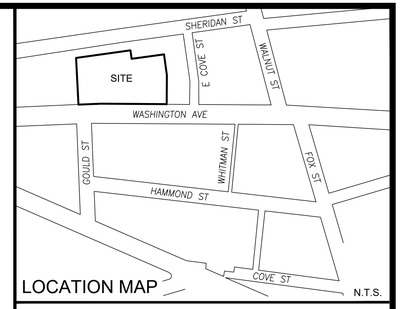
POSSIBLE ENCROACHMENTS



1. STOCKADE FENCE FROM CURRAN
2. SHED FROM CURRAN
3. CONCRETE WALL FROM MUNJOY HEIGHTS CONDO
4. PVC PIPES AND CRUSHED STONE FROM MUNJOY HEIGHTS CONDO
5. BUILDING FROM HIGH PEAKS, LLC, EAVES NOT SHOWN
6. OVERHEAD WIRES – CMP TO CURRAN

UTILITY NOTE

THE UNDERGROUND UTILITIES SHOWN HAVE BEEN LOCATED FROM FIELD SURVEY INFORMATION AND EXISTING DRAWINGS. THE SURVEYOR MAKES NO GUARANTEES THAT THE UNDERGROUND UTILITIES SHOWN COMPRISE ALL SUCH UTILITIES IN THE AREA, EITHER IN SERVICE OR ABANDONED. THE SURVEYOR FURTHER DOES NOT WARRANT THAT THE UNDERGROUND UTILITIES SHOWN ARE IN THE EXACT LOCATION INDICATED ALTHOUGH HE DOES CERTIFY THAT THEY ARE LOCATED AS ACCURATELY AS POSSIBLE FROM INFORMATION AVAILABLE. THE SURVEY HAS NOT PHYSICALLY LOCATION THE UNDERGROUND UTILITIES. CALL 1-888-DIGSAFE AT LEAST THREE BUSINESS DAYS BEFORE PERFORMING ANY CONSTRUCTION. DUE TO OSHA CONFINED SPACE REQUIREMENTS, ALL INVERTS AND PIPE SIZES MUST BE VERIFIED PRIOR TO ANY CONSTRUCTION.

7. "PLAN OF PROPERTY OF W.H. BAXTER ESQ. BY ANDERSON BONNELL & CO. JULY 1866" RECORDED IN PLAN BOOK 2, PAGE 56.

GENERAL NOTES

1. OWNER OF RECORD: RAYMOND H. AND ALINA WATERHOUSE, 105 PARTRIDGE CIRCLE, PORTLAND, ME; CUMBERLAND COUNTY REGISTRY OF DEEDS BOOK 25470, PAGE 272.
2. LOCUS IS SHOWN AT LOT 1 IN BLOCK D ON PORTLAND PROPERTY MAP 10.
3. BEARINGS ARE GRID NORTH AS BASED ON CITY MONUMENTS L749-78-3002, CORNER WASHINGTON AVENUE AND NORTH SIDE OF WALNUT STREET, AND T112-18-107, CORNER EAST SIDE OF NORTH STREET AND NORTH SIDE OF WALNUT STREET, AS SURVEYED BY THIS FIRM IN 2014. THESE ARE THE SAME TWO MONUMENTS USED FOR PLAN REFERENCE 2 IN 2013. BOTH OF THESE MONUMENTS HAVE BEEN MOVED OR DISTURBED, APPARENTLY DURING SIDEWALK RECONSTRUCTION SINCE 2014.
4. ELEVATIONS ARE CITY DATUM AS BASED ON PK IN POLE #11, CORNER ANDERSON AND EVERETT STREETS, ELEVATION 12.42 CITY LEVEL BOOK 737, PAGE 77.
5. LINES ALONG CURRAN, HIGH PEAKS, LLC, AND A PORTION OF MUNJOY HEIGHTS CONDO ARE BASED ON DIMENSIONS SHOWN ON PLAN REFERENCE 7.
6. THE EXACT STATUS OF SHERIDAN STREET, FORMERLY KNOWN AS POPLAR STREET, HAS NOT BEEN DETERMINED. IT IS PRESUMED TO HAVE BEEN VACATED AND OWNERSHIP MAY EXTEND TO THE CENTER OF THE PAPER STREET. THE WESTERLY LINE OF SHERIDAN HEREON IS THE SAME AS SHOWN ON PLAN REFERENCE 2. THIS MATCHES REASONABLY WELL WITH THE LINE OF SHERIDAN STREET AS SHOWN ON PLAN REFERENCE 5 BUT NOT WITH THE LINE ON PLAN REFERENCE 4. THIS STREET WAS ORIGINALLY SHOWN ON PLAN REFERENCE 3 IN 1802 WHICH PLAN IS VERY DIFFICULT TO RECREATE.
7. THE SKETCH IN DEED BOOK 31302, PAGE 177, FROM WATERHOUSE TO REDFERN MUNJOY, LLC, DOES NOT INDICATE A JOG IN THE CURRENT EAST LINE OF WATERHOUSE. THE SOUTH SIDE OF THE ORIGINAL WATERHOUSE LAND, ON THE WEST SIDE OF SHERIDAN STREET, ON PLAN REFERENCE 4 HAS A DISTANCE OF 33.47 FEET. THE SAME LINE ON THE RECENT SKETCH HAS A DISTANCE OF 30.00 FEET. THIS SURVEYOR BELIEVES THAT THE LINE OF SHERIDAN STREET ON PLAN REFERENCE 4 IS NOT ACCURATE. A BOUNDARY AGREEMENT WITH MUNJOY HEIGHTS CONDO WOULD RESOLVE ANY CONFLICT.
8. UNDERGROUND UTILITIES MARKED BY PROMARK UTILITY LOCATING, INC. SEWER PIPE SIZES AND MATERIALS FROM CITY GIS.

CERTIFICATE

OWEN HASKELL, INC. HEREBY CERTIFIES THAT THIS PLAN IS BASED ON, AND THE RESULT OF, AN ON THE GROUND FIELD SURVEY AND THAT TO THE BEST OF OUR KNOWLEDGE, INFORMATION AND BELIEF, IT CONFORMS TO THE BOARD OF LICENSURE FOR PROFESSIONAL LAND SURVEYORS CURRENT STANDARDS OF PRACTICE.

Preliminary Transportation Demand Management Plan (TDM)

Prepared For: **Redfern Properties LLC.**

Project: **165 Washington Avenue**
Portland Maine
Proposed Multi-Family & Commercial Space Mixed Use Building

Prepared By: **Barton & Loguidice. LLC.**
383 US Route 1
Suite E, Box 4
Scarborough, Maine, 04074

Traffic Demand Management (TDM) 14-14.6.1 (E)

The following types of development shall design and implement a Transportation Demand Management (TDM) plan:

a. All major site plan triggering development in the B-7 zone.

b. All commercial, institutional, or mixed-use developments of 50,000 square feet or more total floor area.

c. All commercial or institutional uses designed to accommodate 100 or more employees or, for educational institutions, 100 or more students.

The TDM Plan shall comply with the transportation systems and street design standards of the Technical Manual.

A Traffic Demand Management Plan is enclosed.

Transportation Narrative

The proposed project by Redfern Properties LLC, will be a construction of a mixed-use residential and commercial building on the 1.31-acre parcel addressed 165 Washington Avenue in the City of Portland. Of the total acreage, 1.31 acres are developable. The project will construct a 7-floor multi-use building with 326 apartment units, and 1,800sf of retail space on the ground level. Access to the site is provided via a single driveway entrance, which intersects with the eastern side of Washington Avenue 120 feet north of East Cove Street.

The project will provide storage for 163 bicycles and 11 vehicle parking spaces, 2 of which will be signed and striped as handicapped.

Redfern Properties LLC, is a part of the Portland community and has developed several projects within the city, and as such is committed to the City's goals of reducing single occupancy vehicle usage and encouraging and providing opportunities, programs and infrastructure to promote use of other modes of transportation.

Existing

The existing development parcel is occupied by a vacant facility, which formerly housed Northern Burner Supply, a wholesale distributor of heating and electrical supplies. Access to the existing site is provided by two driveway entrances, which intersect with the eastern side of Washington Avenue, both of which will be removed with the development of the project.

Proposed

The proposed will construct a 7-floor multi-use building with 326 apartment units, and 1,800sf of retail space (potential restaurant / market use) on the ground level. Access to the site is provided via a single driveway entrance, which intersects with the eastern side of Washington Avenue, 120 feet north of East Cove Street.

The project will provide eleven (11) vehicle surface parking spaces on-site, two (2) of which will be signed and striped as handicapped and are ADA Van Accessible. The project will also provide two (2) EV charging stations, which will include one of the ADA parking spaces. In addition, at least three (3) parking spaces will be EV ready for potential future use.

Internal and external to the building, one hundred and sixty-three (163) bike racks are provided.

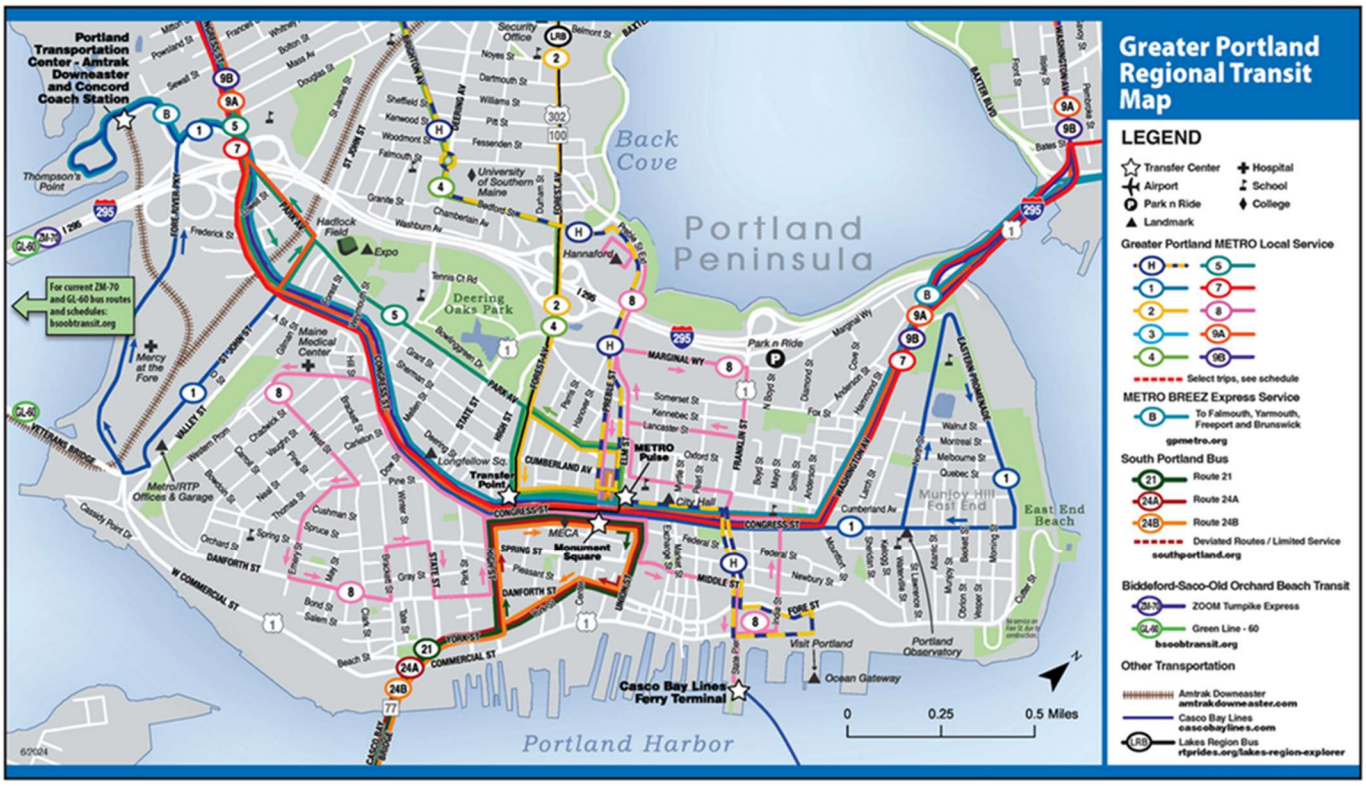
Area / Neighborhood Existing Conditions

The City of Portland has made investments in this area of Portland in recent years. These investments have made the neighborhoods surrounding the proposed development a more welcoming community to other modes of traffic especially pedestrian and bicycle traffic, and has made efforts to provide more complete streets with traffic calming elements to assist with slowing motorized modes of transportation. Recently a project was completed which replaced and widened (in some places) brick sidewalks, added new granite curbing, better defined parking zones on Washington Avenue, narrowed the road in several places, added curb extensions, and removed traffic signals that were not warranted on Washington Avenue at the intersections with Congress Street and Cumberland Avenue.

This area of Portland is known for its many and various restaurants shops and other retail establishments.

Site Access

The location of the project site on Washington Avenue gives vehicular traffic access to regional routes in and out of the greater Portland area as well as to local destinations within Portland. Access to the north on Interstate 295 is provided by heading northbound on Washington Avenue approximately 1,000 ft., which leads directly onto I-295 North.



Access to I-295 southbound from the site is provided via Franklin Street, which has access from Washington Avenue using several alternative connecting streets such as Fox Street, Cumberland Avenue and Congress Street.

Access to other local City destinations such as the Eastern Promenade, Old Port, Downtown District, and the City's Transportation Center are also easily access from this neighborhood utilizing Congress Street, Cumberland Avenue, Franklin Street and the Eastern Promenade roadway which intersections Washington Avenue approximately 500 ft. north of our project site.

Transit Access / Connections

This area of Portland and Washington Avenue are well served by public transit. Washington Avenue is currently served by three routes of the Greater Portland Metro routes, 7, 9A, and 9B. In addition, the "B" line of the Metro Breez serves Washington Avenue.

See Transit Route Map below.

Effective June 16, 2024

Further details of the routes are included below:

Metro Route 7 - Provides transportation between Falmouth, Downtown Portland, and the Portland Jetport, DHHS, and Outer Congress Street.

Metro Route 9 (9B & 9B) – Provides the following routes

- Route 9A travels in a clockwise direction from downtown Portland to North Deering.
- Route 9B travels in a counterclockwise direction along the same route.
- Service to all three Portland Public High Schools, Congress Street locations, Westgate, PTC, Stevens Ave, Northgate, West Falmouth, Washington Avenue, and Eastern Prom/Munjoy Hill.

Metro Breez – The Metro Breez provides a route which runs between the Portland Transportation Center, and then to Falmouth, Yarmouth, Freeport and Brunswick, via Fore River Parkway, Congress Street, Washington Avenue and I-295.

These routes also provide access to Transfer Centers along Congress Street at Elm Street (Downtown Transportation Center), Monument Square, and at Forest Avenue, as well as access to the Portland Transportation Center, which provides access to the Downeaster train and Concord Trailways Regional/National Bus service. These Transfer Centers also provide access to the other Metro routes, Metro Pulse, at Elm Street (Downtown Transportation Center), the hub for METRO where bus routes, #2, #4, #5, #7, and the Husky Line begin and end their routes. METRO bus routes #1, #8, and the Biddeford Saco Old Orchard Beach (BSOOB) Transit 60 Green line can be accessed along Congress Street. South Portland Bus routes 21, 24A, and 24B can be accessed along Congress Street. METRO bus route 8 is located along Cumberland Avenue.

See additional detail of Transit Routes in the Metro graphic below.

TDM Coordinator

This development has designated Haynes Johnston, Director of Development, Redfern Properties LLC, to initially serve as the TDM Coordinator. His contact info is:

Haynes Johnston
Redfern Properties LLC.
P.O. Box 8816
Portland, Maine 04104
haynes@redfernproerties.com

Mr. Johnston will actively promote and educate on alternative forms of transportation for both residents and employees. As the Coordinator, he will be responsible for monitoring and updating the TDM Plan. At some point after a property management firm is in place to manage the property for Redfern Properties LLC., Haynes Johnston will designate a staff member from the property management firm to assume the role of TDM Coordinator. When this happens the TDM plan will be updated and a copy submitted to the City. Mr. Johnston will assist the new TDM Coordinator during the transition to both maintain the effectiveness of the plans and to update the new Coordinator on status of existing TDM programs and current initiatives.

Resident, Customer & Employee Survey

The TDM Plan will include a transportation survey prior to implementation and on an annual basis. The survey will consist of questions to gain an understanding of resident/employee commuting means and effectiveness of the TDM strategies. The survey will include questions such as:

1. Vehicle ownership and parking location
2. Mode of transportation (car, bus, walking, taxi/rideshare, bicycle, etc.) to travel to and from the apartment complex.
3. Reason for selected transportation mode
4. Ease of use of selected transportation mode
5. Concerns with using other transportation modes
6. Barriers to vehicle trip reductions such as transit ridership and bicycle use
7. Use of personal vehicles
8. Interest in carpooling to share in transportation expenses.

This survey will be conducted annually for residents of the apartments and employees of the restaurant and will be electronically tabulated. This information will be used to develop specific strategies and adjust the TDM plan as needed.

Parking and Trip Reduction Targets

Trip Generation

As part of the Applicant's traffic study for this development, trip generation was calculated using the ITE Trip Generation Manual 11th Edition. See summary tables below for the expected trip generation. Trip generation for the proposed 326 apartment units and 1,800sf of commercial spaces was determined based on the trip generation rates provided in the 11th edition of the Institute of Transportation Engineers (ITE) *Trip Generation Manual*. The ITE Manual provides numerous land use codes (LUC) and the average volume of site generated trips produced by each category.

Trip generation calculations for the 326 apartment units were prepared using *LUC #221—Multi-Family Housing (Mid-Rise)*, which ITE describes as "*apartments and condominiums located in a building that has between four and 10 floors of living space. Access to individual dwelling units is through an outside building entrance, a lobby, elevator, and set of hallways.*"

Trip generation calculations for the 1,800sf of commercial spaces were prepared using *LUC #932 – High-Turnover (Sit-Down)* *Restaurant*, defined by ITE as "*full-service eating establishments with a typical duration of stay of 60 minutes or less. This restaurant is usually moderately priced, frequently belongs to a restaurant chain, and is commonly referred to as casual dining. Generally the restaurants serve lunch and dinner; they may also be open for breakfast and are sometimes open 24 hours a day.*"

In the *Trip Generation Manual*, for LUC #221 and LUC #932, ITE provides the *Average* trip generation rate, and the *Fitted Curve* trip generation rate. MaineDOT guidelines state that when $R^2 \geq 0.80$, the *Fitted Curve* trip generation rate shall be used. The trip generation calculations for the apartment units and commercial space are provided below in Table 1.1 and Table 1.2:

Table 1.1
ITE Trip Generation Calculations (Dense Multi-Use Urban)

Land Use	Multifamily Housing (Mid-Rise) Not Close to Rail Transit - LUC 221						
Time Period	**Dwelling Units (X)**	**R^2**	**Fitted Curve Equation/ Avg. Rate**	**Trips Generated (T)**	**Distribution Entering / Exiting**	**Enter**	**Exit**
Weekday	326	n/a	2.93	955	50% / 50%	478	477
AM Weekday Peak Hour (Street)	326	0.96	T = 0.25(X) + 5.35	87	15% / 85%	13	74
PM Weekday Peak Hour (Street)	326	0.97	T = 0.29(X) - 6.26	88	73% / 27%	64	24
AM Weekday Peak Hour (Generator)	326	0.69	0.23	75	17% / 83%	13	62
PM Weekday Peak Hour (Generator)	326	0.78	0.24	78	63% / 37%	49	29
Saturday Peak Hour*	326	n/a	0.27	88	50% / 50%	44	44

*ITE does not provide trip distribution for Saturday peak hour. Assumed to be 50/50.

Table 1.2
ITE Trip Generation Calculations (General Urban/Suburban)

Land Use	High-Turnover (Sit-Down) Restaurant - LUC 932					
Time Period	**Sq. Footage (1k)**	**Avg. Trip Generation Rate (Trips Per 1k Sf)**	**Trips Generated**	**Distribution Entering / Exiting**	**Enter**	**Exit**
Weekday	1.8	107.20	193	50% / 50%	97	96
AM Weekday Peak Hour (Street)	1.8	9.57	18	55% / 45%	10	8
PM Weekday Peak Hour (Street)	1.8	9.05	17	61% / 39%	11	6
AM Weekday Peak Hour (Generator)	1.8	13.68	25	57% / 43%	15	10
PM Weekday Peak Hour (Generator)	1.8	16.35	30	51% / 49%	16	14
Saturday Peak Hour	1.8	11.19	21	51% / 49%	11	10

Summarizing the trip generation calculations shown in the preceding tables, Table 1.3, following, provides the trip generation calculations for the proposed development:

Table 1.3
ITE Trip Generation Summary

Time Period	Total Trips	Enter	Exit
Weekday	1148	575	573
AM Weekday Peak Hour (Street)	105	23	82
PM Weekday Peak Hour (Street)	105	75	30
AM Weekday Peak Hour (Generator)	100	28	72
PM Weekday Peak Hour (Generator)	108	65	43
Saturday Peak Hour	109	55	54

The preceding table shows that the proposed multi-use building is expected to generate 105 trips during the AM peak hour of the adjacent street, and 105 trips during the PM peak hour of the adjacent street. During the peak hours of the generator, the site is expected to produce 100 trips in the AM and 108 trips in the PM. During the Saturday peak hour, the development is expected to generate 109 trips.

Net New Trips

MaineDOT Traffic Movement Permit Regulations allow trip generation credits to be taken for on-site uses that are displaced by the development of a site which were operational within the past 10 years. Within the past 10 years, the site was occupied by Northern Burner Supply Company, a heating and air conditioning/HVAC wholesale distributer store. The development was located in a 9,500sf building, which will be removed with the development of the project. The trip generation estimates for Northern Burner Supply Co., which were prepared using ITE's LUC #110 – General Light Industrial, are provided below in Table 1.4:

Table 1.4
ITE Trip Generation Calculations (General Urban /Suburban)

Land Use	General Light Industrial - LUC 110					
Time Period	**Sq. Footage (1k)**	**Avg. Trip Generation Rate (Trips Per 1k Sf)**	**Trips Generated**	**Distribution Entering / Exiting**	**Enter**	**Exit**
Weekday	9.5	4.87	46	50% / 50%	23	23
AM Weekday Peak Hour (Street)	9.5	0.74	7	88% / 12%	6	1
PM Weekday Peak Hour (Street)	9.5	0.65	6	14% / 86%	1	5
AM Weekday Peak Hour (Generator)	9.5	0.91	9	87% / 13%	8	1
PM Weekday Peak Hour (Generator)	9.5	0.80	8	18% / 82%	1	7
Saturday Peak Hour		Closed				

Table 1.4 shows that the site's prior use generated 7 trips during the AM peak hour of the adjacent street and 6 trips during the PM peak hour of the adjacent street. During the AM and PM peak hours of the generator, the site produced 9 trips and 8 trips, respectively.

Taking credit for the site's prior use, Table 1.5, following, presents the net new site trip generation:

Table 1.5
Net New Trip Generation Calculations

Time Period	Proposed Trip Generation			Existing Trip Generation			Net New Trip Generation		
	Total	**Enter**	**Exit**	**Total**	**Enter**	**Exit**	**Total**	**Enter**	**Exit**
Weekday	1148	575	573	-46	-23	-23	1102	552	550
AM Weekday Peak Hour (Street)	105	23	82	-7	-6	-1	98	17	81
PM Weekday Peak Hour (Street)	105	75	30	-6	-1	-5	99	74	25
AM Weekday Peak Hour (Generator)	100	28	72	-9	-8	-1	91	20	71
PM Weekday Peak Hour (Generator)	108	65	43	-8	-1	-7	100	64	36
Saturday Peak Hour	109	55	54	0	0	0	109	55	54

The preceding table shows that the proposed multi-use building is expected to generate 98 net new trips during the AM peak hour of the adjacent street, and 99 net new trips during the PM peak hour of the adjacent street. During the peak hours of the generator, the site is expected to produce 91 net new trips in the AM and 100 net new trips in the PM. During the Saturday peak hour, the development is expected to generate 109 net new trips.

Trip Adjustments

It is assumed that a certain number of trips generated by the proposed apartment units will also visit the proposed restaurant located on the ground floor. We have calculated the internally captured (shared) trips for proposed developments using the approach recommended by the ITE *Trip Generation Handbook*, which recommends using the NCHRP Report 684 methodology. The NCHRP Report 684 determines the internally captured trips between office, retail, restaurant, cinema/entertainment, residential, and hotel land uses.

The NCHRP spreadsheets, *attached in Section A of the appendix*, have been prepared by inputting the net new trips generated by the proposed residential and restaurant uses. The outputs of the spreadsheets are summarized below in Table 1.6:

Table 1.6
NCHRP Report 684 Summary

Time Period	Internal Capture Percentages			External Vehicle Trips		
	Total	Enter	Exit	Total	Enter	Exit
AM Weekday Peak Hour (Street)	4%	12%	2%	94	15	79
PM Weekday Peak Hour (Street)	6%	4%	12%	93	71	22
Saturday Peak Hour	7%	7%	7%	101	51	50

Table 1.6 shows that with the internally captured trips accounted for, the site is expected to produce 94 net new trips in the AM peak hour, 93 net new trips in the PM peak hour, and 101 net new trips in the PM peak hour.

Expected Parking Generation

It should be noted that based on City Ordinance, on-site parking is not required to be provided. However, as part of this TDM Plan, we are estimating parking demand based on the two proposed uses of the site. The uses included 326 units of mid-rise multifamily housing, LUC 221, and a ground level high turnover restaurant, LUC 932. Based on the Institute of Transportation Engineers (ITE) Parking Generation Manual, 5th Edition, we have estimated parking demand for the proposed development.

For LUC 221, we have used the best-fit curve equation (as the $R^2 > 0.80$) for the Dense Multi-Use Urban condition, which is $P = 1.04(X) – 15.22$, with 326 units this corresponds to 324.9 spaces.

For LUC 932, we have used the average rate for a weekday because there was no best-fit equation provided. With the average weekday rate of 6.47 Parking Spaces per 1000 sf of LUC 932, this equates to 11.6 spaces.

However, with this type of development being more of a transit-oriented development in an area of Portland that is heavily serviced by transit services with connections to other transit services it is expected that this development will not as heavily rely on single occupancy vehicles by its residents. In addition, the existing pedestrian and bicycle infrastructure on this area of Washington Avenue will encourage bicycle and pedestrian activity for local and neighborhood trips.

Parking & Trip Rate Reduction Targets

It has been shown that typical reduction rates of up to 10% can be reasonably achieved through implementation of an effective TDM plan. The start of implementing this effective TDM plan will be a thorough initial survey period, gaining information of travel mode splits, and making observations during this time of travel patterns to and from the residential and restaurant portions of the development.

Customize Parking and Trip Reduction Strategies

The strategy to reduce parking and trip demand will be aimed at residents and staff. Resident and staff strategies will seek to reduce employee vehicle trips to the site, especially during normal peak traffic hours. Ridesharing will be coordinated and promoted amongst staff. Information regarding the Metro, Metro Breez, South Portland and the Biddeford, Saco and Old Orchard Beach Transit Service, and a program to discount passes will be made available to residents and staff. As mentioned above bicycle parking will also be provided inside of the building with additional bike racks outside to encourage bicycle commuting.

For residents, strategies will focus on both initially travelling to and from the building for work and pleasure trips, especially those within the greater Portland area. Information will be provided and readily available regarding desirable walking routes to transit and nearby attractions, such as restaurants and shops and other nearby destinations such as the Eastern Promenade and the Old Port.

Education

Transit Maps and Schedules:

The METRO has six (6) bus stops on Washington Avenue with two in close proximity to this project (less than 300 ft north and south). As discussed above there are three Metros line and one Metro Breez line that run on Washington Avenue, which have connections to other transfer centers. Information on routes, schedules, and payment methods for buses will be available for residents via a kiosk and bulletin board in the building lobby. Information will also be posted on the services available at the Portland Transportation Center, which include the Amtrak Downeaster and Concord Coach Bus Lines for intercity and regional service.

Suggestions for the most convenient pedestrian routes to relevant local bus stops will be made available. All intersection crossings along the route have crosswalks and include pedestrian signals at signalized intersections. There is a crosswalk with an RRFB where the Eastern Promenade intersects Washington Avenue and a midblock crosswalk at this site's frontage on Washington Avenue.

Resident and employee orientation will include information related to discount programs for the Metro, Metro Breez, South Portland Bus Service, and Biddeford/Saco/Old Orchard Beach Bus service.

Ridesharing:

The TDM Coordinator will actively promote and coordinate ridesharing amongst residents and employees. This will be done through bulletin boards in the lobby and employee areas, and

employee email lists. Residents and employees who actively rideshare/carpool will be recognized for their efforts on newsletter announcements and/or bulletin board postings in the employee areas.

Monitoring

The TDM Plan will be monitored over time to determine its ongoing effectiveness. The TDM Coordinator will be responsible for this monitoring and making changes as necessary to better meet the TDM goals.

After an initial startup period, the Applicant, through the TDM Coordinator, will submit a status report to the City of Portland containing the following information:

- Occupancy figures for the multifamily housing
- Vehicle ownership of tenants
- Usage / Transaction data for the restaurant use
- Summary and analysis of completed TDM Surveys
- Usage data for TDM programs initiated
- Mode Split by trip type
- Suggestions for improvements to bicycle, pedestrian and transit infrastructure.
- Comparison to previous surveys (after initial survey)
- Proposed changes to TDM Plan (Education, Infrastructure, and Incentive) after each subsequent survey
- Updated TDM usage data from year to year and noted updated programs.

The development may not be at or near full occupancy at opening, an annual report will be filed with the City, however, it will be important to note how the TDM plan is functioning and how effective it is as the project nears full capacity.

Project Specific Standards

Infrastructure

The following onsite infrastructure improvements are currently proposed:

- Bicycle parking racks will be located within the first floor and exterior to the building. Number of spaces (163 total) will meet minimum according to Article 14 of the Land Use Code.
- A TDM kiosk will be provided in the main lobby area of the building, nearby transit stops will be one of thing items noted, there are currently bust stop location north and south for the project on Washington Avenue, both less than.
- A bulletin board or monitor will be provided in the lobby area of the building and one will be provided in the employee area. The employee and public information areas will contain the relevant information to each. The TDM Coordinator will be responsible for keeping material current and available.
- An option for a Monitor in the lobby will be further investigated, for implementing real-time tracking of buses along their routes on Washington Avenue and other adjacent areas of the City.
- Reconstruction of brick sidewalks and granite curbs per the City Technical Standards, as well as adding street lighting long the projects frontage along Washington Avenue.

- Improvements to the existing mid-block crossing along the site's frontage on Washington Avenue, which will include a new ramp and detectable warning field and restriping a bar type crosswalk per City Technical Standards.

Incentives

The following incentives will be provided to residents and employees to encourage their active participation in the TDM plan:

A. Effective Parking "Cash Out": With no parking provided on-site or included in the rent, tenants will be provided with a choice as to whether to pay for a parking space off site. Those who choose not to own their own vehicle will be able to reduce their housing costs through this decoupling of parking cost and rent.

B. Transit Incentives: Research has shown that moving into a new home is a chance for residents to try new transportation options. In order to make sure that new tenants are aware of, and have incentives to try, transit, Redfern will provide new tenants with a $30 credit on the DiriGo app. That app can be used for trips on METRO, BSOOB Transit and/or South Portland Bus Service. This loaded amount will make trying transit very easy and ensure that tenants have loaded the DiriGo app on their phones. This credit will be provided to new tenants for at least five years after building occupancy. Should tenants not own a phone, Redfern will provide them with a DiriGo Pass (formerly a DiriGo TouchPass) loaded with $30.

C. Car and Bike Sharing: While Portland currently does not have a car-sharing vendor, should one become available, Redfern commits to working with the City to provide a car-sharing vehicle nearby. Similarly, Redfern is interested in working with the City and any bike-sharing systems it may have, including assisting with sponsorship of some of the system.

D. Telecommuting: This building will be set-up and wired with the best internet access currently available in this location, to encourage telecommuting as a trip reduction strategy.

Conclusions

This preliminary TDM plan has been prepared in conjunction with Redfern Properties LLC, and will continue to be detailed during the Site Plan Approval process. We anticipate there will be comments from City staff and we look forward to working with the City to arrive at a TDM plan that best fits this type of development and its location within the City of Portland. To that end, this project is supportive of the City's goals of reducing single occupancy usage, increasing transit ridership and increasing pedestrian and bicycle activity.

Section 7

7A EXISTING & PROJECTED TRAFFIC VOLUMES

7A-1. Existing Traffic Volumes

Manual turning movement traffic counts were conducted at the signalized intersection of Washington Avenue at Fox Street/Walnut Street and the unsignalized intersection of Washington Avenue at Eastern Promenade on October 16, 2024, during the weekday AM and PM peak hours.

All vehicular traffic entering the study intersections was recorded in 15-minute intervals; the AM traffic data was recorded between 7:00 and 9:00 AM, and the PM traffic data was recorded between 3:00 and 6:00 PM. From a summary of the data, peak hour time periods were established for the *"peak"* commuter travel periods. At the intersection of Washington Avenue at Fox Street/Walnut Street, the AM peak hour begins at 7:45 AM, and the PM peak hour begins at 4:15 PM. At the intersection of Washington Avenue and Eastern Promenade, the AM peak hour begins at 7:30 AM, and the PM peak hour begins at 4:15 PM. The turning movement count reports are attached in *Section A of the appendix*.

The 2024 traffic volumes are illustrated in Figure 1, attached in *Section A of the appendix*.

7A-2. Seasonal Adjustments

Traffic data collected during the month of October requires a seasonal adjustment to reflect the "*peak*" travel conditions found during the summer months of July and August. MaineDOT provides Weekly Mean Factors for adjusting traffic volumes collected outside of the peak time periods.

MaineDOT utilizes highway classifications of I, II, or III for all State and Local roadways. MaineDOT's 2023 Count Book classifies Washington Avenue, Eastern Promenade, Walnut Street, and Fox Street as Group I roadways. **Group I** *roadways or urban roads are those which carry commuter traffic and exhibit little seasonal change in traffic volumes.* The Group I classification indicates that the roadways at the study intersections will experience minimal seasonal fluctuation.

In accordance with MaineDOT's 2023 Weekly Group Mean Factors, we have applied a seasonal adjustment factor of 1.046 to the traffic volumes recorded at both study intersections.

7A-3. Annual Adjustments

This traffic study has been prepared based on a projected build-out year of 2027. MaineDOT's traffic counts recorded on Washington Avenue southeast of Anderson Street show that traffic volumes on Washington Avenue have experienced negative annual growth between 2014 (AADT 5,623) and 2022 (AADT 4680). To be conservative in this study, we will apply a 1% annual growth rate to the recorded traffic volumes (factor of 1.0303).

Figure 3, attached in *Section A of the appendix*, depicts the 2027 design hour traffic volumes, including the seasonal and annual adjustments.

7A-4. Other Development Trips

Traffic generated by projects that have been approved by the Local Planning Board and/or the Maine Department of Transportation, yet are not opened, must be included in the estimate of pre-development traffic. The City of Portland has been consulted to identify any and all development projects whose trips may impact the study area. The City has identified 5 projects which may impact the study area:

- Roux Institute – 1 Bean Pot Circle
- St. Lawrence Performing Arts Center
- 70 Thames Street
- 385 Congress Street
- 58 Fore Street

Project and traffic information for each of the five identified projects is provided below:

Roux Institute
Traffic estimates prepared for the Roux Institute show that **18** AM peak hour trips and **21** PM peak hour trips will travel north on Washington Avenue to I-295, and **1** AM peak hour trip and **19** PM peak hour trips will travel from I-295 south on Washington Avenue.

St. Lawrence Performing Arts Center
Friends of St. Lawrence Church are proposing a 401-seat building expansion to the existing St. Lawrence Arts Center located at 76 Congress Street. Site trip assignments, prepared by Traffic Solutions in support of the proposed project, estimate **10** trips will travel directionally on Walnut Street to the proposed St. Lawrence Arts Center site from the Washington Avenue corridor in the "pre-event" peak hour, assumed to be the PM peak hour.

70 Thames Street is a 3-story mixed-use building composed of 43,730sf of office space, 2,00sf of retail space, and 8,315sf (300 seats) of restaurant space. Gorrill Palmer's traffic estimates show that the site produces **63 trips** in the AM peak hour and **129** trips in the PM peak hour. The approximate entry and exit trips, based on the data provided in ITE, are provided below:

AM Peak Hour:	**PM Peak Hour:**
Enter = 51	Enter = 56
Exit = 12	Exit = 73

385 Congress Street provides 156 hotel rooms and 9 residential condominiums. The TDM prepared for the project shows that the site will generate **49 trips** in the AM peak hour and **34 trips** in the PM peak hour. The trips are broken down into entry and exit trips below:

AM Peak Hour:	**PM Peak Hour:**
Enter = 19	Enter = 15
Exit = 30	Exit = 19

58 Fore Street is composed of a 128-room hotel, 43 condominium units, 4,928sf of retail space, 18,083sf of food & beverage, and a 19,697sf spa. Gorrill Palmer's traffic estimates show that the site is expected to generate **419 trips** in the AM peak hour and **565 trips** in the PM peak hour. The approximate entry and exit trips, which have been prepared based on the data provided in the TDM plan, are provided below:

AM Peak Hour:	**PM Peak Hour:**
Enter = 226	Enter = 283
Exit = 193	Exit = 282

7A-5. Other Development Site Trip Assignment

Traffic generated by the other development sites has been assigned through the study intersections following the existing traffic patterns and/or the assumptions listed below:

Roux Institute

The trips traveling north and south on Washington Avenue have been assigned through the study intersections following the traffic patterns illustrated in Figure 1. The Roux Institute's site trip assignment is provided in **Figure 4**, attached in *Section A of the appendix*.

St. Lawrence Performing Arts Center

The traffic figure, prepared by Traffic Solutions and *attached in Section A of the appendix*, shows that 10 trips will travel east, via Walnut Street, from Washington Avenue during the PM peak hour. We have assigned the trips through the study intersections following the traffic patterns illustrated in Figure 1. The St. Lawrence site trip assignment is depicted in **Figure 5**, attached in *Section A of the appendix*.

70 Thames Street & 58 Fore Street

Based on the roadway network adjacent to these sites and the easiest routes to I-295, we have assumed that 20% of the sites entering and exiting trips will travel through the intersection of Washington Avenue, Fox Street, and Walnut Street. We have then assigned them through the study intersections following the existing traffic patterns shown in Figure 1. The 70 Thames Street and 58 Fore Street other development site trip assignments are provided in **Figure 6** and **Figure 7**, respectively, attached in *Section A of the appendix*.

385 Congress Street

Based on the adjacent roadway network and the most convenient route to I-295, we have assumed that 10% of the sites entering and exiting trips will travel through the intersection of Washington Avenue, Fox Street, and Walnut Street. We have then assigned them through the study intersections following the existing traffic patterns shown in Figure 1. The 385 Congress Street site trip assignment is provided in **Figure 8**, attached in *Section A of the appendix*.

7A-6. 2027 Pre-Development Traffic

2027 pre-development traffic estimates, illustrated in **Figure 9** and *attached in Section A of the appendix*, have been prepared by combining the 2027 design hour traffic volumes shown in Figure 3 with the other development trips shown in Figures 4, 5, 6, 7, and 8.

7A-7. 2027 Post-Development Traffic

The 2027 post-development traffic volumes are provided in **Figure 10**, attached in *Section A of the appendix*. This figure has been prepared by combining the 2027 pre-development traffic volumes shown in Figure 9 with the site trip assignment shown in Figure 2.

7B Analysis

7B-1. Capacity Analysis

A capacity analysis of the 2027 pre- and post-development traffic conditions has been performed for the 3 identified study intersections listed below:

1. Washington Avenue @ Eastern Promenade
2. Washington Avenue @ Walnut Street/Fox Street

3. Washington Avenue @ Site Entrance

Within the capacity analysis, we review the level of service (LOS) for the vehicle movements at each of the study intersections. LOS is a measurement of the delay experienced by stopped vehicles at an intersection. LOS rankings are similar to the academic grading system, where an "A" is very good with little delay, and an "F" represents very poor conditions. The following chart presents the relationship between delay and LOS for signalized and unsignalized intersections.

Level of Service Criteria for Signalized Intersections		Level of Service Criteria for Unsignalized Intersections	
Level of Service	**Total Control Delay (sec/veh)**	**Level of Service**	**Total Control Delay (sec/veh)**
A	Up to 10.0	A	Up to 10.0
B	10.1 to 20.0	B	10.1 to 15.0
C	20.1 to 35.0	C	15.1 to 25.0
D	35.1 to 55.0	D	25.1 to 35.0
E	55.1 to 80.0	E	35.1 to 50.0
F	Greater Than 80.0	F	Greater Than 50.0

The capacity analysis was performed using Synchro 12 inputs and SimTraffic 12 reporting outputs. The results are based upon 7 SimTraffic runs, averaging 5 runs with the lowest and highest run removed. The SimTraffic reports are included in *Section B of the appendix.*

Table B1, following, summarizes the results of the capacity analysis completed for the AM and PM peak hours of the 2027 pre- and post-development conditions.

Table B2 Level of Service Summary								
Approach/Lane	2027 Pre-Development				2027 Post-Development

Overall	***-***	***n/a***	***-***	***n/a***	***2.4***	***A***	***2.2***	***A***

1. Washington Ave @ Fox St/Walnut St

The capacity analysis shows that the proposed development has minimal impact on the signalized intersection of Washington Avenue, Fox Street, and Walnut Street. In the pre-development and post-development peak hours, the level of delay at the intersection of Washington Avenue, Fox Street, and Walnut Street is expected to remain similar.

Overall, the intersection will continue to operate at LOS C in the AM and PM peak hours, with minor increases in the overall intersection delay.

2. Washington Ave @ Eastern Prom

The analysis shows that during the pre- and post-development peak hours, the Eastern Promenade approach will continue operating at LOS B, while the Washington Avenue approaches will remain at LOS A. Overall, the intersection is projected to operate at LOS A with very minor changes in LOS.

3. Washington Ave @ Site

At the site's intersection with Washington Avenue, the capacity analysis shows that Washington Avenue approaches will operate at LOS A while the site entrance will operate at LOS B in the AM peak hour and LOS A in the PM peak hour.

Overall, the intersection will operate at LOS A with an average delay of 2.4 seconds and 2.2 seconds in the AM and PM peak hours, respectively.

7B-2. Vehicle Queuing Analysis

In addition to outputting the vehicle delay, SimTraffic also provides vehicle queue reports, which show the expected average queue, 95th percentile queue, and maximum queue. For the 2027 pre- and post-development conditions, the 95th percentile vehicle queue results are summarized in Table B2, below, while the average and maximum vehicle queues are included in the SimTraffic reports provided in *Section B of the appendix*.

Table B2
95th Percentile Vehicle Queue Summary

Approach/Lane	Storage Length (ft.)	2027 Pre-Development		2027 Post-Development	
		AM Peak Hour	PM Peak Hour	AM Peak Hour	PM Peak Hour
		Queue Length (ft)	Queue Length (ft)	Queue Length (ft)	Queue Length (ft)
Washington Ave at Fox Street/Walnut Street					
Washington Ave - NB Left	30	54	57	55	61
Washington Ave - NB Thru/Right	n/a	164	307	162	347
Washington Ave - SB Left	30	37	57	40	54
Washington Ave - SB Thru/Right	n/a	327	229	373	134
Fox St - NE Left/Thru	n/a	114	184	124	114
Fox St - NE Right	90	77	91	88	38
Walnut St - Left/Thru	n/a	147	110	137	59
Walnut St - Right	40	79	70	81	32
Washington Ave at Eastern Prom					
Eastern Prom - WB Left/Right	n/a	108	97	125	98
Washington Ave - NB Thru/Right	n/a	5	5	7	-
Washington Ave - SB Left/Thru	n/a	142	161	133	150
Washington Ave at Site					
Site - WB Left/Right	n/a	-	-	70	47
Washington Ave - NB Thru/Right	n/a	-	-	-	7
Washington Ave - SB Left/Thru	n/a	-	-	67	71

1. Washington Ave @ Fox St/Walnut St

The vehicle queuing analysis shows the 30-foot Washington Avenue left-turn lanes are exceeded by 1-2 vehicle lengths (25’ per vehicle) in the pre-development and post-development peak hours.

2. Washington Ave @ Eastern Prom

The vehicle queuing analysis shows that the vehicle queues at the intersection of Washington Avenue and Eastern Promenade will remain similar in the pre- and post-development peak hours.

3. Washington Ave @ Site

At the site's intersection with Washington Avenue, the queuing analysis shows that vehicle queues of 67 and 65 feet are anticipated in the post-development AM and PM peak hours, respectively.

7B-3. Capacity Analysis Confirmation

To check the capacity analysis results completed for the intersection of Washington Avenue, Fox Street, and Walnut Street, and confirm that they are representative of traffic operations at the intersection, we have collected vehicle queuing data at the intersection within the AM and PM peak hour time periods.

The analysis was completed on February 4th and 5th, 2025. For the analysis, we recorded the maximum vehicle queue in each lane during each cycle of the traffic signal for 30 minutes during both the AM and PM peak hours. The results of the analysis are summarized in Table B4, and the vehicle queue count sheets are provided in *Section B of the appendix*.

Table B3
95th Percentile Vehicle Queue Summary

Approach/Lane	Storage Length (ft.)	2027 Pre-Development (SimTraffic)		2025 Pre-Development (Field Survey)	
		AM Peak Hour	PM Peak Hour	AM Peak Hour	PM Peak Hour
		Queue Length (ft)	Queue Length (ft)	Queue Length (ft)	Queue Length (ft)
Washington Ave at Fox Street/Walnut Street					
Washington Ave - NB Left	30	54	57	50	25
Washington Ave - NB Thru/Right	n/a	164	307	125	249
Washington Ave - SB Left	30	37	57	25	50
Washington Ave - SB Thru/Right	n/a	327	229	400	224
Fox St - NE Left/Thru	n/a	114	184	125	125
Fox St - NE Right	90	77	91	50	25
Walnut St - Left/Thru	n/a	147	110	95	148
Walnut St - Right	40	79	70	45	25

The results of the field survey show that the traffic operations observed at the signalized intersection are very similar to the results of the SimTraffic capacity analysis. Accordingly, it is our opinion that the capacity analysis prepared using Synchro and SimTraffic is representative of the pre- and post-development traffic operations at the intersection of Washington Avenue, Fox Street, and Walnut Street.

7B-4. ADA Compliance Review

During the Scoping Meeting, the City requested that pedestrian curb ramps within a ¼-mile radius of the site be evaluated for ADA compliance. In total, we reviewed approximately 43 intersection/midblock crosswalk locations consisting of approximately 114 pedestrian curb ramps.

The inventory of ADA-compliant and non-ADA-compliant pedestrian curb ramps is attached in *Section C of the appendix*. Also attached is a plan identifying each of the studied crosswalks/intersections and the individual ramp field note sheets, which include the ramp orientation, measurements, notes, etc.

As identified in the summary sheet, the majority of the evaluated curb ramps were not ADA-compliant. This was typically due to the ramp slopes and/or missing or non-compliant detectable warning fields (DWF).

7C Summary

7C-1. Capacity Analysis

A capacity of the 2027 pre- and post-development traffic conditions has been performed for the 3 identified study intersections: Washington Avenue @ Eastern Promenade, Washington Avenue @ Walnut Street/Fox Street, and Washington Avenue @ Site.

1. Washington Ave @ Fox St/Walnut St

The capacity analysis shows that the proposed development has minimal impact on the signalized intersection of Washington Avenue, Fox Street, and Walnut Street. In the pre-development and post-development peak hours, the level of delay at the intersection of Washington Avenue, Fox Street, and Walnut Street is expected to remain similar.

Overall, the intersection will continue to operate at LOS C in the AM and PM peak hours, with minor increases in the overall intersection delay.

2. Washington Ave @ Eastern Prom

The analysis shows that during the pre- and post-development peak hours, the Eastern Promenade approach will continue operating at LOS B, while the Washington Avenue approaches will remain at LOS A. Overall, the intersection is projected to operate at LOS A with very minor changes in LOS.

3. Washington Ave @ Site

At the site's intersection with Washington Avenue, the capacity analysis shows that Washington Avenue approaches will operate at LOS A while the site entrance will operate at LOS B in the AM peak hour and LOS A in the PM peak hour.

Overall, the intersection will operate at LOS A with an average delay of 2.4 seconds and 2.2 seconds in the AM and PM peak hours, respectively.

7C-2. Vehicle Queuing Analysis

A vehicle queueing analysis was completed for the 2027 pre- and post-development conditions at each of the three study intersections.

1. Washington Ave @ Fox St/Walnut St

The vehicle queuing analysis shows the 30-foot Washington Avenue left-turn lanes are exceeded by 1-2 vehicle lengths (25’ per vehicle) in the pre-development and post-development peak hours.

2. Washington Ave @ Eastern Prom

The vehicle queuing analysis shows that the vehicle queues at the intersection of Washington Avenue and Eastern Promenade will remain similar in the pre- and post-development peak hours.

3. Washington Ave @ Site

At the site's intersection with Washington Avenue, the queuing analysis shows that vehicle queues of 67 and 65 feet are anticipated in the post-development AM and PM peak hours, respectively.

City of Portland, Maine
389 Congress Street, 4th Floor
Portland, ME 04101

December 20th, 2024

Subject: 165 Washington Avenue – Major Site Plan Application neighborhood meeting certification

I, Peter Heil, hereby certify that a neighborhood meeting was held on December 19th, 2024 at East End Community Center Cafeteria – 195 North Street, Portland Maine, 04101 at 5:30 pm.

I also certify that on December 6th, 2024, invitations were mailed to the following:

1. All addresses on the mailing list provided by the Planning Division which includes property owners within 500 feet of the proposed development.
2. Residents on the "interested parties" list.

Sincerely,

Peter F. Heil, P.E.
Project Manager
Acorn Engineering, Inc.

Included with this certification are:

1. Copy of the invitation sent
2. Sign-in sheet
3. Meeting minutes

ACORN ENGINEERING, INC.

Dear Neighbor: December 6, 2024

On behalf of Redfern Properties, we are pleased to invite you to a neighborhood meeting to discuss the Major Site Plan Application for the proposed redevelopment of 165 Washington Avenue. The parcel is currently vacant and located within the B2b Neighborhood Business zoning district. The project proposes to construct a 7 floor multi-family apartment building with 326 dwelling units and a ground floor commercial space. The project will include additional internal residential amenity areas, two exterior courtyard amenity spaces, structured parking below the building, and various infrastructure upgrades.

A sign-in sheet will be circulated, and a record of the meeting will be taken. Both the sign-in sheet and record will be submitted to the Planning Board. If you have any questions, please call (207) 775-2655.

Meeting Location: East End Community School - Cafeteria
195 North Street, Portland, ME 04101

Meeting Date/Time: Thursday, December 19, 2024, at 5:30 p.m.

Under the City of Portland land use code, an applicant for a major site plan, master development plan, subdivision of over five lots, or zoning map amendment is required to hold a neighborhood meeting within 30 days of an application being deemed complete and no less than seven calendar days before a public hearing. Should you wish to offer additional comments on this proposed development, you may forward them by e-mail to planning@portlandmaine.gov or by mail to the Planning and Urban Development Department, Planning Division, 4th Floor, 389 Congress Street Portland, ME 04101

Major Site Plan Application

Neighborhood Meeting Minutes
December 19, 2024 / 5:30 pm
East End Community Center
195 North Street, Portland Maine, 04101

Project Team Attendees:

Jonathan Culley (JC): Applicant/Presenter (Redfern Properties)

Haynes Johnston (HJ): Applicant/Presenter (Redfern Properties)

Ryan Senatore (RS): Architect (Ryan Senatore Architecture)

Pete Heil (PH): Civil Engineer/Presenter (Acorn Engineering)

Zach Stevens (ZS): Civil Engineer/Note Taker (Acorn Engineering)

The meeting started at approximately 5:35 pm.

Presentation:

Jonathan Culley:

- Welcome to the Neighborhood Meeting
- Overview of Project and Renderings
- Project Overview:
  - The project is proposing a 7-story multi-family apartment building with 325 rooms and a ground floor commercial space.
- Introduction to Project Team
  - Holst Architecture
  - Ryan Senatore Architecture
  - Acorn Engineering
  - Soren Deniord Landscape Architecture
  - Summit Geoengineering
  - Structural Integrity
  - TRC
  - Barton & Loguidice
  - Penobscot General Contractors

- There is an existing housing crisis in Portland, and it is projected to get worse in the upcoming years. Portland is a desirable place to live, and we are looking to help fill that need.
- Overview of building programming including elevations
    - Part of the target tenants are anticipated to include the future Roux Institute Campus students.
    - 25% of units will be deed restricted for medium income earners as required by City Code.
        - This will be the largest project in Portland to meet these demands

Peter Heil:

- Neighborhood Meeting is a city requirement for the Major Site Plan Application.
- A sign-in sheet is available for everyone which will be submitted to the City and becomes public record along with the meeting minutes.
- The Site Plan application has been submitted to the City at the end of November. We are hopeful for a mid-January (1/14/25) planning board workshop. The agenda has not yet been released but can be found on the City's website, typically the Friday before.
- Programming overview
    - The covered parking area includes 11 spaces
    - The bike room and exterior bike racks include 164 bike spaces
    - Overview of proposed retaining walls and site grading implications
    - The building finish floor elevations will have a step to reduce excavation in the existing slope at the rear of the site
- New Utility infrastructure is proposed
    - The overhead electric will be relocated underground along the project frontage
    - Working in coordination with DPW to relocated existing sanitary sewer lines within Washington Ave.
    - New services to development, including water, sewer, storm, power, communications, and natural gas.
- Landscape Architecture – Soren Deniord is the Landscape Architect
    - Two internal courtyards will contain vegetation and will be designed by a landscape architect.
    - Street trees and programming within the right of way along Washington Avenue will be designed by the landscape architect.
- Stormwater design
    - There is an existing steep slope at the rear of the site that sends water toward the proposed building. The site will be engineered to pick up this stormwater and direct it away from the building.
    - We are proposing to maintain various vegetation to the rear of the lot and preserve trees that can be preserved.
    - New stormwater treatment subsurface BMP installed in internal courtyard to collect and treat roof runoff, with an additional stormwater detention system under the drive aisle to accommodate 100-year storm event.
- Parking
    - To provide some background, the City recode now has a maximum parking requirement. Not a minimum parking requirement. That is why we are proposing 11

parking spaces. The project is relying on multimodal transportation as part of this project. There are two bus stops currently on either side of the project frontage.

Jonathan:

- Parking is a market issue, and we recognize that. The reason this design works (with minimal parking) is because the Roux Institute, which has international students attending school for approximately 18 months, will likely not have cars. We have had preliminary conversations with Roux Development and due to the close proximity of the two projects we are designing a portion of this building with those students in mind.

Comments, Questions & Answers:

Please note that the following questions and answers were not recorded verbatim and aim to represent and summarize the actual questions, answers, and discussion that took place at the meeting.

Neighbor (couldn't stay for meeting, but prior to meeting at 5:13 asking to be on record): I want to show my support for more housing in the neighborhood. There is a housing shortage, and the current Northern Burner lot is vacant and seems like a great place to fill the housing need.

Response: Thank you for your comment.

Neighbor: Will the Roux Institute provide parking as part of their development?

Response: Yes, there will be a garage.

Neighbor: How big is the garage?

Response: I believe approximately 600 parking spaces for phase 1. There may be phase 2 to add additional parking if there is a need.

Neighbor: Where is the garage located.

Response: The vacant B&M Baked Beans Building is the location of the proposed Roux institute.

Neighbor: What kind of school is it? Who is the owner?

Response: The Roux Institute is part of Northeastern University, and I believe the focus is advanced technologies, such as Life Science and AI.

Neighbor: I've heard the Roux is proposing a daycare center. What about units for families?

Response: International students cannot get a family visa to come as a student. They need to prove they are making a certain amount of money annually to maintain their visa as an individual. Others who may attend the Roux may be existing residents of the area with families, that may work part time.

Neighbor: Can you further clarify what you mean by clear zones on each side of the building?

Response: We are in discussion about having a potential bus stop or relocating a bus stop in front of the building, which clear zones or loading zones would be required. The building is setback from each side property line to allow access and ease for construction. We are proposing to construct the sidewalk beyond the right of way into our private lot along the building frontage, which will include a public license agreement for public use.

Neighbor: Why is Washington Avenue shown so wide on your presentation slides?

Response: We are not proposing any improvements to Washington Avenue. Our slide shows the existing condition of Washington avenue. The image is the most recent geolocated image from Maine Geolibrary.

Neighbor: Seems like you are highly dependent on Roux students as part of this project, and you do not have a formal agreement, this seems risky. Are there 100 total students that attend this school?

Response: I believe they currently have 1,000 existing students, with an anticipated 3,000 to attend the new campus and a significant number are already living in our apartments. We strongly believe the demand already exists.

Neighbor: Northeastern is known for co-ops for their students. How will they get to work? It seems like you are heavily dependent on public transportation.

Response: This is very different than the mold our country was built on. We are taking the risk of adding additional housing with minimal parking.

Neighbor: Regarding the wide sidewalk. Where is the main entrance and how wide is the sidewalk at this location?

Response: Let's show our architecture slides in a minute and circle back to this.

Neighbor: Will the affordable housing units be for Roux students? If not, how will they survive without a car? They are going to overwhelm the existing public street parking.

Response: The workforce restricted units would not be for the Roux students. We have other buildings in Portland that do not provide parking, and this approach does work. It simply is not convenient to own a car when you live in the city.

Haynes:

- Overview of elevations & renderings
    - The proposed building has three portions with different heights
        - 7 story housing section
        - 4 story housing section located over the covered parking
        - 3 story central bar location – this programming is still being finalized.
    - Materials used and architectural finish overview
    - Façade
        - View into Retail Space

- View into Central Bar area

Jonathan:

- Overview of project schedule
  - An additional neighborhood meeting will be held on January 8th, 2025, same place at 5:30pm.
  - Potential planning board workshop, tentatively scheduled for January 14th. Please keep your eye on the planning board. agenda as this meeting is not confirmed.
  - Planning Board approval is anticipated around March 2025 and hopeful construction start in July 2025.
  - Construction will likely take two years to complete.

Neighbor: What is the width of the building along Washington Avenue?

Response: Approximately 320 feet.

Neighbor: The existing signs on the Northern Burner lot say the existing parking lot is reserved for Amvets Post.

Response: Their property is for sale, and they are looking for alternate locations to relocate.

Neighbor: How wide is the sidewalk at the entrance?

Response: Approximately 12 feet.

Neighbor: I understand why you want wide sidewalks. I think the spirit of the recode is to have buildings closer to the street in the B2b Zone to activate the street frontage.

Response: There will be some furnishings in the wide sidewalk. This is a good question. We talked about putting some type of seating in this location to create a pedestrian friendly location.

Neighbor: I thought the B2b Zone spirit is to create a more commercial space that is fitting in the neighborhood. Given the size of this building it does not seem like this building fits that mold apart from the small retail space.

Response: In the past, projects construct housing with retail below due to the city code requirement. A lot of commercial spaces remain empty, so the city recode allows that standard to be relaxed and give this project opportunity to activate the frontage with residents.

Neighbor: Have you considered allowing the public into the activated communal space.

Response: There are security and logistical obstacles that need to be considered, but we will investigate it further.

Neighbor: Is there a laundry room in the building?

Response: There is a combined washing machine and dryer in each unit.

Neighbor: What will be above the first-floor central bar area?

Response: It will be a public space for relaxing, networking, etc. We have not finalized programming at this location.

Neighbor: With the extra sidewalk space, it makes sense to put the retail in the center.

Response: That's an interesting idea. We located the retail space at the corner to act as the gateway as you enter Portland and provide a welcoming public amenity as you would drive off 295.

Neighbor: Looking at the street trees, is there an opportunity to add more? Or change the tree species?

Response: We are working with our landscape architect to activate this area with trees.

Neighbor: Are these slides available?

Response: Yes. We can provide this presentation to everyone on the sign in sheet who provided their email.

Neighbor: Is this building requesting a height variance.

Response: No, this building is conforming to the City's adopted recode in the B2b district.

Neighbor: The bar that you have. If the first floor was open air directly into the courtyard that would be nice.

Response: Interesting idea. In Maine with our weather and changing seasons this can be difficult to accomplish.

Neighbor: There is street parking on both sides of the road on Washington Avenue. Will street parking be allowed along the project frontage?

Response: We are consolidating the existing three curb cuts and proposing one curb cut. We are not reducing street parking and may open space for additional street parking on the frontage.

Neighbor: Will there be a green roof? The development claims to be outside the downtown view corridor plan, and this project is actually inside the downtown view corridor plan. Additionally, if you are in proximity to a historic landmark or district then there is additional code that needs to be met. The architect should respond to these in their design narrative.

Response: Yes, we are looking into creating a green roof. We will make the architect aware and can update these standards.

Neighbor: The off-street parking across the street is currently no parking – can we change that? Will you be driving piles? Will they be temporary?

Response: There is an opportunity to change the public parking designation across the street. We will investigate it. Yes, unfortunately, we will be driving piles. The means and methods are not

finalized but we will communicate when it happens ahead of time. The temporary piles will likely become permanent to assist construction efficiency and cost.

Neighbor: What is the material on the rear of the building.

Response: It's a fiber cement panel. We will provide samples.

Neighbor: Is the bar element light brick? Why does the rear side of the building look so dark.

Response: At this stage it's a contrasting material to work with the brick and break down the massing.

Neighbor: Cove Street does not look right in the presentation image.

Response: We will make sure our image is correct. The background is the most recent geolocated image from Maine Geolibrary.

Neighbor: Are there plans to create a formal agreement with Roux Institute? Or will conversations remain informal.

Response: That's a good question. We do not have a formal agreement. We are working with them currently and making some design decisions around them. Our project is the closest housing development in proximity to their location and it is available to rent for them so we anticipate a certain demand that will contain Roux students.

Neighbor: Under federal law do you have the right to enter an agreement or first refusal with Roux Institute?

Response: We are carefully studying the Fair Housing Act to comply with all local, state and federal regulations, but yes, you can enter into an agreement with institutions.

Neighbor: Will my view be hindered from the second floor of Bayview heights

Response: We believe if you're on floor two of Bayview Heights, then our building may not impact your view as Washington Avenue is much lower in elevation than North Street.

Neighbor: Can you explain the reasoning of efficiency unit's vs studio vs 1-bedroom units.

Response: This helps some units be more affordable and help get housing cost down. Efficiency units and studio units are smaller and more affordable and also provide options for students who want to have a double occupancy.

Neighbor: It seems like there are more beds than advertised.

Response: The work force units are separate in the slide breakdown calculations. In the 243 market rate units, there are potentially 388 beds. We are not including the deed restricted workforce housing in the bed count. (See Presentation Slide for breakdown).

Neighbor: I lived in the building that is now called The Linden, that building as also constructed for student housing. They did not get the students, what if the same happens to this project?

Response: The Linden failed to secure the students. We don't have a secure deal, but we believe the demand exists and proximity to the campus will provide much needed housing, but understand it is a risk we are taking.

The meeting concluded at approximately 6:50 pm.

The abovementioned material was as interpreted and recorded from handwritten notes. Please note and relay any discrepancies or disputed information in the recorded minutes to the below address so that they can be reviewed, revised, and resubmitted, as necessary.

January 13th, 2024

Subject: 165 Washington Avenue – Major Site Plan Application neighborhood meeting certification

I, Peter Heil, hereby certify that a second neighborhood meeting was held on January 8th, 2025 at East End Community Center Cafeteria – 195 North Street, Portland Maine, 04101 at 5:30 pm.

I also certify that on December 20th, 2024, invitations were mailed to the following:

1. All addresses on the mailing list provided by the Planning Division which includes property owners within 500 feet of the proposed development.
2. Residents on the "interested parties" list.

Sincerely,

Peter F. Heil, P.E.
Project Manager
Acorn Engineering, Inc.

Included with this certification are:

1. Copy of the invitation sent
2. Sign-in sheet
3. Meeting minutes

A C O R N
ENGINEERING, INC.

Dear Neighbor: December 20, 2024

On behalf of Redfern Properties, we are pleased to invite you to a neighborhood meeting to discuss the Major Site Plan Application for the proposed redevelopment of 165 Washington Avenue. The parcel is currently vacant and located within the B2b Neighborhood Business zoning district. The project proposes to construct a 7 floor multi-family apartment building with 326 dwelling units and a ground floor commercial space. The project will include additional internal residential amenity areas, two exterior courtyard amenity spaces, structured parking below the building, and various infrastructure upgrades.

A sign-in sheet will be circulated, and a record of the meeting will be taken. Both the sign-in sheet and record will be submitted to the Planning Board. If you have any questions, please call (207) 775-2655.

Meeting Location: East End Community Center - Cafeteria
195 North Street, Portland, ME 04101

Meeting Date/Time: Wednesday, January 8th, 2025, at 5:30 p.m.

Under the City of Portland land use code, an applicant for a major site plan, master development plan, subdivision of over five lots, or zoning map amendment is required to hold a neighborhood meeting within 30 days of an application being deemed complete and no less than seven calendar days before a public hearing. Should you wish to offer additional comments on this proposed development, you may forward them by e-mail to planning@portlandmaine.gov or by mail to the Planning and Urban Development Department, Planning Division, 4th Floor, 389 Congress Street Portland, ME 04101

tony cowles-studio.com <tony@cowles-studio.com>
to planningboard@portlandmaine.gov Wed, Jan 29, 1:17 PM

Dear City Planning Staff & Planning Board Members,

I was unable to attend the workshop for the proposed 165 Washington Ave (Redfern) project yesterday, however I would like to offer some comments based on my knowledge of the project so far. I am a Portland resident, and live within a couple hundred yards of the project site, just down the hill at 34 Hammond Street. I attended one of the prior neighborhood presentations (at East End School) to learn about the project, and to better understand what is being proposed by the Redfern Properties.

In general, I really like the idea of a mixed-use project on Washington Street, mostly because of the housing that it will offer to residents, and the future residents of Portland. It also seems to make good sense as the Roux Institute begins developing their higher education project at the nearby B&M property. I also like that the project will anchor Washington Ave, ultimately bringing long-term economic vitality to the area. Although I realize there will be significant challenges associated with the non-existent parking on site, I generally believe that the lack of parking will be positive for climate-change reasons, and that it will encourage more people to walk, ride bicycles, and use public transportation.

I am also aware that the newly defined Re-Code has pretty much made this project a 'slam-dunk' for the Redfern organization. Given this fact, I encourage the Planning Dept and Planning Board to be very cautious and forthright in considering how this project defines the future of Portland, and how this project will impact this deeply valued section of our City. As you consider this project, it will be imperative that you get the details right as we envision this huge change for Portland. I would ask those who are tasked with 'approvals' to please consider the following:

- Is a 7-story structure really necessary to make this project successful..? Three additional stories for this area are clearly out of character with its context, and all previous developments in the area were held to the 4-story limit outlined in the zoning guidelines.
- After reviewing the elevations, I have concerns that the mass and scale of the building are frankly, just too much for the site. I think most urban planners would agree… if the proportions aren't right, it is very difficult to get anything else right on the project.
- How is the proposed structure meeting the 'edges' of the property, and how could the design team improve these transitions to the adjacent properties..? Screening..? Other strategies to diminish the scale of the structure..?
- The potential for pedestrian and vehicular conflict at this Washington Street location is extremely high, especially during morning and evening commute times. This project will undoubtedly create an enormous surge in pedestrians and cyclists if the project moves forward. What measures does the City intend to employ to ensure the safety and protection of pedestrians and cyclists in this highly-used traffic corridor..? Dedicated bike lanes..? Traffic-calming measures..? Has a traffic/safety study been performed that will inform this process..?
- Construction parking for the duration of the project will have a significant impact on the surrounding neighborhoods (Hammond St, Gould. St, North St, etc.). Would the City consider transporting workers from a remote parking facility via bus or van throughout the construction process..?
- Once the project is complete, parking will continue to negatively impact the surrounding neighborhoods. I would request that the City strongly consider stickered parking as a requirement for full-time residents in these impacted neighborhoods (so we continue to enjoy street parking near our homes).

Thank you, and I look forward to hearing how you plan address these concerns for the people of Portland. Let's get this one right..!

GENERAL NOTES:

1. THE CONTRACTOR SHALL CALL THE APPROPRIATE UTILITY COMPANIES AND DIG SAFE AT LEAST 72 HOURS PRIOR TO ANY EXCAVATION TO REQUEST EXACT FIELD LOCATION FOR UTILITIES. OTHERWISE IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO FIELD VERIFY THE LOCATION OF UNDERGROUND UTILITIES AND LOCATE ANY POTENTIAL CONFLICTS WITH THE APPROVED PLANS PRIOR TO CONSTRUCTION.

2. THE CONTRACTOR IS RESPONSIBLE FOR MAINTENANCE OF ALL EROSION CONTROL MEASURES SHOWN ON THE PLAN. IF DEEMED NECESSARY BY THE OWNER OR OWNER'S REPRESENTATIVE (IF APPLICABLE), ADDITIONAL EROSION CONTROL MEASURES SHALL BE INSTALLED AT NO ADDITIONAL COST TO THE OWNER.

3. THE CONTRACTOR SHALL PREPARE THEIR OWN MATERIAL SCHEDULE BASED ON THE PLANS AND FIELD VERIFICATION BY THE CONTRACTOR. ALL MATERIAL SCHEDULES SHOWN WITHIN THE PLAN SET ARE FOR GENERAL INFORMATION ONLY.

4. ALL CONSTRUCTION METHODS, TESTING AND MATERIALS SHALL CONFORM TO THE MAINE DEPARTMENT OF TRANSPORTATION SPECIFICATIONS, THE CITY OF PORTLAND AND SERVICING UTILITY REQUIREMENTS, IF ANY. IN CASES WHERE THESE CONFLICT THE MOST STRINGENT SPECIFICATION SHALL APPLY AT NO ADDITIONAL COST TO THE OWNER.

5. THE SITE CONTRACTOR SHALL MAINTAIN A SET OF PAPER AND CAD DRAWINGS WHICH SHALL RECORD THE ACTUAL LOCATION, DIMENSIONS, ELEVATIONS, MATERIALS OF THEIR WORK, INDICATING THEREON ALL VARIATIONS FROM THE CONTRACT DRAWINGS. THE CONTRACTOR SHALL PROVIDE THE OWNER WITH ONE COMPLETE SET OF REPRODUCIBLE RECORD DRAWINGS, IN .DWG FORMAT AND PAPER, STAMPED ''AS-BUILT''. IF AUTOCAD CAPABILITY IS NOT AVAILABLE, EXCLUDE FROM BID IN WRITING.

6. THE CONTRACTOR WILL REMAIN SOLELY AND COMPLETELY RESPONSIBLE FOR ENFORCEMENT OF AND COMPLIANCE WITH 1) ALL CONTRACT PLANS AND SPECIFICATIONS, 2) APPLICABLE INTERNATIONAL BUILDING CODE REQUIREMENTS, AND 3) ALL SITE WORKING CONDITIONS AND SAFETY REQUIREMENTS, DAY AND NIGHT, FOR BOTH PERSONS AND PROPERTY, IN EACH CASE BOTH BY THE CONTRACTOR AND ITS SUBCONTRACTORS. THESE INCLUDE ALL OSHA, NIOSH, U.S. EPA AND ANY OTHER APPLICABLE GOVERNMENTAL REGULATIONS.

7. EXISTING CONDITIONS, BOUNDARY SURVEY, AND TOPOGRAPHY FROM THE PLAN TITLED BOUNDARY & TOPOGRAPHIC SURVEY BY OWEN HASKELL, INC. FOR ACORN ENGINEERING, DATED 7/25/23.

8. SUBSURFACE DATA OBTAINED BY **THE PROJECT GEOTECHNICAL ENGINEER** SHALL BE INCLUDED IN THE CONTRACT DOCUMENTS. THE CONTRACTOR SHALL ALSO REVIEW THE REPORT PRIOR TO SUBMITTING A BID.

9. THE CONTRACTOR IS RESPONSIBLE FOR MAINTAINING ACCESS TO THE SITE AT ALL TIMES. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL TEMPORARY MARKINGS, SIGNAGE AND INCIDENTALS TO MAINTAIN A SAFE VEHICLE AND PEDESTRIAN ACCESS THOUGH THE LIFE OF THE PROJECT. THE CONTRACTOR SHALL NOTIFY THE PORTLAND PUBLIC SAFETY DIVISION ROUTINELY REGARDING TEMPORARY IMPACTS OR CHANGES TO SITE ACCESS CONDITIONS.

10. **CONSTRUCTION MANAGEMENT PLAN** SHALL BE REFERRED TO FOR ANTICIPATED PROJECT SCHEDULE AND CLOSURES. TRAFFIC CONTROL SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR.

11. CONTRACTOR TO DETERMINE SOIL CLASSIFICATION INDEPENDENTLY FOR TRENCH, SHORING, AND OTHER SIMILAR CONSTRUCTION MEANS AND METHODS APPLICATIONS.

12. NO HOLES, TRENCHES, OR STRUCTURES SHALL BE LEFT OPEN OR UNATTENDED OVERNIGHT IN ANY AREA ACCESSIBLE TO THE PUBLIC OR WITHIN THE PUBLIC RIGHT-OF-WAY.

13. THE CONTRACTOR SHALL CONDUCT A PRE-CONSTRUCTION SURVEY OF INTERIOR SUBGRADE AND ABOVE GRADE ACCESSIBLE WALLS, CEILINGS, FLOORS, ROOF AND VISIBLE EXTERIOR AS VIEWED FROM THE GRADE LEVEL. THIS SHALL BE COMPLETED AT A MINIMUM ADJACENT STRUCTURES. PROVIDE A COPY OF THE SURVEY TO THE OWNER. DOCUMENT WITH PICTURES AT A MINIMUM.

14. THE CONTRACTOR SHALL SURVEY ROCK SURFACE PRIOR TO EXCAVATION AND DEVELOP VOLUME CALCULATIONS TO SHARE WITH THE ENGINEER, ACORN ENGINEERING INC. (ACORN), IF ANY.

15. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE PRESERVATION OF ALL TREES AND SHRUBS ON THE PROJECT WHICH ARE NOT TO BE REMOVED.

16. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REPAIRING ANY TRENCH PAVEMENT THAT HAS EXPERIENCED EXCESSIVE SETTLEMENT, CRACKING, OR OPENING OF JOINTS. REPAIRS MAY INCLUDE OVERLAY. REMOVAL OF WORK MAY BE NECESSARY AFTER THE FINAL ACCEPTANCE OF WORK OR PRIOR TO THE END OF THE WARRANTY PERIOD. THIS WORK SHALL BE DONE AT THE CONTRACTOR'S EXPENSE.

CIVIL SITE NOTES:

1. THE CONTRACTOR SHALL SUBMIT IN WRITING ANY REQUESTS TO ACORN TO MODIFY THE CONTRACT DOCUMENTS.

2. ALL SHOP, ERECTION, AND CONSTRUCTION DRAWINGS SHALL BE CHECKED AND STAMPED BY THE CONTRACTOR PRIOR TO SUBMISSION FOR ACORN'S REVIEW. ANY UNCHECKED OR NON-STAMPED SUBMITTALS WILL BE RETURNED WITHOUT REVIEW.

3. CONTRACTOR SHALL THOROUGHLY INSPECT AND SURVEY EXISTING STRUCTURES AND SITE TO VERIFY CONDITIONS THAT AFFECT THE WORK SHOWN ON THE DRAWINGS. CONTRACTOR TO NOTIFY ACORN OF ANY DISCREPANCIES PRIOR TO PROCEEDING.

4. DETAILS SHOWN APPLY TO ALL SIMILAR CONDITIONS UNLESS OTHERWISE INDICATED.

5. ALTHOUGH ALL DUE DILIGENCE HAS BEEN APPLIED TO MAKE THE DRAWINGS AS COMPLETE AS POSSIBLE, NOT ALL DETAILS ARE ILLUSTRATED, NOR IS EVERY EXCEPTION CONDITION ADDRESSED WITHIN THE CONTRACT DOCUMENTS.

6. ALL PROPRIETARY CONNECTIONS SHALL BE INSTALLED IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS.

7. THE CONTRACTOR IS RESPONSIBLE FOR THE COORDINATION OF ALL WORK, INCLUDING DIMENSION AND LAYOUT VERIFICATION, MATERIALS COORDINATION, SHOP DRAWING REVIEW, AND THE WORK OF ANY SUBCONTRACTORS.

8. UNLESS OTHERWISE SPECIFICALLY INDICATED, THE DRAWINGS DO NOT DESCRIBE OR DIRECT MEANS OR METHODS OF CONSTRUCTION.

9. THE CONTRACTOR, IN THE PROPER SEQUENCE, SHALL PERFORM OR SUPERVISE ALL WORK NECESSARY TO ACHIEVE THE FINAL COMPLETED STRUCTURE, AND TO PROTECT THE STRUCTURE, WORKMEN, AND OTHERS DURING THE CONSTRUCTION. SUCH WORK SHALL INCLUDE, BUT NOT BE LIMITED TO, BRACING, SHORING FOR CONSTRUCTION EQUIPMENT, SHORING FOR EXCAVATION, FORMWORK, SCAFFOLDING, SAFETY DEVICES AND PROGRAMS OF ALL KINDS, SUPPORT AND BRACING FOR CRANES AND OTHER ERECTION EQUIPMENT.

10. DO NOT BACKFILL AGAINST RETAINING WALLS UNTIL SUPPORTING SLABS AND FLOOR FRAMING ARE IN PLACE AND SECURELY ANCHORED, UNLESS ADEQUATE BRACING IS PROVIDED. PRIOR TO BACKFILLING, CONCRETE SHALL BE CURED PER STRUCTURAL ENGINEER'S SPECIFICATIONS.

11. TEMPORARY BRACING SHALL REMAIN IN PLACE UNTIL ALL FLOORS, WALLS, ROOFS AND OTHER SUPPORTING ELEMENTS ARE IN PLACE, IF APPLICABLE.

12. ALL PAVEMENT JOINTS SHALL BE SAWCUT AND APPLIED WITH TACK COAT PRIOR TO PAVING TO PROVIDE A DURABLE AND UNIFORM JOINT.

13. ACORN BEARS NO RESPONSIBILITY FOR THE ABOVE ITEMS, AND SITE OBSERVATION VISITS DO NOT IN ANY WAY INCLUDE INSPECTION OF THEM.

14. EXCAVATIONS ACCOMPLISHED AS PART OF THIS PROJECT SHALL BE CONSTRUCTED IN ACCORDANCE WITH SUBPART P OF 29 CRF PART 1926.650-.652 (CONSTRUCTION STANDARD FOR EXCAVATIONS).

15. ALL TRENCH PAVEMENT REPAIR SHALL BE COMPLETED WITH THE USE OF A STREET PAVER WITH A SCREED WIDTH CAPABLE OF SPANNING THE FULL WIDTH OF THE TRENCH UNLESS OTHERWISE AUTHORIZED BY THE ENGINEER.

SPECIAL INSPECTION NOTES

1. ALL SITE SOILS-RELATED WORK AND FOOTING EXCAVATIONS PRIOR TO PLACING FORMS SHALL BE REVIEWED BY THE PROJECT GEOTECHNICAL ENGINEER.

2. ALL SITE DRAINAGE-RELATED WORK SHALL BE REVIEWED BY ACORN.

3. NORMAL REVIEWS BY LOCAL BUILDING DEPARTMENT. NOTIFY 48 HOURS PRIOR TO REQUIRED REVIEW.

4. REQUIRED SPECIAL INSPECTIONS PER I.B.C. SECTION 1705.6 BY AN APPROVED SPECIAL INSPECTOR RETAINED BY OWNER. CONTRACTOR TO COORDINATE SPECIAL INSPECTIONS.

5. SPECIAL INSPECTOR SHALL BE A QUALIFIED PERSON WHO SHALL DEMONSTRATE COMPETENCE, TO THE SATISFACTION OF THE BUILDING OFFICIAL, FOR INSPECTION OF THE PARTICULAR TYPE OF CONSTRUCTION OR OPERATION REQUIRING SPECIAL INSPECTION.

   5.1. DUTIES AND RESPONSIBILITIES OF THE SPECIAL INSPECTOR SHALL BE TO OBSERVE AND/OR TEST THE WORK ASSIGNED AND OUTLINE ABOVE FOR CONFORMANCE WITH THE CONTRACT DOCUMENTS, ALL DISCREPANCIES SHALL BE BROUGHT TO THE IMMEDIATE ATTENTION OF THE CONTRACTOR FOR CORRECTION.

   5.2. THE SPECIAL INSPECTOR SHALL FURNISH REGULAR REPORTS TO THE BUILDING OFFICIAL, THE ARCHITECT AND ENGINEER OF RECORD, AND OTHER DESIGNATED PERSONS. PROGRESS REPORTS FOR CONTINUOUS INSPECTION SHALL BE FURNISHED WEEKLY. INDIVIDUAL REPORTS OF PERIODIC INSPECTIONS SHALL BE FURNISHED WITHIN ONE WEEK OF INSPECTION DATES. THE REPORTS SHALL NOTE UNCORRECTED DEFICIENCIES, AND NET CHANGES TO THE APPROVED CONSTRUCTION DOCUMENTS AUTHORIZED BY THE ENGINEER OF RECORD.

   5.3. THE SPECIAL INSPECTOR SHALL SUBMIT A FINAL SIGNED REPORT WITHIN TEN DAYS OF THE FINAL INSPECTION STATING WHETHER THE WORK REQUIRING A SPECIAL INSPECTION WAS, TO THE BEST OF THE INSPECTOR'S KNOWLEDGE AND BELIEF, IN CONFORMANCE WITH THE APPROVED CONSTRUCTION DOCUMENTS AND THE APPLICABLE WORKMANSHIP PROVISIONS OF THE INTERNATIONAL BUILDING CODE. WORK NOT IN COMPLIANCE SHALL BE NOTED IN THE REPORT.

   5.4. SPECIAL INSPECTOR SHALL BE EMPLOYED BY THE OWNER AND COORDINATED BY THE CONTRACTOR.

LAYOUT NOTES:

1. MONUMENTS DELINEATING PROPERTY LINES OR RIGHT OF WAYS SHALL NOT BE DISTURBED DURING CONSTRUCTION OPERATIONS. IN THE CASE A MONUMENT IS DISTURBED, AT THE CONTRACTOR'S EXPENSE, THE MONUMENT SHALL BE RESET TO ITS ORIGINAL LOCATION AND ELEVATION BY A LICENSED PROFESSIONAL LAND SURVEYOR.

2. ALL DIMENSIONS ON THE FOLLOWING SHEETS TAKE PRECEDENT OVER SCALED DIMENSIONS. EACH DRAWING WITH A BAR SCALE MEANS THAT THE DRAWING/DETAIL HAS BEEN SCALED AS ACCURATELY AS POSSIBLE, AND THE BAR SCALE IS FOR GENERAL REFERENCE ONLY. IF NO BAR SCALE IS PRESENT, THEN THERE IS NO SCALE TO THAT DRAWING/DETAIL. AT NO TIME SHOULD DRAWINGS BE SCALED FROM. ANY DISCREPANCIES BETWEEN DRAWINGS, DETAILS, SPECIFICATIONS AND THE FIELD CONDITION SHALL BE IMMEDIATELY REPORTED TO ACORN FOR FURTHER DIRECTIONS BEFORE ANY ADDITIONAL WORK PROCEEDS.

3. SIGNAGE, STRIPING, AND PAVEMENT MARKINGS SHALL BE IN ACCORDANCE WITH THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (MUTCD).

4. ALL TRAFFIC CONTROL SIGNS INDICATED ON THE SITE LAYOUT PLAN ARE TO MEET ALL REQUIREMENTS & CONDITIONS OF THE CITY OF PORTLAND, MAINE DEPARTMENT OF TRANSPORTATION AND THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES, LATEST EDITION.

5. THE CONTRACTOR SHALL OBTAIN THE SERVICES OF A LICENSED PROFESSIONAL LAND SURVEYOR TO PROVIDE A MINIMUM OF TWO TEMPORARY BENCHMARKS WITHIN THE SITE AND TO LOCATE PROPOSED STRUCTURE CORNERS.

6. CONTRACTOR TO ENSURE THAT ACCESS, INCLUDING BUT NOT LIMITED TO WALKWAYS, DRIVEWAYS, AND MAILBOXES ADJACENT TO THE PROJECT REMAIN FUNCTIONAL AND AVAILABLE FOR USE AT ALL TIMES.

PERMITTING NOTES

1. THIS PROJECT IS SUBJECT TO THE TERMS AND CONDITIONS OF A MAJOR SITE PLAN APPLICATION FROM THE CITY OF PORTLAND, A MAINE DEP STORMWATER LAW APPLICATION UNDER DELEGATED REVIEW BY THE CITY OF PORTLAND, A MAINE DEP CONSTRUCTION GENERAL PERMIT, AND A MDOT TRAFFIC MOVEMENT PERMIT.

2. THE CONTRACTOR SHALL REVIEW THE ABOVE REFERENCED PERMITS PRIOR TO SUBMITTING A BID FOR THIS PROJECT, AND INCLUDE COSTS AS NECESSARY TO COMPLY WITH THE CONDITIONS OF THESE PERMITS.

3. ALL WORK WITHIN THE PUBLIC RIGHT-OF-WAY REQUIRES A STREET OPENING PERMIT FROM THE **CITY OF PORTLAND**. ADDITIONALLY, COORDINATE WITH THE DEPARTMENT OF PUBLIC WORKS.

GRADING AND DRAINAGE NOTES:

1. TOPSOIL STRIPPED FROM THE SITE THAT IS SUITABLE FOR REUSE AS LOAM (MEETS THE REQUIREMENTS WITHIN SECTION 615 OF THE MDOT STANDARD SPECIFICATIONS, MOST RECENT VERSION AND IS FREE OF TRACEABLE AMOUNTS OF CONTAMINANTS) SHALL BE STOCKPILED WITHIN THE PROPOSED LIMIT OF WORK AREA. THE CONTRACTOR SHALL NOT ASSUME THAT ANY STRIPPED TOPSOIL WILL BE ACCEPTABLE FOR REUSE WITH THEIR ESTIMATE.

2. THE CONTRACTOR SHALL ANTICIPATE THAT GROUNDWATER WILL BE ENCOUNTERED DURING CONSTRUCTION AND SHALL INCLUDE SUFFICIENT COSTS WITHIN THEIR BID TO PROVIDE DEWATERING AS NECESSARY; NO SEPARATE PAYMENT SHALL BE MADE TO THE CONTRACTOR FOR DEWATERING. DEWATERING SHALL INCLUDE TREATMENT OF SILT THROUGH THE USE OF A DIRTBAG BY ACF ENVIRONMENTAL OR APPROVED EQUIVALENT. FLOWS FROM DEWATERING ACTIVITIES SHALL NOT BE DISCHARGED INTO SANITARY SEWERS. **SEE BORING LOGS FOR ADDITIONAL INFORMATION.**

3. THE OWNER SHALL BE RESPONSIBLE FOR OBTAINING ANY EASEMENT OR TEMPORARY CONSTRUCTION RIGHTS AS NECESSARY BY PRIVATE ADJACENT LAND OWNERS. THE CONTRACTOR SHALL NOT DISTURB ANY SOIL BEYOND THE PROPERTY LINE WITHOUT NOTIFYING AND OBTAINING SUCH EASEMENT OR TEMPORARY CONSTRUCTION RIGHT FROM THE ADJACENT LAND OWNERS. PRIOR TO THE CONTRACTOR PRICING THE WORK, THEY SHALL PROVIDE ACORN WITH PROOF OF SUCH EASEMENT OR TEMPORARY RIGHTS. SHOULD EASEMENTS OR TEMPORARY RIGHTS NOT BE AVAILABLE, THE CONTRACTOR SHALL INCLUDE COST FOR BRACING AND SHORING AS NECESSARY.

4. THE MINIMUM SLOPE SHALL MEET OR EXCEED 1% IN ALL CASES WHERE NOT NOTED ON THE GRADING PLAN. SLOPES IDENTIFIED ON THE GRADING PLAN TAKE PRECEDENT. ALL SLOPES SHALL BE AWAY FROM BUILDINGS AND TOP OF PAVEMENT SHALL BE AT OR BELOW EXISTING FINISH FLOOR ELEVATIONS.

5. ALL CONSTRUCTION SHALL BE IN ACCORDANCE WITH THE LATEST **GEOTECHNICAL REPORT PREPARED BY THE PROJECT GEOTECHNICAL ENGINEER.**

6. CONTRACTOR TO REVIEW EXISTING SOIL CONDITIONS, TEST PITS, AND BORINGS. THERE WILL BE NO ADDITIONAL PAYMENT FOR UNSUITABLE SOILS.

7. ALL STORM DRAIN PIPE SHALL BE SMOOTH BORE INTERIOR PROVIDING A MANNINGS ROUGHNESS COEFFICIENT OF N=0.012 OR LESS.

8. ADJUST ALL MANHOLES, CATCH BASINS, CURB BOXES, ETC. WITHIN LIMITS OF WORK TO FINISH GRADE.

9. NATIVE SOILS. IT IS THE CONTRACTOR'S RESPONSIBILITY TO LIMIT THE DISTURBANCE TO SUBGRADE SOILS. SHOULD THE SUBGRADE BECOME YIELDING OR DIFFICULT TO WORK, CONTACT ACORN. THE DISTURBED AREAS SHALL BE EXCAVATED AND BACKFILLED WITH COMPACTED SELECT FILL OR CRUSHED STONE AT NO ADDITIONAL EXPENSE TO THE OWNER.

10. ALL SUBGRADE PREPARATION IS SUBJECT TO THE RECOMMENDATIONS OF THE PROJECT **GEOTECHNICAL** ENGINEER, IF APPLICABLE.

EROSION CONTROL NOTES:

1. DISTURBED AREAS ARE DEFINED AS THOSE SURFACES WHERE EXISTING VEGETATION OR STRUCTURES HAVE BEEN REMOVED, EXPOSING NATIVE SOIL TO THE ELEMENTS.

2. ALL ROUTINE WORK ACTIVITIES SHALL BE CONDUCTED IN SUCH A WAY TO LIMIT THE AMOUNT OF DISTURBED AREA AT ONE TIME TO THE EXTENT PRACTICABLE.

3. PRIOR TO THE START OF ANY CLEARING/LAND DISTURBING ACTIVITIES, THE CONTRACTOR SHALL INSTALL APPLICABLE EROSION CONTROL DEVICES SUCH AS PERIMETER SILT FENCE, AND OTHER APPLICABLE MEASURES. IN THE EVENT THE CONTRACTOR IS NOT SURE A EROSION CONTROL MEASURE SHOULD BE IMPLEMENTED, THE CONTRACTOR SHALL CONTACT THE ENGINEER OF RECORD TO CONFIRM IMPLEMENTATION OF ANY EROSION CONTROL DEVICES.

4. ALL GROUND AREAS GRADED FOR CONSTRUCTION SHALL BE GRADED, LOAMED, SEEDED AND MULCH SHALL BE APPLIED AS SOON AS POSSIBLE WITHIN 7 DAYS FOLLOWING THE COMPLETION OF ANY SOIL DISTURBANCE, AND PRIOR TO ANY STORM EVENT.

5. EROSION AND SEDIMENTATION CONTROL MEASURES SHALL BE INSTALLED TO THE SATISFACTION OF THE CITY. THE CONTRACTOR SHALL REFERENCE THE APPROVED EROSION AND SEDIMENTATION CONTROL REPORT FOR TEMPORARY AND PERMANENT EROSION AND SEDIMENTATION CONTROL DEVICES IN ADDITION TO THE PLAN SET. THE CONTRACTOR SHALL ALSO REFER TO THE MAINE D.E.P.'S PERMIT CONDITIONS, FINDINGS OF FACT AND ORDER (IF ANY), AND THE CURRENT MAINE EROSION AND SEDIMENT CONTROL BMP MANUAL FOR ADDITIONAL INFORMATION.

6. PRIOR TO PAVING, THE CONTRACTOR SHALL REMOVE ALL SEDIMENT FROM STORM DRAINS, CATCH BASINS, AND APPURTENANCES.

7. REFER TO THE EROSION CONTROL DETAILS & NOTES FOR ADDITIONAL INFORMATION.

UTILITY NOTES:

1. THE CONTRACTOR IS SPECIFICALLY CAUTIONED THAT THE LOCATION AND ELEVATION OF THE EXISTING UTILITIES AS SHOWN ON THESE PLANS IS BASED UPON RECORDS OF VARIOUS UTILITY COMPANIES AND, WHERE POSSIBLE, MEASUREMENTS TAKEN IN THE FIELD. THIS INFORMATION IS NOT TO BE RELIED UPON AS BEING EXACT OR COMPLETE. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO TEST PIT TO DETERMINE THE EXACT LOCATION AND ELEVATION OF UTILITIES TO COORDINATE WITH THE PROPOSED CONNECTIONS OR CROSSING. ANY DISCREPANCIES SHALL BE IMMEDIATELY REPORTED TO ACORN FOR FURTHER DIRECTIONS BEFORE ANY ADDITIONAL WORK PROCEEDS.

2. **CONTRACTOR TO BYPASS EXISTING SEWER FLOW CONTROL AT CONNECTION TO EXISTING SYSTEM AT NO ADDITIONAL COST.**

3. CONTRACTOR SHALL, AT NO ADDITIONAL COST TO THE OWNER, CONDUCT EXPLORATORY EXCAVATIONS AT LOCATIONS WHERE PROPOSED EXCAVATION WILL INTERSECT WITH EXISTING UTILITIES, PRIOR TO THE ORDERING OF STRUCTURES.

4. ALL NEW SANITARY MANHOLES SHALL BE VACUUM TESTED AND SHOWN TO PASS PRIOR TO BACKFILLING. TESTING SHALL BE COMPLETED IN ACCORDANCE WITH TECHNICAL REPORT #16 (TR-16): GUIDES FOR THE DESIGN OF WASTEWATER TREATMENT WORKS, PREPARED BY THE NEW ENGLAND INTERSTATE WATER POLLUTION CONTROL COMMISSION.

5. SEWER MANHOLES SHALL BE 4' ID UNLESS OTHERWISE STATED ON THE PLANS.

6. CONTRACTOR TO PROVIDE 5.5' OF COVER FROM TOP OF PIPE TO FINISH GRADE FOR WATER MAINS.

7. THRUST BLOCKS SHALL BE USED FOR THRUST RESTRAINT ON WATER MAINS. DETAIL AND LIMITS FOR THRUST BLOCKS ARE SHOWN WITHIN THE PLAN SET.

8. WATER INFRASTRUCTURE SHALL BE TESTED IN ACCORDANCE WITH THE PORTLAND WATER DISTRICT DOCUMENT ''WATER AND SEWER CONSTRUCTION SPECIFICATIONS AND PROCEDURE'', MOST RECENT REVISION.

9. ALL REQUIRED FITTINGS FOR THE WATER MAIN ARE NOT SHOWN ON DRAWINGS. CONTRACTOR SHALL FURNISH AND INSTALL ALL NECESSARY FITTINGS REQUIRED TO CONSTRUCT THE WATER MAIN IN ACCORDANCE WITH **CITY OF PORTLAND**, STATE OF MAINE, AND AMERICAN WATER WORKS ASSOCIATION STANDARDS AND REGULATIONS.

10. CONTRACTOR SHALL COORDINATE WORK REGARDING ANY WATER MAIN CONNECTION AND WATER MAIN SHUTDOWN WITH THE PORTLAND WATER DISTRICT AT LEAST SEVEN (7) DAYS PRIOR TO CONSTRUCTION.

11. ALL WATER PIPE INSTALLATION SHALL CONFORM WITH THE **PORTLAND WATER DISTRICT** SPECIFICATIONS AND PROCEDURES, MOST RECENT EDITION.

12. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO RELOCATE ALL EXISTING UTILITIES WHICH CONFLICT WITH THE PROPOSED IMPROVEMENTS SHOWN ON THE PLANS.

13. SEWER, GAS, TELEPHONE, ELECTRICITY, CABLE, WATER AND ANY OTHER UTILITY CONNECTIONS SHALL BE REVIEWED BY PLUMBING, ELECTRICAL, AND MECHANICAL DESIGNER FOR CONSISTENCY WITH THEIR PLANS PRIOR TO CONSTRUCTION.

14. COORDINATE EXIT POINT FOR SECONDARY UTILITY SERVICES WITH THE ARCHITECT/ELECTRICAL ENGINEER. SECONDARY LINE LOCATIONS NOT PROVIDED BY ACORN WITHIN THE UTILITY PLAN.

15. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO OBTAIN ALL THE NECESSARY PERMITS FOR THE INSTALLATION OF THE UTILITIES AND STORMDRAINS WITHIN THE PUBLIC RIGHT OF WAY. THE CONTRACTOR SHALL SUBMIT A MAINTENANCE OF TRAFFIC PLAN TO THE CITY IN ACCORDANCE WITH **THE CITY OF PORTLAND TECHNICAL MANUAL** PRIOR TO ANY WORK.

16. THE CONTRACTOR SHALL PROVIDE AND INSTALL ALL BOXES, FITTINGS, CONNECTORS, COVER PLATES AND OTHER MISCELLANEOUS ITEMS NOT NECESSARILY DETAILED ON THE DRAWINGS TO RENDER INSTALLATION OF UTILITIES COMPLETE AND OPERATIONAL AT NO EXTRA EXPENSE TO THE OWNER.

17. ALL UTILITY PIPES SHALL SLOPE UNIFORMLY BETWEEN ELEVATIONS INDICATED ON THE DRAWINGS. NO CRESTS OR SAGS IN THE PIPING WILL BE PERMITTED. ALL HORIZONTAL AND VERTICAL BENDS IN PRESSURIZED PIPE LINES SHALL BE SUITABLY RESTRAINED WITH THRUST BLOCKS OR RETAINER GLANDS. RETAINER GLANDS ALLOWED FOR DUCTILE IRON PIPE ONLY. PROVIDE ALL BENDS, HORIZONTAL AND VERTICAL, AS REQUIRED TO MEET THE GRADES AND ALIGNMENTS INDICATED ON THE DRAWINGS.

18. ALL WASTEWATER PIPING, EXCLUDING BUILDING DRAINS, AND ALL PRESSURIZED PIPING, TO INCLUDE WATER MAINS, INSTALLED BENEATH STRUCTURES SHALL BE ENCASED IN CONCRETE.

19. WHERE NEW PIPING IS TO BE CONNECTED TO EXISTING PIPING, THE CONTRACTOR SHALL FURNISH AND INSTALL ALL ADAPTERS, FITTINGS AND ADDITIONAL PIPE AS REQUIRED TO ENSURE A COMPLETE AND PROPERLY FUNCTIONING CONNECTION. CONTRACTOR TO VERIFY LOCATION, ELEVATION, ORIENTATION AND MATERIAL OF CONSTRUCTION. ADAPTERS AND FITTINGS ARE INCIDENTAL TO THE PIPE INSTALLATION.

20. WHENEVER POSSIBLE, WATER LINES SHOULD BE INSTALLED OVER WASTEWATER LINES. A MINIMUM SEPARATION OF 18 INCHES BETWEEN THE BOTTOM OF THE WATER LINE AND THE TOP OF THE WASTEWATER LINE SHALL BE MAINTAINED WHERE POSSIBLE. WHERE A WATER LINE CROSSES UNDER THE WASTEWATER LINE, A FULL LENGTH OF WASTEWATER PIPE SHALL BE CENTERED ABOVE THE WATER LINE SO THAT BOTH JOINTS WILL BE AS FAR FROM THE WATER LINE AS POSSIBLE,

21. THE CONTRACTOR SHALL BE ANTICIPATE THAT THE NATIVE SILT AND CLAY SOILS WILL NOT BE SUITABLE FOR PIPE TRENCH BACKFILL IN PAVED AREAS.

22. GROUNDWATER SHALL BE CONTROLLED TO A LEVEL OF AT LEAST ONE FOOT BELOW SUBGRADE OF THE PIPE OR STRUCTURE. THE CONTRACTOR SHALL MAINTAIN THE LOWERED GROUNDWATER LEVEL UNTIL CONSTRUCTION HAS BEEN COMPLETED TO SUCH AN EXTENT THAT THE STRUCTURES OR PIPES WILL NOT BE FLOATED OR OTHERWISE DAMAGED.

23. EXCAVATION TO SUBRADE IN NATIVE SILT AND CLAY SHALL BE COMPLETED WITH A SMOOTH EDGE BUCKET TO MINIMIZE SUBGRADE DISTURBANCE.

24. ALL ADJUSTMENTS TO FINISHED GRADE ARE TO BE COMPLETED BY THE CONTRACTOR. THE CONTRACTOR SHALL CONFIRM STRUCTURES THAT REQUIRE ADJUSTMENT WITH THE ENGINEER OR OWNERS REPRESENTATIVE PRIOR TO ADJUSTING FRAMES.

DEMOLITION NOTES:

1. THE FOLLOWING ITEMS ARE TYPICAL OF MATERIAL WHICH MAY BE ON SITE:
   - ROCK AND CONCRETE FOUNDATIONS
   - CONCRETE SLABS
   - BITUMINOUS ASPHALT PAVEMENT
   - CONCRETE PADS AND BLOCKS
   - FENCE POST AND FENCING
   - UNDERGROUND UTILITY LINES
   - ABOVE AND OR BELOW FUEL OIL AND PROPANE GAS TANKS
   - STORM DRAIN PIPES AND APPURTENANCE STRUCTURES
   - OTHER TRASH & MISCELLANEOUS SOLID WASTES

2. THE CONTRACTOR IS ADVISED TO VISIT THE SITE TO CONFIRM DEMOLITION ITEMS SINCE THE LIST IS NOT INCLUSIVE OF THE SITE CONDITIONS WHICH MAY BE ENCOUNTERED

3. ALL DISPOSAL OF DEMOLITION DEBRIS OR WASTE SHALL BE IN ACCORDANCE WITH ALL LOCAL, STATE, & FEDERAL REGULATIONS. CONTRACTORS SHALL PROVIDE OWNER WITH APPROPRIATE "BILLS OF LADING" DEMONSTRATING PROPER DISPOSAL OF ALL MATERIALS.

4. THE CLIENT HAS NOT REQUESTED NOR HAS ACORN COMPLETED A PHASE I – ENVIRONMENTAL SITE ASSESSMENT FOR THE PROPERTY.

UTILITY NOTE

THE UNDERGROUND UTILITIES SHOWN HAVE BEEN LOCATED FROM FIELD SURVEY INFORMATION AND EXISTING DRAWINGS. THE SURVEYOR MAKES NO GUARANTEES THAT THE UNDERGROUND UTILITIES SHOWN COMPRISE ALL SUCH UTILITIES IN THE AREA, EITHER IN SERVICE OR ABANDONED. THE SURVEYOR FURTHER DOES NOT WARRANT THAT THE UNDERGROUND UTILITIES SHOWN ARE IN THE EXACT LOCATION INDICATED ALTHOUGH HE DOES CERTIFY THAT THEY ARE LOCATED AS ACCURATELY AS POSSIBLE FROM INFORMATION AVAILABLE. THE SURVEY HAS NOT PHYSICALLY LOCATION THE UNDERGROUND UTILITIES. CALL 1-888-DIGSAFE AT LEAST THREE BUSINESS DAYS BEFORE PERFORMING ANY CONSTRUCTION. DUE TO OSHA CONFINED SPACE REQUIREMENTS, ALL INVERTS AND PIPE SIZES MUST BE VERIFIED PRIOR TO ANY CONSTRUCTION.

5. "LAND TITLE SURVEY FOR VOLUNTEERS OF AMERICA PORTLAND, MAINE 12-18-92 H.I. & E.C. JORDAN – SURVEYORS" REVISED AUG. 29, 1995
6. "BOUNDARY SURVEY AT 163 WASHINGTON AVENUE, PORTLAND, MAINE MADE FOR OWNER OF RECORD JEFFREY A. CURRAN MAY 26, 2021 OWEN HASKELL, INC. JOB NO. 2021-075 P" REVISED 12-18-2022.
7. "PLAN OF PROPERTY OF W.H. BAXTER ESQ. BY ANDERSON BONNELL & CO. JULY 1866" RECORDED IN PLAN BOOK 2, PAGE 56.

GENERAL NOTES

1. OWNER OF RECORD: RAYMOND H. AND ALINA WATERHOUSE, 105 PARTRIDGE CIRCLE, PORTLAND, ME; CUMBERLAND COUNTY REGISTRY OF DEEDS BOOK 25470, PAGE 272.
2. LOCUS IS SHOWN AT LOT 1 IN BLOCK D ON PORTLAND PROPERTY MAP 10.
3. BEARINGS ARE GRID NORTH AS BASED ON CITY MONUMENTS L749-78-3002, CORNER WASHINGTON AVENUE AND NORTH SIDE OF WALNUT STREET, AND T112-18-107, CORNER EAST SIDE OF NORTH STREET AND NORTH SIDE OF WALNUT STREET, AS SURVEYED BY THIS FIRM IN 2014. THESE ARE THE SAME TWO MONUMENTS USED FOR PLAN REFERENCE 2 IN 2013. BOTH OF THESE MONUMENTS HAVE BEEN MOVED OR DISTURBED, APPARENTLY DURING SIDEWALK RECONSTRUCTION SINCE 2014.
4. ELEVATIONS ARE CITY DATUM AS BASED ON PK IN POLE #11, CORNER ANDERSON AND EVERETT STREETS, ELEVATION 12.42 CITY LEVEL BOOK 737, PAGE 77.
5. LINES ALONG CURRAN, HIGH PEAKS, LLC, AND A PORTION OF MUNJOY HEIGHTS CONDO ARE BASED ON DIMENSIONS SHOWN ON PLAN REFERENCE 7.
6. THE EXACT STATUS OF SHERIDAN STREET, FORMERLY KNOWN AS POPLAR STREET, HAS NOT BEEN DETERMINED. IT IS PRESUMED TO HAVE BEEN VACATED AND OWNERSHIP MAY EXTEND TO THE CENTER OF THE PAPER STREET. THE WESTERLY LINE OF SHERIDAN HEREON IS THE SAME AS SHOWN ON PLAN REFERENCE 2. THIS MATCHES REASONABLY WELL WITH THE LINE OF SHERIDAN STREET AS SHOWN ON PLAN REFERENCE 5 BUT NOT WITH THE LINE ON PLAN REFERENCE 4. THIS STREET WAS ORIGINALLY SHOWN ON PLAN REFERENCE 3 IN 1802 WHICH PLAN IS VERY DIFFICULT TO RECREATE.
7. THE SKETCH IN DEED BOOK 31302, PAGE 177, FROM WATERHOUSE TO REDFERN MUNJOY, LLC, DOES NOT INDICATE A JOG IN THE CURRENT EAST LINE OF WATERHOUSE. THE SOUTH SIDE OF THE ORIGINAL WATERHOUSE LAND, ON THE WEST SIDE OF SHERIDAN STREET, ON PLAN REFERENCE 4 HAS A DISTANCE OF 33.47 FEET. THE SAME LINE ON THE RECENT SKETCH HAS A DISTANCE OF 30.00 FEET. THIS SURVEYOR BELIEVES THAT THE LINE OF SHERIDAN STREET ON PLAN REFERENCE 4 IS NOT ACCURATE. A BOUNDARY AGREEMENT WITH MUNJOY HEIGHTS CONDO WOULD RESOLVE ANY CONFLICT.
8. UNDERGROUND UTILITIES MARKED BY PROMARK UTILITY LOCATING, INC. SEWER PIPE SIZES AND MATERIALS FROM CITY GIS.

CERTIFICATE

OWEN HASKELL, INC. HEREBY CERTIFIES THAT THIS PLAN IS BASED ON, AND THE RESULT OF, AN ON THE GROUND FIELD SURVEY AND THAT TO THE BEST OF OUR KNOWLEDGE, INFORMATION AND BELIEF, IT CONFORMS TO THE BOARD OF LICENSURE FOR PROFESSIONAL LAND SURVEYORS CURRENT STANDARDS OF PRACTICE.

CHECKED BY: JCS	SCALE: 1" = 20'	DRWG. NO. 1	

GENERAL NOTES:

1. EXISTING ASPHALT TO BE REMOVED SHALL BE STRIPPED AND PROPERLY DISPOSED OF OFFSITE.
2. ALL DISPOSAL OF DEMOLITION DEBRIS OR WASTE SHALL BE IN ACCORDANCE WITH ALL LOCAL, STATE, & FEDERAL REGULATIONS. CONTRACTOR SHALL PROVIDE OWNER WITH APPROPRIATE "BILLS OF LADING" TO DEMONSTRATE PROPER DISPOSAL OF ALL MATERIALS.
3. SITE DEMOLITION SHALL NOT OCCUR UNTIL PROPER ABATEMENT PROCEDURES HAVE OCCURRED. ABATEMENT, IF NECESSARY, SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
4. THE CONTRACTOR SHALL CALL THE APPROPRIATE UTILITY COMPANIES AND DIG SAFE AT LEAST 72 HOURS PRIOR TO EXCAVATION TO REQUEST EXACT FIELD LOCATION FOR UTILITIES. OTHERWISE IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO FIELD VERIFY THE LOCATION OF UNDERGROUND UTILITIES AND LOCATE POTENTIAL CONFLICT WITH THE APPROVED PLANS PRIOR TO CONSTRUCTION.
5. ALL CONSTRUCTION SIGNAGE IS TEMPORARY AND WILL BE REMOVED AT PROJECT COMPLETION. FINAL SIGNAGE WORDING AND PLACEMENT LOCATION TO BE ACCEPTED BY THE CITY.
6. SEDIMENT BARRIERS TO BE PLACED DIRECTLY ON THE FRONT AND SIDE PROPERTY LINES, DOWN GRADIENT OF THE PROPOSED PROJECT WORK PER DETAIL; FENCES ARE OFFSET OF THE PROPERTY LINES AS SHOWN ON THE PLAN FOR CLARITY PURPOSES AND DO NOT NECESSARILY DEPICT THE PHYSICAL LOCATION.
7. CONTRACTOR SHALL PLACE CATCH BASIN INLET PROTECTION ON CATCH BASINS AND FIELD INLETS DOWN-GRADIENT OF ALL NON-STABILIZED SURFACES, PER DETAIL.
8. DEMOLITION PLAN IS NOT INCLUSIVE OF ALL EXISTING ITEMS TO BE REMOVED AS PART OF SITE CONSTRUCTION INCLUDING BUT NOT LIMITED TO LANDSCAPING, UTILITIES, WORK WITHIN THE ROW, ETC. ALL DEMOLITION WORK SHALL BE IN ACCORDANCE WITH THE CITY OF PORTLAND REGULATIONS.
9. CONTRACTOR TO BE RESPONSIBLE FOR PROVIDING OFF-SITE PARKING TO EMPLOYEES; ON-SITE PARKING WILL NOT BE PROVIDED OR GUARANTEED. CONTRACTOR TO BE RESPONSIBLE FOR OBTAINING THE APPROPRIATE PERMITS FROM THE CITY FOR CLOSING ANY ON-STREET PARKING SPACES DURING THE CONSTRUCTION PERIOD.
10. CONTRACTOR SHALL BE RESPONSIBLE FOR SNOW REMOVAL ALONG CONSTRUCTION FENCE AND GATE.
11. CONTRACTOR TO SUBMIT A DEWATERING PLAN FOR REVIEW AND APPROVAL TO THE DEPARTMENT OF PUBLIC WORKS PRIOR TO THE PRE-CONSTRUCTION MEETING, DURING THE BUILDING PERMIT APPLICATION PROCESS, OR PRIOR TO ADVANCED SITE WORK. CONTACT THE DEPARTMENT OF PUBLIC WORKS FOR ADDITIONAL INFORMATION AND CURRENT REGULATIONS.

GENERAL NOTES:

1. LOCATION OF PROPOSED CONNECTIONS ARE APPROXIMATE. CONTRACTOR TO CONTACT ENGINEER IF FIELD INFORMATION VARIES FROM INFORMATION ON PLANS.
2. CONTRACTOR IS TO BE CAUTIONED THAT CERTAIN LOCATIONS AND/OR ELEVATIONS OF EXISTING UTILITIES HAVE BEEN PROVIDED THROUGH UTILITY COORDINATION OR OTHER OBSERVATIONS. INFORMATION IS NOT TO BE RELIED UPON AS EXACT OR COMPLETE. CONTRACTOR TO FIELD VERIFY AND COORDINATE WITH UTILITY COMPANY AND DIG SAFE NO LESS THAN 72 HOURS PRIOR TO ANY EXCAVATION TO REQUEST EXACT FIELD LOCATION OF ALL UTILITIES. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO RELOCATE ALL EXISTING UTILITIES WHICH CONFLICT WITH THE PROPOSED IMPROVEMENTS INDICATED IN THE CONTRACT DOCUMENTS. CONTRACTOR TO NOTIFY ENGINEER OF ANY DIFFERENTIATIONS FROM EXISTING CONDITIONS, INCLUDING UTILITY INFORMATION, PRIOR TO ANY CHANGES.
3. FOR ALL UTILITIES, ACORN ENGINEERING DESIGN LIMITS END AT EXTERIOR WALL OF BUILDING. METERING OF UTILITIES TO BE COMPLETED BY M.E.P. UNLESS SPECIFIED OTHERWISE.
4. CONTRACTOR TO COORDINATE WITH ARCHITECT ON FINAL UTILITY CONNECTIONS WITHIN THE BUILDING.
5. SEWER UTILITIES: CONTRACTOR TO COORDINATE WITH ARCHITECT FOR FINAL SERVICE CONNECTION. SEWER UTILITIES TO BE CONSTRUCTED IN ACCORDANCE WITH CITY OF PORTLAND TECHNICAL STANDARDS. VALVE FOR BACKFLOW PREVENTION SHALL BE INSTALLED WITHIN THE THE PROPERTY LINES FOR EACH CITY SEWER CONNECTION. CONTACT ENGINEER IF INVERT FIELD CONDITIONS VARY FROM DESIGN.
6. WATER UTILITIES: FINAL PIPE SIZING PROVIDED BY M.E.P. ENGINEER AND FIRE PROTECTION DESIGNER. INTERNAL METERING, BACKFLOW PREVENTION, AND PRESSURE REDUCERS TO BE COMPLETED BY M.E.P. ENGINEER. DOMESTIC WATER PIPE SIZES WILL DETERMINE THE FINAL WATER METERING OPTIONS. METER MAY BE SMALLER THAN PROPOSED WATER MAIN. WATER METERING, PRESSURE REDUCER AND BACKFLOW PREVENTION TO BE IN ACCORDANCE WITH THE PORTLAND WATER DISTRICT STANDARDS. CONTRACTOR TO FOLLOW METERING GUIDELINES OF THE PORTLAND WATER DISTRICT AND CITY OF PORTLAND.
7. GAS UTILITIES: PROJECT GAS LOAD, GAS UTILITY DESIGN, AND FINAL GAS SERVICE LOCATION AND METERS TO BE DEFINED BY M.E.P. AND IN ACCORDANCE WITH UNITIL.
8. ELECTRIC UTILITIES: ELECTRIC DESIGN TO BE FINALIZED BY M.E.P. ENGINEER. ELECTRICAL LOAD TO BE DETERMINED BY M.E.P. ENGINEER. METER LOCATION AND TRANSFORMER SIZE, IF NECESSARY DEFINED BY M.E.P. M.E.P. TO FINALIZE SERVICE CONNECTION TO BUILDING. ALL ELECTRIC CONSTRUCTION SHALL CONFORM TO CMP GUIDEBOOK OF STANDARD REQUIREMENTS, MOST RECENT EDITION. DESIGN SUBJECT TO FINAL APPROVAL FROM CMP.
9. CABLE AND TELEPHONE PULLBOXES AND PEDESTAL LOCATIONS TO BE DETERMINED BY CHARTER COMMUNICATIONS AND FAIRPOINT PRIOR TO CONSTRUCTION. CONTRACTOR TO COORDINATE INSTALLATION OF UNDERGROUND UTILITIES WITH ALL UTILITY COMPANIES INVOLVED.

DRAWING NO. C-30

NOTES:

1. ALL DETECTABLE WARNING PLATES SHALL BE UNCOATED CAST IRON. FOLLOW MANUFACTURER'S INSTRUCTIONS FOR INSTALLATION.
2. CAST IN PLACE CONCRETE SHALL MEET SPECIFICATIONS FOR MDOT CLASS A STRUCTURAL CONCRETE, MINIMUM COMPRESSIVE STRENGTH 4,000 PSI. THE EXPOSED CONCRETE BORDER SHALL RECEIVE A UNIFORM BROOM FINISH PERPENDICULAR TO THE FLOW OF PEDESTRIAN TRAFFIC.
3. TRUNCATED DOMES SHALL BE ALIGNED IN ROWS, PARALLEL AND PERPENDICULAR TO THE PREDOMINANT DIRECTION OF TRAVEL. TRUNCATED DOME BRICKS AND GRANITE PAVERS ARE NOT ALLOWED.
4. SIZE: THE DETECTABLE WARNING PLATES SHALL EXTEND 24 INCHES MINIMUM IN THE DIRECTION OF TRAVEL AND THE FULL WIDTH OF THE CURB RAMP, LANDING, OR BLENDED TRANSITION TO THE STREET.
5. ORIENTATION: THE DETECTABLE WARNING PANEL SHALL BE LOCATED SO THAT THE EDGE NEAREST THE CURB LINE IS 6 INCHES MINIMUM AND 8 INCHES MAXIMUM FROM THE CURB LINE. THE PANEL SHALL BE ORIENTED TO THE DIRECTION OF TRAVEL AS IDENTIFIED BY THE POINT OF EGRESS.

SECTION A–A

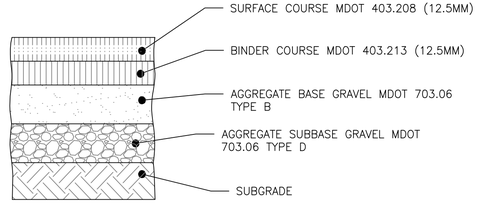
1. BRICKS TO BE USED:

   NEW CONSTRUCTION:
   4"X8" PINE HALL PATHWAY PAVER BRICK; MFG. BY PINE HALL BRICK CO., MADISON, NORTH CAROLINA. LACHANCE ITEM #193623;. PINE HALL PATHWAY PAVER BRICK.

   REPAIR/MAINTENANCE TO EXISTING BRICK SIDEWALKS:
   VERMONT BACKER SUPPLIED BY GAGNE AND SONS SPECIFICATION NUMBER: "VERMONT PAVER BRICK", ITEM NUMBER #VBBB
2. INSTALL BRICK FLUSH UP TO BUILDING, PAVEMENT, STAIRS, CONCRETE SURFACES, CURB OR LANDSCAPED AREAS.

BRICK SIDEWALK WITH BITUMINOUS BASE DETAIL
NOT TO SCALE



NOTES:

1. ALL TREE WELLS SHALL COMPLY WITH CITY TECHNICAL STANDARDS AND MUST BE APPROVED BY THE CITY ARBORIST
2. FINAL PLACEMENT LOCATION OF THE GRANITE CURB TREE WELL SHALL BE APPROVED BY DPW AND SHALL CONSIDER SIDEWALK WIDTH, STREET PARKING STATUS, ABOVE AND BELOW GROUND UTILITIES AND OTHER OBSTRUCTIONS
3. SIDEWALK MATERIAL POLICY. SEE SIDEWALK CONSTRUCTION DETAILS IN SECTION 1 OF THE TECHNICAL MANUAL
4. RAISED CURB TREE WELL OFFSETS FROM THE CURB LINE SHALL TAKE THE LOCATION OF ON–STREET PARKING INTO ACCOUNT. WHERE ADJACENT TO ON–STREET PARKING AND SIDEWALK WIDTH ALLOWS, A MINIMUM OFFSET OF 2 FEET IS PREFERRED, UNLESS IT CAN BE DEMONSTRATED THAT THE PLACEMENT OF THE TREE WELLS WILL NOT INTERFERE WITH THE OPENING OF VEHICLE DOORS

PLAN VIEW

TREEWELL IN SIDEWALK

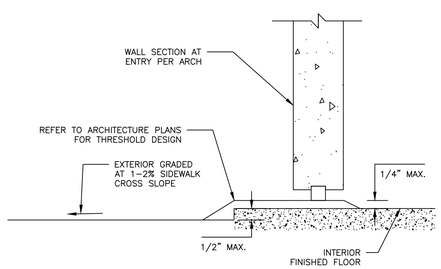
CITY OF PORTLAND ARTERIAL BITUMINOUS PAVEMENT PROFILE
NOT TO SCALE



1. AT A MINIMUM, TESTING SHALL CONSIST OF ENTRAINED AIR AND SLUMP TESTS ON SITE PRIOR TO POURING THE SIDEWALKS. ENTRAINED AIR TESTS SHALL BE DONE IN ACCORDANCE WITH AASHTO T152. TEST FIRST TWO LOADS AND EVERY THIRD LOAD THEREAFTER PROVIDED CONSISTENT RESULTS ARE ACHIEVED.
2. SLABS SHALL BE PLACED ALTERNATELY IN LENGTHS NOT TO EXCEED 30 FEET OR AS DIRECTED AND SHALL BE SEPARATED BY AN EXPANSION JOINT OF PREFORMED EXPANSION FILLER ½ INCH IN THICKNESS.
3. WHEN CONSTRUCTED ADJACENT TO A BUILDING, RETAINING WALL OR OTHER FIXED STRUCTURE, A ½ INCH THICK PREFORMED JOINT FILLER SHALL BE USED BETWEEN THE SLAB AND THE STRUCTURE.
4. THE SIDEWALK SURFACE SHALL BE SCORED INTO BLOCK UNITS NO GREATER THAN 40 SQUARE FEET AS DIRECTED. THE DEPTH OF THE SCORING SHALL BE AT LEAST ONE QUARTER OF THE THICKNESS OF THE SLAB.
5. ANY MATCHING INTO EXISTING SIDEWALKS SHALL BE DONE SO WITH A CLEAN VERTICAL FACE CONNECTION.
6. THE SURFACE SHALL BE FINISHED TO PRODUCE A BROOMLIKE "BRUSHED" PATTERN. NO PLASTERING OF THE SURFACE WITH MORTAR WILL BE PERMITTED. THE FINISH SHALL RESULT IN A SURFACE OF UNIFORM TEXTURE AND COLOR. ALL OUTSIDE EDGES OF THE SLAB AND ALL JOINTS SHALL BE ROUNDED WITH A ¼ INCH RADIUS EDGING TOOL.
7. CONCRETE SHALL BE CURED FOR 72 HOURS. CURING SHALL BE BY MEANS OF THOMPSON'S WATER SEAL AS MANUFACTURED BY E.A. THOMPSON CO., INC. OF MEMPHIS, TENNESSEE, BOILED LINSEED OIL, WHITE PIGMENTED CURING COMPOUND, OR BY OTHER APPROVED METHODS. CONCRETE SIDEWALK TO BE SEALED WITH CONSOLIDECK SALTGUARD WB OR APPROVED EQUAL 28 DAYS AFTER PLACEMENT. FOLLOW MANUFACTURER'S RECOMMENDATIONS FOR APPLICATION.
8. GENERAL CONTRACTOR TO COLLECT DELIVERY SLIPS AND TRANSFER TO THE OWNER.
9. REFER TO CITY OF PORTLAND CONCRETE SPECIFICATIONS SECTION 608 FOR MORE INFORMATION.

REINFORCED CONCRETE SIDEWALK

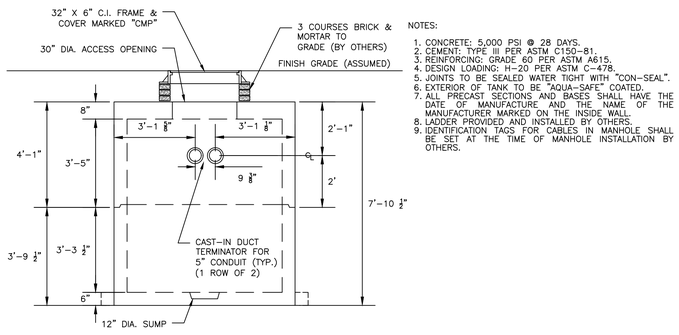
BRACKET ARM
Holophane OUC Roadway Arm
Model: OUC 6063-T6
or Spring City Columbia Arm
Model: AARCLA-1S-51-53-TN2.38/7.00-CU
Aluminum crossarm with a post-top fitting for a 3 1/2" by 8" tenon. Single Arm 45° Oriented 180 degrees.

SLIP FITTER
Holophane Boston Harbor Series
Model: BHLF-200-SCA/AS
2 3/8" O.D. with swivel cast fitter.

LIGHTING POLE
Holophane
Model: CM17CSB-CA-RAL6012
or Spring City Cambridge Series
Model: SSHSM-G11-7.00-15.00-TN3.50/8.00-CU
Smooth, tapered steel pole smooth shaft rated for a 90mph wind load with a 1.3 gust factor. Provide four hot-dipped galvanized steel L-type anchor bolts. Lighting pole shall be hot dip galvanized prior to powdercoat paint.

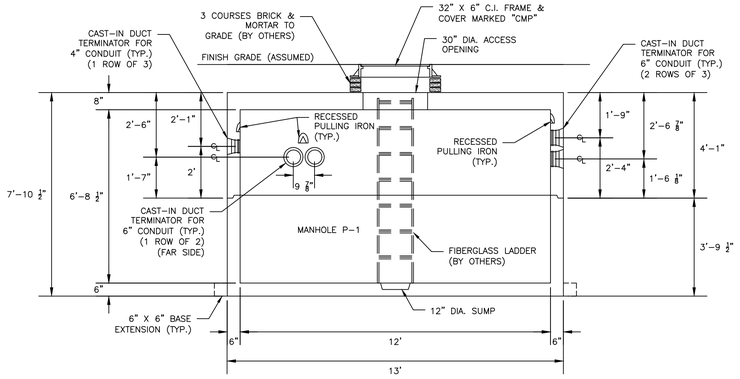
DECORATIVE BASE
Holophane Cambridge Series
Model: CM17CSB
or Spring City Cambridge Series
Model: DWBCMB-17-CU
Decorative clamshell cast aluminum base. Hardware shall be stainless steel.



DIMENSIONS
Overall Height = 19' 3"
Pole Height = 15' 0"
Base Diameter = 17" to 18"

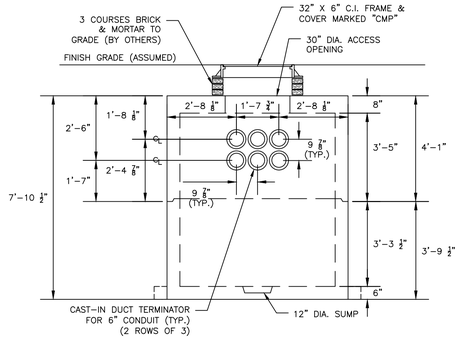
FINISH
Black (standard)

APPLICATION
Stree/sidewalk lighting. Decorative fixture not needed on same side of street as existing cobrahead fixtures.
Spacing: 80' - 100' on center
Place in furnishing zone overhang towards street; where fixture conflicts with overhead utilities, may be placed on back of sidewalk.



PENINSULA MEDIUM STREET LIGHT
NOT TO SCALE

PLAN VIEW



NOTES:
1. CONCRETE: 5,000 PSI @ 28 DAYS.
2. CEMENT: TYPE III PER ASTM C150-81.
3. REINFORCING: GRADE 60 PER ASTM A615.
4. DESIGN LOADING: H-20 PER ASTM C-478.
5. JOINTS TO BE SEALED WATER TIGHT WITH "CON-SEAL".
6. EXTERIOR OF TANK TO BE "AQUA-SAFE" COATED.
7. ALL PRECAST SECTIONS AND BASES SHALL HAVE THE DATE OF MANUFACTURE AND THE NAME OF THE MANUFACTURER MARKED ON THE INSIDE WALL.
8. LADDER PROVIDED AND INSTALLED BY OTHERS.
9. IDENTIFICATION TAGS FOR CABLES IN MANHOLE SHALL BE SET AT THE TIME OF MANHOLE INSTALLATION BY OTHERS.

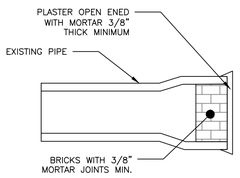
DESIGN NOTES:



1. ANY ALTERNATE TRENCHING METHODS SHALL BE APPROVED IN ADVANCE BY THE CITY.
2. ALL CONSTRUCTION METHODS SHALL CONFORM TO THE CITY OF PORTLAND TECHNICAL STANDARDS FIGURE II-2.
3. BRACING & SHEETING OR OTHER TRENCH PROTECTION TO BE PROVIDED TO MEET APPLICABLE STATE AND O.S.H.A SAFETY STANDARDS. ALL SUCH TRENCH PROTECTION SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.
4. WHERE APPLICABLE, PERFORATIONS IN STORM DRAIN (PERF. SD) SHALL BE ORIENTED UP.
5. ALL STORM DRAINS SHALL BE PVC SDR 35 MIN PS-46 RATING OR OR IN ACCORDANCE WITH CITY OF PORTLAND TECHNICAL MANUAL , SECTION 2 – SANITARY SEWER AND STORM DRAIN – PART 2.5.2
6. IN PAVED AREAS, DEPTHS OF GRAVEL AND HOT MIX ASPHALT PAVEMENT SHALL MATCH THE GREATER OF EXISTING CONDITIONS OR THE REQUIREMENTS FOR THE CORRESPONDING STREET CLASSIFICATION.
7. THIS DETAIL SHALL BE APPLIED ONLY TO PIPE TRENCHES WITHIN OF THE CITY OF PORTLAND R.O.W.
8. STORM DRAIN COVER BETWEEN 2' AND 3' SHALL INCLUDE 4" OF RIGID INSULATION. COVER BETWEEN 3' AND 4' SHALL INCLUDE 2" RIGID INSULATION. OTHER UTILITIES: ADD 2" OF RIGID INSULATION FOR EACH FOOT ABOVE MINIMUM DEPTH.
9. DEPTH OF BITUMINOUS PAVEMENT AND AGGREGATE COURSES SHALL BE DETERMINED BY STREET CLASSIFICATION.
10. DIMENSION B SHALL BE SUFFICIENT TO ALLOW CRUSHED STONE BEDDING TO BE PLACED AND COMPACTED UNDER THE HAUNCHES OF THE PIPE; BUT IN ALL CASES DIMENSION B SHALL BE AT LEAST 9".
11. DIMENSION A IS THE MAXIMUM WIDTH ALLOWED FOR CALCULATING PAY QUANTITIES UNDER GRANULAR BORROW, CRUSHED STONE, STRUCTURAL EARTH EXCAVATION, AND STRUCTURAL ROCK EXCAVATION. DIMENSION A SHALL BE BASED ON PIPE DIAMETER D, AS SET FORTH IN THE TABLE BELOW.

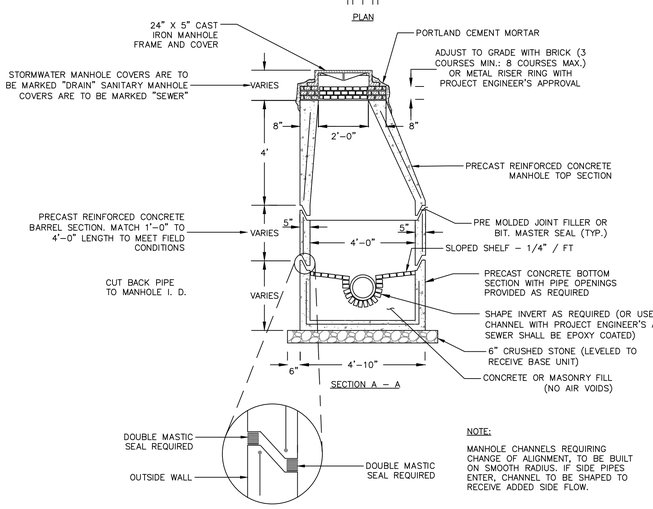
DESIGN NOTES:

1. IT IS ASSUMED THAT THE EXISTING PIPE IS OF VITRIFIED CLAY CONSTRUCTION. USE CAP OR PLUG FOR PVC PIPE

MASONRY PLUG
NOT TO SCALE

NOTE:

1. EXISTING MANHOLE OR CATCH BASIN SHALL BE CORE DRILLED FOR PIPE INSTALLATION
2. PLACE NON-SHRINK GROUT AND WIRE-CUT BRICKS AROUND PIPE CONNECTIONS AS NECESSARY

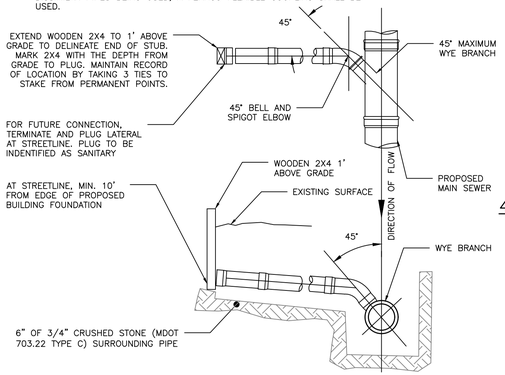


NEW PIPE TO EXISTING STRUCTURE CONNECTION DETAIL
NOT TO SCALE

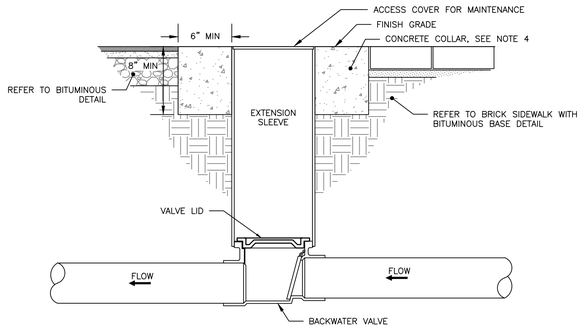
NOTES:

1. INSIDE DROP MAHOLES SHALL BE A MINIMUM OF 5' DIAMETER
2. ALL INSIDE DROP CONNECTIONS FOR SERVICES AND COLLECTOR SEWERS SHALL USE THE DROP BOWL AS SHOWN

TYPICAL INSIDE DROP MANHOLE
NOT TO SCALE



NOTE:
MANHOLE CHANNELS REQUIRING CHANGE OF ALIGNMENT, TO BE BUILT ON SMOOTH RADIUS. IF SIDE PIPES ENTER, CHANNEL TO BE SHAPED TO RECEIVE ADDED SIDE FLOW.



NOTES:

1. UNLESS OTHERWISE SPECIFIED, CONCRETE SHALL BE 4000 PSI @28 DAYS.
2. RECONSTRUCT INTERIOR MANHOLE INVERT AS NECESSARY TO ACCOMMODATE NEW PIPE.
3. THIS DETAIL IS INTENDED TO PROVIDE ADDITIONAL INFORMATION TO THE CONTRACTOR IN REGARDS TO THE CONNECTION OF THE DOGHOUSE MANHOLE BASE TO THE EXISTING SANITARY SEWER SYSTEM.
4. MANHOLES MAY BE CONSTRUCTED OF PRECAST REINFORCED CONCRETE, OR CAST IN PLACE.
5. PRECAST REINFORCED CONE BARREL MANUFACTURED PER ASTM SPEC. C-478.
6. ALL MANHOLE RISERS SHALL BE ETHERIDGE 24" OR APPROVAL EQUAL.
7. ALL SANITARY MANHOLES SHALL HAVE A WATERPROOFING COATING APPLIED TO THE EXTERIOR SURFACE. THE MATERIAL SHALL BE MINWAX FIBROUS BRUSH COAT MADE BY THE MINWAX COMPANY, NEW YORK, NEW YORK; TREMCO 121 FOUNDATION COATING, MADE BY THE TREMCO MANUFACTURING COMPANY, CLEVELAND, OHIO; INERTOL NO-7 MADE BY INERTOL COMPANY, NEWARK, NEW JERSEY; CAMGER SUPERSEAL WATER-PROOFING CONCRETE COATING PPS-922-2, MADE BY THE CAMGER COATING SYSTEMS, INC., NORFOLK, MASSACHUSETTS OR APPROVED EQUAL.
8. CASTINGS SHALL CONFORM TO ASTM DESIGNATION A48-CLASS 35.

PRECAST CONCRETE MANHOLE – CITY OF PORTLAND

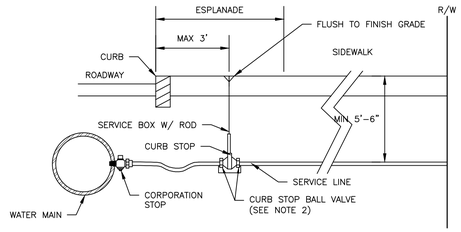
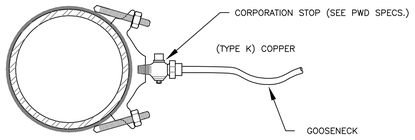
C-44

VALVE BOX & COVER
NOT TO SCALE

NOTES:

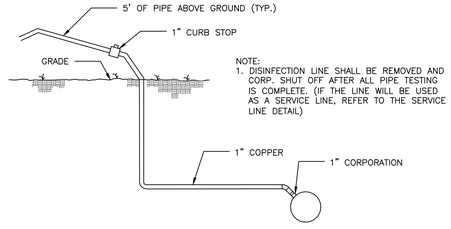


1. INSTALL MAINS WITH A MINIMUM OF 36" OF COVER AND SERVICES WITH A MINIMUM OF 24" OF COVER. EXCEPTIONS MAY BE MADE WITHIN SLATE AND FEDERAL CODES WITH THE PRIOR APPROVAL OF THE OPERATIONS CENTER MANAGER. INSTALL PLASTIC PIPE WITH SLACK SO EXTERNAL LOADING OR THERMAL CONTRACTION WILL NOT PLACE UNNECESSARY STRESS ON THE PIPE OR JOINTS. IN CASES WHERE A STOPPER FITTING OF OTHER NEW MATERIAL IS ADDED TO AN OLDER MAIN SUCH THAT THE MAIN HAS LESS THAN 24" OF COVE, THE CONTRACTOR SHOULD PROVIDE PERMANENT PROTECTION SUCH AS CONCRETE. WHENEVER A MAIN WILL BE INSTALLED WITH LESS THAN 24" OF COVER, NOTIFY THE OPERATIONS CENTER MANAGER OR THE DESIGNEE SO THEY CAN REQUEST APPROVAL FROM THE DEPARTMENT OF PUBLIC UTILITIES.
2. PROCEDURE – SEE FIGURE BELOW
   - 2.1. REMOVE ALL EXCESS WATER FROM THE TRENCH WITH PUMPS OR EQUIVALENT
   - 2.2. PLACE A LAYER OF SAND 4" DEEP IN TRENCH BOTTOM BEFORE LAYING THE PIPE IN THE TRENCH. THE OPERATIONS CENTER MANAGER OR COMPANY FIELD REPRESENTATIVE MAY ALLOW USE OF CLEAN FILL MATERIAL INSTEAD OF SAND PROVIDED IT IS CLEAN AND FREE OF ANY OBJECTS THAT MAY IMPINGE ON THE PIPE.
   - 2.3. FOR PLASTIC PIPE, INSTALL NUMBER 12 AWG SOLID COPPER WIRE (TRACER WIRE) WITH YELLOW INSULATION JACKET ALONG THE LENGTH OF THE SERVICE. THIS WIRE IS USED TO LOCATE THE PIPE. DO NOT PHYSICALLY ATTACH THE WIRE OR ALLOW THE WIRE TO TOUCH THE PLASTIC PIPE. KEEP THE TRACER WIRE AT LEAST 4" AWAY FROM THE PLASTIC PIPE. IF THE INSTALLATION IS TRENCHLESS, THE TRACER WIRE MAY BE LESS THEN 4" AWAY FROM THE PLASTIC PIPE.
   - 2.4. PLACE A MINIMUM OF 6" OF SAND OVER THE PIPE. THE OPERATIONS CENTER MANAGER OR COMPANY FIELD REPRESENTATIVE MAY ALLOW USE OF CLEAN FILL MATERIAL INSTEAD OF SAND PROVIDED IT IS CLEAN AND FREE OF ANY OBJECTS THAT MAY IMPINGE ON THE PIPE.
   - 2.5. PLACE WARNING TAPE IN THE TRENCH NOT MORE THAN 12" BELOW FINISHED GRADE. THE STANDARD WARNING TAPE IS YELLOW, NON-DETECTABLE TAPE, 6" WIDE.
   - 2.6. FILL THE REST OF THE TRENCH WITH CLEAN FILL MATERIAL, USING THE SPOIL WHERE SUITABLE AND ACCEPTABLE. IF THE ORIGINAL SPOIL MATERIAL IS NOT SUITABLE FOR USE AS A SUB-GRADE MATERIAL WHEN RESTORING ROAD SURFACES, USE MATERIAL REQUIRED BY STATE OR LOCAL AGENCIES. REMOVE ALL EXCESS SPOIL IN THE ACCEPTED MANNER.
   - 2.7. PROPERLY COMPACT THE TRENCH TO INSURE THE TRENCH WILL NOT SETTLE.
3. SEE GAS STANDARD 10.03 FOR A DESCRIPTION OF SUITABLE MATERIALS FOR PIPE BEDDING AND FINAL BACKFILL.



NATURAL GAS MAIN/SERVICE TRENCH DETAIL
NOT TO SCALE

NOTES:



1. ALL MATERIALS AND INSTALLATION PROCEDURES MUST COMPLY WITH PORTLAND WATER DISTRICT (PWD) SPECIFICATIONS.
2. CURB STOP BALL VALVE TO BE MADE OF COPPER OR BRASS UNLESS OTHERWISE NOTED BY THE PORTLAND WATER DISTRICT.
3. SERVICE LINE TO BE MADE OF TYPE K COPPER.
4. CONCRETE BLOCKING SHALL BE ADDED TO THE BASE OF THE CURB STOP TO PROVIDE STRUCTURAL SUPPORT FOR THE CURB STOP AND SERVICE BOX.
5. CURB STOP TO BE INSTALLED IN PERVIOUS AREAS TO THE GREATEST EXTENT FEASIBLE. FOR LOTS IN WHICH THE CURB STOP MUST BE LOCATED IN A SIDEWALK OR DRIVEWAY, CONTRACTOR TO CONTACT PWD FOR REVIEW AND APPROVAL PRIOR TO INSTALLATION.
6. CONTRACTOR TO COIL ACCESS PIPE ON PRIVATE PROPERTY PRIOR TO CONNECTION TO HOUSE. ACCESS PIPE TO BE ADEQUATELY MARKED IF BURIED OR PROTECTED IF STORED ABOVE GROUND.

1.0 EROSION CONTROL MEASURES AND SITE STABILIZATION

AS PART OF THE SITE DEVELOPMENT, THE FOLLOWING TEMPORARY AND PERMANENT EROSION AND SEDIMENTATION CONTROL DEVICES SHALL BE IMPLEMENTED. DEVICES SHALL BE INSTALLED AS DESCRIBED IN THIS REPORT OR WITHIN THE PLAN SET. SEE THE MAINE EROSION AND SEDIMENT CONTROL HANDBOOK FOR CONSTRUCTION: BEST MANAGEMENT PRACTICES FOR FURTHER REFERENCE.

1.1 TEMPORARY EROSION CONTROL MEASURES

THE FOLLOWING TEMPORARY EROSION AND SEDIMENTATION CONTROL MEASURES ARE PLANNED FOR THE PROJECT'S CONSTRUCTION PERIOD:

1.1.1 CRUSHED STONE STABILIZED CONSTRUCTION ENTRANCES SHALL BE PLACED AT ALL ACCESS POINTS TO THE PROJECT SITE WHERE THERE ARE DISTURBED AREAS. THE FOLLOWING SPECIFICATIONS SHALL BE FOLLOWED AT A MINIMUM:
- STONE SIZE SHALL BE 2–3 INCHES, OR RECLAIMED OR RECYCLED CONCRETE EQUIVALENT.
- THE THICKNESS OF THE ENTRANCE STONE LAYER SHALL BE NO LESS THAN 6 INCHES.
- THE ENTRANCE SHALL NOT BE LESS THAN 20 FEET WIDE, HOWEVER NOT LESS THAN THE FULL WIDTH OF POINTS WHERE INGRESS OR EGRESS OCCURS. THE LENGTH SHALL NOT BE LESS THAN 50 FEET IN LENGTH.
- GEOTEXTILE FABRIC (WOVEN OR NON–WOVEN) SHALL BE PLACED OVER THE ENTIRE ENTRANCE AREA.
- THE ENTRANCE/EXIT SHALL BE MAINTAINED TO THE EXTENT THAT IT WILL PREVENT THE TRACKING OF SEDIMENT ONTO PUBLIC ROAD WAYS.

1.1.2 SILTATION FENCE OR EROSION CONTROL BERM SHALL BE INSTALLED DOWN GRADIENT OF ANY DISTURBED AREAS TO TRAP RUNOFF BORNE SEDIMENTS UNTIL PERMANENT STABILIZATION IS ACHIEVED. THE SILT FENCE OR EROSION CONTROL BERM SHALL BE INSTALLED PER THE DETAILS PROVIDED IN THE PLAN SET AND INSPECTED BEFORE AND IMMEDIATELY AFTER EACH RAINFALL AND AT LEAST DAILY DURING PROLONGED RAINFALL. REPAIRS SHALL BE MADE IF THERE ARE ANY SIGNS OF EROSION OR SEDIMENTATION BELOW THE FENCE LINE OR BERM. IF THERE ARE SIGNS OF UNDERCUTTING AT THE CENTER OR THE EDGES, OR IMPOUNDING OF LARGE VOLUMES OF WATER BEHIND THE FENCE OR BERM, THE BARRIER SHALL BE REPLACED WITH A STONE CHECK DAM.

1.1.3 HAY MULCH INCLUDING HYDRO SEEDING IS INTENDED TO PROVIDE COVER FOR DENUDED OR SEEDED AREAS UNTIL REVEGETATION IS ESTABLISHED. MULCH PLACED BETWEEN APRIL 15TH AND NOVEMBER 1ST ON SLOPES OF LESS THAN 15 PERCENT SHALL BE COVERED BY FABRIC NETTING AND ANCHORED WITH STAPLES IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATION. MULCH PLACED BETWEEN NOVEMBER 1ST AND APRIL 15TH ON SLOPES EQUAL TO OR STEEPER THAN 8 PERCENT AND EQUAL TO OR FLATTER THAN 2:1 SHALL USE MATS OR FABRIC NETTING AND ANCHORED WITH STAPLES IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATION.

1.1.4 AT ANY TIME OF THE YEAR, ALL SLOPES STEEPER THAN 3:1 SHALL BE STABILIZED WITH DOUBLE NET EROSION CONTROL BLANKET BIONET SC150BN BY NORTH AMERICAN GREEN OR APPROVED EQUAL, OR EROSION CONTROL MIX SLOPE PROTECTION AS DETAILED WITHIN THE PLANS.

1.1.5 WASHINGTON AVENUE SHALL BE SWEPT TO CONTROL MUD AND DUST FROM THE CONSTRUCTION SITE AS NECESSARY. ADD ADDITIONAL STONE TO THE STABILIZED CONSTRUCTION ENTRANCE TO MINIMIZE THE TRACKING OF MATERIAL OFF THE SITE AND ONTO THE SURROUNDING ROADWAYS.

1.1.6 DURING DEMOLITION, CLEARING AND GRUBBING OPERATIONS, STONE CHECK DAMS SHALL BE INSTALLED AT ANY AREAS OF CONCENTRATED FLOW. THE MAXIMUM HEIGHT OF THE CHECK DAM SHALL NOT EXCEED 2 FEET. THE CENTER OF THE CHECK DAM SHALL BE 6 INCHES BELOW THE OUTER EDGES OF THE DAM. THE CONTRACTOR SHALL MULCH THE SIDE SLOPES AND INSTALL STONE CHECK DAMS FOR ALL NEWLY EXCAVATED DITCH LINES WITHIN 24 HOURS OF THEIR CREATION.

1.1.7 SILT FENCE STAKE SPACING SHALL NOT EXCEED 6 FEET UNLESS THE FENCE IS SUPPORTED WITH 14 GAUGE WIRE IN WHICH CASE THE MAXIMUM SPACING SHALL NOT EXCEED 10 FEET. THE SILT FENCE SHALL BE "TOED" INTO THE GROUND.

1.1.8 STORMDRAIN INLET PROTECTION SHALL BE PROVIDED TO STORMDRAINS THROUGH THE USE OF ANY OF THE FOLLOWING: HAY BALE DROP INLET STRUCTURES, SILT FENCE DROP INLET SEDIMENT FILTER, GRAVEL AND WIRE MESH DROP INLET SEDIMENT FILTER, OR CURB INLET SEDIMENT FILTER. BARRIERS SHALL BE INSPECTED AFTER EVERY RAINFALL EVENT AND REPAIRED AS NECESSARY. SEDIMENTS SHALL BE REMOVED WHEN ACCUMULATION HAS REACHED ½ THE DESIGN HEIGHT.

1.1.9 DUST CONTROL SHALL BE ACCOMPLISHED BY THE USE OF ANY OF THE FOLLOWING: WATER, CALCIUM CHLORIDE, STONE, OR AN APPROVED MDEP PRODUCT. DUST CONTROL SHALL BE APPLIED AS NEEDED TO ACCOMPLISH DUST CONTROL.

1.1.10 TEMPORARY LOAM, SEED, AND MULCHING SHALL BE USED IN AREAS WHERE NO OTHER EROSION CONTROL MEASURE IS USED. APPLICATION RATES FOR SEEDING ARE PROVIDED AT THE END OF THIS REPORT.

1.1.11 STOCKPILES SHALL BE STABILIZED WITHIN 7 DAYS OF FORMATION UNLESS A SCHEDULED RAIN EVENT OCCURS PRIOR TO THE 7 DAY WINDOW, IN WHICH CASE THE STOCKPILE SHALL BE STABILIZED PRIOR TO THE RAIN EVENT. METHODS OF STABILIZATION SHALL BE MULCH, EROSION CONTROL MIX, OR EROSION CONTROL BLANKETS/MATS. SILT FENCE OR A WOOD WASTE COMPOST FILTER BERM SHALL BE PLACED DOWNHILL OF ANY SOIL STOCKPILE LOCATION.

1.1.12 FOR DISTURBANCE BETWEEN NOVEMBER 1 AND APRIL 15, PLEASE REFER TO WINTER STABILIZATION PLAN IN THIS REPORT AND THE MAINE EROSION AND SEDIMENT CONTROL BMP MANUAL FOR FURTHER INFORMATION.

1.1.13 IT IS OF THE UTMOST IMPORTANCE THAT STORMWATER RUNOFF AND POTENTIAL SEDIMENT FROM THE CONSTRUCTION SITE BE DIVERTED AROUND THE PROPOSED UNDERDRAINS UNTIL THE TRENCH IS BACKFILLED.

1.2 PERMANENT EROSION CONTROL MEASURES

THE FOLLOWING PERMANENT EROSION CONTROL MEASURES ARE INTENDED FOR POST DISTURBANCE AREAS OF THE PROJECT.

1.2.1 ALL DISTURBED AREAS DURING CONSTRUCTION, NOT SUBJECT TO OTHER PROPOSED CONDITIONS, SHALL RECEIVE A MINIMUM 4" OF LOAM AND SHALL BE LIMED, AND MULCHED. EROSION CONTROL BLANKETS OR MATS SHALL BE PLACED OVER THE MULCH IN AREAS NOTED IN PARAGRAPH 4.2 OF THIS REPORT.

1.2.2 ALL STORMWATER DEVICES SHALL BE INSTALLED AND TRIBUTARY AREAS STABILIZED PRIOR RECEIVING STORMWATER.

1.2.3 REFER TO THE MAINE EROSION AND SEDIMENT CONTROL BMP MANUAL FOR ADDITIONAL INFORMATION.

2.0 EROSION AND SEDIMENTATION CONTROL PLAN

2.1 THE EROSION AND SEDIMENTATION CONTROL PLAN IS INCLUDED WITHIN THE PLAN SET.

3.0 DETAILS AND SPECIFICATIONS

3.1 EROSION CONTROL DETAILS AND SPECIFICATIONS ARE INCLUDED IN THE PLAN SET.

4.0 STABILIZATION PLAN FOR WINTER CONSTRUCTION

WINTER CONSTRUCTION CONSISTS OF EARTHWORK DISTURBANCE BETWEEN THE DATES OF NOVEMBER 1 AND APRIL 15. IF A CONSTRUCTION SITE IS NOT STABILIZED WITH PAVEMENT, A ROAD GRAVEL BASE, 75% MATURE VEGETATION COVER OR RIPRAP BY NOVEMBER 15, THEN THE SITE SHALL BE PROTECTED WITH OVER–WINTER STABILIZATION. ANY AREA NOT STABILIZED WITH PAVEMENT, VEGETATION, MULCHING, EROSION CONTROL MIX, EROSION CONTROL MATS, RIPRAP, OR GRAVEL BASE ON A ROAD SHALL BE CONSIDERED OPEN.

THE CONTRACTOR SHALL LIMIT THE WORK AREA TO AREAS THAT WORK WILL OCCUR IN DURING THE SUBSEQUENT 15 DAYS AND SO THAT IT CAN BE MULCHED ONE DAY PRIOR TO A SNOW EVENT. THE CONTRACTOR SHALL STABILIZE WORK AREAS PRIOR TO OPENING ADDITIONAL WORK AREAS TO MINIMIZE AREAS WITHOUT EROSION CONTROL MEASURES.

THE FOLLOWING MEASURES SHALL BE IMPLEMENTED DURING WINTER CONSTRUCTION PERIODS:

4.1 SEDIMENT BARRIERS

DURING FROZEN CONDITIONS, SEDIMENT BARRIERS MAY CONSIST OF EROSION CONTROL MIX BERMS OR ANY OTHER RECOGNIZED SEDIMENT BARRIERS AS FROZEN SOIL PREVENTS THE PROPER INSTALLATION OF HAY BALES OR SILT FENCES.

4.2 MULCHING

ALL AREAS SHALL BE CONSIDERED TO BE DENUDED UNTIL SEEDED AND MULCHED. HAY AND STRAW MULCH SHALL BE APPLIED AT A RATE OF 150 LB. PER 1,000 SQUARE FEET OR 3 TONS/ACRE (TWICE THE NORMAL ACCEPTED RATE OF 75–LBS./1,000 S.F. OR 1.5 TONS/ACRE) AND SHALL BE PROPERLY ANCHORED. EROSION CONTROL MIX MUST BE APPLIED WITH A MINIMUM 4 INCH THICKNESS. MULCH SHALL NOT BE SPREAD ON TOP OF SNOW. THE SNOW SHALL BE REMOVED DOWN TO A ONE–INCH DEPTH OR LESS PRIOR TO APPLICATION. AFTER EACH DAY OF FINAL GRADING, THE AREA SHALL BE PROPERLY STABILIZED WITH ANCHORED HAY OR STRAW OR EROSION CONTROL MATTING. AN AREA SHALL BE CONSIDERED TO HAVE BEEN STABILIZED WHEN EXPOSED SURFACES HAVE BEEN EITHER MULCHED OR ADEQUATELY ANCHORED SO THAT GROUND SURFACE IS NOT VISIBLE THROUGH THE MULCH. BETWEEN THE DATES OF NOVEMBER 1 AND APRIL 15, ALL MULCH SHALL BE ANCHORED BY EITHER MULCH NETTING, TRACKING OR WOOD CELLULOSE FIBER. THE COVER WILL BE CONSIDERED SUFFICIENT WHEN THE GROUND SURFACE IS NOT VISIBLE THROUGH THE MULCH. AFTER NOVEMBER 1ST, MULCHING AND ANCHORING OF ALL EXPOSED SOIL SHALL OCCUR AT THE END OF EACH FINAL GRADING WORKDAY.

4.3 SOIL STOCKPILING

STOCKPILES OF SOIL OR SUBSOIL SHALL BE MULCHED FOR OVER WINTER PROTECTION WITH HAY OR STRAW AT TWICE THE NORMAL RATE OR WITH A FOUR–INCH LAYER OF EROSION CONTROL MIX. THIS SHALL BE DONE WITHIN 24 HOURS OF STOCKING AND RE–ESTABLISHED PRIOR TO ANY RAINFALL OR SNOWFALL.

4.4 SEEDING

BETWEEN THE DATES OF OCTOBER 15TH AND APRIL 1ST, LOAM OR SEED SHALL NOT BE REQUIRED. DURING PERIODS OF ABOVE FREEZING TEMPERATURES FINISHED AREAS SHALL BE FINE GRADED AND EITHER PROTECTED WITH MULCH OR TEMPORARILY SEEDED AND MULCHED UNTIL SUCH TIME AS THE FINAL TREATMENT CAN BE APPLIED. IF THE DATE IS AFTER NOVEMBER 1ST AND IF THE EXPOSED AREA HAS NOT BEEN LOAMED, FINAL GRADING WITH A UNIFORM SURFACE, THEN THE AREA MAY BE DORMANT SEEDED AT A RATE OF 3 TIMES HIGHER THAN SPECIFIED FOR PERMANENT SEED AND THEN MULCHED.

DORMANT SEEDING MAY BE PLACED PRIOR TO THE PLACEMENT OF MULCH OR EROSION CONTROL BLANKETS. IF DORMANT SEEDING IS USED FOR THE SITE, ALL DISTURBED AREAS SHALL RECEIVE 4" OF LOAM AND SEED AT AN APPLICATION RATE OF 5 LBS/1,000 S.F. ALL AREAS SEEDED DURING THE WINTER SHALL BE INSPECTED IN THE SPRING FOR ADEQUATE CATCH. ALL AREAS INSUFFICIENTLY VEGETATED (LESS THAN 75% CATCH) SHALL BE REVEGETATED BY REPLACING LOAM, SEED AND MULCH. IF DORMANT SEEDING IS NOT USED FOR THE SITE, ALL DISTURBED AREAS SHALL BE REVEGETATED IN THE SPRING.

4.5 OVER WINTER STABILIZATION OF DISTURBED SOILS

BY SEPTEMBER 15TH, ALL DISTURBED SOILS ON AREAS HAVING A SLOPE LESS THAN 15% SHALL BE SEEDED AND MULCHED. IF THE DISTURBED AREAS ARE NOT STABILIZED BY THIS DATE, THEN ONE OF THE FOLLOWING ACTIONS SHALL BE TAKEN TO STABILIZE THE SOIL FOR LATE FALL AND WINTER:

- STABILIZE THE SOIL WITH TEMPORARY VEGETATION – BY OCTOBER 1ST, SEED THE DISTURBED SOIL WITH WINTER RYE AT A SEEDING RATE OF 3LBS PER 1,000 S.F., LIGHTLY MULCH THE SEEDED SOIL WITH HAY OR STRAW AT 75 LBS PER 1,000 S.F., AND ANCHOR THE MULCH WITH PLASTIC NETTING. MONITOR GROWTH OF THE RYE OVER THE NEXT 30 DAYS. IF THE RYE FAILS TO GROW AT LEAST THREE INCHES OR FAILS TO COVER AT LEAST 75% OF THE DISTURBED SOIL BEFORE NOVEMBER 1ST, THEN MULCH THE AREA FOR OVER–WINTER PROTECTION.
- STABILIZE THE SOIL WITH SOD – STABILIZE THE DISTURBED SOIL WITH PROPERLY INSTALLED SOD BY OCTOBER 1ST. PROPER INSTALLATION INCLUDES PINNING THE SOD ONTO THE SOIL WITH WIRE PINS, ROLLING THE SOD TO GUARANTEE CONTACT BETWEEN THE SOD AND UNDERLYING SOIL, AND WATERING THE SOD TO PROMOTE ROOT GROWTH INTO THE DISTURBED SOIL.
- STABILIZE THE SOIL WITH MULCH – BY NOVEMBER 15TH, MULCH THE DISTURBED SOIL BY SPREADING HAY OR STRAW AT A RATE OF AT LEAST 150 LBS PER 1,000 S.F. ON THE AREA SO THAT NO SOIL IS VISIBLE THROUGH THE MULCH. IMMEDIATELY AFTER APPLYING THE MULCH, ANCHOR THE MULCH WITH NETTING TO PREVENT WIND FROM MOVING THE MULCH OFF THE DISTURBED SOIL.

4.6 OVER WINTER STABILIZATION OF DISTURBED SLOPES

ALL STONE–COVERED SLOPES SHALL BE CONSTRUCTED AND STABILIZED BY NOVEMBER 15TH. ALL SLOPES TO BE VEGETATED SHALL BE SEEDED AND MULCHED BY SEPTEMBER 1ST. A SLOPE IS CONSIDERED A GRADE GREATER THAN 15%. IF A SLOPE TO BE VEGETATED IS NOT STABILIZED BY SEPTEMBER 1ST, THEN ONE OF THE FOLLOWING ACTION SHALL BE TAKEN TO STABILIZE THE SLOPE FOR LATE FALL AND WINTER:

- STABILIZE THE SOIL WITH TEMPORARY VEGETATION AND EROSION CONTROL MATS – BY OCTOBER 1ST THE DISTURBED SLOPE SHALL BE SEEDED WITH WINTER RYE AT A SEEDING RATE OF 3 LBS PER 1,000 S.F. AND THEN INSTALL EROSION CONTROL MATS OR ANCHORED MULCH OVER THE SEEDING. IF THE RYE FAILS TO GROW AT LEAST THREE INCHES OR FAILS TO COVER AT LEAST 75% OF THE SLOPE BY NOVEMBER 1ST, THEN THE CONTRACTOR SHALL COVER THE SLOPE WITH A LAYER OF EROSION CONTROL MIX OR WITH STONE RIPRAP.
- STABILIZE THE SOIL WITH SOD – THE DISTURBED SLOPE SHALL BE STABILIZED WITH PROPERLY INSTALLED SOD BY OCTOBER 1ST. PROPER INSTALLATION INCLUDES THE CONTRACTOR PINNING THE SOD ONTO THE SLOPE WITH WIRE PINS, ROLLING THE SOD TO GUARANTEE CONTACT BETWEEN THE SOD AND UNDERLYING SOIL, AND WATERING THE SOD TO PROMOTE ROOT GROWTH INTO THE DISTURBED SOIL. THE CONTRACTOR SHALL NOT USE LATE–SEASON SOD INSTALLATION TO STABILIZE SLOPES HAVING A GRADE GREATER THAN 3H:1V OR HAVING GROUNDWATER SEEPS ON THE SLOPE FACE.
- STABILIZE THE SOIL WITH EROSION CONTROL MIX – EROSION CONTROL MIX SHALL BE PROPERLY INSTALLED BY NOVEMBER 15TH. THE CONTRACTOR SHALL NOT USE EROSION CONTROL MIX TO STABILIZE SLOPES HAVING GRADES GREATER THAN 2H:1V OR HAVING GROUNDWATER SEEPS ON THE SLOPE FACE.
- STABILIZE THE SOIL WITH STONE RIPRAP – PLACE A LAYER OF STONE RIPRAP ON THE SLOPE BY NOVEMBER 15TH. A REGISTERED PROFESSIONAL ENGINEER SHALL BE HIRED TO DETERMINE THE STONE SIZE NEEDED FOR STABILITY ON THE SLOPE AND TO DESIGN A FILTER LAYER FOR UNDERNEATH THE RIPRAP.

5.0 INSPECTION AND MAINTENANCE

A PERSON WITH KNOWLEDGE OF EROSION AND STORMWATER CONTROL, INCLUDING THE STANDARDS AND CONDITIONS IN THE PERMIT, SHALL CONDUCT PERIODIC VISUAL INSPECTIONS OF INSTALLED EROSION CONTROL MEASURES. THE FREQUENCY OF INSPECTION SHALL OCCUR AT LEAST ONCE EVERY TWO WEEKS, AS WELL AS AFTER A "STORM EVENT". A "STORM EVENT" SHALL CONSIST 0.5 INCHES OF RAIN WITHIN A 24 HOUR PERIOD. THE FOLLOWING EROSION AND SEDIMENT CONTROL – BEST MANAGEMENT PRACTICES (BMP'S) SHALL INSPECTED IN THE MANNER AS DESCRIBED.

5.1 SEDIMENT BARRIERS

HAY BALE BARRIERS, SILT FENCES AND FILTER BERMS SHALL BE INSPECTED AND REPAIRED FOR THE FOLLOWING IF THERE ARE ANY SIGNS OF EROSION OR SEDIMENTATION BELOW THEM. IF THERE ARE SIGNS OF UNDERCUTTING AT THE CENTER OR THE EDGES OF THE BARRIER, OR IMPOUNDING OF LARGE VOLUMES OF WATER BEHIND THEM, SEDIMENT BARRIERS SHALL BE REPLACED WITH A TEMPORARY CHECK DAM. SHOULD THE FABRIC ON A SILT FENCE OR FILTER BARRIER DECOMPOSE OR BECOME INEFFECTIVE PRIOR TO THE END OF THE EXPECTED USABLE LIFE AND THE BARRIER IS STILL NECESSARY, THE FABRIC SHALL BE REPLACED PROMPTLY. SEDIMENT DEPOSITS SHOULD BE REMOVED WHEN DEPOSITS REACH APPROXIMATELY ONE–HALF THE HEIGHT OF THE BARRIER. FILTER BERMS SHOULD BE RESHAPED AS NEEDED. ANY SEDIMENT DEPOSITS REMAINING IN PLACE AFTER THE SILT FENCE OR FILTER BARRIER IS NO LONGER REQUIRED SHOULD BE DRESSED TO CONFORM TO THE EXISTING GRADE, PREPARED AND SEEDED.

5.2 STABILIZED STONE CONSTRUCTION ENTRANCES

THE EXIT SHALL BE MAINTAINED IN A CONDITION THAT WILL PREVENT TRACKING OF SEDIMENT ONTO PUBLIC RIGHTS–OF–WAY. WHEN THE CONTROL PAD BECOMES INEFFECTIVE, THE STONE SHALL BE REMOVED ALONG WITH THE COLLECTED SOIL MATERIAL AND REDISTRIBUTED ON SITE IN A STABLE MANNER. THE ENTRANCE SHOULD THEN BE RECONSTRUCTED. THE CONTRACTOR SHALL SWEEP OR WASH PAVEMENT AT EXITS, WHICH HAVE EXPERIENCED MUD–TRACKING ON TO THE PAVEMENT OR TRAVELED WAY. WHEN WASHING IS REQUIRED, IT SHALL BE DONE ON AN AREA STABILIZED WITH AGGREGATE, WHICH DRAINS INTO AN APPROVED SEDIMENT TRAPPING DEVICE. ALL SEDIMENT SHALL BE PREVENTED FROM ENTERING STORM DRAINS, DITCHES, OR WATERWAYS.

5.3 MULCHED AREAS

ALL MULCHES MUST BE INSPECTED PERIODICALLY, IN PARTICULAR AFTER RAINSTORMS, TO CHECK FOR RILL EROSION. IF LESS THAN 90% OF THE SOIL SURFACE IS COVERED BY MULCH, ADDITIONAL MULCH SHALL BE IMMEDIATELY APPLIED. NETS MUST BE INSPECTED AFTER RAIN EVENTS FOR DISLOCATION OR FAILURE. IF WASHOUTS OR BREAKAGE OCCUR, RE–INSTALL THE NETS AS NECESSARY AFTER REPAIRING DAMAGE TO THE SLOPE. WHERE MULCH IS USED IN CONJUNCTION WITH ORNAMENTAL PLANTINGS, INSPECT PERIODICALLY THROUGHOUT THE YEAR TO DETERMINE IF MULCH IS MAINTAINING COVERAGE OF THE SOIL SURFACE. REPAIR AS NEEDED.

5.4 DUST CONTROL

WHEN TEMPORARY DUST CONTROL MEASURES ARE USED, REPETITIVE TREATMENT SHALL BE APPLIED AS NEEDED TO ACCOMPLISH CONTROL.

5.5 STORMWATER APPURTENANCES

ALL UNDERDRAINS, STORM DRAINS, AND CATCH BASINS NEED TO BE OPERATING EFFECTIVELY AND FREE OF DEBRIS.

5.6 EROSION AND SEDIMENTATION CONTROL INSPECTIONS:

ACORN ENGINEERING HAS PERSONNEL QUALIFIED TO CONDUCT EROSION AND SEDIMENTATION CONTROL INSPECTIONS. FOR FURTHER INFORMATION CONTACT:

CONTACT: PETER HEIL, PE
TELEPHONE: (207) 775–2655

QUALIFICATIONS:

ø MAINE PROFESSIONAL ENGINEERING LICENSE #15318
ø MAINE DEP – CERTIFIED IN MAINTENANCE & INSPECTION OF STORMWATER BMP'S CERT
ø MAINE DEP – CERTIFIED THIRD–PARTY INSPECTOR
ø CERTIFIED PROFESSIONAL IN EROSION AND SEDIMENT CONTROL (CPESC) CERT. #7071

THE CONTRACTOR HAS SOLE RESPONSIBILITY FOR COMPLYING WITH THE EROSION AND SEDIMENTATION REPORT/PLAN, INCLUDING CONTROL OF FUGITIVE DUST. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY MONETARY PENALTIES RESULTING FROM FAILURE TO COMPLY WITH THESE STANDARDS.

6.0 IMPLEMENTATION SCHEDULE

THE FOLLOWING IMPLEMENTATION SEQUENCE IS INTENDED TO MAXIMIZE THE EFFECTIVENESS OF THE ABOVE DESCRIBED EROSION CONTROL MEASURES. CONTRACTORS SHOULD AVOID OVEREXPOSING DISTURBED AREAS AND LIMIT THE AMOUNT OF STABILIZATION AREA.

1. INSTALL A STABILIZED CONSTRUCTION ENTRANCE IN ALL LOCATIONS WHERE CONSTRUCTION TRAFFIC WILL ENTER AND EXIT THE SITE.
2. INSTALL PERIMETER SILT FENCE OR EROSION CONTROL BERM.
3. INSTALL ALL OTHER EROSION CONTROL DEVICES AS NECESSARY THROUGHOUT THE REMAINDER OF THIS SCHEDULE.
4. COMMENCE INSTALLATION OF DRAINAGE INFRASTRUCTURE.
5. PRIORITIZE THE DOWNHILL SIDE TO CONTAIN RUNOFF WITHIN THE SITE WHILE PROVIDING AN ENGINEERED OUTLET WITH SILTATION BARRIER TO THE MUNICIPAL STORMWATER SYSTEM WITHIN WASHINGTON AVENUE.
6. COMMENCE EARTHWORK OPERATIONS, WALL AND FOUNDATION INSTALLATION.
7. COMMENCE INSTALLATION OF UTILITIES.
8. CONTINUE EARTHWORK AND GRADING TO SUBGRADE AS NECESSARY FOR CONSTRUCTION.
9. COMPLETE INSTALLATION OF DRAINAGE INFRASTRUCTURE, AS WELL AS OTHER UTILITY WORK.
10. COMPLETE REMAINING EARTHWORK OPERATIONS.
11. INSTALL SUB–BASE AND BASE GRAVELS IN PAVED AREAS.
12. INSTALL PAVING, CURBING AND BRICKWORK.
13. LOAM, LIME, FERTILIZE, SEED AND MULCH DISTURBED AREAS AND COMPLETE ALL LANDSCAPING.
14. ONCE THE SITE IS STABILIZED, 90% CATCH OF GRASS HAS BEEN OBTAINED, OR MULCHING OF LANDSCAPE AREAS IS COMPLETE REMOVE ALL TEMPORARY EROSION CONTROL MEASURES.
15. TOUCH UP AREAS WITHOUT A VIGOROUS CATCH OF GRASS WITH LOAM AND SEED.
16. COMPLETE SITE SIGNAGE AND STRIPING.
17. EXECUTE PROPER MAINTENANCE OF ALL TEMPORARY AND PERMANENT EROSION CONTROL MEASURES THROUGHOUT THE PROJECT.

THE ABOVE IMPLEMENTATION SEQUENCE SHOULD BE GENERALLY FOLLOWED BY THE SITE CONTRACTOR. HOWEVER, THE CONTRACTOR MAY CONSTRUCT SEVERAL ITEMS SIMULTANEOUSLY. THE CONTRACTOR SHALL SUBMIT TO THE OWNER A SCHEDULE OF THE COMPLETION OF THE WORK. IF THE CONTRACTOR IS TO COMMENCE THE CONSTRUCTION OF MORE THAN ONE ITEM ABOVE, THEY SHALL LIMIT THE AMOUNT OF EXPOSED AREAS TO THOSE AREAS IN WHICH WORK IS EXPECTED TO BE UNDERTAKEN DURING THE FOLLOWING 30 DAYS.

THE CONTRACTOR SHALL RE–VEGETATE DISTURBED AREAS AS RAPIDLY AS POSSIBLE. ALL AREAS SHALL BE PERMANENTLY STABILIZED WITHIN 7 DAYS OF FINAL GRADING OR BEFORE A STORM EVENT. THE CONTRACTOR SHALL INCORPORATE PLANNED INLETS AND DRAINAGE SYSTEMS AS EARLY AS POSSIBLE INTO THE CONSTRUCTION PHASE.

7.0 SEEDING PLAN

7.1 SITE PREPARATION

THE SEEDED AREAS SHALL BE FEASIBLY GRADED OUT TO PROVIDE THE USE OF EQUIPMENT FOR SEEDBED PREPARATION, SEEDING, MULCH APPLICATION, AND MULCH ANCHORING. IF NECESSARY, THE SITE MAY REQUIRE ADDITIONAL TEMPORARY EROSION CONTROL MEASURES OUTLINED IN THE EROSION CONTROL REPORT.

7.2 SEEDBED PREPARATION

FERTILIZER SHALL BE APPLIED TO THE SITE AT A RATE OF 13.8 POUNDS PER 1,000 SQUARE FEET. THE COMPOSITION OF THE FERTILIZER SHALL BE 10–10–10 (N–P205–K20) OR EQUIVALENT.

LIMESTONE SHALL BE APPLIED TO THE SITE AT A RATE OF 138 POUNDS PER 1,000 SQUARE FEET.

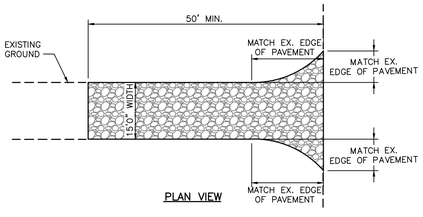
7.3 SEEDING

THE COMPOSITION AND AMOUNT OF TEMPORARY SEED APPLIED TO A SITE SHALL BE DETERMINED BY THE FOLLOWING TABLE:

TEMPORARY SEED APPLICATION RATES

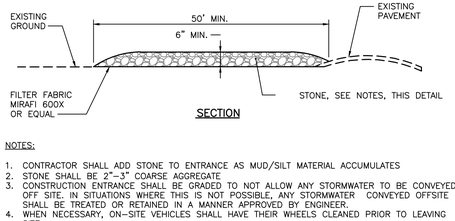
SEED	LBS / ACRE	RECOMMENDED SEEDING DATES
WINTER RYE	2.57	8/15 TO 10/1
OATS	1.84	4/1 TO 7/1 8/15 TO 9/15
ANNUAL RYGRASS	0.92	4/1 TO 7/1
SUDANGRASS	0.92	5/15 TO 8/15
PERENNIAL	0.92	8/15 TO 9/15
TOTAL	7.17 LBS/ACRE	

PERMANENT SEED APPLICATION RATES



SEED	LBS / ACRE
KENTUCKY BLUEGRASS	20.00
CREEPING RED FESCUE	20.00
PERENNIAL RYEGRASS	4.80
TOTAL	44.8 LBS/ACRE

7.4 MULCHING



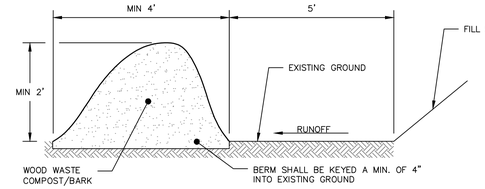
MULCH SHALL BE HARDWOOD AND APPLIED AT A RATE OF 70 LBS – 90 LBS PER 1,000 SQUARE FEET. THE MULCH SHALL BE INSTALLED AT A MINIMUM DEPTH OF 4 INCHES. THE SEEDED AREA SHALL BE MULCHED IMMEDIATELY AFTER SEED IS APPLIED. MULCHING DURING THE WINTER SEASON SHALL BE DOUBLE THE NORMAL AMOUNT. REFER TO DETAIL FOR MORE INFORMATION.

8.0 CONCLUSION

THE ABOVE EROSION CONTROL NARRATIVE IS INTENDED TO MINIMIZE THE DEVELOPMENT IMPACT BY IMPLEMENTING TEMPORARY AND PERMANENT EROSION CONTROL MEASURES. THE CONTRACTOR SHALL ALSO REFER TO THE MAINE EROSION AND SEDIMENT CONTROL BMP MANUAL FOR ADDITIONAL INFORMATION.

PLAN VIEW

SECTION



NOTES:

1. CONTRACTOR SHALL ADD STONE TO ENTRANCE AS MUD/SILT MATERIAL ACCUMULATES
2. STONE SHALL BE 2"–3" COARSE AGGREGATE
3. CONSTRUCTION ENTRANCE SHALL BE GRADED TO NOT ALLOW ANY STORMWATER TO BE CONVEYED OFF SITE. IN SITUATIONS WHERE THIS IS NOT POSSIBLE, ANY STORMWATER CONVEYED OFFSITE SHALL BE TREATED OR RETAINED IN A MANNER APPROVED BY ENGINEER.
4. WHEN NECESSARY, ON–SITE VEHICLES SHALL HAVE THEIR WHEELS CLEANED PRIOR TO LEAVING SITE.
5. CONSTRUCTION ENTRANCE SHALL BE GRADED IN A MANNER THAT PREVENTS TRACKING OF SEDIMENTS ONTO PUBLIC RIGHT–OF–WAY

STABILIZED CONSTRUCTION ENTRANCE
NOT TO SCALE

NOTES:

1. THE EROSION CONTROL MIX SHALL CONFORM TO THE FOLLOWING STANDARDS AND IN ACCORDANCE WITH THE MAINE DOT CHAPTER 700, SECTION 717.04(D):
   1.1. pH BETWEEN 5.0 – 8.0
   1.2. PARTICLE SIZE (BY WEIGHT):
   1.2.1. 100% PASSING A 150 MM (6 IN) SCREEN
   1.2.2. 75 TO 85% PASSING A 19 MM (0.75 IN) SCREEN
   1.3. SOLUBLE SALTS CONTENT < 4.0 MMHOS/CM
   1.4. ORGANIC MATTER 20 TO 100% , DRY WEIGHT BASIS
2. THE BERM SHOULD BE PLACED, UNCOMPACTED, ALONG A RELATIVELY LEVEL CONTOUR, WHEN NECESSARY THE BERM MAY BE PLACED PERPENDICULAR TO THE SLOPE ALONG THE PROPERTY LINE TO CONTAIN THE SEDIMENT PROVIDED A BERM IS LOCATED AT THE BASE OF THE SLOPE.
3. BERMS SHALL REMAIN IN PLACE UNTIL UPSTREAM AREA IS STABILIZED OR 90% CATCH OF VEGETATION IS ATTAINED. BERMS SHALL BE REMOVED OFFSITE OR BY SPREADING SUCH THAT NATIVE EARTH CAN BE SEEN BELOW.
4. DURING PERIODS OF WINTER CONSTRUCTION (NOV. 15 THROUGH APRIL 15), THE CONTRACTOR SHALL INSTALL EROSION CONTROL MIX BERMS IN LIEU OF SILT FENCE.

EROSION CONTROL MIX BERM DETAIL
NOT TO SCALE

1. PREPARE SOIL BEFORE INSTALLING ROLLED EROSION CONTROL PRODUCTS (ECB), INCLUDING ANY NECESSARY APPLICATION OF LIME, FERTILIZER, AND SEED.
2. BEGIN AT THE TOP OF THE SLOPE BY ANCHORING THE ECB IN A 6" DEEP X 6" WIDE TRENCH WITH APPROXIMATELY 12" OF ECB EXTENDED BEYOND THE UP–SLOPE PORTION OF THE TRENCH. ANCHOR THE ECB WITH A ROW OF STAPLES/STAKES APPROXIMATELY 12" APART IN THE BOTTOM OF THE TRENCH. BACKFILL AND COMPACT THE TRENCH AFTER STAPLING. APPLY SEED TO THE COMPACTED SOIL AND FOLD THE REMAINING 12" PORTION OF ECB BACK OVER THE SEED AND COMPACTED SOIL. SECURE ECB OVER COMPACTED SOIL WITH A ROW O

NOTES & DISCLAIMERS

1. INSTALLATION TO BE COMPLETED IN ACCORDANCE WITH MANUFACTURER'S SPECIFICATIONS.
2. BACKFILL, GEOTEXTILE, AND/OR LINER QUANTITIES ARE APPROXIMATIONS BASED ON DIMENSIONS SHOWN.
3. PRE-TREATMENT DEVICES ARE RECOMMENDED UP-STREAM OF ALL INFLOW CONNECTIONS. LEAF GUARDS SHOULD BE INSTALLED ON ANY DOWNSPOUT CONNECTIONS. CONTRACTOR AND ENGINEER ARE RESPONSIBLE ON ENSURING THE LAST UP-STREAM STRUCTURE IS ADEQUATE TO CONTAIN THE NECESSARY TREATMENT DEVICE.
4. CONSULTANT DRAWINGS ARE BEING RELIED UPON AS BEING ACCURATE IN DEPICTING SITE CONDITIONS, THAT THEY SATISFY ANY LOCAL BUILDING CODE REQUIREMENTS, AND THAT THEY ACCURATELY DEPICT SUBSURFACE CONDITIONS.
5. FERGUSON SUPPLIES THE PRODUCTS ONLY AND TAKES NO RESPONSIBILITY FOR INSTALLATION AND HAS NO ROLE IN THE INSTALLATION OF THE PRODUCTS.
6. R-TANK SYSTEMS ARE NOT DESIGNED TO SUPPORT LOADS FROM BUILDINGS, RETAINING WALLS, ETC. THEREFORE, THE ENGINEER OF RECORD MUST COORDINATED WITH THE PROPER DISCIPLINES TO ENSURE NO STRUCTURAL LOADS ARE IMPARTED UPON THE SYSTEM AND ANY INFILTRATION FROM THE SYSTEM HAS BEEN ACCOUNTED FOR IN FOUNDATION DESIGN.
7. TREES NOT PERMITTED ON TOP OF R-TANK SYSTEM
8. ENGINEER OF RECORD, OR LANDSCAPE ARCHITECT, TO CONFIRM R-TANK MODULES TO BE INSTALLED OUTSIDE CRZ OF NEARBY TREES
9. EXCAVATION GEOTEXTILE FABRIC & IMPERMEABLE LINER QTY ACCOMODATE FULL SAND FILTER DEPTH. BACKFILL QTY REPRESENTS BACKFILL REQUIRED FOR R-TANK SYSTEM ONLY

NOTES:
1. INSTALLATIONS PER THIS DETAIL MEET GUIDELINES OF HL-93 LOADING PER THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS.
2. FOR INFILTRATION APPLICATIONS, UNCOMPACTED FREE DRAINING BACKFILL (SPEC SECTION 2.03A) TO PROVIDE A LEVEL BASE. SURFACE MUST BE SMOOTH, FREE OF LUMPS OR DEBRIS, AND EXTEND 2' BEYOND R-TANK FOOTPRINT. THE ENGINEER OF RECORD IS RESPONSIBLE FOR ASSESSING THE BEARING CAPACITY OF THE SUBGRADE, AND BASE.
3. FOR INSTALLATIONS IN LANDSCAPED AREAS, THE INSTALLATION OF TREES IS PROHIBITED ABOVE THE R-TANK UNITS. PLEASE CONTACT YOUR LOCAL FERGUSON WATERWORKS REPRESENTATIVE FOR MORE INFORMATION.
4. THE R-TANK SYSTEM IS NOT DESIGNED TO SUPPORT LOADS FROM BUILDINGS OR STRUCTURES. THEREFORE, THE ENGINEER OF RECORD MUST COORDINATE WITH THE PROPER DISCIPLINES TO ENSURE NO STRUCTURAL LOADS ARE IMPARTED UPON THE SYSTEM AND ANY INFILTRATION FROM THE SYSTEM HAS BEEN ACCOUNTED FOR IN THE FOUNDATION DESIGN.

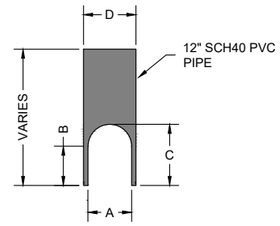
STORMRING CPS PRETREATMENT DETAIL

R-TANK IS NOT DESIGNED TO SUPPORT STRUCTURAL LOADS ASSOCIATED WITH BUILDINGS, RETAINING WALLS OR OTHER STRUCTURES.

- THE CIVIL ENGINEER AND STRUCTURAL ENGINEER SHALL REVIEW ALL DOCUMENTATION AND DESIGNS TO ENSURE NO STRUCTURAL LOADS ARE APPLIED BY THE STRUCTURE ON THE R-TANK UNITS. IT IS RECOMMENDED THAT ALL R-TANK UNITS BE INSTALLED ABOVE THE ELEVATION OF ANY SUBSURFACE STRUCTURAL ELEMENTS SUCH AS FOOTERS. IF THIS CANNOT BE ACHIEVED, IT RECOMMENDED THAT A MINIMUM 1:1 ZONE OF INFLUENCE, SITE SPECIFIC SOILS MAY REQUIRE GREATER SEPARATION DISTANCE, BE MAINTAINED BETWEEN THE STRUCTURAL ELEMENT AND THE UNITS.
- THE STRUCTURAL ENGINEER AND GEOTECHNICAL ENGINEER SHALL REVIEW ALL DOCUMENTATION AND DESIGNS TO ENSURE PROPER STABILITY OF STRUCTURAL ELEMENTS DURING SATURATED SOIL CONDITIONS POTENTIALLY CAUSED BY THE PROXIMITY OF INFILTRATION FACILITIES TO THE STRUCTURAL ELEMENTS.

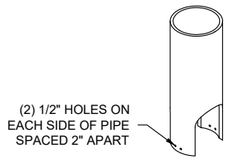
R-TANK - MINIMUM OFFSET DETAIL

R-TANK IS NOT DESIGNED TO SUPPORT LOADS ASSOCIATED WITH TREES AND SHOULD BE PROTECTED FROM DAMAGE RELATED TO ROOTS.



- A MINIMUM HORIZONTAL OFFSET "H" OF 1'-0" FOR EVERY 1" OF FUTURE DBH (DIAMETER BREAST HEIGHT IS RECOMMENDED FROM THE CENTER OF THE TREE..
- THE CIVIL ENGINEER AND LANDSCAPE ARCHITECT SHALL REVIEW ALL DOCUMENTATION AND DESIGNS TO ENSURE ADEQUATE SPACING HAS BEEN PROVIDED FROM THE TREE TO THE R-TANK UNITS.

R-TANK - TREE OFFSET DETAIL



NOTES
1. THE INSPECTION PORT IS USED IN THE ACCESS MODULE TO INSPECT THE LEVEL OF SEDIMENT ACCUMULATION AND PERFORM ROUTINE MAINTENANCE.
2. MINIMUM REQUIRED MAINTENANCE INCLUDES A QUARTERLY INSPECTION DURING THE FIRST YEAR OF OPERATION AND A YEARLY INSPECTION THEREAFTER. FLUSH AS NEEDED.
3. R-TANK^{HD}, R-TANK^{SD}, R-TANK^{UD} AND R-TANK^{XD} MAY BE USED IN TRAFFIC APPLICATIONS. SEE TRAFFIC LOADING DETAIL FOR MINIMUM & MAXIMUM COVER REQUIREMENTS.
4. IF INSPECTION PORT IS LOCATED IN A NON-TRAFFIC AREA, A PLASTIC CAP CAN BE USED IN LIEU OF A FRAME AND COVER WITH CONCRETE COLLAR.

R-TANK CONSTRUCTION EQUIPMENT RECOMMENDATIONS				
UNIT TYPE	**COMPRESSION STRENGTH**	**10 TON LOW GROUND PRESSURE DOZER MIN. COVER**	**6 TON SMOOTH DRUM STATIC ROLLER MIN. COVER**	**6 TON SMOOTH DRUM VIBRATORY ROLLER MIN. COVER**
HD	33.4 PSI	12" (SEE NOTE 1, 2 & 3)	12" (SEE NOTE 1, 2 & 3)	24" (SEE NOTE 2)
SD	42.9 PSI	12" (SEE NOTE 1, 2 & 3)	12" (SEE NOTE 1, 2 & 3)	24" (SEE NOTE 2)

NOTES:
1. FOLLOWING PLACEMENT OF SIDE BACKFILL, A UNIFORM 12" LIFT OF THE FREELY DRAINING MATERIAL (SPEC SECTION 2.03 B1) SHALL BE PLACED OVER THE R-TANK AND LIGHTLY COMPACTED USING A WALK-BEHIND TRENCH ROLLER. ALTERNATELY, A ROLLER (MAXIMUM GROSS VEHICLE WEIGHT OF 6 TONS) MAY BE USED. ROLLER MUST REMAIN IN STATIC MODE UNTIL A MINIMUM OF 24" OF COVER HAS BEEN PLACED OVER THE MODULES. SHEEP FOOT ROLLERS SHOULD NOT BE USED. **SPEC SECTION 3.05 A5**
2. AFTER THE GEOGRID IS INSTALLED OVER THE INITIAL LAYER, THE GRADED AGGREGATE BASE MATERIALS CAN BE PUSHED OUT (MAX MACHINE SIZE IS 10 TON LGP DOZER OR SMALLER) IN A SINGLE LIFT AND STATIC ROLLED BY A MACHINE WITH A MAX GROSS VEHICLE WEIGHT OF 6 TONS. ROLLER MUST REMAIN IN STATIC MODE UNTIL A MINIMUM OF 24" OF COVER HAS BEEN PLACED OVER THE MODULES. SHEEP FOOT ROLLERS SHOULD NOT BE USED. SPEC SECTION 3.05 A5
2. ONLY LOW PRESSURE TIRE OR TRACK VEHICLES (LESS THAN 7 PSI AND OPERATING WEIGHT OF LESS THAN 20,000 LBS) SHALL BE OPERATED OVER THE R-TANK SYSTEM DURING CONSTRUCTION. **SPEC SECTION 3.05 A5**
3. DUMP TRUCKS AND PANS SHALL NOT BE OPERATED WITHIN THE R-TANK SYSTEM AT ANY TIME. WHERE NECESSARY, THE HEAVY EQUIPMENT SHOULD UNLOAD IN AN AREA ADJACENT TO THE R-TANK SYSTEM AND THE MATERIAL SHOULD BE MOVED OVER THE SYSTEM WITH TRACKED EQUIPMENT. **SPEC SECTION 3.05 A5**
4. ENSURE THAT ALL UNRELATED CONSTRUCTION TRAFFIC IS KEPT AWAY FROM THE LIMITS OF EXCAVATION UNTIL THE PROJECT IS COMPLETE AND FINAL SURFACE MATERIALS ARE IN PLACE. NO NON-INSTALLATION RELATED LOADING SHOULD BE ALLOWED OVER THE R-TANK SYSTEM UNTIL THE FINAL DESIGN SECTION HAS BEEN CONSTRUCTED (INCLUDING PAVEMENT). **SPEC SECTION 3.05 B**
5. SEE R-TANK INSTALLATION GUIDE OR CONTACT YOUR LOCAL FERGUSON REPRESENTATIVE FOR ADDITIONAL INFORMATION.

THE ENGINEER OF RECORD SHALL REVIEW AND APPROVED THAT THE DEPICTED LAYOUT AND ALL ASSOCIATED DETAILS MEET ALL APPLICABLE REGULATIONS AND PROJECT SPECIFIC REQUIREMENTS.

R-TANK SPECIFICATION

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK INCLUDED

A. Provide excavation and base preparation per geotechnical engineer's recommendations and/or as shown on the design drawings, to provide adequate support for project design loads and safety from excavation sidewall collapse. Excavations shall be in accordance with the owner's and OSHA requirements.
B. Provide and install R-Tank system and all related products per the manufacturer's installation guidelines.
C. Provide and construct the cover of the R-Tank system including; stone backfill, structural fill cover, and pavement section as specified.
D. Protect R-Tank system from construction traffic after installation until completion of all construction activity in the installation area.

1.02 QUALITY CONTROL

A. All materials shall be manufactured in ISO certified facilities.
B. Installation Contractor shall demonstrate knowledge and experience in the installation of subsurface storage system. A pre-installation conference shall be performed per section 1.05.
C. Installation Personnel: Performed only by skilled workers with experience in bulk earthworks, pipe, chamber, or pond/landfill construction projects of comparable size and quality.
D. Contractor must have manufacturer's representative available for site review if requested by Owner.

1.03 SUBMITTALS

A. Submit proposed R-Tank layout drawings. Drawings shall include typical section details as well as the required base elevation of stone and tanks, minimum cover requirements and tank configuration.
B. Submit manufacturer's product data, including compressive strength and unit weight.
C. Submit manufacturer's installation instructions.
D. Submit R-Tank sample for review. Reviewed and accepted samples will be returned to the Contractor.
E. Submit material certificates for geotextile, geogrid, base course and backfill materials.
F. Submit required experience and personnel requirements as specified in Section 1.03.
G. Any proposed equal alternative product substitution to this specification must be submitted for review and approved prior to bid opening. Review package should include third party reviewed performance data that meets or exceeds criteria in Table 2.01 B.

1.04 DELIVERY, STORAGE, AND HANDLING

A. Protect R-Tank and other materials from damage during delivery, and store UV sensitive materials under tarp to protect from sunlight when time from delivery to installation exceeds two weeks. Storage of materials should be on smooth surfaces, free from dirt, mud and debris.
B. Handling is to be performed with equipment appropriate to the materials and site conditions, and may include hand, handcart, forklifts, extension lifts, etc.
C. Cold weather:
   1. Care must be taken when handling plastics when air temperature is 40 degrees or below as plastic becomes brittle.
   2. Do not use frozen materials or materials mixed or coated with ice or frost. Do not build on frozen ground or wet, saturated or muddy subgrade.

1.05 PREINSTALLATION CONFERENCE.

A. Prior to the start of the installation, a preinstallation conference shall occur with the representatives from the design team, the general contractor, the excavation contractor, the R-Tank installation contractor, and the manufacturer's representative.

1.06 PROJECT CONDITIONS

A. Coordinate installation for the R-Tank system with other on-site activities to eliminate all non-installation related construction traffic over the completed R-Tank system. No loads heavier than the design loads shall be allowed over the system, and in no case shall loads higher than a standard AASHTO HS20 (or HS25, depending on design criteria) load be allowed on the system at any time.
B. Protect adjacent work from damage during R-Tank system installation.
C. All pre-treatment systems to remove debris and heavy sediments must be in place and functional prior to operation of the R-Tank system.
D. Contractor is responsible for any damage to the system during construction.

PART 2 - PRODUCTS

2.01 R-TANK UNITS

A. R-Tank - Injection molded plastic tank plates assembled to form a modular structure of predesigned height (custom for each project).
B. R-Tank units shall meet the following Physical & Chemical Characteristics:

PROPERTY	DESCRIPTION	R-Tank^{HD} VALUE	R-Tank^{SD} VALUE	R-Tank^{UD} VALUE	R-Tank^{XD} VALUE
Void Area	Volume available for water storage	95%	95%	95%	90%
Surface Void Area	Percentage of exterior available for infiltration	90%	90%	90%	90%
Vertical Compressive Strength	ASTM D 2412 / ASTM F 2418	33.4 psi	42.9 psi	134.2 psi	240.2 psi
Lateral Compressive Strength	ASTM D 2412 / ASTM F 2418	22.4 psi	28.9 psi	N/A	N/A
HS-20 Minimum Cover	Cover required to support HS-20 loads	20"	18"	12" (STONE BACKFILL)	6"
HS-25 Minimum Cover	Cover required to support HS-25 loads	24"	19"	15" (STONE BACKFILL)	6"
Maximum Cover	Maximum allowable cover depth	< 7 feet	< 10 feet	5 feet	16.7 feet
Unit Weight	Weight of plastic per cubic foot of tank	3.62 lbs/cf	3.96 lbs / cf	4.33 lbs / cf	7.55 lbs / cf
Rib Thickness	Thickness of load-bearing members	0.18 inches	0.18 inches	N/A	N/A
Service Temperature	Safe temperature range for use	-14 – 167° F	-14 – 167° F	-14 – 167° F	-14 to 185° F

C. Supplier: Ferguson Waterworks; visit www.fergusongss.com for more information.

2.02 GEOSYNTHETICS

A. Geotextile. A geotextile envelope is required to prevent backfill material from entering the R-Tank modules.
   1. Standard Application: The standard geotextile shall be an 8 oz per square yard nonwoven geotextile.
   2. Infiltration Applications: When water must infiltrate/exfiltrate through the geotextile as a function of the system design, a woven monofilament shall be used.
B. Geogrid. For installations subject to traffic loads and/or when required by project plans, install geogrid to reinforce backfill above the R-Tank system. Geogrid is not always required for R-TankUD installations, and is often not required for non-traffic load applications.

2.03 BACKFILL & COVER MATERIALS

A. Bedding Materials: Stone (angular and smaller than 1.5" in diameter) or soil (GW, GP, SW, or SP as classified by the Unified Soil Classification System) shall be used below the R-Tank system (3" minimum). Material must be free from lumps, debris, and any sharp objects that could cut the geotextile. Material shall be within 3 percent of the optimum moisture content as determined by ASTM D698 at the time of installation. For infiltration applications bedding material shall be free draining.
B. Side and Top Backfill: Material must be free from lumps, debris and any sharp objects that could cut the geotextile. Material shall be within 3 percent of the optimum moisture content as determined by ASTM D698 at the time of installation.
   1. Traffic Applications - Free draining material shall be used adjacent to and above the R-Tank system.
      a. For HD, and SD modules, backfill materials shall be free draining stone (angular and smaller than 1.5" in diameter) or soil (GW, GP, SW, or SP as classified by the Unified Soil Classification System). For UD modules with less than 14" of top cover, backfill materials shall be free draining stone (angular and smaller than 1.5" in diameter). The use of soil backfill on the sides and top of the UD module is not permitted unless the modules are installed outside of traffic areas or with cover depths of 14" or more.
      b. Top backfill material (from top of module to bottom of pavement base or 12" maximum) must be consistent with side backfill.
   2. Non-Vehicular Applications - For all R-Tank modules installed in green spaces and not subjected to vehicular loads, backfill materials may either follow the guidelines for Traffic Applications above, or the top backfill layer (12" minimum) may consist of AASHTO #57 stone blended with 30-40% (by volume) topsoil to aid in establishing vegetation.
C. Additional Cover Materials: Structural Fill shall consist of granular materials meeting the gradational requirements of SM, SP, SW, GM, GP or GW as classified by the Unified Soil Classification System. Structural fill shall have a maximum of 25 percent passing the No. 200 sieve, shall have a maximum clay content of 10 percent and a maximum Plasticity Index of 4. Material shall be within 3 percent of the optimum moisture content as determined by ASTM D698 at the time of installation.

2.04 OTHER MATERIALS

A. Utility Marker: Install metallic tape at corners of R-Tank system to mark the area for future utility detection.

PART 3 - EXECUTION

3.01 ASSEMBLY OF R-TANK UNITS

A. Assembly of modules shall be performed in accordance with the R-Tank Installation Manual, Section 2.

3.02 LAYOUT AND EXCAVATION

A. Installer shall stake out, excavate, and prepare the subgrade area to the required plan grades and dimensions, ensuring that the excavation is at least 2 feet greater than R-Tank dimensions in each direction allowing for installation of geotextile filter fabric, R-Tank modules, and free draining backfill materials.
B. All excavations must be prepared with OSHA approved excavated sides and sufficient working space.
C. Protect partially completed installation against damage from other construction traffic by establishing a perimeter with high visibility construction tape, fencing, barricades, or other means until construction is complete.
D. Base of the excavation shall be uniform, level, and free of lumps or debris and soft or yielding subgrade areas. A minimum 2,000 pounds per square foot bearing capacity is required.
   1. Standard Applications: Compact subgrade to a minimum of 95% of Standard Proctor (ASTM D698) density or as required by the Owner's engineer.
   2. Infiltration Applications: Subgrade shall be prepared in accordance with the contract documents. Compaction of subgrade should not be performed in infiltration applications.
E. Unsuitable Soils or Conditions: All questions about the base of the excavation shall be directed to the owner's engineer, who will approve the subgrade conditions prior to placement of stone. The owner's engineer shall determine the required bearing capacity of the R-Tank subgrade; however in no case shall a bearing capacity of less than 2,000 pounds per square foot be provided.
   1. If unsuitable soils are encountered or if the subgrade is pumping or appears excessively soft, repair the area in accordance with contract documents and/or as directed by the owner's engineer.
   2. If indications of the water table are observed during excavation, the engineer shall be contacted to provide recommendations.
   3. Do not start installation of the R-Tank system until unsatisfactory subgrade conditions are corrected and the subgrade conditions are accepted by the owner's engineer.

3.03 PREPARATION OF BASE

A. Where a geotextile wrap is specified, install the specified fabric along the excavated surfaces while removing wrinkles so material lays flat. Overlap geotextile a minimum 12" or as recommended by manufacturer. Use tape, special adhesives, sandbags or other ballast to secure overlaps. As geotextiles can be damaged by extreme heat, smoking is not permissible on/near the geotextile, and tools using a flame to tack the overlaps, such as propane torches, are prohibited.
B. Place a thin layer (3" unless otherwise specified) of bedding material (Section 2.03 A), over the subgrade to establish a level working platform for the R-Tank modules. Level to within ½" (+/- ¼") or as shown on the plans. Native subgrade soils or other materials may be used if determined to meet the requirements of 2.03 A and are accepted by the owner's engineer.
   1. Standard Applications: Static roll or otherwise compact bedding materials until they are firm and unyielding.
   2. Infiltration Applications: Bedding materials shall be prepared in accordance with the contract documents.
B. Outline the footprint of the R-Tank system on the excavation floor using spray paint or chalk line to ensure a 2' perimeter is available around the R-Tank system for proper compaction of backfill.

3.04 INSTALLATION OF THE R-TANKS

A. Where a geotextile wrap is specified on the stone base, cut strips to length and install in excavation, removing wrinkles so material lays flat. Overlap geotextile a minimum 12" or as recommended by manufacturer. Use tape, special adhesives, sandbags or other ballast to secure overlaps. As geotextiles can be damaged by extreme heat, smoking is not permissible on/near the geotextile, and tools using a flame to tack the overlaps, such as propane torches, are prohibited.
B. Where an impervious liner (for containment) is specified, install the liner per manufacturer's recommendations and the contract documents. The R-Tank units shall be separated from impervious liner by a non-woven geotextile fabric installed accordance with Section 3.04A.
C. Install R-Tank modules by placing side by side, in accordance with the design drawings. No lateral connections are required. It is advisable to use a string line to form square corners and straight edges along the perimeter of the R-Tank system. The modules are to be oriented as per the design drawing with required depth as shown on plans.
   1. For LD, HD, and SD installations, the large side plate of the tank should be placed on the perimeter of the system. This will typically require that the two ends of the tank area will have a row of tanks placed perpendicular to all other tanks. If this is not shown in the construction drawings, it is a simple field adjustment that will have minimal effect on the overall system footprint. Refer to R-Tank Installation Guide for more details
   2. For UD installations, there is no perpendicular end row required.
D. Wrap the R-Tank top and sides in specified geotextile. Cut strips of geotextile so that it will cover the sides and top, encapsulating the entire system to prevent backfill entry into the system. Overlap geotextile 12" or as recommended by manufacturer. Take great care to avoid damage to geotextile (and, if specified, impervious liner) during placement.
E. Identify locations of inlet, outlet and any other penetrations of the geotextile (and optional liner). These connections should be installed flush (butted up to the R-Tank) and the geotextile fabric shall be cut to enable hydraulic continuity between the connections and the R-Tank units. These connections shall be secured using pipe boots with stainless steel pipe clamps. Support pipe in trenches during backfill operations to prevent pipe from settling and damaging the geotextile, impervious liner (if specified) or pipe. Connecting pipes at 90 degree angles facilitates construction, unless otherwise specified. Ensure end of pipe is installed snug against R-Tank system.
F. Install Inspection and Maintenance Ports in locations noted on plans. At a minimum one maintenance port shall be installed within 10' of each inlet & outlet connection, and with a maximum spacing of one maintenance port for every 2,500 square feet. Install all ports as noted in the R-Tank Installation Guide.
G. If required, install ventilation pipes and vents as specified on drawings to provide ventilation for proper hydraulic performance. The number of pipes and vents will depend on the size of the system. Vents are often installed using a 90 degree elbow with PVC pipe into a landscaped area with 'U" bend or venting bollard to inhibit the ingress of debris. A ground level concrete or steel cover can be used.

3.05 BACKFILLING OF THE R-TANK UNITS

A. Backfill and fill with recommended materials as follows:
   1. Place freely draining backfill materials (Section 2.03 B) around the perimeter in lifts with a maximum thickness of 12". Each lift shall be placed around the entire perimeter such that each lift is no more than 24" higher than the side backfill along any other location on the perimeter of the R-Tank system. No fill shall be placed over top of tanks until the side backfill has been completed.
   2. Each lift shall be compacted at the specified moisture content to a minimum of 95% of the Standard Proctor Density until no further densification is observed (for self-compacting stone materials). The side lifts must be compacted with walk behind compaction equipment. Even when "self-compacting" backfill materials are selected, a walk behind vibratory compactor must be used.
   3. Take care to ensure that the compaction process does not allow the machinery to come into contact with the modules due to the potential for damage to the geotextile and R-Tank units.
   4. No compaction equipment is permissible to operate directly on the R-Tank modules.
   5. Top Backfill: Only low pressure track vehicles shall be operated over the R-Tank system during construction. Dump Trucks and Pans shall not be operated within the R-Tank system footprint at any time. Heavy equipment should unload in an area adjacent to the R-Tank system and the material should be moved over the system using tracked equipment with an operating weight of less than 10 tons.
      a. Typical Applications: Install a 12" (or as shown on plans) lift of freely draining material (Section 2.03 B) over the R-Tank Units, maintaining 12" between equipment tracks and R-Tank System. Lightly compacted using a walk-behind trench roller. Alternately, a roller (maximum gross vehicle weight of 6 tons) may be used. Roller must remain in static mode until a minimum of 24" of cover has been placed over the modules. Sheep foot rollers should not be used.
      b. Shallow Applications (< 18" total cover): Install top backfill in accordance with plans.
   6. If required, install a geogrid as shown on plans. Geogrid shall extend a minimum of 3 feet beyond the limits of the excavation wall.
   7. Following placement and compaction of the initial cover, subsequent lifts of structural fill (Section 2.03 C) shall be placed at the specified moisture content and compacted to a minimum of 95% of the Standard Proctor Density and shall cover the entire footprint of the R-Tank system. During placement of fill above the system, unless otherwise specified, a uniform elevation of fill shall be maintained to within 12" across the footprint of the R-Tank system. Do not exceed maximum cover depths listed in Table 2.01 B.
   8. Place additional layers of geotextile and/or geogrid at elevations as specified in the design details. Each layer of geosynthetic reinforcement placed above the R-Tank system shall extend a minimum of 3 feet beyond the limits of the excavation wall.
B. Ensure that all unrelated construction traffic is kept away from the limits of excavation until the project is complete and final surface materials are in place. No non-installation related loading should be allowed over the R-Tank system until the final design section has been constructed (including pavement).
C. Place surfacing materials, such as groundcovers (no large trees), or paving materials over the structure with care to avoid displacement of cover fill and damage to surrounding areas.
D. Backfill depth over R-Tank system must be within the limitations shown in the table in Section 2.01 B. If the total backfill depth does not comply with this table, contact engineer or manufacturer's representative for assistance.

3.06 MAINTENANCE REQUIREMENTS

A. A routine maintenance effort is required to ensure proper performance of the R-Tank system. The Maintenance program should be focused on pretreatment systems. Ensuring these structures are clean and functioning properly will reduce the risk of contamination of the R-Tank system and stormwater released from the site. Pre-treatment systems shall be inspected yearly, or as directed by the regulatory agency and by the manufacturer (for proprietary systems). Maintain as needed using acceptable practices or following manufacturer's guidelines (for proprietary systems).
B. All inlet pipes and Inspection and/or Maintenance Ports in the R-Tank system will need to be inspected for accumulation of sediments at least quarterly through the first year of operation and at least yearly thereafter.
C. If sediment has accumulated to the level noted in the R-Tank Maintenance Guide or beyond a level acceptable to the Owner's engineer, the R-Tank system should be flushed.
D. All inspection and maintenance activities should be performed in accordance with the R-Tank Operation, Inspection & Maintenance Manual.

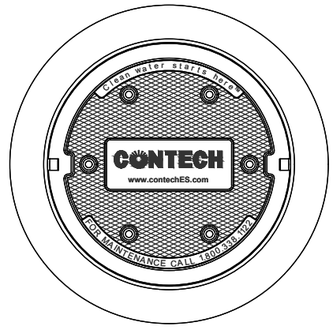
SECTION A-A



STORMFILTER DESIGN NOTES

STORMFILTER TREATMENT CAPACITY IS A FUNCTION OF THE CARTRIDGE SELECTION AND THE NUMBER OF CARTRIDGES. THE STANDARD MANHOLE STYLE IS SHOWN WITH THE MAXIMUM NUMBER OF CARTRIDGES (4). VOLUME SYSTEM IS ALSO AVAILABLE WITH MAXIMUM 4 CARTRIDGES.
Ø5'-0" [1524 mm] MANHOLE STORMFILTER WITH SEALED OUTLET RISER MAY REQUIRE AN UPSTREAM BYPASS STRUCTURE.

CARTRIDGE SELECTION

CARTRIDGE HEIGHT	27" [686 mm]			18" [458 mm]			LOW DROP		
RECOMMENDED HYDRAULIC DROP (H)	3.05' [930 mm]			2.3' [700 mm]			1.8' [550 mm]		
SPECIFIC FLOW RATE (gpm/sf) [L/s/m^2]	2 [1.30]	1.67* [1.08]	1 [0.65]	2 [1.30]	1.67* [1.08]	1 [0.65]	2 [1.30]	1.67* [1.08]	1 [0.65]
CARTRIDGE FLOW RATE (gpm) [L/s]	22.5 [1.42]	18.79 [1.19]	11.25 [0.71]	15 [0.95]	12.53 [0.79]	7.5 [0.44]	10 [0.63]	8.35 [0.54]	5 [0.32]

* 1.67 gpm/sf [1.08 L/s/m^2] SPECIFIC FLOW RATE IS APPROVED WITH PHOSPHOSORB® (PSORB) MEDIA ONLY

GENERAL NOTES
1. CONTECH TO PROVIDE ALL MATERIALS UNLESS NOTED OTHERWISE.
2. DIMENSIONS MARKED WITH ( ) ARE REFERENCE DIMENSIONS. ACTUAL DIMENSIONS MAY VARY.
3. FOR SITE SPECIFIC DRAWINGS WITH DETAILED VAULT DIMENSIONS AND WEIGHTS, PLEASE CONTACT YOUR CONTECH ENGINEERED SOLUTIONS LLC REPRESENTATIVE. www.ContechES.com
4. STORMFILTER WATER QUALITY STRUCTURE SHALL BE IN ACCORDANCE WITH ALL DESIGN DATA AND INFORMATION CONTAINED IN THIS DRAWING.
5. STRUCTURE SHALL MEET AASHTO HS-20 LOAD RATING, ASSUMING EARTH COVER OF 0' - 5' [1524 mm] AND GROUNDWATER ELEVATION AT, OR BELOW, THE OUTLET PIPE INVERT ELEVATION. ENGINEER OF RECORD TO CONFIRM ACTUAL GROUNDWATER ELEVATION. CASTINGS SHALL MEET AASHTO M306 AND BE CAST WITH THE CONTECH LOGO.
6. FILTER CARTRIDGES SHALL BE MEDIA-FILLED, PASSIVE, SIPHON ACTUATED, RADIAL FLOW, AND SELF CLEANING. RADIAL MEDIA DEPTH SHALL BE 7-INCHES [178 mm]. FILTER MEDIA CONTACT TIME SHALL BE AT LEAST 38 SECONDS.
7. SPECIFIC FLOW RATE IS EQUAL TO THE FILTER TREATMENT CAPACITY (gpm) [L/s] DIVIDED BY THE FILTER CONTACT SURFACE AREA (sq ft)[m^2].
8. STORMFILTER STRUCTURE SHALL BE PRECAST CONCRETE CONFORMING TO ASTM C-478 AND AASHTO LOAD FACTOR DESIGN METHOD.

INSTALLATION NOTES
A. ANY SUB-BASE, BACKFILL DEPTH, AND/OR ANTI-FLOTATION PROVISIONS ARE SITE-SPECIFIC DESIGN CONSIDERATIONS AND SHALL BE SPECIFIED BY ENGINEER OF RECORD.
B. CONTRACTOR TO PROVIDE EQUIPMENT WITH SUFFICIENT LIFTING AND REACH CAPACITY TO LIFT AND SET THE STORMFILTER STRUCTURE.
C. CONTRACTOR TO INSTALL JOINT SEALANT BETWEEN ALL STRUCTURE SECTIONS AND ASSEMBLE STRUCTURE.
D. CONTRACTOR TO PROVIDE, INSTALL, AND GROUT INLET PIPE(S).
E. CONTRACTOR TO PROVIDE AND INSTALL CONNECTOR TO THE OUTLET RISER STUB. STORMFILTER EQUIPPED WITH A DUAL DIAMETER HDPE OUTLET STUB AND SAND COLLAR. IF OUTLET PIPE IS LARGER THAN 8 INCHES [200 mm], CONTRACTOR TO REMOVE THE 8 INCH [200 mm] OUTLET STUB AT MOLDED-IN CUT LINE. COUPLING BY FERNCO OR EQUAL AND PROVIDED BY CONTRACTOR.
F. CONTRACTOR TO TAKE APPROPRIATE MEASURES TO PROTECT CARTRIDGES FROM CONSTRUCTION-RELATED EROSION RUNOFF.

The Stormwater Management StormFilter®

125 Thompson's Point Road
Major Site Plan
PL-003090-2024
Forefront Partners I, LP / CPI Management, LLC

Submitted to:	Portland Planning Board	**Prepared By:**	Natasha Kypfer
Public Hearing Date:	February 25, 2025	**Date:**	February 21, 2025

Figure 1: A rendering of the project with a view from the drop-off court, provided by Embarc Designs (Attachment 43).

I. INTRODUCTION

At the public hearing on February 25, 2025, the Planning Board will review a Level III Site Plan application by Forefront Partners I, LP / CPI Management, LLC, which proposes the development of the property at 125 Thompson's Point Road. The project would involve the construction of a six-story, 255-unit multi-family residential building, with attached six-story structured parking for 463 vehicles and additional surface-level parking for 35 vehicles.

An initial workshop on this item took place before the Planning Board on January 14, 2025, materials for which can be found here. The first workshop guided the Planning Board through the original 2014 Master Development Plan (MDP), which provided background relative to pending proceeding project status, and reviewed findings from the City's first round of review.

The Planning and Urban Development Department mailed 55 notices advertising this meeting to property owners within 500 feet of the site. A legal advertisement ran in the February 13, 2025 and the February 14, 2025 editions of the *Portland Press Herald*.

Owner:	*Current:* Forefront Partners I, LP, Chris Thompson & Jed Troubh
	Under Contract: CPI Management, LLC (Cathartes, Rob Simmons)
Applicant:	Placemaker Partners, LLC, Bo Kennedy, P.E.
Applicant Representatives:	Cathartes, Rob Simmons
	Embarc Designs, Robert Del Savio
	Carroll Associates, Patrick Carroll

II. REQUIRED REVIEWS AND REQUESTED WAIVERS

Review	Applicable Standards (as of 8/15/2013) *
Level III Site Plan Review	Section 14.526
* Approval of Master Development Plans confer pending proceeding status upon the development with the effect of maintaining the applicability of municipal regulations in effect at the time of approval for as long as the Master Development Plan approval remains valid, including permissible extensions. See attached memo dated June 30, 2023 (Attachment 2). Further, the complete Land Use Code, effective 8/15/2013 is included (Attachment 6).	

III. PROJECT DATA

Existing Zoning	B-5, Urban Commercial Mixed-Use Zone
Property Size	4.67 acres
Existing Use	Vacant Lot, used as surface parking overflow
Proposed Use	Multi-family Residential with Retail

Figure 2: An aerial view of the project site (circled in red), from the Google Maps.

IV. BACKGROUND AND EXISITING MASTER DEVELOPMENT PLAN

The Thompson's Point campus has evolved since its vision was originally laid out in the Forefront at Thompson's Point Site Plan ("Forefront") application (Application # 2011-274), approved on June 5, 2012. These plans included the campus concept design with over 600,000 square feet of non-garage building space dedicated to event, hotel, office, and restaurant uses. Subsequently, a Master Development Plan (MDP) was sought, and approved by the Planning Board, which established a cohesive development program, allowing for multiple development phases over an extended timeframe. The MDP is detailed in the below section. Additionally, on January 12, 2016, the Planning Board approved a revised overall site plan and subdivision plan (Applications # 2015 133 and 2015-159) for a 19-lot subdivision of the Thompson's Point campus. In concert with this Site Plan application, Forefront is pursuing an amendment to Sectional 2 and 4 Subdivision Plat for review by the Planning Authority, which seeks to: consolidate Lots 17, 18, and 19 into a single development lot, the revised Lot 17 and split Lot 8 into two development lots, the revised Lots 8 and 18. As a result, Forefront's 19-lot subdivision will be reduced to 18 total lots, but the effective development area will remain the same.

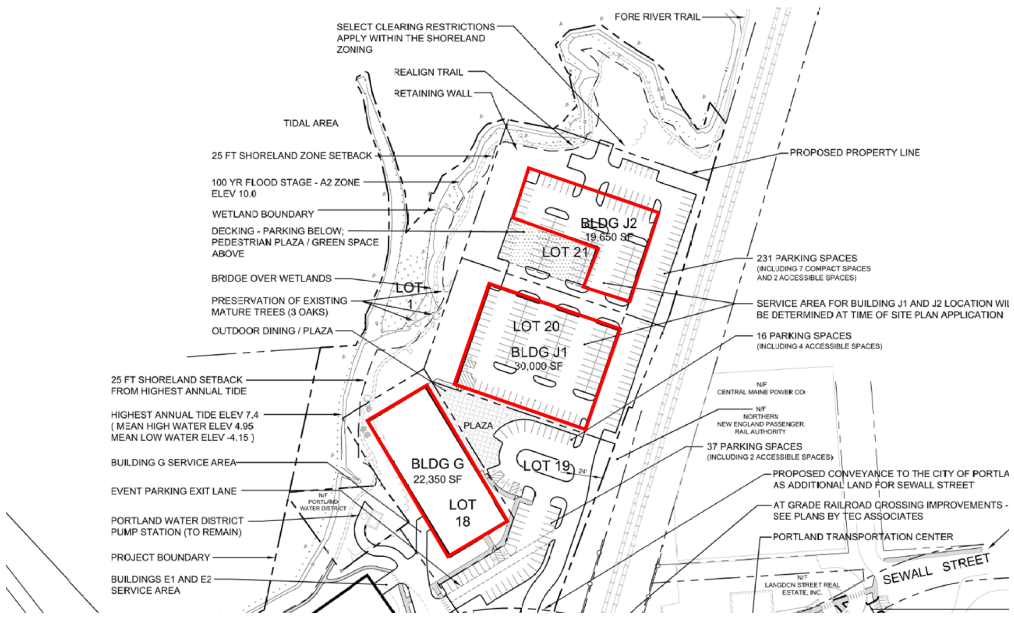

Figure 3: A snip of the original Master Plan, Application # 2013-262, with Buildings G, J1, and J2 highlighted (Attachment 1).

The MDP was approved by the Planning Board (Application # 2013-262), on March 11, 2014. Therefore, the approval of the MDP confers pending proceeding status upon the development with the effect of maintaining the applicability of municipal regulations in effect at the time of approval for as long as the MDP approval remains valid, including permissible extensions. Following its original approval, the MDP was extended twice, as noted in the February 14, 2020 (to March 11, 2022) and March 1, 2022 (to March 11, 2024) letters by the prior Planning and Urban Development Director (Attachment 1). Further, please see the attached memo dated June 30, 2023 (Attachment 2) detailing the project's pending proceeding status.

In March 2014, when the MDP was approved by the Planning Board, the site location as seen in Figure 4 above from their MDP Master Site Layout Plan (Plan 45), the site was originally envisioned as having three separate buildings, which the table below details based upon the MDP's proposed development program. Further, approximately 286 total parking spaces were proposed in conjunction with Buildings G, J1, and J2.

Building	Footprint (Square Feet)	Floor Area (Square Feet)	Height	Number of Units	Use
G	22,350	180, 000	9 floors	n/a	Office
J1	30,000	160,000	6 Floors	160	Condominiums
J2	19,650	196,500	TBD	160	Condominiums

V. EXISTING CONDITIONS AND THE SURROUNDING AREA

The project site is located within the Thompson's Point campus, totaling ~32.67 acres, immediately adjacent to the Portland Transportation Center and located on a peninsula of land that extends along the banks of the Fore River. Positioned southwest of downtown Portland, Thompson's Point was previously an industrial site, bounded by railroad tracks to the north, and otherwise surrounded by water, with Interstate I-295 and U.S. Route 1 running to the east.

Figure 4: A snip of the street view at 125 Thompson's Point Road, showing current conditions, from Google Maps

To date, the Thompson's Point campus now comprises multiple uses, including: a seasonal outdoor concert venue, adjoining the Depot Pavilion, that operates in collaboration with the State Theatre; Brick South, an event function hall; Halo at the Point, another event space; and, the Rink, a winter ice skating, seasonally located within the Depot Pavilion. Other uses include the Children's Museum & Theatre of Maine, the International Cryptozoology Museum, craft breweries/distilleries and other food and beverage service uses. Portland Trails maintains the Thompson's Point Trail, formerly Fore River Trail, which is a gravel and boardwalk path running along the Fore River and rail tracks. Hotel Portland, a 148-room boutique brand hotel with a restaurant and bar (Application # 2017-241), was originally approved by the Planning Board in July of 2018 and broke ground in late 2024. This project is expected to be completed in 2026.

VI. PROPOSED DEVELOPMENT

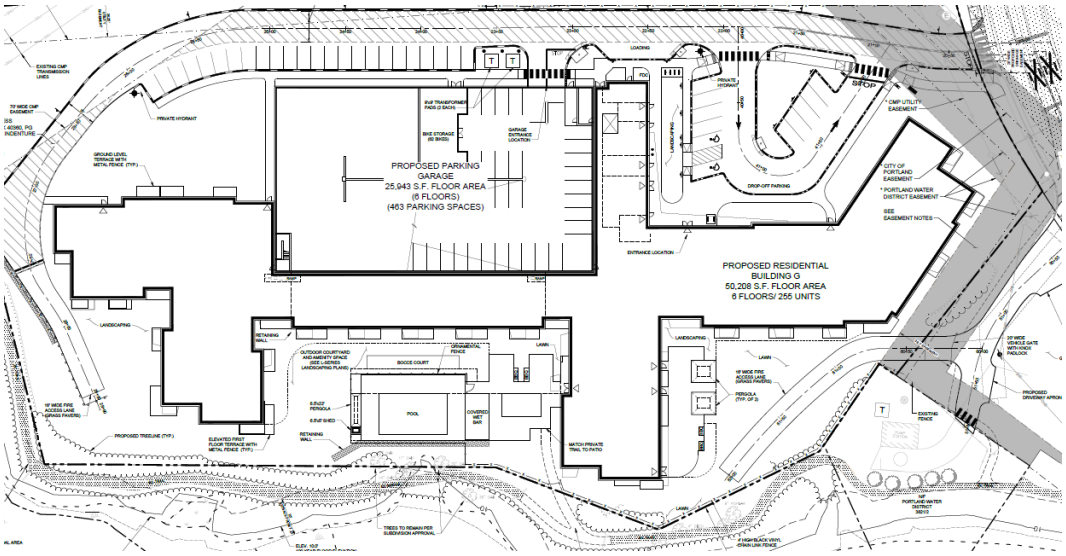

Figure 5: A snip from the Site Layout Plan, provided by the applicant (Plan 21) showing the building configuration.

The proposed development site (Plan 21) includes a six-story, 255-unit multi-family residential building with attached six-story structured parking for 463 vehicles, plus additional surface level parking for 35 vehicles located along the northern frontage. The residential portion of the building is proposed to total 50,208 square feet in footprint, and the adjoining parking garage is proposed to total 25,943 square feet in footprint. As seen below in Figure 5, programing for the site includes a drop-off parking and entry zone serving as the main entry point, and various amenities for residents including a pool, bocce court, multiple pergolas, and private trail connection to the existing public trail network.

VII. RIGHT, TITLE, AND INTEREST

The current owners of the property, Forefront Partners I, LP, are under contract in a Purchase and Sale Agreement with Cathartes, to purchase the subject property at Thompson's Point, as documented in a letter dated July 8, 2024 (Attachment D). Further, referenced in the City of Portland's

assessing records is a deed recorded at the Cumberland County Registry of Deeds (Book 36502 Page 035) on February 14, 2020, as evidence of right, title, and interest in the property by Forefront Partners I, LP.

VIII. FINANCIAL AND TECHNICAL CAPACITY

The applicant has submitted a letter from M&T Bank, dated July 24, 2024, as demonstration of their financial capacity to complete the proposed development (Attachment H). Accompanying this, the applicant included the technical capacity documentation which includes details on the following project partners and consultant team: Placemaker Partners, LLCs, Sebago Technics, Inc., Embarc Design, Carroll Associates, Summit Geoengineering Services, and Credere Associates, Inc. (also, Attachment H).

IX. ZONING ANALYSIS

A. DIMENSIONAL AND USE REQUIREMENTS

A zoning review has been conducted on this application and this project meets the requirements of the B-5, Urban Commercial Zone based on Section 14-230.4 (LUC, 8-15-2013), see below.

	Required	Proposed
Lot Size	None	4.637 ac.
Frontage	None	139'
Front Setback	None	34'
Rear Setback	None	39'
Side Setback	None	10'
Structure Height (Max.)	120' *	68'
Lot Coverage (Max.)	100%	63 %
Off-Street Parking Spaces	None	498
Bicycle Parking	None	102
* Order 119-13/14, effective 1/15/2014, provided an update to the B-5 dimensional requirements, increasing the maximum building height from sixty-five (65) feet for parcels of land located on Thompson's Point, and also subject to an approved Master Development Plan to: one hundred twenty (120) feet (Attachment 5).		

B-5 Urban Commercial Mixed Use Zone – Purpose Statement: *T*o provide zones in areas of the peninsula near the central business district where a mixture of uses, including marine, industrial, commercial, and residential, is encouraged. The B-5 and B-5b zones are characterized by larger underdeveloped lots with great potential for denser, clustered, urban mixed-use development and more efficient reuse of existing land and buildings. It is anticipated that such denser, mixed uses would rely on a shared infrastructure system, including service alleys, parking lots, public transportation facilities, stormwater management, and driveways.

The proposed uses of residential and commercial/retail are permitted uses within the B-5, Urban Commercial Mixed Use Zone, per Section 14-230.1 of the Land Use Code, 8-15-2013.

B. INCLUSIONARY ZONING

This project is not subject to the City's Inclusionary Zoning standards, which are outlined in Section 17.2.3 of the Land Use Code. The 255 residential units proposed with this development are proposed as market rate units. On October 19, 2015, the City Council adopted Inclusionary Zoning regulations which went into effect on November 18, 2015 (Order 82-15/16). The Forefront's MDP was approved before the Inclusionary Zoning regulations were implemented and therefore is not subject to Portland's Inclusionary Zoning requirements. As previously noted, this is due to the project site's pending proceeding status.

X. JANUARY 14, 2024 WORKSHOP

On January 14, the project appeared for an initial workshop before the Planning Board. This workshop allowed for an initial review of the site plan standards, with Board discussion focusing on the following project topics:

- Construction timing, due to TMP expiration on March 1, 2027
- Updates to the campus-wide TDM plan
- Floodplain management compliance

- Requested building design updates

Following the workshop, the applicant team and City staff, including third-party peer reviewers, met virtually on February 5, 2025 to discuss the above items and the outstanding project requests identified in the City Review Comments (Attachment 4).

XI. SITE PLAN STANDARDS

The proposed development has been reviewed by staff for conformance with the relevant review standards of the City of Portland's Site Plan Ordinance, Section 14.6. Staff comments are below.

1. Transportation Standards (Section 14.6.1)

A. Impact on Surrounding Street Systems

As part of the existing Master Development Plan (MDP), the overall project was reviewed under a Traffic Movement Permit (TMP) application, which addresses impacts on the surrounding street network and for the anticipated increases in traffic congestion. The TMP (Identification #: Reg. 01-00155-A-N) was issued on June 13, 2012 with a traffic study completed as part of the approved MaineDOT TMP, citing for 734 trip ends during the AM peak hour and 1,091 trip ends during the PM peak hour. Further, the TMP received an extension in 2024, through to March 1, 2027. According to the September 4, 2024 traffic memorandum prepared by Gorrill Palmer Associates, the proposed project is not forecasted to exceed the number of trips permitted under the existing TMP.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and three Condition of Approvals are recommended:

- The applicant shall confirm that the TMP is being implemented for all events.
- The applicant shall schedule meetings with the Libbytown Neighborhood Association and City staff with the intent of identifying possible mitigation strategies to be implemented during the 2025 concert season.
- The applicant shall conduct a traffic monitoring review of conditions at the first major concert event of the 2025 season, to be reviewed by the Planning Authority.

B. Access and Circulation

The project site is accessed via Thompson's Point Road at the street's intersection with Fore River Parkway and includes a public railroad crossing proximate to the two-way driveway into the proposed development, which terminates at a hammerhead turnaround. The Thompson's Point Trail (formerly named the Fore River Trail) runs to the south of the development area, with the site's proposed pedestrian circulation well-integrated to the public trail system. Further, a proposed six-foot-wide sidewalk along the front façade of the building connects to the existing sidewalk network throughout the Thompson's Point campus.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met.

C. Public Transit Access

This project is within a quarter mile of fixed transit, as the Greater Portland Metro's BREEZ line services bus stops at both the Portland Transportation Center (PTC) and Thompson's Point, operating Monday - Saturday. The application materials indicate the closest of which transit stop is approximately 665 feet / 0.13 miles walking-distance from the front door of the site. Per the Technical Manual Section 1.17.2, transit shelters shall be located within the site, directly adjacent to the right-of-way on which the public transportation route is established or located within a public sidewalk area long the property frontage.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met.

D. Parking

This project proposes to provide 457 parking spaces within a parking garage structure attached to the proposed residential "Building G" residential structure. In addition, 35 off-street parking spaces are proposed along the front façade of the building and the drop-off court by the main entrance. Per the application materials, 26 ADA parking stalls are proposed on-site and 102 bicycle parking spaces are provided, with these being located outside of the building along the property's frontage, as well as within the proposed building within a dedicated bicycle storage room.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and a single Condition of Approval applies, requiring the applicant to provide an updated parking analysis based on the 6th Edition of the ITE Parking Generation Manual and all requested back up information shall be provided.

E. Transportation Demand Management (TDM)

A TDM Plan is required for this project, as it exceeds the thresholds as detailed in the LUC Section 14.6.1.E.1. The project has an approved Thompson's Point campus-wide TDM plan for managing and reducing traffic trips and parking demand in place as part of the MDP. The provided Attachment P summarizes TDM initiatives and references previously prepared TDM strategy reports which was approved in 2011, and subsequently updated in both 2015 and 2018.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met.

2. Environmental Quality Standards (Section 14.6.2)

A. Preservation of Significant Natural Features

The parcel's current use is as a gravel surface parking lot resulting in the anticipated site disturbance unlikely to disrupt any significant natural features. While the landscaping plan identifies trees to be preserved, it does not include a tree survey as noted below. Further, the applicant attests no known populations of trees or plants present on the site have been classified as Endangered and Threatened in Maine, nor known habitats/communities, present that appear on the state or federal endangered or threatened animal list.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met, as it is not applicable.

B. Landscape Preservation

The submitted landscaping plan notes existing trees identified to preserve and protect (e.g. a handful of significant oaks along the southern property line that had previously been requested for preservation by the former City Arborist), but a tree survey was not included as part of the application submission. Per section 4.3.1. of the Technical Manual, projects are required to submit a tree survey from a licensed land surveyor arborist, forester, or landscape architect clearly identifying the forest type and location, size, and species of all existing trees 10" DBH or greater on the site and in the City right of way.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met.

C. Site Landscaping and Buffers

The landscape plan proposes to screen the development from the existing trail, pool and outdoor amenity space, and around the entire perimeter of the building itself. The site location is buffered by both the rail line and Fore River, which will sufficiently buffer the proposed site use from the public right-of-way and neighboring campus properties. Further, the site has ±139 feet of street frontage and is required to plant site landscaping at a ratio of one tree or six plantings per 25-35 feet of street frontage. In their materials, the applicant cites that limited street trees have been proposed in location and quantities where possible, noting underground utility conflicts and that the rest of the site is heavily planted.

Section 4 of the Technical Manual allows for the use of street tree alternatives, which the applicant team has determined, due to the existing conditions and high-density of underground utilities that are located in the right-of-way, they will contribute to the City of Portland Tree Fund for a total amount of $95,200, which accounts for 238 trees at the 2014 fee of $400 per tree. The calculation is based on the calculation for multi-family residential projects to provide one tree per unit, which would total 255 trees, although credit has been given for 17 trees as approved by the City Arborist.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and a Condition of Approval applies relative to the payment of the assessed fee-in-lieu for the outstanding street trees required.

D. Water Quality, Stormwater Management, and Erosion Controls

The September 2024 stormwater report summarizes changes to the water quality treatment zones and provides detailed computations of the respective stormwater management systems sized to convey and treat stormwater runoff from the proposed redevelopment. The bulk of the

new building, parking structure, central courtyard, and northerly courtyards will drain to a series of roof drains, catch basin inlets, and storm drain piping to convey runoff to a treatment system.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and a Condition of Approval applies relative to the requirement for the applicant to retain the services of a third-party inspector for the duration of construction until final site stabilization is in place.

3. Public Infrastructure and Community Safety Standards (Section 14.6.3)

A. Consistency with City Master Plans

The proposed development of the subject property is a permitted use within the B-5 zone, and complies with applicable zoning as established under the City's comprehensive plan, *Portland's Plan 2030*.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met.

B. Public Safety and Fire Prevention

The project site is accessible from Thompson's Point Road, and during the Master Development Plan (MDP) approval back in 2014, it was determined at the time that for the purposes of emergency vehicle access that one access point for ingress/egress was sufficient. Further, the included Utility Plan shows the location of all existing and proposed fire hydrants, with a service radius of 100' and 250', meeting the Technical Manual Section 3.2.1 standard of within 500'. City staff, including Fire & Life Safety reviewers, requested feasibility documentation in light of Section 18.2.3.3 of NFPA 1 Fire Code. The applicant has requested a waiver associated with the Technical Manual Section 10.5, as detailed below.

Waiver Request:

1. A waiver for *Technical Manual* Section 10.5, which requires two (2) access roads servicing development of over 100 proposed residential units.

Staff Finding: City staff are in support of the requested waiver to Section 10.5 of the Technical Manual, because a single means of ingress/egress was previously found acceptable at the time of the MDP approval in 2014, which was supported by a Master Fire Protection Plan, dated October 2013 and a Fire Protection Review Memo from Fire Risk Management, Inc. dated January 29, 2014.

C. Public Utilities

Per the applicant's submittal, the existing 12" water main (publicly owned), 15" sewer main (publicly owned), and electrical/communications (private) duct bank serving the project is shown on the accompanying utility plan. The proposed development will construct new utility stubs for the development lot. Ability to Serve letters have been provided by Until, CMP, DPW for wastewater capacity authorization, and PWD (Attachment E).

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met.

4. Site Design Standards (Section 14.6.4)

A. Massing, Ventilation, and Wind Impact

The proposed multi-family residential building is located at the panhandle portion of the property site of the Thompson's Point development, with direct access to the Thompson's Point roadway. Originally envisioned with the MDP as a clustered arrangement of three new buildings, the proposal is for a single six-story multi-family residential building with attached garage. Further, the HVAC equipment is proposed to be located on the roof of the building, as depicted (Plans 39).

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met.

B. Shadow

Shadow standards are not applicable in the B-5 zone; thus, this development is exempt.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met, as it does not apply.

C. Snow and Ice Loading

Snow storage is proposed to be located temporarily along the edges of the drive aisles and landscaped areas until such a time when the stockpiles need to be removed from the property. Snow removal on the parking roof deck which is a flat roof and is designed to store snowfall, will be plowed to a drop chute where it can be managed on the ground.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met.

D. View Corridors

This site is not located along a public view corridor identified in the Downtown Vision View Corridor Protection Plan.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met, as it does not apply.

E. Historic Resources

The subject property is not within a Historic District; therefore, this standard does not apply.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met, as it does not apply.

F. Exterior Lighting

All development must adhere to the site lighting standards provided for in the Technical Manual, Section 12, for: site lighting, architectural and specialty lighting, and street lighting. This project proposes site lighting, with 27 outdoor wall-mounted fixtures proposed in total along the four structure planes; the photometric plan is provided with the submission, as well as cut sheets and lighting specification materials.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met.

G. Noise and Vibration

In the City, all HVAC, AHU, emergency generators, and similar equipment are required to meet applicable state and federal emissions requirements and are further required to be located and/or screened in such a manner as to mitigate noise and vibration impacts. Per the application materials, the majority of the roof top mounted HVAC equipment average approximately 57" - 69" above the roof, and includes electric heat pumps for each dwelling unit. Sheet A1.7 ('Site Line Studies of Roof Top Mechanical Units' with the resubmission. The applicant shares that there will be no cooling towers, nor chillers or generators that could create unwarranted noise to emanate from the site.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met.

H. Signage and Wayfinding

Any signage associated with the redevelopment of this project will be required to be reviewed by the Permitting and Inspections Department separately, with a sign permit to meet the standards of Article of the Land Use Code.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and consider this standard to be met.

I. Zoning-related Design Standards

Per the Land Use Code Section 14.6.4.I.a, developments in the B-5 zone shall be designed to support the development of dense, mixed-use neighborhoods with attractive, safe, and convenient street-level pedestrian environments. An initial Design Review Memo, dated October 28, 2024 was provided (Attachment 5), and a second, revised Design Review Memo, dated February 12, 2025, was also provided (Attachment 6). Further, the project was reviewed according to the City's multiple-family design standards, as well as the design guidelines identified in the Thompson's Point Master Development Plan.

Staff Finding: The proposed development has been reviewed by Staff for conformance with this standard and a Condition of Approval applies relative to the applicant providing requested design updates to address the visibility of the structured from abutting properties at the north and recommends that the applicant provide additional opaque screening as appropriate.

XII. SHORELAND OVERLAY ZONE SUPPLEMENTAL SITE PLAN STANDARDS

The proposed development has been reviewed by staff for conformance with the relevant review standards of the City of Portland's Shoreland Overlay Zone Ordinance, Section 11.5.1 Staff comments are below.

A. The proposal will maintain safe and healthful conditions.

Staff Finding: This application provides a private connection from the development to the existing Thompson's Point Trail, maintained by *Portland Trails*, which provides a safe and integrated pathway for the residents and visitors of Portland, and serves as an important waterfront publicly-accessed linear park space.

B. The proposal will not result in water pollution, erosion, or sedimentation to surface waters.

Staff Finding: The development as designed is compliant with MAINE DEP Chapter 500: Basic Erosions and Sedimentation Control requirements, along with Maine DEP General Standards.

C. The proposal will adequately provide for the disposal of all wastewater.

Staff Finding: Per the applicant, the existing site sanitary sewer system is connected to the Thompson's Point sanitary pump station owned and operated by the Portland Water District. All sanitary waste discharge will be tied into the existing public wastewater system. Onsite wastewater treatment is not proposed.

D. The proposal will not have an adverse impact on spawning grounds, fish, aquatic life, bird, or other wildlife habitat.

Staff Finding: As part of the original MDP submission, comments were received from MDIF&W (see Attachment E), wherein their comments explicitly state: "Given the steps that the applicant has taken to maintain and enhance mapped Significant Wildlife Habitats at this site we do not feel that project completion will result in any significant adverse impact to the resource."

E. The proposal will conserve shore cover and visual, as well as actual, points of access to inland and coastal waters.

Staff Finding: The proposed development does not impact shore cover or access points to inland and coastal waters.

F. The proposal will protect archaeological and historic resources.

Staff Finding: Per the City's site plan ordinance, in the event that archaeological resources and/or historic resources are discovered and identified during the course of construction, the developer is required to carry out specific steps in accordance with Section 13.6.4.E.2 to protect any such identified resource.

G. The proposal will not adversely affect existing commercial fishing or maritime activities.

Staff Finding: There are no existing commercial fishing or maritime activities in the close vicinity of this application.

H. The proposal will avoid problems associated with floodplain development and use.

Staff Finding: The site plan (Plan 6) provides a clear demarcation of the 100-year flood elevation, with the AE Flood Zone (elevation 9.71) overlaid and shown in red for visibility.

I. The proposal is in conformance with the standards set forth in this article.

Staff Finding: The application is in conformance with all of the required subsections that pertain to Section 11.5.1.

XIII. SUBDIVISION STANDARDS

The proposed development has been reviewed by staff for conformance with the relevant review standards of the City of Portland's Subdivisions Ordinance, Section 14.4.1 A full discussion and description of the standards for the subdivision application appears in the Site Plan standards section XI of this report. Responses to Subdivision standards that differ are provided below.

A. Will not result in undue water or air pollution.

Staff Finding: The project site is wholly within the existing Thompson Point campus a former industrial site that has been redeveloped into a mixed-use campus. The site plan, grading and utility plans are designed to adequately address stormwater quality and to minimize pollution from the site. No detrimental water or air quality impacts are anticipated. Stormwater review comments are included in the Site Plan Review section, above.

B. Has sufficient water available for the reasonably foreseeable needs of the subdivision.

Staff Finding: See Site Plan Review section above.

C. Will not cause unreasonable burden on an existing water supply.

Staff Finding: See Site Plan Review section above.

D. Will not cause unreasonable soil erosion or reduction in the capacity of the land to hold water so that a dangerous or unhealthy condition may result.

Staff Finding: See Site Plan Review section above.

E. Will not cause unreasonable highway or public road congestion, or unsafe conditions with respect to use of highways or public roads that are existing or proposed.

Staff Finding: See Site Plan Review section above.

F. Will provide for adequate sanitary waste and storm water disposal and will not cause an unreasonable burden on municipal services if they are utilized.

Staff Finding: See Site Plan Review section above.

G. Will not cause an unreasonable burden on the ability of the City to dispose of solid waste and sewage if municipal services are to be utilized.

Staff Finding: The applicant has proposed trash enclosures in association with the site plan application, to be privately managed, as well as provided evidence of sewer capacity from the Portland Water District, and full utility plans to address waste disposal.

H. Will not have an undue adverse effect on the scenic or natural beauty of the area, aesthetics, historic sites, significant wildlife habitat identified by the Department of Inland Fisheries and Wildlife or by the City, rare and irreplaceable natural areas, or any public rights for physical or visual access to the shoreline.

Staff Finding: The site is not within an historic district. The new subdivision application is not anticipated to affect original assessments related to historic sites, significant wildlife habitat, or irreplaceable natural areas. The property has been extensively evaluated on each of these measures over the course of prior reviews. The site is largely developed with pavement, gravel lots, and existing buildings.

I. Is in conformance with the adopted Comprehensive Plan.

Staff Finding: See Site Plan Review section above.

J. The subdivider has adequate financial and technical capacity to meet the standards of this subsection.

Staff Finding: See Site Plan Review section above.

K. Whenever situated, in whole or in part, within the watershed of any pond or lake or within 250 feet of any wetland, great pond, or river as defined in Title 38, Chapter 3, Subchapter I, Article 2B, will not adversely affect the quality of such body of water or unreasonably affect the shoreline of such body of water.

Staff Finding: With the exception of necessary stormwater discharges, all structures and paved surfaces will be set 25 feet back from high water at the shoreline, as consistent with Shoreland Zoning regulations. There is a full stormwater management plan that has been reviewed and approved for the site as a whole, with comments on revisions and specific proposals for the Level III stormwater plan addressed in the Site Plan Standards. The site is currently almost entirely impervious, with no stormwater treatment – proposed stormwater management techniques post-redevelopment will benefit water quality leaving the site.

L. Will not, alone or in conjunction with existing activities, adversely affect the quality or quantity of groundwater.

Staff Finding: There are no anticipated impacts to groundwater supplies.

M. Is or is not in a flood prone area

Staff Finding: The perimeter of the peninsula is located within the flood plain. Buildings in the current site plan application are not in the flood plain.

N. Will provide for adequate stormwater management as demonstrated by compliance with the stormwater standards of the City of Portland *Technical Manual*.

O. Will not have lots with a lot depth-to-shore frontage ratio greater than 5 to 1 if any lots in the proposed subdivision have shore frontage on a river, stream, brook, great pond, or coastal wetland as these features are defined in Title 38 § 480-B. For purposes of this measurement, shore frontage shall be the length of a lot bordering on a water body or wetland measured in a straight line between the intersections of the lot lines with the shoreline.

Staff Finding: The proposed subdivision will not result in lot depth-to-shore frontage ratios greater than 5 to 1.

P. For any proposed subdivision that crosses municipal boundaries, will not cause unreasonable traffic congestion or unsafe conditions with respect to the use of existing public ways in an adjoining municipality in which part of the subdivision is located.

Staff Finding: The site does not cross municipal boundaries. Not applicable.

XIV. NEIGHBORHOOD MEETING AND PUBLIC COMMENT

As a requirement for this project, the applicant held a neighborhood meeting on October 16, 2024 at the Halo at the Point event space, wherein two members of the public attended (Attachment W), as well as members of the project team from Placemaker Partners, LLC, Cathartes, Carroll Associates, and Embarc Designs. Questions raised at the meeting were pertaining to: the height of the structured parking garage, visibility of the garage, whether the residential units would be condos or apartments, the mix of residential units, and the process in the event of a train crossing and EMS services are needed to access the site.

The Planning and Urban Development Department has received no public comment regarding this application at the time of publication of this report.

XV. STAFF RECOMMENDATION

Subject to the proposed motions and conditions of approval listed below, Planning Department staff determines that the application PL-00260-2023 for 125 Thompson's Point Road, seeking to create a new six-story building with 255-unit multi-family residential building, meets the applicable standards of Portland's Land Use Code.

XVI. PROPOSED MOTIONS

A. WAIVERS

On the basis of the applicant, plans, reports, and other information submitted by the applicant, findings, and recommendation contained in the Planning Board Report for the public hearing on February 25, 2025 for application PL-003090-2024 for 125 Thompson's Point Road relevant to the Site Plan Standards of the Land Use Code and the City of Portland's Technical Manual, and other regulations, and the testimony presented at the Planning Board hearing:

1. Required Number of Access Roads by Number of Proposed Units

The Planning Board [finds/does not find] based upon the City's Review, that extraordinary conditions exist or undue hardship may result from strict compliance with the Technical Manual standard Section 10.5, which requires two (2) access roads for the service of over 100 proposed units, that substantial justice and the public interest are secured with the proposed variation in this standard, and that the variation is consistent with the intent of the ordinance based upon the decision made at the time of MDP approval on March 11, 2014. The Planning Board [waives/does not waive] the Technical Manual standard Section 10.5, in order to allow for one (1) access road to the project site which serves 255-units as proposed.

B. SITE PLAN REVIEW

On the basis of the application, plans, reports, and other information submitted by the applicant, findings and recommendations contained in the Planning Board Report for the public hearing on February 25, 2025 for application PL-003090-2024 for 125 Thompson's Point Road relevant to the site plan regulations; and the testimony presented at the Planning Board hearing, the Planning Board [finds/does not find] that the plan is in conformance with the Site Plan Standards of the Land Use Code subject to the following conditions of approval:

1. The applicant has agreed that all large events/concerts will not begin (i.e. "doors open") between 4pm and 7pm Monday through Friday. If noncompliance continues, the City and MaineDOT will require the applicant meet to discuss actions required which may include traffic analysis and mitigation requirements during the 4pm to 7pm time. The applicant shall confirm that the TMP is being implemented for all events meeting the criterion which is triggered by the (combination) of 2500 or more attendees.

2. The applicant shall conduct a traffic monitoring review of conditions at the first major concert event of the 2025 season, to be reviewed by the Planning Authority. The applicant shall coordinate with the City on the scope of the monitor study and day to conduct the study, but will include monitoring of both Congress Street and I-295 Exit 5 ramps. If problems are identified, the applicant shall identify mitigation strategies for implementation, to be reviewed by the Planning Authority.

PRIOR TO APPLYING FOR A BUILDING PERMIT

3. The applicant shall provide design updates, that adequately addresses the visibility of the structured parking garage from abutting properties at the north and recommends that the applicant provide opaque screening or other architectural features as appropriate (e.g., architectural perforation, vertical landscaping or other façade-fixed material) for review and approval by the Planning Authority.
4. The applicant shall provide an updated parking analysis based on the 6th Edition of the ITE Parking Generation Manual and all requested back up information shall be provided, to be reviewed by the Planning Authority.
5. The applicant shall schedule and hold a meeting with City staff and the Libbytown Neighborhood Association to identify parking mitigation strategies to implement during the 2025 concert season.

PRIOR TO ISSUANCE OF A BUILDING PERMIT

6. The applicant shall provide draft condominium documents, for review by the Planning Authority and Corporation Council.

PRIOR TO THE ISSUANCE OF THE CERTIFICATE OF OCCUPANCY

7. The applicant shall demonstrate compliance with the street tree ordinance to the satisfaction of the Planning Authority, by contribution to the City's tree fund in the amount of $95,200 (*a rate of $400 for each of the 238 trees*).

8. The applicant shall retain the services of a third-party inspector for the duration of construction until final site stabilization is in place. The inspector is required in order to ensure:
   a) All construction and stabilization activities comply with the permit conditions and the approved drawings and specifications;
   b) Field decisions regarding erosion control implementation, stormwater system installation, and natural resource protection are based on sound engineering and environmental considerations; and,
   c) Any changes to the development's erosion control plan, stormwater management plan, or final stabilization plan are communicated to the City of Portland for additional review and approval.

   The inspector will submit weekly written reports to the Stormwater Coordinator(s) in the Water Resources Division of Public Works. Reports must include: Project ID, project address, the date(s) and time(s) of inspection, site photographs of areas under construction, and the date(s) and approximate duration(s) of any rainfall events. The report will identify and describe any erosion problems or discharge of pollutants and what actions will be taken to address these issues and repair any damage to other properties or natural resources, actions to eliminate the erosion source, and actions to prevent future sediment discharges from the area.

C. SUBDIVISION REVIEW

On the basis of the application, plans, reports and other information submitted by the applicant, findings and recommendations contained in the Planning Board Report for the public hearing on February 25, 2025 for application PL-003090-2024 relevant to the subdivision regulations, and the testimony presented at the Planning Board hearing, the Planning Board **[finds/does not find]** that the plan is in conformance with the subdivision standards of the land use code subject to the following conditions of approval:

PRIOR TO ISSUANCE OF A BUILDING PERMIT

9. The signed subdivision plat shall be recorded at the Cumberland County Registry of Deeds.

D. PLANNING BOARD DECISION

On the basis of the findings, conclusions, and recommendations contained in the Planning Board report for the public hearing on February 25, 2025 related to application PL-003090-2024 for 125 Thompson's Point Road, which is attached to the draft approval letter and incorporated therein, the Planning Board **[adopts/does not adopt]** the approval letter as drafted as the Planning Board's decision for application PL-003090-2024, and authorizes the Planning Board Chair to sign the approval letter as drafted.

Project Name: Forefront at Thompson's Point – Master Development Plan
Project ID: 2013-262
CBL: 201-A-5
Applicant: Forefront Partners I, LP
Planner: Nell Donaldson

Dear Mr. Thompson:

On February 11 and March 11, 2014, the Planning Board considered your master development plan application for the Forefront at Thompson's Point. The Planning Board reviewed the proposal for conformance with the master development plan standards of the city's land use code, made findings that the proposal met the required standards and voted to approve the application with the conditions presented below.

MASTER PLAN

The Planning Board voted (6-0, Boepple abstained) that the proposed plans are in conformance with the master plan standards of the city's land use code, subject to the following conditions of approval, which must be met prior to subdivision approval, unless otherwise stated:

1. The applicant shall provide a summary of existing and/or proposed easements, covenants, public or private rights-of-way, or other burdens on the site, including the proposed easement to the Department of Public Services to use the private drive system for turn-around access and easements and conditions relating to public use of trails and open space on the site, for review and approval by the Department of Public Services and the Planning Authority;

2. The applicant shall provide evidence of water capacity from the Portland Water District, for review and approval by the Planning Authority;

3. The applicant shall provide evidence of sewer capacity from the Department of Public Services, for review and approval by the Planning Authority;

4. The applicant shall submit a revised report from a certified fire protection engineer describing evacuation procedures; add a note to the master development plan indicating that all buildings will include sprinkler and fire alarm systems, except for buildings determined by the Fire Prevention Bureau to be exempt from such regulations; and revise the event management plan to indicate that free and clear fire access will be maintained at all times during events, for review and approval by the city's Fire Prevention Bureau;

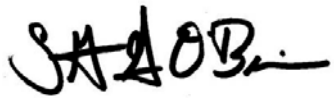
5. The off-site transportation-related improvements as heretofore required through prior approvals shall represent the off-site transportation-related improvements required for the master development plan and subsequent Level III subdivision and site plan review, so long as the existing Traffic Movement Permit applies; additional requirements for on-site transportation improvements shall be addressed through subdivision and site plan review.

The approval is based on the submitted plans and findings related to master development plan standards as contained in the Planning Board Report and Addendum for application 2013-262, which are attached.

STANDARD CONDITIONS OF APPROVAL & REQUIREMENTS
Please note the following standard conditions of approval and requirements for all approved master development plans:

1. **Separate Level III Subdivision/Site Plan Approvals Required** This approval establishes the general parameters to be adhered to for the development, including the supporting documentation for floor area ratio and/or residential density, general types of uses, building coverage, generalized open space plans and infrastructure systems. This master development plan approval shall not be construed as final authorization of the development. Approval shall confer pending proceeding status upon the development with the effect of maintaining the applicability of regulations in effect at the time of approval for as long as the master development plan approval remains valid, including permissible extensions if granted. Separate Level III subdivision and site plan approvals are required. Level III subdivision and site plans for each phase shall be in general conformance with the master development plan.

2. **Master Development Plan Amendments** A minor amendment to a master development Plan shall be defined as a change which is generally consistent with the approved master development plan layout of buildings, circulation infrastructure, and open spaces, and:



i. Does not propose any new general type of use beyond those approved initially;
ii. Does not increase the building ground coverage, floor area ratio or residential density of the Master Development Plan;
iii. Does not decrease any specified area regulations or enumerated parking ratios; and
iv. Does not substantially change access, circulation, or infrastructure on or adjacent to the site.

The Planning Authority shall be authorized to approve such minor amendments to a master development plan upon written application and explanation of the change(s) by the owner (or its agent) of the property. No further public hearings shall be required.

3. **Master Development Plan Expiration** An approved master development plan shall expire six (6) years from the date of approval unless, prior to the expiration of the master development plan, a written request for an extension is submitted to the Planning Authority. Only two (2) such extensions may be granted by the Planning Authority, and each such extension shall be limited to two (2) years from the date of expiration of the master development plan. The Planning Authority may grant an extension provided there have not been substantial changes to the underlying zoning or site plan standards since the date of the master development plan approval that would have a substantial impact on the approval. The Planning Authority may condition the extension on an amendment of the master development plan to comply with such applicable ordinance or site plan standard changes per *Section 14-532(d)* of the city's land use ordinance. Approved major or minor amendments to a master development plan do not alter the expiration date for the master development plan.

If there are any questions, please contact Nell Donaldson at (207) 874-8723.

Sincerely,

Stuart O'Brien, Chair
Portland Planning Board

Date:	March 6, 2014
Re:	Addendum to 2/11/14 Board report, Thompson's Point Master Development Plan
Project #:	2013-262 **CBL:** 201 A 005001
Meeting Date:	March 11, 2014

I. INTRODUCTION

On February 11, 2014, the Planning Board held a final hearing on the master development plan for the Forefront at Thompson's Point. This plan, which had been reviewed by the board at a previous workshop held on January 28, 2014, represented a reiteration of a prior, approved subdivision for the site. As such, the application relied heavily on materials submitted as a product of earlier reviews. Due to time constraints, the Planning Board was not able to deliberate fully on the final master development plan during the February 11 hearing. However, several questions, mainly related to potential transportation impacts and the approach to the site's existing Traffic Movement Permit (TMP), the form and scale of the proposed buildings, and the process of managing future amendments to the master development plan, were raised. The board elected to table the plan and requested that the applicant consider these aspects of the project and return to the board at the next available hearing date on February 25. The applicant subsequently requested to be moved to the March 11 hearing, based on staff availability and a desire to develop additional supporting materials.

This addendum to the February 11 Planning Board report reviews additional materials submitted by the applicant and discusses items which were raised in the Board hearing or in the intervening time. On the basis of these materials and items, this addendum also presents a revised motion with updated conditions of approval.

II. REVISED SUBMITTALS

Following several meetings with planning staff, the applicant provided additional supporting materials to the Planning Division during the week of March 3. The materials included a revised trip generation analysis for the master development plan, intended to fit within the limits of the existing TMP, a revised parking analysis, additional renderings, and revised master plan graphics. These materials are discussed in detail below.

1. Revised Trip Generation Analysis

At the February 11 hearing, board members and members of the public raised a number of concerns regarding potential traffic and transportation impacts resulting from the project. Staff's report to the board, which referenced comments from Thomas Errico, consulting traffic engineer, provided brief overviews of the master plan's approach to transportation infrastructure; the existing Traffic Movement Permit (TMP), including off-site mitigation currently funded through the EDA grant and FHWA funding processes; the parking plan; the draft events management plan; and the draft transportation demand management plan *(Attachment 1)*. It should be reiterated that Mr. Errico expressed his satisfaction with the applicant's request to rely on the previously-developed events management and transportation demand management plans; Mr. Errico's comments note that these plans will be more fully vetted under subdivision and site plan review.

Existing Traffic Movement Permit (TMP)
As previously discussed, the applicant's plan relies heavily on the existing Traffic Movement Permit for the site, developed as a product of previous reviews. This permit, which was issued by the Maine Department of Transportation in June of 2012, includes a number of assumptions regarding uses *(Attachment 1, See J under 'Applicants' Submittals')*. Based on these assumptions, the TMP permits a certain number of AM and PM peak hour weekday trips (734 AM and 1,091 PM trips to be exact). It should be noted that the permit speaks to allowable trips and not to specific uses; modification of uses is permissible under the existing TMP so long as the program does not generate traffic exceeding the number of permitted AM and PM trips.

Based on the projected trip generation and the quantity of permitted trips, the TMP requires a substantial degree of on-site and off-site mitigation. This includes:

1. Overhead illumination for all entrances;
2. Widening of the Thompson's Point Connector Road to include an 8 ft. shared bike/pedestrian path; 3 ft. shoulders, two 11 ft. travel lanes, and one 11 ft. concrete flush median (which would transition to an exclusive outbound left-turn lane at the Fore River Parkway and be used as a reversible lane during events);
3. A provision that no concerts/sporting events be held between 4-7 pm Monday-Friday;
4. A provision that, during 'large' concerts/sporting events, flaggers and uniformed police officers be present to manage the reversible lane on the Thompson's Point Connector Road; help pedestrians cross at crosswalks, manage inbound and outbound buses at the Portland Transportation Center (PTC) entrance, assist PTC patrons leaving the PTC parking lot in merging with the outbound flow, and direct traffic at the Thompson's Point Connector Road/Fore River Parkway;
5. Improvements to the Fore River Parkway/Thompson's Point Connector Road/I-295 Exit 5A SB intersection, including the reconstruction of the southbound off-ramp to include a separate 13 ft. left turn lane and a 13 ft. through lane, the addition of a queue detector to pre-empt the signal as necessary, and the modification of signal phasing;
6. Improvements to the Fore River Parkway/Congress Street/I-295 Exit 5B intersection, including widening the southbound off-ramp to include two 12 ft. right-turn lanes, the installation of a queue detector to pre-empt the signal as necessary, modification of signal phasing, and the restriping of Congress Street westbound to lengthen the existing left-turn lane;
7. Improvements to the Congress Street/Stevens Avenue intersection, including restriping Stevens Avenue to create an exclusive left turn lane and a shared left-through-right lane, modification of signal phasing, and payment of an impact fee of $15,000 for inlaid thermoplastic paint skips, retro-reflective back plates, and overhead lane signage;
8. Payment of an impact fee of $15,000 for inlaid thermoplastic paint skips, retro-reflective back plates, and overhead lane signage at the Congress Street/Westbrook Street intersection;
9. Payment of an impact fee of $15,000 for inlaid thermoplastic paint skips, retro-reflective back plates, and overhead lane signage at the Congress Street/Frost Street intersection; and
10. A provision that transportation demand management strategies be used to offset additional traffic impacts.

The TMP also states explicitly that, if any supporting data changes, the applicant shall "request in writing from MaineDOT a decision of what impacts those changes will have on the permit. The applicant will then be required to submit those changes for review and approval and additional mitigation as a result of those changes may be required at the expense of the applicant."

In terms of history, it should be noted that staff's final report to the Planning Board on the original subdivision/Level III site plan for the project, published in June 2012, discussed the improvements required as a product of the TMP. The report did not raise significant issues related to the off-site

mitigation requirements.

It should also be noted that, as a product of the original planning process, additional off-site traffic investments are planned which will provide capacity that will benefit the Forefront at Thompson's Point. These investments include sidewalk improvements, trail connections, and lighting improvements.

As discussed in the February 11 Planning Board report, the applicant originally proposed a development program for the master plan that resulted in trip generation exceeding the existing TMP thresholds cited above. The applicant suggested a monitoring approach and, as necessary, modification of the TMP under site plan review at later phases of the project. The city's consulting traffic engineer, Tom Errico, generally agreed with this approach. However, he requested a letter from MDOT verifying their concurrence and suggested that monitoring occur at each phase of site plan review to ensure that trip generation thresholds not be exceeded. These recommendations were included in the February 11 Board report as conditions of approval.

Revised Trip Generation Analysis
Recognizing that, regardless of Mr. Errico's or MDOT's comfort with the approach to the TMP, the Board and public had concerns regarding modifications to the TMP at later stages of buildout, the applicant has chosen to submit supplemental materials which alter their development program and reassess their trip generation numbers in an effort to fit within the trip generation thresholds of the existing TMP. The applicant's revised trip generation analysis describes their approach (*Attachment B).*

In their revised analysis, the applicant has generally achieved a reduction in trip generation through three mechanisms: the modification of uses, reduction in occupancy, and the reassessment of projected trip generation numbers using revised trip generation ratios from the Institute of Traffic Engineers (ITE). Together, these have the effect of reducing the projected AM peak hour trip generation from 1,146 to 800 and the PM peak hour trip generation from 1,314 to 1,015. The trip generation changes include the following:

- In the original master plan submittal, Building B3 was proposed as a 6,000 SF restaurant generating 69 AM and 66 PM peak hour trips. In the applicant's revised trip generation analysis, the building's use has been changed such that it will be "ancillary to the Depot building and will not generate additional traffic" *(Attachment B)*. In conversation, the applicant has further explained that this building will serve as back-of-house operations for the performance space contained in the adjacent Depot. As such, no trips are estimated to be generated as a product of this building.
- In the original master plan submittal, Building C1, the Circus Conservatory of America, was estimated to generate 123 AM and 104 PM peak hour trips. These trip generation figures were based on ITE rates for community colleges using square footage as the independent variable. In the revised submittal, the applicant has recalculated trip generation figures using the ITE rate for community colleges, but basing the total on student population and staffing numbers rather than on square footage. This results in a decrease in trip generation to 25 AM and 21 PM trips.
- The original master plan submittal projected 70 AM peak hour trips as a product of Building E1, the hotel. In the revised trip generation analysis, this figure has been reduced to 54 using an ITE-based trip generation rate referenced in prior approvals.
- Under the original master plan application, the event center was proposed with an occupancy of 2,866 and projected to generate 115 AM and 224 PM peak hour trips. In the revised submittal, the occupancy has been reduced to 2,500, resulting in a decrease in trip generation to 100 AM and 195 PM peak hour trips.
- Lastly, in the original master plan submittal, Building J1 was proposed as a 160,000 SF office building. In the revised trip generation analysis, this building has been converted to 160 residential condominium units. Based on ITE ratios, this results in a decrease in AM peak hour

trips from 273 to 70 and in PM peak hour trips from 258 to 83.

It should be noted that the revised trip generation analysis also assumes a 100 trip "buffer" customarily provided by MDOT when considering TMP thresholds. While the revised cumulative PM trip generation figure stands well below the TMP threshold of 1,091 trips, the total AM trip generation figure of 800 actually exceeds the 734 trips permitted under the TMP. The buffer is needed in this case in order to accommodate these excess trips.

The applicant states in their revised trip generation analysis that "[t]he MaineDOT requires any development that exceeds their permitted trips by more than 99 trip ends in any peak hour to receive a permit modification. Since the proposed Master Plan does not exceed the 99 trip end threshold, a MaineDOT permit modification is not required. This was confirmed with MaineDOT" *(Attachment B).*

Tom Errico, consulting traffic engineer, has reviewed the revised trip generation analysis. He writes,

> *The applicant has revised the trip generation analysis to reflect the current development program and I concur with the methods used and the conclusions. Accordingly, the proposed project will comply with the MaineDOT Traffic Movement Permit (TMP) from a trip generation threshold perspective. In the issuance of a TMP, MaineDOT allows for a "buffer" of 100 trips above that noted in the Permit before a modified permit is required. As detailed by the applicant, the Project will generate less trips during the AM and PM peak hours when considering the buffer trips. I find the Master Plan to be in compliance with the TMP.*

NNEPRA/Portland Transportation Center Consultation
At the hearing on February 11, Board members raised questions regarding the involvement of Northern New England Passenger Rail Authority (NNEPRA) and the Portland Transportation Center in the planning of traffic mitigation measures. In terms of history, a stakeholder meeting was held in September of 2011, as the traffic movement permit was being developed, in order to discuss potential improvements and user conflicts on the Thompson's Point Connector Road and its surroundings. Representatives of NNEPRA, Concord Coach Lines (who owns the adjacent Portland Transportation Center), Amtrak, the city, and MDOT attended.

It should be noted that this meeting coincided with NNEPRA's *Portland Station Location Evaluation,* which considered future rail service in the context of several alternatives to the existing Portland Transportation Center site. The NNEPRA study, concluded in October of 2011, resulted in the decision to remain in the current location and invest in its improvement as a "thriving transportation hub." This decision was based, at least in part, on the "potential for increased transit connections, expansion and development associated with the Forefront project." NNEPRA's Executive Director, Patricia Quinn, has more recently indicated her organization's endorsement of the project as revised under the master plan, noting that the "project as proposed provides wonderful and exciting opportunities for the Downeaster, the City of Portland, and all of southeastern Maine" *(Attachment PC-1).*

In terms of coordination with the Portland Transportation Center, as mentioned during the February 11 hearing, the PTC contracted with Sebago Technics to conduct an independent assessment of the Thompson's Point traffic impact study during the initial subdivision and site plan review. The TMP was revised following the release of this report in an effort to accommodate concerns raised by the PTC.

Revised conditions of approval
Given Mr. Errico's review of the revised trip generation analysis, original conditions from the February 11 Board report that required written approval from MDOT regarding the TMP approach and traffic

monitoring are no longer germane. (It should be noted that compliance with the TMP will be assessed as the applicant proceeds through site plan review.) As such, these conditions of approval have been eliminated.

Further, at the applicant's request, staff has added a condition of approval related to the off-site transportation improvements required through the TMP and prior planning work, to which the applicant has made significant financial commitment. This condition is intended to define the off-site mitigation required so long as the existing TMP applies.

2. Revised Parking Analysis

The applicant's additional materials also include a revised parking analysis that recalculates peak parking demand *(Attachments C and D)*. In the original master plan submittal, the peak parking demand, represented by an average day with a live theater event after 5 PM, was estimated at 1,877 spaces. In the revised analysis, this figure has dropped to 1,822 spaces "as a result of [a] minor modification of the "outbuildings" near the old Union Station Depot outdoor event structure at the tip of the point (the removal of the second restaurant use and its consolidation with the proposed boathouse/café structure next to the "Depot")" *(Attachment C).*

Mr. Errico noted in his comments in the February 11 Board report that the peak parking demand exceeds the proposed parking supply at full buildout, 1,290 spaces. Even under the revised parking analysis, this remains the case. Mr. Errico stated previously that "during the site plan approval process the applicant will be required to demonstrate that adequate parking supply will be provided for the proposed uses" *(Attachment 1).* Again, this will remain the case. The applicant has indicated that they intend to use a combination of transportation demand management strategies, many of which are outlined in the transportation demand management plan, to accommodate peak parking demand without "over-building" parking infrastructure. It should be noted that the proposed parking supply is more than adequate to meet the projected demand on the average day without events. Mr. Errico has reviewed the revised parking analysis and writes,

> *I have reviewed the parking demand analysis and I find the method and estimates to be reasonable. I would note that the evaluation of parking supply adequacy will be conducted during each phase of the project. In general the project will provide sufficient parking for typical days and during large events a host of strategies will be employed that may include off-site parking with shuttle services. The on-going review will be linked to the TDM plan and Event Management Plan and will be adjusted as actual parking needs and management are better understood. Accordingly, I find the parking program under the Master Plan to be acceptable.*

3. Additional Renderings

At the February 11, 2014 hearing, Board members also raised questions regarding the design and massing of the proposed master plan, particularly as seen from the adjacent neighborhood to the north. In response, the applicant has provided renderings showing the site from residential streets across the railroad tracks *(Attachment E).* It should be noted that the applicant has also provided links to the walk-throughs shown at the February 11 hearing.

4. Revised Plans

In keeping with the changes to the development program as represented in the revised trip generation and parking analyses, the applicant has provided updated master plan graphics *(Plans 1 and 2).* The updated development program includes changes in uses for Buildings B3 (from restaurant to "ancillary") and J1 (from office to residential) and slight changes in the program for Building J2 (from 120 to160 residential units) and the event center (a decrease in occupancy). Altogether, these changes result in less commercial

square footage and more residential density. The increased emphasis on residential development advances the notion of the site as a transit-oriented development and in many ways allows for a more efficient use of the site overall. The revised development program is as follows:

Table 1: Forefront at Thompson's Point, Proposed Development Program

	Building	Height	Floor area	Footprint	Units	Rooms	Seats	Surface parking	Garage parking	Total parking
1A	Building A: Office, Café, Retail	Existing	34,000	34,000				71		*71*
1B	Building B1: Multi-Purpose (Live Theater)	Existing	14,000	14,000				436		*507*
	Boat Launch									
1C	Building C: Educational	1-2 Floors	41,000	33,750				(175)		*332*
1D	Building B2: Restaurant	1 Floor	3,600	3,600				(19)		*313*
	Building D: Gym & Medical Office	1 Floor	11,000	11,000						
	Portions of West Side Trail & Outdoor Stage									
1E	Building E1: Hotel & Condominiums	120 ft	70,000	23,350	24	125		144		*457*
	Building E2: Restaurant	1 Floor	6,000	6,000						
	Remainder of West Side Trail

	Building J2: Condominiums	TBD	196,500	19,650	160			(48)	48	
2C	Building B3: Ancillary to B1	1 Floor	6,000	6,000						*1,290*
	TOTAL		***973,205***	***303,189***	***344***	***125***	***4,800***	***434***	***856***	***1,290***

III. ADDITIONAL DISCUSSION ITEMS & MODIFICATIONS TO CONDITIONS

In addition to the supplemental materials provided by the applicant, there are several discussion items which have emerged in the time since the February 11 hearing. All of these relate to the original conditions of approval from the February 11 Board report.

1. Trail and Open Space Access

Following the hearing, representatives of Portland Trails and the city's Department of Public Services raised questions regarding bike and pedestrian access along the northern edge of the site *(Attachment 3)*. The city's *Bicycle and Pedestrian Plan* and PACTS's *Regional Bicycle and Pedestrian Plan* identify the existing rail line in this location as an alignment for a future bike/pedestrian trail link, and Portland Trails and the city's Department of Public Services expressed a desire to identify this link in some capacity in the master plan. The link would serve a different purpose from the proposed perimeter trail, which has

always been a foundational element of the master plan; a bicycle/pedestrian way along the rail corridor, when combined with other bicycle and pedestrian links defined in regional long-range planning efforts, would provide a commutable alternative to Congress Street, with direct access from outlying neighborhoods to the peninsula.

In conversations following the correspondence with DPS and Portland Trails, the applicant stated clearly that a lack of space precludes the creation of a dedicated trail or bicycle lane paralleling the railroad tracks at the northern edge of the site. However, they also expressed a willingness, in concept, to create a bicycle/pedestrian way in some capacity, through pavement markings, signage, or other mechanisms, that would establish a more direct east-west route and link with the greater Portland Trails network. It is assumed that the details of this arrangement would be resolved under Level III site plan/subdivision review.

Also related to trails and open spaces, staff requested clarification from the applicant on the terms of public access to the perimeter trail, boat launch, and water on Thompson's Point. In conversation, the applicant stated explicitly that, as will be the case under the easement for the panhandle trail, the boat launch, water access, and perimeter trail will be accessible for public use through a license or other such agreement. That agreement would include provisions reserving the right of the applicant to limit public access at particular times (e.g. during events on site).

2. Fire

Staff has suggested a minor modification to the condition of approval relating to fire safety, based on conversations conducted with Chris Pirone of the Fire Prevention Bureau regarding the Depot building at the southern end of the peninsula. Captain Pirone has indicated that this building may not require a sprinkler, depending on its use. As such, staff has modified the condition of approval to state that all buildings will be sprinklered except as determined to be exempt by the Fire Prevention Bureau.

3. Phasing Plan

Lastly, staff was able to review the master phasing plan; as a result, the original condition of approval relating to this phasing plan has been eliminated.

IV. MASTER DEVELOPMENT PLAN AMENDMENTS

As noted in the February 11 report, the city's site plan ordinance includes language related to the procedure for processing master plan amendments (*Section 14-532(b)).* The ordinance defines "minor" amendments, or those that simply require administrative approval, as those which are "generally consistent" with the approved master plan layout, circulation, infrastructure, and open spaces. A minor amendment is qualified as a change which:

> *(i) Does not propose any new general type of use beyond those approved initially;*
> *(ii) Does not increase the building ground coverage, floor area ratio or residential density of the Master Development Plan;*
> *(iii) Does not decrease any specified area regulations or enumerated parking ratios; and*
> *(iv) Does not substantially change access, circulation, or infrastructure on or adjacent to the site.*

It is implied that changes which do not meet these conditions would require Planning Board review.

However, at the February 11 hearing, both board members and the applicant pressed for further clarification on thresholds triggering board review of future master plan changes. In internal discussions, as well as in discussions with the applicant, staff considered a series of thresholds, such as when an applicant proposes an increase in net square footage, a change of use, changes in trip generation, or

substantial changes in circulation or the location of buildings. On closer inspection, however, this list of potential additional thresholds was found to closely mirror the language of the existing ordinance. As such, no condition of approval related to amendments is suggested here.

V. STAFF RECOMMENDATION

Subject to the proposed motions and conditions of approval listed below, Planning Division staff recommends that the Planning Board approve the master development plan for the Forefront at Thompson's Point.

VI. PROPOSED MOTION – MASTER DEVELOPMENT PLAN

On the basis of the application, plans, reports and other information submitted by the applicant; findings and recommendations contained in the Planning Board report for the public hearing on February 11, 2014 and the addendum to said report for the public hearing on March 11, 2014 for application 2013-262 relevant to the master development plan regulations; and the testimony presented at the Planning Board hearing, the Planning Board finds that the plan **is/is not** in conformance with the master development plan standards of the land use code, subject to the following conditions of approval, which must be met prior to subdivision approval unless otherwise stated:

1. The applicant shall provide a summary of existing and/or proposed easements, covenants, public or private rights-of-way, or other burdens on the site, including the proposed easement to the Department of Public Services to use the private drive system for turn-around access and easements and conditions relating to public use of trails and open space on the site, for review and approval by the Department of Public Services and the Planning Authority;

2. The applicant shall provide evidence of water capacity from the Portland Water District, for review and approval by the Planning Authority;

3. The applicant shall provide evidence of sewer capacity from the Department of Public Services, for review and approval by the Planning Authority;

4. The applicant shall submit a revised report from a certified fire protection engineer describing evacuation procedures; add a note to the master development plan indicating that all buildings will include sprinkler and fire alarm systems, except for buildings determined by the Fire Prevention Bureau to be exempt from such regulations; and revise the event management plan to indicate that free and clear fire access will be maintained at all times during events, for review and approval by the city's Fire Prevention Bureau;

5. The off-site transportation-related improvements as heretofore required through prior approvals shall represent the off-site transportation-related improvements required for the master development plan, so long as the existing Traffic Movement Permit applies; additional requirements for on-site transportation improvements shall be addressed through subdivision and site plan review.

PLANNING BOARD REPORT
PORTLAND, MAINE

The Forefront at Thompson's Point, Portland, Maine
Master Development Plan
Application #2013-262
Thompson's Point Development Company, Inc., d/b/a Forefront Partners I, LP, Applicant

Submitted to: Portland Planning Board: Public Hearing Date: February 11, 2014 CBL: 201-A-5	Prepared by: Nell Donaldson, Planner Date: February 7, 2014

I. INTRODUCTION

The Thompson's Point Development Company, Inc, doing business as Forefront Partners I, LP, appears before the Planning Board for a final review of the proposed master development plan for the Forefront at Thompson's Point. The plans represent a final iteration of a preliminary application that was presented to the board at a workshop on January 28, 2014.

Thompson's Point consists of approximately 30 acres of land located adjacent to the Portland Transportation Center. The applicant's master development plan for the Forefront at Thompson's Point involves a mixed-use development including an event center, hotel, sports medicine facility, parking structure, educational facility, residential units, restaurants, and office uses.

The project is subject to master development plan review under *Section 14-524* of the city's ordinance. A total of 262 notices were sent to property owners within 500 feet of the site and a legal ad for the Planning Board hearing ran on February 3 and 4, 2014.

Applicant: Forefront Partners, I LP
Consultants: Stephen Bushey, FST, Inc; Owens McCullough, Sebago Technics; Bill Hopkins, Archetype

II. REQUIRED REVIEWS

Review	***Applicable Standards***
Master Development Plan	*Section 14-524(a)3c(iii)*
Site Location of Development Act	*Technical Manual Chapter 14 (to be completed at time of subdivision review)*

III. PROJECT DATA

Existing Zoning	B-5 Urban Mixed Use
Existing Use	Manufacturing, construction, and storage
Proposed Use	Mixed-Use/TOD
Parcel Size	32.67 acres

	Existing	*Proposed*	*Net Change*
Building Footprint	123,684 SF	303,189 SF	179,505 SF
Building Floor Area	123,684 SF	973,205 SF	849,521 SF
Impervious Surface Area	908,661 SF	761,430 SF	-147,231 SF
Parking Spaces	Undetermined	1,290	
Estimated Cost of Project	$100-110 million		

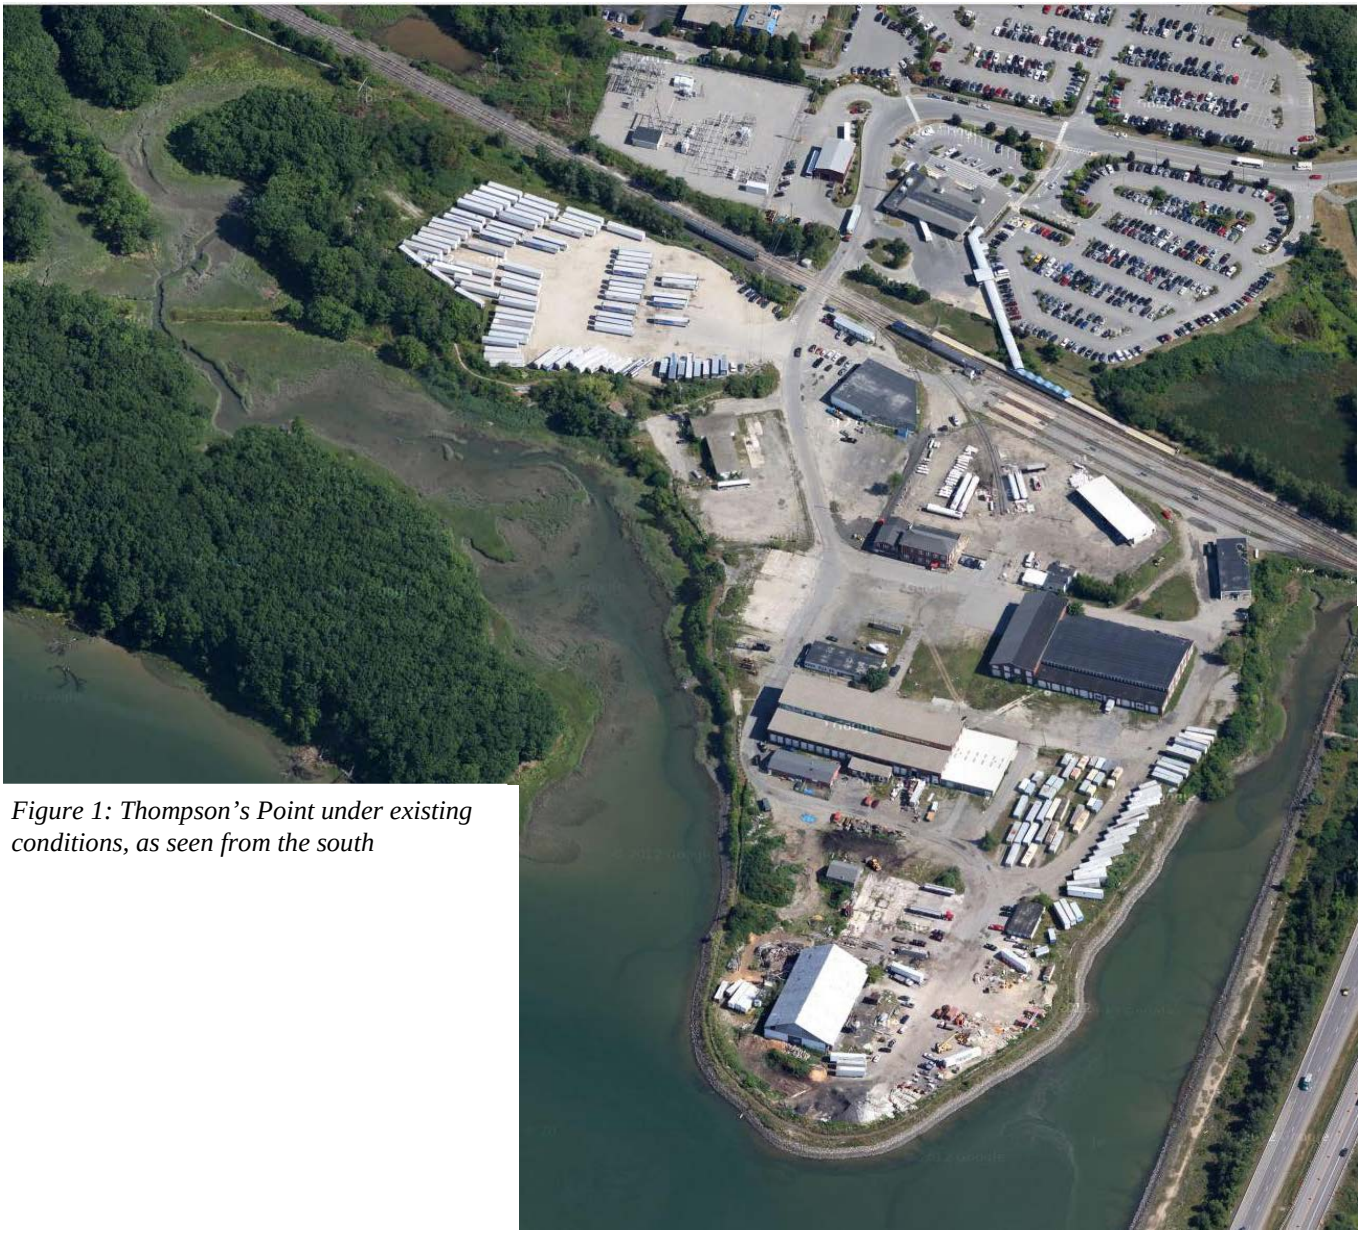

Figure 1: Thompson's Point under existing conditions, as seen from the south

IV. EXISTING CONDITIONS and BACKGROUND

Thompson's Point is a typical industrial site, bounded by railroad tracks to the north and the Fore River to the west, south, and east, and currently occupied by vacant buildings, semi-trailer box storage, and various other temporary uses *(Figure 1)*. The site does house an extension of the Fore River trail and some remnant natural areas on its western panhandle. It is a unique site in terms of its large size and its proximity to both the river and regional public transportation resources. It is zoned for urban commercial mixed-use development under the B-5 zone and is designated as a Tax Increment Financing (TIF) District.

The original plans for the Forefront at Thompson's Point, also submitted by the Thompson's Point Development Company, were approved on June 5, 2012. These plans included over 600,000 SF of non-garage building space dedicated to office, hotel, restaurant, and event center uses designed around a campus concept. In the spring of 2013, the proposed development program changed, and the applicant submitted reconfigured subdivision and site

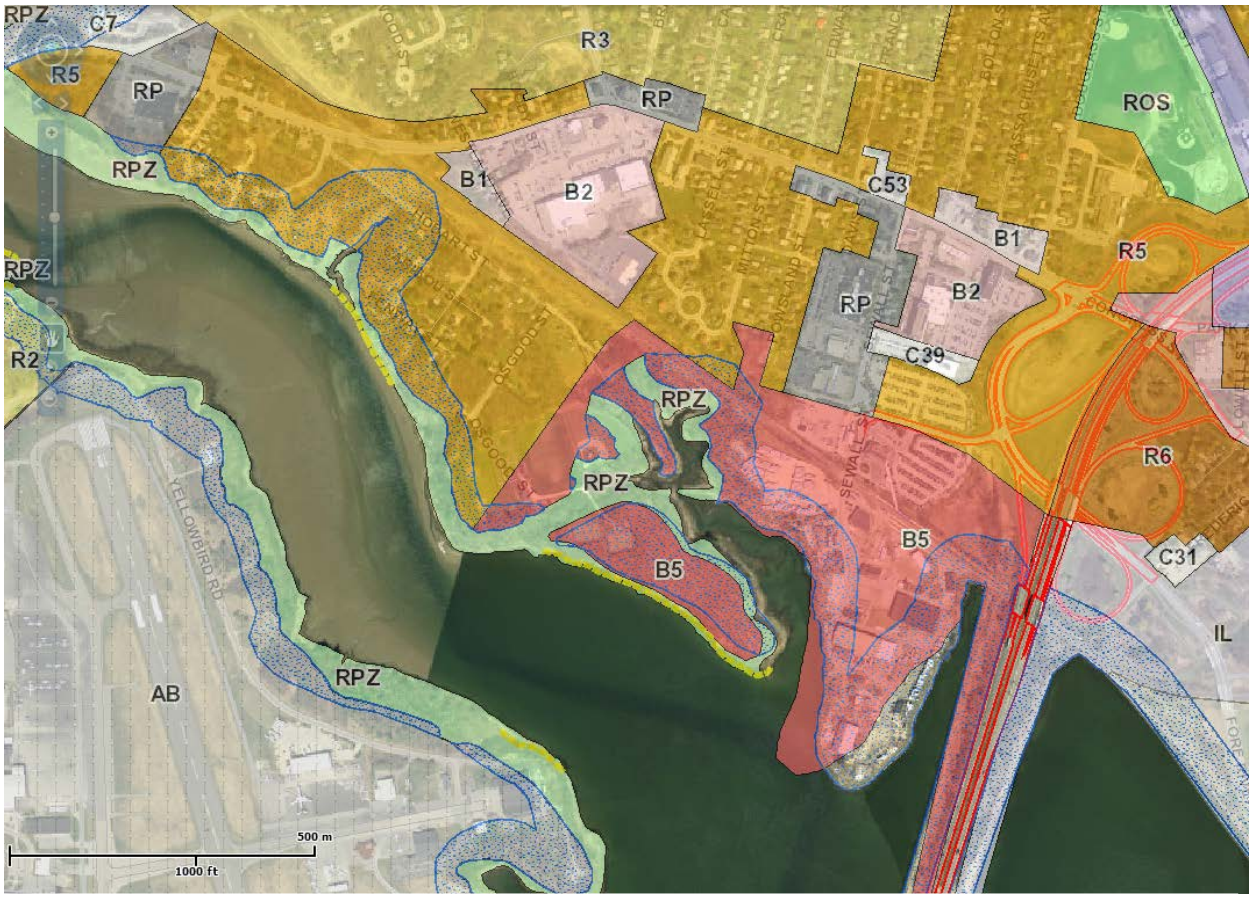

Figure 2: Thompson's Point, zoning context

plans designed to, among other things, retain existing rail-era brick buildings on the site. Amended subdivision and site plans, modified to include these buildings, were approved administratively on June 19, 2013.

In the time since these approvals, efforts to start work on off-site transportation-related improvements required through both MDOT Traffic Movement Permit (TMP) and city review processes has begun. These improvements are funded almost entirely by an EDA grant and include work to enhance bicycle and pedestrian connections, vehicular access to the adjacent highway and street networks, and the surrounding streetscape. The work is scheduled to begin in March 2014 and continue throughout the year.

V. PROPOSED DEVELOPMENT

In the time since the original approvals, the applicant has also engaged in negotiations to obtain purchase and sale agreements for two adjacent parcels critical to the development of the entire Thompson's Point peninsula. The recent acquisition of development rights to these parcels, owned by Suburban Propane and Northern New England Passenger Rail Authority (NNEPRA), has allowed the applicant to change its long-term vision for the site. In this vein, the applicant has submitted this new master development plan for the Forefront at Thompson's Point,. This plan encompasses many of the original programmatic elements of the approved subdivision. However, the physical design, affected by the additional acreage at the site's north end, is markedly different.

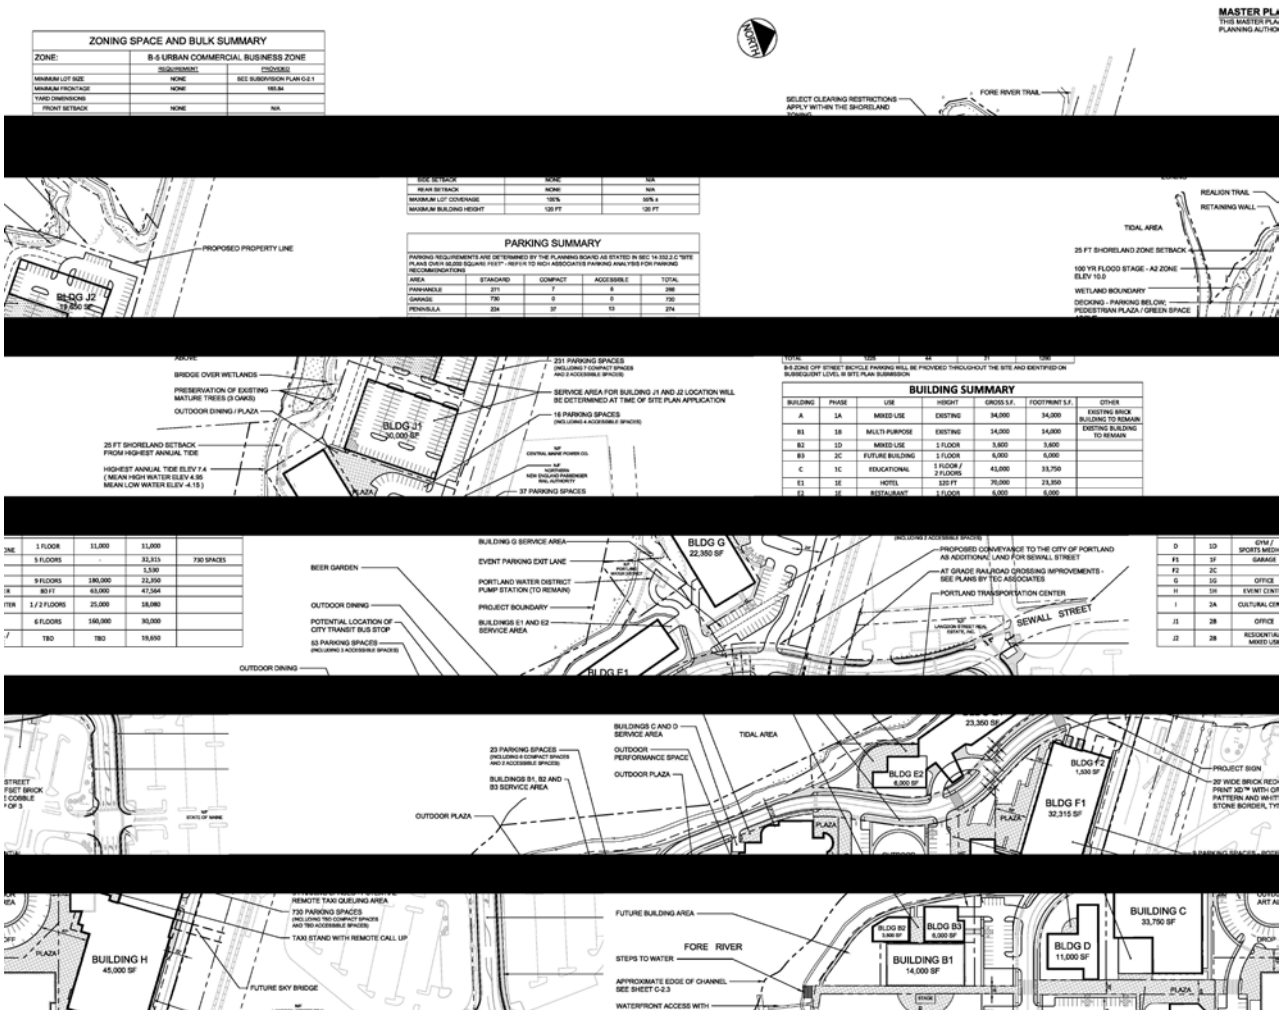

Figure 3: Revised Forefront at Thompson's Point master plan

The original Forefront at Thompson's Point plan demolished all existing structures and, as noted above, developed over 600,000 SF of non-garage square footage, comprised of institutional, office, restaurant, hotel, and event center uses. The centerpiece of the scheme was a 70,000 SF event center and concert hall. The plans included significant open space, surface parking, a perimeter trail, and public access to a shoreline boat launch. The amendments to these plans, approved in June of 2013, modified the plan to retain some of the existing buildings on site.

In the master development plan, much of this program remains. The applicant still envisions office, restaurant, educational/institutional, restaurant, hotel, event center, and garage space. The master development plan also includes live theater space, a post-secondary education complex, an 18,000 SF cultural center, and residential development. This 970,000 SF development program, by incorporating a more diverse mix of uses, including residential, advances the concept of the site as a transit-oriented development. The preliminary development program for the Forefront at Thompson's Point master plan is outlined in Table 1.

With the negotiations to acquire the Suburban Propane and NNEPRA sites and the decision to renovate four of the existing structures on the site under the master plan, the composition of the site has changed dramatically *(Figure 3)*. The master plan retains the trail surrounding the peninsula, but shortens the ring road. The development program is now organized around a stronger central core enclosed by the proposed event center and garage, a hotel and restaurant, the renovated Brick North building (to contain office, retail, and restaurant uses),

Table 1: Forefront at Thompson's Point, Proposed Development Program

Phase	Building	Height	Floor area	Footprint	Units	Rooms	Seats	Surface parking	Garage parking	Total parking
1A	Building A: Office, Café, Retail	Existing	34,000	34,000				71		*71*
1B	Building B1: Multi-Purpose (Live Theater)	Existing	14,000	14,000				436		*507*
	Boat Launch									
1C	Building C: Educational	1-2 Floors	41,000	33,750				(175)		*332*
1D	Building B2: Restaurant	1 Floor	3,600	3,600				(19)		*313*
	Building D: Gym & Medical Office	1 Floor	11,000	11,000						
	Portions of West Side Trail & Outdoor Stage									
1E	Building E1: Hotel & Condominiums	120 ft	70,000	23,350	24	125		144		*457*
	Building E2: Restaurant	1 Floor	6,000	6,000						
	Remainder of West Side Trail									
1F	Building F1: Parking Garage	5 Floors	161,575	32,315				15	730	*1,202*
	Building F2: Parking Garage		1,530	1,530						
1G	Building G: Office	9 Floors	180,000	22,350				58		*1,260*
1H	Building H: Event Center	80 ft	63,000	47,564			4,800	30		*1,290*
2A	Building I: Cultural Center	1-2 Floors	25,000	18,080						*1,290*
2B	Building J1: Office	6 Floors	160,000	30,000				(78)	78	*1,290*
	Building J2: Condominiums	TBD	196,500	19,650	120			(48)	48	
2C	Building B3: Restaurant	1 Floor	6,000	6,000						*1,290*
	TOTAL		***973,205***	***303,189***	***144***	***125***	***4,800***	***434***	***856***	***1,290***

the renovated Brick South building (to be occupied by the Circus Conservatory of America), the cultural center, and outdoor theater space/concert venue. Access from the Thompson's Point Connector Road is retained, and additional pedestrian access is provided via a sky bridge from the Portland Transportation Center.

This application is subject to master development plan review under *Section 14-524(a)3c(iii)* of the city's code. Following master development plan approval, the project will be reviewed under the city's subdivision and site plan ordinances. In addition to these municipal reviews, it should be noted that the original subdivision for the Forefront at Thompson's Point was reviewed under the state's Site Location of Development Act, for which the city had delegated review authority. Per correspondence with the Maine Department of Environmental Protection (MDEP), the city will remain the reviewing entity under the SLDA for the re-envisioned project considered here.

The original Forefront at Thompson's Point was also subject to the following state and federal permitting:

- U.S. Army Corps of Engineers General or Individual Permit (Wetland Impact)

- Natural Resources Protection Act (NRPA) Permit issued by Maine Department of Environmental Protection
- MDOT Traffic Movement Permit (issued by MDOT)
- MDEP Air Emissions License

The applicant has provided evidence of state and federal permits related to the approved subdivision plan *(Attachment J)*. In the final plan submission, the applicant has also provided a letter addressed to the Maine DEP outlining changes from the approved subdivision plan and the intent to comply with the conditions of the original NRPA permit *(Attachment L)*. Similar coordination with respect to other permitting entities will be required during subdivision review. Ultimately, evidence of new or updated permits, or documentation from reviewing entities regarding the applicability of the existing permits, will be required at the time of Level III subdivision and site plan review.

VI. PUBLIC COMMENT

The Planning Division has received no written comments from neighbors on the project. However, as noted in staff's prior workshop memo, the applicant has provided documentation from a neighborhood meeting held on December 23, 2013 *(Attachment J)*. The concerns expressed at this meeting generally focused on parking and traffic impacts, particularly during large events to be held on site. There was also some discussion of design and building height. These concerns were echoed during the board's workshop on January 28, 2014, where members of the public raised concerns regarding traffic impacts, event management, parking supply, trail access, and visual impacts from the abutting neighborhoods.

VII. RIGHT, TITLE, & INTEREST

The applicant has provided a deed demonstrating ownership of the original Thompson's Point site. In addition, the applicant has provided letters from Suburban Propane, Inc. and the Northern New England Passenger Rail Authority indicating that purchase and sale agreements have been signed for those adjacent parcels *(Attachment G)*.

VIII. FINANCIAL & TECHNICAL CAPACITY

The applicant has provided a copy of a letter from TD Bank attesting to the Thompson's Point Development Company's ability to complete the project and "see that it operates effectively over the long term" *(Attachment I)*.

IX. ZONING ANALYSIS

The Forefront at Thompson's Point lies in a B-5 zone, and is also subject to shoreland and floodplain regulations under the city's land use code. Marge Schmuckal, zoning administrator, has provided the following comments on the revised master plan:

> *I am under the realization that this review is only for a Master Plan and is not a site plan review. The applicant states that the team is working on an update to the acoustical study and compliance with B-5 Noise Performance Standards which will be forwarded upon completion. I will need that study during the Site Plan review stage.*
>
> *I have reviewed page C-3.00 where the HAT (Highest Annual Tide) for 2013 is denoted along with the 25 foot shoreland zone setback and the current 100 year flood elevation. All three of these meet the current Land Use Ordinance.*
>
> *The applicant mentions that they will comply with the Shoreland tree clearing certification as part of the Condition of Compliance. Again, I can confirm this regulation during the Site Plan Review process.*

In reference to off-street loading requirements, I will default the final review of this requirement, along with the other B-5 dimensional requirements during the Site Plan review application.

X. MASTER PLAN SUBMISSION REQUIREMENTS (*Section 14-527(e)*)

Section 14-527 of the city's site plan ordinance outlines master development plan submittal requirements. The applicant has generally met these requirements, including the submission of a digital 3D model of the development. In accordance with the submittal requirements, the city has requested a summary of existing and/or proposed easements, covenants, public or private rights-of-way, including the proposed easement to the Department of Public Services to use the private drive system for turn-around access and conditions relating to public use of trails and open space on the site, as requested under previous reviews. This has been included as a condition of approval.

XI. MASTER DEVELOPMENT PLAN STANDARDS (*Section 14-524(a)3.c(iii)*)

Section 14-524 of the city's land use code establishes standards under which master development plan applications must be reviewed. Per this section, master development plans must be:

a. A designated tract of land consisting of a parcel or parcels of contiguous land or land on both sides of a public street, totaling one (1) acre or more;
Altogether, the Thompson's Point site, when expanded to include the adjacent Suburban Propane and NNEPRA parcels, encompasses 32.67 acres.

b. Developed in a comprehensive, design-integrated manner, according to an overall master development plan;
The applicant has submitted a master plan for the Forefront at Thompson's Point which incorporates all major aspects of the site in a comprehensive manner.

c. Consistent with the objectives of this ordinance;
The application and development plan are generally consistent with the objectives of the city's ordinance, including the purpose of the B-5 zone, which is "to provide zones in areas of the peninsula near the central business district where a mixture of uses, including marine, industrial, commercial, and residential, is encouraged. The B-5 and B-5b zones are characterized by larger underdeveloped lots with great potential for denser, clustered, urban mixed use development and more efficient reuse of existing land and buildings. It is anticipated that such denser, mixed uses would rely on a shared infrastructure system, including service alleys, parking lots, public transportation facilities, stormwater management, and driveways."

d. Consistent with the City's Comprehensive Plan and consistent with City Council approved master plans and facility plans for off-premise infrastructure, including but not limited to, trails, pedestrian and bicycle network, view corridors, environmental management, sewer and stormwater, streets, or other facilities (see Section 15 of the Technical Manual);
The Forefront at Thompson's Point master plan is also generally consistent with the city's long-range transportation and economic planning work, including the following goals and policies from the comprehensive plan, among others:

- …Encourage sustainable development patterns and opportunities within the city by promoting efficient land use, conservation of natural resources, and easy access to public transportation, services, and public amenities (21);
- Create local multi-modal centers for the city's commuters and mass transit passengers, building on the presence of existing centers of activity, connected with each other and with regional transportation centers (24);
- Create a variety of job opportunities for the full spectrum of the labor pool which are appropriate to our current and potential skills, provide good pay and benefits, are rewarding/satisfying (37); and

- Encourage higher density housing for both rental and home ownership opportunities, particularly located near services, such as schools, businesses, institutions, employers, and public transportation (44).

e. Developed so as to locate buildings and improvements in a manner that provides usable open space, preserves significant natural features, as defined by the site plan ordinance standards, and preserves existing trees to the maximum extent possible;
As an industrial site, Thompson's Point is largely developed, with very few remaining natural features. Those natural features which do exist include emergent and existing wetlands and stands of trees along the westerly shoreline, at the far western end of panhandle, and along the northeastern shore. The Forefront at Thompson's Point master plan generally reorganizes the site in an efficient manner which allows for minimal wetland alteration, the preservation of some specimen trees, and the creation of significant new open spaces, both in hardscaped and landscaped areas.

In terms of landscape preservation, during the original approval process for the Forefront at Thompson's Point, the city arborist identified mature red oaks and a small stand of sapling white oaks meriting

Figures 4 & 5: Aerial view of the Forefront at Thompson's Point; rendering of the central 'quad area,' including the façade of the proposed event center

preservation in the western panhandle. In the revised submittal, these trees are shown on the master plan and referenced in the landscape narrative, where the applicant has stated that "several significant oak trees have been identified for preservation and all efforts will be made to protect the trees and provide adequate zones around them during construction" *(Attachment N)*. Notes have also been added to the master plan relating to clearing restrictions within the shoreland zone *(Plan 2)*. The applicant states in their narrative that "tree removal…will be certified by our forester to insure consistency with the Shoreland Zoning Vegetation Management requirements."

As noted previously, under the master plan, a central plaza, framed by the event center, renovated Brick North Building, and renovated Brick South building, forms the core element of the site's new open space network *(Figure 5)*. The plan links this plaza with a large, grassed open space area at the southern end of the peninsula, intended for outdoor concerts, via a tree-lined pedestrian walkway which runs the length of the peninsula's spine *(Figure 4)*. Exhibit, outdoor performance, and parking areas flank this corridor to the east and west. Additional, smaller hardscaped areas adjoin most of the site's proposed buildings. The applicant's landscape narrative emphasizes the use of native trees and shrubs, with a naturalized treatment at the perimeter of the site and more formal landscape design at the site's interior.

The plans also show a perimeter trail around the majority of the peninsula, much of which is proposed in the footprint of the existing trail. This path would link with the Fore River Trail and the Portland Trails network to the west. It would transition to sidewalk approximately one-third of the way up the eastern side of the peninsula.

Jeff Tarling, the city's arborist, has indicated his general approval of the master development plan. He writes,

> *The Thompson Point 'Landscape Master Plan' is a new look for many of the landscape treatment recommendations considered for this site in earlier renditions. Particularly important are guidelines for the shoreland zones and the upland parts of the site. 'Tree save' areas are shown for the Red Oak trees growing near the foot of the slope near building 'H' and Area 'A'.*
>
> *Overall, Thompson Point is a very visible and environmentally sensitive site with the location surrounded on three sides by the Fore River and Turning Basin. Creating a Master Plan will help guide future site work and the corresponding landscape treatment needed.*

f. Developed so as to be in conformance with Portland's Historic Preservation Ordinance standards for designated landmarks or for properties within designated historic districts or designated historic landscapes, if applicable. When proposed adjacent to or within one hundred (100) feet of designated landmarks, historic districts or historic landscapes, the Master Plan shall be developed so as to be generally compatible with the major character-defining elements of the landmark or portion of the district in the immediate vicinity of the proposed development;

The site is not located in a historic preservation district; nor is it adjacent to a designated landmark or designated historic landscape. However, the previous review for the Forefront at Thompson's Point included documentation from the Maine Historic Preservation Commission stating that the two existing brick buildings are likely eligible for designation under the National Register of Historic Places due to the lack of other existing early rail-era structures in the city. These are slated for redevelopment under the master plan. It should also be noted that the early 19th century Cumberland and Oxford Canal crossed the site; evidence of the channel and tow path remain visible in the western panhandle area. The previously-approved subdivision and site plans were deemed by the city to have no impact on these historical remnants. The applicant has noted their location and has stated that the master plan will, likewise, have no impact.

g. An efficient use of land which properly considers topography and protects significant natural features including, but not limited to, waterways, wetlands, floodplains and wildlife;
As noted above, the existing Thompson's Point site is largely developed with industrial buildings and associated paved and gravel areas. Generally, the proposed master plan respects the minimal natural features which do remain on the site.

The site is largely flat, with the exception of the northwestern panhandle, where there are several small bluffs and rocky outcroppings. These areas will require regrading under the proposed plans *(Plan 15)*. The panhandle buildings are proposed with a retaining wall.

The site is adjacent to the Fore River and its tidal flats, and as a result, the site houses fresh and saltwater wetlands on its perimeter. As with the original subdivision and site plan applications for the Forefront at Thompson's Point, the master plan proposes minimal activity in these areas, namely a seasonal dock at the southern end of the peninsula in the location of coastal wetlands and several drainage outfalls which coincide with freshwater wetlands in the panhandle area. The applicant has noted that the location and size of the seasonal dock slated for the southern end of the peninsula may change as subsequent subdivision and site plans evolve. All of these plan elements were previously reviewed under the National Resources Protection Act (NRPA) by the Maine Department of Environmental Protection (MDEP) as a product of the prior plans. As noted above, the applicant has provided a letter to MDEP generally stating their intent to comply with the conditions of the previous permit *(Attachment L)*. The original Thompson's Point approval also involved a permit from the Army Corps of Engineers regarding wetland impacts. As previously stated, the applicant will be required to provide evidence of updated permits, or the continued applicability of the previous ones, during Level III subdivision and site plan review.

During the original approval, the Maine Department of Inland Fisheries & Wildlife (MDIFW) reviewed the plans under NRPA and found that the mudflats and riparian zones below the highest annual tide (HAT) line on the western and eastern shorelines qualify as significant migratory shorebird feeding and roosting areas, respectively. This finding resulted in changes to the original plan for the site, including the selection of alternative plantings for shoreline areas to enhance screening between the shore and proposed trail yet minimize the potential for increased predatory activity. The applicant has identified these areas in the revised submittal, and, again, has reiterated the intent to comply with the conditions of the previous permit.

h. An efficient use of land demonstrating full coordination of its own site development and surrounding context including, but not limited to, the land uses and functions contemplated, architecture, open space and pedestrian networks, vehicular access and circulation, and all other infrastructure;
As noted above, in the Forefront at Thompson's Point master plan, the applicant has redesigned the Thompson's Point site to adaptively reuse existing buildings, increase densities in the panhandle area, and introduce a more balanced mix of uses, including residential development. These changes allow for a more efficient use of the site in general, and further the concept of the site as a transit-oriented development. The plans show development clustered at the northern end of the peninsula, with open space as an organizing concept linking the more developed portions of the site with the dominant open space feature at the southern end of the site and the shore. Circulation networks and infrastructure plans have been reviewed and have not elicited major concerns from staff *(Plans 15-19)*.

i. Linked and coordinated with surrounding land uses, infrastructure and off-site public facilities, including but not limited to the public school system, where appropriate, in a manner that is safe, efficient, non-injurious to the public, and an improvement or benefit to the public where possible; and
j. Designed with sizing of street and other infrastructure systems to accommodate the overall service demand of the Master Plan;
As noted during prior review processes, the Thompson's Point site both suffers and benefits from its isolated geography as a peninsula "across the tracks" and on the banks of the Fore River. Because of its isolation, the site essentially serves as its own neighborhood. Efforts have been made to coordinate uses with those surrounding the peninsula – the access to the regional transportation system lends itself to use for regional destinations such as the event center, theater, or higher education facility; the proposed medical and hotel uses integrate well with the neighboring medical office and hotel node immediately adjacent; and the residential use, though certainly different in scale and form, echoes residential uses found to the north. The master plan integrates open space uses in a manner that retains access from the greater neighborhood and provides for connections to regional open space, particularly to the west.

Circulation & Parking System
The site generally has limited vehicular access, although its proximity to a major interstate connection is an asset. The master development plan benefits from prior transportation planning work completed during the original site plan and subdivision review. This work resulted in funding for transportation-related improvements on the Thompson's Point Connector Road, Fore River Parkway, Sewall Street, and Congress Street. These improvements are intended to provide the capacity to handle trips to and from the site via all modes, and, as noted above, are slated for completion in 2014-2015. Likewise, the master plan benefits from developed events management and transportation demand management (TDM) plans created and vetted during prior review processes.

Generally, the site benefits from good transit, pedestrian, and bicycle access. Thompson's Point is located adjacent to the city's Transportation Center, including its local bus, intercity bus, intercity rail, and taxi service. As noted previously, the site also benefits from a high degree of trail connectivity.

The applicant has provided a trip generation and parking analysis, including trip generation calculations, and a revised master circulation plan in the final submittal *(Attachment M and Plan 19)*. The proposal continues to rely on one vehicular access point via the Thompson's Point Connector Road from Fore River Parkway. This three-lane connector road crosses the existing Portland Terminal Company railroad line at grade and, once past the proposed garage entrance, continues as a private two-lane, two-way perimeter road that circumnavigates the peninsula. Access to almost all of the site's buildings is provided via this ring road, with a subsidiary loop providing a connection to the western panhandle. A vehicular way is also provided through the center of the site.

Pedestrian access is proposed via sidewalk from both Sewall Street and the Fore River Parkway via the Thompson's Point Connector Road. (Note that while Sewall Street is a dead-end street with no vehicular access to the Thompson's Point Connector Road or the site, pedestrian, bike, and emergency vehicle access is proposed via a path and emergency gate.) Under the master development plan, the site would also be accessible via pedestrian or bicycle from the existing Portland Trails network to the west. The master plan depicts a skybridge to the Portland Transportation Center, which would ultimately provide a second major pedestrian access point to the north. It should be noted that the original approvals for the project included sidewalk connection on only one side of the Thompson's Point Connector Road across the Portland Terminal Company right-of-way. A waiver was granted for this condition. During prior review processes, staff also identified the need for additional pedestrian signal improvements at the Thompson's Point Connector Road/Fore River Parkway. These plan elements will be considered under

subdivision and site plan review. Generally, Tom Errico, the city's consulting engineer, has stated that he finds the master plan acceptable from a transportation perspective. He writes,

> *In general I find the Master Plan layout to be acceptable with the following comments that can be addressed during the site plan review process (a detailed review of site plan elements has not been conducted and so this should not be considered an approval of the site plan):*
>
> - *I believe the pedestrian crossing from the main entry roadway into the event center area (building H) needs special considerations.*
> - *A sidewalk connection from the back side of parking garage to the main roadway should be included.*
> - *I am concerned about the number of driveways that intersect the main circulation road in the vicinity of the hotel and parking garage.*
> - *The on-street parking spaces on the circulatory roadway do not have access to a sidewalk and will not work well for passengers entering and exiting vehicles.*

As noted in staff's prior memo to the board, the applicant has found that trip generation under the master plan exceeds thresholds from the existing Traffic Movement Permit (TMP), issued for the original site plan/subdivision by the Maine Department of Transportation (MDOT) *(Attachment J)*. The applicant has asked for master plan approval under the existing TMP, with a follow-up traffic analysis to be conducted after the completion of Phase I of the master plan, as the site is expected to approach approved trip generation levels. This analysis would assess actual trip generation and compare it against the TMP-approved trip generation levels. Pending the results of this study and projections for the remainder of the site, additional mitigation would be required. The city has requested a letter from MDOT verifying that they find this approach acceptable. The applicant has provided documentation requesting this letter *(Attachment P)* and has stated that MDOT has verbally agreed to this approach. Of the trip generation estimates and TMP, Tom Errico, the city's consulting traffic engineer, writes,

> *I have reviewed the updated traffic generation estimate conducted by the applicant and I generally concur with their findings. As noted the project is anticipated to exceed the trip threshold established by the current Traffic Movement Permit (TMP) and therefore modification to the TMP will be required in the future. I am comfortable with this approach, but would like to see documentation from MaineDOT supporting this approach. It is my suggestion that during each Site Plan approval phase, the applicant shall submit trip generation information that documents current trip generation levels (through both field monitoring and standard ITE trip generation methods), trip generation estimates for the Phase under consideration, and how the project complies with the TMP. I would note that the TMP is flexible on land use implementation and is relevant as it relates to trip levels during the peak hours of consideration.*

Conditions of approval related to MDOT's acceptance of the TMP approach, as well as Mr. Errico's request for trip generation estimates during Level III subdivision and site plan review, have been suggested.

Vehicular parking is proposed throughout the site, with a total of 1,290 spaces (approximately 856 garage spaces and 434 surface) at full buildout. Most of the proposed surface parking is located at the exterior of the site in double-loaded parking areas. Interior spaces are proposed in the event center garage and under residential and office buildings on the western panhandle. All of the garage parking is proposed for later phases of the project. The applicant's parking analysis calculates peak parking demand under each phase

of development, as well as peak cumulative parking demand at full buildout. It should be noted that the peak cumulative parking demand exceeds the proposed parking supply. Of this, Mr. Errico writes,

> *The application materials indicate that a total parking supply of 1290 parking spaces will be provided during full build-out of the project. According to the parking analysis conducted by Gorrill-Palmer, a parking demand of 1699 parking spaces is estimated during the weekday typical time period and 1877 parking spaces are estimated during evening event conditions. Accordingly, an insufficient parking supply will be provided under full build conditions. During the Site Plan approval process the applicant will be required to display that adequate parking supply will be provided for the proposed uses.*

The revised submittal includes the previous TDM plan, dated September 2011 *(Attachment J).* The TDM plan describes a scheme centered around the creation of what is functionally a transportation management association for the entire peninsula, which would coordinate the various entities on the site in a set of shared transportation demand management strategies designed to maximize the use of adjacent transit infrastructure, increase transit opportunities, reduce peak hour vehicle trip impacts, reduce parking demand, and encourage healthier transportation options. Proposed TDM-related strategies include the promotion of carpooling and car-sharing, the addition of express bus service, and the provision of shuttle service during peak events. This TDM plan will be fully reviewed at the time of Level III subdivision and site plan review. Mr. Errico notes,

> *The applicant has provided the TDM Plan that was developed in 2011 and approved as part of the original approval. In concept I find the TDM Plan to be acceptable but want to emphasize the importance of the measures included in the Plan and how the traffic study and parking analyses assume some level of TDM success. The applicant will be required to update the TDM Plan at the next Site Plan review stage to reflect the proposed implementation schedule (including what specific strategies are being implemented, implementation dates, and specific monitoring activities).*

The applicant has also provided an updated events management plan in the revised submittal *(Attachment O).* This plan restricts events to weekdays after 7 pm or weekends. The plan also includes various strategies, in conceptual form, which are designed to facilitate the movement of large numbers of visitors to and from the site. These include the use of a reversible lane on the Thompson's Point Connector Road, police officers to direct traffic at the Thompson's Point Connector Road/Fore River Parkway, traffic control personnel throughout the site (including the parking garage), and directional signage. As with the TDM plan, it is anticipated that this event management plan will be more fully vetted under subdivision and site plan review.

> *The applicant has provided a general approach to managing event traffic volumes as part of the Master Plan. I would note that a detailed traffic management plan was developed in conjunction with the original application and that plan should continue to be used (if the applicant suggests deviating from the Plan, those details should be provided). I would note that the Traffic Management Plan is a live plan and will be reviewed and adjusted over time as conditions in the area are monitored.*

It should be noted that the applicant has submitted documentation requesting that special events occur on the site during the coming summer. It is assumed that the applicant may not have completed subdivision or site plan review under the master development plan by that time. Of this, Mr. Errico writes,

> *It is my understanding that some events may occur during the summer of 2014 and those events will be permitted through the City Special Event Permit process. I would note that the applicant*

> *would be required to provide details on traffic management and parking under a scenario where the full EDA off-site traffic improvements are not in place. DPS would review the details of the traffic and parking analysis at the time of the requested permit and approval of the details is not issued as part of the Master Plan.*

Master development plan approval should not be construed as approval for these special events.

During the initial review, the city raised concerns regarding pedestrian connections from the Connector Road to the panhandle trails. This concern was voiced previously by Portland Trails, which has noted the potential for through trail traffic coming from the Fore River Trail to the west and the Fore River Parkway pedestrian accommodations to the east. In the revised master plan, the applicant has added a pedestrian connection to the panhandle trail immediately north of Building E1.

John Peverada, the city's parking manager, has repeatedly stressed the need for taxi accommodations in the master development plan. The applicant has indicated in the revised master plan that a taxi queuing area may be provided on the inbound side of the loop road to the north of the event center garage. An additional taxi stand is shown in the circle directly in front of the event center.

Water

Regarding water infrastructure, an existing 12" water main terminates at a fire line supply meter pit at the end of the Sewall Street extension. Per their master utility plan and their utility analysis, the applicant intends to extend 8"+ water onto the site from this main, providing both domestic and fire protection service *(Attachment E and Plan 17)*. The applicant has requested an updated capacity letter from the Portland Water District (PWD). This has not yet been received, and has thus been included as a condition of approval. City staff has not identified areas of major concern with respect to water service provision.

Sewer

As with the original plans for the site, the applicant proposes to connect sanitary sewer services into the PWD pump station directly adjacent to the property. The PWD has previously provided a capacity letter indicating the ability to accept the project's sanitary sewer discharge. An updated letter has not yet been received by the city; as such, it has been included as a condition of approval. At the request of the Department of Public Services, the prior approval also included a condition relating to revised wastewater flow projections and the potential need for upgrades to the PWD pump station. It is assumed that this condition will be addressed during subdivision review. David Margolis-Pineo, of the city's Department of Public Services, adds,

> *The City expects, as originally proposed, that all sources of inflow into the sanitary sewers on Thompson Point be eliminated as build out of the Thompsons Point Master Plan progresses. Also that all abandoned laterals connected to the sanitary system be sealed at the sewer main.*

The applicant has stated in their final narrative that they concur with this approach *(Attachment A)*.

Gas & Electric

In their master utility plan and utility analysis, the applicant shows new gas service extending onto the site from Sewall Street/Thompson's Point Connector Road and underground electric from an existing pole on the southwestern side of the railroad tracks. Public Services has indicated no concerns with this arrangement as proposed.

Stormwater

The applicant has provided a master grading and drainage plan which shows preliminary contour lines *(Plan 15)*. In addition, in the revised submittal, they have included a stormwater schematic which illustrates, in more detail, potential storage and water quality treatments proposed for each of the various stormwater management zones of the site *(Plan 16)*. This diagram includes notes relating the intent to comply with city and MDEP water quality treatment standards, as requested by David Senus, consulting civil engineer, during the preliminary review. Mr. Senus has indicated his satisfaction with the revisions as submitted *(Attachment 5).*

Fire
The applicant has provided an updated fire safety compliance plan showing hydrant locations and fire vehicle turning radii on the proposed master plan layout *(Plan 18).* In addition, the applicant has submitted an assessment from a certified fire protection engineer *(Attachment O)*. Captain Chris Pirone, of the city's Fire Prevention Bureau, has reviewed the submittal and offers the following comments,

> *I am comfortable with the FPE's analysis regarding the issues he addressed in his report, which focused on water supply, hydrants and access roads.*
>
> *However, as requested in the most recent Thompson's Point meeting with their Team, I requested that the FPE report needed to analyze the evacuation procedures from the buildings once outside the buildings and where there staging areas would be.*
>
> *I encourage them to have the FPE contact me to discuss this process which then will need to be added to his report.*
>
> *Lastly, as a reminder, when Fire Chief LaMontagne gave the approval for the single access road the condition he placed on the development was that all buildings would need to have sprinkler and fire alarm systems even if codes did not require them. He also required and approved the event management plan that would always allow free and clear access into the point; basically an emergency access lane which would be maintained by event staff.*

A condition of approval relating to these comments has been suggested.

Schools
Lastly, the plan includes 144 residential units in high-density, high-rise settings. Both of the buildings intended for residential use appear on the western panhandle of the site. While these units may ultimately house families with school-age children, the applicant has stated that they expect "minimal impact on the city's public school system" *(Attachment C).* Any students from the development would likely attend Ocean Avenue Elementary and King Middle Schools.

k. Designed to create a street grid pattern that reflects average city block sizes of the neighborhood for street connectivity;
The master plan, which is proposed with private streets, is not organized around a traditional grid pattern *(Figure 2)*. In this way, it differs from those neighborhoods immediately to the north, which house long rectilinear blocks with limited connectivity. Instead, the project adheres to a campus-like concept, with a central 'quad' created by the hotel, existing Brick South building (slated for use as the Circus Conservatory of America), the Brick North building (slated for mixed use), and the garage and event center. Internal circulation patterns allow vehicles and pedestrians to cut through this quad or to circumnavigate the peninsula. A short loop is also provided to the panhandle area. As described above, vehicular access to the site as a whole, however, remains solely via the single access point at the

Figures 6 & 7: Aerial view of the Forefront at Thompson's Point from the north (above) and southeast, looking over the central open space feature (below)

Thompson's Point Connector Road. Pedestrian and bicycle connectivity is slightly higher, with access via the skybridge and trail, as well as the Thompson's Point Connector Road.

l. Designed as to create a cohesive identity through building scale, massing, and articulation; use of quality exterior materials, architectural detailing at pedestrian scale; consistency of design and materials for streetscape and pedestrian amenities; framing of outdoor open space and linkages; a clear conveyance of the function and significance of various buildings, entrances, and features; and to generally comply with design and development standards of the zone in which it is located;
The drawings for the Forefront at Thompson's Point master plan depict an overall scheme for the site which incorporates existing and new buildings, single-story industrial architecture with high-rise residential/hotel and event center/garage design, and significant open space *(Figures 4-7 and Attachment D)*. The applicant uses several tools to make the site cohere, namely consistent streetscape and landscaping, integrated plaza spaces, integrated design taking cues from the existing brick buildings slated for adaptive reuse, and a logical pattern of form and massing which announces entry and a clear progression onto the site.

The city's site plan standards state that projects "in the…B-5 zone…shall be designed to support the development of dense, mixed use neighborhoods with attractive, safe, and convenient street level pedestrian environments as demonstrated by compliance with all applicable design standards listed in the Design Manual." The B-5 design standards provide guidance related to building and parking lot siting. Generally, these standards are oriented toward more urban environments; many of the design standards reference proximity and orientation toward the street. Given the campus-like concept employed here, where an urban street grid is not used as an organizing concept, many of the standards don't apply. It should be noted that the applicant has generally oriented buildings towards the central spine of the site, with parking toward the perimeter, and has organized the site in an effort to create a dense and mixed-use neighborhood, in keeping with the spirit of the design standards.

m. Inclusive of provisions for the ownership and maintenance of usable open space as appropriate; and
Per the preliminary submittal, the open space slated for the Forefront at Thompson's Point is proposed on both independent and common lots. In the revised submittal, the applicant has stated that open space will be "owned and managed by the applicant's professional property management company. The trail area (easement to the city) will be maintained by Portland Trails; however the ownership and control of access is [to be] managed by the applicant. The boat launch and water access [will be] privately owned but he public [will be] encouraged to use the facilities within the rules established by the owner" *(Attachment X).* It is assumed that further details regarding ownership and maintenance of open space will be addressed under subdivision review.

n. For areas proposed as future development phase(s), the proposed interim conditions shall be managed and maintained to ensure stable, safe and attractive site conditions.
In the final submittal, the applicant has continued to provide a phasing plan consisting of two phases with 11 sub-phases. However, the applicant has also provided a master plan graphic which shows four simplified "sections" which may be used for future subdivision recording purposes *(Plan 22).* It is assumed that, under each of the eventual proposed sections, multiple site plan reviews would occur for distinct buildings which might come online at any time. Given the timing of this submittal, the city has not had an opportunity to fully review this sectional recording/phasing plan. As such, its review has been included as a condition of approval. It should be noted that, while this plan is labeled as a "subdivision plan," approval of the master development plan here should not be construed as approval of the subdivision.

XII. SITE LOCATION OF DEVELOPMENT ACT

As previously noted, under the prior subdivision and site plan review a site law permit was approved for the Forefront at Thompson's Point under the city's delegated review authority. The MDEP has granted the city the authority to continue delegated review of the Forefront at Thompson's Point under state site law. Chapter 14 of the city's *Technical Manual* enumerates standards for local site location of development review. All of these, including the standards regarding financial and technical capacity, traffic movement, and the protection of natural resources, echo master plan, subdivision, and site plan standards outlined in the city's land use ordinance. The applicant has stated their intent to comply with their existing SLDA permit. As noted previously, a formal review will occur at the time of subdivision application.

XIII. MASTER DEVELOPMENT PLAN AMENDMENTS

At the workshop on the Forefront master plan, Planning Board members raised questions regarding potential future amendments to the plan and the formal review process. The land use code includes language related to Planning Board decisions on the master plan, including the following,

> *(Section 14-524(a)3.f.(iv)) Decisions. The Planning Board shall approve, approve with conditions, or deny a MasterDevelopment Plan application based upon the applicable review standards…An approval, including an approval of waivers, establishes the general parameters to be adhered to for the development, including the supporting documentation for floor area ratio and/or residential density, general types of uses, building coverage, generalized open space plans and infrastructure systems.*

Under *Section 14-532(b) Revisions and amendments to Master Plans and approved site plans,* the land use ordinance further defines a "minor" master plan amendment, which, per the ordinance, may be approved administratively. According to the ordinance, a change qualifies as a minor amendment when it is "generally consistent" with the approved master plan layout, circulation, infrastructure, and open spaces, and:

> *(i) Does not propose any new general type of use beyond those approved initially;*
> *(ii) Does not increase the building ground coverage, floor area ratio or residential density of the Master Development Plan;*
> *(iii) Does not decrease any specified area regulations or enumerated parking ratios; and*
> *(iv) Does not substantially change access, circulation, or infrastructure on or adjacent to the site.*

It is implied that changes which do not meet these conditions would require Planning Board review.

XIV. STAFF RECOMMENDATION

Subject to the proposed motions and conditions of approval listed below, Planning Division staff recommends that the Planning Board approve the master development plan for the Forefront at Thompson's Point.

XV. PROPOSED MOTIONS – MASTER DEVELOPMENT PLAN

On the basis of the application, plans, reports and other information submitted by the applicant; findings and recommendations contained in the Planning Board Report for the public hearing on February 11, 2014 for application 2013-262 relevant to the master development plan regulations; and the testimony presented at the Planning Board hearing, the Planning Board finds that the plan **is/is not** in conformance with the master development plan standards of the land use code, subject to the following conditions of approval, which must be met prior to subdivision approval unless otherwise stated:

1. The applicant shall provide a summary of existing and/or proposed easements, covenants, public or private rights-of-way, or other burdens on the site, including the proposed easement to the Department of Public Services to use the private drive system for turn-around access and conditions relating to public use of trails and open space on the site, for review and approval by the Department of Public Services and the Planning Authority;

2. The applicant shall provide correspondence from the Maine Department of Transportation indicating their acceptance of the proposed approach to monitoring and traffic analysis related to the existing Traffic Movement Permit, for review and approval by the city's Department of Public Services;

3. For each Level III site plan/subdivision review, the applicant shall submit trip generation information that documents current trip generation levels and trip generation estimates complying with the TMP, for review and approval by the city's Department of Public Services;

4. The applicant shall provide evidence of water capacity from the Portland Water District, for review and approval by the Planning Authority;

5. The applicant shall provide evidence of sewer capacity from the Department of Public Services, for review and approval by the Planning Authority;

6. The applicant shall submit a revised report from a certified fire protection engineer describing evacuation procedures, add a note to the master development plan indicating that all buildings will include sprinkler and fire alarm systems, and revise the event management plan to indicate that free and clear fire access will be maintained at all times during events, for review and approval by the city's Fire Prevention Bureau; and

7. The applicant shall revise the master phasing plan for review and approval by the Planning Authority.

Dear Mr. Thompson:

Thank you for your letter dated January 30, 2020 requesting a two- year extension of the approval for your Master Development Plan for the Forefront located at Thompson's Point. I understand that you will continue to pursue fulfillment of the Master Development Plan through future Site Plan applications.

In my capacity as Director of the Planning & Urban Development Department and under the provisions of Section 14-532 (d), Expiration of Master Development Plan, I am granting your request to extend the approval for application ID 2013-262 to March 11, 2022.

If there are any questions, please contact Shukria Wiar at 756-8083 or at shukriaw@portlandmaine.gov.

Sincerely,

Mr. Kennedy:

Thank you for your letter dated January 19, 2022 requesting an extension of the approval of the Master Development Plan for the Forefront at Thompson's Point project.

In my capacity as Director and under the provisions of Land Use Code Sec. 14.13, Extension of Approvals, I am granting your request to extend your approval to March 11, 2024.

If there are any questions, please contact James Rather, Development Review Manager at (207) 874-8699.

Sincerely,

Christine Grimando, AICP

RE: Master Development Plan Pending Proceeding

A question was raised in the course of the review of recent site plan applications for Portland Foreside/58 Fore Street, regarding whether a Master Development Plan (MDP) approved under a previous iteration of the Land Use Code (Code) was subject to the expiration provisions of the current Code, or whether the section in the Code in place at the time of MDP approval (for 58 Fore Street, December 2016, but the question extends to all MDPs) would apply. The Planning & Urban Development Department has determined the current Code's expiration section applies to this and other previously approved MDPs. Discussion of prior and current expiration sections, how pending proceeding is determined, and how the applicable Code standard is determined follows below.

MDP Expiration Under 2016 & 2023 Versions Of The Land Use Code
The current Code states:

> *Master development plans approved under this article shall expire six years from the date of approval if no site work or building construction has commenced.* (sec. 14.12.2) and *Master development plan approvals may be extended by the Planning Authority up to two times, for up to two years from the date of expiration of the original master development plan approval.* (sec. 14.13.4).

The Code in effect in December 2016 states:

> *Master Development Plan approval may be sought separately or currently with the Phase I Final Level III site plan approval, and shall have an initial approval period of six (6) years, with potential extension periods as provided for in section 14-532(d). (14-524(f)(i))*
>
> *Prior to the expiration of the Master Development Plan, an applicant may submit a written request to the Planning Authority for an extension of a Master Development Plan approval and associated waivers. Only two (2) such extensions may be granted by the Planning Authority, and*

each such extension shall be limited to two (2) years from the date of expiration of the Master Development Plan. (14-532(d))

The expiration language currently in effect means that once site work has commenced, the MDP won't expire, whereas the 2016 MDP expiration language included a finite 10 year end, assuming two two-year extensions were granted. Under the current and 2016 versions of the Code, Individual Site Plan approvals, including those that are part of an MDP, expire in one year, with possible extensions up to a maximum of three years. Lapses in construction for a period in excess of 12 months will also result in a site plan expiration. (2016 14-532(c)(1), 2023 14.12.1; 14.13.3)

Pending Proceeding

Pending proceeding is a term that, in context of development applications, indicates that substantive review has begun, which, in turn, determines which set of regulations an application is reviewed under. For the purposes of applications that are within the jurisdiction of a land use (Historic or Planning) Board, pending proceeding status is conferred when the Board holds its first review, whether that is a workshop or public hearing. For the purposes of administrative/staff reviewed applications, this occurs when the first substantive comments are provided. For applications in-review when the City adopts, through Council action or referendum, amendments to the City Code, it is important to understand whether an application is pending in order to determine what standards they are held to. A submitted application, accepted for the purposes of beginning review, does not have pending proceeding status, but a development application that has been before the Board for an initial workshop does, and may continue in the review and approval process under the Code in effect at the time of the first workshop.

Determining when an application has pending proceeding status is not outlined in the Land Use Code, but there are two references to the term in the Land Use Code: 1) Section 14.5.1 states that voluntary, non-binding pre-application meetings do not confer pending proceeding status; and 2) Section 14.3.2 (formerly 2016 Section 14.524(f)(iv)) states MDP a*pproval shall confer pending proceeding status upon the development with the effect of maintaining the applicability of regulations in effect at the time of approval for as long as the master development plan approval remains valid, including permissible extensions if granted*.

Sec. 14.3.2 is the reason a subsequent site plan application (or subdivision application where applicable) that is a component of an MDP is still reviewed under the regulations in effect at the time of the MDP approval, even if standards of the Code are amended over time. Pending proceeding status is one of the benefits of an MDP approval, and it offers a degree of regulatory predictability for both property developers and the City for these large multi-year phased projects. Without pending proceeding status, it would be difficult to predict all of the potential regulatory changes that could impact a project that is expected to be built out over years. For instance, if maximum heights were reduced, or minimum parking standards increased (to name a few examples of standards that could change over time in the City's Code), site plans that are phases of previously approved MDPs are not held to more stringent or restrictive standards that were adopted during a valid MDP approval period.

Though an MDP and its associated applications have pending proceeding status for the life of the MDP's approval, nothing *prohibits* an applicant of an MDP approved under a previous version of the Code from seeking review under the current version of the Code. Becoming more conforming with the adopted Land Use Code is generally something the standards encourage; a previous approval may proceed under the Code it was reviewed under, but it is not compelled to remain non-compliant with current standards.

In the event an applicant proposes to develop a site to meet current regulations that differ from the regulations in effect at the time of MDP approval, they may do so. However, substantive changes to an approved MDP would require an amendment, and substantive amendments related to areas of the Code that have been changed since the application was originally approved would be reviewed under the current Code. An applicant with an approved site plan who wishes to make use of a new provision in the Land Use Code is also free to apply for an amendment, and this also could subject them to new sections of the current Code if the amendment broaches sections that have since been amended. For example, a proposed change to the total housing units would be reviewed for consistency not only with residential density standards, but with other applicable Code requirements such as inclusionary zoning; or, as previously mentioned, if maximum heights were lowered since an approval was granted, and an amendment to a prior approval was submitted to alter heights of buildings, the new standards would apply.

Project Review Letter | 11-6-2024 | PL-003090-2024 | 125 Thompson's Point Road
Submission #1: 9-30-2024
Planner: Natasha Kypfer – nkypfer@portlandmaine.gov – (207) 874-8725

Dear Bo Kennedy and Rob Simmons,

We have completed our preliminary review of your submission of the application (PL-003090-2024), a major site plan project, proposing a new six-story building with 255 residential units and an attached parking structure at 125 Thompson's Point Road, in the B-5 Urban Commercial zone. This development triggers major site plan review by the Planning Board, and is subject to the following regulations:

- Site Plan, Major – Article 14.6

An overview of the City's review can be viewed in the attached project review worksheets and peer review comments.

Next Steps
Please review our feedback and reach out if you have any questions or would like to discuss this feedback in more detail. Please prepare a written response to all feedback, and provide updated plans, documents, and other materials as necessary to address the comments. The applicant shall notify me, as the project review manager, when a resubmission is uploaded to ProjectDox.

The initial Planning Board workshop for this item is tentatively scheduled for January 14, 2025.

Sincerely,
Natasha M. Kypfer

Natasha Kypfer
Senior Planner

Attachments

1. Site Plan Worksheet
2. Zoning Worksheet
3. Design Review Memo, 10-28-2024

General Comments:

- Please add the AE flood zone on the current FEMA map as an overlay on the site plan.
- Please update the title of the supporting narrative to Major Site Plan, instead of Minor (Att. B).
- A number of permits have been received throughout the development of the Master Development Plan from State and Federal agencies and it is unclear what is relevant to this phase and which permits may still be active. Submit a summary of what permits are relevant specifically to this project, including the agency, permit, the date of original issue, dates of expirations, and dates of extensions or notifications as applicable. For example, it is noted that an Army Corps of Engineers self-verification form was included that was submitted for work to be completed for 2023 into 2024, which will likely need to be resubmitted unless the Army Corps has noted that it will remain valid.

Site Plan Review Standards (Sec. 14.6)		
Transportation Standards (Sec. 14.6.1)		
Standard	***Discussion***	***Finding***
Impact on Surrounding Street Systems	Overview: As part of the existing Master Development Plan (MDP), the overall project was reviewed under a Traffic Movement Permit (TMP) application, which addresses impacts on the surrounding street network and for the anticipated increases in traffic congestion. The TMP (Identification #: Reg. 01-00155-A-N) was issued on June 13, 2012 with a traffic study completed as part of the approved MaineDOT TMP, citing for 734 trip ends during the AM peak hour and 1,091 trip ends during the PM peak hour. Further, the TMP received an extension in 2024, through to March 1, 2027. According to the September 4, 2024 traffic memorandum prepared by Gorrill Palmer Associates, the proposed project is not forecasted to exceed the number of trips permitted under the existing TMP. Staff has reviewed the trip generation estimate and would like to review the trip generation calculations for all of the uses, regardless if previously approved from a documentation perspective and ensuring that calculations accurately reflect the scale of proposed uses.	Not Met
	Updates & Additional Information Requested • Staff would like to review the trip generation calculations for all of the uses, regardless if previously approved from a documentation perspective. However, one initial comment on the trip generation estimate is as follows: o The Brewery & Sit-Down Restaurant (14,644 SF) noted in the table should match the area used in the trip generation calculation (4,624 SF).	
Access and Circulation	Overview: The project site is accessed via Thompson's Point Road at the intersection of Fore River Parkway, and includes a public railroad crossing proximate to the two-way driveway, which terminates at a turnaround hammer head. The Thompson's Point Trail (formerly named the Fore River Trail) runs southerly to the development area, with the site's proposed pedestrian circulation well-integrated to the public trail system. Further, a proposed six-foot-wide sidewalk along the front façade of the building connects to the existing sidewalk network throughout the Thompson's Point campus. City Staff are requesting updates to the submitted materials to delineate sidewalk/pavement removal & replacement, current City details reflecting updates from 2022, and dimensions for all parking areas and roadways. Measurements are requested for the intersection of Thompson's Point Road & the site's access road to confirm compliance with MaineDOT sight distance requirements.	Not Met
	Updates & Additional Information Requested • Show limits of removal and replacement of sidewalk/pavement for Utility trenching on site plan.	

	• Update application documents to include current Technical Manual details or reference to each of the City standard details (figure # and name). CAD files can be obtained upon request. • Update the plan set to replace the detectable warning ramps in ROW at drive entrance to align with Standard Detail I-7 of the Technical Manual. • Update the plan set to include dimensions for all interior and exterior parking areas and roadways. • Submit sight distance measurements for the access road intersection with Thompson's Point Road.	
Public Transit Access	Overview: This project is within a quarter mile of fixed transit, as the Greater Portland Metro's BREEZ line services bus stops at both the Portland Transportation Center (PTC) and Thompson's Point, operating Monday - Saturday. The application materials indicate the closest of which transit stop is approximately 665 feet / 0.13 miles walking-distance from the front door of the site. Per the Technical Manual Section 1.17.2, transit shelters shall be located within the site, directly adjacent to the right-of-way on which the public transportation route is established or located within a public sidewalk area long the property frontage.	Met
Parking	Overview: This project proposes to provide 457 parking spaces within a parking garage structure attached to the proposed residential "Building G" residential structure. In addition, 35 off-street parking spaces are proposed along the front façade of the building and the drop-off court by the main entrance. Per the application materials, 26 ADA parking stalls are proposed on-site and 102 bicycle parking spaces are provided in the form of bicycle racks located in front and inside the proposed building. Further, while the Technical Manual Section 1.14 outlines new structured and surface parking lots of five or more spaces to provide Level 2 EV charging or higher to 20% of total parking, this project proposes roughly 10% (46 spaces) through a combination of Level 2 chargers, Level 1 chargers, and EV-ready spaces. City staff are requesting the submission of a parking supply analysis and a parking management plan to understand interactions with other uses on Thompson's Point (e.g., outdoor concerts/events) and backup information for the submitted parking demand analysis. Updated materials should also include consistent information on the number of parking space proposed for the site.	Not Met
	Updates & Additional Information Requested: • Update project documents to list a consistent number of proposed parking spaces for the parking garage structure. • The applicant has conducted a parking analysis for the proposed residential use. City Staff find the estimate of 334 parking spaces per ITE methods to be reasonable, but would also request that the applicant provide a parking management plan if the proposed parking spaces are to be shared with other uses on Thompson's Point. • The applicant also conducted a parking demand analysis for the entire Thompson's Point site, without an outdoor concert/event. The estimate is based upon a mix of methodologies: methods from ITE, client supplied information, and customized calculations. Similar to the trip generation comment above, all back up information shall be provided for documentation purposes. Staff would further note that a parking supply analysis should also be provided with this submission.	
Transportation Demand Management	Overview: A TDM Plan is required for this project, as it exceeds the thresholds as detailed in the LUC Section 14.6.1.E.1. The project has an approved Thompson's Point campus-wide Transportation Demand Management Plan (TDM) for managing and reducing traffic trips and parking demand in place as part of the Master Development Plan (MDP). The provided Attachment P summarizes TDM	Not Met

	initiatives and references previously prepared TDM strategy reports which was approved in 2011, and subsequently updated in 2015 and 2018.	
	Updates & Additional Information Requested • In satisfying this standard, the applicant shall update their Transportation Demand Management Plan and incorporate data, as well as updated data, on concerts and other significant events that occur on the Thompson's Point campus, so that the City can better understand current parking demand and assess whether the mitigation strategies in place are sufficient.	
Environmental Quality Standards (Sec. 14.6.2)		
Standard	***Discussion***	***Finding***
Preservation of Significant Natural Features	Overview: The parcel's current use is as a gravel surface parking lot resulting in the anticipated site disturbance unlikely to disrupt any significant natural features. While the landscaping plan identifies trees to be preserved, it does not include a tree survey as noted below. Further, the applicant attests no known populations of trees or plants present on the site have been classified as Endangered and Threatened in Maine, nor known habitats/communities, present that appear on the state or federal endangered or threatened animal list.	Met
Landscape Preservation	Overview: The submitted landscaping plan notes existing trees identified to preserve and protect (e.g. a handful of significant oaks along the southern property line that had previously been requested for preservation by the former City Arborist), but a tree survey was not included as part of the application submission. Per section 4.3.1. of the Technical Manual, projects are required to submit a tree survey from a licensed land surveyor arborist, forester, or landscape architect clearly identifying the forest type and location, size, and species of all existing trees 10" DBH or greater on the site and in the City right of way. Updates & Additional Information Requested • Submit a tree survey for the site that meets the standards of Section 4.3.1. of the Technical Manual.	Not Met
Site Landscaping and Buffers	Overview: The landscape plan proposes to screen the development from the existing trail, pool and outdoor amenities programing area, and around the entire perimeter of the building itself. The site location is buffered by both the rail line and Fore River, which will sufficiently buffer the proposed site use from the public right-of-way and neighboring campus properties. Further, the site has ±139 feet of street frontage and is required to plant one tree per 25-35 feet on center (4), within the public right-of-way. In their materials, the applicant cites that limited street trees have been proposed in location and quantities where possible, noting underground utility conflicts and that the rest of the site is heavily planted. Section 4.6.4 of the Technical Manual allows for the use of street tree alternatives (e.g., existing trees in the right of way or within 20 feet of the right of way, plantings on public land in the surrounding neighborhood, contribution to the City of Portland Tree Fund). City Staff are requesting if and how street tree alternatives will be used for the site. Updates & Additional Information Requested • Identify what street tree alternatives are proposed to meet the standards of Section 4.6.4. of the Technical Manual.	Not Met
Water Quality, Stormwater Management and Erosion Control	Overview: The September 2024 stormwater report summarizes changes to the water quality treatment zones and providing detailed computations of development tributary to the respective stormwater management systems sized to convey and treat stormwater runoff from the proposed redevelopment. The bulk of the new building, parking structure, central courtyard, and northerly courtyards will drain to a series of roof drains, catch basin inlets, and storm drain piping to convey runoff to a treatment system. City staff are requesting updates to the provided plans and materials, as individually detailed below.	Not Met

	Updates & Additional Information Requested • The project is required to comply with MaineDEP Chapter 500 and City of Portland Technical Manual Section 5 standards for stormwater management, including to be reviewed for a Site Location of Development (SLOD) Permit. As was noted as part of the MDP, this can be reviewed by the City of Portland, but requires evaluation of the site as a whole. This would modify how the amount of required treatment is evaluated, and it is expected based on what information has been provided that the project will meet the requirements for SLOD. o Basic Standards – The Applicant has provided plans and details as required for erosion and sedimentation controls. ▪ Double rows of sediment barrier should be provided adjacent to any resources, including coastal wetlands. ▪ Temporary sediment barrier will also be required downstream of any outfall installations during construction in addition to any of the permanent erosion control measures that have been shown. o General/Redevelopment Standards – The Applicant has provided a detailed description of stormwater treatment for this project, and has related it to the overall site. Based on the information provided, it appears that the project will meet the required thresholds for the State for Stormwater and Site requirements, and the City's thresholds for redevelopment as well. As noted above, the project should provide documentation for the Site Location of Development Permit. Comments on the proposed stormwater systems are provided separately below as well. o Flooding Standards – The Applicant has noted that the Flooding Standard has previously been waived due to the site's discharge to a tidal water body. This remains valid for this phase of the project. • We did not see structure information, including rims and inverts, for stormwater or utility structures included on any of the plans provided. This should be provided as part of the site plan submission. • The site grading should be checked with the proposed stormwater systems. With variations in fill over the tops of the stormwater storage systems, and the need for emergency vehicular access over one of the systems, the layout and inverts of the systems and connecting structures should be reviewed to ensure there are no concerns with cover (either too much or too little). This will require providing invert information for the associated manholes as well. • The Applicant should review the proposed HydroCAD model, specifically, the way that the diversion structures are modeled may not accurately represent what is happening on the site. The models include a 1.4" vertical orifice/grate as part of the model, but this is not shown on the diversion manhole details. In addition, the way the model is routed, with all flow primary, it does not appear to show how flow is diverted into the Jellyfish filters. In addition, the model should be checked to make sure that it matches with other features on the plans, including pipe materials, inverts, and the number of chambers within the storage systems. • The Applicant has noted that the intent of the Inspection and Maintenance Manual has remained the same since approval in June 2012. The Applicant should confirm that the systems proposed as part of this phase of work are specifically included in their O&M plan, and these systems should be added to the Stormwater Maintenance Agreement.	

	• Any floor drains located within the lower levels of the parking garage should be directed through an oil-water separator and be discharged into the sanitary sewer system. It is unclear if any such internal drains are being proposed. The stormwater management plans clearly show that stormwater runoff from the uncovered top parking level will be directed into the storm drain system, which makes sense.	
Public Infrastructure and Community Safety Standards (Sec. 14.6.3)		
Standard	***Discussion***	***Finding***
Consistency with City Master Plans	Overview: The proposed development of the subject property is a permitted use within the B-5 zone, and complies with applicable zoning as established under the City's comprehensive plan, *Portland's Plan 2030*. Staff suggests the applicant include reference to other applicable studies in their narrative materials, such as: One Climate Future and the Peninsula Transportation Plan.	Met
Public Safety and Fire Prevention	Overview: The project site is accessible from Thompson's Point Road, however, for the purposes of emergency vehicle access one access point for ingress/egress is not sufficient for a development of this scale. Further, the included Utility Plan shows the location of all existing and proposed fire hydrants, with a service radius of 100' and 250', meeting the Technical Manual Section 3.2.1 standard of within 500'. Fire & Life Safety reviewers are requiring that the viability of a secondary means of ingress/egress be explored. City Staff are requesting that, at a minimum, options stemming off of Hobart Street and Powsland Street, be explored. Updates & Additional Information Requested • Submit a feasibility analysis of establishing a fire lane from Hobart Street and Powsland Street that meets the standards of Section 3 of the Technical Manual. Based on the materials submitted, additional information and/or implementation of a fire lane may be requested by City Staff.	Not Met
Public Utilities	Overview: Per the applicant's submittal, the existing 12" water main (publicly owned), 15" sewer main (publicly owned), and electrical/communications (private) duct bank serving the project is shown on the accompanying utility plan. The proposed development will construct new utility stubs for the development lot. The Department of Public Works is currently in the process of reviewing the sewer capacity and infrastructure impacts in the area with the Portland Water District. Once this review is complete, City Staff will follow up with any additional comments/requested additional information under a separate cover. City Staff are recommending that an assessment be completed on whether backflow preventers should be installed on the proposed private sanitary sewer lines prior to connection to the City system, as well as exploring the feasibility of relocating the two transformers to a less obtrusive location (e.g., plan left of the parking structure) in the landscaped area. Ability to serve letters will be recommended as a condition of approval. Updates & Additional Information Requested • Submit a written response documenting if consideration has been made in installing backflow preventers on the private sanitary lines. • Submit a written response documenting the feasibility of relocating the two transformers to a less obtrusive location, including, but not limited to plan left of the parking structure in the landscaped area. • When available, submit copies of ability to serve letters from utility providers.	Not Met
Site Design Standards (Sec. 14.6.4)		

Standard	Discussion	Finding
Massing, Ventilation and Wind Impact	Overview: The proposed multi-family residential building is located at the panhandle portion of the property site of the Thompson's Point development, with direct access to the Thompson's Point roadway. Originally envisioned with the MDP as a clustered arrangement of three new buildings, the proposal is for a single multi-family residential building with attached parking structure, six-stories or 68 feet in height. Further, the HVAC equipment is proposed to be located on the roof, with the applicant's noting the equipment will exhaust away from the adjacent residential properties.	Met
Shadow	Overview: Shadow standards are not applicable in the B-5 zone; thus, this development is exempt.	Met
Snow and Ice Loading	Overview: Snow storage is proposed to be located temporarily along the edges of the drive aisles and landscaped areas until such a time when the stockpiles need to be removed from the property. Snow removal on the parking roof deck which is a flat roof and is designed to store snowfall, will be plowed to a drop chute where it can be managed on the ground.	Met
View Corridors	Overview: This site is not located along a public view corridor identified in the Downtown Vision View Corridor Protection Plan.	Met
Historic Resources	Overview: The subject property is not within a Historic District; therefore, this standard does not apply.	Met
Exterior Lighting	Overview: All development must adhere to the site lighting standards provided for in the Technical Manual, Section 12, for: site lighting, architectural and specialty lighting, and street lighting. This project proposes site lighting, with 27 outdoor wall-mounted fixtures proposed in total along the four structure planes; the photometric plan is provided with the submission, as well as cut sheets and lighting specification materials.	Met
Noise and Vibration	Overview: In the City, all HVAC, AHU, emergency generators, and similar equipment are required to meet applicable state and federal emissions requirements and are further required to be located and/or screened in such a manner as to mitigate noise and vibration impacts. Per the application materials, HVAC equipment has not been specified and selected yet, but systems are proposed to be centralized on the roof. Updates & Additional Information Requested • When available, provide an updated roof plan that includes selected HVAC equipment with screening details.	Not Met
Signage and Wayfinding	Overview: Any signage associated with the redevelopment of this project will be required to be reviewed by the Permitting and Inspections Department separately, with a sign permit to meet the standards of Article of the Land Use Code.	Met
Design Standards	Overview: Per the LUC Section 14.6.4.I.a, developments in the B-5 zone shall be designed to support the development of dense, mixed-use neighborhoods with attractive, safe, and convenient street-level pedestrian environments. Updates & Additional Information Requested • Provide revisions based on the attached Design Review Memo, dated October 28, 2024. Please note that supplemental design comments may follow.	Not Met

Subject:	125 Thompson's Point Road
Zone:	B5
Date of Review:	Monday, October 28, 2024 Land Use Code Chapter 14.6.4.I Design standards
Reviewer(s):	Natasha Kypfer (Senior Planner); Zachary Powell (Senior Planner); Sean King (Urban Designer); Kevin Kraft (Director)
Project ID:	PL-003090-2024

I. INTRODUCTION

The project at 125 Thompson's Point for 255 residential units was reviewed according to the *City of Portland Design Manual* section ***(c) B-5 and B-5b Urban Commercial Business Zone*** and section ***(i)*** *two-family, special needs independent living units,* ***multiple-family****, lodging houses, bed and breakfasts and emergency shelters* design standards. In addition, design guidelines identified in the Thompson's Point Master Development Plan were reviewed.

II. DESIGN REVIEW COMMENTS: **bold** text denotes recent updates met, red text denotes standards not met which require resubmission.

(I.) Thompson's Point Master Development Plan standards - *Designed as to create a cohesive identity through building scale, massing, and articulation; use of quality exterior materials, architectural detailing at pedestrian scale; consistency of design and materials for streetscape and pedestrian amenities; framing of outdoor open space and linkages; a clear conveyance of the function and significance of various buildings, entrances, and features; and to generally comply with design and development standards of the zone in which it is located;*

The Master Development Plan approved a layout with a clustered arrangement of new buildings (G, J1 and J2) that expand along the shoreland as a natural boundary and the railroad corridor as an infrastructure boundary.

The proposed multi-family residential building is located at the north property of the Thompson's Point development with direct access to the Thompson's Point roadway. The proposed structure height is six-stories (averaging 68-feet), which is a departure from the existing low-medium building heights located throughout the development. However, the approved Master Development Plan illustrated taller structures at this site to demonstrate the maximum allowable building heights at 125-feet. Staff suggests that the applicant consider an increase to the proposed building height, as shown in figure 1, to add vertical scale towards the center of the proposed building footprint.

Figure 1: Staff diagram in blue from applicant's rendering (view from waterfront)

(c.) B-5 and B-5b Urban Commercial Business Zones

Standard (1) a. Shared Infrastructure: Shared circulation, parking, and transportation infrastructure shall be provided to the extent practicable, with utilization of joint curb cuts, walkways, service alleys, bus pull-out areas, and related infrastructure shared with abutting lots and roadways. Easements for access for abutting properties and shared internal access points at property lines shall be provided where possible to facilitate present or future sharing of access and infrastructure.

Staff comments – The proposed development will utilize the existing Thompson Point private roadway, sidewalk and bicycle facilities as the primary point of entry and exit. Within the site development location, a new two-way drive is proposed to allow access to the drop-off court, building entries, primary structured parking entry and emergency access. Staff recommends a reduction in angled parking spaces to provide prioritization of the pedestrian facilities into the primary building entrance. To encourage the drop-off court as a pedestrian plaza that only allow infrequent vehicular drop-off that is more conducive with a transit-oriented and walkable development.

Standard (1) b. Buildings and uses shall be located close to the street where practicable. Corner lots shall fill into the corner and shall provide an architectural presence and focus to mark the corner.

Staff comments – Thompson's Point development is an anomalous, isolated site located on the water without an established urban context or street connectivity to the city. Therefore, some of the standards of the B-5 are harder to apply in this case due to the irregular configuration of lots that vary in size, orientation, and relationship to the private vehicular road. The proposed residential building is setback from the Thompson Point roadway that Staff finds deviates from this design standard to locate buildings close to the street where practicable. Staff recommends that the applicant provide additional ground-floor activation and pedestrian oriented uses (eg. articulated building entries or active use) to achieve an architectural presence and focus at the street.

Standard (1) c. Buildings shall be oriented toward the street and shall include prominent facades with windows and entrances oriented toward the street. Uses that include public access to a building or commercial/office uses in mixed-use developments shall be oriented toward major streets whenever possible.

Staff comments – The proposed building spans the site with several building wings to create a courtyard building arrangement. Staff finds the facades are balanced with windows and articulated entries throughout the facades, however do not establish a prominent façade oriented toward the street. Staff acknowledges that due to the unique site factors and historical arrangement of existing buildings, strict compliance to require a building location closest to the street may not be appropriate. The proposed exterior façade materials include a variety of fibercement cladding and tones with an organized fenestration pattern that is a departure from the existing buildings found at Thompson Point, which include a mix of adaptive reuse brick industrial-era structures and contemporary buildings.

Staff suggests the applicant create a more pedestrian scaled façade and building orientation towards the Thompson Point roadway. Staff recommends a more cohesive arrangement of exterior façade materials that respond to the existing character of buildings, particularly at the street-facing facades of Brick North & South buildings. Staff suggest a replacement of exterior material at the ground level facing the street for brick and detailing around fenestrations to provide greater articulation at the pedestrian scale.

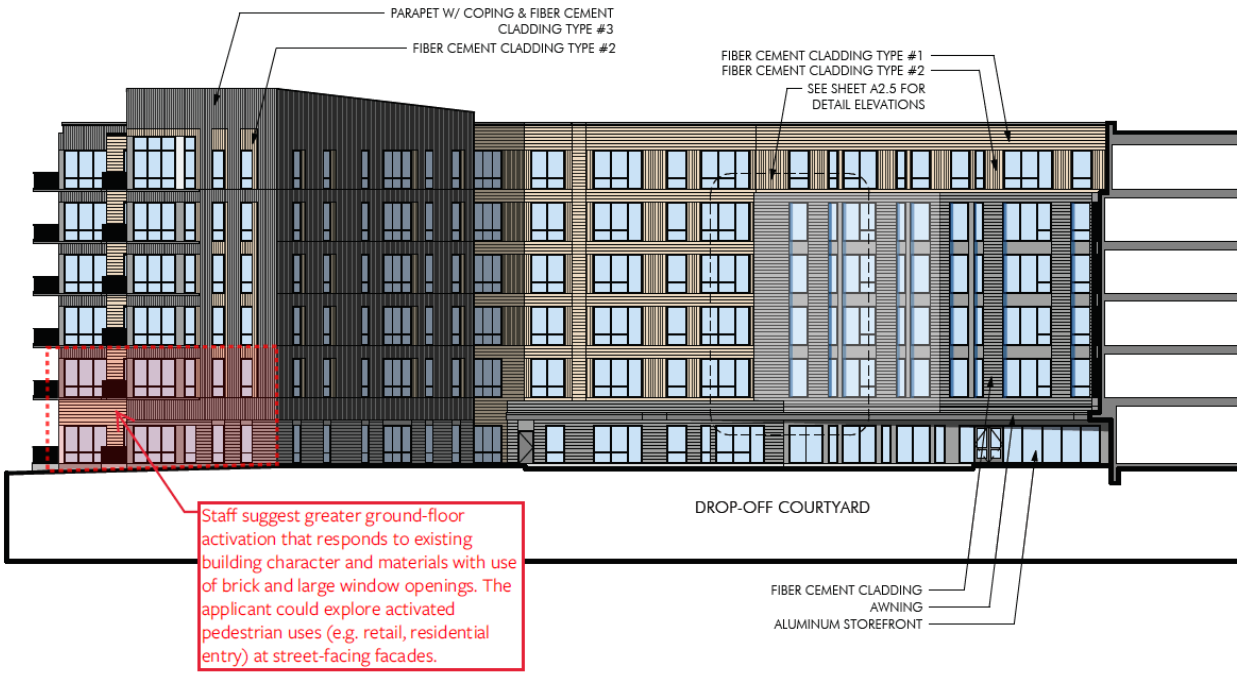

Figure 2: Staff diagram for street-facing facades at Northeast elevation

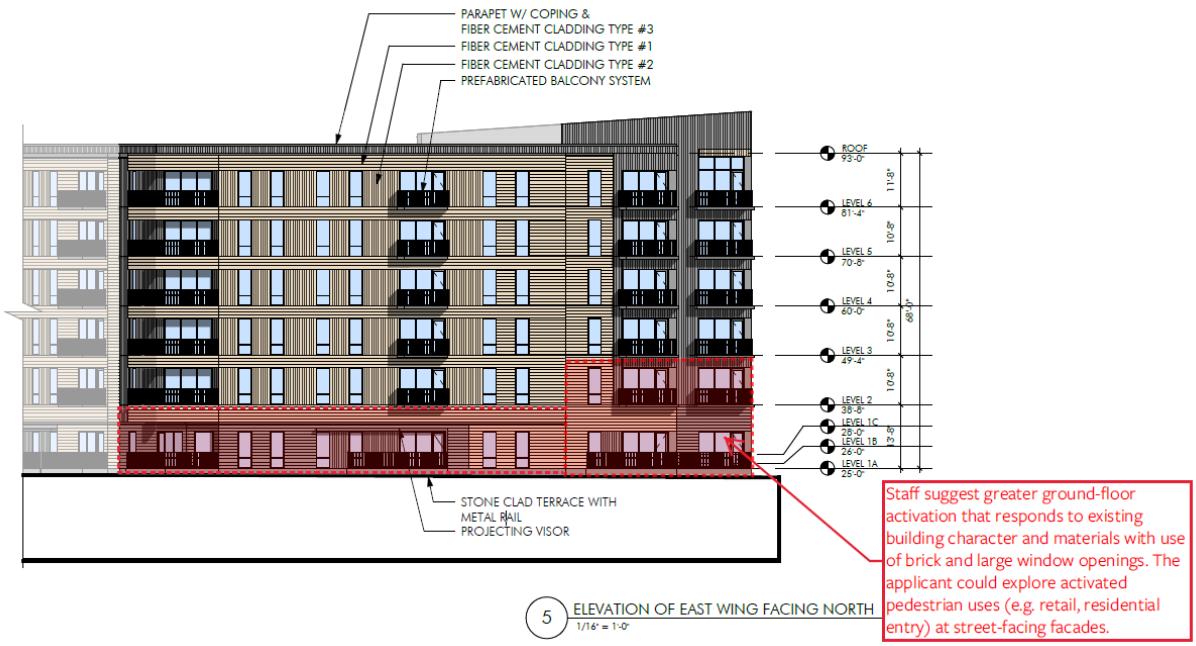

Figure 3: Staff diagram for street-facing facades at East elevation

Standard (1) d. Parking lots shall be located to the maximum extent practicable toward the rear of the property and shall be located along property lines where joint use or combined parking areas with abutting properties are proposed or anticipated.

Staff comments - The proposed development includes structured parking along the north building façade that is accessed via a two-way drive. Staff finds that the structured parking will be visible from abutting properties at the north and recommends that the applicant provide additional screening as appropriate (eg. architectural perforation, vertical landscaping or other façade-fixed material).

In addition, Staff finds the head-in parking spaces after the garage entrance to be unnecessary and recommends this driveway extension function for emergency access only with either a change of surface material (eg. grasscrete) or narrowing of drive aisle with mountable curb. Narrowing the drive aisle may allow for additional screening adjacent to the parking garage façade to reduce the visual impact to abutting properties with views towards Thompson Point.

Section (i) Multiple-family.

1. *The exterior design of the proposed structures, including architectural style, façade materials, roof pitch, building form and height, window pattern and spacing, porches and entryways, cornerboard and trim details, and facade variation in projecting or recessed building elements, shall be designed to complement and enhance the nearest residential neighborhood. The design of exterior facades shall provide positive visual interest by incorporating appropriate architectural elements;*

   Staff comment: The proposed multiple-family residential development is composed of several building wings and a structure parking garage that occupies a single building footprint. The proposed building design includes architectural detailing with varying exterior façade arrangements of fibercement and window detailing that is anomalous to any surrounding context due to the site location. Staff observes

building form variation with roof line expression at several building wings and suggest that the applicant explore additional building height that increases building massing height towards the center of the proposed building footprint.

2. *The proposed development shall respect the existing relationship of buildings to public streets. New development shall be integrated with the existing city fabric and streetscape including building placement, landscaping, lawn areas, porch and entrance areas, fencing, and other streetscape elements;*

   Staff comment: The proposed multiple-family residential development does not respond to any prevailing pattern within the city fabric or streetscape in regards to the building placement due to the isolated site location. Staff suggest that the applicant consider greater pedestrian activation at the transition space between the sidewalk and building façade fronting the street that includes an articulated building entry for residents, in addition to potential outdoor space programming (eg. retail use component, outdoor plaza and pedestrian amenities within close proximity to the street).

3. *Open space on the site for all two-family, special needs independent living unit, bed and breakfast and multiple-family development shall be integrated into the development site. Such open space in a special needs independent living unit or a multiple-family development shall be designed to complement and enhance the building form and development proposed on the site. Open space functions may include but are not limited to buffers and screening from streets and neighboring properties, yard space for residents, play areas, and planting strips along the perimeter of proposed buildings;*

   Staff comment: The proposed multiple-family residential development includes open space function with shared courtyards, outdoor amenities spaces, landscape buffering at the property and private balconies that Staff finds meets this design standard. Staff recommends a pathway connection directly from the Thompson Point roadway to the existing Portland Trail shoreline path.

4. *The design of proposed dwellings shall provide ample windows to enhance opportunities for sunlight and air in each dwelling in principal living areas and shall also provide sufficient storage areas;*

   Staff comment: Staff finds that the proposed multiple-family residential development provides ample windows and sufficient storage for all residential units.

5. *The scale and surface area of parking, driveways and paved areas are arranged and landscaped to properly screen vehicles from adjacent properties and streets;*

   Staff comment: Staff finds that all surface parking, driveways and paved areas are sufficiently screened from adjacent properties and streets.

6. *Two-family or multi-family dwellings shall not be converted to lodging houses unless all units in the building have been vacant for at least one (1) year prior to the date conversion is sought or unless the individual multiple-family units are less than one thousand (1,000) square feet in size. In no event shall any single-family dwelling in the R-5 or R-6 zone be converted in whole or in part to a lodging house.*

   Staff comment: Not applicable as the proposed multiple-family development does not include a lodging house conversion.

Dear Bo Kennedy and Rob Simmons,

We have completed our second review of your submission of the application (PL-003090-2024), a major site plan project, proposing a new six-story building with 255 residential units and an attached parking structure at 125 Thompson's Point Road, in the B-5 Urban Commercial zone. This development triggers major site plan review by the Planning Board, and is subject to the following regulations:

- Site Plan, Major – Article 14.6

An overview of the City's review can be viewed in the attached project review worksheets and peer review comments.

Next Steps
Please review our feedback and reach out if you have any questions or would like to discuss this feedback in more detail. Please prepare a written response to all feedback, and provide updated plans, documents, and other materials as necessary to address the comments. The applicant shall notify me, as the project review manager, when a resubmission is uploaded to ProjectDox.

Staff has scheduled a review meeting with the applicant team for February 5, 2025 at 10AM.

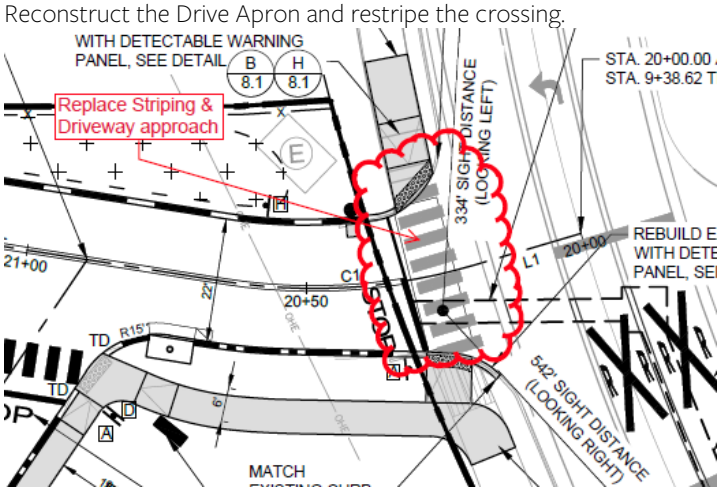
Sincerely,
Natasha M. Kypfer

Natasha Kypfer
Senior Planner

Attachments

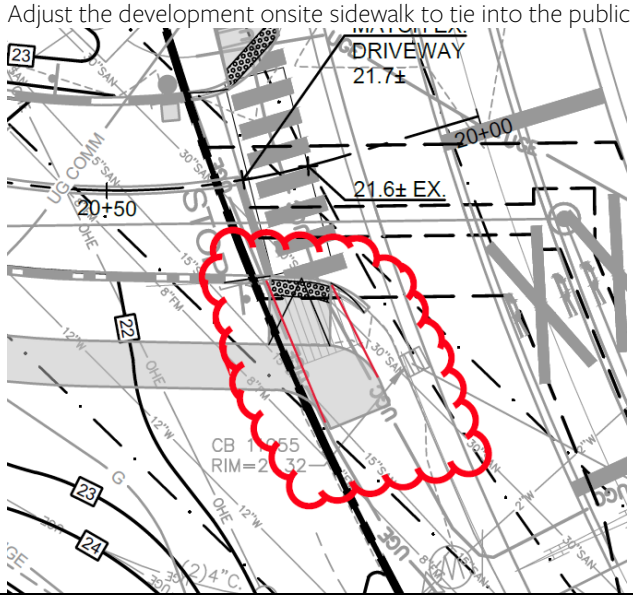
1. Site Plan Worksheet
2. Zoning Worksheet
3. Design Review Memo, 10-28-2024

General Comments concerning the Flood Zone:



- Regarding the AE Flood Zone, while the Firmette map for the Flood zone was provided in the resubmission, we are requesting these be added as an overlay to the Site Plan, which will then show exactly where the Flood Zone is located on the property. Further, Staff requests not rounding up to Elevation 10.0', NGVD1929.
- The Floodplain Administrator requests to see how the conversion from NAVD88 to NGVD29 was calculated.
- On the Existing Conditions Plan (Sheet C-2.0) and the Site Layout Plan without Easements (Sheet C-3.1A), the Flood Zone line is not clear. Staff requests it be shown in a different color than black, for ease of visibility.

Site Plan Review Standards (Sec. 14.6)		
Transportation Standards (Sec. 14.6.1)		
Standard	***Discussion***	***Finding***
Impact on Surrounding Street Systems	Overview: As part of the existing Master Development Plan (MDP), the overall project was reviewed under a Traffic Movement Permit (TMP) application, which addresses impacts on the surrounding street network and for the anticipated increases in traffic congestion. The TMP (Identification #: Reg. 01-00155-A-N) was issued on June 13, 2012 with a traffic study completed as part of the approved MaineDOT TMP, citing for 734 trip ends during the AM peak hour and 1,091 trip ends during the PM peak hour. Further, the TMP received an extension in 2024, through to March 1, 2027. According to the September 4, 2024 traffic memorandum prepared by Gorrill Palmer Associates, the proposed project is not forecasted to exceed the number of trips permitted under the existing TMP. Staff has reviewed the trip generation for the proposed residential use (255 units) and concurs the project can be expected to generate 101 trips during the AM peak hour and 100 trips during the PM peak hour. After review of the provided addendum materials, Staff has additional requests as outlined below: Updates & Additional Information Requested • Staff have reviewed the trip generation estimate and would like to review the trip generation calculations for all of the uses, regardless if previously approved from a documentation perspective. • One initial comment on the trip generation estimate is: the Brewery & Sit-Down Restaurant (14,644 SF) noted in the table should match the area used in the trip generation calculation (4,624 SF). • Relative to current uses at the Thompson Point campus, the applicant shall provide backup information for the trip generation estimate for: o Halo Event Space o the Office Space with 7 employees; the trip estimate does not match prior trip generation estimates for potential uses o the 4,624 SF or restaurant space associated with Bissell Brewery o Color Me Mine o Cryptozoology Museum o Leisure Time Cocktails o the Brick South Event Space (2,500 Seats) o Building L; data is provided for the office space but it does not match what is noted in the table	Not Met
Access and Circulation	Overview: The project site is accessed via Thompson's Point Road at the intersection of Fore River Parkway, and includes a public railroad crossing proximate to the two-way driveway, which terminates at a turnaround hammer head. The Thompson's Point Trail (formerly named the Fore River Trail) runs southerly to the development area, with the site's proposed pedestrian circulation	Not Met



well-integrated to the public trail system. Further, a proposed six-foot-wide sidewalk along the front façade of the building connects to the existing sidewalk network throughout the Thompson's Point campus. City Staff are requesting updates to the re-submitted materials as outlined below:

Updates & Additional Information Requested

- General note: Some of the proposed site work that is proposed falls outside of the development tract, please include the abutting site as part of the larger project boundary on the applicable plan sheets.
- Proposed improvements and existing conditions in the City ROW shall be identified and dimensioned on the plan view sheets. For example, ROW, street, lanes sidewalk, esplanade driveways (and other improvements) widths as well as when a width changes.
- Provide detailed grading plan for the drive entrance onto Thompson's Point Road. The applicant shall update the plans to label and or provide spot grades and slopes for the proposed sidewalk improvements at grade breaks.
- Reconstruct the Drive Apron and restripe the crossing.

- Realign the ADA ramp and landing area to be within the public ROW. Adjust the development onsite sidewalk to tie into the public sidewalk.

Public Transit Access	Overview: This project is within a quarter mile of fixed transit, as the Greater Portland Metro's BREEZ line services bus stops at both the Portland Transportation Center (PTC) and Thompson's Point, operating Monday - Saturday. The application materials indicate the closest of which transit stop is approximately 665 feet / 0.13 miles walking-distance from the front door of the site. Per the Technical Manual Section 1.17.2, transit shelters shall be located within the site, directly adjacent to the right-of-way on which the public transportation route is established or located within a public sidewalk area long the property frontage.	Met
Parking	Overview: This project proposes to provide 457 parking spaces within a parking garage structure attached to the proposed residential "Building G" residential structure. In addition, 35 off-street parking spaces are proposed along the front façade of the building and the drop-off court by the main entrance. Per the application materials, 26 ADA parking stalls are proposed on-site and 102 bicycle parking spaces are provided in the form of bicycle racks located in front and inside the proposed building. Further, while the Technical Manual Section 1.14 outlines new structured and surface parking lots of five or more spaces to provide Level 2 EV charging or higher to 20% of total parking, this project proposes roughly 10% (46 spaces) through a combination of Level 2 chargers, Level 1 chargers, and EV-ready spaces. The applicant has conducted a parking analysis for the proposed residential use. Staff finds the estimate of 334 parking spaces per ITE methods to be reasonable. Staff would also request that the applicant provide a parking management plan if the proposed parking spaces are to be shared with other uses on Thompson's Point. Staff notes that the project will be providing 377 parking spaces for the residential use; this is slightly more than the documented demand of 334 spaces. Further, additional requests are outlined below: Updates & Additional Information Requested: • Please provide a parking management plan, as the proposed parking spaces are to be shared with other uses on Thompson's Point. • The remaining parking spaces (86 spaces on the first floor of the garage and 24 surface parking spaces) are indicated to be used for overall Thompson's Point campus parking needs. These spaces will be managed by Forefront Partners, like all other parking spaces on the campus. The applicant should provide details on how these spaces will be regulated. Will they function like existing spaces and be "Pay to Park"? Will signage, etc. be installed? How will the garage gate system be managed (based on the plans it appears two gate systems are proposed – staff is looking for clarification on how they will operate). • The overall campus parking analysis should be updated to reflect the land use information used in the updated trip generation estimate. The parking generation estimate should be based on the most recent edition of the ITE Parking Generation Manual. • The applicant should document the number of existing and proposed parking spaces on campus and note what spaces are allocated to specific businesses/uses. • Staff has reviewed the revised plan, and the exterior parking layout is acceptable. Parking aisle widths shall be provided for the interior garage.	Not Met
Transportation Demand Management	Overview: A TDM Plan is required for this project, as it exceeds the thresholds as detailed in the LUC Section 14.6.1.E.1. The project has an approved Thompson's Point campus-wide Transportation Demand Management Plan (TDM) for managing and reducing traffic trips and parking demand in place as part of the Master Development Plan (MDP). The provided Attachment P summarizes TDM initiatives and references previously prepared TDM strategy reports which was approved in 2011, and subsequently updated in 2015 and 2018.	Not Met

	Updates & Additional Information Requested
	• As part of the MDP, a wholistic campus-wide approach was undertaken, but with the addition of new housing, City staff has additional questions concerning the overall site integration:
	  o The 2011 MaineDOT Traffic Movement Permit notes that "No sporting events or concerts shall begin between 4pm and 7pm Monday through Friday". The project does not appear to comply with this requirement. The assumption for trip generation associated with concert events was that if the start time is at 7pm or later, there would be minimal impact to the commuter PM peak hour. If concerts begin at 6pm, impacts to the peak hour may occur.
	  o City staff has concerns about parking in the Libbytown neighborhood during events. The applicant should address this concern through possible actions/strategies in the TDM Plan.
	  o City staff has observed traffic congestion on Fore River Parkway extending into Congress Street. The applicant should address this concern through their site monitoring efforts and identify possible mitigation strategies to address this issue.	

Environmental Quality Standards (Sec. 14.6.2)		
Standard	***Discussion***	***Finding***
Preservation of Significant Natural Features	Overview: The parcel's current use is as a gravel surface parking lot resulting in the anticipated site disturbance unlikely to disrupt any significant natural features. While the landscaping plan identifies trees to be preserved, it does not include a tree survey as noted below. Further, the applicant attests no known populations of trees or plants present on the site have been classified as Endangered and Threatened in Maine, nor known habitats/communities, present that appear on the state or federal endangered or threatened animal list.	Met

Landscape Preservation	Overview: The submitted landscaping plan notes existing trees identified to preserve and protect (e.g. a handful of significant oaks along the southern property line that had previously been requested for preservation by the former City Arborist), but a tree survey was not included as part of the application submission. Per section 4.3.1. of the Technical Manual, projects are required to submit a tree survey from a licensed land surveyor arborist, forester, or landscape architect clearly identifying the forest type and location, size, and species of all existing trees 10" DBH or greater on the site and in the City right of way. The tree survey was provided with the second submission, although there are still several outstanding updates required of the landscaping plans and details as outlined below.
	Updates & Additional Information Requested
	• General note: Update the Landscape Plan to use the most current version of the Site Plan.
	• Please include on the landscape plan the species/size/location of the existing large trees to be preserved near the stormwater installation in the SW corner of the project; as while trees are present on Existing Conditions and Demolition plans but were left off landscape plan.
	• Regarding Landscape Details, Sheet L-200:
	  o #1, Tree Protection detail: If any of the existing trees to be preserved grow with a pronounced lean such that fencing in the dripline would place the stem of the tree near the edge or outside of the tree protection zone (TPZ):
	  o An alternative TPZ based on the critical root zone spread should be implemented with a target radius of 12" per 1" of stem diameter at DBH
		Not Met

	▪ If space constraints prohibit the target of 12" per 1" DBH, reductions down to 9" per 1" DBH are acceptable ▪ If more than 30% of the CRZ is impacted by trenching and/or grade changes of more than 4" then post construction remediation (decompaction, organic matter amendments) is warranted for preserved trees o #3, Deciduous Tree in Lawn or Esplanade ▪ If fertilizer packets are to be included when planting landscape trees, please refer to City Code, Chapter 34: Landcare in order to ensure a compliant application	
Site Landscaping and Buffers	Overview: The landscape plan proposes to screen the development from the existing trail, pool and outdoor amenities programing area, and around the entire perimeter of the building itself. The site location is buffered by both the rail line and Fore River, which will sufficiently buffer the proposed site use from the public right-of-way and neighboring campus properties. Further, the site has ±139 feet of street frontage and is required to plant one tree per 25-35 feet on center (4), within the public right-of-way. In their materials, the applicant cites that limited street trees have been proposed in location and quantities where possible, noting underground utility conflicts and that the rest of the site is heavily planted. Section 4 of the Technical Manual allows for the use of street tree alternatives, which the applicant team has determined, due to the existing conditions and high-density of underground utilities that are located in the right-of-way, they will contribute to the City of Portland Tree Fund for a total amount of $95,200, which accounts for 238 trees at the 2014 fee of $400 per tree. The calculation is based on the calculation for multi-family residential projects to provide one tree per unit, which would total 255 trees, although credit has been given for 17 trees as approved by the City Arborist.	Met
Water Quality, Stormwater Management and Erosion Control	Overview: The September 2024 stormwater report summarizes changes to the water quality treatment zones and provides detailed computations of the respective stormwater management systems sized to convey and treat stormwater runoff from the proposed redevelopment. The bulk of the new building, parking structure, central courtyard, and northerly courtyards will drain to a series of roof drains, catch basin inlets, and storm drain piping to convey runoff to a treatment system. City staff are requesting updates to the provided plans and materials, as individually detailed below: Updates & Additional Information Requested • The applicant is depicting a drainage easement within the City's right of way in the Thompson's Point connector road (Sheet C3.1b) to account for a short storm drain extension and connection from the private on-site drainage system. The drainage easement is unnecessary in this situation. The storm drain extension section in the right of way shall be constructed to City standards and will be turned over to the City at the conclusion of the project. The City does not grant easements for private storm drain or sewer lateral connections into the City's infrastructure located in public right of ways. Accordingly, please remove the proposed easement from the plans. • Please add a backflow preventer to sanitary sewer profile 'A' line downstream of SMH-1 as discussed via email on 1/17/2025. • Add a note to the plans stating that EX. SMH -1 shall be jointly inspected by the applicant's engineer, contractor, and the City to confirm a final plan to modify the structure to the rim elevation indicated on the plans.	Not Met

	• Notes should be added to the utility and grading plans indicating that several City and PWD sewer manholes will need to be adjusted to grade in the southerly access road area demarcated as Access Road profile 'C' on the plan set. It appears that a few of these structure adjustments may exceed the maximum adjustment height of 8 brick courses. The applicant should look into this and provide further information. • The applicant should relocate the proposed light pole/base located near Access road 'A' station 20+40 to provide more horizontal clearance with the 30" CSO line.	
Public Infrastructure and Community Safety Standards (Sec. 14.6.3)		
Standard	***Discussion***	***Finding***
Consistency with City Master Plans	Overview: The proposed development of the subject property is a permitted use within the B-5 zone, and complies with applicable zoning as established under the City's comprehensive plan, *Portland's Plan 2030*. Staff suggests the applicant include reference to other applicable studies in their narrative materials, such as: One Climate Future and the Peninsula Transportation Plan.	Met
Public Safety and Fire Prevention	Overview: The project site is accessible from Thompson's Point Road, and during the Master Development Plan (MDP) approval back in 2014, it was determined at the time that for the purposes of emergency vehicle access one access point for ingress/egress was sufficient. Further, the included Utility Plan shows the location of all existing and proposed fire hydrants, with a service radius of 100' and 250', meeting the Technical Manual Section 3.2.1 standard of within 500'. However, City staff, including Fire & Life Safety reviewers, still have concerns, therefore requesting feasibility documentation in light of Section 18.2.3.3 of NFPA 1 Fire Code. Updates & Additional Information Requested • While City staff continues to have concerns regarding emergency access to the site, we also acknowledge that prior discussions during the MDP approval process allowed for the single roadway access site-wide. We will look forward to having a more robust discussion on this item at our meeting scheduled for February 5, 2025, wherein representatives from the applicant team and the City will be present.	Not Met
Public Utilities	Overview: Per the applicant's submittal, the existing 12" water main (publicly owned), 15" sewer main (publicly owned), and electrical/communications (private) duct bank serving the project is shown on the accompanying utility plan. The proposed development will construct new utility stubs for the development lot. Ability to Serve letters have been provided by Unitil, CMP, and DPW for wastewater capacity authorization. Updates & Additional Information Requested • Please forward on the Ability to Serve letter from PWD, once received.	Not Met
Site Design Standards (Sec. 14.6.4)		
Standard	***Discussion***	***Finding***
Massing, Ventilation and Wind Impact	Overview: The proposed multi-family residential building is located at the panhandle portion of the property site of the Thompson's Point development, with direct access to the Thompson's Point roadway. Originally envisioned with the MDP as a clustered arrangement of three new buildings, the proposal is for a single multi-family residential building with attached parking structure, six-stories or 68 feet in height. Further, the HVAC equipment is proposed to be located on the roof, with the applicant's noting the equipment will exhaust away from the adjacent residential properties.	Met
Shadow	Overview: Shadow standards are not applicable in the B-5 zone; thus, this development is exempt.	Met

Snow and Ice Loading	Overview: Snow storage is proposed to be located temporarily along the edges of the drive aisles and landscaped areas until such a time when the stockpiles need to be removed from the property. Snow removal on the parking roof deck which is a flat roof and is designed to store snowfall, will be plowed to a drop chute where it can be managed on the ground.	Met
View Corridors	Overview: This site is not located along a public view corridor identified in the Downtown Vision View Corridor Protection Plan.	Met
Historic Resources	Overview: The subject property is not within a Historic District; therefore, this standard does not apply.	Met
Exterior Lighting	Overview: All development must adhere to the site lighting standards provided for in the Technical Manual, Section 12, for: site lighting, architectural and specialty lighting, and street lighting. This project proposes site lighting, with 27 outdoor wall-mounted fixtures proposed in total along the four structure planes; the photometric plan is provided with the submission, as well as cut sheets and lighting specification materials.	Met
Noise and Vibration	Overview: In the City, all HVAC, AHU, emergency generators, and similar equipment are required to meet applicable state and federal emissions requirements and are further required to be located and/or screened in such a manner as to mitigate noise and vibration impacts. Per the application materials, the majority of the roof top mounted HVAC equipment average approximately 57" - 69" above the roof, and includes electric heat pumps for each dwelling unit. Sheet A1.7 ('Site Line Studies of Roof Top Mechanical Units' with the resubmission. The applicant shares that there will be no cooling towers, nor chillers or generators that could create unwarranted noise to emanate from the site.	Met
Signage and Wayfinding	Overview: Any signage associated with the redevelopment of this project will be required to be reviewed by the Permitting and Inspections Department separately, with a sign permit to meet the standards of Article of the Land Use Code.	Met
Design Standards	Overview: Per the LUC Section 14.6.4.I.a, developments in the B-5 zone shall be designed to support the development of dense, mixed-use neighborhoods with attractive, safe, and convenient street-level pedestrian environments. An initial Design Review Memo, dated October 28, 2024 was provided, with additional recommendations provided below (subsequent to the second submission), which were also shared at the first Planning Board workshop, held on January 14, 2025. Updates & Additional Information Requested • Staff requests that the applicant prepare additional renderings to illustrate the parking garage as viewed from Thompson Point roadway and adjacent properties, particularly from the north side of existing railway tracks. Staff is concerned that the sloped parking decks at the structured garage are not properly screened as visible from the street and from adjacent properties. As outlined in the design review memo, dated October 18, 2024, Staff recommends additional architectural and/or landscape screening elements, such as perforated facade screening to reinforce a horizontal datum, vertical landscaping with vine-trellis systems or other appropriate vegetation. • Staff suggest greater ground-floor activation along building facades oriented towards the Thompson Point roadway. Staff recommends incorporating a pedestrian scaled entry for residents (potentially at the termination of the Level 1 corridor) to allow direct access from the sidewalk and more connectivity to the street. Alternatively, Staff suggests additional architectural articulation that orient the building towards the street with the incorporation of facade materials and organization of materials at a pedestrian scale found throughout the Thompson's Point development.	Not Met

Project ID:	PL-003090-2024

I. INTRODUCTION

The project at 125 Thompson's Point for 255 residential units was reviewed according to the *City of Portland Design Manual* section ***(c) B-5 and B-5b Urban Commercial Business Zone*** and section ***(i)*** *two-family, special needs independent living units,* ***multiple-family****, lodging houses, bed and breakfasts and emergency shelters* design standards. In addition, design guidelines identified in the Thompson's Point Master Development Plan were reviewed.

II. DESIGN REVIEW COMMENTS: **bold** text denotes recent updates met, red text denotes standards not met which require resubmission.

(I.) Thompson's Point Master Development Plan standards - *Designed as to create a cohesive identity through building scale, massing, and articulation; use of quality exterior materials, architectural detailing at pedestrian scale; consistency of design and materials for streetscape and pedestrian amenities; framing of outdoor open space and linkages; a clear conveyance of the function and significance of various buildings, entrances, and features; and to generally comply with design and development standards of the zone in which it is located;*

The Master Development Plan approved a layout with a clustered arrangement of new buildings (G, J1 and J2) that expand along the shoreland as a natural boundary and the railroad corridor as an infrastructure boundary.

The proposed multi-family residential building is located at the north property of the Thompson's Point development with direct access to the Thompson's Point roadway. The proposed structure height is six-stories (averaging 68-feet), which is a departure from the existing low-medium building heights located throughout the development. However, the approved Master Development Plan illustrated taller structures at this site to demonstrate the maximum allowable building heights at 125-feet. Staff suggests that the applicant consider an increase to the proposed building height, as shown in figure 1, to add vertical scale towards the center of the proposed building footprint.

Figure 1: Staff diagram in blue from applicant's rendering (view from waterfront)

(c.) B-5 and B-5b Urban Commercial Business Zones

Standard (1) a. Shared Infrastructure: Shared circulation, parking, and transportation infrastructure shall be provided to the extent practicable, with utilization of joint curb cuts, walkways, service alleys, bus pull-out areas, and related infrastructure shared with abutting lots and roadways. Easements for access for abutting properties and shared internal access points at property lines shall be provided where possible to facilitate present or future sharing of access and infrastructure.

Staff comments – The proposed development will utilize the existing Thompson Point private roadway, sidewalk and bicycle facilities as the primary point of entry and exit. Within the site development location, a new two-way drive is proposed to allow access to the drop-off court, building entries, primary structured parking entry and emergency access. Staff recommends a reduction in angled parking spaces to provide prioritization of the pedestrian facilities into the primary building entrance. To encourage the drop-off court as a pedestrian plaza that only allow infrequent vehicular drop-off that is more conducive with a transit-oriented and walkable development.

Standard (1) b. Buildings and uses shall be located close to the street where practicable. Corner lots shall fill into the corner and shall provide an architectural presence and focus to mark the corner.

Staff comments – Thompson's Point development is an anomalous, isolated site located on the water without an established urban context or street connectivity to the city. Therefore, some of the standards of the B-5 are harder to apply in this case due to the irregular configuration of lots that vary in size, orientation, and relationship to the private vehicular road. The proposed residential building is setback from the Thompson Point roadway that Staff finds deviates from this design standard to locate buildings close to the street where practicable. Staff recommends that the applicant provide additional ground-floor activation and pedestrian oriented uses (eg. articulated building entries or active use) to achieve an architectural presence and focus at the street.

Standard (1) c. Buildings shall be oriented toward the street and shall include prominent facades with windows and entrances oriented toward the street. Uses that include public access to a building or commercial/office uses in mixed-use developments shall be oriented toward major streets whenever possible.

Staff comments – The proposed building spans the site with several building wings to create a courtyard building arrangement. Staff finds the facades are balanced with windows and articulated entries throughout the facades, however do not establish a prominent façade oriented toward the street. Staff acknowledges that due to the unique site factors and historical arrangement of existing buildings, strict compliance to require a building location closest to the street may not be appropriate. The proposed exterior façade materials include a variety of fibercement cladding and tones with an organized fenestration pattern that is a departure from the existing buildings found at Thompson Point, which include a mix of adaptive reuse brick industrial-era structures and contemporary buildings.

Staff suggests the applicant create a more pedestrian scaled façade and building orientation towards the Thompson Point roadway. Staff recommends a more cohesive arrangement of exterior façade materials that respond to the existing character of buildings, particularly at the street-facing facades of Brick North & South buildings. Staff suggest a replacement of exterior material at the ground level facing the street for brick and detailing around fenestrations to provide greater articulation at the pedestrian scale.

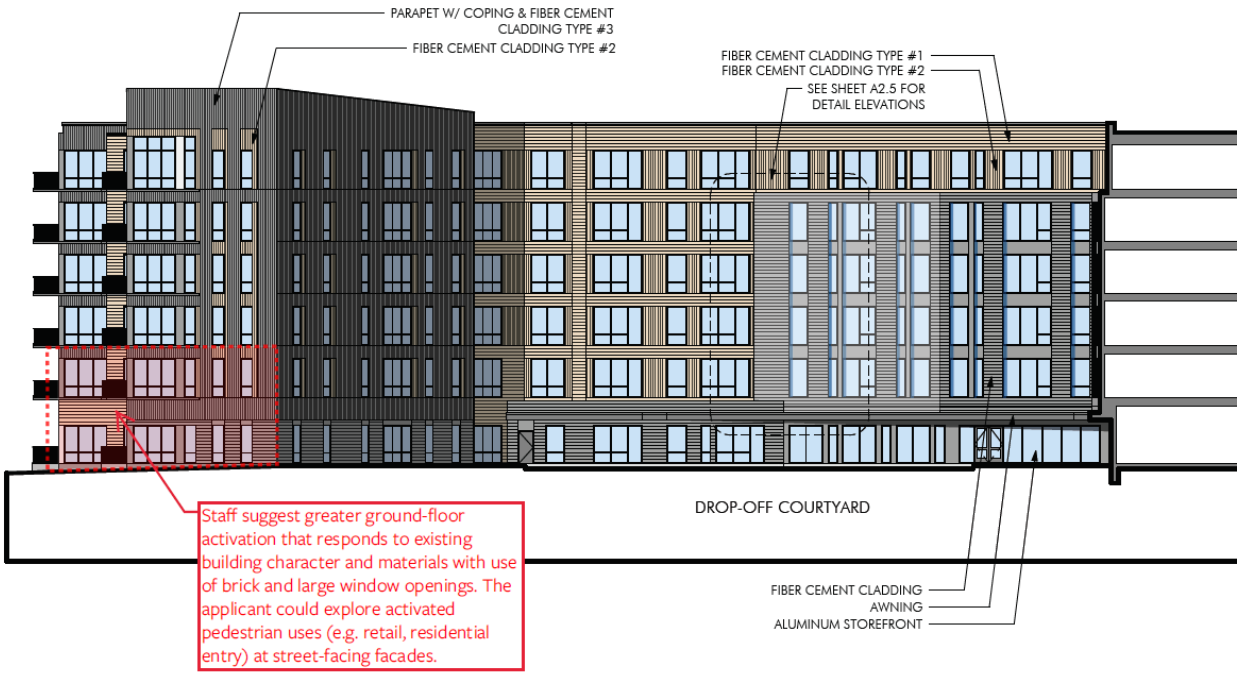

Figure 2: Staff diagram for street-facing facades at Northeast elevation

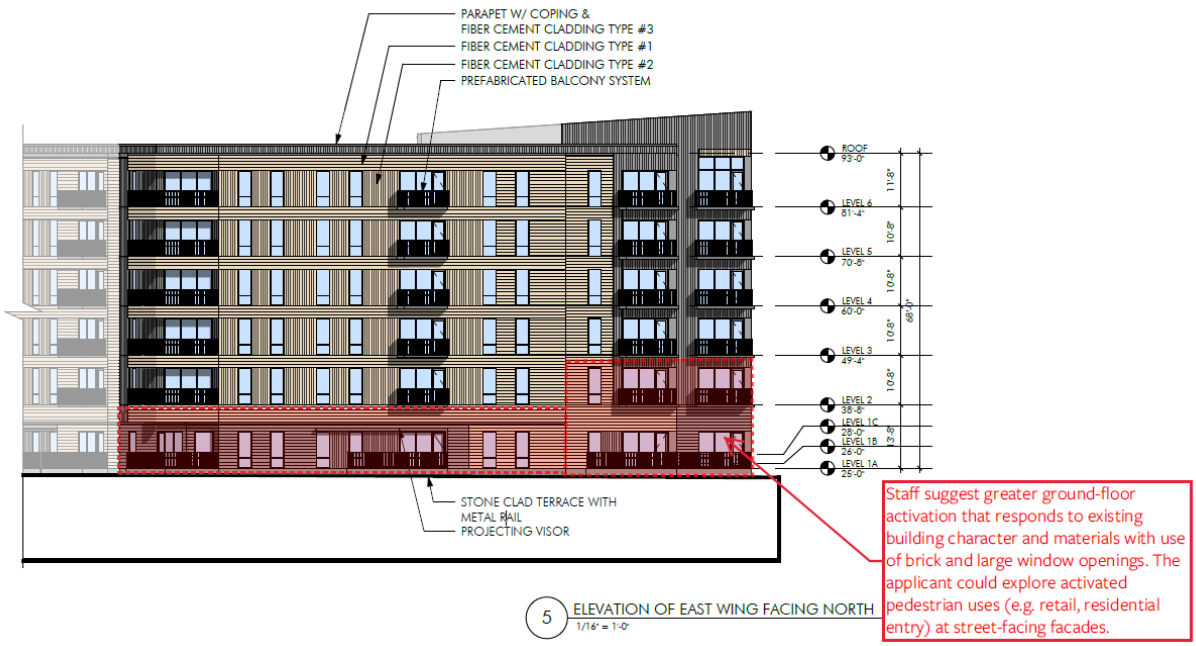

Figure 3: Staff diagram for street-facing facades at East elevation

Standard (1) d. Parking lots shall be located to the maximum extent practicable toward the rear of the property and shall be located along property lines where joint use or combined parking areas with abutting properties are proposed or anticipated.

Staff comments - The proposed development includes structured parking along the north building façade that is accessed via a two-way drive. Staff finds that the structured parking will be visible from abutting properties at the north and recommends that the applicant provide additional screening as appropriate (eg. architectural perforation, vertical landscaping or other façade-fixed material).

In addition, Staff finds the head-in parking spaces after the garage entrance to be unnecessary and recommends this driveway extension function for emergency access only with either a change of surface material (eg. grasscrete) or narrowing of drive aisle with mountable curb. Narrowing the drive aisle may allow for additional screening adjacent to the parking garage façade to reduce the visual impact to abutting properties with views towards Thompson Point.

Section (i) Multiple-family.

1. *The exterior design of the proposed structures, including architectural style, façade materials, roof pitch, building form and height, window pattern and spacing, porches and entryways, cornerboard and trim details, and facade variation in projecting or recessed building elements, shall be designed to complement and enhance the nearest residential neighborhood. The design of exterior facades shall provide positive visual interest by incorporating appropriate architectural elements;*

   Staff comment: The proposed multiple-family residential development is composed of several building wings and a structure parking garage that occupies a single building footprint. The proposed building design includes architectural detailing with varying exterior façade arrangements of fibercement and window detailing that is anomalous to any surrounding context due to the site location. Staff observes

building form variation with roof line expression at several building wings and suggest that the applicant explore additional building height that increases building massing height towards the center of the proposed building footprint.

2. *The proposed development shall respect the existing relationship of buildings to public streets. New development shall be integrated with the existing city fabric and streetscape including building placement, landscaping, lawn areas, porch and entrance areas, fencing, and other streetscape elements;*

   Staff comment: The proposed multiple-family residential development does not respond to any prevailing pattern within the city fabric or streetscape in regards to the building placement due to the isolated site location. Staff suggest that the applicant consider greater pedestrian activation at the transition space between the sidewalk and building façade fronting the street that includes an articulated building entry for residents, in addition to potential outdoor space programming (eg. retail use component, outdoor plaza and pedestrian amenities within close proximity to the street).

3. *Open space on the site for all two-family, special needs independent living unit, bed and breakfast and multiple-family development shall be integrated into the development site. Such open space in a special needs independent living unit or a multiple-family development shall be designed to complement and enhance the building form and development proposed on the site. Open space functions may include but are not limited to buffers and screening from streets and neighboring properties, yard space for residents, play areas, and planting strips along the perimeter of proposed buildings;*

   Staff comment: The proposed multiple-family residential development includes open space function with shared courtyards, outdoor amenities spaces, landscape buffering at the property and private balconies that Staff finds meets this design standard. Staff recommends a pathway connection directly from the Thompson Point roadway to the existing Portland Trail shoreline path.

4. *The design of proposed dwellings shall provide ample windows to enhance opportunities for sunlight and air in each dwelling in principal living areas and shall also provide sufficient storage areas;*

   Staff comment: Staff finds that the proposed multiple-family residential development provides ample windows and sufficient storage for all residential units.

5. *The scale and surface area of parking, driveways and paved areas are arranged and landscaped to properly screen vehicles from adjacent properties and streets;*

   Staff comment: Staff finds that all surface parking, driveways and paved areas are sufficiently screened from adjacent properties and streets.

6. *Two-family or multi-family dwellings shall not be converted to lodging houses unless all units in the building have been vacant for at least one (1) year prior to the date conversion is sought or unless the individual multiple-family units are less than one thousand (1,000) square feet in size. In no event shall any single-family dwelling in the R-5 or R-6 zone be converted in whole or in part to a lodging house.*

   Staff comment: Not applicable as the proposed multiple-family development does not include a lodging house conversion.

Subject:	125 Thompson's Point Road
Zone:	B-5 (Urban Commercial)
Date of Review:	Wednesday, February 12, 2025 Design Review

I. INTRODUCTION

The project at 125 Thompson's Point for 255 residential units was reviewed according to the *City of Portland Design Manual* section ***(c) B-5 and B-5b Urban Commercial Business Zone*** and section ***(i)*** *two-family, special needs independent living units,* ***multiple-family****, lodging houses, bed and breakfasts and emergency shelters* design standards under Land Use Code Chapter 14.6.4.l Design (revised 5-6-2024). In addition, design guidelines identified in the Thompson's Point Master Development Plan were reviewed under City's code of ordinance land use chapter 14, section 14-524 (revised 8-5-2013):

II. DESIGN REVIEW COMMENTS: **bold** text denotes recent updates met, red text denotes standards not met which require resubmission.

(l.) Thompson's Point Master Development Plan standards - *Designed as to create a cohesive identity through building scale, massing, and articulation; use of quality exterior materials, architectural detailing at pedestrian scale; consistency of design and materials for streetscape and pedestrian amenities; framing of outdoor open space and linkages; a clear conveyance of the function and significance of various buildings, entrances, and features; and to generally comply with design and development standards of the zone in which it is located;*

The Master Development Plan approved a layout with a clustered arrangement of new buildings (G, J1 and J2) that expand along the shoreland as a natural boundary and the railroad corridor as an infrastructure boundary.

The proposed multi-family residential building is located at the north property of the Thompson's Point development with direct access to the Thompson's Point roadway. The proposed structure height is six-stories (averaging 68-feet), which is a departure from the existing low-medium building heights located throughout the development and allowable based on the maximum building heights of 125 feet.

(c.) B-5 and B-5b Urban Commercial Business Zones
Standard (1) a. Shared Infrastructure: Shared circulation, parking, and transportation infrastructure shall be provided to the extent practicable, with utilization of joint curb cuts, walkways, service alleys, bus pull-out areas, and related infrastructure shared with abutting lots and roadways. Easements for access for abutting properties and shared internal access points at property lines shall be provided where possible to facilitate present or future sharing of access and infrastructure.

Staff comments – The proposed development will utilize the existing Thompson Point private roadway, sidewalk and bicycle facilities as the primary point of entry and exit. Within the site development location, a new two-way drive is proposed to allow access to the drop-off court, building entries, primary structured parking entry and emergency access.

Standard (1) b. Buildings and uses shall be located close to the street where practicable. Corner lots shall fill into the corner and shall provide an architectural presence and focus to mark the corner.

Staff comments – Thompson's Point is an isolated waterfront site without an established urban context. Therefore, some of the standards of the B-5 are harder to apply in this case due to the irregular configuration of lots that vary in size, orientation, and relationship to the private vehicular road. The proposed building is setback from the Thompson Point roadway, however the arrangement of windows, outdoor balconies and exterior façade materials to delineate floors create a strong architectural presence towards the street.

Standard (1) c. Buildings shall be oriented toward the street and shall include prominent facades with windows and entrances oriented toward the street. Uses that include public access to a building or commercial/office uses in mixed-use developments shall be oriented toward major streets whenever possible.

Staff comments – The proposed building spans the site with several wings to create a courtyard building arrangement. Staff has suggested additional architectural detailing at lower levels to mark the corner and building facades facing the street and finds that the resubmitted plans including brick provide a stronger presence at the street and responds to the exterior material selection of existing buildings found in Thompson Point. In addition, the proposed exterior façade materials include fibercement cladding in a variety of tones arranged to reinforce the are organized fenestration pattern of the windows that Staff finds appropriate.

Standard (1) d. Parking lots shall be located to the maximum extent practicable toward the rear of the property and shall be located along property lines where joint use or combined parking areas with abutting properties are proposed or anticipated.

Staff comments - The proposed development includes structured parking along the north building façade that is accessed via a two-way drive. Staff finds that the structured parking will be visible from abutting properties at the north and recommends that the applicant provide additional opaque screening as appropriate (e.g., architectural perforation, vertical landscaping or other façade-fixed material).

Section (i) Multiple-family.

1. *The exterior design of the proposed structures, including architectural style, façade materials, roof pitch, building form and height, window pattern and spacing, porches and entryways, cornerboard and trim details, and facade variation in projecting or recessed building elements, shall be designed to complement and enhance the nearest residential neighborhood. The design of exterior facades shall provide positive visual interest by incorporating appropriate architectural elements;*

   Staff comment: The proposed multiple-family residential development is composed of several building wings and a structure parking garage that occupies a single building footprint. The proposed building design includes architectural detailing with varying exterior façade arrangements of fibercement, brick

and window detailing that Staff finds to respond to existing buildings found at the Thompson Point development.

2. *The proposed development shall respect the existing relationship of buildings to public streets. New development shall be integrated with the existing city fabric and streetscape including building placement, landscaping, lawn areas, porch and entrance areas, fencing, and other streetscape elements;*

   Staff comment: Based on the isolated site location, the proposed multiple-family residential development placement does not respond to any prevailing pattern within the city fabric or streetscape. However, Staff finds the development integrates within the natural site conditions and proximity to surrounding buildings at Thompson Point that are set back from the street.

3. *Open space on the site for all two-family, special needs independent living unit, bed and breakfast and multiple-family development shall be integrated into the development site. Such open space in a special needs independent living unit or a multiple-family development shall be designed to complement and enhance the building form and development proposed on the site. Open space functions may include but are not limited to buffers and screening from streets and neighboring properties, yard space for residents, play areas, and planting strips along the perimeter of proposed buildings;*

   Staff comment: The proposed multiple-family residential development includes open space functions such as shared courtyards, outdoor amenities spaces, landscape buffering at the property, and private balconies that Staff finds meets this design standard. In addition, the development provides a pathway connection to the existing Portland Trail shoreline path.

4. *The design of proposed dwellings shall provide ample windows to enhance opportunities for sunlight and air in each dwelling in principal living areas and shall also provide sufficient storage areas;*

   Staff comment: Staff finds that the proposed multiple-family residential development provides ample windows and sufficient storage for all residential units.

5. *The scale and surface area of parking, driveways and paved areas are arranged and landscaped to properly screen vehicles from adjacent properties and streets;*

   Staff comment: Staff finds that all surface parking, driveways and paved areas are sufficiently screened from adjacent properties and streets.

AMENDMENT TO PORTLAND CITY CODE
CHAPTER 14. LAND USE
ARTICLE III. Zoning,
DIVISION 12.6. Urban Commercial Mixed Use Zone,
Section 14-230.4

I. BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF PORTLAND, MAINE IN CITY COUNCIL ASSEMBLED AS FOLLOWS:

1. *That Chapter 14, Article III, Division* 12.6. *Urban Commercial Mixed Use Zone, Section 14-230.4 of the Portland City Code is hereby amended to read as follows:*

Sec. 14-230.4. Dimensional requirements.

In addition to the provisions of article III, division 25 of this Code, lots in the B-5 and B-5b urban commercial mixed use zones shall meet the following requirements:

...

(e) ~~*Maximum residential density:* Sixty (60) dwelling units per acre.~~

~~(f)~~ *Maximum building height:* Sixty-five (65) feet; except as follows:

1. ~~for~~ For parcels of land ~~I ntch~~in the B-5b located along West Commercial Street south of Danforth Street, maximum building heights shall be as follows:

~~———~~West of the projection of the centerline of the Fletcher Street right-of-way, the maximum building height shall be forty-five (45) feet; and, east of the projection of the centerline of the Fletcher Street right-of-way and west of the projection of the centerline of the Emery Stree~~e~~t right-of-way, the maximum building height shall be fifty-five (55) feet.

———For purposes of this section, a projection of the centerline of a street is defined by extending the centerline of the referenced street right of way along its most southerly block to the centerline of West Commercial Street.

———Furthermore, notwithstanding the exception of roof top structures from building height regulations in Section 14-430(a), no rooftop structure located between the projections of the centerlines of Emery Street and Fletcher Street, as described above, shall exceed a height of sixty-two (62) feet as measured from the average grade of the building at its foundation.

2. For parcels of land located on Thompson's Point and also subject to an approved Master Plan Development: one hundred twenty (120) feet. Thompson's Point is defined as the contiguous parcels of upland occupying the peninsula bounded on the east by Route 295, on the north by the Mountain Division Rail Right of way, and on the south and west by the Fore River and its associated wetlands. Nearby lands that are accessed from Hobart and Osgood Streets are, for the purposes of this provision, not considered part of Thompson's Point.

(~~g~~f) *Minimum building height:*

1. In the B-5 zoning district between Forest Avenue and Franklin Street, within thirty-five (35) feet of any public street, no new construction of any building shall have less than three (3) floors of occupiable or habitable space above the average adjacent grade. This provision shall not apply to:

   a. Accessory building components such as truck loading docks, mechanical equipment enclosures, refrigeration units;

   b. Information kiosks and ticketing booths;

   c. Parking garages;

   d. Public transportation facilities;

e. Additions to buildings existing as of March 9, 2005 provided that the cumulative additions since March 9, 2005 does not exceed 25% of the building footprint on March 9, 2005 except that such restriction shall not apply to those portions of the building addition that are constructed closer to the street line than the building footprint existing as of March 9, 2005;

f. Utility substations, including sewage collection and pumping stations, water pumping stations, transformer stations, telephone electronic enclosures and other similar structures; and

g. Additions to and relocations of designated historic structures or structures determined by the Historic Preservation Committee to be eligible for such designation.

ARTICLE II. PLANNING BOARD*

***Cross reference(s)--**Administration, Ch. 2; boards generally, § 2-31 et seq.; limitation on term of service on boards, commissions, § 2-32 et seq.

Sec. 14-16. Created.

There is hereby created a planning board.
(Code 1968, § 601.1; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75; Ord. No. 242-76, 5-17-76; Ord. No. 149-79, § 1, 8-6-79)

Sec. 14-17. Composition.

There shall be a planning board of seven (7) members. Members of the planning board shall be residents of the city and shall not be officers or employees of the city or any other agencies or department.
(Code 1968, § 601.1; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75; Ord. No. 242-76, 5-17-76; Ord. No. 149-79, § 1, 8-6-79)

Sec. 14-18. Appointment; terms.

The members of the planning board shall be appointed by the city council for terms of three (3) years. Such members shall serve until their successors are duly elected and qualified. Such terms shall be staggered so that the terms of not more than three (3) members shall expire in any calendar year; providing, however, such service shall not extend to over one hundred twenty (120) days after expiration of their term.
(Code 1968, § 601.1; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75; Ord. No. 242-76, 5-17-76; Ord. No. 149-79, § 1, 8-6-79; Ord. No. 277-83, 11-7-83)

Sec. 14-19. Vacancies.

Permanent vacancies on the planning board shall be filled by

the city council, in the same manner as other appointments hereunder, for the unexpired term of the former member.
(Code 1968, § 601.1; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75; Ord. No. 242-76, 5-17-76; Ord. No. 149-79, § 1, 8-6-79)

Sec. 14-20. Removal of members.

Any member of the planning board may be removed for cause by the city council at any time; provided, however, that before any such removal, such member shall be given an opportunity to be heard in his or her own defense at a public hearing.
(Code 1968, § 601.1; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75; Ord. No. 242-76, 5-17-76; Ord. No. 149-79, § 1, 8-6-79)

Sec. 14-21. Compensation.

Members of the planning board shall serve without compensation.
(Code 1968, § 601.1; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75; Ord. No. 242-76, 5-17-76; Ord. No. 149-79, § 1, 8-6-79)

Sec. 14-22. Chair and vice-chair.

(a) The members of the planning board shall annually elect one (1) of their number as chair to preside at all meetings and hearings and to fulfill the customary functions of that office, and another of their number as vice-chair. The chair may administer oaths. The chair shall have the right, upon request, to designate any person or organization as a specially interested party for purposes of offering evidence and conducting cross-examination at hearings.

(b) In the absence of the chair, the vice-chair shall act as chair and shall have all the powers of the chair. The vice-chair shall have such other powers and duties as may from time to time be provided by the rules of the planning board.
(Code 1968, § 601.2; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75)

Sec. 14-23. Staff secretary; minutes, public records.

The planning director shall designate a member of his or her staff who shall serve as staff secretary of the planning board and attend all of its proceedings. The staff secretary shall provide for the keeping of minutes of the proceedings of the board, showing the vote of each member on every question, or his or her absence or

failure to vote, and shall maintain the permanent records and decisions of all board meetings, hearings and proceedings and all correspondence of the board, as required by statute. Such records shall be public records open to inspection during working hours upon reasonable notice.

(Code 1968, § 601.3; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75)

Sec. 14-24. Quorum and necessary vote.

As to any matter requiring a hearing, no business shall be transacted by the planning board without a quorum, consisting of four (4) members, being present. The concurring vote of at least four (4) members shall be necessary to authorize any action by the board. If less than a quorum is present, the hearing may be adjourned from time to time for a period not exceeding three (3) weeks at any one time. The staff secretary shall notify in writing all members of the date of the adjourned hearing and shall notify such other interested parties as may be directed in the vote of adjournment.

(Code 1968, § 601.4; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75; Ord. No. 242-76, 5-17-76)

Sec. 14-25. Meetings, hearings and procedures.

(a) Regular meetings of the planning board shall be held at the call of the chair or as provided by rule of the board. Special meetings may be called by the chair or any four (4) members of the board or at the request of the city council. Except as otherwise provided in section 14-26, all meetings, hearings and deliberations of the planning board and its committees shall be open to the public in accordance with Title 1, M.R.S.A., Section 401 et seq. Testimony at any hearing may be required by the planning board to be given under oath.

(b) The planning board shall adopt its own rules for the conduct of its business not inconsistent with the statutes of the state and this article. Such rules shall be filed with the staff secretary of the board and with the city clerk. Any and all rule changes shall be placed on a city council public agenda as a communication requiring a public hearing. Any rule may be vetoed, in whole or in part, by order of the council within forty-five (45) days of the date of filing with the city clerk. No rules change shall take effect until that time period has elapsed. If a part of a rule is vetoed, the remainder shall continue in effect. Any rule so adopted, which is not required by the statutes of the state or

by this article, may be waived by the chair upon good cause being shown.

(Code 1968, § 601.5; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75, 12-15-75; Ord. No. 242-76, 5-17-76; Ord. No. 78-89, 8-7-89)

Sec. 14-26. Workshop or informational meetings.

Informal meetings or workshops of the planning board or any of its committees may be held at the call of the board or committee chairperson, as the case may be, for the presentation of information by the planning director, his or her staff, the applicant or others. These meetings will be open for public comment according to the Rules of the Portland planning board. Such meetings, unless open to the public as provided in Title 1, M.R.S.A., Section 401 et seq. (Freedom of Access Act), shall be informational only and shall not be deliberative in nature; shall not be used by the board or committee for the weighing of positions or reasons for or against a proposition; and shall not be used by the board or committee for the formulation of tentative or final decisions on any matter.

(Code 1968, § 601.6; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75; Ord. No. 227-01, 4-2-01)

Sec. 14-27. Record and decisions.

(a) The minutes of the staff secretary, and the transcript if one (1) is made, and all exhibits, papers, applications and requests filed in any proceeding before the planning board and the decision of the board shall constitute the record.

(b) Every final decision of the planning board and every recommendation of the planning board to the city council shall include written findings of fact, and shall specify the reason or reasons for such decision or recommendation.

(c) The staff secretary shall mail notice of any decision of the planning board to the applicant and any designated interested parties within five (5) business days of such decision.

(Code 1968, § 601.7; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75)

Sec. 14-28. Conflicts.

No member of the planning board shall participate in the hearing or disposition of any matter in which he or she has an interest. Any question of whether a member has a conflict of interest sufficient to disqualify the member shall be decided by a

majority vote of the members present, except the member whose possible conflict is being examined; where such vote results in a tie, the subject member shall be disqualified.

(Code 1968, § 601.8; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75)

Sec. 14-29. Appeals.

An appeal from any final decision of the planning board as to any matter over which it has final authority may be taken by any party or by any authorized officer or agent of the city to the superior court in accordance with Rule 80B of the Maine Rules of Civil Procedure. No appeal shall lie concerning any matter as to which the power of the board is limited to the making of a recommendation.

(Code 1968, § 601.9; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75)

Sec. 14-30. Jurisdiction and authority.

In addition to the jurisdiction conferred on it by other provisions of state law and the ordinances of the city and in accordance therewith, the planning board shall have the following jurisdiction and authority:

(a) To prepare and recommend a comprehensive plan to the city council, which plan, upon its adoption by the city council, shall be known as the "Land Development Plan of the City of Portland";

(b) To prepare and recommend to the city council changes in and amendments to the land development plan;

(c) To aid and assist the city council and departments and agencies of the city in implementing general plans and in planning, developing and completing specific projects;

(d) To hear, review and approve, conditionally approve or disapprove level III site plans, subdivisions and conditional use applications;

(e) To hear, review and approve or deny applications for subdivision approval;

(f) To hear, review and offer its recommendations to the city council on applications for zoning changes and amendments to, or revisions of, the zoning ordinance, and to

initiate recommendations for zoning changes and amendments to, or revisions of, the zoning ordinance;

(g) To review and offer its recommendations to the city council on public projects;

(h) To review and approve, conditionally approve, or disapprove site plans for regulated projects in shoreland areas;

(i) To prepare and offer its recommendations to the city council with regard to the city's annual capital improvements program;

(j) To review and approve, conditionally approve, or disapprove urban renewal plans;

(k) Upon reasonable request, to make its special knowledge and expertise available to any official, department, board or agency of the city, county, state or federal governments to aid them in the performance of their respective duties relating to the planning and development of the city and its region, including request from the City Council to review proposed developments in which the developer does not have the right, title or interest in all the property necessary for the proposed development because some or all of that property is owned by the City;

(l) To make such investigations, maps and reports, and recommendations in connection therewith, relating to the planning and development of the city as seem desirable;

(m) To employ or contract with such experts and other assistants as may be necessary or convenient to carry out its duties hereunder and to pay for their services and for such other expenses as may be necessary and proper; provided, however, that such expenditures shall not exceed such funds as may be appropriated for such purposes from time to time by the city council;

(n) To hear, review and offer its recommendations to the city council on petitions for street vacations and discontinuances.

(o) To hear, review and decide appeals where it is alleged there is an error in any decision, requirement, or determination made by the planning authority.

(Code 1968, § 601.10; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75; Ord. No. 86-88, 7-19-88; Ord. No. 137-03/04, 1-21-04; Ord. No. 278-09/10, 7/19/10)

***Editor's Note--**Ord. No. 86-88, adopted July 19, 1988, amended this section by adding subsection (14) to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 86-88.

Sec. 14-31. Committees.

The chair of the planning board shall from time to time assign the members of the board to such regular and special committees as may be established by the board. Such committees shall have no final authority but shall assist the board in the conduct of its business by making recommendations to it concerning such specific items as may be assigned to them for study and report. The board shall adopt such rules as it shall deem appropriate to govern the organization and operation of its committees. Committee meetings deliberative in nature shall be open to the public in accordance with Title 1, M.R.S.A., Section 401 et seq.

(Code 1968, § 601.11; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75)

Sec. 14-32. Notice.

(a) Applications:

1. ***Level I, level II and level III site plans.*** All public notices will be sent according to the section 14-525 of article V (site plan) of this chapter.

2. ***Subdivision, Zoning Map Amendments.*** When an application for subdivision or a request for a zoning map amendment is received or generated by the planning authority, it shall give a dated receipt to the applicant and shall notify, by mail, the following, where applicable.

   a. All property owners within five hundred (500) feet of the proposed subdivision and the clerk and the reviewing authority of municipalities that abut or include any portion of the subdivision. In addition, the planning authority shall notify a

public drinking water supplier if the subdivision is within its source water protection area;

b. All property owners within five hundred (500) feet of the proposed subdivision or proposed zone change site, except that for subdivisions within industrial zones or proposed map amendments for a site within an industrial zone the notice range shall be one thousand (1000) feet;

c. All property owners within the limits of the proposed zoning map amendment and all property owners five hundred (500) feet beyond said area, except that for map amendments to a site located within industrial zone designations the notice range shall be one thousand (1000) feet.

The notice hereunder shall include a brief description of the application, the address or location of the property involved and a telephone number at the City where additional information may be obtained. The cost of said notice shall be charged to the applicant.

(b) Workshops and hearings:

Except for notice of public hearings concerning conditional or contract zoning (which notice is governed by section 14-61), the planning authority shall give notice of public workshops and hearings in the form and manner and to the persons herein specified. The notice shall include the time and place of such workshop or hearing, a brief description of the application and the address or location of the property involved. Where notice by mail is required, such notice shall be mailed at least ten (10) calendar days in advance of the workshop or hearing date by regular United States mail. The cost of said noticing shall be charged to the applicant.

1. Subdivision:

a. ***To the general public.*** In the case of workshops and public hearings, notice as described above shall be given to the general public by publication in a newspaper of general circulation in the City of Portland at least two (2) times, the date of the first publication to be at least ten (10) calendar

days prior to the hearing.

b. ***To the applicant and the owners of the subject property, and other property owners;*** In the case of workshops and public hearings, notice shall be sent by regular United States mail to the applicant, to the owner(s) of the subject property and to all owners of property located within five hundred (500) feet of the subject property, except that for subdivisions within industrial zones the notice range shall be one thousand (1000) feet.

2. Zoning Map Amendment:

a. ***To the general public:*** Except for notice of public hearings concerning conditional or contract zoning (which notice is governed by section 14-61), the notice of public hearing for zoning map amendments must be posted in the municipal office at least 13 days before the public hearing on such application. In addition, notice of said public hearing must be published at least two times in a newspaper of general circulation in the City of Portland. The date of the first publication must be at least twelve days prior to any public hearing and the date of the second publication must be at least seven days prior to the public hearing.

b. ***To property owners within the proposed area proposed for rezoning:*** Except for notice of public hearings concerning conditional or contract zoning (which notice is governed by section 14-61), in the case of workshops and public hearings on zoning map amendments, notice shall be sent by regular United States mail to all property owners within the aarea proposed for rezoning and all property owners five hundred (500) feet beyond said area, except that rezoning to industrial zone designations the notice range shall be one thousand (1000) feet.

3. Zoning Text Amendment.

a. ***To the general public:*** Notice of any zoning text amendment shall be published in a newspaper of general circulation in the City of Portland at

least seven days prior to the public hearing on the proposed amendment.

(c) Required Neighborhood Meeting

An applicant for (a) the subdivision of five or more units or lots or (b) for level III site plan review or (c) a private applicant for rezoning that would permit a Level III development as defined in Section 14-523 (required approvals and applicability), shall conduct a neighborhood meeting according to section 14-524 of article V (site plan) of this chapter.
(Code 1968, § 601.12; Ord. No. 158-68, 5-6-68; Ord. No. 671-75, 12-15-75; Ord. No. 79-89, 8-7-89; Ord. No. 00-51, §1, 8-7-00; Ord. No. 227-01, 4-2-01; Ord. No. 278-09/10, 7-19-10; Ord. No.25 11/12, 8-15-11)

Sec. 14-33. Public hearings.

Public hearings shall be held as required by the various statutes, codes and ordinances pursuant to which matters are brought before the planning board and shall be conducted in accordance with relevant state law, this code and the rules of the board.
Code 1968, § 601.13; Ord. No. 671-75, 12-15-75)

Sec. 14-34. - 14-45. Reserved.

ARTICLE III. ZONING*

***Editor's note--**Ord. No. 109-88, adopted July 19, 1988, provided that Ord. No. 79-88 through Ord. No. 99-88, all adopted July 19, 1988, which amended various sections within this chapter, "shall take effect immediately as an emergency, pursuant to Article II, § 8 of the Portland City Charter, to avoid a gap between the expiration of the moratorium ordinance previously controlling residential development and the implementation of the new development standards and map as adopted" and further provided that "notwithstanding the provisions of 1 M.R.S.A. § 302, this amendment and items 79 through 99 shall be applicable to applications for permits filed on or after July 19, 1988." Ord. No. 99-88 has not been set out herein but is on file in appropriate city offices. The specific amendments effected by Ord. No. 79-88 through Ord. No. 98-88 are too extensive to enumerate herein; for the specific disposition of such ordinances, see the Comparative Table following this Code.

It should be noted that the zoning ordinance, as set out in this article, does not include the text of conditional rezonings enacted as amendments to the zoning map adopted in § 14-49 herein.

Cross reference(s)--Ordinances pertaining to rezoning saved from repeal, § 1-4(13).

State law reference(s)--Zoning ordinances, 30 M.R.S.A. § 4962.

DIVISION 1. GENERALLY

Sec. 14-46. Purpose.

This article, made in accordance with a comprehensive plan, is enacted for the purpose of decreasing congestion in streets; securing safety from fire, panic and other dangers; providing adequate light and air; preventing the over-crowding of land; avoiding undue concentration of population; facilitating the adequate provision of transportation, sewerage, schools, parks and other community facilities and utilities; thus promoting the health, safety, convenience and general welfare of the citizens of the city. This article is made with reasonable consideration, among other things, to the character of each zone and its peculiar suitability for particular uses and with a view to conserving and stabilizing the value of property and encouraging the most appropriate use of land throughout the community.
(Code 1968, § 602.1.A)

Sec. 14-47. Definitions.

The following words shall be defined as set forth below for use in this article. Definitions set forth in the building code of the city shall apply to words not herein defined:

Accessory uses: Uses which are customarily incidental and subordinate to the location, function and operation of permitted uses.

Adult day care facility: A facility which provides a regular program of care and protection for persons over the age of sixteen (16), for consideration, for any part of the day.

Apartment: See "dwelling unit."

Apartment house: See "multifamily dwelling."

Arcade: A covered passageway, generally occurring at the street level of a building, running parallel and adjacent to the street or as a through-block pedestrian connection, which is intended to provide sheltered access to directly adjoining commercial or other uses. Arcades are provided physical definition

by the regular placement of structural elements throughout their length which support enclosed building uses above.

Assembly: A joining together of completely fabricated parts to create a finished product.

Back office use: An office-related use providing support services to a primary or headquarter use, with minimal public visitation and no direct in-person sales or services to the general public. Back office uses may include data processing, or other clerical uses relying heavily on a telecommunications infrastructure and may also include support services to educational institutions or social service agencies as long as no direct in-person services to the general public are provided.

Bed and breakfast: A building in which more than two (2) but not more than nine (9) guest rooms are used to provide or offer overnight accommodations for transient guests. An owner, manager, or operator shall live in the building as a permanent resident. No cooking facilities shall be permitted in any of the guest rooms. The only meal which may be offered is breakfast, which shall be offered only to overnight guests. No owner, operator, director, employee, shareholder, partner, corporate officer or agent of a bed and breakfast facility, hostel, hotel, inn, lodging house, motel, or tourist home (as defined in this code) may, for direct or indirect economic remuneration, arrange for or provide any housing accommodations including but not limited to long term, short term or overnight accommodations for an actual or potential guest, customer, or patron of the business at any off-premises site in the City, unless such a facility is authorized, under the applicable provisions of Portland's Land Use Code, to offer such accommodations as a bed and breakfast, hotel, inn, lodging house, motel or tourist home.

Billboard: A structure, either freestanding or attached to a building, the surface of which is available for hire for advertising purposes.

Biotechnology: The use of biological processes, particularly cellular and molecular to solve problems and/or make useful products for applications in medicine, agriculture and environmental management.

Building, height of: The vertical measurement from grade, or the predevelopment grade on the islands, to the highest point of

the roof beams in flat roofs; to the highest point of the roof beams or the highest point on the deck of mansard roofs; to a level midway between the level of the eaves and highest point of pitched roofs or hip roofs; or to a level two-thirds of the distance from the level of the eaves to the highest point of gambrel roofs. For this purpose the level of the eaves shall be taken to mean the highest level where the plane of the roof intersects the plane of the outside wall on a side containing the eaves.

Business service: Establishments primarily engaged in rendering services to other business establishments on a fee or contract basis such as advertising, mailing services, building maintenance services, employment services, management and consulting services, protective services, personnel services and similar businesses.

Chemical-free night club: An alcohol-free commercial establishment that offers live entertainment, amplified music, and/or dancing, where the primary source of income for such alcohol-free commercial establishment is derived from the entertainment and/or any admission or cover charge.

Clinics: Any establishment where patients are admitted for examination and treatment by one (1) or more professionals such as, but not limited to, physicians, dentists, psychologists or social workers.

Coastal wetland: All tidal and subtidal lands; all lands with vegetation present that is tolerant of salt water and that occurs primarily in a salt water or estuarine habitat; and/or any swamp, marsh, bog, beach, flat or other contiguous low land that is subject to tidal action during the highest tide level for the year in which an activity is proposed as identified in tide tables published by the National Ocean Service. Coastal wetlands may include portions of coastal sand dunes.

Collector or arterial road: A roadway which is classified as a collector or minor, principal or other arterial by the federal functional road classification for Portland, Maine, a map of which is on file with the department of planning and urban development.

Commercial vessel: Any watercraft used principally in a business or trade, including common carriers of passenger or freight, whether for governmental, nonprofit or emergency purposes; but not including pleasure craft used principally for recreational

purposes.

Common areas: Portions of a lodging house which are available for use by all residents of the lodging house. Common areas shall include, but are not limited to, one (1) or more of the following: kitchens, living rooms, recreation rooms, improved basements, and finished porches. Bathrooms, stairways, hallways and storage areas shall not be counted as common areas.

Community Hall: A building or portion of an existing building built for institutional or other non-residential uses and used for social, recreational, artistic, civic, or educational community functions. Such a facility would be open to the public for such functions, which, for example, could include but not be limited to performances, dance, exhibitions, cultural exchange, training programs and workshops, neighborhood meetings or gatherings. As part of these functions and activities, it shall be permissible to serve food, subject to other applicable codes and ordinances. In the R-6 residential zone only, the building can also be used for a farmer's market pursuant to chapter 21 of this code and the requirements set forth therein.

Community living arrangements: A state approved, authorized, certified or licensed group home for eight (8) or fewer mentally handicapped or developmentally disabled persons.

Congregate care facility: A planned residential unit development which provides individual living units with support services which provide assistance to residents. Services to be provided shall include:

(a) Transportation for essential support activities. This service shall be included in the base rent;

(b) Provision of at least one (1) meal per day;

(c) Programmed social activities which are facilitated by staff. This service shall be included in the base rent;

(d) Provision of personal care services including, but not limited to, housekeeping, laundry, and minimal health monitoring; and

(e) Installation of emergency call buttons or systems in each congregate care living unit.

The population of a congregate care facility shall consist of persons fifty-five (55) years of age or older and their spouses and/or disabled persons and their spouses.

Day care facility: A facility which provides a regular program of care and protection for children under the age of sixteen (16), for consideration, for any part of the day.

Drinking establishment: Means and includes any establishment required to be licensed to sell alcoholic beverages for on-premises consumption, which is not regularly used for the purpose of providing full-course meals, as defined in Title 28-A of the Maine Revised Statutes, on the premises.

Drive-through facility: A commercial facility which provides a service directly to a motor vehicle occupant and where the customer drives a motor vehicle onto the premises and to a window or mechanical device through or by which the customer is served with or without exiting the vehicle. Drive-throughs do not include major or minor auto service stations.

Drive-through features: Features associated with drive-throughs including but not limited to designated travel or stacking lanes, intercom systems, menu boards, service windows, kiosks, mechanical devices, etc.

Dwelling: A building or portion thereof used exclusively for residential occupancy, including single-family, two-family and multifamily dwellings, but not including hotels, lodging houses, sheltered care group homes or tourist homes.

Dwelling, one-family: A detached building used exclusively for occupancy by one (1) family.

Dwelling, two-family: A single building containing two dwelling units used exclusively for occupancy by two (2) families living independently of each other.

Dwelling, multifamily: A building or portion thereof containing three (3) or more dwelling units.

Dwelling unit: One (1) or more rooms with private bath and kitchen facilities comprising an independent self-contained dwelling unit.

Earth moving activity means any removal or placement, excavation, filling, stockpiling or grading of soil, earth, loam, sand, gravel, rock and other mineral deposits.

Emergency operations: Emergency operations shall include operations conducted for the public health, safety or general welfare, such as protection of resources from immediate destruction or loss, law enforcement, and operations to rescue human beings and livestock from the threat of destruction or injury.

Emergency shelter: A facility providing temporary overnight shelter to homeless individuals in a dormitory-style or per-bed arrangement.

Essential services: The construction, alteration or maintenance of gas, electrical or communication facilities; steam, fuel, electric power or water transmission or distribution lines, towers and related equipment; telephone cables or lines, poles and related equipment; gas, oil, water, slurry or other similar pipelines; municipal sewage lines, collection or supply systems; and associated storage tanks. Such systems may include towers, poles, wires, mains, drains, pipes, conduits, cables, fire alarms and police call boxes, traffic signals, hydrants and similar accessories, but shall not include service drops or buildings which are necessary for the furnishing of such services.

Fabrication: Manufacturing, excluding the refining or other initial processing of basic raw materials such as metal ores, lumber or rubber. Fabrication relates to stamping, cutting, or otherwise shaping the processed materials into useful objects.

Family: Not more than sixteen (16) individuals living together in a dwelling unit as a single nonprofit housekeeping unit. A group occupying a hotel, fraternity house or sorority house shall not be considered as a family. The family may include necessary servants.

Family amusement centers: Any structure, open to the public, which may contain coin-operated games and similar entertainment and amusement devices.

Fill. Soil, earth, loam, sand, gravel, rock and other mineral deposits.

Filling. The placement of soil, earth, loam, sand, gravel, rock and other mineral deposits. Filling shall include stockpiling

as defined herein.

Floor area: A floor space enclosed by exterior or standard fire walls, exclusive of vent shafts and courts.

Floor area ratio: The proportion of total floor area in a development to the total land area. The ratio is calculated as follows:

$$\frac{\text{8,000 square feet (total floor area)}}{\text{20,000 square feet (total land area)}} = .040 \text{ floor area ratio}$$

Foundation: The supporting substructure of a building or other structure, excluding wooden sills and post supports, but including basements, slabs, frost walls, or other base consisting of concrete, block, brick or similar material.

Freshwater wetland: Freshwater swamps, marshes, bogs and/or similar areas which are:

(a) Of ten (10) or more contiguous acres or of less than ten (10) contiguous acres and adjacent to a surface water body except for any river, stream or brook such that, in a natural state, the combined surface area is in excess of ten (10) acres or of less than ten (10) acres that is depicted on the Shoreland Zoning Map; and

(b) Inundated or saturated by surface or ground water at a frequency and for a duration sufficient to support, and which under normal circumstances do support, a prevalence of wetland vegetation typically adapted for life in saturated soils.

Freshwater wetlands may contain small stream channels or inclusions of land that do not conform to the criteria of this definition.

Gross area: Square footage of land area excluding areas of special flood hazard as defined in section 14-450.5 of this chapter.

Handicapped family unit: A dwelling which provides living facilities for handicapped persons. A handicapped family unit may

also provide counseling and support services. Staff members may also be included in the population.

Handicapped person: A person with a physical or mental impairment which substantially limits one (1) or more of such person's major life activities, a person with a record of having such an impairment, or a person who is regarded as having such an impairment. This term does not include current, illegal use of or addiction to a controlled substance as defined in 21 U.S.C. ' 802.

Health care practitioner: A professional providing medical, therapeutic or other services relating to the diagnosis, treatment or prevention of physical or psychological disabilities.

High impact industrial uses: Industrial activity involving the manufacturing, packaging, assembly, or distribution of finished products from either raw materials or previously prepared material which are generally incompatible with residential, commercial and lower impact industrial uses and sensitive natural areas due to their high generation of traffic, noise levels, emissions, lighting and odors.

Home occupation: A home occupation is a secondary and incidental use of a dwelling unit, conducted entirely within the dwelling unit by one (1) or more persons residing in the dwelling unit.

Hospital: An institution providing health services, primarily for in-patients, and medical or surgical care of the sick or injured, including as an integral part of the institution, such related facilities as laboratories, out-patient departments, training facilities, central service facilities and staff offices.

Hostel: An overnight lodging facility for transient guests that provides sleeping rooms and common areas for cooking. A hostel shall not be used as an emergency shelter. No owner operator, director, employee, shareholder, partner, corporate officer or agent of a bed and breakfast facility, hostel, hotel, inn, lodging house, motel, or tourist home (as defined by this code) may, for direct or indirect economic remuneration, arrange for or provide any housing accommodations including but not limited to long term, short term or overnight accommodations for an actual or potential guest, customer or patron of the business at any off-premises site in the City, unless such a facility is authorized, under the applicable provisions of Portland’s Land

Use Code, to offer such accommodations as a bed and breakfast, hostel, hostel, inn, lodging house, motel or tourist home.

Hotel: A building used for more or less temporary occupancy of individuals who are lodged with or without meals, having ten (10) or more guest rooms. No owner, operator, employee, shareholder, partner, corporate officer or agent of a bed and breakfast facility, hostel, hotel, inn, lodging house, motel, or tourist home (as defined in this code) may, for direct or indirect economic remuneration, arrange for or provide any housing accommodations including but not limited to long term, short term or overnight accommodations for an actual or potential guest, customer, or patron of the business at any off-premises site in the City, unless such a facility is authorized under the applicable provisions of Portland's Land Use Code, to offer such accommodations as a bed and breakfast, hotel, inn, lodging house, motel or tourist home.

Impervious surface: Means any surface which does not absorb rain and includes all buildings, roads, sidewalks, parking areas, and any area paved with bricks, concrete or asphalt.

Impervious surface ratio: The proportion of a site covered by impervious surfaces. Landscaping islands of strips of two hundred (200) square feet or less shall be included in the calculations as impervious surfaces. The ratio is calculated as follows:

$$\frac{\text{5,000 square feet (impervious surfaces)}}{\text{10,000 square feet (gross land area)}} = \text{0.50 impervious surface ratio}$$

Inaccessible area:

(a) Land which is separated from the main portion of the development parcel by means of one (1) or more of the following:

1. Existing easements, rights-of-way or dedicated areas which preclude use in conjunction with the proposed development;

2. Gullies, drainage swales or watercourses, where the land which is separated thereby from the main development parcel is not to be used for the building of units or is not available for active or

passive recreation areas; or

3. Areas which are located more than three hundred (300) feet from the nearest proposed dwelling unit.

(b) Areas which are not to be used for building purposes and are connected to the main portion of the development parcel only by a strip of land which is less than fifty (50) feet wide shall also be deducted as inaccessible areas.

Indoor amusement and recreation centers: Facilities which limit admission either to members or to persons paying an entrance fee and which offer one (1) or more of the following activities: indoor athletics, including exercise and practice facilities, or games of skill or games of chance licensed either by the city or by the State of Maine.

Inn: A building used for more or less temporary occupancy of individuals, who are lodged with or without meals, having ten (10) but no more than fifty (50) rooms. Guest rooms shall not contain separate kitchen facilities. No owner, operator, director, employee, shareholder, partner, corporate officer or agent of a bed and breakfast facility, hostel, hotel, inn, lodging house, motel, or tourist home (as defined in this code) may, for direct or indirect economic remuneration, arrange for or provide any housing accommodations including but not limited to long term, short term or overnight accommodations for an actual or potential guest, customer, or patron of the business at any off-premises site in the City, unless such a facility is authorized, under the applicable provisions of Portland's Land Use Code, to offer such accommodations as a bed and breakfast, hotel, inn, lodging house, motel or tourist home.

Intermediate care facility: A facility which provides, on a regular basis, health-related care and services to individuals who do not require the degree of care and treatment which a hospital or extended care facility is designed to provide but who, because of their mental or physical condition, require such care and services above the level of room and board. Said facility must be licensed as a board care facility pursuant to the regulations promulgated by the State of Maine Department of Human Services.

Kitchen facilities: Facilities used for the preparation of meals, including refrigerators and devices used for the cooking and

preparation of food.

Light manufacturing use: The fully enclosed assembly or fabrication of materials but excluding basic processes such as smelting, refining, distilling, forging, brewing, and similar processes involving converting raw materials to a finished or semifinished product.

Lodging house: A house, building or portion thereof containing two (2) or more rooming units and providing such units, with or without meals, to individuals on not less than a weekly or monthly basis for compensation. A lodging house, except for lodging houses located in the IR-2, IR-3 and I-B zones, shall contain common areas for use by all residents, including a kitchen. A kitchen need not be available as part of the common areas where all meals are provided on a daily basis. No owner, operator, director, employee, shareholder, partner, corporate officer or agent of a bed and breakfast facility, hostel, hotel, inn, lodging house, motel, or tourist home (as defined in this code) may, for direct or indirect economic remuneration, arrange for or provide any housing accommodations including but not limited to long term, short term or overnight accommodations for an actual or potential guest, customer, or patron of the business at any off-premises site in the City, unless such a facility is authorized, under the applicable provisions of Portland's Land Use Code, to offer such accommodations as a bed and breakfast, hotel, inn, lodging house, motel or tourist home.

Long term or extended care facility: An institution or a distinct part of an institution that is licensed or approved to provide full-time convalescent or chronic care, or health care under medical supervision for twenty-four (24) or more consecutive hours, to nine (9) or more individuals who, by reason of advanced age, illness, or infirmity are unable to care for themselves, and who are not related to the governing authority by marriage, blood, or adoption.

Lot: Except when reference is made herein to a lot of record, a lot is a single tract of land located within a single block which at the time of filing for a building permit or certificate of occupancy is designated by its owner or developer as a tract to be used, developed, or built upon as a unit under single ownership or control.

Lot area: The area of land enclosed within the boundary lines

of a lot.

Lot width: The distance parallel to the front of the building measured between side lot lines through that part of the principal building where the lot is narrowest.

Low impact industrial uses: Industrial activity involving the manufacturing, packaging, assembly, or distribution of finished products from previously prepared material, including but not limited to the following: bakeries, breweries, bottling, printing and publishing, pharmaceuticals, machine shops, precision instruments, watchmakers, musical instruments, toys and sporting goods, pottery and ceramics using only previously pulverized clay, wood products, jewelry, assembly of electrical components, canteen services, tool and die shops, and the packaging of foods. Low impact industrial uses do not include the processing of raw materials or salvaging operations. Low impact industrial uses are compatible, due to their size and nature of impact, with residential, commercial and other low impact industrial uses because of the level of traffic generated, emissions levels, lighting and odors generated.

Major auto service station: A business selling gasoline, diesel or propane fuel, with more than two (2) pump islands or with a capacity to fuel more than eight (8) vehicles simultaneously or providing repair services including, but not limited to, tune-ups, engine repair, brake work, muffler replacement, tire repair or similar activities.

Minor auto service stations: A business selling gasoline, diesel or propane fuel with not more than two (2) pump islands, provided that no more than a total of eight (8) vehicles may be fueled simultaneously. Repair services including but not limited to tune-ups, engine repair, brake work, muffler replacement, tire repair or similar activities shall be permitted provided that there shall be no more than two (2) service bays. Such businesses shall not include car washes or vacuums.

Manufactured housing: A structural unit or units designed for residential occupancy, and constructed in a manufacturing facility and then transported by the use of its own chassis or placement on an independent chassis to a building site. The term includes any type of building which is constructed at a manufacturing facility and then transported to a building site where it is utilized for housing and may be purchased or sold by a dealer in the interim.

For purposes of this article, two (2) types of manufactured housing are included. They are:

(a) Those units constructed after June 15, 1976, which the manufacturer certifies are constructed in compliance with the standards required by the United States Government Department of Housing and Urban Development, as such standards are from time to time revised or amended, meaning structures, transportable in one (1) or more sections, which in the traveling mode are fourteen (14) body feet or more in width and are seven hundred fifty (750) or more square feet, and which are built on a permanent chassis and designed to be used as dwellings, with or without permanent foundations, when connected to the required utilities, including the plumbing, heating, air-conditioning and electrical systems contained therein. This term also includes any structure which meets all the requirements of this subparagraph except the size requirements and with respect to which the manufacturer voluntarily files a certification required by the Secretary of the United States Department of Housing and Urban Development and complies with the standards established under the National Manufactured Housing Construction and Safety Standards Act of 1974, United States Code, Title 42, Section 5401 et seq.; and

(b) Those units constructed after June 15, 1976, which the manufacturer certifies are constructed in compliance with the state's Manufactured Housing Act and regulations, meaning structures, transportable in one (1) or more sections, which are not constructed on a permanent chassis and are designed to be used as dwellings on foundations when connected to required utilities, including the plumbing, heating, air-conditioning or electrical systems contained therein.

Any unit which does not fall within the definitions of this section and which is legally sited within the city on December 18, 1989, may be relocated to any location in the city in which manufactured housing is allowed.

Manufactured housing park: A parcel of land under unified ownership approved by the Planning Board under 30-A M.R.S.A. Section 4358 for the placement of single-component manufactured housing.

Manufactured housing park unit space: The area of land on which an individual home is situated within a manufactured housing park and which is reserved for use by the occupants of that home.

Manufactured housing subdivision or development: A parcel of land approved by the Planning Board under 30-A M.R.S.A. Section 4358 for the placement of single-component manufactured housing on individual owned lots.

Marina: Commercial operation providing floats, slips and piers intended primarily for berthing of noncommercial vessels and the provision of related services such as supplies, fuel, equipment and repairs, which may be provided both to tenants and non-tenants.

Military personnel berthing: A building, or portion thereof, which is primarily used as, and intended for, temporary living quarters for military personnel.

Minor business: A business with not more than two (2) pump islands, provided that no more than a total of eight (8) vehicles may be fueled simultaneously. Such businesses shall not include car washes or vacuums. Repair services shall be permitted, provided that there shall be no more than two (2) service bays.

Motel: A building or group of attached or detached buildings containing guest rooms or dwelling units most of which have separate outside entrances and parking space hereby intended to be used principally by automobile transients for compensation. Motels include tourist courts, motor lodges or cabins. No owner, operator, director, employee, shareholder, partner, corporate officer or agent of a bed and breakfast facility, hostel, hotel, inn, lodging house, motel, or tourist home (as defined in this code) may, for direct or indirect economic remuneration, arrange for or provide any housing accommodations including but not limited to long term, short term or overnight accommodations for an actual or potential guest, customer, or patron of the business at any off-premises site in the City, unless such a facility is authorized, under the applicable provisions of Portland's Land Use Code, to offer such accommodations as a bed and breakfast, hotel, inn, lodging house, motel or tourist home.

Multiple-component manufactured housing: Manufactured housing which is constructed and transported in two (2) or more sections of substantially similar size that must be mated to form a habitable

dwelling. For purposes of planned residential unit development and multiplex development, multiple-component manufactured housing shall be considered a dwelling unit.

Nanotechnology: The creation of functional materials, devices and systems through control of matter on the nanometer scale.

Neighborhood Center: A building or portion of a building used for recreational, artistic, social, educational, health, culture, or similar activities and services, usually owend and operated by a public or nonprofit group or agency. A neighborhood center is 10,000 square feet or less.

Net land area: Net land area, as set forth in sections 14-90, 14-120 and 14-130 of this article, shall be calculated by subtracting from gross area the square footage of the following:

(a) 1. Stormwater retention areas;

2. Stormwater detention areas, unless improved for passive or active recreational use;

(b) Existing watercourses, as defined in this section, measured by the area between the top of the banks at the normal high water mark, as defined in this section.

(c) Inaccessible areas, as defined in this section;

(d) Wetlands, as defined in this section;

(e) Areas encumbered by existing easements, dedications or similar restrictions, which limit or preclude the construction of permanent structures or which are for any reason unavailable for use in connection with the proposed development.

(f) Slopes of twenty-five (25) percent or greater. Where a slope of twenty-five (25) percent or greater was altered to less than twenty-five (25) percent within the two (2) years immediately preceding the submission of the application for development, such slope shall also be subtracted from the gross area;

(g) Twenty (20) percent of the area remaining after the deductions of factors (1) through (6) of this definition.

Noncommercial vessel berthing: The use of berthing space for berthing of watercraft other than commercial vessels. Berthing space used in the following manner shall not be counted in computing the number of linear feet under this use category:

(a) Space used principally for sale or repair of vessels;

(b) Commercial vessel tenant space used by a noncommercial vessel for a period not exceeding ten (10) consecutive days while the primary commercial vessel tenant is conducting its business or trade.

Normal high water line (non-tidal waters): That line which is apparent from visible markings, changes in the character of soils due to prolonged action of the water or changes in vegetation, and which distinguishes between predominantly aquatic and predominantly terrestrial land. Areas contiguous with rivers that support non-forested wetland vegetation and hydric soils and that are at the same or lower elevation as the water level of the river during the period of normal high-water are considered part of the river.

Normal high water mark of coastal waters: That line on the shore of tidal waters reached by the shoreward limit of the rise of the medium tides between the spring and the neap.

Normal high water mark of inland waters: That line on the shores and banks of non-tidal waters which is apparent because of the contiguous different character of the soil or the vegetation due to the prolonged action of the water. Relative to vegetation, it is that line where the vegetation changes from predominantly aquatic to predominantly terrestrial (by way of illustration, aquatic vegetation includes but is not limited to the following plants and plant groups--water lily, pond lily, pickerelweed, cattail, wild rice, sedges, rushes, and marsh grasses; and terrestrial vegetation includes but is not limited to the following plants and plant groups--upland grasses, aster, lady slipper, wintergreen, partridge berry, sarsaparilla, pines, cedars, oaks, ashes, alders, elms and maples). In places where the shore or bank is of such character that the high water mark cannot be easily determined (rockslides, ledges, rapidly eroding or sloping banks), the normal high water mark shall be estimated, from places where it can be determined by the above method.

Office complex: Separate office buildings planned, constructed

or managed on an integrated coordinated basis.

On-peninsula: Includes all land located south of I-295.

Off-peninsula: Includes all land located north of I-295.

Personal service: Establishments engaged in providing services involving the care of the person or his apparel, such as laundries, dry cleaning establishments, photographic studios, beauty and barber shops but not including commercial or industrial laundries.

Piers, docks, wharves, bridges and other structures and uses extending over or beyond the normal high water line or within a wetland:

(a) *Temporary:* Structures which remain in or over the water for less than seven (7) months in any period of twelve (12) consecutive months.

(b) *Permanent:* Structures which remain in or over the water for seven (7) months or more in any period of twelve (12) consecutive months.

Place of assembly: A building or portion of a building used as a community hall, neighborhood center, private and fraternal organization or place of religious assembly. This definition shall not include buildings or portions of buildings used as a community hall, neighborhood center, private and fraternal organization or place of religious assembly where fifteen (15) or fewer people, not including the permanent residents of a single family dwelling, assemble.

Place of religious assembly: A building or portion of a building used for religious worship or instruction including, but not limited to, churches, synagogues, masjids, mosques and other places of worship.

Pre-development grade. Pre-development grade is defined as average grade, existing on October 1, 2000, at the corners of the foundation of the proposed structure.

Principal building: The building occupied by the chief or principal use on the premises. When a garage is attached to the principal building in a substantial manner as by a roof or common wall, it shall be considered as a part of the principal building.

Private club or nonprofit social and recreational facility: A private club, or nonprofit social and recreational facility, is open exclusively to members and to their bona fide guests accompanying them, in order to promote fellowship, social living, proper recreation, civic responsibility, neighborhood responsibility, community welfare or other endeavors. It shall be permissible to serve food and meals on such premises provided adequate dining room space and kitchen facility are available and are provided within all regulations of this article and other applicable codes and ordinances.

Processing: Any operation changing the nature of material or materials such as chemical composition or physical qualities. Does not include operations described as fabrication.

Professional office: The office of a doctor, dentist, optometrist, psychologist, accountant, lawyer, architect, engineer or similar professional.

Recent flood plain soils: Recent flood plain soils include the following soil series as described and identified by the National Cooperative Soil Survey:

Alluvial	Medomak
Charles	Ondawa
Cornish	Podunk
Fryeburg	Rumney
Hadley	Saco
Limerick	Suncook
Lovewell	Winooski

Recreation facilities: Any establishment designed or equipped for the conduct of sports or indoor leisure-time recreational

activities.

Registered medical marijuana dispensary: "Registered medical marijuana dispensary" or "dispensary" means a not-for-profit entity registered under 22 M.R.S.A. section 2428 that acqueris, possesses, cultivates, manufactures, delivers, transfers, transports, sells, supplies or dispenses marijuana or related supplies and educational materials to registered patients who have designated the dispensary to cultivate marijuana for their medical use, and the registered primary caregivers of those patients.

Registered medical marijuana cultivation facility: "Registered medical marijuana cultivation facility" means a facility registred under 22 M.R.S.A. section 2428 that cultivates and manufactures marijuana or related supplies for a "registered medical marijuana dispensary" under common management and operating under the same state and local license(s).

Restaurant: Any food service establishment, as defined by section 11-16 of this Code, with indoor seating capacity for ten (10) or more patrons.

Retail: Sale to the ultimate consumer for direct consumption and not for resale; however, retail, combined with gasoline, diesel or propane fuel sales shall be considered a single use for zoning purposes and shall constitute a major or minor auto service station.

Retail establishment: Means (1) any food service establishment as defined by section 11-16 of this Code, with indoor seating capacity for nine (9) or fewer patrons; or (2) any shop or store offering goods or merchandise to the general public for direct consumption and not for resale, but does not include temporary freestanding stands in either case; however, retail establishments combined with gasoline, diesel or propane fuel sales shall be considered a single use for zoning purposes and shall constitute a major or minor auto service station.

Rooming unit: A room or suite of rooms in a house, building or portion thereof rented as living and sleeping quarters, but without full kitchens or bathrooms. In a suite of rooms, each room which provides sleeping accommodations shall be counted as one (1) rooming unit for the purpose of this article. Each rooming unit in a lodging house shall have kitchen privileges unless all meals are provided on a daily basis. There shall be no more than two (2)

persons residing in each rooming unit.

Self-storage facility: Fully enclosed buildings with individual, secured units (accessed with or without supervision) used for the exclusive purpose of storage of non-hazardous business or personal materials.

Setback: The required distance and the land resulting therefrom between a street line and the closest possible line of conforming structure.

Sheltered care group home: A facility which, in addition to providing food and shelter to a defined population, provides guidance or counseling services. Such services are a primary function of the facility.

Shore frontage: The length of a lot bordering on a water body or wetland measured in a straight line between the intersections of the lot lines with the shoreline.

Shoreland zone: The land area located within two hundred fifty (250) feet, horizontal distance, of the normal high water line of any river; within two hundred fifty (250) feet, horizontal distance, of the upland edge of a coastal wetland, including all areas affected by tidal action; within 250 feet of the upland edge of freshwater wetland; or within seventy-five (75) feet, horizontal distance, of the normal high water line of a stream.

Sign: Signs shall be as defined in section 14-367.

Single-component manufactured housing: Manufactured housing which is constructed and transported in one (1) section that is a habitable dwelling unit. For purposes of planned residential unit development and multiplex development, single-component manufactured housing shall not be considered a dwelling unit, except in the FH Flexible Housing Zone.

Special needs independent living unit: A dwelling unit developed and managed by a nonprofit organization for habitation by persons with special social, physical or mental needs beyond strictly economic needs. Such persons shall be provided required levels of supervision, care and/or counseling services appropriate to their special needs, and the services shall be provided by either the sponsoring nonprofit agency or through another entity with which the agency has entered into a contractual arrangement.

Sports complex: One or more facilities located on the same parcel of land where athletic events are held and with a combined seating capacity of at least six thousand (6,000) seats.

Stockpiling. Any placement or creation of piles or loads of soil, loam, sand, gravel, rock or other mineral deposits upon a site for the purpose of storage, warehousing or reserving for future use. Stockpiles shall be considered structures for purposes of dimensional requirements under the Land Use Code.

Stormwater detention area: A storage area for the temporary storage of stormwater runoff which does not contain water during non-storm conditions.

Storm water retention area: A pond or basin used for the permanent storage of stormwater runoff.

Story: That portion of a building included between the surface of any floor and the surface of the floor, or the roof, next above. A half story is a story situated under a sloping roof, the area which at a height four (4) feet above the floor does not exceed two-thirds of the floor area of the story immediately below it and which does not contain an independent apartment or dwelling unit. A story which exceeds eighteen (18) feet in height shall be counted as two (2) stories. A basement shall be counted as a story for the purpose of height measurement where more than one-half of its height is above the average level of the adjoining ground.

Stream: A free-flowing body of water from the outlet of the confluence of two (2) perennial streams as depicted on the most recent edition of a United States Geological Survey 7.5-minute series topographic map, or if not available, a 15-minute series topographic map, to the point where the body of water becomes a river or flows to another water body or wetland within a shoreland area, or any stream designated within a Stream Protection Zone.

Street: A public way established by or maintained under public authority, or a way dedicated to the use of the public and appearing on the official map of the city.

Street line: The line of demarcation between a street and the abutting land.

Structure: Anything constructed or erected of more than one

(1) member which requires a fixed location on the ground or attached to something having a fixed location on the ground.

Studios for artists and craftspeople: A facility for the production of arts and crafts products such as paintings, sculpture or other arts, or the practice of arts such as music or dance, or the production of custom handcrafted, or limited production of products such as furniture, wood, clay and metal products, publications and similar low impact arts and crafts activities.

Temporary wind anemometer tower: A temporary structure which may be installed for no more than two (2) years for data collection purposes and which supports devices for measuring wind speed, direction and other characteristics to assess wind energy potential and design issues for any permanent wind energy installation; often termed "meteorological towers" or "met towers".

Theaters: Any establishment devoted to showing motion pictures, or for dramatic, musical or live performances.

Tourist home: A building in which more than one (1) but not more than nine (9) guest rooms are used to provide or offer overnight accommodations for transient guests. No owner, operator, director, employee, shareholder, partner, corporate officer or agent of a bed and breakfast facility, hostel, hotel, inn, lodging house, motel, or tourist home (as defined in this code) may, for direct or indirect economic remuneration, arrange for or provide any housing accommodations including but not limited to long term, short term or overnight accommodations for an actual or potential guest, customer, or patron of the business at any off-premises site in the City, unless such a facility is authorized, under the applicable provisions of Portland's Land Use code, to offer such accommodations as a bed and breakfast, hotel, inn, lodging house, motel or tourist home.

Transient guest: A person who occupies a facility offering accommodations on an overnight basis for compensation and whose actual occupancy is limited to no more than fifteen (15) days out of any sixty-day period.

Tributary stream: means a channel between defined banks created by the action of surface water, which is characterized by the lack of terrestrial vegetation or by the presence of a bed, devoid of topsoil, containing waterborne deposits or exposed soil, parent material or bedrock; and which is connected hydrologically

with other water bodies. "Tributary stream" does not include rills or gullies forming because of accelerated erosion in disturbed soils where the natural vegetation cover has been removed by human activity.

Truck terminal: A building and premises devoted to handling and temporary warehousing of goods, which may include facilities for the maintenance and repair (except body repairs, frame straightening and painting), fueling and storage of trucks or tractor-trailer combinations.

Upland edge of a wetland: the boundary between upland and wetland. For purposes of a coastal wetland, this boundary is the line formed by the landward limits of the salt tolerant vegetation and/or the maximum spring tide level, including all areas affected by tidal action. For purposes of a freshwater wetland, the upland edge is formed where the soils are not saturated for a duration sufficient to support wetland vegetation; or where the soils support the growth of wetland vegetation but such vegetation is dominated by woody stems that are six (6) meters approximately.

Use: The purpose for which land or structures thereon is designed, arranged or intended to be occupied or used, or for which it is occupied, maintained, rented or leased.

Utility substation: Any sewage or water pumping station, electric power substation, transformer station, telephone equipment enclosures, or other similar structures owned or operated by a public utility.

Vegetation: All live trees, shrubs, ground cover, and other plants including, without limitation, trees both over and under four (4) inches in diameter, measured at four and one-half (4 1/2) feet above ground level.

Warehousing: The storage of goods, wares and merchandise in a warehouse.

Water body: Any river or stream.

Watercourse: Any natural or artificial stream, river, creek, ditch, channel, swale, canal, conduit, culvert, drain, waterway, gully, ravine or wash in which water flows in a definite direction or course, either continuously or intermittently, or which has a definite channel, bed and banks, and includes any area adjacent

thereto subject to inundation by reason of overflow or floodwater.

Water-dependent uses: Those uses that require, for their primary purpose, location on submerged lands or that require direct access to, or location in, coastal or inland waters and which cannot be located away from these waters.

Wetlands associated with shoreland zones: a freshwater or coastal wetland.

Wetlands: Those areas which have two (2) or more of the following:

(a) A water table at or near the surface during the growing season;

(b) Very poorly drained soils, including Sebago mucky peat; or

(c) Obligate wetland vegetation.

For purposes of this definition, "very poorly drained soils" and "obligate wetland vegetation" shall be as defined and illustrated in the United States Department of Interior, Fish and Wildlife Service publication of Wetland Plants of the State of Maine (1986), a copy of which is on file with the planning authority.

Wholesale: Sale for resale, not for direct consumption.

Yard: A space on a lot which is required by this article to be maintained open, unoccupied and unobstructed between lot lines and any structure, except as permitted in this article. In determining the front, rear or side of any accessory building, the orientation of the principal building shall be controlling. In measuring a yard, the building line shall be deemed to mean a line parallel to the lot line drawn through the point of a building or the point of a group of buildings nearest to such lot line. This measurement shall be taken at right angles from the building to the nearest lot line.

Yard, front: A yard adjoining the front lot line, extending between side lot lines, the depth of which shall be the shortest horizontal distance between the front lot line and any structure.

Yard, rear: A yard adjoining the rear lot line, extending

between side lot lines, the depth of which shall be the shortest horizontal distance between the rear lot line and any structure.

Yard, side: A yard adjoining a side lot line extending from the front yard to the rear yard, the width of which shall be the shortest horizontal distance between the side lot line and any structure.

(Code 1968, § 602.27; Ord. No. 625-70, 12-21-70; Ord. No. 499-74, § 11, 8-19-74; Ord. No. 276-77, 5-16-77; Ord. No. 431-82, §§ 3, 4, 2-22-82; Ord. No. 610-82, § 3, 7-7-82; Ord. ***Editor's note--**Ord. No. 87-88, adopted July 19, 1988, amended the definitions for gross area, intermediate care facility and principal building to read as herein set out and added definitions for net land area, stormwater detention area and stormwater retention area. The definition of net land area was subsequently amended by Ord. No. 129-88, adopted Sept. 7, 1988, to read as herein set out. See the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 87-88.

The amendments passed in Order 144-05/06, 1-4-06 applies retroactively to yard measurements made under the Portland Land Use Code at any time after June 5, 1957, and applies notwithstanding any adverse order or decree.

Cross reference(s)--Definitions and rules of construction generally, § 1-2.

Sec. 14-48. Establishment of zones.

In order to carry out the provisions of this article, the city is hereby divided into the following classes of zones:

(a) R-1 Residential zone

(b) R-2 Residential zone

(c) R-3 Residential zone

(d) FH Flexible housing zone

(e) R-4 Residential zone

(f) R-5 Residential zone

(g) R-5A Residential zone

(h) R-6 Residential zone

(i) R-7 Residential zone

(j) IR-1 Island residential zone

(k) IR-2 Island residential zone

(l) IR-3 Island residential zone

(m) Island transfer station overlay zone

(n) R-P Residence-professional zone

(o) R-OS Recreation and open space zone

(p) B-1 and B-1b Neighborhood business zones

(q) B-2 and B-2b Community business zone

(r) A-B Airport business zone

(s) B-3, B-3b and B-3c downtown business zones

(t) I-B Island business zone

(u) B-4 Commercial corridor zone

(u-1) B-5 Urban commercial mixed use zone

(v) O-P Office park zone

(w) I-L and I-Lb Industrial zones

(x) I-M, I-Ma and I-Mb Industrial zones

(y) I-H and I-Hb Industrial zones

(z) B-6 Eastern Waterfront Mixed Zone

(aa) Reserved

(bb) Waterfront central zone

(cc) Waterfront port development zone

(dd) Waterfront special use zone

(ee) R-P Resource protection zone

(ff) Helistop overlay zone

(gg) Shoreland zone

(hh) Flood plain

(ii) S-P Stream protection zone.

(Code 1968, § 602.1.B; Ord. No. 499-74, § 1, 8-19-74; Ord. No. 536-74, § 1, 8-19-74; Ord. No. 334-76, § 1, 7-7-76; Ord. No. 15-92, § 2, 6-15-92; Ord. No. 101-93, 9-20-93; Ord. No. 164-97, § 2, 1-6-97; Ord. No. 156-01, §1, 1-17-01)

***Editor's note--**Although not expressly amended by the ordinances enacted subsequent to 1976 which created the several classes of zones, § 14-48 has been expanded to encompass all zoning classifications in the city at the discretion of the editor in consultation with the corporation counsel.

Sec. 14-49. Zoning maps.

The zones in section 14-48 are shown upon a map entitled "City of Portland, Maine, Zoning, dated December 2000 and produced by the City of Portland's Department of Planning and Urban Development and the GIS Workgroup" and filed in the office of the Director of Planning and Urban Development, City of Portland, Maine. Such zoning map, with amendments, is hereby adopted as the official zoning map of the City of Portland and as part of this article and incorporated in and made a part of this article.

(Code 1968, § 602.1.C; Ord. No. 213-84, 10-1-84; Ord. No. 15-92, § 3, 6-15-92; Ord. No. 156-01, §2, 1-17-01)

Sec. 14-50. Zone boundaries when uncertain.

Where uncertainty exists with respect to the boundaries of the various zones, as shown on the zoning maps, the following rules shall apply:

(a) Unless otherwise indicated, zone boundary lines are the center lines of streets, alleys, parkways, waterways or rights-of-way of public utilities and railroads or such lines extended. Unless otherwise shown, lines within blocks less than two hundred (200) feet wide are median lines between their sides, and lines within blocks two hundred (200) feet or more wide are one hundred (100) feet distant from the less restricted side of the block.

(b) The depictions of the shoreland zoning districts and stream protection districts on the Shoreland Zoning Maps are illustrative of the general location of such zones. The actual boundaries of these zones shall be determined by measurement of the distance indicated on the maps from the normal high water line of the water body or the upland edge of wetland vegetation. Where such measurement is not the same as the location of the boundary on the Shoreland Zoning Maps, the measurement shall control, unless the Shoreland Zoning Map indicates that the zone boundary shall follow an existing property line.

(Code 1968, § 602.20.A; Ord. No. 15-92, § 4, 6-15-92)

Sec. 14-51. Extension of zone lines.

Where a zone boundary line divides a lot in single or joint ownership of record at the time such line is established, the provisions of this article for the less restricted portion of such lot shall extend not more than thirty (30) feet into the more restricted portion, provided that the lot has at least twenty (20) feet of street frontage in the less restricted zone when taken together with adjacent premises which are under the same or equivalent ownership or control. If such boundary line divides a business or industrial zone from a residence zone, no frontage on a street other than the principal business street in the less restricted zone may be taken into consideration in connection with the right herein granted. This section shall not apply to differing dimensional requirements, including height, within a zoning district.

(Code 1968, § 602.20.B; Ord. No. 35-89, 6-28-89)

Sec. 14-52. Conformity required.

No building or structure shall be erected, altered, enlarged, rebuilt, moved or used, and no premises shall be used unless in conformity with the provisions of this article.
(Code 1968, § 602.1.D)

Sec. 14-53. Minimum requirements established.

In interpreting and applying the provisions of this article, they shall be held to be minimum requirements for the promotion of health, safety, convenience and welfare of the citizens of the city; for reducing the danger from fires; and for improving the city.
(Code 1968, § 602.1.E)

Sec. 14-54. Zone change/zone map fees.

(a) One or more of the following fees will be charged by the city for applications for changes of zone according to the following major zoning classifications and pertinent data relating to the specific zone change:

(1) Zoning Map Amendments: $2,000.00

(2) Zoning Text Amendments: $2,000.00

(3) Combination Zoning Map and Text Amendments: $3,000

(4) Conditional Rezoning: $3,000.00

(5) Applicant shall pay afee to cover the professional and administrative costs for review and analysis associated with the zoning amendment, including but not limited to planning, legal, engineering or other services. The fee shall be based on the hours of review and processing time and prevailing hourly rate for reimbursement of city costs. The city shall periodically invoice the applicant for such costs incurred by the city, which invoice shall be paid promptly by the applicant.

(6) Applicant shall assume payment of cost of all notices, including newspaper publication.

All ordinances that would cost more than the maximum to publish should be printed in separate pamphlet form and advertised only by reference.

(7) ***Waiver of fees:*** The fee for zone change applications may be waived or reduced by the Planning Authority in the case of an application submitted by any governmental body or where an applicant can establish financial hardship.

(8) ***Withdrawal of application:*** If a zone change application is withdrawn by an applicant prior to the submission of the advertisement copy to the newspaper to announce the public hearing, a refund of one-half of the amount of the application fee will be made to the applicant by the city provided that all costs incurred by the city have been paid in full by the applicant.

(b) The following schedule of fees will be charged by the City for zone maps:

Paper maps:	Large $20.00 per sheet	Small (11X17) $5.00 per sheet
Digital Zone Map	$20.00	

(Code 1968, § 602.1.F; Ord. No. 589-75, § 1, 10-20-75; Ord. No. 590-75, § 1, 11-19-75; Ord. No. 693-81, 5-18-81; Ord. No. 523-87, 5-18-87; Ord. No. 327-98, § 2, 5-18-98; Ord. No. 328-98, § 1, 5-18-98; Ord. No. 227-00, §1, 5-15-00; Ord. No. 119-01/02, § 2, 12-3-01; Ord. No.222-09/10, 5-17-10)

Sec. 14-55. Relation to other ordinances.

This article shall not repeal the provisions of any other ordinance relating to the use of buildings or premises; provided, however, that where this article imposes greater restrictions, it shall control.
(Code 1968, § 602.26.A)

Sec. 14-56. Enforcement.

The building authority is authorized to institute or cause to be instituted by the corporation counsel in the name of the city any and all actions, legal or equitable, that may be appropriate or necessary for the enforcement of this article; provided, however, that this section shall not prevent any person entitled to equitable relief from enjoining any act contrary to the provisions of this article.
(Code 1968, § 602.26.C)

Sec. 14-57. Violations.

Any person being the owner or occupant of, having control of or the use of any building or premises or part thereof, who violates any of the provisions of this article, shall be guilty of an offense.
(Code 1968, § 602.26.D; Ord. No. 157-76, 4-21-76)

Sec. 14-58. Reserved.
Sec. 14-59. Reserved.

DIVISION 1.5. CONDITIONAL OR CONTRACT ZONING

Sec. 14-60. Authority and purpose.

Pursuant to 30-A M.R.S.A. Section 4503(9), conditional or contract zoning is hereby authorized for rezoning of property where, for reasons such as the unusual nature or unique location of the development proposed, the city council finds it necessary or appropriate to impose, by agreement with the property owner or otherwise, certain conditions or restrictions in order to ensure that the rezoning is consistent with the city's comprehensive plan. Conditional or contract zoning shall be limited to where a rezoning is requested by the owner of the property to be rezoned. Nothing in this division shall authorize either an agreement to change or retain a zone or a rezoning which is inconsistent with the city's comprehensive plan.
(Ord. No. 31-85, 7-15-85; Ord. No. 88-88, 7-19-88; Ord. No. 62-89, 7-17-89)

Sec. 14-61. Notice and hearing.

The Planning Board shall conduct a public hearing prior to any property being rezoned under this division. Notice of this hearing shall be posted in the city clerk's office at least fourteen (14) days prior to the public hearing and shall be published in a newspaper of general circulation within the city at least two (2) times, the date of the first publication to be at least seven (7) days prior to the hearing. Notice shall also be sent to the owners of all property abutting the property to be rezoned at their last known address. This notice shall contain a copy of the proposed conditions and restrictions, with a map indicating the property to be rezoned.
(Ord. No. 31-85, 7-15-85)

Sec. 14-62. Conditions and restrictions.

Conditions and restrictions imposed under the authority of this division shall relate only to the physical development and operation of the property and may include, by way of example:

(a) Limitations on the number and types of uses permitted;

(b) Restrictions on the scale and density of development;

(c) Specifications for the design and layout of buildings and other improvements;

(d) Schedules for commencement and completion of construction;

(e) Performance guarantees securing completion and maintenance of improvements, and guarantees against defects;

(f) Preservation of open space and buffers, and protection of natural areas and historic sites;

(g) Contributions toward the provision of municipal services required by the development; and

(h) Provisions for enforcement and remedies for breach of any condition or restriction.

(Ord. No. 31-85, 7-15-85)

Sec. 14-63. Amendments.

Except as expressly modified in any contract or conditional rezoning agreement, the use and occupancy of any property within the City of Portland used or occupied pursuant to a contract or conditional rezoning agreement otherwise shall be governed by and comply with the provisions of the Land Use Code of the City of Portland and any applicable amendments thereto or replacement thereof.

(Ord. No. 96-04/05, 11-29-04)

Sec. 14-64. Reserved.

Sec. 14-65. Enforcement.

Notwithstanding language in any contract or conditional zoning to the contrary, any violation of a conditional or contract zone shall be enforced pursuant to 30-A M.R.S.A. §4452, as may be amended from time to time, or in any other manner available by law. No alleged violation of a contract or conditional rezoning may be prosecuted until the City has delivered written notice of the alleged violation(s) to the owner or operator of the property that is subject to the contract or conditional rezoning and given the owner or operator an opportunity to cure the violation(s) within thirty (30) days of receipt of the notice.

In addition, if such an enforcement action should result in a finding that the terms of the conditional or contract zone have been violated, then the City may act to modify or rescind the conditional or contract zone and to rezone the property.
(Ord. No. 96-04/05, 11-29-04)

DIVISION 2. R-1 RESIDENTIAL ZONE*

***Editor's note--**Ord. No. 532-84, adopted May 7, 1984, repealed Div. 2, s;§ 14-66--14-69, and enacted a new Div. 2, §§ 14-66--14-71. The division was formerly derived from Code 1968, § 602-2.2A--D; Ord. No. 499-74, § 2, adopted Aug. 19, 1974; Ord. No. 610-82, § 1, adopted July 7, 1982; and Ord. No. 88-83, §§ 1, 2, adopted Aug. 3, 1983.

Sec. 14-66. Purpose.

The purpose of the R-1 residential zone is:

> To provide for lower density residential development characterized by single-family homes on individual lots in outlying areas of the city and along traffic corridors with limited additional traffic capacity.

(Ord. No. 532-84, 5-7-84)

Sec. 14-67. Permitted uses.

The following uses are permitted in the R-1 residential zone:

(a) *Residential:*

1. Single-family detached dwellings.

2. Handicapped family unit, as defined in section

14-47 (definitions) of this article, for handicapped persons plus staff.

3. Single-family, multiple-component manufactured housing, as defined in section 14-47 (definitions) of this article, except in a National Register Historic District.

4. Single-family, single-component manufactured housing, as defined in section 14-47 (definitions) of this article, on individual lots under separate and distinct ownership, except in a National Register Historic District and until May 1, 1985, on the islands, provided that each unit meets the performance standards listed below:

   a. More than half of the roof area of each unit shall be a double pitched Class C rated shingled roof with a minimum pitch of 3/12.

   b. Each unit shall be installed on a full foundation or a concrete frost wall in accordance with all applicable codes and regulations. Any hitch or tow bar shall be removed from the unit after it is placed on its foundation or frost wall. In the case of a frost wall, vermin proof skirting shall be installed on all sides of the unit. The skirting may consist of either (a) concrete or masonry block or (b) manufactured skirting. If concrete or masonry block skirting is installed, either the exterior siding of the unit shall extend within one (1) foot of grade or decorative masonry siding shall be applied. If manufactured skirting material is installed, the color shall be identical to or compatible with the exterior siding of the unit.

   c. Each unit shall have exterior siding that is residential in appearance, including but not limited to natural materials such as wood clapboards or shakes, or exterior materials which simulate wood. Clapboards or simulated clapboards shall have less then eight (8)

inches of exposure and sheet metal type siding shall not be permitted.

d. Each unit shall have the long side of the unit parallel to the street line where the required street frontage is met.

e. Each unit shall be provided with at least two (2) trees meeting the city's arboricultural specifications and which are clearly visible from the street line and are located so as to visually widen the narrow dimension or proportion of the unit.

f. Each unit shall have all fuel oil supply systems constructed and installed within the foundation wall or underground in accordance with all applicable codes and regulations.

g. No unit shall be horizontally or vertically attached to any other unit or other structure, provided, however, that this provision shall not be deemed to prohibit additions such as porches, garages, room additions or solar greenhouses.

(b) *Other:*

1. Agriculture, including nurseries, greenhouses, and truck gardens, provided that there is no sale of products not produced on the premises; a single stand with no more than two hundred (200) square feet in floor area, for the sale of agricultural products produced on the premises shall be permitted;

2. Parking and storage of agricultural equipment used on the premises, but not within any front yard;

3. Reserved;

4. Parks and other active and passive noncommercial recreation spaces;

5. Accessory uses customarily incidental and

subordinate to the location, function and operation of principal uses, subject to the provisions of section 14-404 (accessory use) of this article;

6. Home occupations subject to the provisions of section 14-410 (home occupation) of this article;

7. Municipal uses, excluding those specifically set forth in section 14-68 of this division.

8. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 532-84, 5-7-84; Ord. No. 260-84, § 1, 12-17-84; Ord. No. 34-85, § 1, 7-15-85; Ord. No. 79-88, § 1, 7-19-88; Ord. No. 86A-89, § 1, 8-21-89; Ord. No. 33-91, § 2, 1-23-91; Ord. No.33-11/12, 1-18-12)

***Editor's note--**Ord. No. 79-88, adopted July 19, 1988, amended this section by adding subsection 14-67(2)g. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 79-88.

Sec. 14-68. Conditional uses.

The following uses are permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) of this article and any special provisions, standards or requirements specified below:

(a) *Residential:*

1. Sheltered care group homes, as defined in section 14-47 of this article, for up to twelve (12) individuals, plus staff, and serving a primary population which is not handicapped persons, parolees, persons involved in correctional prerelease programs, or current illegal drug users, provided that:

   a. A sheltered care group home shall not be located within five hundred (500) feet of another, as measured along street lines to the respective property lines;

   b. There shall be no open outside stairways or fire escapes above the ground floor;

c. The facility shall make provision for adequate on-site staffing in accordance with applicable state licensing requirements. If a facility is not licensed by the state, there shall be a minimum of one (1) staff person for every ten (10) residents or fraction thereof.

The board of appeals may impose conditions upon a conditional use permit concerning the creation or operation of a sheltered care group home including but not limited to the following: site and building maintenance; lighting, fencing, and other appropriate security measures; screening and buffering of parking areas; compatibility of any additions or alterations with the existing residential structure; compatibility of new structures with the architectural character of the surrounding area; and limitation on the duration of a sheltered care group home permit.

2. Alteration or construction of a single-family detached dwelling to accommodate an accessory dwelling unit within the building and clearly subordinate to the principal dwelling for the benefit of homeowners or tenants provided that:

a. The accessory unit shall be no more than thirty (30) percent of the gross floor area of the principal building and shall have a minimum floor area of four hundred (400) square feet; gross floor area shall exclude any floor area that has less than two-thirds of its floor-to-ceiling height above the average adjoining ground level; gross floor area may include attic space if such space shall be included as habitable space within either dwelling unit;

b. Lot area shall be ten thousand (10,000) square feet for single-family dwellings in existence as of May 1, 1984, and lot area shall be fifteen thousand (15,000) square feet for single-family dwellings constructed after May 1, 1984;

c. There shall be no open, outside stairways or fire escapes above the ground floor;

d. Any additions or exterior alterations such as facade materials, building form, roof pitch, and exterior doors shall be designed to be compatible with the architectural style of the building and preserve the single-family appearance of the building;

e. The project shall be subject to article V (site plan) of this chapter for site plan review and approval and the following additional standards:

i. Any additions or exterior alterations, such as façade materials, building form and roof pitch shall be designed to be compatible with the architectural style of the building and preserve the single-family appearance of the building.

ii. The scale and surface area of parking, driveways and paved areas shall be arranged and landscaped to properly screen vehicles from adjacent properties and streets.

f. Either the accessory unit or the principal dwelling shall be occupied by the owner of the lot on which the principal building is located, except for bona fide temporary absences; and

g. Parking shall be provided as required division 20 of this article.

(b) ***Institutional:*** Any of the following conditional uses provided that, notwithstanding section 14-474(a) (conditional uses) of this article or any other provision of this Code, the Planning Board shall be substituted for the board of appeals as the reviewing authority:

1. Elementary, middle, and secondary school;

2. a. Long-term and extended care facilities;

b. Intermediate care facility for thirteen (13) or more persons;

3. Places of assembly;

Such uses shall be subject to the following conditions and standards in addition to the provisions of section 14-474:

a. In the case of expansion of existing such uses onto land other than the lot on which the principal use is located, it shall be demonstrated that the proposed use cannot reasonably be accommodated on the existing site through more efficient utilization of land or buildings, and will not cause significant physical encroachment into established residential areas; and

b. The proposed use will not cause significant displacement or conversion of residential uses existing as of June 1, 1983, or thereafter; and

c. In the case of a use or use expansion which constitutes a combination of the above-listed uses with capacity for concurrent operations, the applicable minimum lot sizes shall be cumulative; and

d. Article V (site plan) sections 14-522 and 14-523 notwithstanding, in the case of places of assembly the proposed use shall be subject to the requirements of article V (site plan) of this chapter; and

e. In the case of community halls:

i. The structure was in existence as of January 4,2010;

ii. The structure was built for institutional

or other non-residential uses;

iii. The structure is operated by, or operated subject to the control of, a not-for-profit entity in accordance with its not-for-profit purposes; and

iv. A parking management plan is submitted for review and approval by the planning board; and

f. In the case of private club or fraternal organizations: any such establishment serving alcoholic beverages or in possession of a license for serving alcoholic beverages shall be located on a large lot, as specified in the minimum lot size provisions of this division.

(c) *Other:*

1. Utility substations, including sewage and water pumping stations and standpipes, electric power substations, transformer stations, telephone electronic equipment enclosures, and other similar structures, provided that such uses are suitably screened and landscaped so as to ensure compatibility with the surrounding neighborhood;

2. Cemeteries;

3. Raising of domestic animals, excluding pigs and reptiles, for noncommercial purposes with no animals kept on any lot less than three (3) acres or closer than one hundred (100) feet to any street or lot line, except domesticated chickens as regulated in Chapter 5, and provided that:

a. The housing, feeding, exercise, and waste disposal areas of the animals will not create undue odor, noise, nuisance, health, or safety hazards to neighboring properties.

4. Day care facilities or home babysitting services not permitted as a home occupation under section 14-410, and nursery schools and kindergartens,

subject to the following conditions:

a. The facility shall be located in a structure in which there is one (1) or more occupied residential units or in an existing accessory structure, unless the facility is located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use, a nursery school or a kindergarten, or in a nonresidential structure accessory to the principal nonresidential use.

b. The maximum capacity shall be twelve (12) children for facilities located in residential or existing structures accessory thereto, unless the additional standards in subsection v. are met. There shall be no maximum limit on the number of children in a facility located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use, a nursery school or a kindergarten, or in a nonresidential structure accessory thereto, provided that any such structure that serves more than twelve (12) children shall be subject to review under article V of this chapter.

c. Outdoor play areas shall be screened and buffered from surrounding residences with landscaping and/or fencing to minimize visual and noise impacts.

d. Solid waste shall be stored in covered containers. Such containers shall be screened on all four (4) sides.

e. Day care facilities, nursery schools and kindergartens located either in structures that have been in residential use within the past five (5) years or in existing accessory structures and that serve between thirteen

(13) and twenty-four (24) children shall meet the following additional standards:

i. The facility shall provide a minimum of seventy-five (75) square feet of outdoor play area per child;

ii. The play area shall be located in the side and rear yards only and shall not be located in front yards;

iii. Outside play areas shall be separated from abutting properties by a fence at least forty-eight (48) inches in height;

iv. A ten-foot wide landscaped buffer shall be required outside of the fenced play area, and shall be established in accordance with the landscaping standards of the City's Technical Standards and Guidelines;

v. The minimum lot size for a day care facility, home babysitting service, nursery school or kindergarten located in a residential or existing accessory structure and serving more than twelve (12) children shall be twenty thousand (20,000) square feet;

vi. ***Off-street parking:*** Off street parking is required as provided in division 20 (off-street parking) of this article.

vii. The maximum number of children in a day care facility located in a residential or existing accessory structure shall be twenty-four (24); and

viii. Any additions or exterior alterations such as facade materials, building form, roof pitch, and exterior doors shall be designed to be compatible with the architectural style of the building and preserve the residential appearance of

the building.

5. Temporary wind anemometer towers, as defined in sec. 14-47, are permitted provided the following standards are met in addition to sec. 14-430:

   a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a certificate of occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

   b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

   c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

   d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

   e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

   f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including

pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, of the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

6. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 534-84, 5-7-84; Ord. No. 260-84, § 2, 12-17-84; Ord. No. 76-85, § 2, 7-1-85; Ord. No. 79-88, § 2, 7-19-88; Ord. No. 235-91, § 1, 2-4-91; Ord. No. 118-93, § 1, 10-18-93; Ord. No. 133-96, § 1, 11-18-96; Ord. No. 154-96, § 1, 12-16-96; Ord. No. 222-99, §1, 3-01-99; Ord. No. 199-04/05, 4-4-05; Ord. 153-08/09, 2-18-09; Ord. No. 29-09/10, 8-3-09 emergency passage; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 240 09/10, 6-21-10; Ord. No. 9 10/11, 8-2-10; Ord. No. 149-10/11, 3-7-11; Ord. No. 33-11/12, 1-18-12)

Sec. 14-69. Prohibited uses.

Uses that are not expressly enumerated herein as either permitted uses or conditional uses are prohibited.

(Ord. No. 532-84, 5-7-84)

Sec. 14-70. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, lots in the R-1 zone shall meet or exceed the following minimum requirements:

(a) *Minimum lot size:*

1. Residential: Fifteen thousand (15,000) square feet except as provided for lots of record in section

14-433 (lots of record and accessory structure setbacks for existing buildings) of this article. A lot in an unsewered residential district shall meet the provisions of the state Minimum Lot Size Law, 12 M.R.S.A. Section 4807, or the applicable zoning lot size, whichever is larger.

2. Long-term, extended, or intermediate care facility: Three (3) acres.

3. School: Two (2) acres.

4. Places of assembly:

Large	Two (2) acres
Medium	One (1) acre
Small	Half (1/2) acre

5. Municipal use: Fifteen thousand (15,000) square feet.

6. Animal raising: Three (3) acres.

7. All other uses: Fifteen thousand (15,000) square feet.

Provided that for uses specified in section 14-70(a)2 through 6 above, no minimum lot area shall be required in the following cases:

a. Uses existing as of June 1, 1983;

b. Expansion onto land abutting the lot on which the principal use is located;

c. Expansion onto land other than the lot on which the principal use is located to the extent that such expansion consists of the reuse of surface parking area or nonresidential structures existing and in nonresidential use as of June 1, 1983, provided that such reuse is contained within the lot of record of such structure or parking area as of June 1, 1983;

d. Expansion onto land other than the lot on which the principal use is located of no more than fifteen (15) percent of the total contiguous land area of the existing use, or one (1) acre, whichever is less, within any five-year period.

(b) *Minimum lot area per dwelling unit:* Fifteen thousand (15,000) square feet.

(c) *Minimum street frontage:* Seventy-five (75) feet.

(d) *Minimum yard dimensions:*

(Yard dimensions include setbacks of structures from property lines and setbacks of structures from one another. No structure shall occupy the minimum yard of another structure.)

1. *Front yard:*

Principal or accessory structures: Twenty-five (25) feet.

2. *Rear yard:*

a. Principal or accessory structures with ground coverage greater than one hundred (100) square feet: Twenty-five (25) feet.

b. Accessory detached structures with a ground coverage of one hundred and forty-four (144) square feet or less: Five (5) feet.

Setbacks for swimming pools shall be as provided for in section 14-432 (swimming pools) of this article.

3. *Side yard:*

a. Principal or accessory structures with ground coverage greater than one hundred (100) feet:

Height of Structure *Required Side Yard*

1 story . . . . . 12 feet

1 1/2 stories . . . . . 12 feet

2 stories . . . . . 14 feet

2 1/2 stories . . . . . 16 feet

The width of one (1) side yard may be reduced one (1) foot for every foot that the other side yard is correspondingly increased, but no side yard shall be less than twelve (12) feet. In the case of a lot of record existing as of June 5, 1957, and held under separate and distinct ownership from adjacent lots, the required side yard may be reduced in order to provide a buildable width of up to twenty-four (24) feet, but in no case shall the resulting side yards be less than twelve (12) feet.

b. Accessory detached structure with ground coverage of one hundred and forty-four (144) square feet or less: Five (5) feet.

4. *Side yard on side streets:*

a. Principal or accessory structures: Twenty (20) feet.

(e) *Maximum lot coverage:* Twenty (20) percent of lot area.

(f) *Minimum lot width:* One hundred (100) feet.

(g) *Maximum structure height:*

1. Principal or accessory attached structure: Thirty-five (35) feet.

2. Accessory detached structure: Eighteen (18) feet.

(h) *Maximum floor area for places of assembly on a collector or arterial road:*

Large	Not limited
Medium	9,000 sq. ft.
Small	5,000 sq. ft.

(i) *Maximum floor area for places of assembly not on a collector or arterial road:*

Large	9,000 sq. ft.
Medium	4,500 sq. ft.
Small	2,500 sq. ft.

(Ord. No. 532-84, 5-7-84; Ord. No. 79-88, § 3, 7-19-88; Ord. No. 235-91, § 2, 2-4-91; Ord. No. 118-93, § 2, 10-18-93; Ord. No. 154-96, § 2, 12-16-96; Ord. No.131-08/09, 12-15-08; Ord. No. 127-09/10, 1-4-10 emergency passage)

***Editor's note--**Ord. No. 79-88, § 3, adopted July 19, 1988, amended this section to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 79-88.

Sec. 14-71. Other requirements.

Other requirements are as follows:

(a) *Off street parking:* Off-street parking is required as provided in division 20 (off-street parking) of this article.

(b) *Shoreland and flood plain management regulations:* Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(c) *Storage of vehicles:* Only one (1) unregistered motor vehicle may be stored outside on the premises for a period not exceeding thirty (30) days.

(Ord. No. 532-84, 5-7-84; Ord. No. 15-92, § 5, 6-15-92)

Sec. 14-72 - 14-75. Reserved.

DIVISION 3. R-2 RESIDENTIAL ZONE*

***Editor's note--**Ord. No. 533-54, adopted May 7, 1984, repealed Div. 3, §§ 14-76--14-79, and enacted a new Div. 3, §§ 14-76--14-81. The division was formerly derived from Code 1968, § 602.3.A--D; Ord. No. 499-74, § 2, adopted Aug. 19, 1974; Ord. No. 610-82, § 1, adopted July 7, 1982; and Ord. No. 89-83, §§ 1, 2, adopted Aug. 3, 1983.

Sec. 14-76. Purpose.

The purpose of the R-2 residential zone is:

To provide for low-density residential development characterized by single-family homes on individual lots in outlying areas of the city and along traffic corridors with limited additional traffic capacity.

(Ord. No. 533-84, 5-7-84)

Sec. 14-77. Permitted uses.

The following uses are permitted in the R-2 residential zone:

(a) *Residential:*

1. Single-family detached dwellings.

2. Handicapped family unit, as defined in section 14-47 (definitions) of this article for handicapped persons plus staff.

3. Single-family, multiple-component manufactured housing, as defined in section 14-47 (definitions) of this article, except in a National Register Historic District.

4. Single-family, single-component manufactured housing, as defined in section 14-47 (definitions) of this article, on individual lots under separate and distinct ownership, except in a National Register Historic District and until May 1, 1985, on the islands, provided that each unit meets the performance standards listed below:

   a. More than half of the roof area of each unit shall be a double pitched Class C rated shingled roof with a minimum pitch of 3/12.

   b. Each unit shall be installed on a full foundation or a concrete frost wall in accordance with all applicable codes and regulations. Any hitch or tow bar shall be removed from the unit after it is placed on its foundation or frost wall. In the case of a frost wall, vermin proof skirting shall be installed on all sides of the unit. The skirting

may consist of either (a) concrete or masonry block or (b) manufactured skirting. If concrete or masonry block skirting is installed, either the exterior siding of the unit shall extend within one (1) foot of grade or decorative masonry siding shall be applied. If manufactured skirting material is installed, the color shall be identical to or compatible with the exterior siding of the unit.

c. Each unit shall have exterior siding that is residential in appearance, including but not limited to natural materials such as wood clapboards or shakes, or exterior materials which simulate wood. Clapboards or simulated clapboards shall have less than eight (8) inches of exposure and sheet metal type siding shall not be permitted.

d. Each unit shall have the long side of the unit parallel to the street line where the required street frontage is met.

e. Each unit shall be provided with at least two (2) trees meeting the city's arboricultural specifications and which are clearly visible from the street line and are located so as to visually widen the narrow dimension or proportion of the unit.

f. Each unit shall have all fuel oil supply systems constructed and installed within the foundation wall or underground in accordance with all applicable codes and regulations.

g. No unit shall be horizontally or vertically attached to any other unit or other structure, provided however, that this provision shall not be deemed to prohibit building additions, such as porches, garages, room additions or solar greenhouses.

(b) *Other:*

1. Reserved;

2. Parks and other active and passive noncommercial

recreation spaces;

3. Agriculture, including nurseries, greenhouses, and truck gardens, providing that there is no sale of products not produced on the premises; a single stand with no more than two hundred (200) square feet in floor area, for the sale of agricultural products produced on the premises shall be permitted;

4. Accessory uses customarily incidental and subordinate to the location, function, and operation of principal uses, subject to the provisions of section 14-404 (accessory uses) of this article;

5. Home occupations, subject to the provisions of section 14-410 (home occupation) of this article;

6. Municipal uses, excluding those specifically set forth in section 14-78 of this division.

7. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 533-84, 5-7-84; Ord. No. 261-84, § 1, 12-17-84; Ord. No. 35-85, § 1, 7-15-85; Ord. No. 80-88, § 1, 7-19-88; Ord. No. 86A-89, § 2, 8-21-89; Ord. No. 33-91, § 3, 1-23-91; Ord. No. 33-11/12, 1-18-12)

***Editor's note--**Ord. No. 80-88, § 1, adopted July 19, 1988, amended this section by adding subsection 14-77(b)6. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 80-88.

Sec. 14-78. Conditional use.

The following uses shall be permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) of this article and any special provisions, standards or requirements specified below:

(a) *Residential:*

1. Sheltered care group home, as defined in section 14-47 of this article, for up to twelve (12) individuals, plus staff, and serving a primary population which is not handicapped persons, parolees, persons involved in correctional prerelease programs, or current illegal drug

users, provided that:

a. A sheltered care group home shall not be located within five hundred (500) feet of another, as measured along street lines to the respective property lines;

b. There shall be no open outside stairways or fire escapes above the ground floor;

c. The facility shall make provision for adequate on-site staffing in accordance with applicable state licensing requirements. If a facility is not licensed by the state, there shall be a minimum of one (1) staff person for every ten (10) residents or fraction thereof.

The board of appeals may impose conditions upon a conditional use permit concerning the creation or operation of a sheltered care group home including but not limited to the following: site and building maintenance; lighting, fencing, and other appropriate security measures; screening and buffering of parking areas; compatibility of any additions or alterations with the existing residential structure; compatibility of new structures with the architectural character of the surrounding area; and limitation on the duration of a sheltered care group home permit.

2. Alteration or construction of a single-family detached dwelling to accommodate an accessory dwelling unit within the building and clearly subordinate to the principal dwelling for the benefit of homeowners or tenants provided that:

a. The accessory unit shall be no more than thirty (30) percent of the gross floor area of the principal building and shall have a minimum floor area of four hundred (400) square feet; gross floor area shall exclude any floor area that has less than two-thirds of its floor-to-ceiling height above the average adjoining ground level; gross floor area may include attic space if such space shall be included as habitable space within either

dwelling unit;

b. Lot area shall be eight thousand (8,000) square feet for single-family dwellings in existence as of May 1, 1984, and lot area shall be ten thousand (10,000) square feet for single-family dwellings constructed after May 1, 1984;

c. There shall be no open, outside stairways or fire escapes above the ground floor;

d. Any additions or exterior alterations such as facade materials, building form, roof pitch, and exterior doors shall be designed to be compatible with the architectural style of the building and preserve the single-family appearance of the building;

e. The project shall be subject to article V (site plan) of this chapter for site plan review and approval and the following additional standards:

i. Any additions or exterior alterations, such as façade materials, building form and roof pitch shall be designed to be compatible with the architectural style of the building and preserve the single-family appearance of the building.

ii. The scale and surface area of parking, driveways and paved areas shall be arranged and landscaped to properly screen vehicles from adjacent properties and streets.

f. Either the accessory unit or the principal dwelling shall be occupied by the owner of the lot on which the principal building is located, except for bona fide temporary absences; and

g. Parking shall be provided as required by division 20 of this article.

(b) ***Institutional:*** Any of the following conditional uses provided that, notwithstanding section 14-474 (conditional uses) of this article or any other

provisions of this Code, the Planning Board shall be substituted for the board of appeals as the reviewing authority:

1. Elementary, middle, and secondary school;

2. a. Long-term and extended care facilities;

   b. Intermediate care facility for thirteen (13) or more persons;

3. Places of assembly;

4. College, university, trade school;

Such uses shall be subject to the following conditions and standards in addition to the provisions of section 14-474:

a. Any new institutional use shall demonstrate that it has a lot size of sufficient area to accommodate all proposed and foreseeable future activities and programs, including parking, and to absorb the impacts and growth needs of the institution. Such new use established after April 19, 2012 shall not be eligible for expansion under the provisions of paragraph b below;

b. In the case of expansion of existing such uses onto land other than the lot on which the principal use is located, it shall be demonstrated that the proposed use cannot reasonably be accommodated on the existing site through more efficient utilization of land or buildings, and will not cause significant physical encroachment into established residential area; and

c. The proposed use will not cause significant displacement or conversion of residential uses existing as of June 1, 1983, or thereafter; and

d. In the case of a use or use expansion which constitutes a combination of the above-listed uses with capacity for concurrent operations, the applicable minimum lot sizes shall be cumulative;

and

e. Article V (site plan) sections 14-522 and 14-523 notwithstanding, in the case of places of assembly (including places of religious assembly, community halls and private club or fraternal organizations) and college, university, trade school, the proposed use shall be subject to the requirements of article V (site plan) of this chapter; and

f. In the case of community halls:

i. The structure was in existence as of January 4, 2010.

ii. The structure was built for institutional or other non-residential uses;

iii. The structure is operated by, or operated subject to the control of, a not-for-profit entity in accordance with its not-for-profit purposes; and

iv. A parking management plan is submitted for review and approval by the planning board; and

g. In the case of private club or fraternal organizations: any such establishment serving alcoholic beverages or in possession of a license for serving alcoholic beverages shall be located on a large lot, as specified in the minimum lot size provisions of this section.

(c) *Other:*

1. Utility substations, including sewage and water pumping stations and standpipes, electric power substations, transformer stations, telephone electronic equipment enclosures, and other similar structures, provided that such uses are suitably screened and landscaped so as to ensure compatibility with the surrounding neighborhood;

2. Cemeteries.

3. Day care facilities or home babysitting services not

permitted as a home occupation under section 14-410, and nursery schools and kindergartens, subject to the following conditions:

a. The facility shall be located in a structure in which there is one (1) or more occupied residential units or in an existing accessory structure, unless the facility is located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use or in a nonresidential structure accessory to the principal nonresidential use.

b. The maximum capacity shall be twelve (12) children for facilities located in residential or existing structures accessory thereto, unless the additional standards in subsection v. are met. There shall be no maximum limit on the number of children in a facility located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care use or home babysitting use, nursery school or kindergarten, or in a nonresidential structure accessory thereto, provided that any such structure that serves more than twelve (12) children shall be subject to review under article V of this chapter.

c. Outdoor play areas shall be screened and buffered from surrounding residences with landscaping and/or fencing to minimize visual and noise impacts.

d. Solid waste shall be stored in covered containers. Such containers shall be screened on all four (4) sides.

e. Day care facilities, home babysitting uses, nursery schools or kindergartens located either in structures that have been in residential use within the past five (5) years or in existing accessory structures and that serve between thirteen (13) and twenty-four (24) children shall meet the following additional standards:

i. The facility shall provide a minimum of seventy-five (75) square feet of outdoor play area per child;

ii. The play area shall be located in the side and rear yards only and shall not be located in front yards;

iii. Outside play areas shall be separated from abutting properties by a fence at least forty-eight (48) inches in height;

iv. A ten-foot wide landscaped buffer shall be required outside of the fenced play area, and shall be established in accordance with the landscaping standards of the City's Technical Standards and Guidelines;

v. The minimum lot size for a day care facility, home babysitting use, nursery school or kindergarten located in a residential or existing accessory structure and serving more than twelve (12) children shall be twenty thousand (20,000) square feet;

vi. ***Off-street parking:*** Off-street parking is required as provided in division 20 (off-street parking) of this article.

vii. The maximum number of children in a day care facility, home babysitting service, nursery school or kindergarten located in a residential or existing accessory structure shall be twenty-four (24); and

viii. Any additions or exterior alterations such as facade materials, building form, roof pitch, and exterior doors shall be designed to be compatible with the architectural style of the building and preserve the residential appearance of the building.

4. Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency)

and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, of the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

5. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 533-84, 5-7-84; Ord. No. 261-84, § 2, 12-17-84; Ord. No. 76-85, § 3, 7-1-85; Ord. No. 80-88, § 2, 7-19-88; Ord. No. 235-91, § 3, 2-4-91; Ord. No. 118-93, § 3, 10-18-93; Ord. No. 133-96, § 2, 11-18-96; Ord. No. 154-96, § 3, 12-16-96; Ord. No. 222-99 §2, 3-01-99; Ord. No. 199-04/05, 4-4-05; Ord. No. 29-09/10, 8-3-09, emergency passage; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 240-09/10, 6-21-10; Ord. No. 9 10/11, 8-2-10; Ord. No. 149-10/11, 3-7-11; Ord. No. 33-11/12, 1-18-12; Ord. No. 131-11/12, 3-19-12)

Sec. 14-79. Prohibited uses.

Uses that are not expressly enumerated herein as either permitted uses or conditional uses are prohibited.

(Ord. No. 533-84, 5-7-84)

Sec. 14-80. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulations) of this article, lots in the R-2 zone shall meet or exceed the following minimum requirements:

(a) *Minimum lot size:*

1. Residential: Ten thousand (10,000) square feet except as provided for lots of record in section 14-433 (lots of record and accessory structure setbacks for existing buildings) of this article. A lot in an unsewered residential district shall meet the provisions of the state Minimum Lot Size Law, 12 M.R.S.A. Section 4807, or the applicable zoning lot size, whichever is the larger.

2. Long-term, extended, or intermediate care facility: Three (3) acres.

3. School: Two (2) acres.

4. Places of assembly:

Large	Two (2) acres
Medium	One (1) acre
Small	Half (1/2) acre

5. Municipal use: Ten thousand (10,000) square feet.

6. College, university, trade school: Two (2) acres.

7. All other uses: Ten Thousand (10,000) square feet.

Provided that for uses specified in section 14-80(a)2 through 7 above, no minimum lot area shall be required in the following cases:

a. Uses existing as of June 1, 1983;

b. Expansion of uses onto land abutting the lot on which the principal use is located;

c. Expansion onto land other than the lot on which the principal use is located to the extent that such expansion consists of the reuse of surface parking area or nonresidential structures existing and in nonresidential use as of June 1, 1983, provided that such reuse is contained within the lot of record of such structure or parking area as of June 1, 1983;

d. Expansion onto land other than the lot on which the principal use is located of no more than fifteen (15) percent of the total contiguous land area of the existing use, or one (1) acre, whichever is less, within any five-year period.

(b) ***Minimum area per dwelling unit:*** Ten thousand (10,000)

square feet.

(c) *Minimum street frontage:* Fifty (50) feet.

(d) *Minimum yard dimensions:*

(Yard dimensions include setbacks of structures from property lines and setbacks of structures from one another. No structure shall occupy the minimum yard of another structure.)

1. *Front yard:*

Principal or accessory structures: Twenty-five (25) feet.

2. *Rear yard:*

a. Principal or accessory structures with ground coverage greater than one hundred (100) square feet: Twenty-five (25) feet.

b. Accessory detached structures with a ground coverage of one hundred and forty-four (144) square feet or less: Five (5) feet.

Setbacks for swimming pools shall be as provided for in section 14-432 (swimming pools) of this article.

3. *Side yard:*

a. Principal or accessory structures with ground coverage greater than one hundred (100) square feet:

Height of Structure	*Required Side Yard*
1 story	12 feet
1 1/2 stories	12 feet
2 stories	14 feet
2 1/2 stories	16 feet

The width of one (1) side yard may be reduced one (1) foot for every foot that the other side yard is correspondingly increased, but no side yard shall be less than twelve (12) feet. In the case of a lot of record existing as of June 5, 1957, and held under separate and distinct ownership from adjacent lots, the required side yard may be reduced in order to provide a buildable width of up to twenty-four (24) feet, but in no case shall the resulting side yards be less than twelve (12) feet.

b. Accessory detached structures with ground coverage of one hundred and forty-four (144) square feet or less: Five (5) feet.

4. *Side yard on side streets:*

Principal or accessory structures: Twenty (20) feet.

(e) *Maximum lot coverage:* Twenty (20) percent of lot area.

(f) *Minimum lot width:* Eighty (80) feet.

(g) *Maximum structure height:*

1. Principal or accessory attached structure: Thirty-five (35) feet.

2. Accessory detached structure: Eighteen (18) feet.

(h) *Maximum floor area on a collector or arterial road:*

1. Places of public assembly:

Large	Not limited
Medium	9,000 sq. ft.
Small	5,000 sq. ft.

2. College, university, trade school:

Lot area of 6 acres or larger: 24,000 sq. ft.
Lot area of 4 acres to 5.99 acres: 18,000 sq. ft.

Lot area of 2 acres to 3.99 acres: 12,000 sq. ft.

(i) *Maximum floor area not on a collector or arterial road:*

1. Places of public assembly:

Large	9,000 sq. ft.
Medium	4,500 sq. ft.
Small	2,500 sq. ft.

2. College university, trade school:

Not a permitted use.

(Ord. No. 533-84, 5-7-84; Ord. No. 80-88, § 3, 7-19-88; Ord. No. 235-91, § 4, 2-4-91; Ord. No. 118-93, § 4, 10-18-93; Ord. No. 154-96, § 3, 12-16-96; Ord. No. 131-08/09, 12-15-08; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 131-11/12, 3-19-12)

***Editor's note--**Ord. No. 80-88, § 3, adopted July 19, 1988, amended this section to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 80-88.

Sec. 14-81. Other requirements.

Other requirements are as follows:

(a) *Off-street parking:* Off-street parking is required as provided in division 20 (off-street parking) of this article.

(b) *Shoreland and flood plain management regulations:* Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(c) *Storage of vehicles:* Only one (1) unregistered motor vehicle may be stored outside on the premises for a period not exceeding thirty (30) days.

(Ord. No. 533-84, 5-7-84; Ord. No. 15-92, § 6, 6-15-92)

Sec. 14-82 – 14-85. Reserved.

DIVISION 4. R-3 RESIDENTIAL ZONE*

***Editor's note--**Ord. No. 534-84, adopted May 7, 1984, repealed Div. 4, §§ 14-87--14-90, and enacted a new Div. 4, §§ 14-86--14-91. Formerly, Div. 4 was derived from Code 1968, § 602.4.A--D, and the following ordinances: Ord. No. 49-74, 372-75, 406-75, 34-76, 145-79, 145-81, 303-81, 90-83, and 499-74.

Sec. 14-86. Purpose.

The purpose of the R-3 residential zone is:

> To provide for medium-density residential development characterized by single-family homes on individual lots and also to provide for planned residential unit developments on substantially sized parcels. Such development shall respond to the physical qualities of a site and complement the scale, character and style of the surrounding neighborhood.

(Ord. No. 534-84, 5-7-84; Ord. No. 81-88, § 1, 7-19-88)

***Editor's note--**Ord. No. 81-88, § 1, adopted July 19, 1988, amended § 14-86 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 81-88.

Sec. 14-87. Permitted uses.

The following uses are permitted in the R-3 residential zone:

(a) *Residential:*

1. Single-family detached dwellings.

2. Planned residential unit development (PRUD) consisting of horizontally attached dwelling units or a series of such dwelling units. No dimensional requirements contained in section 14-90 shall apply with respect to such development, except for those requirements specifically denoted for PRUD. There shall be no open outside stairways or fire escapes above the ground floor. All land shall be owned and used in common and shall be governed and maintained as set forth in section 14-498(i)(3) of article IV (subdivisions) of this chapter. Such development shall be subject to review and approval by the Planning Board with respect to the

requirements of article V (site plan) and article IV (subdivisions) of this chapter, whether or not such development is a subdivision within the meaning of article IV of this chapter, as now enacted or as hereafter amended.

3. Handicapped family unit, as defined in section 14-47 (definitions) of this article, for handicapped persons plus staff.

4. Single-family, multiple-component manufactured housing, as defined in section 14-47 (definitions) of this article, except in a National Register Historic District.

5. Single-family, single-component manufactured housing, as defined in section 14-47 (definitions) of this article, on individual lots under separate and distinct ownership, except in a National Register Historic District and until May 1, 1985, on the islands, provided that each unit meets the performance standards listed below.

   a. More than half of the roofed area of each unit shall be a double pitched Class C rated shingled roof with a minimum pitch of 3/12.

   b. Each unit shall be installed on a full foundation or a concrete frost wall in accordance with all applicable codes and regulations. Any hitch or tow bar shall be removed from the unit after it is placed on its foundation or frost wall. In the case of a frost wall, vermin proof skirting shall be installed on all sides of the unit. The skirting may consist of either (a) concrete or masonry block or (b) manufactured skirting. If concrete or masonry block skirting is installed, either the exterior siding of the unit shall extend within one (1) foot of grade or decorative masonry siding shall be applied. If manufactured skirting material is installed, the color shall be identical to or compatible with the exterior siding of the unit.

   c. Each unit shall have exterior siding that is residential in appearance, including but not limited to natural materials such as wood clapboards or shakes, or exterior materials which

simulate wood. Clapboards or simulated clapboard shall have less than eight (8) inches of exposure and sheet metal type siding shall not be permitted.

d. Each unit shall have the long side of the unit parallel to the street line where the required street frontage is met.

e. Each unit shall be provided with at least two (2) trees meeting the city's arboricultural specifications and which are clearly visible from the street line and are located so as to visually widen the narrow dimension or proportion of the unit.

f. Each unit shall have all fuel oil supply systems constructed and installed within the foundation wall or underground in accordance with all applicable codes and regulations.

g. No unit shall be horizontally or vertically attached to any other unit or other structure, provided however, that this provision shall not be deemed to prohibit building additions, such as porches, garages, room additions or solar greenhouses.

(b) *Other:*

1. Reserved;

2. Parks, and other active and passive noncommercial recreation spaces;

3. Accessory uses customarily incidental and subordinate to the location, function, and operation of principal uses, subject to the provisions of section 14-404 (accessory uses) of this article;

4. Home occupation, subject to the provisions of section 14-410 (home occupation) of this article;

5. Municipal uses, excluding those specifically set forth in section 14-88 of this division.

6. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 534-84, 5-7-84; Ord. No. 262-84, § 1, 12-17-84; Ord. No. 36-85, § 1, 7-15-85; Ord. No. 81-88, §§ 2, 3, 7-19-88; Ord. No. 86A-89, § 3, 8-21-89; Ord. No. 33-91, § 4, 1-23-91; Ord. No. 165-97, § 1, 12-1-97; Ord. No. 33-11/12, 1-18-12)

***Editor's note--**Ord. No. 81-88, §§ 2 and 3, adopted July 19, 1988, amended subsections 14-87(a)2 and (b)5 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 81-88.

Sec. 14-88. Conditional uses.

The following uses shall be permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) and any special provisions, standards or requirements specified below:

(a) *Residential:*

1. Sheltered care group homes, as defined in section 14-47 of this article, for up to twelve (12) individuals, plus staff, and serving a primary population which is not handicapped persons, parolees, persons involved in correctional prerelease programs, or current illegal drug users, provided that:

   a. A sheltered care group home shall not be located within five hundred (500) feet of another, as measured alone street lines to the respective property lines;

   b. There shall be no open outside stairways or fire escapes above the ground floor;

   c. The facility shall make provision for adequate on-site staffing in accordance with applicable state licensing requirements. If a facility is not licensed by the state, there shall be a minimum of one (1) staff person for every ten (10) residents or fraction thereof.

The board of appeals may impose conditions upon a conditional use permit concerning the creation or operation of a sheltered care group home including but not limited to the following: site and building maintenance; lighting, fencing, and other appropriate security measures; screening and buffering of parking areas; compatibility of any additions or alterations with the existing residential structure; compatibility of new structures with the architectural character of the surrounding area; and limitation on the duration of a sheltered care group home permit.

2. Alteration or construction of a detached single-family dwelling to accommodate one (1) additional dwelling unit for the benefit of homeowners or tenants, provided that:

   a. The accessory unit shall be no more than thirty (30) percent of the gross floor area of principal building and shall have a minimum floor area four hundred (400) square feet; gross floor area shall exclude any floor area that has less than two-thirds of its floor-to-ceiling height above the average adjoining ground level; gross floor area may include attic space if such space shall be included as habitable space within either dwelling unit;

   b. There shall be no open outside stairways or fire escapes above the ground floor;

   c. Any building additions or exterior alterations such as facade materials, building form, or roof pitch shall be designed to be compatible with the architectural style and to maintain the single-family appearance of the dwelling;

   d. A minimum lot size of six thousand five hundred (6,500) square feet of land area shall be required;

   g. No dwelling unit shall be reduced in size to less than one thousand (1,000) square feet of floor area, exclusive of common areas and

storage in basement or attic;

h. Parking shall be provided as required by division 20 of this article;

i. The project shall be subject to article V (site plan) of this chapter for site plan review and approval and the following additional standards:

i. Any additions or exterior alterations such as facade materials, building form and roof pitch shall be designed to be compatible with the architectural style of the building;

ii. The scale and surface area of parking, driveways and paved areas shall be arranged and landscaped to properly screen vehicles from adjacent properties and streets.

j. Either the accessory unit or principal unit shall be occupied by the lot owner, except for bona fide temporary absences.

(b) *Commercial:*

1. Reserved.

(c) ***Institutional:*** Any of the following conditional uses provided that, notwithstanding section 14-474(a) (conditional uses) of this article or any other provision of this Code, the Planning Board shall be substituted for the board of appeals as the reviewing authority:

1. Elementary, middle, and secondary school;

2. a. Long-term and extended care facilities;

b. Intermediate care facility for thirteen (13) or more persons;

3. Places of assembly;

4. Hospital.

Such uses shall be subject to the following conditions and standards in addition to the provisions of section 14-474:

a. In the case of expansion of existing such uses onto land other than the lot on which the principal use is located, it shall be demonstrated that the proposed use cannot reasonably be accommodated on the existing site through more efficient utilization of land or buildings, and will not cause significant physical encroachment into established residential areas; and

b. The proposed use will not cause significant displacement or conversion of residential uses existing as of June 1, 1983, or thereafter; and

c. In the case of a use or use expansion which constitutes a combination of the above-listed uses with capacity for concurrent operations, the applicable minimum lot sizes shall be cumulative; and

d. Article V (site plan) sections 14-522 and 14-523 notwithstanding, in the case of places of assembly the proposed use shall be subject to the requirements of article V (site plan) of this chapter; and

e. In the case of community halls:

i. The structure was in existence as of January 4, 2010.

ii. The structure was built for institutional or other non-residential uses;

iii. The structure is operated by, or operated subject to the control of, a not-for-profit entity in accordance with its not-for-profit purposes; and

iv. A parking management plan is submitted for review and approval by the planning board; and

f. In the case of private club or fraternal organizations: any such establishment serving alcoholic beverages or in possession of a license for serving alcoholic beverages shall be located on a large lot, as specified in the minimum lot size provisions of this section.

(d) *Other:*

1. Off-street parking of passenger cars as provided in section 14-344 (board of appeals may authorize parking in certain residence zones) of this article;

2. Utility substations, including sewage treatment plants, sewage and water pumping stations and standpipes, electric power substations, transformer stations, and telephone electronic equipment enclosures and other similar structures, provided that such uses are suitably screened and landscaped so as to ensure compatibility with the surrounding neighborhood;

3. Day care facilities or home babysitting services not permitted as a home occupation under section 14-410, and nursery schools and kindergartens subject to the following conditions:

a. The facility shall be located in a structure in which there is one (1) or more occupied residential units or in an existing accessory structure, unless the facility is located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care use, home babysitting use, nursery school or kindergarten, or in a nonresidential structure accessory to the principal nonresidential use.

b. The maximum capacity shall be twelve (12) children for facilities located in residential or existing structures accessory thereto, unless the additional standards in subsection v. are met. There shall be no maximum limit on the number of children in a facility located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use, or in a nonresidential structure accessory thereto, provided that any such structure that serves more than twelve (12) children shall be subject to review under article V of this chapter.

c. Outdoor play areas shall be screened and buffered from surrounding residences with landscaping and/or fencing to minimize visual and noise impacts.

d. Solid waste shall be stored in covered containers. Such containers shall be screened on all four (4) sides.

e. Day care facilities, home babysitting uses, nursery schools and kindergartens located either in structures that have been in residential use within the past five (5) years or in existing accessory structures and that serve between thirteen (13) and twenty-four (24) children shall meet the following additional standards:

i. The facility shall provide a minimum of seventy-five (75) square feet of outdoor play area per child;

ii. The play area shall be located in the side and rear yards only and shall not be located in front yards;

iii. Outside play areas shall be separated from abutting properties by a fence at least forty-eight (48) inches in height;

iv. A ten-foot wide landscaped buffer shall be required outside of the fenced play area, and shall be established in accordance with the landscaping standards of the City's Technical Standards and Guidelines;

v. The minimum lot size for a day care facility, home babysitting services, nursery school, or kindergarten located in a residential or existing accessory structure and serving more than twelve (12) children shall be twenty thousand (20,000) square feet;

vi. ***Off-street parking:*** Off-street parking is required as provided in division 20 (off-street parking) of this article.

vii. The maximum number of children in a day care facility, home babysitting service, nursery school or kindergarten located in a residential or existing accessory structure shall be twenty-four (24); and

viii. Any additions or exterior alterations such as facade materials, building form, roof pitch, and exterior doors shall be designed to be compatible with the architectural style of the building and preserve the residential appearance of the building.

4. Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be

dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required

for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

5. Wind energy systems, as defined and allowed in Article X, Altenrative Energy.

(Ord. No. 534-84, 5-7-84; Ord. No. 262-84, § 2, 12-17-84; Ord. No. 76-85, § 4, 7-1-85; Ord. No. 36-85, § 2, 7-15-85; Ord. No. 67-87, § 1, 11-2-87; Ord. No. 81-88, § 4, 7-19-88; Ord. No. 235-91, § 5, 2-4-91; Ord. No. 118-93, § 5, 10-18-93; Ord. No. 133-96, § 3, 11-18-96; Ord. No. 154-96, § 5, 12-16-96; Ord. No. 222-99, §3, 3-01-99; Ord. No. 199-04/05, 4-4-05; Ord. No. 29-09/10, 8-3-09 emergency passage; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 240-09/10, 6-21-10; Ord. No. 9 10/11, 8-2-10; Ord. No. 149-10/11, 3-7-11; Ord. No. 33-11/12, 1-18-12)

Sec. 14-89. Prohibited uses.

Uses that are not expressly enumerated herein as either permitted uses or conditional uses are prohibited.

(Ord. No. 534-84, 5-7-84)

Sec. 14-90. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, lots in the R-3 zone shall meet the following minimum requirements:

(a) *Minimum lot size:*

1. Residential: Sixty-five hundred (6,500) square feet except as provided for lots of record is section 14-433 (lots of record and accessory structure setbacks for existing buildings) of this article. A lot in an unsewered residential district shall meet the provisions of the state Minimum Lot Size Law, 12 M.R.S.A. Section 4807 et seq., or the applicable zoning lot size, whichever is larger.

2. Alteration of a detached single-family dwelling to a two-family dwelling: Ten thousand (10,000) square feet.

3. Long-term, extended, or intermediate care facilities: Two (2) acres.

4. School: Two (2) acres.

5. Places of assembly:

Large	Two (2) acres
Medium	One (1) acre
Small	Half (1/2) acre

6. Municipal use: Sixty-five hundred (6,500) square feet.

7. Hospital: Ten (10) acres.

8. Planned residential unit development (PRUD): Three (3) acres gross area, as defined in section 14-47 (definitions) of this article, of continuous land.

9. All other uses: Sixty-five hundred (6,500) square feet.

Provided that for uses specified in section 14-90(a)3 through 8 above, no minimum lot area shall be required in the following cases:

a. Uses existing as of June 1, 1983;

b. Expansion onto land abutting the lot on which the principal use is located;

c. Expansion onto land other than the lot on which the principal use is located to the extent that such expansion consists of the reuse of surface parking area or nonresidential structures existing and in nonresidential use as of June 1, 1983, provided that such reuse is contained within the lot of record of such structure or parking area as of June 1, 1983;

d. Expansion onto land other than the lot on which the principal use is located of no more

than fifteen (15) percent of the total contiguous land area of the existing use, or one (1) acre, whichever is less, within any five-year period.

(b) *Minimum lot area per dwelling unit:*

PRUD: Sixty-five hundred (6,500) square feet of net land area as defined in section 14-47 (definitions) of this article. As part of a site plan and subdivision application, the applicant shall provide a calculation of those factors deducted to determine net land area. In addition, such net area factors shall be delineated on a site plan.

Other uses: Sixty-five hundred (6,500) square feet.

(c) ***Minimum street frontage:*** Fifty (50) feet, except that lots located in a subdivision approved after the effective date of Ord. No. 165-97 pursuant to section 14-497.5 shall meet the street frontage requirements approved as part of the subdivision plan under the terms of that section.

(d) *Minimum yard dimensions:*

(Yard dimensions include setbacks of structures from property lines and setbacks of structures from one another. No structure shall occupy the minimum yard of another structure.)

1. *Front yard:*

Principal or accessory structures: Twenty-five (25) feet.

A front yard need not exceed the average depth of front yards on either side of the lot. A lot of record existing as of June 5, 1957, and less than one hundred (100) feet deep need not be deeper than twenty (20%) percent of the depth of the lot.

2. *Rear yard:*

a. Principal or accessory structures with ground

coverage greater than one hundred (100) square feet: Twenty-five (25) feet.

b. Accessory detached structures with ground coverage of one hundred and forty-four (144) square feet or less: Five (5) feet.

Setbacks for swimming pools shall be as provided for in section 14-432 (swimming pools) of this article.

3. *Side yard:*

a. Principal or accessory structures with ground coverage greater than one hundred (100) square feet:

Height of Structure	*Required Side Yard*
1 story	8 feet
1 1/2 stories	8 feet
2 stories	14 feet
2 1/2 stories	16 feet

The width of one (1) side yard may be reduced one (1) foot for every foot that the other side yard is correspondingly increased, but no side yard shall be less than eight (8) feet in width. In the case of a lot of record existing as of June 5, 1957, and held under separate and distinct ownership from adjacent lots, the required side yard may be reduced in order to provide a buildable width of up to twenty-four (24) feet, but in no case shall the resulting side yards be less than eight (8) feet.

b. Accessory detached structures with ground coverage of one hundred and forty-four (144) square feet or less: Five (5) feet.

4. *Side yard on side street:*

a. Principal or accessory structures: Twenty (20)

feet.

(e) *Maximum lot coverage:* Thirty-five (35) percent of lot area.

(f) *Minimum lot width:* Sixty-five (65) feet.

(g) *Maximum structure height:* Principal or accessory attached structure: Thirty-five (35) feet.

Accessory detached structure: Eighteen (18) feet.

(h) 1. *Maximum number of units in a building (PRUD of five (5) acres of more):* Six (6) units.

2. *Maximum number of units in a building (PRUD of less than five (5) acres):* Two (2) units.

(i) *Maximum average number of units in a building (PRUD of five (5) acres of more):* Five (5) units.

(j) *Maximum length of building (PRUD):* One hundred (100) feet for buildings without garages; one hundred forty (140) feet for buildings with integral garages.

(k) *Minimum building setback from external subdivision property lines (PRUD):*

1. Three (3) or fewer dwelling units in building: Twenty-five (25) feet.

2. Four (4) or more dwelling units in building: Thirty-five (35) feet.

(l) *Minimum distance between detached PRUD dwelling unit:* Sixteen (16) feet.

(m) *Reserved.*

(n) *Minimum recreation open space area (PRUD):* Three hundred (300) square feet per dwelling unit of common area designated on the site for recreation purposes. Such recreation areas shall be level graded, dry, accessible and properly drained. At a minimum, a contiguous area of six thousand (6,000) square feet with a minimum dimension

of fifty (50) feet shall be provided and shall include one (1) or more of the uses set forth in section 14-526 (d) 9. and the planned residential unit development standards in the City of Portland Design Manual but shall at least provide usable recreation space. Such recreation areas shall be located at least twenty-five (25) feet from dwelling units.

(o) No habitable space in a PRUD shall be below grade, except basements that are a part of and below ground units.

(p) *Maximum floor area for places of assembly on a collector or arterial road:*

Large	Not limited
Medium	9,000 sq. ft.
Small	5,000 sq. ft.

(q) *Maximum floor area for places of assembly not on a collector or arterial road:*

Large	9,000 sq. ft.
Medium	4,500 sq. ft.
Small	2,500 sq. ft.

(Ord. No. 534-84, 5-7-84; Ord. No. 81-88, § 5, 7-19-88; Ord. No. 385-89, §§ 1, 2, 4-3-89; Ord. No. 235-91, § 6, 2-4-91; Ord. No. 118-93, § 6, 10-18-93; Ord. No. 154-96, § 6, 12-16-96; Ord. No. 165-97, § 2, 12-1-97; Ord. No. 95-04/05, 11-15-04; Ord. No. 131-08/09, 12-15-08; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 40-12/13, 9-5-12)

***Editor's note--**Ord. No. 81-88, § 5, adopted July 19, 1988, amended § 14-90 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 81-88.

Sec. 14-91. Other requirement.

Other requirements are as follows:

(a) *Off-street parking:* Off-street parking is required as provided in division 20 (off-street parking) of this article.

(b) *Shoreland and flood plain management regulations:* Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood

hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(c) *Storage of vehicles:* Only one (1) unregistered motor vehicle may be stored outside on the premises for a period not exceeding thirty (30) days.

(Ord. No. 534-84, 5-7-84; Ord. No. 15-92, § 7, 6-15-92)

Secs. 14-92. Reserved.
Secs. 14-93. Reserved.

DIVISION 4.5. FH FLEXIBLE HOUSING ZONE

Sec. 14-94. Purpose.

The intention of this division is to establish an overlay zone in which manufactured housing development is permitted in addition to those uses permitted in the underlying residential zone. The purpose of this division is to accommodate additional housing types in appropriate areas of the city, while protecting the value and integrity of established residential neighborhoods and ensuring a balanced and orderly pattern of residential development.

(Ord. No. 610-82, § 2, 7-7-82; Ord. No. 130-82, § 1, 9-20-82; Ord. No. 200-89, § 1, 12-18-89)

Sec. 14-95. Manufactured housing park or subdivision.

Notwithstanding any other provision of this article, no manufactured housing park or subdivision shall be permitted in any zone except as provided in this section.

(a) Manufactured housing park or subdivision, as defined in section 14-47, shall be permitted in the flexible housing zone, the Planning Board shall be the reviewing authority. Such development shall be in accordance with the space and bulk and other requirements applicable to similar uses permitted in the underlying zone, except those standards set forth in section 14-96, and shall also meet the following additional requirement:

1. Reserved.

2. Such development shall be subject to approval by the Planning Board with respect to each and every requirement of article VI of this chapter,

including the special requirements of section 14-499.5, whether or not such development is a subdivision within the meaning of article IV of this chapter, as now enacted or as hereafter amended and shall also be subject to article V of this chapter.

3. Whether or not the underlying zone permits planned residential unit development, a manufactured housing park shall be a planned residential unit development, subject to the provisions of this section, section 14-499.5 and section 14-526 9. All land, including but not limited to private streets, private driveways, utility location areas, common parking areas and common recreation open space, shall be owned and used in common. Manufactured housing parks shall not be subject to the net land area calculations set forth in section 14-47.

4. Single-component manufactured housing shall be prohibited from being horizontally or vertically attached to any other unit or structure. (Provided, however, that this provision shall not be deemed to prohibit building additions, such as porches, garages, room additions or solar greenhouses.)

(Ord. No. 610-82, § 2, 7-7-82; Ord. No. 130-82, § 1, 9-20-82; Ord. No. 263-84, § 1, 12-17-84; Ord. No. 200-89, § 2, 12-18-89; Ord. No. 278-09/10, 7-19-10)

Sec. 14-96. Additional dimensional requirements and performance standards for manufactured housing parks.

Notwithstanding the provisions of section 14-95 and the dimensional requirements for underlying zones, the following dimensional requirements shall apply to manufactured housing parks:

(a) Minimum manufactured housing park unit space size: Four thousand five hundred (4,500) square feet. A manufactured housing park unit space in an unsewered residential district shall meet the provisions of 12 M.R.S.A. 4807 et seq., or the applicable zoning lot size, whichever is larger.

(b) Maximum manufactured housing park unit space coverage: Fifty (50) percent.

(c) Minimum street frontage for manufactured housing park: Fifty (50) feet.

(d) Minimum open space requirement: Ten (10) percent of the combined area of the individual unit spaces within the manufactured housing park.

(e) Minimum yard dimensions:

(Yard dimensions include setbacks from unit space boundaries and setbacks of structures from one another. No structure shall occupy the yard of another structure.):

1. Front yard: Principal or accessory structures: Twenty (20) feet.

2. Rear yard:

   a. Principal or accessory structures with ground coverage greater than one hundred (100) square feet: Twenty (20) feet.
   b. Accessory detached structures with ground coverage of one hundred (100) square feet or less: Five (5) feet.

3. Side yard: Principal or accessory structures: Ten (10) feet.

4. Unit spaces located within a shoreland zone shall meet the lot area and lot width requirements for the underlying zone and shall also meet all applicable shoreland zoning standards.

(f) All manufactured housing park unit spaces within a manufactured housing park shall be shown on a manufactured housing plan showing unit space boundaries, unit space sizes, and unit space dimensions. Such unit spaces shall be under unified ownership with all other unit spaces within the manufactured housing park. The manufactured housing park plan shall also contain a note that city services shall not be provided on private streets within the manufactured housing park. Individual leases for unit spaces shall disclose that city services shall not be provided on private streets within the

manufactured housing park.

(g) All single-family single-component manufactured housing units in a manufactured housing park shall meet the following performance standards:

1. More than half of the roof area of each unit shall be a double-pitched Class C rated shingled roof with a minimum pitch of 3/12.

2. Each unit shall be installed on a full foundation, a concrete frost wall, or a reinforced floating concrete pad which shall be certified by an engineer if it is to be placed on soil with high frost susceptibility, in accordance with all applicable codes and regulations. Any hitch or tow bar shall be removed from the unit after it is placed on its foundation or frost wall. In the case of a frost wall, vermin-proof skirting shall be installed on all sides of the unit. The skirting may consist of either (a) concrete or masonry block or (b) manufactured skirting. If concrete or masonry block skirting is installed, either the exterior siding of the unit shall extend within one (1) foot of grade or decorative masonry siding shall be applied. If manufactured skirting material is installed, the color shall be identical to or compatible with the exterior siding of the unit.

3. Each unit shall have exterior siding that is residential in appearance, including but not limited to natural materials such as wood clapboards or shakes, or exterior materials which simulate wood. Clapboard or simulated clapboards shall have less than eight (8) inches of exposure, and sheet metal type siding shall not be permitted.

4. Each unit shall be provided with at least two (2) trees meeting the city's arboricultural specifications and which are clearly visible from the street line and are located so as to visually widen the narrow dimension or proportion of the unit.

5. Each unit shall have all fuel oil supply systems

constructed and installed within the foundation wall or underground in accordance with all applicable codes and regulations.

6. No unit shall be horizontally or vertically attached to any other unit or other structure, provided, however, that this provision shall not be deemed to prohibit building additions, such as porches, garages, room additions or solar greenhouses.

(Ord. No. 200-89, § 3, 12-18-89)

Sec. 14-97 - 14-100. Reserved.

DIVISION 5. R-4 RESIDENTIAL ZONE*

***Editor's note--**Ord. No. 535-84, adopted May 7, 1984, repealed former Div. 5, §§ 14-101--14-104, and enacted a new Div. 6, §§ 14-101--14-106. The result of this action was that this Art. III contained no division designated 5. The editor has, therefore, in agreement with the city, retained the division designation 5. Formerly §§ 14-101--14-104 were derived from Code 1968, § 602.5.A--D; Ord. No. 499-74, § 2, adopted Aug. 19, 1974; and Ord. No. 91-83, §§ 1, 2, adopted Aug. 3, 1983.

Sec. 14-101. Purpose.

The purpose of the R-4 residential zone is:

(a) To preserve the unique character of the Western Promenade area of the city by controlling residential conversions and by allowing the continued mix of single-family, two-family, and low-rise multifamily dwellings and other compatible development at medium densities.

(Ord. No. 535-84, 5-7-84)

Sec. 14-102. Permitted uses.

The following uses are permitted in the R-4 residential zone:

(a) *Residential:*

1. Single-family detached dwellings;

2. New construction of two-family dwellings;

3. Reserved;

4. Handicapped family unit, as defined in section 14-47 (definitions) of this article, for handicapped persons plus staff;

5. Single-family, multiple-component manufactured housing, as defined in section 14-47 (definitions) of this article, except in a National Register Historic District;

6. Single-family, single-component manufactured housing, as defined in section 14-47 (definitions) of this article, on individual lots under separate and distinct ownership, except in a National Register Historic District, provided that each unit meets the performance standards listed below:

   a. More than half of the roof area of each unit shall be double pitched Class C rated shingled roof with a minimum pitch of 3/12.

   b. Each unit shall be installed on a full foundation or a concrete frost wall in accordance with all applicable codes and regulations. Any hitch or tow bar shall be removed from the unit after it is placed on its foundation or frost wall. In the case of a frost wall, vermin proof skirting shall be installed on all sides of the unit. The skirting may consist of either (a) concrete or masonry block or (b) manufactured skirting. If concrete or masonry block skirting is installed, either the exterior siding of the unit shall extend within one (1) foot of grade or decorative masonry siding shall be applied. If manufactured skirting material is installed, the color shall be identical to or compatible with the exterior siding of the unit.

   c. Each unit shall have exterior siding that is residential in appearance, including but not limited to natural materials such as wood clapboards or shakes, or exterior materials

which simulate wood. Clapboards or simulated clapboards shall have less than eight (8) inches of exposure and sheet metal type siding shall not be permitted.

d. Each unit shall have the long side of the unit parallel to the street line where the required street frontage is met.

e. Each unit shall be provided with at least two (2) trees meeting the city's arboricultural specifications and which are clearly visible from the street line and are located so as to visually widen the narrow dimension or proportion of the unit.

f. Each unit shall have all fuel oil supply systems constructed and installed within the foundation wall or underground in accordance with all applicable codes and regulations.

g. No unit shall be horizontally or vertically attached to any other unit or other structure, provided however, that this provision shall not be deemed to prohibit building additions, such as porches, garages, room additions or solar greenhouses.

(b) *Other:*

1. Cemeteries;

2. Parks, and other active and passive noncommercial recreation spaces;

3. Accessory uses customarily incidental and subordinate to the location, function, and operation of principal uses, subject to the provisions of section 14-404 (accessory use) of this article;

4. Home occupations subject to the provisions of section 14-410 (home occupation) of this article;

5. Municipal uses, excluding those specifically set

forth in section 14-103 of this division.

6. Special needs independent living units, provided that a building housing special needs independent living units shall not house other types of residential or other permitted uses. The owner of a special needs independent living unit building shall file in the Cumberland County Registry of Deeds a statement under oath that the building is a special needs independent living unit building and that any future change of use to a permitted residential use shall require a change in use review by the City of Portland and a decrease in the number of units in the building in accordance with the Portland City Code, chapter 14. The owner shall file proof of such recording with the building inspections division prior to the issuance of any certificates of occupancy for the new uses.

7. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 535-84, 5-7-84; Ord. No. 264-84, § 1, 12-17-84; Ord. No. 67-87, § 2, 11-2-87; Ord. No. 82-88, § 1, 7-19-88; Ord. No. 86A-89, § 4, 8-21-89; Ord. No. 33-91, § 5, 1-23-91; Ord. No. 33A-91, § 2, 4-17-91)

***Editor's note--**Ord. No. 82-88, § 1, adopted July 19, 1988, amended § 14-102 by adding subsection (b)5 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 82-88.

Sec. 14-103. Conditional uses.

The following uses shall be permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) of this article and any special provisions, standards or requirements specified below:

(a) *Residential:*

1. Sheltered care group homes, as defined in section 14-47 of this article, for up to twelve (12) individuals, plus staff, and serving a primary population which is not handicapped persons, parolees, persons involved in correctional

prerelease programs, or current illegal drug users, provided that:

a. A sheltered care group home shall not be located within five hundred (500) feet of another, as measured along street lines to the respective property lines;

b. There shall be no open outside stairways or fire escapes above the ground floor;

c. The facility shall make provision for adequate on-site staffing in accordance with applicable state licensing requirements. If a facility is not licensed by the state, there shall be a minimum of one (1) staff person for every ten (10) residents or fraction thereof.

The board of appeals may impose conditions upon a conditional use permit concerning the creation or operation of a sheltered care group home including but not limited to the following: site and building maintenance; lighting, fencing, and other appropriate security measures; screening and buffering of parking areas; compatibility of any additions or alterations with the existing residential structure; compatibility of new structures with the architectural character of the surrounding area; and limitation on the duration of a sheltered care group home permit.

2. Alteration of an existing structure to accommodate one (1) or more dwelling units provided that:

a. No additional dwelling unit shall have less than six hundred (600) square feet of floor area, exclusive of common hallways and storage in basement and attic;

b. No open outside stairways or fire escapes above the ground floor shall be or have been constructed in the immediately preceding five (5) years;

c. The alteration will not result in a total

cubic volume increase of more than ten (10) percent within the immediately preceding five (5) years;

d. A lower level dwelling unit shall have a minimum of one-half of its floor-to-ceiling height above the average adjoining ground level;

e. No existing dwelling unit shall be decreased to less than one thousand (1,000) square feet of floor area;

f. Three thousand (3,000) square feet of land area per dwelling unit shall be required;

g. The project shall be subject to article V (site plan) of this chapter for site plan review and approval.

h. Parking shall be provided as required in division 20 of this article.

3. Multiplex development with three (3) or more horizontally or vertically attached, or a series of such attached dwelling units and the construction of at least one (1) building, provided that:

a. No open outside stairways or fire escapes above the ground floor shall be constructed;

b. No habitable space in a dwelling unit shall be below grade, except basements that are a part of and below aboveground units.

c. Three thousand (3,000) square feet of land area per dwelling unit shall be required for the first three (3) dwelling units with a requirement of six thousand (6,000) square feet of land area per dwelling unit for additional dwelling units;

d. No dwelling unit shall have less than six hundred (600) square feet of floor area, exclusive of common hallways and storage in

basement and attic;

The project shall be subject to article V (site plan) of this chapter for Planning Board site plan review and approval.

(b) ***Institutional:*** Any of the following conditional uses provided that, notwithstanding section 14-474(a) (conditional uses) of this article or any other provision of this Code, the Planning Board shall be substituted for the board of appeals as the reviewing authority:

1. Elementary, middle, and secondary school (except as otherwise provided in section 14-276.10);

2. Places of assembly;

Such uses shall be subject to the following conditions and standards in addition to the provisions of section 14-474:

a. In the case of expansion of existing such uses onto land other than the lot on which the principal use is located, it shall be demonstrated that the proposed use cannot reasonably be accommodated on the existing site through more efficient utilization of land or buildings, and will not cause significant physical encroachment into established residential areas: and

b. The proposed use will not cause significant displacement or conversion of residential uses existing as of June 1, 1983, or thereafter; and

c. In the case of a use or use expansion which constitutes a combination of the above-listed uses with capacity for concurrent operations, the applicable minimum lot sizes shall be cumulative; and

d. Article V (site plan) sections 14-522 and 14-523 notwithstanding, in the case of places of assembly the proposed use shall be subject to

the requirements of article V (site plan) of this chapter; and

e. Community halls:

i. The structure was in existence as of January 4, 2010;

ii. The structure was built for institutional or other non-residential uses;

iii. The structure is operated by, or operated subject to the control of, a not-for-profit entity in accordance with its not-for-profit purposes; and

iv. A parking management plan is submitted for review and approval by the planning board; and

f. Private club or fraternal organizations: any such establishment serving alcoholic beverages or in possession of a license for serving alcoholic beverages shall be located on a large lot, as specified in the minimum lot size provisions of this section.

(c) *Other:*

1. Off-street parking of passenger cars as provided in section 14-344 (board of appeals may authorize parking in certain residential zones) of this article;

2. Utility substations, including sewage and water pumping stations and standpipes, electric power substations, transformer stations, and telephone electronic equipment enclosures and other similar structures, provided that such uses are suitably screened and landscaped so as to ensure compatibility with the surrounding neighborhood;

3. Day care facilities or home babysitting services not permitted as a home occupation under section 14-410, and nursery schools and kindergartens,

subject to the following conditions:

a. The facility shall be located in a structure in which there is one (1) or more occupied residential units or in an existing accessory structure, unless the facility is located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use or in a nonresidential structure accessory to the principal nonresidential use.

b. The maximum capacity shall be twelve (12) children for facilities located in residential or existing structures accessory thereto, unless the additional standards in subsection v. are met. There shall be no maximum limit on the number of children in a facility located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care use, home babysitting use, nursery school, or kindergarten or in a nonresidential structure accessory thereto, provided that any such structure that serves more than twelve (12) children shall be subject to review under article V of this chapter.

c. Outdoor play areas shall be screened and buffered from surrounding residences with landscaping and/or fencing to minimize visual and noise impacts.

d. Solid waste shall be stored in covered containers. Such containers shall be screened on all four (4) sides.

e. Day care facilities, nursery schools and kindergartens located either in structures that have been in residential use within the past five (5) years or in existing accessory structures and that serve between thirteen (13) and twenty-four (24) children shall meet

the following additional standards:

i. The facility shall provide a minimum of seventy-five (75) square feet of outdoor play area per child;

ii. The play area shall be located in the side and rear yards only and shall not be located in front yards;

iii. Outside play areas shall be separated from abutting properties by a fence at least forty-eight (48) inches in height;

iv. A ten-foot wide landscaped buffer shall be required outside of the fenced play area, and shall be established in accordance with the landscaping standards of the City's Technical Standards and Guidelines;

v. The minimum lot size for a day care facility, home babysitting service, nursery school, or kindergarten located in a residential or existing accessory structure and serving more than twelve (12) children shall be twenty thousand (20,000) square feet;

vi. ***Off-street parking:*** Off-street parking is required as provided in division 20 (off-street parking) of this article.

vii. The maximum number of children in a day care facility, home babysitting service, nursery school, or kindergarten located in a residential or existing accessory structure shall be twenty-four (24); and

viii. Any additions or exterior alterations such as facade materials, building form, roof pitch, and exterior doors shall be designed to be compatible with the architectural style of the building and preserve the residential appearance of

the building.

4. Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

   a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

   b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

   c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

   d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

   e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

   f. Towers and associated guy wires shall be

sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

5. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 535-84, 5-7-84; Ord. No. 264-84, § 2, 12-17-84; Ord. No. 76-85, § 5, 7-1-85; Ord. No. 67-87, § 3, 11-2-87; Ord. No. 82-88, §§ 2, 3, 7-19-88; Ord. No. 235-91, § 7, 2-4-91; Ord. No. 118-93, § 7, 10-18-93; Ord. No. 133-96, § 4, 11-18-96; Ord. No. 154-96, § 7, 12-16-96; Ord. No. 222-99, §4, 3-01-99; Ord. No. 29-09/10, 8-3-09 emergency passage; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 240-09/10, 6-21-10; Ord. No. 9 10/11, 8-2-10; Ord. No. 138-09/10, 1-20-10; Ord. No. 149-10/11, 3-7-11; Ord. No. 33-11/12, 1-18-12)

***Editor's note--**Ord. No. 82-88, §§ 2, 3, adopted July 19, 1988, amended this section by amending subsection 14-103(a) and by deleting subsection (b)3, municipal use. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 82-88.

Sec. 14-104. Prohibited uses.

Uses that are not expressly enumerated herein as either permitted uses or conditional uses are prohibited.

(Ord. No. 535-84, 5-7-84)

Sec. 14-105. Dimensional requirements.

In addition to the provisions of division 25 of this article (space and bulk regulations and exceptions), lots in the R-4 zone shall meet the following requirements:

(a) *Minimum lot size:*

1. Residential: Six thousand (6,000) square feet except as provided for lots of record in section 14-433 (lots of record and accessory structure setbacks for existing buildings) of this article.

2. Multiplex: Nine thousand (9,000) square feet.

3. School: Thirty thousand (30,000) square feet.

4. Places of assembly:

Large	30,000 sq. ft.
Medium	15,000 sq. ft.
Small	7,500 sq. ft.

5. Municipal use: Six thousand (6,000) square feet.

6. All other uses: Six thousand (6,000) square feet.

Provided that for uses specified in section 14-105(a)3 through 5 above, no minimum lot area shall be required in the following cases:

a. Uses existing on June 1, 1983;

b. Expansion onto land abutting the lot on which the principal use is located;

c. Expansion onto land other than the lot on which the principal use is located to the extent that such expansion consists of the reuse of surface parking area or nonresidential structures existing and in nonresidential use as of June 1, 1983, provided that such reuse is contained within the lot of record of such structure or parking area as of June 1, 1983;

7. Expansion onto land other than the lot on which the

principal use is located of no more than fifteen (15) percent of the total contiguous land area of the existing use, or one (1) acre, whichever is less, within any five-year period.

(b) *Minimum lot area per dwelling unit:* Three thousand (3,000) square feet, except as provided for a multiplex. This requirement may be reduced by up to twenty (20) percent for a special needs independent living unit.

(c) *Minimum street frontage:* Fifty (50) feet.

(d) *Minimum yard dimensions:*

(Yard dimensions include setbacks of structures from property lines and setbacks of structures from one another. No structure shall occupy the minimum yard of another structure.)

1. *Front yard:*

Principal or accessory structures: Twenty-five (25) feet.

A front yard need not exceed the average depth of front yards on either side of the lot. A lot of record existing as of June 5, 1957, and less than one hundred (100) feet deep need not be deeper than twenty (20) percent of the depth of the lot.

2. *Rear yard:*

a. Principal or accessory structures with ground coverage greater than one hundred (100) square feet: Twenty-five (25) feet.

b. Accessory detached structures with a ground coverage of one hundred and forty-four (144) square feet or less: Five (5) feet.

Setbacks for swimming pools shall be as provided for in section 14-432 (swimming pools) of this article.

3. *Side yard:*

a. Principal or accessory structures with ground coverage greater than one hundred (100) square feet:

Height of Structure	*Required Side Yard*
1 story	10 feet
1 1/2 stories	10 feet
2 stories	14 feet
2 1/2 stories	16 feet

The width of one (1) side yard may be reduced one (1) foot for every foot that the other side yard is correspondingly increased, but no side yard shall be less than ten (10) feet. In the case of a lot of record existing as of June 5, 1957, and held under separate and distinct ownership from adjacent lots, the required side yard may be reduced in order to provide a buildable width of up to twenty-four (24) feet, but in no case shall the resulting side yards be less than ten (10) feet.

b. Accessory detached structures with ground coverage of one hundred and forty-four (144) square feet or less: Five (5) feet.

4. *Side yard on side streets:*

Principal or accessory structures: Twenty (20) feet.

A side yard on a side street need not exceed the average depth of front setback directly abutting the lot.

(e) *Maximum lot coverage:* Thirty (30) percent of lot area.

(f) *Minimum width of lot:* Sixty (60) feet.

(g) *Maximum structure height:*

1. Principal structure: Thirty-five (35) feet.

2. Accessory detached structure: Eighteen (18) feet.

(h) *Maximum floor area for places of assembly on a collector or arterial road:*

Large	Not limited
Medium	4,500 sq. ft.
Small	2,250 sq. ft.

(i) *Maximum floor area for places of assembly not on a collector or arterial road:*

Large	4,500 sq. ft.
Medium	2,250 sq. ft.
Small	1,125 sq. ft.

(Ord. No. 535-84, 5-7-84; Ord. No. 82-88, § 4, 7-19-88; Ord. No. 235-91, § 9, 2-4-91; Ord. No. 33A-91, § 3, 4-17-91; Ord. No. 118-93, § 8, 10-18-93; Ord. No. 154-96, § 8, 12-16-96; Ord. No. 131-08/09, 12-15-08; Ord. No. 127-09/10, 1-4-10 emergency passage)

***Editor's note--**Ord. No. 82-88, § 4, adopted July 19, 1988, amended § 14-105 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 82-88.

Sec. 14-106. Other requirements.

[Other requirements are as follows:]

(a) *Off-street parking:* Off-street parking is required as provided in division 20 (off-street parking) of this article.

(b) *Shoreland and flood plain management regulations:* Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(c) *Storage of vehicles:* Only one (1) unregistered motor vehicle may be stored outside on the premises for a period not exceeding thirty (30) days.

Sec. 14-107 – 14-115. Reserved.

DIVISION 6. R-5 RESIDENTIAL ZONE*

***Editor's note--**Ord. No. 536-84, adopted May 7, 1984, repealed former Div. 6, §§ 14-116--14-119, and enacted in lieu thereof a new Div. 7, §§ 14-116--14-121. However, in order to avoid duplication of subsequent division numbers and in consultation with the city, the provisions have been retained as Div. 6. Sections 14-116--14-119 were formerly derived from Code 1968, § 602.5.A--D, and Ord. Nos. 207-72, 499-74, 193-82, 92-83, 422-83.

Sec. 14-116. Purpose.

The purpose of the R-5 residential zone is:

To provide appropriate areas of the city for medium-density residential development characterized by single-family and low-intensity multifamily dwellings on individual lots; to ensure the stability of established medium-density neighborhoods by controlling residential conversions; and to provide for planned residential unit development on substantially sized parcels. Such PRUD development shall respond to the physical qualities of a site and complement the scale, character and style of the surrounding neighborhood.

(Ord. No. 536-84, 5-7-84; Ord. No. 83-88, § 1, 7-19-88)

***Editor's note--**Ord. No. 83-88, § 1, adopted July 19, 1988, amended § 14-116 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 83-88.

Sec. 14-117. Permitted uses.

The following uses are permitted in the R-5 residential zone:

(a) *Residential:*

1. Single- and two-family dwellings; except that development of two (2) or more two-family dwellings on contiguous lots within any two-year period shall be subject to review as specified under the provisions of 14-117(a)2e if such lots were under

single ownership at any time within the two-year period immediately prior to development of the first such lot. No building reviewed as a two-family dwelling in accordance with article V (site plan) of this chapter or not reviewed under article V shall be altered or enlarged to include any additional dwelling unit within five (5) years from the date of issuance of the building permit. Any building reviewed as a two-family dwelling in accordance with article V (site plan) which is altered or enlarged to include any additional dwelling unit after this five-year period shall be reviewed as a level I site plan pursuant to article V of this chapter.

2. Multiplex development with three (3) or more horizontally or vertically attached dwelling units or a series of such attached dwelling units and the construction of at least one (1) building on a parcel of less than two (2) acres, provided that:

   a. The land area requirement for a multiplex shall be six thousand (6,000) square feet of land area per dwelling unit; except that a multiplex with two hundred fifty (250) feet or more of street frontage needs only forty-five hundred (4,500) square feet of land area per dwelling unit;

   b. No dwelling unit shall have less than six hundred (600) square feet of floor area, exclusive of common hallways and storage in basement and attic;

   c. No open outside stairways or fire escapes above the ground floor shall be constructed;

   d. No habitable space in a dwelling unit shall be below grade, except basements that are a part of and below aboveground units;

   e. Such development shall be subject to article V (site plan) of this chapter for site plan review approval and shall conform to the R-5 Design Standards.

3. Planned residential unit development (PRUD) consisting of horizontally or vertically attached dwelling units, or a series of such dwelling units. No dimensional requirements contained in section 14-120 shall apply with respect to such development, except for those requirements specifically denoted for PRUD. There shall be no open outside stairways or fire escapes above the ground floor. All land shall be owned and used in common and shall be governed and maintained as set forth in section 14-498(i)(3) of this chapter. Such development shall be subject to review and approval by the Planning Board with respect to the requirements of article V (site plan) and article IV (subdivisions) of this chapter, whether or not such development is a subdivision within the meaning of article IV of this chapter, as now enacted or as hereafter amended.

4. Handicapped family unit, as defined in section 14-47 (definitions) of this article, for handicapped persons plus staff.

5. Single-family, multiple-component manufactured housing, as defined in section 14-47 (definitions) of this article, except in a National Register Historic District.

6. Single-family, single-component manufactured housing, as defined in section 14-47 (definitions) of this article, on individual lots under separate and distinct ownership, except in a National Register Historic District, provided that each unit meets the performance standards listed below:

   a. More than half of the roof area of each unit shall be a double pitched Class C rated shingled roof with a minimum pitch of 3/12.

   b. Each unit shall be installed on a full foundation or a concrete frost wall in accordance with all applicable codes and regulations. Any hitch or tow bar shall be removed from the unit after it is placed on

its foundation or frost wall. In the case of a frost wall, vermin proof skirting shall be installed on all sides of the unit. The skirting may consist of either (a) concrete or masonry block or (b) manufactured skirting. If concrete or masonry block skirting is installed, either the exterior siding of the unit shall extend within one (1) foot of grade or decorative masonry siding shall be applied. If manufactured skirting material is installed, the color shall be identical to or compatible with the exterior siding of the unit.

c. Each unit shall have exterior siding that is residential in appearance, including but not limited to natural materials such as wood clapboards or shakes, or exterior materials which simulate wood. Clapboards or simulated clapboards shall have less than eight (8) inches of exposure and sheet metal type siding shall not be permitted.

d. Each unit shall have the long side of the unit parallel to the street line where the required street frontage is met.

e. Each unit shall be provided with at least two (2) trees meeting the city's arboricultural specifications and which are clearly visible from the street line and are located so as to visually widen the narrow dimension or proportion of the unit.

f. Each unit shall have all fuel oil supply systems constructed and installed within the foundation wall or underground in accordance with all applicable codes and regulations.

g. No unit shall be horizontally or vertically attached to any other unit or other structure, provided however, that this provision shall not be deemed to prohibit building additions, such as porches, garages, room additions or solar greenhouses.

(b) *Other:*

1. Parks, and other active and passive noncommercial recreation spaces;

2. Accessory uses customarily incidental and subordinate to the location, function, and operation of principal uses, subject to the provisions of section 14-404 (accessory use) of this article;

3. Home occupation, subject to the provisions of section 14-410 (home occupation) of this article;

4. Municipal uses, excluding those specifically set forth in section 14-118 of this division.

5. Special needs independent living units on lots of less than two (2) acres, provided that a building housing special needs independent living units shall not house other types of residential or other permitted uses. The owner of a special needs independent living unit building shall file in the Cumberland County Registry of Deeds a statement under oath that the building is a special needs independent living unit building and that any future change of use to a permitted residential use shall require a change in use review by the City of Portland and a decrease in the number of units in the building in accordance with the Portland City Code, chapter 14. The owner shall file proof of such recording with the building inspections division prior to the issuance of any certificates of occupancy for the new uses.

6. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 536-84, 5-7-84; Ord. No. 265-84, § 1, 12-17-84; Ord. No. 98-86, § 1, 10-6-86; Ord. No. 83-88, §§ 2, 3, 7-19-88; Ord. No. 387-89, 4-3-89; Ord. No. 86A-89, § 5, 8-21-89; Ord. No. 95-89, § 1, 9-6-89; Ord. No. 279-90, § 1, 3-10-90; Ord. No. 33-91, § 6, 1-23-91; Ord. No. 33A-91, § 4, 4-17-91; Ord. No. 220-95, 4-3-95; Ord. No. 165-97, § 3, 12-1-97; Ord. No. 56-08/09, 9-3-08; Ord. No. 278-09/10, 7-19-10; Ord. No. 33-11/12, 1-18-12)

***Editor's note--**Ord. No. 83-88, §§ 2, 3, adopted July 19, 1988, amended

subsections 14-117(a) and (b)4 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 83-88. Ord. No. 95-89, § 1, adopted Sept. 6, 1989, amended subsection (a)1 of § 14-117 to read as set out and, as amended, further ordained "that the prohibition upon unit additions contained in this ordinance shall not apply where a building permit has been issued. Additions proposed to such buildings shall require major site plan review and all other reviews required by this chapter."

Sec. 14-118. Conditional uses.

The following uses shall be permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) and any special provisions, standards or requirements specified below:

(a) *Residential:*

1. Reserved.

2. Sheltered care group homes, as defined in section 14-47 of this article, for up to twelve (12) individuals, plus staff, and serving a primary population which is not handicapped persons, parolees, persons involved in correctional prerelease programs, or current illegal drug users, provided that:

   a. A sheltered care group home shall not be located within five hundred (500) feet of another, as measured along street lines to the respective property lines;

   b. There shall be no open outside stairways or fire escapes above the ground floor;

   c. The facility shall make provision for adequate on-site staffing and supervision of residents in accordance with applicable state licensing requirements. If a facility is not licensed by the state, there shall be a minimum of one (1) staff person for every ten (10) residents or fraction thereof.

   The board of appeals may impose conditions upon a conditional use permit concerning the creation or

operation of a sheltered care group home including but not limited to the following: site and building maintenance; lighting, fencing, and other appropriate security measures; screening and buffering of parking areas; compatibility of any additions or alterations with the existing residential structure; compatibility of new structures with the architectural character of the surrounding area; and limitation on the duration of the sheltered care group home permit.

3. Alteration of a structure existing and not in residential use as of January 1, 1984, to three (3) or more dwelling units, provided that:

   a. No dwelling unit shall have less than six hundred (600) square feet of floor area, exclusive of common hallways and storage in basement and attic;

   b. No open outside stairways or fire escapes above the ground floor shall be constructed or have been constructed in the immediately preceding five (5) years;

   c. A lower level dwelling unit shall have a minimum of one-half of its floor-to-ceiling height above the average adjoining ground level;

   d. Three thousand (3,000) square feet of land area per dwelling unit shall be required;

   e. On-site parking shall be required as specified in division 20 (off-street parking) of this article, for the combined uses of the site;

   f. The project shall be subject to article V (site plan) of this chapter for site plan review and approval and the following additional standards:

      1. Any addition or exterior alterations such as facade materials, building form, and roof pitch shall be designed to be

compatible with the architectural style of the structure;

2. The scale and surface area of parking, driveways, and paved areas shall be arranged and landscaped to be compatible in size and scale with neighboring properties in the area and to properly screen vehicles from adjacent properties and streets.

4. Conversions of existing two-family or multiplex structures into lodging houses, provided that a lodging house shall not be located within five hundred (500) feet of another as measured along street lines to the respective property lines.

5. Alteration of a single-family dwelling existing as of September 3, 2008 on a nonconforming lot to accommodate an accessory dwelling unit within and clearly subordinate the principal structure provided that:

a. The accessory unit shall have a minimum floor area of four hundred (400) square feet that represents no more than thirty (30) percent of the gross floor area of the principal dwelling unit Gross floor area shall exclude any floor area that has less than two-thirds of its floor-to-ceiling height above the average adjoining ground level and may include the attic if such space is habitable.

b. The principal dwelling unit shall be located on a lot of no less than four thousand (4,000) square feet and no more than six thousand (6,000) square feet;

c. Either the accessory or principal dwelling unit shall be occupied by the owner of the lot, except for bona fide absences of a temporary nature;

d. Parking shall be provided as required by Division 20 of this article.

e. There shall be no open, outside stairways or fire escapes above the ground floor; and

f. The project shall be subject to Article V for site plan review and approval and the following additional standards:

i. Any additions or exterior alterations such as façade materials, building form, roof pitch, and exterior doors shall be designed to be compatible with the architectural style of the building and preserve the single family appearance of the building; and

ii. The scale and surface area of parking, driveways and paved areas shall be arranged and landscaped properly to screen vehicles from adjacent properties and streets.

(b) ***Institutional:*** Any of the following conditional uses provided that, notwithstanding section 14-474(a) (conditional uses) of this article, or any other provision of this Code, the Planning Board shall be substituted for the board of appeals as the reviewing authority:

1. Elementary, middle, and secondary school;

2. a. Long-term and extended care facilities;

b. Intermediate care facility for thirteen (13) or more persons;

3. Places of assembly;

4. Reserved;

5. Hospital;

6. College, university, trade school.

Such uses shall be subject to the following conditions

and standards in addition to the provisions of section 14-474:

a. In the case of expansion of existing such uses onto land other than the lot on which the principal use is located, it shall be demonstrated that the proposed use cannot reasonably be accommodated on the existing site through more efficient utilization of land or buildings, and will not cause significant physical encroachment into established residential areas; and

b. The proposed use will not cause significant displacement or conversion of residential uses existing as of June 1, 1983, or thereafter; and

c. In the case of a use or use expansion which constitutes a combination of the above-listed uses with capacity for concurrent operations, the applicable minimum lot sizes shall be cumulative; and

d. Article V (site plan) sections 14-522 and 14-523 notwithstanding, in the case of places of assembly the proposed use shall be subject to the requirements of article V (site plan) of this chapter; and

e. In the case of community halls:

i. The structure was in existence as of January 4, 2010;

ii. The structure was built for institutional or other non-residential uses;

iii. The structure is operated by, or operated subject to the control of, a not-for-profit entity in accordance with its not-for-profit purposes; and

iv. A parking management plan is submitted

for review and approval by the planning board; and

f. In the case of private club or fraternal organizations: any such establishment serving alcoholic beverages or in possession of a license for serving alcoholic beverages shall be located on a large lot, as specified in the minimum lot size provisions of this section.

d. A college, university or trade school may build principal structures to a height of fifty-five (55) feet, not including the USM overlay zone, if the following standards can be met:

(i) Lot size: 10 acres which may include adjacent land owned by the institution on both sides of a public street.

(ii) Minimum setback between buildings on-site: 20 feet.

(iii) Minimum setback from external property boundary: 30 feet, except that parking garages over 35 feet in height must be located 50 feet from external property boundaries when adjacent to an adjoining residential use.

(iv) The area between the structure and adjoining residential uses must be adequately screened with appropriate landscaping or other features to buffer the building and effects thereof (i.e. noise, light, etc) from abutting properties.

(c) *Other:*

1. Off-street parking of passenger cars as provided in section 14-344 (board of appeals may authorize parking in certain residential zones) of this article;

2. Utility substations such as water and sewage pumping stations and standpipes, electric power substations, transformer stations, and telephone electronic equipment enclosures and other similar structures, provided that such uses are suitably screened and landscaped so as to ensure compatibility with the surrounding neighborhood;

3. Day care facilities or home babysitting services not permitted as a home occupation under section 14-410, and nursery schools and kindergartens subject to the following conditions:

   a. The facility shall be located in a structure in which there is one (1) or more occupied residential units or in an existing accessory structure, unless the facility is located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use or in a nonresidential structure accessory to the principal nonresidential use.

   b. The maximum capacity shall be twelve (12)children for facilities located in residential or existing structures accessory thereto, unless the additional standards in subsection v. are met. There shall be no maximum limit on the number of children in a facility located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care use, home babysitting use, nursery school, or kindergarten, or in a nonresidential structure accessory thereto, provided that any such structure that serves more than twelve (12) children shall be subject to review under article V of this chapter.

   c. Outdoor play areas shall be screened and buffered from surrounding residences with landscaping and/or fencing to minimize visual

and noise impacts.

d. Solid waste shall be stored in covered containers. Such containers shall be screened on all four (4) sides.

e. Day care facilities, nursery schools and kindergartens located either in structures that have been in residential use within the past five (5) years or in existing accessory structures and that serve between thirteen (13) and twenty-four (24) children shall meet the following additional standards:

i. The facility shall provide a minimum of seventy-five (75) square feet of outdoor play area per child;

ii. The play area shall be located in the side and rear yards only and shall not be located in front yards;

iii. Outside play areas shall be separated from abutting properties by a fence at least forty-eight (48) inches in height;

iv. A ten-foot wide landscaped buffer shall be required outside of the fenced play area, and shall be established in accordance with the landscaping standards of the City's Technical Standards and Guidelines;

v. The minimum lot size for a day care facility, home babysitting service, nursery school, or kindergarten located in a residential or existing accessory structure and serving more than twelve (12) children shall be twenty thousand (20,000) square feet;

vi. ***Off-street parking:*** Off-street parking is required as provided in division 20 (off-street parking) of this article.

vii. The maximum number of children in a day care facility, home babysitting service, nursery school or kindergarten located in a residential or existing accessory structure shall be twenty-four (24); and

viii. Any additions or exterior alterations such as facade materials, building form, roof pitch, and exterior doors shall be designed to be compatible with the architectural style of the building and preserve the residential appearance of the building.

4. Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength,

stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

5. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 536-84, 6-7-84; Ord. No. 265-84, § 2, 12-17-84; Ord. No. 76-85, § 6, 7-1-85; Ord. No. 83-88, § 4, 7-19-88; Ord. No. 235-91, § 10, 2-4-91; Ord. No. 118-93, § 9, 10-18-93; Ord. No. 133-96, § 5, 11-18-96; Ord. No. 154-96, § 9, 12-16-96; Ord. No. 222-99, §5, 3-01-99; Ord. No. 94-07/08, 11-5-07; Ord. No. 56/08/09, 9-3-08; Ord. No. 29-09/10, 8-3-09 emergency passage; Ord. ***Editor's note--**Ord. No. 83-88, § 4, adopted July 19, 1988, amended § 14-118 by deleting subsection (b)5. See also the editor's note to Art. III of

this chapter for additional provisions relative to Ord. No. 83-88.

Sec. 14-119. Prohibited uses.

Uses that are not expressly enumerated herein as either permitted uses or conditional uses are prohibited.
(Ord. No. 536-84, 5-7-84)

Sec. 14-120. Dimensional requirements.

(a) In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, lots in the R-5 zone shall meet the following minimum requirements:

1. *Minimum lot size:*

a. Residential: Six thousand (6,000) square feet except as provided for lots of record in section 14-433 (lots of record and accessory structure setbacks for existing buildings) of this article. A lot in an unsewered residential district shall meet the provisions of the state Minimum Lot Size Law, 12 M.R.S.A. section 4807, or the applicable zoning lot size, whichever is larger.

b. Reserved.

c. Long-term, extended, or intermediate care facility: Two (2) acres.

d. School: Thirty thousand (30,000) square feet.

e. Places of assembly:

Large	43,560 sq. ft.
Medium	21,780 sq. ft.
Small	10,890 sq. ft.

f. Municipal use: Six thousand (6,000) square feet.

g. Hospital: Five (5) acres.

h. College, university, trade school: Two (2) acres.

i. Multiplex: Nine thousand (9,000) square feet.

j. Planned residential unit development (PRUD): Two (2) acres gross area, as defined in section 14-47 (definitions) of this article, of contiguous land.

k. All other uses: Six thousand (6,000) square feet.

l. Lodging houses: Nine thousand (9,000) square feet.

Provided that for uses specified in section 14-120 (1)(c) through (i) above, no minimum lot area shall be required in the following cases:

i. Uses existing as of June 1, 1983;

ii. Expansion of uses onto land abutting the lot on which the principal use is located;

iii. Expansion onto land other than the lot on which the principal use is located to the extent that such expansion consists of the reuse of surface parking area or nonresidential structures existing and in nonresidential use as of June 1, 1983, provided that such reuse is contained within the lot of record of such structure or parking area as of June 1, 1983;

iv. Expansion onto land other than the lot on which the principal use is located of no more than fifteen (15) percent of the total contiguous land area of the existing use, or one (1) acre, whichever is less, within any five-year period.

2. *Minimum lot area per dwelling unit:*

PRUD: Three thousand (3,000) square feet of net land area as defined in section 14-47 (definitions) of this article. As part of a site plan and subdivision application, the applicant shall provide a calculation of those factors deducted to determine net land area. In addition, such net area factors shall be delineated on a site plan.

Special needs independent living units: Four thousand eight hundred (4,800) square feet; except that special needs independent living units with two hundred fifty (250) feet or more of frontage shall require three thousand six hundred (3,600) square feet.

Other uses: Three thousand (3,000) square feet, except as provided for a multiplex.

3. *Minimum street frontage:* Fifty (50) feet.

4. *Minimum yard dimension:*

(Yard dimensions include setbacks of structures from property lines and setbacks of structures from one another. No structure shall occupy the minimum yard of another structure.)

a. *Front yard:*

Principal or accessory structures: Twenty (20) feet.

A front yard need not exceed the average depth of front yards on either side of the lot. A lot of record existing as of June 5, 1957, and less than one hundred (100) feet deep need not be deeper than twenty (20) percent of the depth of the lot.

b. *Rear yard:*

i. Principal or attached accessory structures with ground coverage greater than one hundred (100) square feet: Twenty (20) feet.

ii. Accessory detached structures with ground coverage of one hundred and forty-four(144) square feet or less: Five (5) feet.

Setbacks from swimming pools shall be as provided in section 14-432 (swimming pools) of this article.

c. *Side yard:*

i. Principal or accessory structures with ground coverage greater than one hundred (100) square feet:

Height of Structure	*Required Side Yard*
1 story	8 feet
1 1/2 stories	8 feet
2 stories	12 feet
2 1/2 stories	14 feet

The width of one (1) side yard may be reduced one (1) foot for every foot that the other side yard is correspondingly increased, but no side yard shall be less than eight (8) feet in width. In the case of a lot of record existing as of June 5, 1957, and held under separate and distinct ownership from adjacent lots, the required side yard may be reduced in order to provide a buildable width of up to twenty-four (24) feet, but in no case shall the resulting side yards be less than eight (8) feet.

ii. Accessory detached structures with ground coverage of one hundred and forty-four(144) square feet or less: Five (5) feet.

d. *Side yard on side street:*

Principal or accessory structures: Fifteen (15) feet.

5. *Maximum lot coverage:* Forty (40) percent of lot area.

6. *Minimum lot width:*

Multiplex: Ninety (90) feet.

Other uses: Sixty (60) feet.

7. *Maximum structure height:*

Principal or attached accessory structure: Thirty-five

(35) feet.

Accessory detached structure: Eighteen (18) feet.

Principal and accessory attached structure (PRUD): Thirty-five (35) feet.

8. a. *Maximum number of units in a building (PRUD):* Twelve (12) units

   b. *Maximum number of units in a multiplex building:* Six (6) units.

9. *Maximum length of building (PRUD):* One hundred forty (140) feet.

10. *Maximum length of accessory garage structure (PRUD):* Sixty (60) feet.

11. *Minimum building setback from external subdivision property lines (PRUD):*

   a. *Building length of one hundred (100) feet or less:* Twenty-five (25) feet.

   b. *Building length greater than one hundred (100) feet:* Thirty-five (35) feet.

12. *Minimum recreation open space area (PRUD):* Three hundred (300) square feet per dwelling unit of common area designated for recreation purposes. Such recreation areas shall be level graded, dry, accessible and properly drained. At a minimum, a contiguous area of six thousand (6,000) square feet, with a minimum dimension of fifty (50) feet, shall be provided and shall include one (1) or more of the uses set forth in section 14-526(d) 9. and the planned residential unit development standards in the City of Portland Design Manual, but shall at least be usable as a multipurpose game field. Such recreation areas shall be located at least twenty-five (25) feet from dwelling units.

13. No habitable space in a PRUD shall be below grade, except basements that are part of and below aboveground units.

14. a. ***Minimum rooming unit area for lodging houses:*** Two hundred (200) square feet of combined rooming unit and common area per rooming unit. Each individual rooming unit shall be a minimum of eighty (80) square feet.

b. ***Minimum land area per lodging house rooming unit:*** One thousand (1,000) square feet.

15. ***Maximum floor area for places of assembly on a collector or arterial road:***

Large	Not limited
Medium	4,500 sq. ft.
Small	2,250 sq. ft.

16. ***Maximum floor area for places of assembly not on a collector or arterial road:***

Large	4,500 sq. ft.
Medium	2,250 sq. ft.
Small	1,125 sq. ft.

(b) ***Small residential lot development:*** Single family homes may be built on small lots located in the R-5 and may use the dimensional requirements below if one of the following conditions is met:

The lot is:

Vacant as of (date of enactment); or used exclusively for parking; or contains structure(s) not used for residential purposes; or created from a single lot division of a developed lot and results in a lot meeting the dimensional requirements of § 14-120(b) with the remaining developed portion meeting the dimensional requirements of §14-120(a)(1)-(14) except as expressly provided in Section 14-120(b).

1. ***Minimum lot size***: Five thousand (5,000) square feet.

2. ***Maximum lot size:***

a. Lots that are vacant as of September 3, 2008, used

exclusively for parking, or contain structure(s) not used for residential purposes: Six thousand (6,000) square feet.

b. Original developed lot prior to the single lot division that results in a lot meeting the dimensional requirements of §14-120(b) with the remaining developed portion meeting the dimensional requirements of §14-120(a)(1)-(14): Thirteen thousand (13,000) square feet.

3. *Yard dimensions:*

a. *Side yard:*

i. Principal or attached accessory structures with ground coverage greater than one hundred (100) square feet: Seven (7) feet.

The width of one (1) side yard may be reduced one (1) foot for every foot that the other side yard is correspondingly increased, but no side yard shall be less than four (4) feet in width.

ii. Side yard on side street: Ten (10) feet.

4. *Minimum lot width:* Forty (40).

5. *Minimum street frontage:* Forty (40).

6. *Maximum lot coverage: Fifty (50) percent.*

(Ord. No. 536-84, 5-7-84; Ord. No. 98-86, § 2, 10-6-86; Ord. No. 83-88, § 5, 7-19-88; Ord. No. 386-89, §§ 1, 2, 4-3-89; Ord. No. 235-91, § 11, 2-4-91; Ord. No. 33A-91, § 5, 4-17-91; Ord. No. 118-93, § 10, 10-18-93; Ord. No. 154-96, § 10, 12-16-96; Ord. No. 165-97, § 4, 12-1-97; ORd. No. 56-08/09, 9-3-08; Ord. No. 131-08/09, 12-15-08; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 278-09/10, 7-19-10; Ord. No. 275-10/11, 10-18-10)

***Editor's note--**Ord. No. 83-88, § 5, adopted July 19, 1988, amended § 14-120 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 83-88.

Sec. 14-121. Other requirements.

(a) ***Off-street parking:*** Off-street parking is required as provided in division 20 (off-street parking) of this article.

(b) ***Shoreland and flood plain management regulations:*** Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(c) ***Storage of vehicles:*** Only one (1) unregistered motor vehicle may be stored outside on the premises for a period not exceeding thirty (30) days.

(d) ***Small residential lot development*** shall conform to the site plan standards of § 14-526.

(Ord. No. 536-84, 5-7-84; Ord. No. 15-92, § 9, 6-15-92; Ord. No. 56-08/09, 9-3-08)

Sec. 14-122 - 14-125. Reserved.

DIVISION 6.5. R-5A RESIDENTIAL ZONE*

***Editor's note--**Ord. No. 537-84, adopted May 7, 1984, repealed a nonexistent Div. 6.5 and enacted a new Div. 8. However, in order to avoid duplication of division numbers and in consultation with the city, the provisions have been included as a new Div. 6.5, §§ 14-126--14-131.

Sec. 14-126. Purpose.

The purpose of the R-5A residential zone is:

(a) To provide for moderate-density residential development in off-peninsula sections that can provide a unique residential living experience with a high degree of natural site amenities; and to provide areas of the city in the general proximity of the peninsula that have the capability for adequate municipal services, including traffic corridors with adequate traffic capacity, that can appropriately accommodate a more intensive use of land than other lower-density zoned land and be compatible with surrounding neighborhoods; and to increase affordable housing opportunities in off-peninsula locations by providing a moderate-density

zone.

(Ord. No. 537-84, 5-7-84; Ord. No. 84-88, § 1, 7-19-88)

***Editor's note--**Ord. No. 84-88, § 1, adopted July 19, 1988, amended § 14-126 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 84-88.

Sec. 14-127. Permitted uses.

The following uses are permitted in the R-5A residential zone:

(a) *Residential:*

1. Single-, two-and three-family dwellings.

2. Planned residential unit development (PRUD) consisting of horizontally or vertically attached dwelling units or a series of such dwelling units. No dimensional requirements contained in section 14-130 shall apply with respect to such developments except for those requirements specifically denoted for PRUD. There shall be no open outside stairways or fire escapes above the ground floor. The planned residential unit development shall be implemented through conditional or contract zoning, as described in division 1.5, for specific sites and proposed development meeting the overall requirements specified herein. All land shall be owned and used in common and shall be governed and maintained as set forth in section 14-498(i)(3) of article IV (subdivisions). Such development shall be subject to review and approval by the Planning Board with respect to the requirements of article V (site plan) and article IV (subdivisions) of this chapter, whether or not such development is a subdivision within the meaning of article IV of this chapter, as now enacted or as hereafter amended.

3. Handicapped family unit, as defined in section 14-47 (definitions) of this article, for handicapped persons plus staff.

4. Single-family, multiple-component manufactured housing, as defined in section 14-47 (definitions) of this article, except in a National Register Historic District.

5. Single-family, single-component manufactured housing, as defined in section 14-47 (definitions) of this article, on individual lots under separate and distinct ownership, except in a National Register Historic District, provided that each unit meets the performance standards listed below:

   a. More than half of the roof area of each unit shall be a double pitched Class C rated shingled roof with a minimum pitch of 3/12.

   b. Each unit shall be installed on a full foundation or a concrete frost wall in accordance with all applicable codes and regulations. Any hitch or tow bar shall be removed from the unit after it is placed on its foundation or frost wall. In the case of a frost wall, vermin proof skirting shall be installed on all sides of the unit. The skirting may consist of either (a) concrete or masonry block or (b) manufactured skirting. If concrete or masonry block skirting is installed, either the exterior siding of the unit shall extend within one (1) foot of grade or decorative masonry siding shall be applied. If manufactured skirting material is installed, the color shall be identical to or compatible with the exterior siding of the unit.

   c. Each unit shall have exterior siding that is residential in appearance, including but not limited to natural materials such as wood clapboards or shakes, or exterior materials which simulate wood. Clapboards or simulated clapboards shall have less than eight (8) inches of exposure and sheet metal type siding shall not be permitted.

   d. Each unit shall have the long side of the unit

parallel to the street line where the required street frontage is met.

e. Each unit shall be provided with at least two (2) trees meeting the city's arboricultural specifications and which are clearly visible from the street line and are located so as to visually widen the narrow dimension or proportion of the unit.

f. Each unit shall have all fuel oil supply systems constructed and installed within the foundation wall or underground in accordance with all applicable codes and regulations.

g. No unit shall be horizontally or vertically attached to any other unit or other structure, provided however, that this provision shall not be deemed to prohibit building additions, such as porches, garages, room additions or solar greenhouses.

(b) *Other:*

1. Parks and other active and passive noncommercial recreation spaces;

2. Accessory uses customarily incidental and subordinate to the location, function, and operation of principal uses, subject to the provisions of section 14-404 (accessory use) of this article;

3. Home occupation, subject to the provisions of section 14-410 (home occupation) of this article;

4. Municipal use;

5. Intermediate, extended and long-term care facilities.

6. Wind energy systems, as defined and allowed in Article X, ALtenrative Energy.

(Ord. No. 537-84, 5-7-84; Ord. No 266-84, § 1, 12-17-84; Ord. No. 84-88, §§ 2, 3, 7-19-88; Ord. No. 86A-89, § 6, 8-21-89; Ord. No. 33-91, § 7, 1-23-91; Ord. No.

***Editor's note--**Ord. No. 84-88, §§ 2, 3, adopted July 19, 1988, amended § 14-127 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 84-88.

Sec. 14-128. Conditional use.

The following uses shall be permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) of this article and any special provisions, standards or requirements specified below:

(a) *Residential:*

1. Sheltered care group homes, as defined in section 14-47 of this article, for up to twelve (12) individuals, plus staff, and serving a primary population which is not handicapped persons, parolees, persons involved in correctional prerelease programs, or current illegal drug users, provided that:

   a. A sheltered care group home shall not be located within five hundred (500) feet of another, as measured along street lines to the respective property lines.

   b. There shall be no open outside stairways or fire escapes above the ground floor.

   c. The facility shall make provision for adequate on-site staffing in accordance with applicable state licensing requirements. If a facility is not licensed by the state, there shall be a minimum of one (1) staff person for every ten (10) residents or fraction thereof.

   The board of appeals may impose conditions upon a conditional use permit concerning the creation or operation of a sheltered care group home including but not limited to the following: site and building maintenance; lighting, fencing, and other appropriate security measures; screening and

buffering of parking areas; compatibility of any additions or alterations with the existing residential structure; compatibility of new structures with the architectural character of the surrounding area; and limitation on the duration of the sheltered care group home permit.

(b) *Other:*

1. Utility substations, including water and sewage pumping stations and standpipes, electric power substations, transformer stations and telephone electronic equipment enclosures, and other similar structures, provided that such uses are suitably screened and landscaped so as to ensure compatibility with the surrounding neighborhood.

2. Nursery schools and kindergartens.

3. Day care facilities or home babysitting services not permitted as a home occupation under section 14-410, subject to the following conditions:

   a. The facility shall be located in a structure in which there is one (1) or more occupied residential units or in an existing accessory structure, unless the facility is located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use or in a nonresidential structure accessory to the principal nonresidential use.

   b. The maximum capacity shall be twelve (12) children for facilities located in residential or existing structures accessory thereto, unless the additional standards in subsection v. are met. There shall be no maximum limit on the number of children in a facility located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use, or in a nonresidential structure

accessory thereto, provided that any such structure that serves more than twelve (12) children shall be subject to review under article V of this chapter.

c. Outdoor play areas shall be screened and buffered from surrounding residences with landscaping and/or fencing to minimize visual and noise impacts.

d. Solid waste shall be stored in covered containers. Such containers shall be screened on all four (4) sides.

e. Day care facilities, nursery schools and kindergartens located either in structures that have been in residential use within the past five (5) years or in existing accessory structures and that serve between thirteen (13) and twenty-four (24) children shall meet the following additional standards:

i. The facility shall provide a minimum of seventy-five (75) square feet of outdoor play area per child;

ii. The play area shall be located in the side and rear yards only and shall not be located in front yards;

iii. Outside play areas shall be separated from abutting properties by a fence at least forty-eight (48) inches in height;

iv. A ten-foot wide landscaped buffer shall be required outside of the fenced play area, and shall be established in accordance with the landscaping standards of the City's Technical Standards and Guidelines;

v. The minimum lot size for a day care facility located in a residential or existing accessory structure and serving more than twelve (12) children shall be

twenty thousand (20,000) square feet;

vi. ***Off-street parking***: Off-street parking is required as provided in division 20 (off-street parking) of this article.

vii. The maximum number of children in a day care facility located in a residential or existing accessory structure shall be twenty-four (24); and

viii. Any additions or exterior alterations such as facade materials, building form, roof pitch, and exterior doors shall be designed to be compatible with the architectural style of the building and preserve the residential appearance of the building.

4. Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed

professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

5. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 537-84, 5-7-84; Ord. No. 266-84, § 2, 12-17-84; Ord. No. 76-85, § 7, 7-1-85; Ord. No. 235-91, § 12, 2-4-91; Ord. No. 133-96, § 6, 11-18-96; Ord. No. 29-09/10, 8-3-09 emergency passage; Ord. No. 240-09/10, 6-21-10; Ord. No. 33-11/12, 1-18-12)

Sec. 14-129. Prohibited uses.

Uses that are not expressly enumerated herein as either permitted uses or conditional uses are prohibited.
(Ord. No. 537-84, 5-7-84)

Sec. 14-130. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, lots in the R-5A zone shall meet or exceed the following requirements:

(a) *Minimum lot size:*

Residential: Six thousand (6,000) square feet except as provided for lots of record in section 14-433 (lots of record and accessory structure setbacks for existing buildings) of this article. A lot in an unsewered residential district shall meet the provisions of the state Minimum Lot Size Law, 12 M.R.S.A. Section 4807-A, or the applicable zoning lot size, whichever is the largest.

Planned residential unit development (PRUD): Three (3) acres gross area, as defined in section 14-47 (definitions) of this article, of contiguous land.
Intermediate, extended or long-term care facilities: One and one-half (1 1/2) acres.

(b) *Minimum lot area per dwelling unit:* Sixteen hundred (1,600) square feet.

Planned residential unit development (PRUD): Sixteen hundred (1,600) square feet of net land area as defined in section 14-47 (definitions) of this article. As part of a site plan and subdivision application, the applicant shall provide a calculation of those factors deducted to determine net land area. In addition, such net area factors shall be delineated on a site plan.

(c) *Minimum street frontage:* Fifty (50) feet. PRUD development: Fifty (50) feet.

(d) *Minimum yard dimensions:*

(Yard dimensions include setbacks of structures from property lines and setbacks of structures from one another. No structure shall occupy the minimum yard of another structure.)

1. *Front yard:*

Principal or accessory structures: Twenty-five (25) feet.

2. *Rear yard:*

a. Principal or accessory structures with ground coverage greater than one hundred (100) square feet: Twenty-five (25) feet.

b. Accessory detached structures with a ground coverage of one hundred and forty-four(144) square feet or less: Five (5) feet.

Setbacks for swimming pools shall be as provided for in section 14-432 (swimming pools) of this article.

3. *Side yard:*

a. Principal or accessory structures with ground coverage greater than one hundred (100) square feet:

Height of Structure	*Required Side Yard*
1 story	10 feet
1 1/2 stories	10 feet
2 stories	14 feet
2 1/2 stories	16 feet

The width of one (1) side yard may be reduced one (1) foot for every foot that the other side yard is correspondingly increased, but no side yard shall be less than ten (10) feet. In the case of a lot of

record existing as of June 5, 1957, and held under separate and distinct ownership from adjacent lots, the required side yard may be reduced in order to provide a buildable width of up to twenty-four (24) feet, but in no case shall the resulting side yards be less than ten (10) feet.

b. Accessory detached structures with ground coverage of one hundred and forty-four(144) square feet or less: Five (5) feet.

4. *Side setback on side streets:*

Principal or accessory structures: Twenty (20) feet.

(e) *Maximum lot coverage:* Thirty (30) percent of lot area.

(f) *Minimum lot width:* Sixty (60) feet.

Minimum building setback from external subdivision property lines (PRUD):

a. Building length of one hundred (100) feet or less: Twenty-five (25) feet.

b. Building length of greater than one hundred (100) feet: Thirty-five (35) feet.

(g) Minimum recreation open space area (PRUD): Two hundred (200) square feet per dwelling unit of common area designated on the site for recreation purposes. Such recreation areas shall be level graded, dry, accessible and properly drained. At a minimum, a contiguous area of six thousand (6,000) square feet, with a minimum dimension of fifty (50) feet, shall be provided and shall include one (1) or more of the uses set forth in section 14-526 (d) 9. and the planned residential unit development standards in the City of Portland Design Manual, but shall at least be usable as a multipurpose game field. Such recreation areas shall be located at least twenty-five (25) feet from dwelling units.

(Ord. No. 537-84, 5-7-84; Ord. No. 84-88, § 4, 7-19-88; Ord. No. 58-97, § 2, 8-18-97; Ord. No. 165-97, § 5, 12-1-97; Ord. No. 131-08/09, 12-15-08; Ord. No. 278-09/10, 7-19-10)

***Editor's note--**Ord. No. 84-88, § 4, adopted July 19, 1988, amended § 14-130 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 84-88.

Sec. 14-131. Other requirements.

[Other requirements are as follows:]

(a) ***Off-street parking:*** Off-street parking is required as provided in division 20 (off-street parking) of this article.

(b) ***Shoreland and flood plain management regulations:*** Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(c) ***Storage of vehicles:*** Only one (1) unregistered motor vehicle may be stored outside on the premises for a period not exceeding thirty (30) days.

(Ord. No. 537-84, 5-7-84; Ord. No. 15-92, § 10, 6-15-92)

Sec. 14-132. Reserved.
Sec. 14-133. Reserved.
Sec. 14-134. Reserved.

DIVISION 7. R-6 RESIDENTIAL ZONE*

***Editor's note--**Ord. No. 538-84, adopted May 7, 1984, repealed Div. 7, §§ 14-131--14-134, and enacted a new Div. 9, §§ 14-135--14-139, 14-145. However, in order to avoid duplication of division numbers and in consultation with the city, the provision has been included as Div. 7.

Sec. 14-135. Purpose.

The purpose of the R-6 residential zone is:

(a) To set aside areas on the peninsula for housing characterized primarily by multifamily dwellings at a high density providing a wide range of housing for differing types of households; and to conserve the existing housing stock and

residential character of neighborhoods by controlling the scale and external impacts of professional offices and other nonresidential uses.

(b) In cases of qualifying small, vacant, underutilized lots located in the urban residential and business zone, to encourage new housing development consistent with the compact lot development pattern typically found on the peninsula.

(Ord. No. 538-84, 5-7-84; Ord. No. 78-03/04, 10-20-03)

Sec. 14-136. Permitted uses.

The following uses are permitted in the R-6 residential zone:

(a) *Residential:*

1. Single- and two-family dwellings. No building reviewed as a two-family dwelling in accordance with section article V (site plan) of this chapter shall be altered to include any additional dwelling unit within five (5) years from the date of issuance of the building permit. Any building reviewed as a two-family dwelling in accordance with article V (site plan) of this chapter or not reviewed under article V, which is altered or enlarged to include any additional dwelling unit after this five-year period, shall be reviewed as a pursuant to article V of this chapter.

2. Multifamily dwellings, provided that any alteration of a structure in residential use on December 2, 1987:

   a. Shall not result in the creation of any additional dwelling unit of less than six hundred (600) square feet of floor area, exclusive of common hallways and storage in basement and attic; and

   b. Shall not result in any existing dwelling unit being reduced in size to less than one thousand (1,000) square feet of floor area, exclusive of common areas and storage in basement and attic;

c. Parking shall be provided as required by division 20 of this article;

d. No open outside stairways or fire escapes above the ground floor shall be constructed;

e. A below-grade dwelling unit shall be permitted only if access is provided directly to the outside of the building;

f. Such development shall be subject to article V (site plan) of this chapter for site plan review and approval.

3. Handicapped family unit, as defined in section 14-47 (definitions) of this article, for handicapped persons plus staff.

4. Single-family, multiple-component manufactured housing, as defined in section 14-47 (definitions) of this article, except in a National Register Historic District.

5. Single-family, single-component manufactured housing, as defined in section 14-47 (definitions) of this article, on individual lots under separate and distinct ownership, except in a National Register Historic District, provided that each unit meets the performance standards listed below:

a. More than half of the roof area of each unit shall be a double pitched Class C rated shingled roof with a minimum pitch of 3/12.

b. Each unit shall be installed on a full foundation or a concrete frost wail in accordance with all applicable codes and regulations. Any hitch or tow bar shall be removed from the unit after it is placed on its foundation or frost wall. In the case of a frost wall, vermin proof skirting shall be installed on all sides of the unit. The skirting may consist of either (a) concrete or masonry block or (b) manufactured skirting. If concrete or masonry block skirting is

installed, either the exterior siding of the unit shall extend within one (1) foot of grade or decorative masonry siding shall be applied. If manufactured skirting material is installed, the color shall be identical to or compatible with the exterior siding of the unit.

c. Each unit shall have exterior siding that is residential in appearance, including but not limited to natural materials such as wood clapboards or shakes, or exterior materials which simulate wood. Clapboards or simulated clapboards shall have less than eight (8) inches of exposure and sheet metal type siding shall not be permitted.

d. Each unit shall have the long side of the unit parallel to the street line where the required street frontage is met.

e. Each unit shall be provided with at least two (2) trees meeting the city's arboricultural specifications and which are clearly visible from the street line and are located so as to visually widen the narrow dimension or proportion of the unit.

f. Each unit shall have all fuel oil supply systems constructed and installed within the foundation wall or underground in accordance with all applicable codes and regulations.

g. No unit shall be horizontally or vertically attached to any other unit or other structure, provided however, that this provision shall not be deemed to prohibit building additions, such as porches, garages, room additions or solar greenhouses.

(b) *Other:*

1. Lodging house;

2. Cemeteries;

3. Parks, and other active and passive noncommercial recreation spaces;

4. Accessory uses customarily incidental and subordinate to the location, function, and operation of principal uses, subject to the provisions of section 14-404 (accessory use) of this article;

5. Home occupation subject to the provisions of section 14-410 (home occupation) of this article;

6. Municipal uses, excluding those specifically set forth in section 14-137 of this division;

7. Special needs independent living units, provided that a building housing special needs independent living units shall not house other types of residential or other permitted uses. The owner of a special needs independent living unit building shall file in the Cumberland County Registry of Deeds a statement under oath that the building is a special needs independent living unit building and that any future change of use to a permitted residential use shall require a change in use review by the City of Portland and a decrease in the number of units in the building in accordance with the Portland City Code, chapter 14. The owner shall file proof of such recording with the building inspections division prior to the issuance of any certificates of occupancy for the new uses.

8. Conversion of a structure existing on March 3, 1997, into a bed and breakfast with up to four (4) guest rooms, subject to the standards of article V (site plan).

9. Hostels, provided the applicant submits a site plan and operations plan demonstrating compliance with the following conditions:

   a. No more than ten (10) overnight transient guests shall be permitted in the facility at any one time.

b. All applicable provisions of Article V of this chapter shall be met.

c. Parking shall be provided in compliance with Division 20 of this Article.

d. No unaccompanied minors under the age of eighteen (18) shall be permitted in the facility.

e. The length of stay for transient guests shall not exceed fifteen (15) days out of any sixty-day period.

f. An owner, manager or operator shall live in the building as a permanent resident.

g. The building shall meet the applicable occupant load requirements as defined by the International Building Code and the NFPA Life Safety Code, as such codes are amended or adopted by the city.

10. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 538-84, 5-7-84; Ord. No. 267-84, § 1, 12-17-84; Ord. No. 67-87, § 4, 11-2-87; Ord. No. 85-88, §§ 1, 2, 7-19-88; Ord. No. 86A-89, § 7, 8-21-89; Ord. No. 95-89, § 2, 9-6-89; Ord. No. 279-90, § 2, 3-19-90; Ord. No. 33-91, § 8, 1-23-91; Ord. No. 33A-91, § 6, 4-17-91; Ord. No. 125-97, § 2, 3-3-97; Ord. No. 278-09/10, 7-19-10; Ord. No. 279-09/10, 6-6-11; Ord. No. 33-11/12, 1-18-12)

***Editor's note--**Ord. No. 85-88, §§ 1, 2, adopted July 19, 1988, amended § 14-136 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 85-88. Ord. No. 95-89, § 2, adopted Sept. 6, 1989, amended subsection (1)a of § 14-136 to read as set out and, as amended, further ordained "that the prohibition upon unit additions contained in this ordinance shall not apply where a building permit has been issued. Additions proposed to such buildings shall require major site plan review and all other reviews required by this chapter."

Sec. 14-137. Conditional uses.

The following uses shall be permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) of this article and any special

provisions, standards or requirements specified below:

(a) ***Residential:***

1. Reserved.

2. Sheltered care group homes, as defined in section 14-47 of this article, for up to twelve (12) individuals, plus staff, and serving a primary population which is not handicapped persons, parolees, persons involved in correctional prerelease programs, or current illegal drug users, provided that:

   a. A sheltered care group home shall not be located within five hundred (500) feet of another, as measured along street lines to the respective property lines.

   b. There shall be no open outside stairways or fire escapes above the ground floor.

   c. The facility shall make provision for adequate on-site staffing and supervision of residents in accordance with applicable state licensing requirements. If a facility is not licensed by the state, there shall be a minimum of one (1) staff person for every ten (10) residents or fraction thereof.

   The board of appeals may impose conditions upon a conditional use permit concerning the creation or operation of a sheltered care group home including but not limited to the following: site and building maintenance; lighting, fencing, and other appropriate security measures; screening and buffering of parking areas; compatibility of any additions or alterations with the existing residential structure; compatibility of new structures with the architectural character of the surrounding area; and limitation on the duration of the sheltered care group home permit.

3. Conversion of a structure existing on March 3, 1997, into a bed and breakfast with five (5) to

nine (9) guest rooms.

(b) ***Institutional:*** Any of the following conditional uses provided that, notwithstanding section 14-474(a) (conditional uses) of this article or any other provision of this Code, the Planning Board shall be substituted for the board of appeals as the reviewing authority:

1. Elementary, middle, and secondary school except as otherwise provided in section 14-276.10;

2. a. Long-term and extended care facilities;

   b. Intermediate care facility for thirteen (13) or more persons;

3. Intermediate care facility;

4. Places of assembly;

5. Hospital;

6. College, university, trade school.

Such uses shall be subject to the following conditions and standards in addition to the provisions of section 14-474:

a. In the case of expansion onto land of existing such uses other than the lot on which the principal use is located, it shall be demonstrated that the proposed use cannot reasonably be accommodated on the existing site through more efficient utilization of land or buildings, and will not cause significant physical encroachment into established residential areas; and

b. The proposed use will not cause significant displacement or conversion of residential uses existing as of June 1, 1983, or thereafter; and

c. In the case of a use or use expansion which constitutes a combination of the above-listed

uses with capacity for concurrent operations, the applicable minimum lot sizes shall be cumulative; and

d. Article V (site plan) sections 14-522 and 14-523 notwithstanding, in the case of places of assembly the proposed use shall be subject to the requirements of article V (site plan) of this chapter; and

e. In the case of community halls:

i. The structure was in existence as of January 4, 2010.

ii. The structure was built for institutional or other non-residential uses;

iii. The structure is operated by, or operated subject to the control of, a not-for-profit entity in accordance with its not-for-profit purposes; and

iv. A parking management plan is submitted for review and approval by the planning board; and

f. In the case of private club or fraternal organizations: any such establishment serving alcoholic beverages or in possession of a license for serving alcoholic beverages shall be located on a large lot, as specified in the minimum lot size provisions of this section.

(c) *Other:*

1. Utility substations, such as water and sewage pumping stations and standpipes, electric power substations, transformer stations, and telephone electronic equipment enclosures and other similar structures, provided that such uses are suitably screened and landscaped so as to ensure compatibility with the surrounding neighborhood;

2. Professional offices of a member of a recognized profession maintained for the conduct of that profession. Professional office uses exclude personal services, retail services, and veterinarians.

The illustrative examples that follow indicate the type of professional offices permitted: health care practitioner, attorney, social worker, engineer, architect, accountant, real estate agent, insurance agent.

Professional office uses shall meet the following standards in addition to provisions of section 14-474, except that subsections a., b., c. and d. of this section 14-137(c)2 shall not apply to the use of any building not designed or constructed for residential use, which was not in actual use as a residence on April 18, 1984, or thereafter.

a. A professional office shall not be located within five hundred (500) feet of another as measured along the street line to the respective property lines.

b. A building with one (1) or more professional offices shall have at least fifty (50) percent of the total floor area of the building devoted to residential uses.

c. The total number of individuals working in a building of professional offices shall not exceed the equivalent of four (4) full-time employees.

d. Any additions or exterior alterations shall be compatible with the architecture of the building and maintain the residential appearance of the building. Construction of a new building shall be compatible with the architectural character of the surrounding area.

e. The scale and surface area of parking, driveways, and paved areas shall be arranged

and landscaped to be compatible in size and scale with neighboring properties in the area and to properly screen vehicles from adjacent properties and streets.

f. Off-street parking is required as provided in division 20 (off-street parking) of this article.

3. Chancellery.

4. Nursery school and kindergarten.

5. Off-street parking for passenger cars for uses permitted in the R-6 zone.

6. Day care facilities or home babysitting services not permitted as a home occupation under section 14-410, subject to the following conditions:

a. The facility shall be located in a structure in which there is one (1) or more occupied residential units or in an existing accessory structure, unless the facility is located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use or in a nonresidential structure accessory to the principal nonresidential use.

b. The maximum capacity shall be twelve (12) children for facilities located in residential or existing structures accessory thereto, unless the additional standards in subsection v. are met. There shall be no maximum limit on the number of children in a facility located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use, or in a nonresidential structure accessory thereto, provided that any such structure that serves more than twelve (12) children shall be subject to review under

article V of this chapter.

c. Outdoor play areas shall be screened and buffered from surrounding residences with landscaping and/or fencing to minimize visual and noise impacts.

d. Solid waste shall be stored in covered containers. Such containers shall be screened on all four (4) sides.

e. Day care facilities, nursery schools and kindergartens located either in structures that have been in residential use within the past five (5) years or in existing accessory structures and that serve between thirteen (13) and twenty-four (24) children shall meet the following additional standards:

i. The facility shall provide a minimum of seventy-five (75) square feet of outdoor play area per child;

ii. The play area shall be located in the side and rear yards only and shall not be located in front yards;

iii. Outside play areas shall be separated from abutting properties by a fence at least forty-eight (48) inches in height;

iv. A ten-foot wide landscaped buffer shall be required outside of the fenced play area, and shall be established in accordance with the landscaping standards of the City's Technical Standards and Guidelines;

v. The minimum lot size for a day care facility located in a residential or existing accessory structure and serving more than twelve (12) children shall be twenty thousand (20,000) square feet;

vi. ***Off-street parking:*** Off-street parking is

required as provided in division 20 (off-street parking) of this article.

vii. The maximum number of children in a day care facility located in a residential or existing accessory structure shall be twenty-four (24); and

viii. Any additions or exterior alterations such as facade materials, building form, roof pitch, and exterior doors shall be designed to be compatible with the architectural style of the building and preserve the residential appearance of the building.

7. Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how

the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

8. Hostels, provided the applicant submits a site plan and operations plan demonstrating compliance with the following conditions:

a. No more than twenty (20) overnight transient guests shall be permitted in the facility at any one time.

b. All applicable provisions of Article V of this

chapter shall be met.

c. Parking shall be provided in compliance with Division 20 of this Article.

d. No unaccompanied minors under the age of eighteen (18) shall be permitted in the facility.

e. The length of stay for transient guests shall not exceed fifteen (15) days out of any sixty-day period.

f. An owner, manager or operator shall live in the building as a permanent resident.

g. The building shall meet the applicable occupant load requirements as defined by the International Building Code and the NFPA Life Safety Code, as such codes are amended or adopted by the city.

9. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 538-84, 5-7-84; Ord. No. 267-84, § 2, 12-17-84; Ord. No. 76-85, § 8, 7-1-85; Ord. No. 85-88, § 3, 7-19-88; Ord. No. 235-91, § 13, 2-4-91; Ord. No. 118-93, § 11, 10-18-93; Ord. No. 133-96, § 7, 11-18-96; ; Ord. No. 154-96, § 11, 12-16-96; Ord. No. 125-97, § 3, 3-3-97; Ord. No. 232-99, §2, 3-15-99; Ord. No. 77-02/03, § 2, 10-21-02; Ord. No. 29-09/10, 8-3-09 emergency passage; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 138-09/10, 1-20-10; Ord. No. 240-09/10, 6-21-10; Ord. No. 9 10/11, 8-2-10; Ord. No. 149-10/11, 3-7-11; Ord. No. 279-09/10, 6-6-11; Ord. No. 33-11/12, 1-18-12)

Sec. 14-138. Prohibited uses.

Uses that are not expressly enumerated herein as either permitted uses or conditional uses are prohibited.
(Ord. No. 538-84, 5-7-84)

Sec. 14-139. Dimensional requirements.

(a) In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, lots in the R-6 zone shall meet or exceed the following minimum requirements:

1. *Minimum lot size:*

a. Residential: Forty-five hundred (4,500) square feet, except as provided for lots of record in section 14-433 (lots of record and accessory structure setbacks for existing buildings) of this article.

b. Reserved.

c. Long-term and extended care facilities: Ten thousand (10,000) square feet for the first nine (9) residents plus seven hundred fifty (750) square feet for each additional resident, up to a total of two (2) acres.

d. Intermediate care facility: One (1) acre.

e. School: Thirty thousand (30,000) square feet.

f. Places of assembly;

Large	30,000 sq. ft.
Medium	15,000 sq. ft.
Small	7,500 sq. ft.

g. Municipal use: Forty-five hundred (4,500) square feet.

h. Hospital: Two (2) acres.

i. All other uses: Forty-five hundred (4,500) square feet.

j. Lodging house: Four thousand five hundred (4,500) square feet.

2. a. ***Minimum area per dwelling unit:*** One thousand (1,000) square feet per dwelling unit; and in the case of building additions and new construction, one thousand two hundred (1,200) square feet for each dwelling unit after the first three (3) units. This requirement may be reduced by up to twenty (20) percent for a special needs independent living unit.

b. ***Minimum rooming unit areas for lodging houses:*** Two hundred (200) square feet of combined rooming unit and common area for each rooming unit. Each individual rooming unit shall be a minimum of eighty (80) square feet.

c. ***Minimum land area per lodging house rooming unit:*** Two hundred fifty (250) square feet.

d. ***Minimum land area per intermediate care facility resident:*** Eight thousand (8,000) square feet for the first thirty-five (35) residents, plus three hundred fifty (350) square feet for each additional resident.

3. ***Minimum street frontage:*** Forty (40) feet.

4. ***Minimum yard dimensions:*** (Yard dimensions include setbacks of structures from property lines and setbacks of structures from one another. No structure shall occupy the minimum yard of another structure.)

a. ***Front yard:***

Principal or accessory structures: Ten (10) feet.

A front yard need not exceed the average depth of front yards on either side of the lot. A lot of record existing as of June 5, 1957, and less than one hundred (100) feet deep need not be deeper than twenty (20) percent of the depth of the lot.

b. ***Rear yard:***

i. Principal and attached accessory structures with ground coverage greater than one hundred (100) square feet: Twenty (20) feet.

ii. Detached accessory structures with a ground coverage of one hundred and forty-four(144) square feet or less: Five (5) feet.

iii. Setbacks for swimming pools shall be as provided for in section 14-432 (swimming pools) of this article.

c. *Side yard:*

i. Principal and attached accessory structures with ground coverage greater than one hundred (100) square feet:

Height of Structure	*Required Side Yard*
1 story	10 feet
2 stories	10 feet
3 stories	10 feet
4 stories	12 feet
5 stories	15 feet

The width of one (1) side yard may be reduced one (1) foot for every foot that the other side yard is correspondingly increased, but no side yard shall be less than ten (10) feet. In the case of a lot of record existing as of June 5, 1957, and held under separate and distinct ownership from adjacent lots, the required side yard may be reduced in order to provide a buildable width of up to twenty-four (24) feet, but in no case shall the resulting side yards be less than ten (10) feet.

ii. Detached accessory structures with ground coverage of one hundred and forty-four(144) square feet or less: Five (5) feet.

iii. Setbacks for swimming pools shall be as provided for in section 14-432 (swimming pools) of this article.

d. *Side yard on side streets:*

i. Principal or accessory structures: Ten (10) feet.

5. ***Maximum lot coverage:*** Forty (40) percent of lot area for lots which contain twenty (20) or more dwelling units;

fifty (50) percent for lots which contain fewer than twenty (20) dwelling units.

6. *Minimum lot width:* Forty (40) feet.

7. *Maximum structure height:*

Principal and attached accessory structure: Forty-five (45) feet.

Accessory detached structure: Eighteen (18) feet.

8. *Open space ratio:*

a. *Uses other than bed and breakfast.* Twenty (20) percent for those lots which contain fewer than twenty (20) dwelling units; thirty (30) percent for those lots which contain twenty (20) or more dwelling units. This area shall not include parking areas or other impervious surfaces as defined in section 14-47.

b. *Bed and breakfasts.* A bed and breakfast that is located on a lot that has at least twenty (20) percent open space on the date of filing of the application for site plan shall not reduce the open space on the lot below twenty (20) percent of the lot area. A bed and breakfast located on a lot that does not have at least twenty (20) percent open space on the date of filing of the application for site plan review, and that is legally nonconforming as to the open space requirement of this section, shall not reduce the open space on the lot below the level in existence on the date of the application for site plan review. Open space areas shall not include parking areas or other impervious surface areas as defined in section 14-47.

9. A below-grade dwelling unit shall be permitted only if the primary access for the dwelling unit is provided directly to the outside of the building.

10. *Minimum gross floor area for bed and breakfasts:* Two thousand (2,000) square feet of gross floor area for the first three (3) guest rooms and five hundred (500) square

feet of floor area for each additional guest room.

11. *Maximum floor area for places of assembly on a collector or arterial road:*

Large	Not limited
Medium	4,500 sq. ft.
Small	2,250 sq. ft.

12. *Maximum floor area for places of assembly not on a collector or arterial road:*

Large	4,500 sq. ft.
Medium	2,250 sq. ft.
Small	1,125 sq. ft.

(b) *Small residential lot development:* Residential uses on small, vacant lots located in the R-6 are subject to site plan review and may use the dimensional requirements below if all of the following conditions are met:

The lot is:

Vacant or is used exclusively for parking or contains structure not used for residential purposes as of January 1, 2005; and the lot existed as of January 1, 2005.

1. *Minimum lot size*: None

2. *Maximum lot size:* Ten thousand (10,000) square feet.

3. *Yard dimensions:*

a. *Front yard:*

No more than ten (10) feet.

b. *Rear yard:*

None, except that rear yards between two (2) buildings on the same or different lots shall maintain a minimum ten (10) foot setback between

buildings or the sum of the heights of the abutting buildings and proposed buildings divided by five (5), whichever is greater; and that either the rear yard or one of the side yards shall be at least fifteen (15) feet; provided, however, detached accessory structures with a ground floor area of one hundred (100) square feet or less need not have a setback more than five (5) feet from the property line. Not withstanding the foregoing, no structure shall be closer than four (4) feet to side property line.

c. *Side yard:*

None, except that side yards between two (2) buildings on the same or different lots shall maintain a minimum ten (10) foot setback between buildings or the sum of the heights of the existing buildings and proposed buildings divided by five (5), whichever is greater and that either the rear yard or one of the side yards shall be at least fifteen (15) feet; Provided, however, detached accessory structures with a ground floor area of one hundred (100) square feet or less need not have a setback more than five (5) feet from the property line. Notwithstanding the foregoing, no structure shall be closer than four (4) feet to side property line. On a corner lot no side yard is required on that side of the lot which abuts any street. A principal structure on a corner lot shall not be more than ten (10) feet from the street.

4. ***Minimum principal structure height:*** Two (2) stories of living space above the grade of the adjacent street frontage, except for porches, entryways, attached garages and accessory detached structures.

5. ***Maximum principal structure height:*** Forty five (45) feet.

6. ***Open space requirement:*** All lots used for residential purposes shall provide an attached exterior deck, porch, patio or balcony for each dwelling unit, except where a designated open space equal to ten (10) percent or more of the lot area is located on site and maintained as open

space, then the number of exterior decks, porches, patios or balconies may be reduced by up to fifty (50) percent. The designated open space, if provided, shall have a minimum width and length of at least fifteen (15) feet, a slope of no greater than ten (10) percent and shall be used exclusively as recreational open space i.e. it shall not be used for vehicular circulation, parking, etc.. All required decks, porches, patios or balconies shall meet the requirements of the Planning and Development Design Manual.

7. *Minimum lot width:* None.

8. *Minimum land area per dwelling:* Seven hundred and twenty-five (725) square feet.

(Ord. No. 538-84, 5-7-84; Ord. No. 634-86, § 1, 7-7-86; Ord. No. 264-87, § 1, 3-16-87; Ord. No. 85-88, § 4, 7-19-88; Ord. No. 230-90, § 1, 3-5-90; Ord. No. 33-91, § 9, 1-23-91; Ord. No. 235-91, § 14, 2-4-91; Ord. No. 33A-91, 4-17-91; Ord. No. 118-93, § 12, 10-18-93; Ord. No. 154-96, § 12, 12-16-96; Ord. No. 125-97, § 4, 3-3-97; Ord. No. 245-97, §§ 1, 2, 4-9-97; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 65-10/11, 10-18-10)

***Editor's note--**Ord. No. 85-88, § 4, adopted July 19, 1988, amended § 14-139 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 85-88.

Sec. 14-140. Other requirements.

(a) *Off-street parking:* Off-street parking is required as provided in division 20 (off-street parking) of this article.

(b) *Storage of vehicles:* Only one (1) unregistered motor vehicle may be stored outside on the premises for a period not exceeding thirty (30) days.

(c) *Shoreland and flood plain management regulations:* Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(d) *Small residential lot development* shall conform to the site plan standards of §14-526.

(Ord. No. 538-84, 5-7-84; Ord. No. 85-88, § 5, 7-19-88; Ord. No. 15-92, § 11,

***Editor's note--**Ord. No. 85-88, § 5, adopted July 19, 1988, amended § 14-145(a) to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 85-88.

DIVISION 7.01. R-7 COMPACT URBAN RESIDENTIAL OVERLAY ZONE

Section 14-141. Purpose.

The purpose of the R-7 Compact Urban Residential Overlay Zone is to encourage and accommodate compact residential development on appropriate locations on the Portland peninsula, pursuant to the New Vision for Bayside element of the comprehensive plan and housing plans of the City of Portland. Sites suitable for in-city living should be within walking distance of downtown or other work places, shopping and community facilities and have access to public or private off-site parking or transit service. The intent of this zone is to foster increased opportunities for compact in-city living for owners and renters representing a variety of income levels and household types.

Locations for siting the R-7 Zone are intended to be located on the peninsula of Portland, in the area encompassed in the Bayside plan, and other peninsula R-6 locations characterized by moderate to high density multi-family housing in a form and density exceeding that allowed in the R-6 Zone and where infill development opportunities exist; and areas on the peninsula with mixed business and residential zoning and uses which can accommodate higher density infill residential development without negatively impacting the existing neighborhood or adjacent properties. It may be appropriate in some cases to rezone to R-7 overlay through conditional or contract zoning to ensure that the new development is architecturally appropriate and compatible with the surrounding neighborhood.
(Ord. No. 122, 12-20-99)

Sec. 14-142. Permitted Uses.

Permitted uses in the R-7 Compact Urban Residential Overlay Zone, shall be the uses permitted in the R-6 Zone, except that:

(a) Residential uses shall comply with the following dimensional requirements:

1. Minimum Lot Size: None

2. Minimum Frontage: None

3. Minimum Yard Dimensions:

   a. Front yard: None

   b. Rear and side yard: Five (5) feet.

   c. Side yard on side street: None

4. Maximum Lot Coverage: 100%

5. Maximum Residential Density: Four hundred thirty five (435) square feet of land area per dwelling unit is required.

6. Maximum Building Height: Fifty (50) Feet

(b) Off-street parking is required as provided in division 20 (off-street parking) of this article;

(c) Residential development in the R-7 Zone shall be reviewed by the Planning Board for compliance with Article IV, Subdivisions, and Article V, Site Plan;

(d) Any new dwelling unit constructed in the R-7 Zone shall contain a minimum of 400 square feet of habitable floor area;

(e) All other uses in the R-7 Zone shall observe the requirements of the R-6 Zone.

(Ord. No. 122, 12-20-99; Ord. No. 84-08/09, 10-20-08; Ord. No. 240-09/10, 6-21-10)

Sec. 14-143. Design Standards.

Residential development in the R-7 Zone shall be reviewed by the Planning Board under Article V, Site Plan. Such development shall also comply with the following development standards. The general intent of these development standards is to achieve an attractive and comfortable city neighborhood environment. Varied

and human-scaled building facades are key to making a place "pedestrian-oriented." Building designs should provide a high level of visual interest, without creating a chaotic image. Residences should include design elements that enhance the streetscape and address the street.

(a) Porches and bays should face the street.

(b) Primary ground floor residential entries to multi-family buildings must orient to street, not to interior blocks or parking lots. Secondary and upper-floor entries from the interior of a block are acceptable. The front door to single-family homes, duplexes, and townhouses must be visible from the street.

(c) The design approach shall provide an architecture that will be a visible and permanent expression of the character of the neighborhood;

(d) The facade shall be varied and articulated to provide visual interest to pedestrians;

(e) Reinforce the public realm of the public open space, sidewalks and streets through appropriately scaled entries, porches, fenestration, landscaping, and architectural details;

(f) Provide visual and acoustical privacy between units;

(g) Maximize natural light and ventilation within units.

(Ord. No. 122, 12-20-99)

Sec. 14-144. Reserved.

Sec. 14-145. Reserved.

(Ord. No. 122, 12-20-99)

DIVISION 7.1. IR-1 ISLAND RESIDENTIAL ZONE

Sec. 14-145.1. Purpose.

The purpose of the IR-1 island residential zone is to provide for low intensity residential, recreational, and rural uses in the less developed areas of the islands in order to preserve the rustic character of the islands, to protect groundwater resources and natural and scenic areas, and to permit only appropriate low

intensity development in areas lacking adequate public facilities and services.
(Ord. No. 27-85, § 1, 7-15-85)

Sec. 14-145.2. Permitted uses.

The following uses are permitted in the IR-1 island residential zone:

(a) Single-family detached dwellings.

(b) Planned residential unit development with a minimum gross area, as defined in section 14-47 (definitions) of this article, of at least five, (5) acres of contiguous land, consisting of detached dwellings. Minimum yard dimensions (section 14-145.5(c)), street frontage (section 14-145.5(b)), and lot width (section 14-145.5(e)) shall be reduced up to fifty (50) percent of what would otherwise be required. Minimum lot area (section 14-145.5(a)) shall be reduced up to fifty (50) percent provided there is an equivalent corresponding increase in common or public open space that is usable for passive or active recreational opportunities or that serves as a buffer between buildings or between the development and the surrounding neighborhood.

All area in such a development which is to be owned or used in common shall be governed and maintained as set forth in section 14-498(i)(3), article IV (subdivisions) of this chapter.

The density for a planned residential unit development shall not exceed one (1) dwelling unit per forty thousand (40,000) square feet of net area. Net area shall be determined by subtracting from the gross area of the site the area of street rights-of-way, slopes of fifteen (15) percent or greater, wetland.

Such development shall be subject to review and approval by the Planning Board with respect to the requirements of article V (site plan) and article IV (subdivisions) of this chapter, whether or not such development is a subdivision within the meaning of article IV of this chapter as now enacted or as hereafter amended.

(c) Agriculture.

(d) Boat houses and store houses for fishing equipment.

(e) Parking and storage of equipment related to agriculture or commercial fishing.

(f) Accessory uses customarily incidental and subordinate to the location, function, and operation of principal uses, subject to the provisions of section 14-404 (accessory use) of this article, including but not limited to (a) home occupations, (b) temporary private tenting with one (1) tent accessory to a principal residential use provided that adequate water supplies and sanitation facilities are available in connection with the principal residential use, and (c) road side stands less than two hundred (200) square feet in floor area for the sale of agricultural products produced on the premises and the sale of fish and shellfish caught by the occupant of the dwelling or principal structure.

(g) Handicapped family unit, as defined in section 14-47, for handicapped persons, plus staff.

(h) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 27-85, § 1, 7-15-85; Ord. No. 160-89, § 1, 12-11-89; Ord. No. 33-91, § 10, 1-23-91; Ord. No. 33-11/12, 1-18-12)

Sec. 14-145.3. Conditional uses.

The following uses are permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) of this article and any special provisions, standards or requirements specified below:

(a) *Residential:*

1. Accessory dwelling unit within and clearly subordinate to a principal single-family detached dwelling, provided that:

   a. The accessory unit shall be no more than thirty-five (35) percent of the gross habitable floor area of the building and shall

have a minimum floor area of four hundred (400) square feet;

b. Lot area shall be seventy thousand (70,000) square feet;

c. There shall be no open outside stairways or fire escapes above the ground floor;

d. Any additions or exterior alterations such as facade materials, building form, roof pitch and exterior doors shall be designed to be compatible with the architectural style of the building and preserve the single-family appearance of the building. The exterior design of new construction including facade materials, building form, roof pitch and exterior doors shall have a single-family appearance;

e. A lower level dwelling unit shall have a minimum two-thirds of its floor-to-ceiling height above the average adjoining ground level;

f. Either the accessory unit or the principal dwelling shall be occupied by the owner of the lot on which the principal building is located, except for bonafide temporary absences; and

g. All sanitary waste shall be disposed of by a public sewer, subsurface sewerage system or other method in compliance with state and local regulations.

(b) ***Institutional:*** Any of the following uses provided that, notwithstanding section 14-474(a) (conditional uses) of this article or any other provision of this Code, the Planning Board shall be substituted for the board of appeals as the reviewing authority:

1. Schools and other educational facilities including seasonal camps other than campgrounds;

2. Places of assembly, excluding yacht clubs and marinas;

3. Municipal uses, provided that outside storage and parking areas are suitably screened and landscaped to ensure compatibility with the surrounding neighborhood;

Such uses shall be subject to the following standards if the total land area is two (2) acres or more:

a. In the case of expansion of existing such uses onto land other than the lot on which the principal use is located, it shall be demonstrated that the proposed use cannot reasonably be accommodated on the existing site through more efficient utilization of land or buildings, and will not cause significant physical encroachment into established residential area;

b. The proposed use will not cause significant displacement or conversion of residential uses existing as of July 15, 1985, or thereafter; and

c. In the case of a use or use expansion which constitutes a combination of the above listed uses with capacity for concurrent operations, the applicable minimum lot sizes shall be cumulative.

d. Article V (site plan) sections 14-522 and 14-523 notwithstanding, in the case of places of assembly the proposed use shall be subject to the requirements of article V (site plan) of this chapter; and

e. In the case of community halls:

i. The structure was in existence as of January 4, 2010.

ii. The structure was built for

institutional or other non-residential uses;

iii. The structure is operated by, or operated subject to the control of, a not-for-profit entity in accordance with its not-for-profit purposes; and

iv. A parking management plan is submitted for review and approval by the planning board; and

f. In the case of private club or fraternal organizations: any such establishment serving alcoholic beverages or in possession of a license for serving alcoholic beverages shall be located on a large lot, as specified in the minimum lot size provisions of this section.

(c) *Other:*

1. Utility substations including sewage and water pumping stations and standpipes, electric power substations, transformer stations, telephone electronic equipment enclosures, and other similar structures, provided that such uses are suitably screened and landscaped so as to ensure compatibility with the surrounding neighborhood;

2. Nursery schools and kindergarten;

3. Cemeteries;

4. Raising of domesticated animals, excluding pigs and reptiles, with no animals kept on any lot less than three (3) acres or closer than one hundred (100) feet to any street or lot line, except domesticated chickens as regulated in chapter 5, and provided that such use will not create any odor, noise, health or safety hazards, or other nuisance to neighboring properties;

5. Wharves, piers, docks, or landing ramps;

6. Campgrounds, excluding recreational vehicles,

licensed by the State of Maine Department of Human Services provided that:

a. No tent shall be located within seventy-five (75) feet of the perimeter of site;

b. The land area of the park shall not be less than the equivalent of five thousand (5,000) square feet of land area per tent site exclusive of the roadway network;

c. Site plan review and approval by the Planning Board shall be required.

7. Day care facilities or home babysitting services not permitted as a home occupation under section 14-410, subject to the following conditions:

a. The facility shall be located in a structure in which there is one (1) or more occupied residential units or in an existing accessory structure, unless the facility is located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use or in a nonresidential structure accessory to the principal nonresidential use.

b. The maximum capacity shall be twelve (12) children for facilities located in residential or existing structures accessory thereto, unless the additional standards in subsection v. are met. There shall be no maximum limit on the number of children in a facility located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use, or in a nonresidential structure accessory thereto, provided that any such structure that serves more than twelve (12) children shall be subject to review under article V of this chapter.

c. Outdoor play areas shall be screened and buffered from surrounding residences with landscaping and/or fencing to minimize visual and noise impacts.

d. Solid waste shall be stored in covered containers. Such containers shall be screened on all four (4) sides.

e. Day care facilities, nursery schools and kindergartens located either in structures that have been in residential use within the past five (5) years or in existing accessory structures and that serve between thirteen (13) and twenty-four (24) children shall meet the following additional standards:

i. The facility shall provide a minimum of seventy-five (75) square feet of outdoor play area per child;

ii. The play area shall be located in the side and rear yards only and shall not be located in front yards;

iii. Outside play areas shall be separated from abutting properties by a fence at least forty-eight (48) inches in height;

iv. A ten-foot wide landscaped buffer shall be required outside of the fenced play area, and shall be established in accordance with the landscaping standards of the City's Technical Standards and Guidelines;

v. The minimum lot size for a day care facility located in a residential or existing accessory structure and serving more than twelve (12) children shall be twenty thousand (20,000) square feet;

vi. ***Off-street parking:*** Off-street parking is required as provided in division 20 (off-street parking) of this article.

vii. The maximum number of children in a day care facility located in a residential or existing accessory structure shall be twenty-four (24); and

viii. Any additions or exterior alterations such as facade materials, building form, roof pitch, and exterior doors shall be designed to be compatible with the architectural style of the building and preserve the residential appearance of the building.

8. Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength,

stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

9. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 27-85, § 1, 7-15-85; Ord. No. 160-89, § 2, 12-11-89; Ord. No. 133-96, § 8, 11-18-96; Ord. No. 153-08/09; Ord. No. 29-09/10, 8-3-09 emergency passage; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. 240-09/10, 6-21-10; Ord. No. 9 10/11, 8-2-10; Ord. No. 33-11/12, 1-18-12)

Sec. 14-145.4. Prohibited uses.

Uses that are not expressly enumerated herein as either permitted uses or conditional uses are prohibited.

(Ord. No. 27-85, § 1, 7-15-85)

Sec. 14-145.5. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, lots in the IR-1 zone shall meet the following minimum requirements:

(a) *Minimum lot size*

1. Residential: Forty thousand (40,000) square feet for lots with public water; sixty thousand (60,000) square feet for lots without public water; except as provided in section 14-433 (lots of record and accessory structure setbacks for existing buildings) and section 14-145.3(a)1 of this article.

2. Schools and other educational facilities: Forty thousand (40,000) square feet.

3. Places of assembly:

Large	30,000 sq. ft.
Medium	15,000 sq. ft.
Small	7,500 sq. ft.

4. Seasonal camps and campgrounds: Ten (10) acres.

5. Animal raising: Three (3) acres.

6. In issuing any permit for new development, the building or planning authority shall require that any lot located in the IR-1 zone shall be at least forty thousand (40,000) square feet in area when the lot is to be serviced by a subsurface wastewater disposal system, except those lots which are located in a subdivision approved by the Planning Board after June 8, 1968, and excluding Peaks Island.

7. Excluding Peaks Island from this subsection h., any property owner whose lot does not meet the minimum lot size requirements outlined in subsection g. of this section may, for purposes of this section only, merge two (2) or more separate lots on the

same island in order to meet these requirements. Where the lots so merged are not contiguous, the property owner shall grant to the city as holder a conservation easement upon the lot or lots which will not contain the principal structure. The conservation easement shall contain both an existing legal description and a city assessor's chart, block and lot description. The building authority shall be authorized to accept such conservation easements on behalf of the city. Said easement shall be recorded by the applicant in the registry of deeds. A copy of the recorded easement and copies of the deeds for both lots shall be submitted to the building authority prior to issuance of a building permit. The property over which the conservation easement has been granted shall be used for passive recreational and conservation purposes only, and shall be subject to the following restrictions:

a. No structure shall be permitted on this property.

b. No parking or storage of vehicles or machinery shall be permitted on this property at any time.

c. No area of this property shall be paved.

d. No exterior storage for commercial use shall be permitted on this property.

e. The easement deed shall reference the lot which is benefited by this conservation easement. No conservation easement shall be used to benefit more than one (1) lot.

Conservation easements shall only be granted over lots which conform either to the provisions of section 14-433 or to the minimum lot sizes set forth in (a)1 of this section. Conservation easements shall not be granted over any lot which is encumbered by any other easement which prohibits all construction on that lot. A conservation easement may also name as a holder or grant a

third-party right of enforcement to a nonprofit corporation or charitable trust, the purposes or powers of which include retaining or protecting the natural, scenic or open space values of real property; assuring the availability of real property for agricultural, forest, recreational or open space use; protecting natural resources; or maintaining or enhancing air or water quality of real property.

Nothing in this section shall be construed to allow an owner of a currently existing and developed lot to convey or permit a portion of that lot to be used to fulfill the requirements of this section if such conveyance would render the existing lot nonconforming under the terms of this chapter. The lot upon which a building is to be constructed shall meet the minimum lot size requirements of section 14-433.

8. Where an existing subsurface wastewater disposal system serving an existing structure requires replacement, the replacement system shall meet the applicable requirements of CMR 241 Section 2-E. The land area requirements in subsection g. of this section shall not apply to such a replacement system.

For purposes of this subsection, the mean high tide mark shall be considered to be the shoreline lot line.

(b) *Minimum street frontage:*

One hundred (100) feet, except that a lot of record as described in section 14-433 (lots of record and accessory structure setbacks for existing buildings) and lots created after July 15, 1985, which are not part of a subdivision need not provide street frontage if access is available by means of a permanent easement or right-of-way which existed as of July 15, 1985. Such easement or right-of-way shall have a minimum width of sixteen (16) feet and a minimum travel width of eight (8) feet except that an easement or right-of-way providing access for three (3) or more lots or providing the only means of access to a parcel or parcels of three (3) acres

or more, shall conform to the requirements contained within the City of Portland Technical Manual and meet the construction requirements of article III of chapter 25 (street acceptances) of this Code. Such easement or right-of-way shall be sufficient to permit municipal service delivery.

(c) *Minimum yard dimensions:*

Yard dimensions shall include setbacks of structures from property lines and setbacks of structures from one another. No structure shall occupy the minimum yard of another structure.

1. *Front yard:* Principal or accessory structures: Thirty (30) feet.

2. *Rear yard:* Principal or accessory structures with ground coverage greater than one hundred (100) square feet: Thirty (30) feet.

   Accessory detached structures with ground coverage of one hundred and forty-four (144) square feet or less: Ten (10) feet.

3. *Side yard:* Principal or accessory structures with ground coverage greater than one hundred (100) square feet: Twenty (20) feet.

   Accessory detached structures with ground coverage of one hundred and forty-four (144) square feet or less: Fifteen (15) feet, except that the minimum distance from a principal structure may be five (5) feet.

4. *Side yard on side streets:* Principal or accessory structures: Twenty (20) feet.

(d) *Maximum lot coverage:* Twenty (20) percent of lot area.

(e) *Minimum lot width:* One hundred (100) feet.

(f) *Maximum structure height:*

1. Principal or accessory attached structure:

Thirty-five (35) feet.

2. Accessory detached structure: Eighteen (18) feet.

(g) *Maximum floor area for places of assembly on a collector or arterial road:*

Large	Not limited
Medium	4,500 sq. ft.
Small	2,250 sq. ft.

(h) *Maximum floor area for places of assembly not on a collector or arterial road:*

Large	4,500 sq. ft.
Medium	2,250 sq. ft.
Small	1,125 sq. ft.

(Ord. No. 27-85, § 1, 7-15-85; Ord. No. 160-89, § 3, 12-11-89; Ord. No. 218-04/05, 5-2-05; Ord. No. 131-08/09, 12-15-08; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 278-09/10, 7-19-10)

Sec. 14-145.6. Other requirements

Other requirements include the following:

(a) Off-street parking shall be required as provided in division 20 (off-street parking) of this article.

(b) *Shoreland and flood plain management regulations:* Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(c) *Storage of vehicles:* Only one (1) unregistered motor vehicle may be stored outside on the premises and not for a period exceeding thirty (30) days.

(Ord. No. 27-85, § 1, 7-15-85; Ord. No. 15-92, § 12, 6-15-92)

DIVISION 7.2. IR-2 ISLAND RESIDENTIAL ZONE

Sec. 14-145.7. Purpose.

The purpose of the IR-2 island residential zone is to protect

the character of existing developed residential neighborhoods on the islands and to allow infill where there are adequate public services available. Expansion or extension of an existing IR-2 zone should be strictly limited, generally focused toward areas adjacent to existing village IR-2 areas, and restricted by such factors as adequacy of access, whether adequate water will be available for private use and for fire protection, and whether soils in the area are adequate for subsurface water disposal or whether public sewers are available. IR-2 rezoning on substantially sized parcels should not be considered for those sites that should be more appropriately zoned I or IR-3.

(Ord. No. 28-85, § 1. 7.15-85)

Sec. 14-145.8. Permitted use.

The following uses are permitted in the IR-2 island residential zone:

(a) Single-family detached dwellings.

(b) Planned residential unit development with a minimum gross area, as defined in section 14-47 (definitions) of this article, of at least five (5) acres of contiguous land, consisting of detached dwellings. Minimum yard dimensions (section 14-145.11(c)), street frontage (section 14-145.11(b)), and lot width (section 14-145.11(e)) shall be reduced up to fifty (50) percent of what would otherwise be required. Minimum lot area (section 14-145.11(a)) shall be reduced up to fifty (50) percent, provided there is an equivalent corresponding increase in common or public open space that is usable for passive or active recreational opportunities or that serves as buffer between the buildings or between the development and the surrounding neighborhood.

All area in such a development which is to be owned or used in common shall be governed and maintained as set forth in section 14-498(i)(3), article IV (subdivisions) of this chapter.

The density for a planned residential unit development shall not exceed one (1) dwelling unit per twenty thousand (20,000) square feet of net area. Net area shall be determined by subtracting from the gross area of the site the area of street rights-of-way, slopes of fifteen

(15) percent or greater, wetlands.

Such development shall be subject to review and approval by the Planning Board with respect to requirements of article V (site plan) and article IV (subdivisions) of this chapter, whether or not such development is a subdivision within the meaning of article IV of this chapter as now enacted or as hereafter amended.

(c) Boathouses and storehouses for fishing equipment.

(d) Parking and storage of equipment related to commercial fishing.

(e) Accessory uses customarily incidental and subordinate to the location, function and operation of principal uses, subject to the provisions of section 14-404 (accessory use) of this article including but not limited to (a) home occupations, (b) private temporary tenting with one (1) tent accessory to a principal residential use, provided that adequate water supplies and sanitation facilities are available in connection with the principal residential use, and (c) roadside stands less than two hundred (200) square feet in floor area for the sale of agricultural products produced on the premises, and the sale of fish and shellfish caught by the occupant of the dwelling or principal structure.

(f) Handicapped family unit, as defined in section 14-47, for handicapped persons plus staffs.

(g) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 28-85, § 1, 7-15-85; Ord. No. 161-89, § 1, 12-11-89; Ord. No. 33-91, § 11, 1-23-91; Ord. No. 33-11/12, 1-18-12)

Sec. 14-145.9. Conditional uses.

The following uses are permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) of this article and any special provisions, standards or requirements specified below:

(a) *Residential:*

1. Accessory dwelling unit within and clearly subordinate to a principal single-family detached dwelling provided that:

   a. The accessory unit shall be no more than thirty-five (35) percent of the gross floor area of the principal building and shall have a minimum floor area of four hundred (400) square feet;

   b. Lot area shall be thirty thousand (30,000) square feet;

   c. There shall be no open outside stairways or fire escapes above the ground floor;

   d. Any additions or exterior alterations such as facade materials, building form, roof pitch, and exterior doors shall be designed to be compatible with the architectural style of the building and preserve the single-family appearance of the building. The exterior design of new construction including facade materials, building form, roof pitch and exterior doors shall have a single-family appearance;

   e. A lower level dwelling unit shall have a minimum two-thirds of its floor-to-ceiling height above the average adjoining ground level;

   f. Either the accessory unit or the principal dwelling shall be occupied by the owner of the lot on which the principal building is located, except for bona fide temporary absences; and

   g. All sanitary waste shall be disposed of by a public sewer, subsurface sewerage system or other method in compliance with state and local regulations.

(b) ***Institutional:*** Any of the following uses provided that, notwithstanding section 14-474(a) (conditional uses) of this

article or any other provision of this Code, the Planning Board shall be substituted for the board of appeals as the reviewing authority:

1. Schools and other educational facilities;

2. Places of assembly, excluding yacht clubs and marinas;

3. Municipal uses, provided that outside storage and parking areas are suitably screened and landscaped to ensure compatibility with the surrounding neighborhood;

   Such uses shall be subject to the following standards if the total land area of the use is two (2) acres or more:

   a. In the case of expansion of existing such uses onto land other than the lot on which the principal use is located, it shall be demonstrated that the proposed use cannot reasonably be accommodated on the existing site through more efficient utilization of land or buildings, and will not cause significant physical encroachment into established residential area;

   b. The proposed use will not cause significant displacement or conversion of residential uses existing as of July 15, 1985, or thereafter; and

   c. In the case of a use or use expansion which constitutes a combination of the above-listed uses with capacity for concurrent operations, the applicable minimum lot sizes shall be cumulative; and

   d. Article V (site plan) sections 14-522 and 14-523 notwithstanding, in the case of places of assembly the proposed use shall be subject to the requirements of article V (site plan) of this chapter; and

e. In the case of community halls:

i. The structure was in existence as of January 4, 2010.

ii. The structure was built for institutional or other non-residential uses;

iii. The structure is operated by, or operated subject to the control of, a not-for-profit entity in accordance with its not-for-profit purposes; and

iv. A parking management plan is submitted for review and approval by the planning board; and

f. In the case of private club or fraternal organizations: any such establishment serving alcoholic beverages or in possession of a license for serving alcoholic beverages shall be located on a large lot, as specified in the minimum lot size provisions of this section.

(c) *Other:*

1. Utility substations including sewage and water pumping stations and standpipes, electric power substations, transformer stations, telephone electronic equipment enclosures, and other similar structures, provided that such uses are suitably screened and landscaped so as to ensure compatibility with the surrounding neighborhood;

2. Nursery schools and kindergartens;

3. Cemeteries;

4. Wharves, piers, docks, or landing ramps;

5. Lodging houses, with more than two (2) but not more than nine (9) lodging rooms.

6. Day care facilities or home babysitting services not permitted as a home occupation under section 14-410, subject to the following conditions:

a. The facility shall be located in a structure in which there is one (1) or more occupied residential units or in an existing accessory structure, unless the facility is located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use or in a nonresidential structure accessory to the principal nonresidential use.

b. The maximum capacity shall be twelve (12) children for facilities located in residential or existing structures accessory thereto, unless the additional standards in subsection v. are met. There shall be no maximum limit on the number of children in a facility located in a principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use, or in a nonresidential structure accessory thereto, provided that any such structure that serves more than twelve (12) children shall be subject to review under article V of this chapter.

c. Outdoor play areas shall be screened and buffered from surrounding residences with landscaping and/or fencing to minimize visual and noise impacts.

d. Solid waste shall be stored in covered containers. Such containers shall be screened on all four (4) sides.

e. Day care facilities, nursery schools and kindergartens located either in structures that have been in residential use within the past five (5) years or in existing accessory structures and that serve between thirteen

(13) and twenty-four (24) children shall meet the following additional standards:

i. The facility shall provide a minimum of seventy-five (75) square feet of outdoor play area per child;

ii. The play area shall be located in the side and rear yards only and shall not be located in front yards;

iii. Outside play areas shall be separated from abutting properties by a fence at least forty-eight (48) inches in height;

iv. A ten-foot wide landscaped buffer shall be required outside of the fenced play area, and shall be established in accordance with the landscaping standards of the City's Technical Standards and Guidelines;

v. The minimum lot size for a day care facility located in a residential or existing accessory structure and serving more than twelve (12) children shall be twenty thousand (20,000) square feet;

vi. ***Off-street parking:*** Off-street parking is required as provided in division 20 (off-street parking) of this article.

vii. The maximum number of children in a day care facility located in a residential or existing accessory structure shall be twenty-four (24); and

viii. Any additions or exterior alterations such as facade materials, building form, roof pitch, and exterior doors shall be designed to be compatible with the architectural style of the building and preserve the residential appearance of the building.

7. Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including

pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

8. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 28-85, § 1, 7-15-85; Ord. No. 161-89, § 2, 12-11-89; Ord. No. 235-91, § 15, 2-4-91; Ord. No. 133-96, § 9, 11-18-96; Ord. No. 29-09/10, 8-3-09 emergency passage; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 240-09/10, 6-21-10; Ord. No. 9 10/11, 8-2-10; Ord. No. 149-10/11 3-7-11; Ord. No. 33-11/12, 1-18-12)

Sec. 14-145.10. Prohibited uses.

Uses that are not expressly enumerated herein as either permitted uses or conditional uses are prohibited.

(Ord. No. 28-85, § 1, 7-15-85)

Sec. 14-145.11. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, lots in an IR-2 zone shall meet the following minimum requirements:

(a) *Minimum lot size:*

1. Residential: Twenty thousand (20,000) square feet, except as provided in section 14-433 (lots of record and accessory structure setbacks for existing buildings) and section 14-145.9(a)1 of

this article.

2. Schools and other educational facilities: Twenty thousand (20,000) square feet.

3. Places of assembly:

Large	30,000 sq. ft.
Medium	15,000 sq. ft.
Small	7,500 sq. ft.

4. Lodging houses: Thirty thousand (30,000) square feet for three (3) lodging rooms, plus ten thousand (10,000) square feet for each additional lodging room in excess of three (3).

5. In issuing any permit for new development, the building or planning authority shall require that any lot located in an IR-2 zone shall be at least twenty thousand (20,000) square feet in area when the lot is to be serviced by a subsurface wastewater disposal system, except those lots which are located in a subdivision approved by the Planning Board after June 8, 1968, [and excluding Peaks Island].

6. [Excluding Peaks Island from this subsection 7.,] any property owner whose lot does not meet the minimum lot size requirements outlined in subsection f. of this section may, for purposes of this section only, merge two (2) or more separate lots on the same island in order to meet these requirements. Where the lots so merged are not contiguous, the property owner shall grant to the city as holder a conservation easement upon the lot or lots which will not contain the principal structure. The conservation easement shall contain both an existing legal description and a city assessor's chart, block and lot description. The building authority shall be authorized to accept such conservation easements on behalf of the city. Said easement shall be recorded by the applicant in the registry of deeds. A copy of the recorded easement and copies of the deeds for both lots shall be submitted to the building authority prior

to issuance of a building permit. The property over which the conservation easement has been granted shall be used for passive recreational and conservation purposes only, and shall be subject to the following restrictions:

a. No structure shall be permitted on this property.

b. No parking or storage of vehicles or machinery shall be permitted on this property at any time.

c. No area of this property shall be paved.

d. No exterior storage for commercial use shall be permitted on this property.

e. The easement deed shall reference the lot which is benefited by this conservation easement. No conservation easement shall be used to benefit more than one (1) lot.

Conservation easements shall only be granted over lots which conform either to the provisions of section 14-433 or to the minimum lot sizes set forth in (a)1 of this section. Conservation easements shall not be granted over any lot which is encumbered by any other easement which prohibits all construction on that lot.

A conservation easement may also name as a holder or grant a third-party right of enforcement to a nonprofit corporation or charitable trust, the purposes or powers of which include retaining or protecting the natural, scenic or open space values of real property; assuring the availability of real property for agricultural, forest, recreational or open space use; protecting natural resources; or maintaining or enhancing air or water quality of real property.

Nothing in this section shall be construed to allow an owner of a currently existing and developed lot to convey or permit a portion of that lot to be

used to fulfill the requirements of this section if such conveyance would render the existing lot nonconforming under the terms of this chapter. The lot upon which a building is to be constructed shall meet the minimum lot size requirements of section 14-433.

7. Where an existing subsurface wastewater disposal system serving an existing structure requires replacement, the replacement system shall meet the requirements of CMR 241 Section 2-E. The land area requirements in subsection f. of this section shall not apply to such a replacement system.

   For purposes of this subsection, the mean high tide mark shall be considered to be the shoreline lot line.

(b) *Minimum street frontage:*

Seventy (70) feet, except that a lot of record as described in section 14-433 (lots of record and accessory structure setbacks for existing buildings) and lots created after July 15, 1985, which are not part of a subdivision need not provide street frontage if access is available by means of a permanent easement or right-of-way which existed as of July 15, 1985. Such easement or right-of-way shall have a minimum width of sixteen (16) feet and a minimum travel width of eight (8) feet except that an easement or right-of-way providing access for three (3) or more lots or providing the only means of access to a parcel or parcels of three (3) acres or more, shall be a minimum thirty-two (32) feet wide and meet the construction requirements of article III of chapter 25 (street acceptances) of this Code. Such easement or right-of-way shall permit municipal service delivery.

(c) *Minimum yard dimensions:*

(Yard dimensions shall include setbacks of structures from property lines and setbacks of structures from one another. No structure shall occupy the minimum yard of another structure.)

1. ***Front yard:*** Principal or accessory structures: Twenty-five (25) feet except that a front yard need not exceed the average depth of front yards on either side of the lot.

2. ***Rear yard:*** Principal or accessory structures with ground coverage greater than one hundred (100) square feet: Twenty-five (25) feet.

   Accessory detached structures with ground coverage of one hundred and forty-four(144) square feet or less: Ten (10) feet.

3. ***Side yard:*** Principal or accessory structures with ground coverage greater than one hundred (100) square feet: Twenty (20) feet.

   Accessory detached structures with ground coverage of one hundred and forty-four (144) square feet or less: fifteen (15) feet, except that the minimum distance from a principal structure may be five (5) feet.

4. ***Side yard on side streets:*** Principal or accessory structures: Twenty (20) feet.

5. Not withstanding the foregoing, the width of one side-yard may be reduced to not less than ten feet in the case of a lot of record, existing as of June 5, 1957, and which contained a structure in use at that time and at all times subsequent thereto as a year-round, single-family residence, and which is served by public sewer and water, at the time of any expansion permitted by this section, where the reduction is necessary either to bring the use into compliance with health and safety codes or to improve a condition which the Board of Appeals determines constitutes a health or safety problem. Any alteration or expansion authorized by this section may only be situated in the rear yard and shall not encroach into the required setback more than the existing building does prior to the construction of such alteration or expansion. Any such alteration or expansion will be subject to the maximum lot coverage requirements applicable to

this zone; and, cumulatively, during the lifetime of the structure, may not exceed forty percent (40%) of the combined floor area of the habitable rooms existing at the time of the first expansion permitted by this section. For the purposes of this section "floor area" and "habitable room" shall have the same meaning ascribed to them in Portland Municipal Code, §6-106, et seq., Housing Code, as it may be amended from time to time.

(d) ***Maximum lot coverage:*** Twenty (20) percent of lot area.

(e) ***Minimum lot width:*** Eighty (80) feet.

(f) ***Maximum structure height:***

1. Principal or accessory attached structure: Thirty-five (35) feet. For Little Diamond Island only: Twenty (27) feet.

2. Accessory detached structure: Eighteen (18) feet.

(g) ***Maximum floor area for places of assembly on a collector or arterial road:***

Large	Not limited
Medium	4,500 sq. ft.
Small	2,250 sq. ft.

(h) ***Maximum floor area for places of assembly not on a collector or arterial road:***

Large	4,500 sq. ft.
Medium	2,250 sq. ft.
Small	1,125 sq. ft.

(Ord. No. 28-85, § 1, 7-15-85; Ord. No. 161-89, § 3, 12-11-89; Ord. No. 215-02, 4-17-02; Ord. No. 76-03/04, 10-20-03; Ord. No. 131-08/09, 12-15-08; Ord. No. 127-09/10, 1-4-10 emergency passage)

Sec. 14-145.12. Other requirements.

Other requirements include the following:

(a) ***Off-street parking:*** Off-street parking shall be required as provided in division 20 (off-street parking) of this article.

(b) ***Shoreland and flood plain management regulations:*** Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(c) ***Storage of vehicles:*** Only one (1) unregistered motor vehicle may be stored outside on the premises and not for a period exceeding thirty (30) days.
(Ord. No. 28-85, § 1, 7-15-85; Ord. No. 15-92, § 13, 6-15-92)

DIVISION 7.3. IR-3 ISLAND RESIDENTIAL ZONE

Sec. 14-145.13. Purpose.

The purpose of the IR-3 island residential zone is to allow for a planned unit development in a manner compatible with both the natural and built environment, which provides for adequate circulation and waterfront access, adequate water supply for private use and fire protection, and safe and clean disposal of solid and septic wastes. The following guidelines shall be considered, among others, in establishing an IR-3 zone:

(a) An IR-3 zone should have a minimum land area of twenty (20) acres;

(b) A site for an IR-3 zone should be able to accommodate a higher density of development by providing buffers from surrounding areas on a substantially sized parcel for which natural amenities are capable of being conserved in a development plan for the site;

(c) IR-3 zones should not be established unless issues of municipal services, including infrastructure, education, and police and fire services and other municipal services can be appropriately and adequately addressed;

(d) The differences in scale and intensity of uses between existing development and the IR-3 zone, and the cumulative impact on the overall density of the island, should be mitigated by appropriate open space and buffer areas; and

(e) The development plan should have the capability of meeting the development review standards of section

14-145.16.
(Ord. No. 29-85, § 1, 7-15-85)

Sec. 14-145.14. Permitted uses.

The following uses are permitted in the IR-3 island residential zone:

(a) Planned unit development, including:

1. Single-family detached dwellings;

2. Single-family attached dwellings provided that new construction shall be limited to no more than six (6) attached dwellings per building;

3. Lodging houses, with more than two (2) but not more than nine (9) lodging rooms;

4. Inns, provided that the total number of rooms does not exceed fifty (50);

5. Restaurants;

6. Retail businesses or services;

7. Campgrounds, excluding recreation vehicles, licensed by the State of Maine Department of Human Services provided that:

   a. No tent shall be located within seventy-five (75) feet of the perimeter of the site;

   b. The land area of the site shall not be less than the equivalent of five thousand (5,000) square feet of land area per tent site, exclusive of the roadway network;

8. Recreation facilities excluding amusement park;

9. Wharves, docks, piers, landing ramps, boat houses, store houses for fishing equipment, marinas, and yacht clubs;

10. Municipal uses, provided that outside storage and

parking areas are suitably screened and landscaped so as to ensure compatibility with surrounding neighborhood;

11. Private clubs, fraternal organizations;

12. Utility substations including sewage and water pumping stations and standpipes, electric power substations, transformer stations, telephone electronic equipment enclosures, and other similar structures, provided that such uses are suitably screened and landscaped so as to ensure compatibility with the surrounding neighborhood;

13. Nursery schools, kindergartens, and day care facilities for seven (7) or more children;

14. Schools;

15. Churches or other places of worship;

16. Accessory uses customarily incidental and subordinate to the location, function, and operation of principal uses, subject to the provisions of section 14-404 (accessory use) of this article including but not limited to home occupations; and

17. Handicapped family unit, as defined in section 14-47, for handicapped persons plus staff.

Such development shall have a minimum gross area, as defined in section 14-47 (definitions) of this article, of at least twenty (20) acres of contiguous land. No dimensional requirements shall apply with respect to such development except for the following:

a. Density requirements;

b. Height requirements;

c. Minimum front, rear and side yards adjoining any external property boundary;

d. Minimum street frontage except where the Planning Board finds that the development has an adequate street network sufficient to permit access for pedestrians and emergency and service vehicles.

All area in such a development which is to be owned, used in common, or is proposed for open space shall be governed and maintained as set forth in section 14-498(i)(3), article IV (subdivisions) of this chapter.

The maximum density for a planned unit development shall be based on the applicable minimum lot size for each use as measured in terms of net area. Net area shall be determined by subtracting from gross area the area of street rights-of-way, slopes of fifteen (15) percent or greater, wetland, and otherwise undevelopable area, unless such areas, excluding street rights-of-way, are dedicated to public recreational use or public pedestrian access and are usable as such. For purposes of calculating density, if separately described lots exceed the applicable minimum lot size, the excess area shall not be credited toward the minimum lot size for any other use.

Such development shall be subject to review and approval by the Planning Board with respect to the requirements of article V (site plan) and article IV (subdivisions) of this chapter, whether or not such development is a subdivision within the meaning of article IV of this chapter as now enacted or as hereafter amended. A planned unit development shall be approved by the Planning Board if, in addition to the above standards, it also finds that the development meets the following standards:

(i) ***Design relationship to site.*** The development demonstrates a reasonably unified response to the design possibilities of the site, by virtue of

such elements as the design and layout of buildings and lots, circulation plan, open space, drainage, and orientation to achieve energy conservation or solar access, to form a functionally integrated whole.

(ii) ***Design relationship to surrounding neighborhood.*** The design and layout of the development and buildings are reasonably compatible with the surrounding neighborhood by virtue of such features as architectural style, exterior finish, scale, circulation, open space, landscaping and preservation of natural site amenities.

(iii) ***Open space.*** All open spaces on the site are functionally integrated into the development plan by virtue of such features as accessibility to residents, recreation, conserving existing public rights of access to shoreland areas and scenic natural areas, orientation to achieve energy conservation or solar access, preservation of natural site amenities, and use as a buffer between the development and the surrounding neighborhood.

18. Wind energy ystems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 29-85, § 1, 7-15-85; Ord. No. 33-91, § 12, 1-23-91; Ord. No. 33-11/12)

Sec. 14-145.14.1. Conditional uses.

The following uses shall be permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) and any special provisions, standards or requirements specified below:

(a) Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

1. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

2. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

3. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

4. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

5. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

6. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

7. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not

be used for any other purpose; and

8. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

(b) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 29-09/10, 8-3-09, emergency passage; Ord. No. 33-11/12, 1-18-12)

Sec. 14-145.15. Prohibited uses.

Uses that are not expressly enumerated herein as either permitted uses or conditional uses are prohibited.

(Ord. No. 29-85, § 1, 7-15-85)

Sec. 14-145.16. Development review.

In addition to other applicable requirements, no development shall occur nor shall any new use be established unless the Planning Board finds that the final development plan for the site is in compliance with the following development standards:

(a) *Transportation:* The development shall be designed primarily with a pedestrian orientation to minimize the use of and dependency on private motor vehicles. Appropriate areas on the site shall be designated, as necessary, for parking of common service vehicles, golf carts or bicycles to serve the transportation needs of residents and visitors. The internal circulation plan shall also be coordinated with the existing island street network to ensure adequate access for emergency and service vehicles.

A project construction plan shall be developed indicating the anticipated number and types of vehicles such as construction equipment, supply-delivery and service vehicles needed for undertaking the construction of the project. Documentation shall be provided as to the

proposed transportation route such as roads, piers, beaches, sand bars and the impact of construction related activities on the routes.

The development shall not have a substantial adverse impact on the capacity of existing island docking facilities. The developer shall demonstrate that an adequate water transportation system, including docking facilities, exists or will be provided.

(b) ***Solid waste:*** Adequate provision for off-island solid waste disposal shall be demonstrated such that the impact on municipal solid waste disposal is minimized. A development shall incorporate methods such as the following to reduce the amount of solid waste generated by the project: compaction and reduction in waste volume, recycling, incineration or baler system, and private collection and transfer to an off-island location. It shall be demonstrated that there will be no significant environmental impacts from the solid waste disposal system.

(c) ***Sanitary waste:*** All sanitary waste from the development shall be disposed of by a public sewer, private community sewer system providing at least secondary treatment, or subsurface sewerage system, in compliance with federal, state and local regulations. The developer shall demonstrate that the project will comply with all applicable federal, state and local water quality and groundwater standards.

(d) ***Water:*** The proposed development shall have sufficient water for the reasonably foreseeable needs of the development and shall not cause an unreasonable burden on existing water supply nor adversely affect groundwater resources. Unless the development is to be served entirely by public water and secondary treatment sewer systems, the determination of compliance with this provision shall be based upon one (1) or more comprehensive groundwater analyses and reports prepared by qualified professionals and including assessment of current groundwater aquifer conditions, the impact of the proposed development on the groundwater aquifer, and recommendations for mitigation of potential impacts caused by the development.

(e) ***Shoreland areas:*** The development shall preserve the natural features of the shoreland area by minimizing the disturbance of existing vegetation and slopes, avoiding development in areas subject to erosion and sedimentation, and conserving scenic views and vistas to and from the site.

(f) ***Environmentally sensitive areas:*** The development plan shall preserve significant resources of the site by integrating open space into the development plan and by conserving such features as scenic vistas, historic man-made or natural features, existing vegetation, wetland areas, shoreland areas, ground water, natural wildlife habitat, and recommended or registered State of Maine Critical Land Areas, as well as other environmentally sensitive areas.

(g) ***Recreation and open space:*** All open spaces on the site shall be functionally integrated into the development plan by virtue of such features as passive and active recreational opportunities, accessibility to residents, preservation of natural site amenities and resources, orientation to achieve energy conservation or solar access, use as a buffer between housing clusters and to screen the development from surrounding areas.

(h) ***Financial and technical capability:*** The applicant shall demonstrate sufficient financial and technical capability for undertaking the proposed project. Financial capability shall include a cost estimate of the proposed improvements, proposed construction and permanent financing, and terms of sale or lease of dwellings and commercial space. Technical capacity shall include the experience and expertise of the developer in implementing projects of similar scope.

(i) ***Environmental impact analysis:*** The applicant shall develop an environmental impact analysis including an inventory of existing environmental conditions at the project site and in the surrounding area with an assessment of the development's probable impact upon the environment. The inventory shall include such resources as air, water quality, water supply, surface water and shoreline, geology, soils, topography, wildlife,

botanical and aquatic, including rare and endangered species, historic, archeological and aesthetic. The analysis shall include the direct and cumulative adverse impacts of the project on these resources. The analysis shall also include what steps the applicant proposes to take to identify and minimize adverse environmental impacts during construction, management and use of the property and whether there are alternatives for the project which would decrease the impact of the development.

(j) *Development phasing:* If the project is to be completed in phases, the applicant shall indicate the schedule for completing and implementing infrastructure improvements as well as other improvements, agreements or services required for compliance with the development standards of this section, planned unit development standards, and site plan and subdivision review requirements.

(k) *Emergency services:* The development shall not place an unreasonable burden on the ability of the city to provide police, fire and other emergency services.

(Ord. No. 29-85, § 1, 7-15-85)

Sec. 14-145.17. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, lots in the IR-3 zone shall meet the following minimum requirements:

(a) *Minimum lot size:*

1. Residential: Forty-two thousand five hundred (42,500) square feet per dwelling unit, except that the minimum lot size per dwelling unit shall be reduced by the amounts specified below, to a minimum lot size of thirty-five thousand (35,000) square feet per dwelling unit, provided that the Planning Board finds that the development meets the following criteria:

   a. The minimum lot size per dwelling unit shall be reduced by five thousand (5,000) square feet if a public off-island water source provides seventy-five (75) percent of the

water needs of the development.

b. The minimum lot size per dwelling unit shall be reduced by two thousand five hundred (2,500) square feet if the development provides appropriate permanent restrictions or other agreements precluding the use, maintenance and parking of all private motor vehicles exclusive of construction and common service vehicles.

2. Inn: Ten thousand (10,000) square feet for each lodging room.

3. Restaurant: Thirty-five thousand (35,000) square feet.

4. Campground: Five thousand (5,000) square feet per campsite, but not less than ten (10) acres.

5. Private clubs, fraternal organizations, or seasonal camp: Thirty-five thousand (35,000) square feet.

6. Lodging houses: Thirty thousand (30,000) square feet for three (3) lodging rooms, plus ten thousand (10,000) square feet for each additional lodging room in excess of three (3).

7. Other uses: Thirty-five thousand (35,000) square feet.

8. In issuing any permit for new development, the building or planning authority shall require that any lot located in an IR-3 zone shall be at least twenty thousand (20,000) square feet in area when the lot is to be serviced by a subsurface wastewater disposal system, except those lots which are located in a subdivision approved by the Planning Board after June 8, 1968, [and excluding Peaks Island].

9. [Excluding Peaks Island from this subsection i.,] any property owner whose lot does not meet the minimum lot size requirements outlined in subsection h. of this section may, for purposes of

this section only, merge two (2) or more separate lots on the same island in order to meet these requirements. Where the lots so merged are not contiguous, the property owner shall grant to the city as holder a conservation easement upon the lot or lots which will not contain the principal structure. The conservation easement shall contain both an existing legal description and a city assessor's chart, block and lot description. The building authority shall be authorized to accept such conservation easements on behalf of the city. Said easement shall be recorded by the applicant in the registry of deeds. A copy of the recorded easement and copies of the deeds for both lots shall be submitted to the building authority prior to issuance of a building permit. The property over which the conservation easement has been granted shall be used for passive recreational and conservation purposes only, and shall be subject to the following restrictions:

a. No structure shall be permitted on this property.

b. No parking or storage of vehicles or machinery shall be permitted on this property at any time.

c. No area of this property shall be paved.

d. No exterior storage for commercial use shall be permitted on this property.

e. The easement deed shall reference the lot which is benefited by this conservation easement. No conservation easement shall be used to benefit more than one (1) lot.

Conservation easements shall only be granted over lots which conform either to the provisions of section 14-433 or to the minimum lot sizes set forth in (a)1 of this section. Conservation easements shall not be granted over any lot which is encumbered by any other easement which prohibits all construction on that lot.

A conservation easement may also name as a holder or grant a third-party right of enforcement to a nonprofit corporation or charitable trust, the purposes or powers of which include retaining or protecting the natural, scenic or open space values of real property; assuring the availability of real property for agricultural, forest, recreational or open space use; protecting natural resources; or maintaining or enhancing air or water quality of real property.

Nothing in this section shall be construed to allow an owner of a currently existing and developed lot to convey or permit a portion of that lot to be used to fulfill the requirements of this section if such conveyance would render the existing lot nonconforming under the terms of this chapter. The lot upon which a building is to be constructed shall meet the minimum lot size requirements of section 14-433.

10. Where an existing system subsurface wastewater disposal serving an existing structure requires replacement, the replacement system shall meet the requirements of CMR 241 Section 2-E. The land area requirements in subsection h. of this section shall not apply to such a replacement system.

    For purposes of this subsection, the mean high tide mark shall be considered to be the shoreline lot line.

    The minimum lot size for buildings containing both residential and nonresidential uses shall be cumulative. Where there are two (2) or more residential uses contained in a building, the minimum lot size shall be the larger of the applicable minimum lot sizes.

(b) ***Minimum street frontage:*** Seventy (70) feet.

(c) ***Minimum yard dimensions:***

(Yard dimensions shall include setbacks of structures

from property lines and setbacks of structures from one another. No structure shall occupy the minimum yard of another structure.)

1. ***Front yard:*** Principal or accessory structures: Twenty-five (25) feet.

2. ***Rear yard:*** Principal or accessory structures with ground coverage greater than one hundred (100) square feet: Twenty-five (25) feet.

   Accessory detached structures with ground coverage of one hundred and forty-four (144) square feet or less: Ten (10) feet.

3. ***Sideyard:*** Principal or accessory structures with ground coverage greater than one hundred (100) square feet: Twenty (20) feet.

   Accessory detached structures with ground coverage of one hundred and forty-four (144) square feet or less: Fifteen (15) feet.

4. ***Side yard on side street:*** Principal or accessory structures: Twenty (20) feet.

(d) ***Maximum lot coverage:*** Twenty (20) percent of lot area.

(e) ***Minimum lot width:*** Eighty (80) feet.

(f) ***Maximum structure height:*** Principal or accessory attached structure: Thirty-five (35) feet.

Accessory detached structure: Eighteen (18) feet.

(Ord. No. 29-85, § 1, 7-15-85; Ord. No. 162-89, 12-11-89; Ord. No. 131-08/09, 12-15-08)

Sec. 14-145.18. Other requirements.

[Other requirements include the following:]

(a) ***Shoreland and flood plain management regulations:*** Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(b) ***Off-street parking:*** Off-street parking is required as provided in division 20 (off-street parking) of this article.
(Ord. No. 29-85, § 1, 7-15-85; Ord. No. 15-92, § 14, 6-15-92; Ord. No. 240-09/10, 6-21-10)

Sec. 14-145.19. Reserved.

DIVISION 7.5. ISLAND TRANSFER STATION OVERLAY ZONE

Sec. 14-145.20. Purpose.

The purpose of the Island Transfer Station Overlay Zone is to establish an appropriate location for a transfer station for municipal solid waste and municipal public works activities. This zone shall be established through a conditional rezoning process in order to ensure the imposition of appropriate conditions for the protection of neighboring properties.
(Ord. No. 50-98, 7-20-98)

Sec. 14-145.21.1 Permitted uses.

The following uses shall be permitted in the Island Transfer Overlay Zone:

(a) Municipal solid waste facilities, including compactors and storage bins, provided that the compactor shall be located within a fully enclosed structure.

(b) Recycling facilities, provided that all recycling areas shall be buffered and screened from neighboring properties.

(c) Municipal garages, material storage, and parking for vehicles.

(d) Maintenance of municipal vehicles and equipment.

(e) Wind energy systems, as defined and allowed in Article X, Alternative Energy.
(Ord. No. 50-98, 7-20-98; Ord. No. 33-11/12, 1-18-12)

Sec. 14-145.21.2. Conditional uses.

The following use is permitted only upon the issuance of a

conditional use permit, subject to the provisions of section n14-474 (conditional uses) of this article and any special provisions, standards or requiremetns specified below:

(a) Temporary wind anemometer towers, as defined in sec. 14-47, are permitted provided the following standards are met in addition to sec. 14-430.

1. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a certificate of occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

2. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the board of appeals with the application; and

3. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

4. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the board of appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in temrs of strength, stability, security, grounding, icing impacts and maintenance; and

5. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to corporation counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

6. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

7. Towers shall be used for installing anemometers and

similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meterorological data, but shall not be used for any other purpose; and

8. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, of the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

(b) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 33-11/12, 1-18-12)

Sec. 14-145.22. Conditional rezoning.

Requirements for setbacks and any operational limitations shall be established as part of the conditional rezoning process.

(Ord. No. 50-98, 7-20-98)

DIVISION 8. R-P RESIDENCE-PROFESSIONAL ZONE*

***Editor's note--**Ord. No. 291-88, adopted Apr. 4, 1988, with an effective date of July 1, 1988, repealed §§ 14-146--14-151 of Div. 8, R-P Residence-Professional Zone, of this article and enacted similar new provisions in lieu thereof as set out in §§ 14-146--14-151. Formerly, such sections derived from §§ 602.7A, 602.7A.A and 602.7A.B of the city's 1968 Code and from Ord. No. 49-73, adopted Jan. 3, 1973; Ord. No. 499-74, § 3, adopted Aug. 19, 1974; and Ord. No. 312-85, §§ 1--3, adopted Dec. 2, 1985.

Sec. 14-146. Purposes.

The purposes of the R-P residence-professional zone are:

(a) To provide appropriate location for the development and operation of low-intensity business uses, including professional offices on or near major arterials, that are compatible in scale, density and use with surrounding and adjacent residential neighborhoods; or

(b) To serve as a transition or buffer zone between residential and more intensive nonresidential zones.
(Ord. No. 291-88, 4-4-88)

Sec. 14-147. Permitted uses.

The following uses are permitted in the R-P district:

(a) *Residential:* Any residential use is permitted in the residential zone abutting the lot. If there is no abutting residential zone, the nearest residential zone to the lot. In the case of two (2) or more abutting residential zones, the most restrictive such zone.

(b) *Business:*

1. Professional offices, including the offices and facilities of health care and related laboratory and pharmacy services and health care administration, but excluding personal services, retail establishments and veterinarians.

2. Business services, as defined in section 14-47, except copy services.

3. Adult day care services.

4. Mortuaries or funeral homes.

(c) *Other:*

1. Utility substations, as defined in section 14-47, subject to the requirements of article V (site plan), sections 14-522 and 14-523 notwithstanding.

2. Accessory uses as provided in section 14-404.

3. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 291-88, 4-4-88: Ord. No. 149-05/06, 2-18-06; Ord. No. 166-08/09, 3-3-09; Ord. No. 10 10/11, 8-2-10; Ord. No. 33-11/12, 1-18-12)

Sec. 14-147.5. Conditional uses.

The following uses are permitted as provided in section 14-474 (conditional uses) if they meet the following requirements:

(a) Such other offices which have characteristics similar to but no more objectionable than those generally associated with professional offices. In determining appropriateness, the zoning board shall consider the quality of building design and materials, signage, and landscaping, and their general compatibility with the surrounding residential development. Such uses shall also be shown to have vehicular patterns, including parking and storage of motor vehicles, similar to those associated with professional offices. Noise levels and hours of operation shall also be considered. An approval granted under this section shall be issued to a specific user and shall not run with the land to subsequent users. A new conditional use approval shall be required when the user changes. A new conditional use approval may be issued by the zoning authority if it determines that the new user will maintain the same use as the original user and that such use will not have substantially different external effects, including, but not limited to, parking, vehicular traffic on and off the site, noise levels, hours of operation, and visual characteristics such as signage or changes to building design.

(b) With the exception of daycare facilities below, any conditional use that is allowed as a conditional use in any residential zone abutting the lot. If there is no abutting residential zone, any conditional use that is allowed as a conditional use in the nearest residential zone to the lot. Any such conditional use shall be subject to all conditions required in the residential zone.

(c) Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

1. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site

within sixty (60) days; and

2. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

3. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

4. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

5. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

6. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

7. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

8. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow

account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

(d) Daycare facilities or home babysitting services not otherwise permitted as a home occupation under section 14-410, and nursery schools and kindergartens for up to twelve (12) children shall be allowed as a conditional use:

1. Proof of licensing with the Maine Department of Human Services is submitted to the city prior to issuance of a certificate of occupancy.

2. Outdoor play areas shall be screened and buffered from surrounding residences with landscaping and/or fencing to minimize visual and noise impacts.

3. Solid waste shall be stored in covered containers. Such containers shall be screened on all four (4) sides.

(e) Daycare facilities, home babysitting services, nursery schools and kindergartens that serve more than 12 children shall meet the following additional standards:

1. Proof of licensing with the Maine Department of Human Services is submitted to the city prior to issuance of a certificate of occupancy.

2. The facility shall provide a minimum of seventy-five (75) square feet of outdoor play area per child.

3. The play area shall be located in the side and rear yards only and shall not be located in front yards.

4. Outside play areas shall be separated from

abutting properties by a fence at least forty-eight (48) inches in height.

5. A ten-foot (10') wide landscaped buffer shall be required outside of the fenced play area, and shall be established in accordance with the landscaping standards of the city's Technical Standards and Guidelines.

6. The minimum lot size for a daycare facility, home babysitting service, nursery school or kindergarten serving more than twelve (12) children shall be six thousand (6,000) square feet.

7. ***Off-street parking***: Off-street parking is required as provided in division 20 (off-street parking) of this article.

8. Any additions or exterior alternations such as façade materials, building form, roof pitch, and exterior doors shall be designed to be compatible with the architectural style of the building or preserve the residential appearance of the building.

(f) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 201-92, § 1, 1-6-92; Ord. No. 133-96, § 10, 11-18-96; Ord. No. 29-09/10, 8-3-09 emergency passage; Ord. No. 312-08/09, 7-20-09; Ord. No. 33-11/12, 1-18-12)

Sec. 14-148. Prohibited uses.

Uses not enumerated in section 14-147 as permitted uses or in section 14-147.5 as conditional uses are prohibited.

(Ord. No. 291-88, 4-4-88; Ord. No. 201-92, § 2, 1-6-92)

Sec. 14-149. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, the following requirements shall apply. Residential uses permitted under section 14-147(a) shall meet the requirements of such abutting or nearest residential zone. Nonresidential uses in the R-P zone shall meet

the following minimum requirements:

(a) ***Minimum lot size:*** Six thousand (6,000) square feet.

(b) ***Minimum street frontage:*** Sixty (60) feet.

(c) ***Minimum yard dimensions:***

1. ***Front yard:***

a. Principal or accessory structures: Twenty (20) feet, except that:

i. The front yard need not exceed the average depth of immediately abutting front yards; and

ii. The front yard of a lot existing as of April 4, 1988, which lot is less than one hundred (100) feet deep, need not be deeper than ten (10) percent of the depth of the lot.

2. ***Rear yard:***

a. Principal structures: Twenty (20) feet.

b. Accessory structures (detached): Seven (7) feet.

3. ***Side yard:***

a. Principal structures:

Number of Stories	*Required Side Yard*
1 story	10 feet
2 stories	12 feet
3 or more stories	14 feet

The width of one (1) side yard may be reduced one (1) foot for each foot that the other side yard is correspondingly increased, provided,

however, no side yard shall be reduced to less than seven (7) feet in width.

b. Accessory structures (detached): Seven (7) feet.

c. Side yards on side streets (corner lot): For both principal or accessory structures:

i. One (1) or two (2) stories: Fifteen (15) feet; and

ii. Three (3) or more stories: Eighteen (18) feet.

(d) ***Minimum lot width:*** Sixty (60) feet.

(e) ***Maximum structure height:*** Forty-five (45) feet. Where the lot abuts an R-6 residential zone, the maximum permitted height shall be the maximum permitted height of the R-6 zone. If there is a difference in height between abutting R-6 zones, the least restrictive height limitation shall apply.

(f) ***Maximum impervious surface ratio:*** The maximum impervious surface ratio is established according to the abutting residential zone. If there is no abutting residential zone to the lot in question, the nearest residential zone to the lot. In the case of two (2) or more abutting residential zones, the least restrictive such zone. The ratios are as follows:

Maximum Impervious

Residential Zone	Surface Ratio
R-1/R-2	0.60
R-3	0.70
R-4/R-5/R-5A/R-6	0.80

(g) ***Floor area ratio (F.A.R.):*** The maximum floor area ratio is established according to the abutting residential zone. If there is no abutting residential zone to the lot

in question, the nearest residential zone to the lot. In the case of two (2) or more abutting residential zones, the least restrictive such zone. The ratios are as follows:

Residential	*Floor Area Ratio*
R-1/R-2	0.45
R-3	0.55
R-4/R-5/R-5A/R-6 . .	0.65

(Ord. No., 291-88, 4-4-88; Ord. No. 149-05/06, 1-18-06)

Sec. 14-150. Other requirements.

All nonresidential uses in the R-P zone shall meet the requirements of division 25 (space and bulk regulations and exceptions) of this article in addition to the following requirements:

(a) ***Landscaping and screening:*** The site shall be suitably landscaped for parking, surrounding uses and accessory site elements, including storage and solid waste receptacles where required by article IV (subdivisions) and article V (site plan).

(b) ***Curbs and sidewalks:*** Curbs and sidewalks as specified in article VI of chapter 25.

(c) ***Off-street parking and loading:*** Off-street parking and loading are as required by division 20 and division 21 of this article.

(d) ***Front yard parking:*** There shall be no parking in the front yard between the street line and the required minimum setback line. A maximum of ten (10) percent of the total parking provided on the site may be located between the principal structure and the front yard, provided that for a lot of three (3) acres or more this limitation does not apply.

(e) ***Signs:*** Signs shall be subject to the provisions of division 22 of this article.

(f) ***Exterior storage:*** There shall be no exterior storage with the exception of receptacles for solid waste disposal. Such receptacles shall be shown on the approved site plan.

(g) ***Storage of vehicles:*** Storage of vehicles is subject to the provisions of section 14-335.

(h) ***Shoreland and flood plain management regulations:*** If the lot is located in a shoreland zone or in a flood hazard zone, the requirements of division 26 and/or division 26.5 apply.

(Ord. No. 291-88, 4-4-88; Ord. No. 149-05/06, 1-18-06)

Sec. 14-151. External effects.

Every use in a R-P zone shall be subject to the following requirements:

(a) ***Enclosed structure:*** The use shall be operated within a completely enclosed structure, except for those customarily operated in the open air.

(b) ***Noise:*** The volume of sound, measured by a sound level meter with frequency weighting network (manufactured according to standards prescribed by the American Standards Association), generated shall not exceed fifty-five (55) decibels on the A scale, on impulse (less than one (1) second), at lot boundaries, excepting air raid sirens and similar warning devices.

(c) ***Vibration and heat:*** Vibration inherently and recurrently generated and heat shall be imperceptible without instruments at lot boundaries.

(d) ***Glare, radiation or fumes:*** Glare, radiation or fumes shall not be emitted to an obnoxious or dangerous degree beyond lot boundaries.

(e) ***Smoke:*** Smoke shall not be emitted at a density in excess of twenty (20) percent opacity level, as classified in Method 9 (Visible Emissions) of the Opacity Evaluation System of the U.S. Environmental Protection Agency.

(f) ***Materials or wastes:*** No materials or wastes shall be

deposited on any lot in such form or manner that they may be transferred beyond the lot boundaries by natural causes or forces. All material which might cause fumes or dust, or constitute a fire hazard if stored out-of-doors, shall be only in closed containers. Areas attracting large numbers of birds, rodents or insects are prohibited.

(g) The hours of operation of funeral homes (including processions) may be restricted and/or traffic management measures may be required, in order to avoid impacts to the public street system, if so recommended by the city traffic engineer or comparable professional.

(Ord. No. 291-88, 4-4-88; Ord. No. 166-08/09, 3-3-09)

DIVISION 8.1 USM, UNIVERSITY OF SOUTHERN MAINE OVERLAY ZONE

Sec. 14-152. Purpose.

The intention of this division is to establish an overlay zone in which an existing university campus can be continued and reasonably expanded within defined boundaries, in addition to those uses permitted in the underlying zone or zones. The purpose of this division is to recognize the unique qualities of a university campus while at the same time protecting the value and integrity of established neighborhoods.

(Ord. No. 171-05/06, 3-20-06)

Sec. 14-152.1. Location and applicability of University of Southern Maine overlay zone.

The University of Southern Maine overlay district, as shown on the zoning map is intended to encompass and define the University of Southern Maine campus westerly of Forest Avenue. Properties in the University of Southern Maine overlay zone shall continue to be governed by the regulations applicable to the underlying zoning districts except as specifically modified by this division.

(Ord. No. 171-05/06, 3-20-06)

Sec. 14-152.2. Permitted uses.

In addition to the permitted uses allowed in the underlying zoning districts and notwithstanding anything to the contrary in the use regulations for the underlying zoning districts, the following uses are permitted uses in the University of Southern

University uses including, but not limited to, the following:

1. Classrooms;

2. Laboratory facilities;

3. Research facilities;

4. Student unions;

5. Dining halls;

6. Bookstores;

7. Auditoriums;

8. Concert halls;

9. Lecture halls;

10. Gymnasiums;

11. Libraries;

12. Outdoor use areas, such as "quads", greens, parks, gardens, art installations, and other active and passive noncommercial recreation spaces;

13. Faculty housing;

14. Student housing;

15. Parking lots;

16. Parking garages;

17. Community meeting spaces;

18. Administrative offices;

19. Faculty offices;

20. Transportation facilities;

21. Maintenance facilities;

22. Utility buildings;

23. Student health services;

24. Daycare facilities, nursery schools and kindergartens operated in conjunction with university programs or serving students, faculty or employees of the university and their families, with associated outside play areas;

25. Other buildings, structures and uses customarily incidental to a university.

Except that, on lots fronting on Chamberlain Avenue and Exeter Street, university uses shall be limited to faculty housing, graduate student housing, faculty offices and administrative offices, and buildings containing such uses shall be designed and maintained so as to complement the residential character of the street as required in §14-152.7.

No change of use permit under section 14-463 shall be required for any of the above uses in actual existence as of the date of enactment of the University of Southern Maine overlay zone.
(Ord. NO. 171-05/06, 3-20-06)

Sec. 14-152.2.1. Conditional uses.

The following uses are permitted as provided in section 14-474 (conditional uses) if they meet the following requirements:

(a) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 33-11/12, 1-18-12)

Sec. 14-152.3 Dimensional requirements.

University buildings and structures shall be subject to the applicable dimensional requirements of the underlying zoning districts, except as follows:

(a) ***Minimum yard dimensions*** shall be the same as in the underlying zone, except as shown on the university campus overlay setback map, incorporated herein by reference. Side and rear yards shall not be required between

buildings on contiguous lots owned by the university on the condition that such contiguous lots shall be considered merged and shall not be separately conveyed unless required yard dimensions in the underlying zones are provided.

(b) ***Maximum building height*** shall be the same as in the underlying zone, except as shown on the university campus overlay height map, incorporated herein by reference, depicting the following height zones:

1. Height zone A, maximum building height 45 feet.

2. Height zone B, maximum building height 75 feet.

3. Height zone C, maximum building height 85 feet.

(c) ***Minimum building height.*** All new freestanding buildings in height zone B and height zone C must be built to a height of at least 35 feet or designed and constructed so that they can be expanded to 35 feet or higher. As used in this paragraph, the term "new freestanding building" means any building which is not an addition to or expansion of a building which existed on the date of enactment of the University of Southern Maine overlay zone.

(d) ***Maximum impervious surface ratio*** shall be 66% of the total land area within the University o Southern Maine overlay zone exclusive of public streets.

(e) ***Maximum coverage by buildings*** shall be 40% of the total land area within the University of Southern Maine overlay zone exclusive of public streets.

(Ord. No. 171-05/06, 3-20-06)

Sec. 14-152.4. Parking.

Off-street parking: Off-street parking is required as provided in division 20 (off-street parking) of this article.
(Ord. No. 171-05/06, 3-20-06; Ord. No. 240-09/10, 6-21-10)

Sec. 14-152.5. Loading.

The requirements of section 14-351 shall not apply to

university buildings. Instead, the amount of loading area required for any university building shall be determined by the planning board during site plan review, based on a campus-wide analysis, treating all contiguous lots owned by the university as one lot. In determining the amount of loading space required for any university building, the planning board may take into account such factors as:

(a) The use of centrally located on-campus loading facilities so situated that vehicles making deliveries can load and unload in the central facilities, provided no single location is overburdened with loading facilities.

(b) Shared use of a single loading facility by two or more buildings.

(c) Impacts of the loading area on adjacent uses outside the University of Southern Maine overlay zone.

(Ord. No. 171-05/06, 3-20-06)

Sec. 14-152.6. Signage.

Signs comply with the requirements of Division 22, except as those regulations are modified or augmented below:

(a) Signs shall be designed in accordance with signage standards promulgated by the university, providing for a unified, apparent and ADA-compliant campus-wide system for identification, orientation and regulatory signage.

(b) Banners are allowed as follows:

1. Generic banners containing the logo and colors of the university, used for decorative purposes.

2. Banners used for advertising university events, which can be displayed for a maximum of four weeks prior to and one week following the event.

(Ord. No. 171-05/06, 3-20-06)

Sec. 14-152.7. University overlay zone design principles and standards.

All minor and major development in the University of Southern Maine overlay zone conform to the requirements of chapter 14,

article V (site plan review) and the requirements contained within the planning and development design manual, which is incorporated therein by reference.
(Ord. No. 171-05/06, 3-20-06)

Sec. 14-152.8. Campus housing.

For any development requiring level III site plan review, the university shall submit to the planning board a campus housing analysis. The analysis shall include a description of housing demand and supply at the time of the application, a projection of housing demand expected to arise from the proposed development and/or as a result of program changes anticipated to occur concurrently with the proposed development, and a description of how the university intends to meet any increased housing demand through on-campus housing, off-campus housing developed by the university, and/or off-campus housing developed by others.
(Ord. No. 171-05/06, 3-20-06; Ord. No. 278-09/10, 7-19-10)

Sec. 14-152.9. Required review for change of use, additions and renovations.

In the case of properties fronting Chamberlain Avenue, Exeter Street and the northerly side of Bedford Street from Surrender Street to Deering Avenue, level II site plan review shall be required of: (1) all changes of use; and (2) all building additions and renovations affecting an area equivalent to 25% or more of the existing floor area of a structure, unless level III site plan review is otherwise required under chapter 14, article V.
(Ord. NO. 171-05/06, 3-20-06)

DIVISION 8.5. R-OS RECREATION AND OPEN SPACE ZONE

Sec. 14-153. Purpose.

(a) The purpose of this division is:

1. To preserve and protect open space as a limited and valuable resource;

2. To permit the reasonable use of open space, while simultaneously preserving and protecting its inherent open space characteristics to assure its continued availability for public use as scenic, recreation, and conservation or natural resource area, and for the

containment and structuring of urban development;

3. To coordinate with and carry out federal, state, regional, and city recreation and open space plans; and

4. To provide a suitable location for large-scale regional sports and athletic facilities.

(b) The recreation open space zone may include major parcels (over two (2) acres) of public property, and private property legally restricted from intensive use or development through deed, covenant, or otherwise.

(Ord. No. 232-81, § 602.7B.1, 11-16-81; Ord. No. 187-01/02, § 2, 4-17-02)

Sec. 14-154. Permitted uses.

The following uses are permitted uses within the recreation and open space zone, subject to the development standards contained herein:

(a) Municipal parks, public open spaces, picnic areas, playgrounds and play lots;

(b) Cemeteries;

(c) Arboretums;

(d) Golf courses, excluding miniature golf;

(e) Boat landings, beaches, and marinas for public uses;

(f) Outdoor ballfields and public athletic fields;

(g) Swimming pools and tennis courts;

(h) Picnic groves and areas;

(i) Natural parks and scenic overlooks;

(j) Hiking, walking, bicycling or cross-country ski trails;

(k) Community gardens for cultivation by and for city residents;

(l) Sewage pumping stations and sewage treatment facilities;

(m) Sports complexes;

(n) Accessory uses, including structures or buildings of less than two thousand five hundred (2,500) square feet of floor area.

(o) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(p) Street vendors licensed pursuant to Chapter 19 as a result of a competitive bid process conducted pursuant to Chapter 2 of the City Code.

(Ord. No. 232-81, § 602.7B.2, 11-16-81; Ord. No. 60-91, § 1, 8-5-91; Ord. No. 187-01/02, § 3, 4-17-02; Ord. No. 33-11/12, 1-18-12; Ord.No. 10-12/13, 7-16-12)

Sec. 14-155. Conditional uses.

The following uses are conditional uses in the recreation and open space zone, subject to approval by the board of appeals.

(a) Accessory uses with structures or buildings of two thousand five hundred (2,500) square feet or more of floor area;

(b) Other recreational facilities and uses that are open to the public;

(c) Water pumping stations.

(d) Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

1. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

2. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided

to the Board of Appeals with the application; and

3. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

4. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

5. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

6. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

7. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

8. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

(e) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 232-81, § 602.7B.3, 11-16-81; Ord. No. 67-89, § 1, 8-7-89; Ord. No. 60-91, § 2, 8-5-91; Ord. No. 29-09/10, 8-3-09, emergency passage; Ord. No. 33-11/12, 1-18-12)

Sec. 14-156. Standards for conditional uses.

In addition to the criteria listed in section 14-474(c), the board of appeals shall consider the following criteria when reviewing conditional uses specified in section 14-155(a), (b) and (c):

(a) The use shall be in conformity with or satisfy a deficiency identified in a federal, state, regional, or city recreation and open space plan, including but not limited to the state comprehensive outdoor recreation plan, as such plans may from time to time be created or revised.

(b) Buildings and structures shall not obstruct significant scenic views presently enjoyed by nearby residents, passersby, or users of the site.

(c) Indoor recreation or nonrecreational uses shall serve a significant public purpose that cannot reasonably be accommodated outside of the recreation and open space zone.

(Ord. No. 232-81, § 602.7B.4, 11-16-81; Ord. No. 29-09/10, 8-3-09, emergency passage)

Sec. 14-157. Space and bulk requirements.

No building or structure of a permanent nature shall be erected, altered, enlarged, rebuilt, or used unless it meets the following requirements:

(a) *Minimum front yard:*

1. Principal buildings or structures: Twenty-five (25) feet.

2. Accessory buildings or structures: Twenty-five (25) feet.

(b) *Minimum rear yard:*

1. Principal buildings or structures: Twenty-five (25) feet.

2. Accessory buildings or structures: Twenty-five (25) feet.

(c) *Minimum side yard:*

1. Principal buildings or structures: Twelve (12) feet.

2. Accessory buildings or structures: Twelve (12) feet.

(d) *Minimum lot size:* Two (2) acres, except that sewage treatment facilities are not required to meet this standard.

(e) *Maximum building height:* Thirty-five (35) feet, unless more than one thousand (1,000) feet from a shoreland zone. The maximum building height for buildings located more than one thousand (1,000) feet from a shoreland zone shall be forty-five (45) feet.

(f) *Maximum coverage of lot* by buildings, structures and other impervious site improvements such as paved sidewalks, drives and parking lots:

1. Sewage treatment facilities: No limit on maximum coverage.

2. Sports complexes: Seventy-five (75) percent of lot area.

3. All other uses: Twenty-five (25) percent of lot area.

(g) *Maximum floor area ratio:* Five-tenths (0.5).

(Ord. No. 232-81, § 602.7B.5, 11-16-81; Ord. No. 67-89, § 2, 8-7-89; Ord. No. 205-93, 2-2-93; Ord. No. 187-01/02, § 4, 4-17-02)

Sec. 14-158. Development standards for recreation and open space zone.

All development in the recreation and open space zone shall

comply with the following development standards, which shall be reviewed by the Planning Board in conjunction with the site plan review:

(a) All ground areas not used for parking, loading, vehicular or pedestrian areas and not left in their natural state shall be suitably landscaped.

(b) Natural features, such as mature trees and natural surface drainageways, shall be preserved to the greatest possible extent consistent with the uses of the property.

(c) Loading areas shall be screened and parking areas shall be screened and landscaped so as to avoid a large continuous expanse of paved area.

(d) Buildings and structures shall be sited to avoid obstructing significant scenic views presently enjoyed by nearby residents, passersby, and users of the site.

(e) Storage of commodities and equipment shall be completely enclosed within buildings or provided with screening by a fence, wall, or landscaping.

(f) The outer perimeter of playfields, play lots, and other active recreational areas shall be screened, or shall be located a reasonable distance from any residential use.

(g) *Off-street parking*: Off-street parking is required as provided indivisio n20 (off-street parking) of this article.

(Ord. No. 232-81, § 602.7B.6, 11-16-81; Ord. No. 240-09/10, 6-21-10)

Sec. 14-159. Shoreland and flood plain management regulations.

Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(Ord. No. 232-81, § 602.7B.7, 11-16-81; Ord. No. 15-92, § 15, 6-15-92)

Sec. 14-160. Reserved.

DIVISION 9. B-1 AND B-1b NEIGHBORHOOD BUSINESS ZONES*

***Editor's note--**Ord. No. 292-88, adopted Apr. 4, 1988, with an effective date of July 1, 1988, repealed §§ 14-161--14-167 of Div. 9, B-1 Business Zone, of this article and enacted in lieu thereof similar new provisions as set out in §§ 14-161--14-167. Formerly, such sections derived from §§ 602.8.A--602.8.G of the city's 1968 Code and from Ord. No. 74-72, adopted Mar. 6, 1972, and Ord. No. 499-74, § 4, adopted Aug. 19, 1974.

Sec. 14-161. Purpose.

(a) *B-1 Neighborhood Business Zone*

The purpose of the B-1 neighborhood business zone is to provide limited areas for the location of small-scale commercial establishments intended to serve a local market. As a result, uses shall be complimentary, quiet and generally do not disturb the comfort and enjoyment of the adjoining neighborhood environment. Uses shall be designed for the pedestrian scale and will provide convenient access for nearby residents and workers to walk in to purchase goods and services. Buildings and uses shall be designed with attractive storefronts or similar features, with windows and doors convenient to a public sidewalk. Building additions are encouraged but not required to meet the maximum setbacks of 14-165(c)(3). This zone shall encourage mixed use buildings such as commercial first floor with residential uses above or combined retail/office uses in a multistory structure. The zone also provides the opportunity for mixed useand high residential density in on-peninsula locations.

Suitable locations for this zone may include street intersections and arterial streets with existing or proposed traditional neighborhood retail and service uses.

(b) *B-1b Neighborhood Business Zone*

The purpose of the B-1b neighborhood business zone is to provide appropriate opportunities for the establishment of small-scale ground floor commercial uses in existing buildings, serving a local market, while preserving residential uses and character above the ground floor of structures. The zone also provides the opportunity for mixed use and high residential density in on-peninsula locations. Building additions are encouraged but not required to meet the maximum setbacks of 14-165(c)(3).

Suitable locations for this zone may include street

intersections, arterial streets, and sites with existing or traditional neighborhood retail and service uses.

(Ord. No. 292-88, 4-4-88; Ord. No. 133-93, § 1, 11-15-93; Ord. No. 94-99, 11-15-99; Ord. No. 281-10/11, 7-18-11)

Sec. 14-162. Permitted uses.

(a) The following uses are permitted in the B-1 zone and on the ground floor level of buildings in the B-1b zone. For permitted uses in the upper stories of buildings in the B-1b zone, refer to subsection (5) below: in existence on November 15, 1993:

1. *Residential*

   a. Any residential use permitted in the residential zone abutting the lot is permitted. If there is no abutting residential zone, any residential use permitted in the nearest residential zone to the lot is permitted. In the case of two (2) or more abutting residential zones, any residential use permitted in the most restrictive such zone is permitted.

   b. In any structure with commercial use on the first floor, multifamily dwellings are permitted above the first floor.

2. *Business:* Business uses listed below are permitted, provided that such use which generates in excess of a ratio of 100 peak hour vehicle trips per 2000 sq.ft. of space, and generates in excess of 100 peak hour vehicle trips is prohibited. As set forth in the City of Portland Technical Manual, section I, the city traffic engineer shall require a traffic study when it calculates the proposed use will generate in excess of a total of 50 peak hour vehicle trips.

   a. Professional offices, as defined in section 14-47, but excluding veterinarians.

   b. Business services, as defined in section 14-47, but excluding beverage container redemption centers.

   c. Personal services, as defined in section 14-47.

d. Offices of building tradesmen, provided there is no exterior storage of building materials.

e. Retail establishments, provided such do not include drive-through sales or services and do not operate between the hours of eleven (11) p.m. and six (6) a.m. and do not accept deliveries or services between the hours of ten (10) p.m. to seven (7) a.m.

f. Beverage dealers (as defined in 32 M.R.S.A. 1862) provided they meet the following requirements:

i. Maximum total floor area for beverage container redemptions, including the storage of spent beverage containers, shall be no greater than five hundred (500) sq. ft. or ten (10) percent of the total floor area of the facility, whichever is less;

ii. Beverage container redemption is an accessory use to a principal retail use that includes beverage sales. Local beverage container redemption centers as defined in 32 M.R.S.A. 1867, as may be amended, are not allowed as a principal use.

iii. Storage of all beverage containers shall be contained entirely within the building providing retail sales.

g. Studios for artists, photographers and craftspeople including but not limited to, painters, sculptors, dancers, graphic artists and musicians.

3. *Institutional*:

a. Places of religious assembly;

b. Municipal offices;

c. Elementary, middle and secondary schools;

d. Nursery schools and kindergarten;

e. Clinics of less than three thousand (3,000) square feet of total floor space.

4. *Other*:

a. Lodging houses;

b. Utility substations, as defined in section 14-47, subject to the standards of article V (site plan), sections 14-522 and 14-523 notwithstanding;

c. Day care facilities or babysitting services;

d. Accessory uses as provided in section 14-404;

e. Bed and breakfast, subject to the standards of article V (site plan), sections 14-522 and 14-523 notwithstanding.

f. Hostels, provided the applicant submits a site plan and operations plan demonstrating compliance with the following conditions:

i. No more than twenty (20) overnight transient guests shall be permitted in the facility at any one time.

ii. All applicable provisions of Article V of this chapter shall be met.

iii. Parking shall be provided in compliance with Division 20 of this Article.

iv. No unaccompanied minors under the age of eighteen (18) shall be permitted in the facility.

v. The length of stay for transient guests shall not exceed fifteen (15) days out of any sixty-day period.

vi. The building shall meet the applicable occupant load requirements as defined by the International Building Code and the NFPA Life Safety Code, as such codes are amended or

adopted by the city.

g. Neighborhood center.

5. Uses permitted above the ground floor level of buildings in the B-1b zone:

a. Any residential use set forth in section 14-162(a);

b. Bed and breakfast, subject to the standards of article V (site plan), sections 14-522 and 14-523 notwithstanding.

c. Hostels, provided the applicant submits a site plan and operations plan demonstrating compliance with the following conditions:

i. No more than twenty (20) overnight transient guests shall be permitted in the facility at any one time.

ii. All applicable provisions of Article V of this chapter shall be met.

iii. Parking shall be provided in compliance with Division 20 of this Article.

iv. No unaccompanied minors under the age of eighteen (18) shall be permitted in the facility.

v. The length of stay for transient guests shall not exceed fifteen (15) days out of any sixty-day period.

vi. The building shall meet the applicable occupant load requirements as defined by the International Building Code and the NFPA Life Safety Code, as such codes are amended or adopted by the city.

6. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 292-88, 4-4-88; Ord. No. 133-93, § 2, 11-15-93; Ord. No. 125-97, § 5, 3-3-97; Ord. No. 94-99, 11-15-99; Ord. No.74-06/07, 12-4-06; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 278-09/10, 7-19-10, Ord. 10 10/11, 8-2-10;

Ord. No. 279-09/10, 6-6-11; Ord. No. 33-11/12, 1-18-12; Ord. No. 162-12/13, 4-1-13)

***Editor's Note-** Pursuant to Ord. No. 74-06/07, enacted on 12-4-06 changes made in (2) *Business* are effective October 16, 2006.

Sec. 14-163. Conditional uses.

(a) The following uses are permitted in the B-1 zone and on the ground floor level of buildings in the B-1b zone, as provided in section 14-474 (conditional uses), if they meet the following requirements provided that such use which generates in excess of a ratio of 100 peak hour vehicle trips per 2000 sq. ft. of space, and generates in excess of 100 peak hour vehicle trips is prohibited. As set forth in the City of Portland Technical Manual, section I, the city traffic engineer shall require a traffic study when it calculates the proposed use will generate in excess of a total of 50 peak hour vehicle trips:

1. Restaurants, provided they meet the following requirements:

    a. Maximum total floor area for use of the public shall be one thousand (1,000) square feet;

    b. The hours of operation shall be limited to between 6:00 a.m. and 11:00 p.m. each day;

    c. Food service and consumption are the primary function of the restaurant; and

    d. There shall be no drive-through service.

(b) The following use shall be permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) and any special provisions, standards or requirements specified below:

1. Temporary wind anemometer towers, as defined in sec. 14-47, are permitted provided the following standards are met in addition to sec. 14-430:

    a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a certificate of occupancy

for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the board of appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires

and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

2. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 292-88, 4-4-88; Ord. No. 133-93, § 3, 11-15-93; Ord. No. 94-99, 11-15-99; Ord. No. 74-06/07, 12-4-06; Ord. No. 29-09/10, 8-3-09, emergency passage; Ord. No. 278-09/10, 7-19-10; Ord. No. 33-11/12, 1-18-12)

***Editor's Note-** Pursuant to Ord. No. 74-06/07, enacted on 12-4-06 changes made in (2) *Business* are effective October 16, 2006.

Sec. 14-164. Prohibited uses.

Uses not enumerated in sections 14-162 and 14-163 as either permitted or conditional uses are prohibited.

(Ord. No. 292-88, 4-4-88)

Sec. 14-165. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, residential uses permitted under section 14-162(a) shall meet the requirements of such abutting or nearest residential zone except as noted in Sec. 14-165(h) (minimum lot area per dwelling unit). Residential uses in on-peninsula locations, as defined in Section 14-47, and nonresidential uses in the B-1 and B1-b zone shall meet the following minimum requirements:

(a) *Minimum lot size*:

1. School: Twenty thousand (20,000) square feet.
2. Places of religious assembly: Ten thousand (10,000) square feet.
3. All other nonresidential uses: None.
4. Residential uses: None.

(b) *Minimum street frontage*: Fifty (50) feet, except that if the average street frontages of all lots within two hundred (200) feet of the boundaries of the lot in

question on the same side of the street and within the B-1 or B-1b zone is less than fifty (50) feet, then the minimum street frontage for the lot in question may be reduced to the average frontage of such lots.

(c) ***Yard dimensions***: (Yard dimensions are required setbacks for structures from property lines and setbacks of structures from one another. No structure shall occupy the minimum yard of another structure.)

1. Maximum ***front yard***:

Principal or accessory structure: The maximum front yard setback shall either be: (i) ten feet; or (ii) in cases where the average depth of the front yards of the nearest developed lots on either side of the lot in question is less than ten feet, the front yard setback of the lot in question shall not exceed such average depth. A "developed lot" means a lot on which a principal structure has been erected.

Building additions are not required to meet this maximum setback.

2. ***Rear yard***:

a. Principal structures: None, except where a rear yard abuts a residential zone or first floor residential use, a minimum of twenty (20) feet is required.

b. Accessory structures (detached): None, except where the rear yard abuts a residential zone or first floor residential use, a minimum of five (5) feet is required.

3. ***Side yard***:

a. Principal and accessory structures: None, except that where a side yard abuts a residential zone or a first floor residential use, a minimum of ten (10) feet is required.

b. Accessory structures (detached): None, except

that where the side yard abuts a residential zone or a first floor residential use, a minimum of five (5) feet is required.

c. Side yards on side streets (corner lot): Principal or accessory structures: Ten (10) feet maximum setback, except that for any new construction on a lot abutting more than two streets, the maximum setback shall not apply beyond the two most major streets. (For purposes of this section, "major street" shall mean that street with the highest traffic volume and the greatest street width in comparison with the remaining streets). This maximum setback shall not apply to building additions.

(d) *Minimum lot width*: None.

(e) *Maximum structure height*:

1. Off-peninsula locations, as defined in Section 14-47: Thirty-five (35) feet. Where the lot abuts an R-6 residential zone, the maximum height shall be the maximum permitted height in the R-6 residential zone.

2. On-peninsula locations, as defined in Section 14-47: Forty-five (45) feet.

(f) *Maximum impervious surface ratio*: Ninety (90) percent.

(g) *Floor area*:

1. The maximum first floor area of a single tenant building shall be no greater than five thousand (5,000) square feet.

2. The maximum first floor area of a multi-tenant building shall be no greater than ten thousand (10,000) square feet.

(h) *Minimum lot area per dwelling unit:*

1. On-peninsula locations, as defined in Section 14-

47: Four hundred and thirty-five (435) square feet of land area per dwelling unit.

2. Off-peninsula locations, as defined in Section 14-47: Minimum lot area per dwelling unit requirements of the abutting or nearest residential zone shall apply. In the case of multi-family dwellings above the first floor: 1,000 square feet of land area per dwelling unit.

(Ord. No. 292-88, 4-4-88; Ord. No. 52-96, § 1, 7-15-96; Ord. No. 94-99, 11-15-99; Ord. No. 281-10/11, 7-18-11)

Sec. 14-166. Other requirements.

All nonresidential uses in B-1 and B-1b zones shall meet the requirements of division 25(space and bulk regulations and exceptions) of this article in addition to the following requirements:

(a) ***Landscaping and screening:*** The site shall be suitably landscaped for parking, surrounding uses and accessory site elements, including storage and solid waste receptacles where required by article IV (subdivisions) and article V (site plan).

(b) ***Curbs and sidewalks***: Curbs and sidewalks as specified in article VI of chapter 25.

(c) ***Off-street parking and loading***: Off-street parking and loading are required as provided in division 20 and division 21 of this article.

(d) ***Front yard parking***: There shall be no off street parking in the front yard between the street line and the required maximum setback line. Where an existing building setback exceeds the maximum front yard setback, a maximum of ten (10) percent of the total parking provided on the site may be located between the principal structure and the street.

(e) ***Signs***: Signs shall be subject to the provisions of division 22 of this article.

(f) ***Exterior storage***: There shall be no exterior storage with the exception of fully enclosed containers or receptacles

for solid waste disposal. Such containers or receptacles shall be shown on the approved site plan. In no event shall vehicles, or truck trailers with or without wheels, be used for on-site storage. Truck load sales shall not be considered outside storage provided that such activity does not extend beyond three (3) consecutive days nor occur more frequently than three (3) times a calendar year.

(g) ***Storage of vehicles***: Storage of vehicles is subject to the provisions of section 14-335.

(h) ***Shoreland and flood plain management regulations***: If the lot is located in a shoreland zone or in a flood hazard zone, then the requirements of division 26 and/or division 26.5 apply.

(Ord. No. 292.88, 4-4-88; Ord. No. 94-99, 11-15-99)

Sec. 14-167. External effects.

Every use in a B-1 or B-1b zone shall be subject to the following requirements:

(a) ***Enclosed structure***: The use shall be operated within a completely enclosed structure, except for those specific open air activities licensed by the City, including but not limited to outdoor seating, sidewalk sales, etc.

(b) ***Noise:*** The volume of sound, measured by a sound level meter with frequency weighting network (manufactured according to standards prescribed by the American Standards Association), generated shall not exceed fifty-five (55) decibels on the A scale, on impulse (less than one (1) second), at lot boundaries, excepting air raid sirens and similar warning devices.

(c) ***Vibration and heat***: Vibration inherently and recurrently generated and heat shall be imperceptible without instruments at lot boundaries.

(d) ***Glare, radiation or fumes***: Glare, radiation or fumes shall not be emitted to an obnoxious or dangerous degree beyond lot boundaries.

(e) ***Smoke***: Smoke shall not be emitted at a density in excess

of twenty (20) percent opacity level as classified in Method 9 (Visible Emissions) of the Opacity Evaluation System of the U.S. Environmental Protection Agency.

(f) *Materials or wastes*: No materials or wastes shall be deposited on any lot in such form or manner that they are clearly visible from neighbors' properties or may be transferred beyond the lot boundaries by natural causes or forces. All solid waste disposal, including materials which might cause fumes or dust, or constitute a fire hazard if stored out-of-doors, shall be only in fully enclosed containers or receptacles. Areas attracting large numbers of birds, rodents or insects are prohibited.

(Ord. No. 292-88, 4-4-88; Ord. No. 94-99, 11-15-99)

Sec. 14-168 – Sec. 14-180 Reserved.

DIVISION 10. B-2 AND B-2b COMMUNITY BUSINESS ZONES*

***Editor's note—**Ord. No. 293-88, adopted Apr. 4, 1988, with an effective date of July 1, 1988, repealed §§ 14-181—14-187 of Div. 10, B-2 Business Zone, of this article and enacted in lieu thereof similar new provisions as set out in §§ 14-181—14-187. Formerly, such sections derived from §§ 602.9.A—602.9.G of the city's 1968 Code and from Ord. No. 74-72, adopted Mar. 6, 1972; Ord. No. 499-74, § 4, adopted Aug. 19, 1974; Ord. No. 334-76, § 6, adopted July 7, 1976; and Ord. No. 274-77, adopted May 16, 1977.

Sec. 14-181. Purpose.

(a) B-2 Community Business Zone

The purpose of the B-2 community business zone is:

1. To provide appropriate locations for the development and operation of community centers offering a mixture of commercial uses, housing and services serving the adjoining neighborhoods and the larger community.

2. The variety, sites and intensity of the permitted commercial uses in the B-2 zone are intended to be greater than those permitted in the B-1 neighborhood business zone.

3. The B-2 zone will provide a broad range of goods

and services and general businesses with a mixture of large and small buildings such as grocery stores, shops and services located in major shopping centers and along arterial streets. Such establishments should be readily accessible by automobile, by pedestrians and by bicycle. Development in the B-2 zone should relate to the surrounding neighborhoods by design, orientation, and circulation patterns.

4. The B-2 and B-2b will provide locations for moderate to high density housing in urban neighborhoods along arterials.

(b) B-2b Community Business Zone

The B-2b zone is intended to provide neighborhood and community retail, business and service establishments that are oriented to and built close to the street. The B-2b zone is appropriate in areas where a more compact urban development pattern exists such as on-peninsula or in areas off-peninsula where a neighborhood compatible commercial district is established which exhibits a pedestrian scale and character. Such locations may include the peninsula and other arterials and intersections with an existing urban or neighborhood oriented building pattern.

(c) B-2c Community Business Zone

To protect and enhance the quiet enjoyment of adjoining residential neighborhoods from the impacts of businesses that serve liquor and from other uses that are incompatible with adjoining neighborhoods due to noise.

(Ord. No. 293-88, 4-4-88; Ord. No. 25, 7-07-99: emergency enactment of 120-day moratorium, effective 7/07/99 thru 11/04/99; Ord. No. 94A, 11-01-99: emergency enactment of 44-day extension of moratorium enacted on 7-07-99, effective date 11/01/99 thru 12/15/99; Ord. No. 94-99, 11-15-99; Substitute Ord. No. 189-00, §2, 4-24-00; Ord. No. 151-03/04, 02/23/04; Ord. No. 244-09/10, 6-21-10)

***Editor's Note**: Order No. 25, adopted 7-07-99, enacted an emergency 120-day moratorium on drive-through facilities on lots in B-2 Zone adjacent to lots with residential uses effective 7-07-99 through 11-1-99; Ord. No. 94A, adopted 11-01-99 extended the moratorium on said drive-through facilities through December 15, 1999.

Sec. 14-182. Permitted uses.

The following uses are permitted in the B-2, B-2b and B-2c zones except that any use involving a drive-through is prohibited in these zones unless otherwise provided in section 14-183:

(a) *Residential*:

1. Attached single-family and two-family dwellings;

2. Multi-family dwellings are permitted when the nearest residential zone is R-4, R-5, R-6 or R-7. Multi-family dwellings are permitted in any structure with commercial uses in the first floor regardless of the nearest residential zone;

3. Handicapped family units;

4. Combined living/working spaces including, but not limited to, artist residences with studio space; and

(b) *Business*:

1. General, business and professional offices, as defined in section 14-47;

2. Personal services, as defined in section 14-47;

3. Offices of building tradesmen;

4. Retail establishments;

5. Restaurants, except that restaurants shall close for all purposes including the service of alcohol no later than 11:00 p.m.;

6. Drinking establishments, except that drinking establishment as defined in section 14-47, and bars as defined in section 14-217.5 (a)(1), shall not be permitted in the B-2c zone;

7. Billiard parlors;

8. Mortuaries or funeral homes;

9. Miscellaneous repair services, excluding motor

vehicle repair services;

10. Communication studios or broadcast and receiving facilities;

11. Health clubs and gymnasiums;

12. Veterinary hospitals, but excluding outdoor kennels;

13. Theaters and performance halls;

14. Hotels or motels of less than one hundred fifty (150) rooms;

15. Dairies in existence as of November 15, 1999;

16. Bakeries in existence as of November 15, 1999;

17. Bakeries established after November 15, 1999, provided the bakeries include retail sales within the principal structures. Bakeries in the B-2b zone shall be no greater than seven thousand (7,000) square feet in size;

18. Drive-throughs associated with a permitted use in the B-2 zone provided that such do not include drive-throughs on any lot adjacent to any residential use or zone. For purposes of this section, only, "adjacent to" shall include uses across a street if within 100 feet of the subject lot boundary;

19. Drive-throughs associated with a permitted use in the B-2b zone, when accessory to a principal use located on the same lot, provided that such do not include drive-throughs on any lot adjacent to any residential use or zone. For purposes of this section, only, "adjacent to" shall include uses across a street if within 100 feet of the subject lot boundary.

20. Registered medical marijuana dispensaries.

(c) *Institutional*:

1. Long term, extended and intermediate care facility;

2. Clinics, as defined in section 14-47;

3. Places of assembly;

4. Kindergarten, elementary, middle and secondary schools;

5. College, university, trade schools; and

6. Municipal buildings and uses.

(d) *Other*:

1. Lodging houses;

2. Day care facilities or babysitting services;

3. Utility substations, as defined in section 14-47, subject to the requirements of article V (site plan), sections 14-522 and 14-523 notwithstanding;

4. Accessory uses, as provided in section 14-404;

5. Bed and breakfast, subject to the standards of article V (site plan), sections 14-522 and 14-523 notwithstanding. A bed and breakfast may include a meeting facility if the facility meets the following standards:

   a. The meeting facility shall be limited to the following types of uses:

      i. Private parties.
      ii. Business meetings.
      iii. Weddings.
      iv. Receptions.
      v. Seminars.
      vi. Business and educational conferences.

   b. The building in which the bed and breakfast and the meeting facility will be located was

in existence on March 3, 1997, and was greater than four thousand (4,000) square feet in floor area on that date.

6. Studios for artists and craftspeople, provided that the area of such studios does not exceed four thousand (4000) square feet for each studio space.

7. Hostels, provided the applicant submits a site plan and operations plan demonstrating compliance with the following conditions:

   a. All applicable provisions of Article V of this chapter shall be met.

   b. Parking shall be provided in compliance with Division 20 of this Article.

   c. No unaccompanied minors under the age of eighteen (18) shall be permitted in the facility.

   d. The length of stay for transient guests shall not exceed fifteen (15) days out of any sixty-day period.

   e. The building shall meet the applicable occupant load requirements as defined by the International Building Code and the NFPA Life Safety Code, as such codes are amended or adopted by the city.

8. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 293-88, 4-4-88; Ord. No. 39-96, § 2, 10-7-96; Ord. No. 125-97, § 6, 3-3-97; Ord. No. 164-97, § 2, 12-1-97; Ord. No. 25, 7-07-99: emergency enactment of 120-day moratorium, effective 7/07/99 thru 11/04/99; Ord. No. 94A, 11-01-99: emergency enactment of 44-day extension of moratorium enacted on 7-07-99, effective date 11/01/99 thru 12/15/99; Ord. No. 94-99, 11-15-99; Ord. No. 118-00, 11-20-00; Ord. No. 151-03/04, 02/23/04; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 244-09/10, 6-21-10; Ord. No. 283-09/10, 7-19-10 emergency passage; Ord. 10 10/11, 8-2-10; Ord. No. 279-09/10, 6-6-11; Ord. No. 33-11/12, 1-18-12; Ord. No. 113-11/12, 2-22-12; Ord. No. 41-12/13, 9-5-12)

Sec. 14-183. Conditional uses.

The following uses are permitted in the B-2,B-2b and B-2c

zone, as provided in section 14-474 (conditional uses), if they meet the following requirements:

(a) ***Business.*** Any of the following conditional uses, provided that, notwithstanding section 14-474(a)of this article or any other provision of this code, the Planning Board shall be substituted for the board of appeals as the reviewing authority over conditional business uses:

1. Major and minor auto service stations in the B-2 zone, only;

2. Major or minor auto service stations in the B-2b zone in existence as of November 15, 1999;

3. Car washes;

4. Drive-throughs in the B-2 or B-2b zones which are adjacent to any residential use or zone, provided that, in the B-2b drive-throughs must be accessory to a principal use located on the same site;

5. Automobile dealerships.

In addition to approval by the Planning Board with respect to the requirements of article V (site plan), sections 14-522 and 14-523 notwithstanding, these uses shall comply with the following conditions and standards in addition to the provisions of section 14-474:

a. Signs: Signs shall not adversely affect visibility at intersections or access drives. Such signs shall be constructed, installed and maintained so as to ensure the safety of the public. Such signs shall advertise only services or goods available on the premises.

b. Circulation: No ingress and egress driveways shall be located within thirty (30) feet from an intersection. No entrance or exit for vehicles shall be in such proximity to a playground, school, church, other places of public assembly, or any residential zone that the nearness poses a threat or potential danger to the safety of the public.

6. Drive-throughs, where permitted, shall also specifically comply with the following conditions:

   a. Location of Drive-throughs: Features, such as windows, vacuum cleaners and menu/order boards, stacking lanes, must be placed, where practicable, to the side and rear of the principal building except where such placement will be detrimental to an adjacent residential zone or use, and shall be located no nearer than forty (40) feet from any adjoining property located in a residential zone. This distance shall be measured from the outermost edge of the outside drive-through feature to such property line. In addition, drive-through features shall not extend nearer than twenty-five (25) feet to the street line. The site must have adequate stacking capacity for vehicles waiting to use these service features without impeding vehicular circulation or creating hazards to vehicular circulation on adjoining streets.

   b. Noise: Any speakers, intercom systems, or other audible means of communication shall not play prerecorded messages. Any speakers, intercom systems, audible signals, computer prompts, or other noises generated by the drive-through services or fixtures shall not exceed 55 dB or shall be undetectable above the ambient noise level as measured by a noise meter at the property line, whichever is greater.

   c. Lighting: Drive-through facilities shall be designed so that site and vehicular light sources shall not unreasonably spill over or be directed onto adjacent residential properties and shall otherwise conform to the lighting standards set forth in 14-526.

   d. Screening and Enclosure: Where automobiles may queue, waiting for drive-through services, their impacts must be substantially mitigated

to protect adjacent residential properties from headlight glare, exhaust fumes, noise, etc. As deemed necessary by the reviewing authority, mitigation measures shall consist of installation of solid fencing with landscaping along any residential property line which is exposed to the drive-through or the enclosure of the drive-through fixtures and lanes so as to buffer abutting residential properties and to further contain all associated impacts; and

e. Pedestrian access: Drive-through lanes shall be designed and placed to minimize crossing principal pedestrian access-ways or otherwise impeding pedestrian access.

f. Hours of Operation: The Board, as part of its review, may take into consideration the impact hours of operation may have on adjoining uses.

g. Conditions specific to major or minor auto service stations, car washes and automobile dealerships:

i. A landscaped buffer, no less than five (5) feet wide, shall be located along street frontages (excluding driveways). The buffer shall consist of a variety of plantings in accordance with the City of Portland Technical Manual;

ii. Car washes shall be designed to avoid the tracking of residual waters into the street.

(b) *Other*:

1. Printing and publishing establishments except as provided in subsection b. below;

2. Printing and publishing establishments in continuous operation at their current location since April 4, 1988, or earlier and which exceeded ten thousand (10,000) square feet of aggregate

gross floor area at that time;

3. Wholesale distribution establishments; and

4. Research and development and related production establishments.

Uses listed in this paragraph (b) (other) 1, 3 and 4 shall be limited to ten thousand (10,000) square feet of aggregate gross floor area, and uses listed in this paragraph (b) (other) 1, 2, 3 and 4 shall be subject to the following conditions and standards in addition to the provision of section 14-474:

a. Traffic circulation: The site shall have an adequate traffic circulation pattern designed to avoid hazards to vehicular circulation on adjoining streets. All stacking of motor vehicles shall be on site, and loading facilities shall be located to the rear of the building and shall not be visible from the street.

b. Building and site design: The exterior design of the structures, including architectural style, facade materials, roof pitch, building form, established setbacks and height, shall be of a commercial rather than industrial character. The site shall contain screening and landscaping which shall meet the requirements of section 14-526 for screening between land uses and the City of Portland Technical Manual.

5. Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned

two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

6. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 293-88, 4-4-88; Ord. No. 16-92, 6-15-92; Ord. No. 39-96, § 3, 10-7-96; Ord. No. 25, 7-07-99: emergency enactment of 120-day moratorium, effective 7/07/99 thru 11/04/99; Ord. No. 94A, 11-01-99: emergency enactment of 44-day extension of moratorium enacted on 7-07-99, effective date 11/01/99 thru 12/15/99; Ord. No. 94-99, 11-15-99; Ord. No. 151-03/04, 02-23-04; Ord. No. 29-09/10, 8-3-09, emergency passage; Ord. No. 276 -09/10, 7-19-10; Ord. No. 278-09/10, 7-19-10; Ord. No. 10 10/11, 8-2-10; Ord. No. 33-11/12, 1-18-12)

Sec. 14-184. Prohibited uses.

Uses not enumerated in sections 14-182 and 14-183 as either permitted uses or conditional uses are prohibited.
(Ord. No. 293-88, 4-4-88)

Sec. 14-185. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, residential uses as permitted under sections 14-182(a) and (b) and newly constructed buildings with residential and non-residential uses shall meet the following requirements:

(a) *Residential uses:*

1. *Minimum lot size:* None.

2. *Minimum street frontage:* None.

3. *Minimum yard dimensions:*

a. *Front yard:* None.

b. *Rear yard:* Ten (10) feet, except where the lot abuts a residential zone, where twenty (20)

feet is required.

i. Accessory structures: Five (5) feet.

ii. In cases where the height of a new building exceeds forty-five (45) feet adjacent to a residential zone, the portion of the building exceeding forty-five (45) feet shall have a minimum stepback of fifteen (15) feet or an additional minimum setback of fifteen (15) feet.

c. ***Side yard:*** Five (5) feet, except where the lot abuts a residential zone, where ten (10) feet is required.

i. Accessory structures: Five (5) feet.

ii. In cases where the height of a new building exceeds forty-five (45) feet adjacent to a residential zone, the portion of the building exceeding forty-five (45) feet shall have a minimum stepback of fifteen (15) feet or an additional setback of fifteen (15) feet; provided however that this provision does not apply to buildings located within sixty-five (65) feet of Franklin Street.

d. ***Side yard or rear yard on a street:*** None.

e. ***Maximum front yard:*** In the B-2, B-2b and B-2c zones; as provided for in section 14-185(b)(3)(a), except that the maximum front yard setback need not apply in the case of a development meeting one (1) or more of the following standards:

i. The lot has less than forty (40) feet of continuous frontage and the lot has a depth of more than one hundred (100) feet from the nearest street; or

ii. The structures on the lot meet the maximum front yard or are within twenty (20) feet of the street and the remainder of the lot has less than forty (40) feet of continuous street frontage.

f. ***Pavement setback:*** For lots adjacent to a residential zone, pavement shall be set back a minimum of ten (10) feet from the side and rear property lines adjacent to the residential zone.

4. ***Maximum impervious surface ratio:*** 90%.

5. ***Maximum residential density:***

a. ***On-peninsula locations, as defined in section 14-47:*** Four hundred and thirty-five (435) square feet of land area per dwelling unit.

b. ***Off-peninsula locations, as defined in section 14-47:***

i. Residential density requirements of the nearest adjacent residential zone shall apply except for multi-family dwellings above the first floor of commercial uses as provided in (ii) below.

ii. ***Multi-family dwellings above first floor commercial uses:*** One thousand (1,000) square feet of land area per dwelling unit is required.

6. ***Maximum structure height:***

a. ***B-2 and B-2c zones:*** Forty-five (45) feet.

b. ***B-2b zone:*** Forty-five (45) feet, except in the case of a building with a commercial first floor and residential upper floors, where fifty (50) feet is allowed, and except for the portion of a building located within sixty-five (65) feet of Franklin Street, where

sixty-five (65) feet is allowed.

(b) *Business and other non-residential uses:*

1. *Minimum lot size:*

a. *Intermediate, long-term and extended care facilities:* Ten thousand (10,000) square feet.

b. *Other non-residential uses where permitted:*

i. *B-2 zone:* Ten thousand (10,000) square feet.

ii. *B-2b zone:* None.

iii. *B-2c zone:* Ten thousand (10,000) square feet.

c. Where multiple uses are on one (1) lot, the highest applicable minimum lot size must be met.

2. *Minimum street frontage:* Fifty (50) feet.

3. *Yard dimensions:* (Yard dimensions include setbacks of structures from property lines and setbacks of structures from one another. No structure shall occupy the minimum or maximum yard of another structure.)

Except as provided in subsection (5) below, the following setbacks are required:

a. *Front yard:*

i. *Minimum front yard in B-2, B-2b and B-2c zones:* None.

ii. *Maximum front yard in the B-2 and B-2c zones:* The maximum front yard setback shall not exceed the average depth of the front yard of the closet developed lots on either side of the lot in question unless the planning board or planning

authority approves a modified setback pursuant to section 14-526(a)(27)(j). For purposes of this section a developed lot means a lot on which a principal structure has been erected.

iii. ***Maximum front yard in B-2b zone (on-peninsula):*** The maximum front yard setback shall either be: (1) ten feet; or (2) in cases where the average depth of the front yard of the nearest developed lots on either side of the lot in question is less than ten (10) feet, the front yard setback of the lot in question shall not exceed such average depth. A "developed lot" means a lot on which a principal structure has been erected.

In the B-2b zone the front yard shall be the yard adjoining the major street as determined by the highest traffic volume.

iv. ***Maximum front yard in B-2b zone (off-peninsula):*** None, except that the front yard setback shall not exceed the average depth of the front yards of the closes t developed lots on either side of the lot. A developed lot means a lot on which a principal structure has been erected. In the B-2b zone the front yard shall be the yard adjoining the major street as determined by the highest traffic volume.

Where the front yard setback exceeds ten (10) feet, however, a continuous, attractive, and pedestrian scaled edge treatment shall be constructed along the street(s) consisting of street trees spaced at not more than fifteen (15) feet on center, (which otherwise meet the requirements of city arborist) and a combination of the following:

i. Landscaping of no less than four (4) feet in depth; and

ii. Ornamental brick or stone walls; and/or

iii. Ornamental fencing.

The site shall otherwise meet the requirements of article V (Site Plan).

b. *Rear yard*:

i. *Principal structures*: Ten (10) feet. Where a rear yard abuts a residence zone or first floor residential use, twenty (20) feet is required.

ii. *Accessory structures*: Five (5) feet.

c. *Side yard*:

i. Principal and accessory structures: None, except that where a side yard abuts a residential zone or a first floor residential use, ten (10) feet is equired.

ii. *Accessory structures*: Five (5) feet.

iii. *Side yards on side streets (corner lot)*: In the B-2 and B-2c zone, a minimum of ten (10) feet. In the B-2b zone, a maximum of ten (10) feet except that for any newly constructed building on a lot abutting two (2) or more streets, the maximum side yard shall apply to one street or to the side street that forms a corner with a major street as provided for in the maximum front yard provisions of this section.

(4) *Minimum lot width*: None.

(5) *Maximum structure height*:

a. *B-2 and B-2c zones:* Forty-five (45) feet, except that on lots in excess of five (5)

acres, sixty-five (65) feet is permitted; provided each of the minimum setbacks required under subsection (3) above are increased by one (1) foot in distance for each foot of height above forty-five (45) feet.

b. ***B-2b zone:*** Fifty (50) feet.

(6) ***Maximum impervious surface ratio***: Eighty (80) percent in the B-2 and B-2c; Ninety (90%) percent in the B-2b.

(c) ***Building additions:*** Building additions for residential and non-residential uses are not required to meet the maximum front yard setback for the maximum side yard on side street setback contained in this section.

(Ord. No. 293-88, 4-4-88; Ord. No. 52-96, § 2, 7-15-96; Ord. No. 94-99, 11-15-99; Ord. No. (Substitute)189-00, §3, 4-24-00; Ord. No. 151-03/04, 02/23/04; Ord. No. 244-09/10, 6-21-10; Ord. No. 41-12/13, 9-5-12)

Sec. 14-186. Other requirements.

All nonresidential uses in the B-2 and B-2b zone shall meet the requirements of division 25 (space and bulk regulations and exceptions) of this article in addition to the following requirements:

(a) ***Landscaping and screening:*** The site shall be suitably landscaped for parking, surrounding uses and accessory site elements, including storage and solid waste receptacles where required by article IV (subdivisions) and article V (site plan).

(b) ***Curbs and sidewalks***: Curbs and sidewalks as specified in article VI of chapter 25.

(c) O***ff-street parking and loading:*** Off-street parking and loading are required by division 20 and division 21 of this article;

(d) ***Front yard parking***:

1. B-2 and B-2c zone: There shall be no off-street parking in the front yard between the street line and the required minimum setback line in the B-2

and B-2c. Where existing buildings exceed the minimum front yard setback, a maximum of ten (10) percent of the total parking provided on the site may be located between the principal structure and the street.

2. B-2b zone (On-peninsula): There shall be no parking in the front yard between the street line and the required maximum setback line in the B-2b. Where existing buildings exceed the maximum front yard setback, a maximum of ten (10) percent of the total parking provided on the site may be located between the principal structure and the street.

3. B-2b zone (Off-peninsula): Parking in the front yard between the street line and the required maximum setback line in the B-2b is discouraged. However, where parking in the front yard is permitted pursuant to §14-185I(1)I, a maximum of fifty percent (50%) of the total parking on the site may be located between the principal structure and the street.

(e) ***Signs***: Signs shall be subject to the provisions of division 22 of this article.

(f) ***Exterior storage***: There shall be no exterior storage with the exception of fully enclosed containers or receptacles for solid waste disposal. Such containers or receptacles shall be shown on the approved site plan. Vehicles or truck trailers with or without wheels shall not be used for on-site storage (1) except where such storage is located in a designated loading zone identified on an approved site plan; or (2) such storage is not visible from the street or adjacent residences during winter months and such storage area is identified on an approved site plan. Truck load sales shall not be considered outside storage provided that such activity does not extend beyond three (3) consecutive days nor occurs more frequently than three (3) times a calendar year.

(g) ***Storage of vehicles***: Storage of vehicles is subject to the provisions of section 14-335.

(h) ***Shoreland and flood plain management regulations***: If the

lot is located in a shoreland zone or in a flood hazard zone, then the requirements of division 26 and/or division 26.5 apply.

(Ord. No. 293-88, 4-4-88; Ord. No. 51-96, 7-15-96; Ord. No. 94-99, 11-15-99; Substitute Ord. No. 189-00, §4, 4-24-00; Ord. No. 151-03/04, 02/23/04)

Sec. 14-187. External effects.

Every use in a B-2, B-2b and B-2c zone shall be subject to the following requirements:

(a) *Enclosed structure*: The use shall be operated within a completely enclosed structure except for those specific open air activities licensed by the City, including but not limited to outdoor seating, sidewalk sales, etc.

(b) Noise: Except as provided in 14-183(1)(iii)(2) (relating to Drive-throughs), the volume of sound, measured by a sound level meter with frequency weighting network (manufactured according to standards prescribed by the American Standards Association), generated shall not exceed sixty (60) decibels on the A scale between 7:00 a.m. and 9:00 p.m. and fifty-five (55) decibels on the A scale between 9:00 p.m. and 7:00 a.m., on impulse (less than one (1) second), at lot boundaries, excepting air raid sirens and similar warning devices.

(c) Vibration and heat: Vibration inherently and recurrently generated and heat shall be imperceptible without instruments at lot boundaries.

(d) Glare, radiation or fumes: Glare, radiation or fumes shall not be emitted to an obnoxious or dangerous degree beyond lot boundaries.

(e) Smoke: Smoke shall not be emitted at a density in excess of twenty (20) percent opacity level as classified in Method 9 (Visible Emissions) of the Opacity Evaluation System of the U.S. Environmental Protection Agency.

(f) Materials or wastes: No materials or wastes shall be deposited on any lot in such form or manner that they may be transferred beyond the lot boundaries by natural causes or forces. All material which might cause fumes or dust, or constitute a fire hazard if stored out-of-doors,

shall be only in closed containers. Areas attracting large numbers of birds, rodents or insects are prohibited.

(Ord. No. 293-88, 4-4-88; Ord. No. 94-99, 11-15-99; Ord. No. 03/04, 02/23/04)

Sec. 14-188 - Sec. 14-195. Reserved.

DIVISION 11. A-B AIRPORT BUSINESS ZONE*

***Editor's note**—Ord. No. 295-88, adopted Apr. 4, 1988, repealed §§ 14-196—14-202 of Div. 11, A-B Business Zone, of this article and enacted in lieu thereof similar new provisions as set out in §§ 14-196—14-202. Formerly, such sections derived from §§ 62.9A.A—602.9A.G of the city's 1968 Code and from Ord. No. 348-71, § 2, adopted Aug. 2, 1971; Ord. No. 499-74, § 4, adopted Aug. 19, 1974; Ord. No. 334-76, § 6, adopted July 7, 1976; and Ord. No. 275-77, adopted May 16, 1977.

Sec. 14-196. Purpose.

The purpose of the A-B airport business zone is:

To provide an area for the development of airport-related enterprises. Appropriate uses permitted in this district are those customarily associated with the operation of the airport terminal and individual airlines and accessory uses to provide for the comfort and convenience of the airport's patrons and employees.

(Ord. No. 295-88, 5-23-88)

Sec. 14-197.1. Permitted uses.

The following uses are permitted in the A-B zone:

(a) Administration;

(b) Airline terminal including, but not limited to:

1. Administration;

2. Concessions including, but not limited to, newsstands, florists, pharmacies and sundries, parcel storage, insurance sales, vending machines and video games;

3. Reservations and ticket sales;

4. Air freight operations;

5. Travel agency;

6. Physical plant service, repair and storage;

7. Cocktail lounges; and

8. Public waiting area.

(c) Charter flight service;

(d) Airport carrier operations, including ground support and fueling;

(e) Aircraft and aircraft accessory sales and services;

(f) Flying school;

(g) Ground transportation;

(h) Car rental operations, including vehicle storage;

(i) Hotel or motel;

(j) Restaurant, coffee shop;

(k) Bank;

(l) Parking lots and garages; and

(m) Accessory buildings and uses, including use of temporary structures within the boundaries of the Portland International Jetport for not longer than five (5) years, provided the owner demonstrates to the planning authority the intention and ability to discontinue or replace the temporary use with a permanent structure within five (5) years.

(n) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 295-88, 5-23-88; Ord. No. 33-11/12, 1-18-12)

Sec. 14-197.2. Conditional uses.

The following use is permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) of this article and any special provisions, standards or requiremetns specified below:

(a) Temporary wind anemometer towers, as defined in section 14-47, are permitted provided the following standards are met in addition to section 14-430:

1. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a certificate of occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

2. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the board of appeals with the application; and

3. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

4. The applicant shall provide a safety report prepared and stamped bya licensed professional engineer to the board of appeals with their application for conditional use, which demonstrates how the proposed temporasry wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

5. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to corporation counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

6. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on

public ways (including pedestrian ways); and

7. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

8. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the city, of the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

(b) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 33-11/12, 1-18-12)

Sec. 14-198. Prohibited uses.

Uses not expressly enumerated in section 14-197 as permitted uses are prohibited.

(Ord. No. 295-88, 5-23-88)

Sec. 14-199. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, uses in the A-B zone shall meet the following:

(a) *Minimum lot size:* Twenty thousand (20,000) square feet.

(b) *Minimum street frontage:* Fifty (50) feet, except as described in section 14-201(b).

(c) *Minimum yard dimensions:*

(Yard dimensions include setbacks of structures from property lines and setbacks of structures from one another. No structure shall occupy the minimum yard of another structure.)

1. *Front yard:*

Principal or accessory structures: None, except that every property having frontage on Westbrook Street shall have a minimum front yard of twenty (20) feet.

2. *Rear yard:*

a. Principal or accessory structures: None, except where a rear yard abuts a residence zone or use, in which case it must be fifty (50) feet. No structure may extend beyond the building line established for any runway or taxiway. If provided, rear yards must not be less than five (5) feet in width.

3. *Side yard:*

Principal or accessory structures: None, except where a side yard abuts a residential zone or use, in which case it must be twenty-five (25) feet in width. If provided, side yards must not be less than five (5) feet in width.

(d) *Minimum lot width:* Fifty (50) feet.

(e) *Maximum structure height:* Seventy-five (75) feet, except within one hundred (100) feet of the private property line on Westbrook Street or within one hundred (100) feet of the boundary of the A-B airport business zone in which the height limit shall be forty-five (45) feet. No structure or tree, however, shall be erected, altered, allowed to grow or maintained to a height in excess of that allowed by applicable Federal Aviation Administration (FAA) regulation.

(f) *Maximum impervious surface ratio:* Seventy (70) percent.
(Ord. No. 295-88, 5-23-88)

Sec. 14-200. Other requirements.

In addition to the above, the following requirements are applicable to all uses in the A-B zone:

(a) ***Landscaping and screening:*** The site shall be suitably landscaped for parking, surrounding uses and accessory site elements, including storage and solid waste receptacles where required by article IV (subdivisions) and article V (site plan).

(b) ***Curbs and sidewalks:*** Curbs and sidewalks as specified in article VI of chapter 25.

(c) ***Off-street parking and loading:*** Off-street parking and loading are required as provided in division 20 and division 21 of this article.

(d) ***Signs:*** Signs shall be subject to the provisions of division 22 of this article. Temporary freestanding advertising signs are not permitted.

(e) ***Exterior storage:*** There shall be no exterior storage within the district, with the exception of receptacles for solid waste disposal. Such receptacles shall be shown on the approved site plan.

(f) ***Storage of vehicles:*** Storage of vehicles is permitted as provided in section 14-335.

(g) ***Shoreland and flood plain management regulations:*** If the lot is located in a shoreland zone or a flood plain zone, the requirements of division 26 and/or division 26.5 apply.

(Ord. No. 295-88, 5-23-88)

Sec. 14-201. Special provisions as to restricted access areas.

(a) Runways, taxiways and other areas of the jetport accessible to aircraft, whether access is restricted by the Federal Aviation Administration or not, shall be known as "restricted access areas" and must be subject to the special provisions of this section.

(b) Lots in restricted access areas shall not be subject to the provisions of section 14-199(b) and (f) as to frontage and maximum impervious surface ratio; and shall not be subject to the provision of section 14-200(a) landscaping or the requirements of section 14-202.

(c) Use of lots in restricted access areas shall be limited to uses which do not require or encourage access or visits by the public and which provide technical administrative or other support to airport operations.
(Ord. No. 295-88, 5-23-88)

Sec. 14-202. External effects.

(a) *Reserved.*

(b) *Enclosed structure:* The use shall be operated within a completely enclosed structure, except for those customarily operated in the open air.

(c) *Noise:* The volume of sound, measured by a sound level meter with frequency weighting network (manufactured according to standards prescribed by the American Standards Association), generated shall not exceed sixty (60) decibels on the A scale, on impulse (less than one (1) second at lot boundaries), excepting air raid sirens and similar warning devices.

(d) *Vibration and heat:* Vibration inherently and recurrently generated and heat shall be imperceptible without instruments at lot boundaries.

(e) *Glare, radiation or fumes:* Glare, radiation or fumes shall not be emitted to an obnoxious or dangerous degree beyond lot boundaries.

(f) *Smoke:* Smoke shall not be emitted at a density in excess of forty (40) percent opacity level as classified in Method 9 (Visible Emissions) of the Opacity Evaluation System of the U.S. Environmental Protection Agency.

(g) *Materials or wastes:* No materials or wastes shall be deposited on any lot in such form or manner that they may be transferred beyond the lot boundaries by natural causes or forces. All materials which might cause fumes or dust, or constitute a fire hazard if stored out-of-doors, shall be only in closed containers. Areas attracting large numbers of birds, rodents or insects are prohibited.
(Ord. No. 295-88, 5-23-88)

Sec. 14-203 – Sec. 14-215. Reserved.

DIVISION 12. B-3, B-3b AND B-3c DOWNTOWN BUSINESS ZONES*

***Editor's note—**Ord. No. 241-91, adopted Mar. 11, 1991, repealed former Div. 12 of this article, §§ 14-216—14-221, relative to B-3 and B-3b Business Zones, and enacted new provisions in lieu thereof as Div. 12, §§ 14-216—14-221.1. Formerly, Div. 12 derived from §§ 602.10.A—602.10.F of the city's 1968 Code as amended by the following legislation:

Ord. No.	Section	Date	Ord. No.	Section	Date
452-72	2	7-17-72	364-88		5- 4-88
499-74	5	8-19-74	294-88		5-23-88
344-76	6	7- 7-76	34-89		6-28-89
429-83	1	4-25-83	153-89	2—7	11-20-89
173-87	1	3- 4-87	235-91	16	2- 4-91

Cross reference(s)—Public arts program, § 14-851 et seq.; relocation of displaced tenants, § 14-861 et seq.

Sec. 14-216. Purpose.

(a) The purposes of the B-3 and B-3b downtown business zones are to:

(1) Maintain and enhance the role of the downtown as the business and commercial center of the region;

(2) Enhance and promote the orderly expansion of retail and service businesses downtown, satisfying the related needs of the city's resident, working and visitor populations;

(3) Encourage increased housing opportunity downtown for a diverse residential population;

(4) Enhance the pedestrian environment through the

encouragement of intensive mixed-use activities, through the enhancement and maintenance of public and private open space, and through the enlivenment and increased attractiveness of the street environment;

(5) Encourage excellence in urban design;

(6) Preserve and capitalize on the unique character and historic fabric of the downtown through the encouragement of reuse of significant existing structures;

(7) Provide opportunity for an enhanced presence and integration of the arts and cultural activities downtown;

(8) Reinforce the role of the downtown as a meeting place for community residents and visitors alike from all walks of life and all socio-economic groups;

(9) Provide adequate parking and transportation facilities which promote accessibility, enhance and encourage development opportunity, and enhance and protect the pedestrian environment;

(10) In the pedestrian activities district (PAD) overlay zone, create continuity of pedestrian-oriented uses along streets where such uses predominate and along streets which, over time, will establish and maintain a strong retail and pedestrian-oriented use pattern; and

(11) Provide for the relocation of residents who are displaced by development.

(b) The B-3c downtown business zone recognizes that the business uses appropriate in this zone are constrained by the proximity of multi-unit elderly housing. In addition to the purposes of the B-3 and B-3b zones, the purpose of the B-3c zone is to promote the safety, quiet enjoyment, and general welfare of citizens residing in a dense urban neighborhood by decreasing the conflicts between residential uses and loud, uncontrolled late night activities.

(Ord. No. 241-91, 3-11-91; Ord. No. 46-97, § 2, 8-4-97)

Sec. 14-217. Permitted uses.

(a) The following uses are permitted in the B-3 and B-3b

zones:

1. *Residential:*

   a. Attached single-family, two-family and multifamily dwellings;

   b. Handicapped family units;

   c. Lodging houses;

   d. Combined living/working spaces including, but not limited to, artist residences with studio space.

2. *Business:*

   a. General and business offices;

   b. Professional offices;

   c. Personal services;

   d. Offices of building tradesmen;

   e. Retail establishments, excluding gasoline sales, wholesale and bulk purchase lumber and construction supply sales;

   f. Restaurants, excluding drive-through or drive-in restaurants;

   g. Drinking establishments, except that drinking establishments and chemical-free night clubs, as defined in section 14-47, shall not be permitted in any location in the B-3c zone, including but not limited to the PAD overlay area;

   h. Billiard parlors;

   i. Miscellaneous repair services, excluding motor vehicle repair services;

   j. Communication studios or broadcast and receiving facilities;

k. Health clubs and gymnasiums;

l. Theaters and performance and exhibition halls;

m. Convention and meeting facilities;

n. Hotels;

o. Business services;

p. Parking garages;

q. Galleries;

r. Registered medical marijuana dispensaries.

3. *Institutions*

a. Museums;

b. Public or private schools of any type;

c. Clinics;

d. Places of assembly;

e. College, university, trade school;

f. Nursery schools, kindergartens, and day care facilities or home babysitting services.

g. Governmental offices. As used in this section, governmental office means a place of business of a federal, state, count or municipal governmental entity when professional or clerical duties are performed, including but not limited to back office uses as defined in Section 14-47 and judicial functions.

4. *Other:*

a. County and municipal uses;

b. Studios for artists and craftspeople including, but not limited to, carpenters, cabinetmakers and silk

screeners;

c. Printing, publishing and related manufacture of cardboard or paper boxes, provided that these activities are conducted wholly within a building.

d. Bed and breakfast, subject to the standards of article V (site plan), sections 14-522a nd 14-523 not withstanding. A bed and breakfast may include a meeting facility if the facility meets the following standards:

i. The meeting facility shall be limited to the following types of uses:

(a) Private parties.

(b) Business meetings.

(c) Weddings.

(d) Receptions.

(e) Seminars.

(f) Business and educational conferences.

ii. The building in which the bed and breakfast and the meeting facility will be located was in existence on March 3, 1997, and was greater than four thousand (4,000) square feet in floor area on that date.

e. Hostels, provided the applicant submits a site plan and operations plan demonstrating compliance with the following conditions:

i. All applicable provisions of Article V of this chapter shall be met.

ii. Parking shall be provided in compliance with Division 20 of this Article.

iii. No unaccompanied minors under the age of eighteen (18) shall be permitted in the

facility.

iv. The length of stay for transient guests shall not exceed fifteen (15) days out of any sixty-day period.

v. The building shall meet the applicable occupant load requirements as defined by the International Building Code and the NFPA Life Safety Code, as such codes are amended or adopted by the city.

f. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(b) The following additional restrictions shall apply in the PAD overlay zone, which shall be located on the streets listed below and as further delineated on the PAD overlay zone map, a copy of which is on file in the office of planning and urban development:

Center Street, from Fore Street to Commercial Street.

Commercial Street, north side, from Foundry Lane to Pearl Street.

Commercial Street, south side, from Carroll Block to Thomas Block, inclusive.

Congress Street, from Longfellow Square to Monument Square.

Dana Street.

Exchange Street, from Federal Street to Fore Street.

Fore Street, north side, from one hundred ten (110) feet west of Center Street to two hundred seventy-five (275) feet west of Pearl Street.

Fore Street, south side, from Center Street to Pearl Street.

Free Street, north side, from Congress Square to Temple Street.

Free Street, south side, from Congress Square to four hundred twenty-three (423) feet east of Oak Street and from Center Street to Temple Street.

Middle Street, north side, from Monument Square to sixty (60) feet east of Garden Lane.

Middle Street, south side, from Monument Square to two hundred fifty (250) feet east of Pearl Street.

Milk Street, from Exchange Street to Pearl Street.

Moulton Street.

Pearl Street, from Middle Street to Fore Street.

Wharf Street.

York Street, south side, from Center Street to Dunphy's Lane.

Frontages of the following areas: Longfellow, Congress, and Monument Squares; Tommy's and Post Office Parks.

1. ***Ground floor uses***:

   a. Subject to the following limited uses, at least seventy-five (75) percent of the street level frontage of a building on a street located within the PAD overlay zone must be utilized, and, at minimum, the floor area to be occupied shall be seventy-five percent (75%) of the street level frontage multiplied by a twenty (20) foot depth:

      i. Retail establishments as permitted in 14-217(a)(2)e;

      ii. Personal services;

      iii. Hotels;

      iv. Copying centers;

      v. Restaurants as permitted in 14-217(a)(2)f;

      vi. Drinking establishments;

vii. Theaters, provided that only ticket and refreshment sales, lobbies, lounges and entrances shall be located within this area;

viii. Travel agencies;

ix. Real estate sales;

x. Visitor information services;

xi. Museums;

xii. Libraries;

xiii. Banks, financial and other business services, provided that only tellers and spaces primarily used for customer services shall be located in this area;

xiv. Municipal or county uses;

xv. Galleries and studios for artists and craftspeople including, but not limited to, carpenters, cabinetmakers and silk screeners;

xvi. Performing arts studios which attract and allow for public, pedestrian observation from the adjacent sidewalks (including dance studios, music conservatories, and the like);

xvii. Other uses where the applicant can demonstrate to the zoning administrator that the proposed use will not differ substantially from a required ground floor retail use in its effect on the continuity of pedestrian-oriented use and that the proposal establishes a ground floor use that generates pedestrian interest and activity.

For those buildings which have frontage on more than one (1) street located within the PAD overlay zone, the street level area of each such frontage shall meet

the above requirements.

b. For those buildings which have forty (40) feet or less of frontage on a street within the PAD overlay zone, the above restrictions shall be reduced to fifty (50) percent of the frontage where required to accommodate a service entrance. For buildings which have frontage on more than one (1) street located within a PAD overlay zone, only one (1) such frontage shall be permitted to reduce the required retail area to fifty (50) percent of the frontage.

c. In no event shall any required retail frontage area be used for any of the following:

i. Storage;

ii. Service entrances, including loading docks, dumpsters and compactors, except as provided in subsection b; or

iii. Food preparation areas, unless such preparation areas are visually oriented toward pedestrians on streets located within a PAD overlay zone.

(Ord. No. 241-91, 3-11-91; Ord. No. 200-95, § 1, 3-20-95; Ord. No. 126-97, § 7, 3-3-97; Ord. No. 46-97, § 3, 8-4-97; Ord. No. 226-98, §§ 1, 2, 3-2-98; Ord. No. 51-00, §2, 8-7-00; Ord. No. 205-06/07, 6-4-07; Ord. No. 226-07/08, 5-19-08; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 283-09/10 emergency passage; Ord. No. 10-10/11, 8-2-10; Ord. No. 279-09/10, 6-6-11; Ord. No. 33-11/12, 1-18-12; Ord. No. 113-11/12, 2-22-12)

***Editor's Note:** Pursuant to Order 164-06/07 passed on April 4, 2007 Section 14-217.5 (*Old Port Overlay Zone)* was repealed in its entirety and Division 19.8 (*Downtown Entertainment Overlay Zone)* was enacted.

***Editor's Note:** Pursuant to Order No. 48-06/07 passed on September 18, 2006 Section 14-217.6 (*Moratorium on Formula Restaurants in Old Port Historic District and Arts District)* expired on November 19, 2006.

Sec. 14-218. Conditional uses.

(a) The following use is permitted as provided in section 14-474 (conditional uses), provided that, notwithstanding section 14-474(a) or any other provision of this Code, the planning authority shall be substituted for the board of appeals as the reviewing authority:

1. Ground floor uses in the mandated pedestrian-oriented use area of the PAD overlay zone: Any use permitted in the B-3 and B-3b zone, provided that such uses shall meet the following conditions and standards:

   a. The applicant can prove by competent evidence (including but not limited to reliable documentation of advertising, real estate brokerage efforts, and other sales mechanisms)that the space has been actively marketed for permitted uses in the PAD overlay zone for a period of six (6) months and that it has been unable to market the space for a permitted use in accordance with section 14-217(b)(1); and

      i. For existing structures, evidence that the space has been actively marketed for permitted uses for a period of six (6) months and, in the case of new construction, evidence that the space has been actively marketed and available for use for a period of six (6) months; and

      ii. Evidence of market, advertising, or real estate brokerage efforts to attract permitted uses.

   b. The approval of any conditional use under this section shall be for the specific tenant proposed for the conditional use approval and shall not run with the space to subsequent tenants. A conditional use approval shall expire at the end of each tenant's use, and a new approval shall be required for new tenants. However, where a conditional use has been approved under this subsection and the term of the effected tenancy is five (5) years or less, the tenant may sublet the area for the approved conditional use which approval may run with said lease but may not be extended without

review by the planning authority; and

c. The planning authority may impose reasonable conditions concerning the design, appearance, use and extent of use of the space along the street frontage to ensure maximum pedestrian compatibility and interest; and

d. Notwithstanding the above, the Planning Board zoning board of appeals may authorize a reduction in the percentage of required ground floor pedestrian-oriented uses where the physical limitations of an existing building so require. Any such reduction shall be the least necessary to provide relief and shall include mitigating design factors.

The Planning Board shall adopt rules and regulations governing the planning authority's review of an applicant's marketing efforts under this subsection.

An appeal to the Planning Board shall be had from the planning authority's written decision under this subsection. Such appeal shall be filed no later than thirty (30) days from the planning authority's decision.

(b) The following uses are permitted as provided in section 14-474 (conditional uses), provided that, notwithstanding section 14-474(a) or any other provision of this Code, the Planning Board shall be substituted for the board of appeals as the reviewing authority:

1. Utility substations, such as water and sewage pumping stations and standpipes, electric power substation transformer stations, and telephone electronic equipment enclosures and other similar structures, provided that such uses are suitably located, screened and landscaped so as to ensure compatibility with the surrounding neighborhood.

2. Drive-up banking services, provided that drive-up features, such as automated teller machines and service windows, shall not extend nearer than twenty-five (25)

feet to the street line. The site must have adequate stacking capacity for vehicles waiting to use these service features without impeding vehicular or pedestrian circulation or creating hazards to vehicular or pedestrian circulation on adjoining streets. Such uses shall also be in compliance with the applicable standards contained in the Downtown Urban Design Guidelines, a copy of which is on file in the department of planning and urban development. No other type of drive-up use shall be permitted.

3. Light industrial uses, subject to the following requirements:

   a. The use shall not include any use prohibited in the I-L zone;

   b. Glare, radiation, fumes or smoke shall not be emitted to an obnoxious or dangerous degree beyond lot boundaries;

   c. The floor area devoted to industrial use shall not exceed ten thousand (10,000) square feet; for a building in existence on March 11, 1991, the floor area shall not exceed ten thousand (10,000) square feet or fifty (50) percent of the total floor area, whichever is greater;

   d. The use shall be operated within a completely enclosed structure;

   e. No materials or wastes shall be deposited on any lot in such form or manner that they may be transferred beyond the lot boundaries by natural causes or forces. All materials which might cause fumes or dust or constitute a fire hazard if stored out-of-doors shall be stored only in closed containers. Areas attracting large numbers of birds, rodents or insects are prohibited;

   f. All truck parking and loading shall be accommodated off-street;

   g. The associated vehicular loading, unloading, parking, circulation and traffic volumes on the

site and on adjacent public streets will not have a more intensive impact than any use on the site within the last five (5) years;

h. Any buildings located in a PAD overlay zone shall be subject to the requirements of that zone in addition to the requirements of this section.

The following additional requirements shall apply to buildings that either were not in existence on March 11, 1991, or were in existence on that date but were either in use for any use set forth in section 14-217(a) subsections (1), (2) or (3) or were designed or constructed for any such use:

i. No tractor-trailer trucks or longer vehicles shall be associated with the proposal;

ii. The proposal shall exclude warehousing and storage as a principal use;

iii. The use shall not generate more than six (6) delivery or service trips per day between 7:00 a.m. and 7:00 p.m.

4. Emergency shelters, subject to the following conditions, in addition to the provisions of section 14-474:

a. The facility shall be in compliance with the city's current Comprehensive Housing Assistance Plan, a copy of which is on file in the department of planning and urban development, or, if there is no current edition of the Comprehensive Housing Assistance Plan, with a determination of need by the director of the department of health and human services.

b. The facility shall be registered with the City of Portland Department of Health and Human Services.

5. Surface parking provided that:

a. In the case of lot undergoing level I or level II site plan review, no new surface parking spaces, parking aisles, or vehicle lanes shall be allowed

within thirty-five (35) feet of any street, except for driveway(s) located perpendicular to the street and providing access to the site;

b. In the case of a lot undergoing level III site plan review, no new or existing surface parking spaces, parking aisles, or vehicle lanes shall be allowed within thirty-five (35) feet of any street, except for driveway(s) located perpendicular to the street and providing access to the site; and

c. No surface parking spaces shall be encumbered by lease or other use commitment exceeding twenty-four (24) month term.

(c) The following use shall be permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses), and any special provisions, standards or requirements specified below:

1. Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals

with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

(Ord. No. 241-91, 3-11-91; Ord. No. 36-93, 7-7-93; Ord. No. 46-97, § 4, 8-4-97; Ord. No. 51-00, §3, 8-7-00; Ord. No.205-06/07, 6-4-07; Ord. No. 29-09/10, 8-3-09, emergency passage; Ord. No. 278-09/10, 7-19-10)

***Editors Note:** Section 14-218(b)(5), subparagraphs a-c shall apply to all applications filed on or after February 13, 2007

Sec. 14-219. Prohibited uses.

Uses not enumerated in sections 14-217 and 14-218 as either permitted uses or conditional uses are prohibited.
(Ord. No. 241-91, 3-11-91)

Sec. 14-220. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, lots in the B-3, B-3b and B-3c zones shall meet the following requirements:

(a) ***Minimum lot size:*** None.

(b) ***Minimum street frontage:*** Fifteen (15) feet.

(c) ***Street wall build-to line:*** All buildings or structures shall be located within five (5) feet of the property line along street frontages, unless the Planning Board requires or approves an additional distance to comply with the requirements of section 14-526 (d)9 and the City of Porltand Design Manual.

(d) ***Minimum yard dimensions:*** None required.

(e) ***Minimum lot width:*** None required.

(f) ***Maximum length of undifferentiated blank wall along a public street or publicly accessible pedestrian way:***

1. PAD overlay zone: Fifteen (15) feet.

2. All other areas: Thirty (30) feet.

(g) ***Maximum lot coverage:*** One hundred (100) percent.

(h) ***Minimum building height:*** No new construction of any building shall be less than thirty-five (35) feet in height within fifty (50) feet of any street frontage, except that this provision shall not apply to:

1. Accessory building components and structures such as truck loading docks covered parking, mechanical equipment enclosures and refrigeration units.

2. Information kiosks and ticketing booths.

3. Public transportation facilities of less than 10,000 square feet, or additions of less than 5000 square feet to existing public transportation facilities provided that the cumulative additions as of June 4, 2007 do not exceed 10,000 square feet.

4. Additions to buildings existing as of June 4, 2007 provided that the cumulative additions since June 4, 2007 do not exceed ten percent (10%) of the building footprint on June 4, 2007, except building additions on those portions of the lot located closer to the street line than the building footprint existing as of June 4, 2007 shall not be included in this 10% limitation.

5. Utility substations, including sewage collection and pumping stations, water pumping stations, transformer stations, telephone electronic equipment enclosures and other similar structures.

6. Additions to and/or relocation of designated historic structures or structures determined by the historic preservation committee to be eligible for such designation.

7. Parking attendant booths or bank remote teller facilities.

8. Structures accessory to parks and plazas.

9. Buildings or building additions of less than 2,500 square feet footprint, on lots or available building sites of less than 3,000 square feet.

(i) *Maximum height of structures:*

1. The overall maximum permitted height of structures shall be as depicted on the downtown height overlay map, a copy of which is on file in the department of planning and urban development.

2. Maximum height along street frontages and minimum step-back dimensions shall be as depicted on the

downtown maximum street wall height and minimum step-back map, a copy of which is on file in the department of planning and urban development.

3. Where the downtown height overlay map depicts a height plus forty (40) feet, the building form may extend up to forty (40) feet above the designated height limit for the purpose of providing a distinctive graduated design for an architectural building top and to enclose rooftop appurtenances as required by section 14-526(d) 9 of article V (site plan) and the City of Portland Design Manual. No habitable floor area shall be developed within the building envelope permitted by the additional forty (40) feet, unless at least fifty (50) percent of such habitable floor area is devoted exclusively to one (1) or more publicly accessible uses, such as eating or drinking establishments, an observatory, community meeting rooms or halls available to the public or such other uses that make reasonable accommodation for public use at reasonable times, on a nonmembership basis at no cost or at a cost that will not exclude use by the general public, and provided that such floor area is incidental to the primary design intent of the space to achieve the standards of this section. Notice of such public use and how it may be accessed by the general public must be given on the first floor of the building in a manner reasonably located to inform the general public of the availability of the public use.

(j) *Maximum building area and floor area for buildings which exceed one hundred twenty-five (125) feet in height:*

1. For portions of structures which exceed one hundred twenty-five (125) feet in height, the maximum horizontal building coverage at one hundred twenty-five (125) feet or higher shall not exceed twenty-five (25) percent of the site area, except that no floor area shall be required to be less than ten thousand (10,000) square feet.

2. The maximum gross floor area for each floor located above one hundred twenty-five (125) feet in height

shall not exceed fifteen thousand (15,000) square feet.

(k) [*Uses in PAD overlay zone*:] All uses established in the PAD overlay zone shall meet the requirements of section 14-526(a)(16).

(Ord. No. 241-91, 3-11-91; Ord. No. 46-97, § 5, 8-4-97; Ord. No. 205-06/07, 6-4-07; Ord. No. 278-09/10, 7-19-10)

Sec. 14-221. Other requirements and standards.

(a) *Downtown urban design guidelines:* All development as defined in article V, all building and site alterations, and all provision of landscaping or other pedestrian amenities shall be consistent with the Downtown Urban Design Guidelines. Amendments to the Downtown Urban Design Guidelines may be made by the Planning Board and shall be filed with the city clerk. Such amendments shall become effective forty-five (45) days after the date of filing with the city clerk, unless vetoed in whole or in part by the city council within that time.

(b) *Off-street parking and loading:* Off-street parking and loading are required as provided in division 20 and division 21 of this article.

(c) *Signs:* Signs shall be subject to the provisions of division 22 of this article. In addition, signs within the pedestrian activities district (PAD) overlay zone or in areas designated as PAD encouragement areas, as shown on the pedestrian activities district map, a copy of which is on file in the department of planning and urban development, shall be consistent with the Downtown Urban Design Guidelines.

(d) *Exterior storage:* There shall be no exterior storage, with the exception of receptacles for solid waste disposal which are not visible from a public street. Such receptacles shall be shown on the approved site plan.

(e) *Storage of vehicles:* No more than one (1) unregistered vehicle shall be stored outside for a period in excess of thirty (30) days.

(f) *Shoreland and flood plain management regulations:* If the lot is located in a shoreland zone or in a flood hazard zone, then the requirements of division 26 and/or division 26.5 shall apply.

(g) ***Downtown arts program:*** All new development subject to section 14-851 shall make provision for participation in the public arts program.

(h) ***Relocation of displaced residents:*** Any development which results in the displacement of residents of dwelling units currently located on the development site shall meet the requirements of sections 14-861 through 14-864.

(i) ***Historic resources:*** The exterior design of proposed or renovated structures located within historic districts shall be subject to the provisions of article IX (historic preservation) of this chapter. The exterior design of proposed or renovated structures located adjacent to historic districts or historic resources shall be subject to section 14-526(d) 5, b.
(Ord. No. 241-91, 3-11-91; Ord. No. 240-09/10, 6-21-10; Ord. No. 278-09/10, 7-19-10)

Sec. 14-221.1. External effects.

Every use in the B-3, B-3b and B-3c zones shall be subject to the following requirements:

(a) ***Enclosed structure:*** The use shall be operated within a completely enclosed structure, except for those uses customarily operated in the open air.

(b) ***Noise:*** The level of sound, measured by a sound level meter with frequency weighting network (manufactured according to standards prescribed by the American National Standards Institute, Inc.), inherently and recurrently within the B-3 and B-3b zones shall not exceed fifty-five (55) decibels on the A scale between the hours of 9:00 p.m. and 7:00 a.m., and sixty (60) decibels on the A scale between 7:00 a.m. and 9:00 p.m. at the boundaries of any lot nor within publicly accessible pedestrian open space, except for sound from construction activities, sound from traffic on public streets, sound from temporary activities such as festivals, and sound created as a result of, or relating to, an emergency, including sound from emergency warning signal devices. In measuring sound levels under this section, sounds with a continuous duration of less than sixty (60) seconds shall be measured by the maximum

reading on a sound level meter set to the A weighted scale and the fast meter response (L maxfast). Sounds with a continuous duration of sixty (60) seconds or more shall be measured on the basis of the energy average sound level over a period of sixty (60) seconds (LEQ_1).

(c) ***Vibration:*** Vibration inherently and recurrently generated shall be imperceptible without instruments at lot boundaries.

(d) ***Heat:*** Heat shall be imperceptible without instruments at lot boundaries. Heating elements which are intended to melt snow and ice shall be placed within sidewalk paving only when approved by the department of parks and public works.

(e) ***Glare, radiation or fumes:*** Glare, radiation or fumes shall be imperceptible without instruments at lot boundaries.

(f) ***Smoke:*** Smoke shall not be emitted at a density in excess of twenty (20) percent opacity level as classified in Method 9 (Visible Emissions) of the Opacity Evaluation System of the U.S. Environmental Protection Agency.

(g) ***Materials or wastes:*** No materials or wastes shall be deposited on any lot in such form or manner that they may be transferred beyond the lot boundaries by natural causes or forces. All material which might cause fumes or dust, or constitute a fire hazard if stored out-of-doors, shall be only in closed containers and in accordance with section 14-221(d). Areas attracting large numbers of birds, rodents or insects are prohibited.

(Ord. No. 241-91, 3-11-91; Ord. No. 46-97, § 6, 8-4-97)

DIVISION 12.1. I-B ISLAND BUSINESS ZONE

Sec. 14-222. Purpose.

The purpose of the I-B island business zone is to provide limited areas on the islands for retail and service establishments that serve primarily the needs of the local island market area.

(Ord. No. 30-85, § 1, 7-15-85)

Sec. 14-223. Permitted uses.

The following uses are permitted in the I-B island business zone:

(a) Single-family detached dwellings;

(b) Retail or service establishments, excluding those listed below:

1. Automobile service stations;

2. Inns;

(c) Marinas and yacht clubs;

(d) Lodging houses, with more than two (2) but not more than nine (9) lodging rooms;

(e) Wharves, piers, docks, or landing ramps;

(f) Off-street parking;

(g) Accessory uses customarily incidental and subordinate to the location, function, and operation of principal uses, subject to the provisions of section 14-404 (accessory use) of this article including but not limited to home occupations;

(h) Handicapped family unit, as defined in section 14-47, for handicapped persons plus staff.

(i) Peaks Island only: Bed and breakfast, subject to the standards of article V (site plan), sections 14-522 and 14-523 notwithstanding.

(j) Studios for artists and craftspeople, provided that the area of such studios does not exceed one thousand (1,000) square feet for each studio space.

(k) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 30-85, § 1, 7-15-85; Ord. No. 33-91, § 13, 1-23-91; Ord. No. 125-97, § 8, 3-3-97; Ord. No. 164-97, § 3, 12-1-97; Ord. No. 10-10/11, 8-2-10; Ord. No. 33-11/12, 1-18-12)

Sec. 14-224. Conditional uses.

The following uses are permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) of this article and any special provisions, standards or requirements specified below:

(a) Two-, three- or four-family dwelling, provided that:

1. No open outside stairways or fire escapes above ground floor shall be constructed or have been constructed in the immediately preceding five (5) years;

2. A below-grade dwelling unit shall be permitted only if access is provided directly to the outside of the building;

3. Density shall be determined by the most restrictive abutting residential zone, except for those lots which are served by public water and sewer, where density shall be determined by the least restrictive abutting residential zone. If no residential zone is abutting, density shall be determined by the nearest residential zone. Residential uses shall meet the requirements of such abutting or nearest residential zone;

4. Any additions or exterior alterations shall be compatible with the original architecture of the building. The exterior design of new construction, including the architectural style, facade materials, roof pitch, building form, and height shall be compatible with neighboring properties;

5. No existing dwelling unit shall be decreased to less than one thousand (1,000) square feet of floor area;

6. No additional dwelling unit shall have less than six hundred (600) square feet of floor area, exclusive of common hallways and storage in basement and attic;

7. All sanitary waste shall be disposed of by a public sewer, subsurface sewerage system or other method in compliance with all applicable federal, state and local regulations;

8. The proposed conversion has sufficient water for the needs of the dwellings and will not cause an unreasonable burden on an existing water supply nor adversely affect groundwater resources;

(b) Automobile service stations;

(c) Inns;

(d) Schools;

(e) Nursery schools, kindergartens and day care centers for seven (7) or more children;

(f) Municipal uses, provided outside storage and parking area uses are suitably screened and landscaped so as to ensure compatibility with the surrounding neighborhood.

(g) Places of religious assembly;

(h) Private clubs, fraternal organizations.

(i) Temporary wind anemometer towers, as defined in section 1-47, are permitted provided the following standards are met in addition to section 14-430:

1. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a certificate of occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

2. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the board of appeals with the application; and

3. Towers shall be set back from habitable buildings

by a distance equal to 1.1 times the tower height; and

4. The applicant shall provide a safety report prepared and stamped bya licensed professional engineer to the board of appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

5. The applicant shall provide evicence of commercial general liability insurance, such insurance to be satisfactory to corporation counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

6. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

7. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any otherp upose; and

8. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the city, of the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

(j) Wind energy systems, as defined and allowed in Article X, Alternative energy.

(Ord. No. 30-85, § 1, 7-15-85; Ord. No. 435-89, 5-15-89; Ord. No. 163-89, § 1, 12-11-89; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 33-11/12, 1-18-12)

Sec. 14-225. Prohibited uses.

Uses that are not expressly enumerated herein as either permitted uses or conditional uses are prohibited.
(Ord. No. 30-85, § 1, 7-15-85)

Sec. 14-226. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulation and exceptions) of this article, lots in the I-B zone shall meet the following minimum requirements:

(a) *Minimum lot size:*

1. Residential: Lot size shall be determined by the most restrictive abutting residential zone, except for those lots which are served by public water and sewer, where lot size shall be determined by the least restrictive abutting residential zone. If no residential zone is abutting, density shall be determined by the nearest residential zone. Residential uses shall meet the requirements of such abutting or nearest residential zone.

2. Retail or service establishments: Twenty thousand (20,000) square feet, except that no minimum lot size shall be required if served by public water and sewer.

3. Restaurants and drinking establishments: Twenty thousand (20,000) square feet, except that ten thousand (10,000) square feet shall be required if served by public water and sewer.

4. Schools and other educational facilities: Twenty thousand (20,000) square feet.

5. Churches and other places of worship: Twenty thousand (20,000) square feet.

6. Private clubs, fraternal organizations: Twenty thousand (20,000) square feet.

7. Lodging houses: Thirty thousand (30,000) square feet for three (3) lodging rooms, plus ten thousand (10,000) square feet for each additional lodging

room in excess of three (3), unless served by public water and public sewer. Five thousand (5,000) square feet for three (3) lodging rooms, plus five thousand (5,000) square feet for each additional lodging room in excess of three (3) if served by public water and public sewer.

8. Inns or bed and breakfasts: Ten thousand (10,000) square feet for each guest room, unless served by public water and public sewer. Five thousand (5,000) square feet for three (3) guest rooms, plus five thousand (5,000) square feet for each additional guest room in excess of three (3) if served by public water and public sewer.

9. Municipal uses: Twenty thousand (20,000) square feet.

10. Automobile service station: Twenty thousand (20,000) square feet.

11. In issuing any permit for new development, the building or planning authority shall require that any lot located in an I-B zone shall be at least twenty thousand (20,000) square feet in area when the lot is to be serviced by a subsurface wastewater disposal system, [excluding Peaks Island].

12. [Excluding Peaks Island from this subsection 12,] any property owner whose lot does not meet the minimum lot size requirements outlined in subsection 11 of this section may, for purposes of this section only, merge two (2) or more separate lots on the same island in order to meet these requirements. Where the lots so merged are not contiguous, the property owner shall grant to the city as holder a conservation easement upon the lot or lots which will not contain the principal structure. The conservation easement shall contain both an existing legal description and a city assessor’s chart, block and lot description. The building authority shall be authorized to accept such conservation easements on behalf of the city. Said easement shall be recorded by the applicant in

the registry of deeds. A copy of the recorded easement and copies of the deeds for both lots shall be submitted to the building authority prior to issuance of a building permit. The property over which the conservation easement has been granted shall be used for passive recreational and conservation purposes only, and shall be subject to the following restrictions:

a. No structure shall be permitted on this property.

b. No parking or storage of vehicles or machinery shall be permitted on this property at any time.

c. No area of this property shall be paved.

d. No exterior storage for commercial use shall be permitted on this property.

e. The easement deed shall reference the lot which is benefited by this conservation easement. No conservation easement shall be used to benefit more than one (1) lot.

Conservation easements shall only be granted over lots which conform either to the provisions of section 14-433 or to the minimum lot size provisions set forth in (a)1 of this section. Conservation easements shall not be granted over any lot which is encumbered by any other easement which prohibits all construction on that lot.

A conservation easement may also name as a holder or grant a third-party right of enforcement to a nonprofit corporation or charitable trust, the purposes or powers of which include retaining or protecting the natural, scenic or open space values of real property; assuring the availability of real property for agricultural, forest, recreational or open space use; protecting natural resources; or maintaining or enhancing air or water quality of real property.

Nothing in this section shall be construed to allow an owner of a currently existing and developed lot to convey or permit a portion of that lot to be used to fulfill the requirements of this section if such conveyance would render the existing lot nonconforming under the terms of this chapter. The lot upon which a building is to be constructed shall meet the minimum lot size requirements of section 14-433.

13. Where an existing subsurface disposal system serving an existing structure requires replacement, the replacement system shall meet the requirements of CMR 241 Section 2-E. The land area requirements in subsection 11 of this section shall not apply to such a replacement system.

    For purposes of this subsection the mean high tide mark shall be considered to be the shoreline lot line.

(b) *Minimum street frontage:* Forty (40) feet.

(c) *Minimum yard dimensions:*

(Yard dimensions include setbacks of structures from property lines and setbacks of structures from one another. No structure shall occupy the minimum yard of another structure.)

1. *Front yard:*

   Principal or accessory structures: Twenty (20) feet, except that a front yard need not exceed the average depth of front yards on either side of the lot.

2. *Rear yard:*

   Principal or accessory structures: Ten (10) feet.

3. *Side yard:*

   Principal structures: Ten (10) feet.
   Accessory structures: Ten (10) feet except that the

minimum distance from a principal structure may be five (5) feet.

4. *Side yard on side streets:*

Principal or accessory structures: Ten (10) feet.

(d) *Maximum lot coverage:* Fifty (50) percent of lot area.

(e) *Minimum lot width:* Forty (40) feet.

(f) *Maximum structure height:*

Principal or accessory attached structure: Thirty-five (35) feet.

Accessory detached structure: Eighteen (18) feet.

(Ord. No. 30-85, § 1, 7-15-85; Ord. No. 163-89, § 2, 12-11-89; Ord. No. 125-97, § 9, 3-3-97)

Sec. 14-227. Other requirements.

Every use in a I-B zone shall be subject to the following requirements:

(a) *Off-street parking:* Off-street parking is required as provided in division 20 (off-street parking) of this article.

(b) *Shoreland and flood plain management regulations:* Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(c) *Storage of vehicles:* Only one (1) unregistered motor vehicle may be stored outside on the premises and not for a period exceeding thirty (30) days.

(d) *Noise:* The volume of sound, measured by a sound level meter with frequency weighting network (manufactured according to standards prescribed by the American Standards Association), generated shall not exceed sixty (60) decibels on the A scale between 7:00 a.m. and 9:00 p.m. and fifty-five (55) decibels on the A scale between

9:00 p.m. and 7:00 a.m., on impulse (less than one (1) second), at lot boundaries, excepting air raid sirens and similar warning devices.

(Ord. No. 30-85, § 1, 7-15-85; Ord. No. 15-92, § 16, 6-15-92; Ord. No. 15-04/05, 8-2-04; Ord. No. 240-09/10, 6-21-10)

Sec. 14-228 – Sec. 14-229.9. Reserved.

DIVISION 12.5. B-4 COMMERCIAL CORRIDOR ZONE

Sec. 14-229.10. Purpose.

The purpose of the B-4 commercial corridor zone is:

(a) To provide appropriate locations in the city for the development and operation of businesses catering primarily to highway-oriented trade along major arterials. (Uses which have market areas which are primarily dependent on the regional highway network or serve a regional or larger market); or

(b) To provide appropriate locations for large-scale commercial uses and commercial uses that require larger land areas to accommodate their operations.

(Ord. No. 296-88, 5-23-88)

Sec. 14-229.11. Permitted uses.

The following uses are permitted in the B-4 zone:

(a) *Business:*

1. General, business and professional offices, as defined in section 14-47;

2. Personal services, as defined in section 14-47;

3. Offices of building tradesmen;

4. Retail establishments;

5. Restaurants;

6. Drinking establishments;

7. Billiard parlors;

8. Major and minor gasoline service stations, as defined in section 14-47;

9. Mortuaries or funeral homes;

10. Miscellaneous repair services;

11. Health clubs and gymnasiums;

12. Hotels and motels;

13. New and used car dealerships;

14. Facilities for the maintenance and repair of automobiles, provided all repairs are performed in a fully enclosed structure;

15. Car washes;

16. Lumber and building materials dealers;

17. Communications studios and broadcast receiving facilities;

18. Veterinary hospitals but excluding outdoor kennels;

19. Auto body repair and paint shops provided all repairs are performed in fully enclosed structures;

20. Boat, trailer or recreational vehicle sales and service;

21. Theaters, entertainment and recreation services;

22. Self-storage facility;

23. Registered medical marijuana cultivation facilities.

(b) *Institutional:*

1. Governmental buildings and uses.

2. Colleges, universities and trade schools.

3. Places of assembly.

4. Correctional prerelease facilities for up to twelve (12) persons, plus staff, serving a primary clientele of parolees or persons in correctional prerelease programs, provided that:

   a. No correctional prerelease facility shall be located within one thousand (1,000) feet of another, as measured in a radius from the center of the lot;

   b. If a facility requires state or federal licensing, staffing of the facility shall be as required by such license. If a facility does not require state or federal licenses, there shall be a minimum of one (1) staff person for every ten (10) residents or fraction thereof; and

   c. The facility shall provide twenty-four-hour supervision of program participants.

(c) *Other:*

1. Lodging houses;

2. Wholesale warehousing and distribution establishments;

3. Commercial bakeries and dairies;

4. Light manufacturing uses with not more than twenty-five thousand (25,000) square feet or less of gross floor area. Exterior assembly of materials or products is prohibited. Activity defined as a high hazard by chapter 6 of this Code (building code) is also prohibited;

5. Printing and publishing establishments;

6. Research and development and related production

establishments;

7. Utility substations, as defined in section 14-47, subject to the requirements of article V (site plan), sections 14-522 and 14-523 notwithstanding; and

8. Day care facilities;

9. Studios for artists and craftspeople;

10. Accessory uses, as provided in section 14-404; and

11. Storage lots for towed or impounded vehicles, provided that such lots are located at least 300 feet from any residential zone or existing conforming residential use. For the purposes of this section, "existing conforming residential use" does not include a legally nonconforming residential use as described in division 23 of this chapter.

12. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 296-88, 5-23-88; Ord. No. 285-95, 6-7-95; Ord. No. 154-96, § 13, 12-16-96; Ord. No. 164-97, § 3, 1-6-97; Ord. No. 164-97, § 4, 12-1-97; Ord. No. 81-99, § 1, 10-18-99; Ord. No. 97-06/07, 11-20-06; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 283-09/10 7-19-10, emergency passage; Ord. No. 10-10/11, 8-2-10; Ord. No. 90-11/12, 1-4-12; Ord. No. 33-11/12, 1-18-12)

Sec. 14-229.11.1. Conditional uses.

The following use shall be permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses), and any special provisions, standards or requirements specified below:

(a) Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

1. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower

must be dismantled and removed from the site within sixty (60) days; and

2. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

3. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

4. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

5. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

6. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

7. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

8. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied

by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

(b) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 29-09/10, 8-3-09, emergency passage; Ord. No. 33-11/12, 1-18-12)

Sec. 14-229.12. Prohibited uses.

Uses not expressly enumerated in section 14-229.11 as permitted uses are prohibited.

(Ord. No. 296-88, 5-23-88)

Sec. 14-229.13. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, uses other than utility substations in the B-4 zone shall meet the following minimum requirements:

(a) *Minimum lot size:* Ten thousand (10,000) square feet.

(b) *Minimum street frontage:* Sixty (60) feet.

(c) *Minimum yard dimensions:*

(Yard dimensions include setbacks of structures from property lines and setbacks of structures from one another. No structure shall occupy the minimum yard of another structure.)

Except as provided in subsection (5) below, the following setbacks shall be required:

1. *Front yard:*

a. Principal or accessory structures: Twenty (20) feet, except that a front yard need not exceed the average depth of front yards on either side of the lot.

b. The front yard of a lot existing as of May 23, 1988, and less than one hundred (100) feet deep need not be deeper than twenty (20) percent of the depth of the lot.

2. *Rear yard:*

a. Principal structures: Twenty (20) feet.

b. Accessory structures (detached) with a total floor area of one hundred (100) square feet or less: Seven (7) feet.

3. *Side yard:*

a. Principal structures:

Number of Stories	*Required Side Yard*
1 or 2 stories	10 feet
3 or more stories	12 feet

b. Accessory structures (detached) with a total floor area of one hundred (100) square feet or less: Five (5) feet.

c. Side yards on side streets (corner lot):

Principal or accessory structures:

i. One (1) or two (2) stories: Ten (10) feet.

ii. Three (3) or more stories: Twelve (12) feet.

(d) ***Minimum lot width:*** Sixty (60) feet.

(e) ***Maximum height:*** Sixty-five (65) feet; except that on lots in excess of five (5) acres, ninety (90) feet is permitted if each of the setbacks required under subsection (3) above is increased by one (1) foot in distance for each foot of height above sixty-five (65)

feet.

(f) ***Maximum impervious surface ratio:*** Eighty (80) percent.

(g) ***Maximum Floor Area Ratio (F.A.R.):*** The maximum floor area ratio is established according to the abutting residential zone. If there is no abutting residential zone to the lot in question, the F.A.R may be a maximum of 0.65. In the case of two (2) or more abutting residential zones, the F.A.R. shall be the F.A.R. of the least restrictive such zone. The ratios are as follows:

Residential	*Floor Area Ratio*
R-1/R-2	0.45
R-3	0.55
R-4/R-5/R-5A/R-6	0.65

(Ord. No. 296-88, 5-23-88)

Sec. 14-229.14. Other requirements.

In addition to the above, the following requirements are applicable to all uses in the B-4 zone:

(a) ***Landscaping and screening:*** The site shall be suitably landscaped for parking, surrounding uses and accessory site elements including storage and solid waste receptacles where required by article IV (subdivisions) and article V (site plan).

(b) ***Curbs and sidewalks:*** Curbs and sidewalks as specified in article VI of chapter 25.

(c) ***Off-street parking and loading:*** Off-street parking and loading are as required by division 20 and division 21 of this article.

(d) ***Signs:*** Signs shall be subject to the provisions of division 22 of this article.

(e) ***Exterior storage:***

1. Any storage of new materials, finished products, or

related equipment must be suitably screened from the public way and from abutting properties by a solid fence at least five (5) feet in height, or by a solid evergreen planting strip.

2. All waste shall be stored in covered containers that do not leak or otherwise permit liquids or solids to escape from the container.

3. Outdoor storage of refuse, debris, or material awaiting reuse shall be in an appropriate container or located within a designated, screened area.

4. Any permitted outdoor storage of materials shall be done in such a manner as to prevent the breeding and harboring of insects or vermin, to prevent the transfer of such materials from the site by natural causes or forces and to contain fumes, dust, or other materials which constitute a fire hazard. This storage shall be accomplished within enclosed containers or by one (1) or more of the following methods: raising materials above ground, separating materials, preventing stagnant water, or by some other means. No outdoor storage shall be permitted in the required yard between the front of any building on the site and the street, except for storage for plant and tree nurseries.

(f) ***Storage of vehicles:*** Storage of vehicles is subject to the provisions of section 14-335.

(g) ***Shoreland and flood plain management regulations:*** If the lot is located in a shoreland zone or in a flood plain zone, the requirements of division 26 and/or division 26.5 apply.

(Ord. No. 296-88, 5-23-88; Ord. No. 164-97, § 4, 1-6-97)

Sec. 14-229.15. External effects.

Every use in a B-4 zone shall be subject to the following requirements:

(a) ***Enclosed structure:*** The use shall be operated within a completely enclosed structure, except for those customarily operated in the open air.

(b) ***Noise:*** The volume of sound, measured by a sound level meter with frequency weighting network (manufactured according to standards prescribed by the American Standards Association), generated shall not exceed sixty-five (65) decibels on the A scale between 7:00 a.m. and 9:00 p.m. and sixty (60) decibels on the A scale between 9:00 p.m. and 7:00 a.m., on impulse (less than one (1) second), off premises at source of complaint, excepting air raid sirens and similar warning devices.

(c) ***Vibration and heat:*** Vibration inherently and recurrently generated and heat shall be imperceptible without instruments at lot boundaries.

(d) ***Glare, radiation or fumes:*** Glare, radiation or fumes shall not be emitted to an obnoxious or dangerous degree beyond lot boundaries.

(e) ***Smoke:*** Smoke shall not be emitted at a density in excess of thirty (30) percent opacity level as classified in Method 9 (Visible Emissions) of the Opacity Evaluation System of the U.S. Environmental Protection Agency.

(Ord. No. 296-88, 5-23-88; Ord. No. 164-97, § 5, 1-6-97)

Sec. 14-229.16. - Sec. 14-229.30. Reserved.

DIVISION 12.6. B-5 URBAN COMMERCIAL MIXED USE ZONE

Sec. 14-230. Purpose.

The purpose of the B-5 and B-5b zones is to provide zones in areas of the peninsula near the central business district where a mixture of uses, including marine, industrial, commercial, and residential, is encouraged. The B-5 and B-5b zones are characterized by larger underdeveloped lots with great potential for denser, clustered, urban mixed use development and more efficient reuse of existing land and buildings.

It is anticipated that such denser, mixed uses would rely on a shared infrastructure system, including service alleys, parking lots, public transportation facilities, stormwater management, and driveways.

(Ord. No. 168-93, § 3, 1-4-93; Substitute Ord. No. 164-97, § 1, 5-19-97)

***Editor's Note:** The text changes adopted in Ord. No. 215-04/05 Section 14-230.1 (a)8 and 13 and (g) 3 shall remain in effect for six (6) months from the effective date (6-2-05) of the changes. By Council Order No. 94-05/06 passed on 11/7/05 the effective date of the amendments were extended through and including March 2, 2006. By Council Order No. 170-05/06 passed as an emergency on 2/22/06 the effective date of the amendments were extended through and including September 30, 2006 and thereafter shall cease to exist unless the Portland City Council takes action to extend the applicability of such changes.

Sec. 14-230.1. Permitted uses.

The following uses are permitted in the B-5 and B-5b urban commercial mixed use zones:

(a) *Commercial:*

1. Professional, business and general offices;

2. Restaurants and other eating and drinking establishments;

3. Meeting and convention halls;

4. Hotels and motels;

5. Craft and specialty shops, including the on-premises production of handcrafted goods;

6. Retail and service establishments except convenience stores with gas pumps;

7. Theaters and places of public assembly;

8. Banking services, except that any drive-up banking service shall be a conditional use;

9. Laundry and dry cleaning services;

10. Cabinet and carpentry shops;

11. Indoor recreation and family amusement establishments;

12. Intermodal transportation facilities;

13. Off-street parking lots and garages except in the B-5 zoning district between Forest Avenue and Franklin Street surface parking lots shall be considered a conditional use;

14. Cold storage facilities;

15. Lumber and building materials dealers (in existence on date of passage);

16. Major and minor gasoline service stations, as defined in section 14-47. Major and minor gasoline service stations shall be located at least two thousand (2,000) feet from each other;

17. Personal services;

18. Business services;

19. Billiard parlors;

20. Offices of business tradespeople;

21. Miscellaneous repair services;

22. Communication studios, broadcast and receiving facilities;

23. Theaters;

24. Exhibition halls;

25. Indoor amusement and recreation centers.

26. Hostels, provided the applicant submits a site plan and operations plan demonstrating compliance with the following conditions:

    a. All applicable provisions of Article V of this chapter shall be met.

    b. Parking shall be provided in compliance with Division 20 of this Article.

c. No unaccompanied minors under the age of eighteen (18) shall be permitted in the facility.

d. The length of stay for transient guests shall not exceed fifteen (15) days out of any sixty-day period.

e. The building shall meet the applicable occupant load requirements as defined by the International Building Code and the NFPA Life Safety Code, as such codes are amended or adopted by the city.

(b) *Industrial:*

1. Warehousing and wholesaling;

2. Low impact industrial uses with total floor area of less than ten thousand (10,000) square feet and which meet the performance standards of the I-L zone;

3. Breweries, including associated bottling activities.

(c) *Marine:*

1. Marine products wholesaling and retailing;

2. Marine repair services and machine shops;

3. Harbor and marine supplies and services and ship supply;

4. Reserved;

5. Shipbuilding and facilities for construction, maintenance and repair of vessels;

6. Marine museums and aquariums;

7. Reserved;

8. Boat repair yards;

9. Boat storage facilities;

10. Seafood processing for human consumption;

11. Seafood packing and packaging;

12. Seafood distribution;

(d) *Residential:*

1. Attached single-family, two-family and multifamily dwellings;

2. Handicapped family units;

3. Lodging houses;

4. Combined living/working spaces, including but not limited to artist residences with studio space.

(e) *Public:*

1. Utility substations, including sewage collection and pumping stations, water pumping stations, transformer stations, telephone electronic equipment enclosures and other similar structures;

2. Museums and art galleries;

3. Landscaped pedestrian parks, plazas and other similar outdoor pedestrian spaces.

(f) *Institutional:*

1. Public or private schools of any type;

2. Clinics;

3. Places of assembly;

4. Colleges, universities or trade schools;

5. Governmental buildings and uses;

6. Nursery schools, kindergartens, and day care facilities or home babysitting services.

(g) *Other:*

1. Studios for artists and craftspeople including but not limited to, carpenters, cabinetmakers, and silk screeners;

2. Printing and publishing establishments;

3. Accessory uses customarily incidental and subordinate to the location, function and operation of permitted uses, excluding in the B-5b all drive-up services for retail, banking, or automotive repair uses. In the B-5 zoning district between Forest Avenue and Franklin Street, all drive-up services for all retail or drive-up automotive repair uses are prohibited. In the B-5 zone between Forest Avenue and Franklin Street, surface parking lots shall be considered a conditional use subject to the conditional use section of the B-5 zone.

4. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 168-93, § 3, 1-4-93; Ord. No. 39-96, § 4, 10-7-96; Substitute Ord. No. 164-97, § 2, 5-19-97; Ord. No. 164-97, § 5, 12-1-97; Ord. No. 80, 12-8-04; Ord. No. 215-04/05, 5-2-05; Ord. No. 127-09/10, 1-4-10 emergency passage; Ord. No. 279-09/10, 6-6-11; Ord. No. 33-11/12, 1-18-12; Ord. No. 113-11/12, 2-22-12)

***Editor's Note:** The text changes adopted in Ord. No. 215-04/05 Section 14-230.1 (a)8 and 13 and (g) 3 shall remain in effect for six (6) months from the effective date (6-2-05) of the changes. By Council Order No. 94-05/06 passed on 11/7/05 the effective date of the amendments were extended through and including March 2, 2006. By Council Order No. 170-05/06 passed as an emergency on 2/22/06 the effective date of the amendments were extended through and including September 30, 2006 and thereafter shall cease to exist unless the Portland City Council takes action to extend the applicability of such changes.

Sec. 14-230.2. Conditional uses.

(a) The following uses shall be permitted as conditional uses in the B-5 and B-5b urban commercial mixed use zones, provided

that, notwithstanding section 14-471(c), section 14-474(a), or any other provision of this Code, the Planning Board shall be substituted for the board of appeals as the reviewing authority, and further provided that, in addition to the provisions of section 14-474(c)(2), they shall also meet the requirements set forth below:

1. *Commercial:*

   a. Reserved.

2. *Industrial:*

   a. Low impact industrial uses over ten thousand (10,000) square feet provided that they meet the following requirements:

      i. Truck loading and access and vehicle parking shall be located in the rear or side yard of the site where possible.

      ii. Street frontage shall be designed for pedestrian scale or interest.

      iii. Shared infrastructure to the extent practicable, including, but not limited to, service alleys, parking areas, stormwater treatment, public transportation facilities and driveways, shall be utilized.

3. *Surface Parking:*

   a. In the B-5 zoning district located between Forest Avenue and Franklin Street, surface parking lot provided the following requirements are met.

      i. No new surface parking lot shall be developed within thirty-five (35) feet of any street except in the case of a property in which eighty percent (80%) of the property frontage has a building within ten (10) feet of the street.

      ii. No surface parking lot shall be encumbered by lease or other use commitment to an off-site

use exceeding a twenty-four month term.

iii. For surface parking lots of 20,000 sq. ft or greater in area, lease or other use agreements for surface parking shall not preclude the relocation of such parking for more than a twenty-four (24) month term.

iv. Any such parking shall in its lease stipulate that developer/owner reserves the right to relocate said parking or convert surface parking to structured parking as long as the relocated parking is located within a reasonable distance from the use.

v. Surface parking shall be laid out in a manner conducive to development of future buildings and/or structured parking.

4. *Drive Up Banking Services:*

a. In the B-5 zoning district located between Forest Avenue and Franklin Street, drive up banking services provided the following requirements are met:

i. The drive up banking services are attached to a building which houses banking services other than, or in addition to, automated banking machines; and

ii. The drive up banking services are attached to a building with a minimum floor area of 20,000 square feet; and

iii. Any service window or automated teller machine shall not extend nearer than twenty-five (25) feet to the street; and the site must have adequate stacking capacity for vehicles waiting to use these service features without impeding vehicular or pedestrian circulation or creating hazards to vehicles or pedestrians on adjoining streets; and

iv. There shall be no more than a total of two (2)

vehicle lanes for both the service window and automated teller machine.

(b) The following use shall be permitted only upon the issuance of a conditional use permit by the Board of Appeals, subject to the provisions of section 14-474 (conditional uses), and any special provisions, standards or requirements specified below:

1. Temporary wind anemometer towers, as defined n sec. 14-47, are permitted provided the following standards are met in addition to sec. 14-430:

   a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

   b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

   c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

   d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

   e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer

tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

2. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 168-93, § 3, 1-4-93; Ord. No. 39-96, § 5, 10-7-96; Substitute Ord. No. 164-97, § 3, 5-19-97; Ord. No. 215-04/05, 5-2-05; Ord. No. 29-09/10, 8-3-09, emergency passage; Ord. 33-11/12, 1-18-12)

***Editor's Note:** The text changes adopted in Ord. 215-04/05 Section 14-230.2 (c) and (d) shall remain in effect for six (6) months from the effective date (6-2-05) of the changes. By Council Order No. 94-05/06 passed on 11/7/05 the effective date of the amendments were extended through and including March 2, 2006. By Council Order No. 170-05/06 passed as an emergency on 2/22/06 the effective date of the amendments were extended through and including September 30, 2006 and thereafter shall cease to exist unless the Portland City Council takes action to extend the applicability of such changes.

Sec. 14-230.3. Prohibited uses.

Uses which are not enumerated in either section 14-230.1 as permitted uses or in section 14-230.2 as conditional uses are prohibited.

(Ord. No. 168-93, § 3, 1-4-93)

***Editor's Note:** The text changes adopted in Ord. 215-04/05 Section 14-230.2 (c) and (d) shall remain in effect for six (6) months from the effective date (6-2-05) of the changes. By Council Order No. 94-05/06 passed on 11/7/05 the effective date of the amendments were extended through and including March 2, 2006. By Council Order No. 170-05/06 passed as an emergency on 2/22/06 the effective date of the amendments were extended through and including September 30, 2006 and thereafter shall cease to exist unless the Portland City Council takes action to extend the applicability of such changes.

Sec. 14-230.4. Dimensional requirements.

In addition to the provisions of article III, division 25 of this Code, lots in the B-5 and B-5b urban commercial mixed use zones shall meet the following requirements:

(a) *Minimum lot size:* None.

(b) *Minimum frontage:* None.

(c) *Yard dimensions:*

1. Minimum yards in the B-5 and B-5b zones:

   Front setback: None required.

   Side setback: None required.

   Rear setback: None required.

2. Maximum front yard setback in the B-5b zone: Ten (10) feet.

3. Maximum street setback: In the B-5 zoning district located between Forest Avenue and Franklin Street the following street setbacks shall apply:

   a. Ten (10) feet except for parking structures, public transportation facilities and secondary building components such as truck loading docks, mechanical equipment enclosures and refrigeration units. The setback can be increased more than ten (10) feet if all of the conditions are met below:

i. Seventy-five (75) percent of the total building wall length facing the abutting streets shall be setback no greater than ten (10) feet.

ii. The increased setback area includes a functional public pedestrian entrance into the building that faces the street.

iii. The increased setback is not used for surface parking.

b. For any new construction on a lot abutting three (3)or more streets, the maximum setback shall apply only to two (2) streets.

c. Lots having frontage on streets in which the curve of the street frontage precludes a rectangular shaped building along the street line, for purposes of calculating the setback, the average setback of the building from the street line may be used, but in no event shall the average setback along the length of the building edge exceed an average setback of fifteen (15) feet nor shall the maximum setback exceed twenty (20) feet. The increased setback shall not be used for surface parking, vehicular loading or vehicular circulation.

d. Additions to and relocations of designated historic structures or structures determined to be eligible by the Historic Preservation Committee shall be exempt from this provision.

(d) ***Maximum lot coverage:*** One hundred (100) percent.

(e) ***Maximum residential density:*** Sixty (60) dwelling units per acre.

(f) ***Maximum building height:*** Sixty-five (65) feet; except for parcels of land I nteh B-5b located along West Commercial Street south of Danforth Street, maximum building heights shall be as follows:

West of the projection of the centerline of the Fletcher Street right-of-way, the maximum building height shall be forty-five (45) feet; and, east of the projection of the centerline of the Fletcher Street right-of-way and west of the projection of the centerline of the Emery Stret right-of-way, the maximum building height shall be fifty-five (55) feet.

For purposes of this section, a projection of the centerline of a street is defined by extending the centerline of the referenced street right of way along its most southerly block to the centerline of West Commercial Street.

Furthermore, notwithstanding the exception of roof top structures from building height regulations in Section 14-430(a), no rooftop structure located between the projections of the centerlines of Emery Street and Fletcher Street, as described above, shall exceed a height of sixty-two (62) feet as measured from the average grade of the building at its foundation.

(g) *Minimum building height:*

1. In the B-5 zoning district between Forest Avenue and Franklin Street, within thirty-five (35) feet of any public street, no new construction of any building shall have less than three (3) floors of occupiable or habitable space above the average adjacent grade. This provision shall not apply to:

   a. Accessory building components such as truck loading docks, mechanical equipment enclosures, refrigeration units;

   b. Information kiosks and ticketing booths;

   c. Parking garages;

   d. Public transportation facilities;

   e. Additions to buildings existing as of March 9, 2005 provided that the cumulative

additions since March 9, 2005 does not exceed 25% of the building footprint on March 9, 2005 except that such restriction shall not apply to those portions of the building addition that are constructed closer to the street line than the building footprint existing as of March 9, 2005;

f. Utility substations, including sewage collection and pumping stations, water pumping stations, transformer stations, telephone electronic enclosures and other similar structures; and

g. Additions to and relocations of designated historic structures or structures determined by the Historic Preservation Committee to be eligible for such designation.

(Ord. No. 168-93, § 3, 1-4-93; Substitute Ord. No. 164-97, § 4, 5-19-97; Ord. No. 215-04/05, 5-2-05; Ord. No.112-11/12, 2-22-12)

***Editor's Note:** The text changes adopted in Order 215-04/05 Section 14-230.4 I3 and (g) shall remain in effect for six (6) months from the effective date (6-2-05) of the changes. By Council Order No. 94-05/06 passed on 11/7/05 the effective date of the amendments were extended through and including March 2, 2006. By Council Order No. 170-05/06 passed as an emergency on 2/22/06 the effective date of the amendments were extended through and including September 30, 2006 and thereafter shall cease to exist unless the Portland City Council takes action to extend the applicability of such changes.

Sec. 14-230.5. Performance standards.

All uses shall comply with the following standards:

(a) *Storage:* Any storage of new materials, finished products, or related equipment must be suitably screened from the public way and from abutting properties by a solid fence at least five (5) feet in height, or by a solid evergreen planting strip. All waste shall be stored in covered containers that do not leak or otherwise permit liquids or solids to escape from the container. All food processing waste shall be stored within a completely enclosed structure and if not refrigerated shall be removed from the site in an enclosed container within forty-eight (48) hours of its generation. All enclosed

and exterior areas shall be cleaned and sanitized on a regular basis. Outdoor storage of refuse or debris shall be in an appropriate container or located within a designated, screened area.

(b) ***Noise:***

1. ***Definitions:***

a. Tonal sounds are defined as sound waves usually perceived as a hum or whine because their instantaneous sound pressure varies essentially as a simple sinusoidal function of time.

b. Impulse sounds are defined as sound events characterized by brief excursions of sound pressure, each with a duration of less than one (1) second.

2. ***Measurement:*** Sound levels shall be measured with a sound level meter with a frequency weighting network manufactured according to standards prescribed by the American National Standards Institute (ANSI) or its successor body. Measurements shall be made at all major lot lines of the site, at a height of at least four (4) feet above the ground surface. In measuring sound levels under this section, sounds with a continuous duration of less than sixty (60) seconds shall be measured by the maximum reading on a sound level meter set to the A weighted scale and the fast meter response (L maxfast). Sounds with a continuous duration of sixty (60) seconds or more shall be measured on the basis of the energy average sound level over a period of sixty (60) seconds (LEQ_1).

3. ***Maximum permissible sound levels:*** The maximum permissible sound level of any continuous, regular or frequent source of sound produced by an activity shall be as follows:

a. Sixty (60) dBA between the hours of 7:00 a.m. and 10:00 p.m.

b. Fifty (50) dBA between the hours of 10:00 p.m. and 7:00 a.m., as measured at or within the boundaries of any residential zone.

In addition to the sound level standards established above, all uses located within this zone shall employ best practicable sound abatement techniques to prevent tonal sounds and impulse sounds or, if such tonal and impulse sounds cannot be prevented, to minimize the impact of such sounds in residential zones.

4. *Exemptions:*

a. Noises created by construction and maintenance activities between 7:00 a.m. and 10:00 p.m. are exempt from the maximum permissible sound levels set forth in subsection (a)3 of this section. Construction activities on a site abutting any residential use between the hours of 10:00 p.m. of one (1) day and 7:00 a.m. of the following day shall not exceed fifty (50) dBA.

b. The following uses and activities shall also be exempt from the requirements of subsection (a)3 of this section:

i. The noises of safety signals, warning devices, emergency pressure relief valves, and any other emergency devices.

ii. Traffic noise on public roads or noise created by airplanes and railroads.

iii. Noise created by refuse and solid waste collection, provided that the activity is conducted between 6:00 a.m. and 7:00 p.m.

iv. Emergency construction or repair work by public utilities, at any hour.

v. Noise created by any recreational activities which are permitted by law and

for which a license or permit has been granted by the city, including but not limited to parades, sporting events, and fireworks displays.

(c) ***Vibration:*** Vibration inherently and recurrently generated shall be imperceptible without instruments at lot boundaries.

(d) ***Federal and state environmental regulations:*** All uses shall comply with federal and state environmental statutes and regulations regarding emissions into the air, except where provisions of this Code are more stringent.

(e) ***Storage of vehicles:*** Storage of any unregistered automotive vehicle on the premises for more than sixty (60) days, and outdoor storage of any used automotive tires on the premises shall not be permitted.

(f) ***Off-street parking and loading: O***ff-street parking and loading are required as provided in division 20 and division 21 of this article.

(g) ***Shoreland and flood plain management regulations:*** Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(h) ***Glare, radiation or fumes:*** Glare, radiation or fumes shall not be emitted to an obnoxious or dangerous degree beyond lot boundaries.

(i) ***Enclosure of uses:*** All uses shall be operated within a fully enclosed structure, except for those customarily operated in open air.

(j) ***Materials or wastes:*** Any permitted outdoor storage of materials shall be done in such a manner as to prevent the breeding and harboring of insects or vermin, to prevent the transfer of such materials from the site by natural causes or forces and to contain fumes, dust, or other materials which constitute a fire hazard. This storage shall be accomplished within enclosed containers

or by one (1) or more of the following methods: raising materials above ground, separating materials, preventing stagnant water, or by some other means. Any areas used for permitted outdoor storage of materials shall be screened from view of any adjoining properties and public rights-of-way. No outdoor storage shall be permitted in the required yard between the front of any building on the site and the street.

(k) ***Odor:*** It shall be a violation of this chapter to create an odor nuisance.

1. ***Determination of odor nuisance:*** An odor nuisance shall be considered to exist when ten (10) confirmed complaints occur in an area within two (2) separate twenty-four-hour periods. The ten (10) confirmed complaints must originate from ten (10) different households in an area zoned residential or from ten (10) different individuals in a commercial or industrial facility. The building authority shall only respond to a complainant who confirms that the odor is detectable at the time of the actual complaint. In order to confirm a complaint, the building authority or its designee shall first determine that an odor is detectable in the area of the complaint. The building authority or its designee shall interview the complainant to verify that the detectable odor is in fact the odor that resulted in the complaint. If the complainant verifies the odor as the source of the complaint, then the building authority shall notify the owner or operator of the alleged odor source either in person or by telephone within one (1) working day, with a written confirmation within seven (7) working days of the complaint. In the event that the building authority is unable to contact the owner or operator of the alleged odor source in person or by telephone within one (1) working day, then the building authority shall send written notice to the operator within seven (7) working days of the complaint.

   In the event that ten (10) complaints are confirmed as set forth in subsection 1. in two (2) separate twenty-four-hour periods within a ninety-day

period, the building authority shall cause a certified odor inspector to investigate any odor complaints received in the next thirty (30) days following the receipt of the tenth confirmed complaint from the second twenty-four-hour period. If the odors remain under the ambient intensity standard as established in this subsection for the next thirty (30) days, then a new odor nuisance must be established after that time in accordance with the requirements of this section. The certified odor inspector shall do the following in response to a complaint under this section:

a. Verify that an odor is detectable in the area of the complaint and confirm that it is the odor that resulted in the complaint;

b. Quantify the intensity of the odor on the eight-point n-butanol intensity scale as defined in regulations promulgated by the director of the planning authority to establish training and technical standards to support this section; and

c. Track the odor to its source.

When the certified odor inspector determines that a violation has occurred because an odor has exceeded the maximum ambient odor levels set forth in this section, the building authority shall notify the owner or operator either by telephone or in person of the violation within one (1) working day of the violation. The building authority shall confirm this notification in writing within seven (7) working days of this initial notice. In the event that the building authority is unable to contact the owner or operator by telephone or in person within the required time period, then it will send written notification within seven (7) working days of the violation.

Upon receipt of the written notice of violation, the owner or operator of the odor source shall do the following:

a. Implement odor reduction procedures immediately upon notification by the building authority that the facility has violated this section wherever odor reduction can be achieved by operational or procedural changes at the facility;

b. Submit to the building authority, within thirty (30) days of the written notice of violation, an odor reduction plan which is designed to reduce ambient odors attributable to emissions from that source to the maximum allowable intensity for that zone. The plan shall include a detailed summary of the measures that the owner or operator will take to mitigate the community annoyance and estimated dates for completion of those measures. In the event that it will take longer than thirty (30) days to develop the odor reduction plan, the owner or operator of the facility shall submit within the thirty-day time period a schedule for the development of the odor reduction plan. The building authority shall review this plan to determine whether it will be adequate to resolve the odor nuisance in a reasonable time period; and

c. Implement the plan in accordance with the schedule approved by the building authority.

2. ***Ambient odor limits:*** The maximum ambient intensity standard for odors generated by uses located in the I-L zone shall not exceed the following levels when the odor is measured in the zone indicated:

4.0 in any industrial or business zone for odors resulting from any use in the B-5 zone.

3.0 in any residential zone for odors resulting from any use in the B-5 zone.

(l) ***Smoke:*** Discharges of smoke shall not exceed opacity percentage of forty (40) percent or number 2 on the Ringelman chart.

(m) ***Discharge into sewers:*** No discharge shall be permitted at any point into any private sewage disposal system, or stream, or into the ground, of any materials in such a way or of such nature or temperature as to contaminate any water supply, or otherwise cause the emission of dangerous or objectionable elements, except in accordance with standards approved by the health authority or by the public works authority.

(n) ***Lighting:*** All lighting shall be designed and installed with cut-off fixtures to direct illumination onto the site and to prevent illumination from such fixtures on neighboring properties.

(Ord. No. 168-93, § 3, 1-4-93; Substitute Ord. No. 164-97, § 5, 5-19-97; Ord. No. 240-09/10, 6-21-10)

***Editor's Note:** The text changes adopted in Order 215-04/05 Section 14-230.4 I3 and (g) shall remain in effect for six (6) months from the effective date (6-2-05) of the changes. By Council Order No. 94-05/06 passed on 11/7/05 the effective date of the amendments were extended through and including March 2, 2006. By Council Order No. 170-05/06 passed as an emergency on 2/22/06 the effective date of the amendments were extended through and including September 30, 2006 and thereafter shall cease to exist unless the Portland City Council takes action to extend the applicability of such changes.

Sec. 14-230.6. thru 14-230.9 Reserved.

DIVISION 12.7. O-P OFFICE PARK ZONE

Sec. 14-230.10. Purpose.

The purpose of the O-P zone is to provide substantial areas for integrated development of professional offices in a park- or campus-like setting which are of the highest quality, are well designed and maintained and are compatible with their natural surroundings.

(Ord. No. 297-88, 5-23-88)

Sec. 14-230.11. Permitted uses.

The following uses are permitted in the O-P zone:

Office park (O-P) with a minimum gross area, as defined in

section 14-47 (definitions) of this article, of at least three (3) acres of contiguous land, consisting of either an Office Park Planned Unit Development (OPPUD) on one (1) lot with one (1) or more buildings and with driveways and open areas to be owned and maintained in common, or a subdivision (OPS) on one (1) parcel with two (2) or more lots intended for separate ownership, and including any of the following uses:

(a) Professional offices and office complexes;

(b) Research and development establishments;

(c) Printing and publishing establishments;

(d) Reserved;

(e) Day care facilities;

(f) Uses incidental and subordinate to the office park as a whole, which may include sales and services for employees and visitors; including, but not limited to; parking structures, health clubs, gymnasiums and recreational facilities, day care centers and cafeterias.

An Office Park Planned Unit Development (OPPUD) shall be subject to review and approval by the Planning Board with respect to the requirements of article V (site plan) and article IV (subdivisions) and the development standards of this chapter, article V sections 14-522 and 14-523 notwithstanding, and whether or not such development is a subdivision within the meaning of article IV of this chapter as now enacted or as hereafter amended. An Office Park Subdivision (OPS) shall be subject to review and approval by the Planning Board with respect to the requirements of article IV (subdivision) and article V (site plan), sections 14-522 and 14-523 notwithstanding, as each subdivided lot is developed. All areas in such a development that are to be owned or used in common shall be governed and maintained as set forth in section 14-498(i)(3) of article VI (subdivisions) of this chapter.

(g) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 297-88, 5-23-88; Ord. No. 10-10/11, 8-2-10; Ord. No. 33-11/12, 1-18-12)

Sec. 14-230.11.1. Conditional uses.

The following uses are permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) of this article and any special provisions, standards or requirements specified below:

(a) High technology manufacturing of biotechnology, pharmaceutical, and nanotechnology products provided that:

1. Manufacturing, including the warehousing therewith, shall occupy a gross floor area no greater than 20,000 square feet.

2. A minimum of one-third of the total square footage devoted to manufacturing is conducted in a laboratory environment, i.e. in a controlled environment with specialized air handling systems that exceed levels for pressurization and filtration found in office environments and traditional manufacturing facilities.

3. Truck traffic serving a single manufacturing business or institution shall not exceed, on a regular basis, more than two (2) tractor-trailer truck deliveries per week and provided that no deliveries are accepted between 7:00 p.m. and 7:00 a.m.

4. Rooftop equipment shall be integrated into the overall building design and shall be screened as necessary.

(b) Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

1. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site

within sixty (60) days; and

2. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

3. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

4. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

5. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

6. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

7. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

8. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow

account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

(c) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 300-05/06, 7-17-06; Ord. No. 29-09/10, 8-3-09, emergency passage; Ord. No. 33-11/12, 1-18-12)

Sec. 14-230.12. Prohibited uses.

Uses not enumerated in section 14-230.11 as permitted uses are prohibited.

(Ord. No. 297-88, 5-23-88)

Sec. 14-230.13. Development standards.

An office park (O-P) shall be approved by the Planning Board only if, in addition to the dimensional and other requirements of this article and the applicable provisions of article IV (subdivisions) and article V (site plan), the development meets the following development standards:

(a) *Master plan:* Development proposals shall include a master plan of the office park. The master plan shall include the following:

1. For an OPPUD proposal: The location of the building(s) on the site; infrastructure of the site; identification of common areas; traffic circulation, architectural character and treatment of the building(s); proposed building envelopes; phasing and timing of the development; private development restrictions; and such other information necessary and sufficient to ensure compliance with the standards in this section; and

2. For an OPS proposal: Delineation of the subdivision of land; infrastructure of the site; identification of common areas, if any; traffic circulation; desired architectural character, including private development restrictions to ensure compatibility of architectural character of future buildings with

each other; phasing and timing of the development; private development restrictions; and such other information as necessary and sufficient to ensure compliance with the standards in this section.

(b) ***Design relationship to site:*** Development proposals shall demonstrate a reasonably unified design of the site, including the architecture, the layout of the buildings, pedestrian and vehicular circulation plan, open space, drainage, and the topography, soil conditions, vegetation and other natural features of the site. Integration of open spaces and natural features shall be achieved by incorporation of outdoor amenities for the benefit of users of the site, such as jogging and walking trails, gardens and benches.

(c) ***Landscaping:*** Development proposals shall include a landscape program. All land areas not covered by structures, parking areas or circulation facilities shall be landscaped and maintained. In order to soften the visual impact of large expanses of pavement in parking lots, vegetation shall be planted or retained in islands or planting strips where required by article IV (subdivisions) and article V (site plan).

(d) ***Impervious surface ratio:*** Development proposals may have an impervious surface ratio of up to sixty (60) percent and shall meet the following criteria:

1. No pavement may be located closer than fifteen (15) feet from the property line and from a public street right-of-way, excepting approved entrance drives;

2. Parking may not be located in the required front yard setback. If parking is provided in the area between the building and minimum setback line, the parking area must be adequately screened with landscaping materials and permanently maintained.

(e) ***Sidewalks:*** Development proposals shall include internal sidewalks, illustrating the manner in which the developer will provide this amenity to take advantage of the topography and natural features of the site.

(f) ***Buffers and screens:*** Development proposals shall include buffering yard areas abutting a residential zone or residential use and to screen parking lots and driveways from public view, identifying the location, composition and maintenance of the buffer. The buffer and screening shall be of a dense and continuous nature and shall incorporate trees, shrubs, fencing, berms and related elements deemed necessary.

(g) ***Preservation of natural features:*** Development proposals shall identify the extent to which the developer shall preserve natural features including, but not limited to, existing vegetation, flood plains, rock outcroppings, surface water bodies, drainage swales and courses, and wetlands; provided any such program shall consider and be sensitive to the need to preserve such natural features.

(h) ***Traffic:*** Development proposals shall identify all proposed traffic controls, parking areas, interior traffic circulation, and demonstrate that additional traffic generated by the project itself can be reasonably accommodated on existing public streets.

(i) ***Architectural design:*** All buildings shall be designed or approved by a registered architect in the State of Maine and shall be in conformance with the proposed master plan. The scale, texture, color and massing of the buildings shall be coordinated. The full range of high-quality, permanent, and traditional or contemporary building materials and technology may be incorporated in a manner so that the development as a whole embodies distinguishing attributes that achieve the developer's desired degree of excellence and are in conformance with the architectural guidelines provided in the private development restrictions. Particular emphasis shall be placed on the appearance of building facades from public streets, from driveway and parking areas, and from other nearby buildings. Building elevation drawings shall be submitted which indicate architectural style, exterior finishes and color, building height and scale, and location and scale of window and door openings. Samples of exterior building materials shall also be submitted.

(j) ***Lighting:*** Development proposals shall identify the location and style of lighting to be used in the

development. All light fixtures shall be hooded or shielded so that the light shines downward.

(k) ***Signs:*** Development proposals shall identify all proposed signage. Signs shall be designed in proportion and character with the building facades. All signs shall be constructed of permanent materials and shall be coordinated with the building and landscaping design through the use of appropriate materials and finishes.

(Ord. No. 297-88, 5-23-88)

Sec. 14-230.14. Dimensional requirements.

In addition to the provisions of division 25 (space and bulk regulations and exceptions) of this article, lots in the O-P zone shall meet the following minimum requirements:

(a) ***Minimum lot size:*** One and one-half (1.5) acres.

(b) ***Minimum street frontage:*** One hundred (100) feet.

(c) ***Minimum lot width:*** One hundred fifty (150) feet.

(d) *Minimum yard dimensions:*

1. Front yard: Fifty (50) feet.

2. Rear yard: Fifty (50) feet.

3. Side yards: Twenty-five (25) feet, except where a side yard abuts a residential zone or use, in which case it shall be forty (40) feet.

The Planning Board can reduce by up to fifty (50) percent the minimum yard setback if another yard within the lot is correspondingly increased so that the combined minimum setbacks on all four (4) sides equal one hundred fifty (150) feet. If two (2) or more buildings are located on one (1) lot, only the requirements of the front, rear or side yards that adjoin any external property boundary must be met, provided a sufficient fire line is provided.

(e) ***Maximum structure height:*** Fifty-five (55) feet, except that on lots or within office-park subdivisions which are composed of over fifty (50) acres in total land area,

seventy-five (75) feet is permitted, including roof appurtenances, if each of the required minimum yard dimensions is increased by one (1) foot in distance for each one (1) foot of height above fifty-five (55) feet.

(Ord. No. 297-88, 5-23-88; Ord. No. 223-92, 1-22-92)

Sec. 14-230.15. Other requirements.

[In addition to the above, the following requirements are applicable to all uses in the O-P zone:]

(a) ***Off-street parking and loading:*** Off-street parking and loading are required as provided in division 20 (off-street parking) and division 21 (off-street loading).

(b) ***Signs:*** Signs shall be subject to the provisions of division 22 of this article. Temporary freestanding advertising signs are not permitted.

(c) ***Curbs and sidewalks:*** Curbs and sidewalks as specified in article VI of chapter 25.

(d) ***Shoreland and flood plain management regulations:*** If the lot is located in a shoreland zone or in a flood hazard zone, the requirements of division 26 and/or division 26.5 apply.

(Ord. No. 297-88, 5-23-88)

Sec. 14-230.16. External effects.

Every use in a O-P zone, unless expressly exempted, shall be subject to the following limitations:

(a) ***Enclosed structure:*** The use shall be operated within a completely enclosed structure, except for those customarily operated in the open air.

(b) ***Noise:*** The volume of sound, measured by a sound level meter with frequency weighting network (manufactured according to standards prescribed by the American Standards Association), generated shall not exceed sixty (60) decibels on the A scale, on impulse (less than one (1) second), at lot boundaries, excepting air raid sirens and similar warning devices.

(c) ***Vibration:*** Vibration inherently and recurrently generated shall be imperceptible without instruments at lot boundaries.

(d) ***Heat, glare, radiation or fumes:*** Heat, glare, radiation or fumes shall not be emitted to an obnoxious or dangerous degree beyond lot boundaries.

(e) ***Smoke:*** Smoke shall not be emitted at a density in excess of twenty (20) percent opacity level as classified in Method 9 (Visible Emissions) of the Opacity Evaluation System of the U.S. Environmental Protection Agency.

(f) ***Materials or wastes:*** No materials or wastes shall be deposited on any lot in such form or manner that they may be transferred beyond the lot boundaries by natural causes or forces. All material which might cause fumes or dust, or constitute a fire hazard if stored out-of-doors, shall be only in enclosed containers. Areas attracting large numbers of birds, rodents or insects are prohibited.

(Ord. No. 297-88, 5-23-88)

DIVISION 13. I-L AND I-Lb INDUSTRIAL ZONES*

***Editor's note—**Ord. No. 164-97, § 6, passed Jan. 6, 1997, repealed div. 13, §§ 14-231—14-236 of this article and enacted new provisions as herein set out. Formerly, such division pertained to the I-1 industrial zone and derived from §§ 602.11.A—602.11.F of the 1968 Code as amended by the following legislation:

Ord. No.	Sec.	Date	Ord. No.	Sec.	Date
570-71	--	11-16-71	330-90	1	5-7-90
327-71	--	7- 7-71	17-90	--	6-18-90
499-74	5	8-19-74	112-90	--	10- 1-90
334-76	6	7- 7-76	15-92	17	6-15-92
430-85	--	3- 4-85	193A-93	1	2-17-93

633-86	1	6- 2-86	89A-94	--	9-19-94
578-87	1	6-15-87	154-96	14	12-16-96

Sec. 14-231. Purpose.

The low impact industrial zone is intended to provide areas in which low impact industrial uses and limited other uses serving employees and residents of the surrounding neighborhood will be compatible with adjacent residential uses, will provide a buffer between residential neighborhoods and the I-M or I-H industrial zones, or will stand alone as a smaller scale industrial district.

The I-L zone is located adjacent to residential neighborhoods, business uses and other industrial uses where the low intensity nature of the uses, as well as their strict performance standards, will ensure the compatibility of the uses with other adjacent industrial and nonindustrial uses.

Performance standards for uses in the I-L zone are designed to maintain compatibility between low impact industrial uses and neighboring nonindustrial and industrial uses. Performance standards include full enclosure of uses and requirements for buffers and screening from adjacent properties.
(Ord. No. 164-97, § 6, 1-6-97; Ord. No. 149-10/11, 3-7-11)

Sec. 14-232. Permitted uses.

The following uses are permitted whether provided by private or public entities in the low impact industrial zone and the I-Lb zone:

(a) Low impact industrial uses, including, but not limited to, bakeries, breweries, bottling, printing and publishing, pharmaceuticals, machine shops, musical instruments, precision instruments, watchmakers, toys and sporting goods, wood products, jewelry, assembly of electrical components, tool and die shops and the packaging of food.

(b) Research and development.

(c) Indoor amusement and recreation centers.

(d) Plant and tree nurseries, including associated recycling activities.

(e) Lumber yards.

(f) Commercial kitchens or other food preparation, provided that the food is not prepared for service on the premises.

(g) Building contractors and outside storage of related construction equipment, provided that there shall be no outside storage of materials and supplies.

(h) Repair services, including all types of automotive repair.

(i) Day care facilities, provided that:

1. Proof of licensing with the Maine Department of Human Services is submitted to the city prior to issuance of a certificate of occupancy;

2. ***Off-street parking:*** off-street parking is required as provided in division 20 of this article;

3. Off-street loading shall be located in a safe location;

4. There shall be an on-site outdoor play area with seventy-five (75) feet of land area per child; and

5. The outdoor play area shall be fenced and screened with a landscaped buffer.

(j) Dairies.

(k) Dog training services, including but not limited to obedience, guide, and service training, but not including boarding or kennel services.

(l) Intermodal transportation facilities.

(m) Utility substations.

(n) Marinas.

(o) Distribution centers, warehouses and wholesale businesses under ten thousand (10,000) square feet in total building area, with no outside storage permitted.

(p) Back office uses.

(q) Accessory uses.

1. Incidental accessory uses.

2. In the Ilb zone, the following additional accessory uses shall also be permitted:

a. Makers' markets, including periodic, seasonal, or temporary sales of handcrafted and limited production products for final consumption, which may include prepared or raw foods, provided that:

i. Such slaes are located within a lawfully conforming principal permitted use;

ii. Such sales occupy an area no larger than 45% of the floor area devoted to the principal use;

iii. Such sales by any single vendor or group of vendors shall occur for no more than a total of 28 hours a week collectively;

iv. Such products are produced or permitted to be produced in the IL zone; and

v. Such products are sold by the producer of the product or their designee.

Such sales shall be subject to any other applicable city ordinances. Food trucks are exempt from the limitations contained in this provision, but are subject to Chapter 19 of the City Code and any regulations promulgated

pursuant thereto.

b. Temporary events associated with a principal use, such as concerts, lectures, exhibitions of the local production of handcrafted and limited production products, fundraisers, and other similar gatherings, provided that they occur no more than a total of 16 hours a week, subject to the performance standards of this zone and any other applicable city ordinances.

(r) Registered medical marijuana cultivation facilities.

(s) Neighborhood centers.

(t) Places of religious assembly, limited to facilities of 10,000 square feet or less.

(u) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(v) Street vendors licensed pursuant to Chapter 19.

(w) Studios for artists, photographers, and craftspeople, including but not limited to painters, sculptors, dancers, graphic artists, and musicians.

(Ord. No. 164-97, § 6, 1-6-97; Ord. No. 22-97, § 1, 7-7-97; Ord. No. 137-97, § 1, 11-3-97; Ord. No. 106-04/05,12-8-04 enacted as an emergency; Ord. No. 240-09/10, 6-21-10; Ord. No. 283-09/10, 7-19-10 emergency passage; Ord. No. 149-10/11, 3-7-11; Ord. No. 33-11/12, 1-18-12; Ord. No. 10-12/13, 7-16-12; Ord. No. 265-12/13, 7-15-13)

Sec. 14-232.1. Conditional uses.

The following use shall be permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses), and any special provisions, standards or requirements specified below:

(a) Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

1. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of

Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

2. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

3. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

4. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

5. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

6. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

7. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

8. A performance guarantee shall be required for

the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

(Ord. No. 29-09/10, 8-3-09, emergency passage)

Sec. 14-233. Prohibited uses.

Uses that are not expressly enumerated herein as permitted uses are prohibited. Those uses that are prohibited shall include, but are not limited to, the following:

(a) Residential uses.

(b) Retail trade and restaurants that are not accessory to a permitted use.

(c) Junk yards and scrap metal reprocessing and recycling.

(d) Amusement parks.

(e) Crematoriums.

(f) Mining and drilling operations.

(g) Refining of petroleum or its products, including tar distillation.

(h) Commercial petroleum storage yards.

(i) Commercial excavation of building or construction materials other than in the normal course of building or construction or site preparation.

(j) Distillation of bones; fat rendering; glue, soap, or fertilizer manufacture.

(k) Dumping, disposal, incineration, or reduction of garbage, sewage, offal, dead animals, or refuse.

(l) Stockyard or slaughtering of animals.

(m) Smelting of iron, copper, tin, zinc, or any other ore.

(n) Manufacture of primary chemicals.

(o) Manufacture of cement, lime, gypsum, or plaster of paris.

(p) Manufacture of bleaching powder, matches, paper, or rubber.

(q) Manufacture and storage of explosives or fireworks.

(r) Tanning, curing or storage of raw hides or skins.

(s) Coal distillation or coke ovens.

(t) Foundries.

(u) Creosote treatment.

(v) Drop forging.

(w) Steel mills or furnaces.

(x) Coal- or coke-fired kilns.

(y) Used tire storage.

(z) Outdoor sales or outdoor display.

(aa) Extraction of raw materials.

(bb) Concert halls or dance halls.

(cc) Banquet facilities.

(dd) Office uses other than back offices or offices that are accessory to a permitted use.

(Ord. No. 164-97, § 6, 1-6-97; Ord. No. 137-97, § 2, 11-3-97)

Sec. 14-234. Dimensional requirements.

(a) *Minimum lot size:* None.

(b) *Maximum impervious surface ratio:* I-L zone: Sixty-five

(65) percent. I-Lb zone: One hundred (100) percent.

(c) *Maximum building height:* Forty-five (45) feet.

(d) *Minimum side yards:* Principal and accessory structures in the I-L zone: Twenty-five (25) feet, except that the minimum side yard shall be forty (40) feet when the side property line abuts a residential zone. Principal and accessory structures in the I-Lb zone: None, except that the minimum side yard shall be twenty-five (25) feet when the side property line abuts a residential zone.

(e) *Minimum rear yards:* Principal and accessory structures in the I-L zone: Twenty-five (25) feet, except that the minimum rear yard shall be forty (40) feet when the rear property line abuts a residential zone. Principal and accessory structures in the I-Lb zone: None, except that the minimum rear yard shall be twenty-five (25) feet when the rear property line abuts a residential zone.

(f) *Minimum front yard:* Principal and accessory structures in the I-L zone: Twenty-five (25) feet. Principal and accessory structures in the I-Lb zone: None.

(g) *Minimum street frontage:* Sixty (60) feet.

(h) *Pavement setback from lot boundary:* Driveways, parking lots and other paved circulation areas: Fifteen (15) feet.
(Ord. No. 164-97, § 6, 1-6-97)

Sec. 14-235. Other requirements.

(a) Off-street parking shall meet the requirements of division 20 of this article.

(b) Off-street loading shall meet the requirements of division 21 of this article.

(c) Signs shall be subject to the provisions of division 22 of this article.

(d) *Shoreland and floodplain management regulations:* Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5 of this article.

(e) All uses shall be operated within a fully enclosed structure, except for those customarily operated in open air.

(f) Any storage of new materials, finished products, or related equipment must be suitably screened from the public way and from abutting properties by a solid fence at least five (5) feet in height, or by a solid evergreen planting strip.

(g) All waste shall be stored in covered containers that do not leak or otherwise permit liquids or solids to escape from the container.

(h) All food processing waste shall be stored within a completely enclosed structure and if not refrigerated shall be removed from the site in an enclosed container within forty-eight (48) hours of its generation. All enclosed and exterior food processing waste storage areas shall be cleaned and sanitized on a regular basis.

(i) Outdoor storage of refuse, debris, or material awaiting reuse shall be in an appropriate container or located within a designated, screened area.

(j) Any permitted outdoor storage of materials shall be done in such a manner as to prevent the breeding and harboring of insects or vermin, to prevent the transfer of such materials from the site by natural causes or forces and to contain fumes, dust, or other materials which constitute a fire hazard. This storage shall be accomplished within enclosed containers or by one (1) or more of the following methods: raising materials above ground, separating materials, preventing stagnant water, or by some other means. No outdoor storage shall be permitted in the required yard between the front of any building on the site and the street, except for storage for plant and tree nurseries.

(Ord. No. 164-97, § 6, 1-6-97)

Sec. 14-236. Performance standards.

Uses in the I-L and I-Lb zones shall comply with the following standards:

(a) *Noise:*

1. *Definitions:*

a. Tonal sounds are defined as sound waves usually perceived as a hum or whine because their instantaneous sound pressure varies essentially as a simple sinusoidal function of time.

b. Impulse sounds are defined as sound events characterized by brief excursions of sound pressure, each with a duration of less than one (1) second.

2. ***Measurement:*** Sound levels shall be measured with a sound level meter with a frequency weighting network manufactured according to standards prescribed by the American National Standards Institute (ANSI) or its successor body. Measurements shall be made at all major lot lines of the site, at a height of at least four (4) feet above the ground surface. In measuring sound levels under this section, sounds with a continuous duration of less than sixty (60) seconds shall be measured by the maximum reading on a sound level meter set to the A weighted scale and the fast meter response (L maxfast). Sounds with a continuous duration of sixty (60) seconds or more shall be measured on the basis of the energy average sound level over a period of sixty (60) seconds (LEQ_1).

3. ***Maximum permissible sound levels:*** The maximum permissible sound level of any continuous, regular or frequent source of sound produced by an activity shall be as follows:

a. Sixty (60) dBA between the hours of 7:00 a.m. and 10:00 p.m.

b. Fifty (50) dBA between the hours of 10:00 p.m. and 7:00 a.m., as measured at or within the boundaries of any residential zone.

In addition to the sound level standards established above, all uses located within this zone shall employ best practicable sound abatement techniques to prevent tonal sounds and impulse

sounds or, if such tonal and impulse sounds cannot be prevented, to minimize the impact of such sounds in residential zones.

4. *Exemptions:*

a. Noises created by construction and maintenance activities between 7:00 a.m. and 10:00 p.m. are exempt from the maximum permissible sound levels set forth in subsection (a)3 of this section. Construction activities on a site abutting any residential use between the hours of 10:00 p.m. of one (1) day and 7:00 a.m. of the following day shall not exceed fifty (50) dBA.

b. The following uses and activities shall also be exempt from the requirements of subsection (a)3 of this section:

i. The noises of safety signals, warning devices, emergency pressure relief valves, and any other emergency devices.

ii. Traffic noise on public roads or noise created by airplanes and railroads.

iii. Noise created by refuse and solid waste collection, provided that the activity is conducted between 6:00 a.m. and 7:00 p.m.

iv. Emergency construction or repair work by public utilities, at any hour.

v. Noise created by any recreational activities which are permitted by law and for which a license or permit has been granted by the city, including but not limited to parades, sporting events, and fireworks displays.

(b) *Electromagnetic interference:* There shall be no electromagnetic interference that adversely affects the operation of any equipment other than that belonging to the creator of such interference, or that does not

conform to the regulations of the Federal Communications Commission.

(c) ***Vibrations:*** Vibrations inherently and recurrently generated shall be imperceptible without instruments at lot boundaries.

(d) ***Glare, heat:*** Any use shall be in an enclosed structure in such a manner that glare and heat shall be imperceptible from neighboring properties.

(e) ***Discharge of toxic or noxious matter:*** All discharges of toxic or noxious matter shall be made in accordance with all applicable state and federal regulations.

(f) ***Odor:*** It shall be a violation of this chapter to create an odor nuisance.

1. ***Determination of odor nuisance:*** An odor nuisance shall be considered to exist when ten (10) confirmed complaints occur in an area within two (2) separate twenty-four-hour periods. The ten (10) confirmed complaints must originate from ten (10) different households in an area zoned residential or from ten (10) different individuals in a commercial or industrial facility. The building authority shall only respond to a complainant who confirms that the odor is detectable at the time of the actual complaint. In order to confirm a complaint, the building authority or its designee shall first determine that an odor is detectable in the area of the complaint. The building authority or its designee shall interview the complainant to verify that the detectable odor is in fact the odor that resulted in the complaint. If the complainant verifies the odor as the source of the complaint, then the building authority shall notify the owner or operator of the alleged odor source either in person or by telephone within one (1) working day, with a written confirmation within seven (7) working days of the complaint. In the event that the building authority is unable to contact the owner or operator of the alleged odor source in person or by telephone within one (1) working day, then the building authority shall send written

notice to the operator within seven (7) working days of the complaint.

In the event that ten (10) complaints are confirmed as set forth in subsection (1) in two (2) separate twenty-four-hour periods within a ninety-day period, the building authority shall cause a certified odor inspector to investigate any odor complaints received in the next thirty (30) days following the receipt of the tenth confirmed complaint from the second twenty-four-hour period. If the odors remain under the ambient intensity standard as established in this subsection for the next thirty (30) days, then a new odor nuisance must be established after that time in accordance with the requirements of this section. The certified odor inspector shall do the following in response to a complaint under this section:

a. Verify that an odor is detectable in the area of the complaint and confirm that it is the odor that resulted in the complaint;

b. Quantify the intensity of the odor on the eight-point n-butanol intensity scale as defined in regulations promulgated by the director of the planning authority to establish training and technical standards to support this section; and

c. Track the odor to its source.

When the certified odor inspector determines that a violation has occurred because an odor has exceeded the maximum ambient odor levels set forth in this section, the building authority shall notify the owner or operator either by telephone or in person of the violation within one (1) working day of the violation. The building authority shall confirm this notification in writing within seven (7) working days of this initial notice. In the event that the building authority is unable to contact the owner or operator by telephone or in person within the required time period, then it will send written notification within seven (7) working days

of the violation.

Upon receipt of the written notice of violation, the owner or operator of the odor source shall do the following:

a. Implement odor reduction procedures immediately upon notification by the building authority that the facility has violated this section wherever odor reduction can be achieved by operational or procedural changes at the facility;

b. Submit to the building authority, within thirty (30) days of the written notice of violation, an odor reduction plan which is designed to reduce ambient odors attributable to emissions from that source to the maximum allowable intensity for that zone. The plan shall include a detailed summary of the measures that the owner or operator will take to mitigate the community annoyance and estimated dates for completion of those measures. In the event that it will take longer than thirty (30) days to develop the odor reduction plan, the owner or operator of the facility shall submit within the thirty-day time period a schedule for the development of the odor reduction plan. The building authority shall review this plan to determine whether it will be adequate to resolve the odor nuisance in a reasonable time period; and

c. Implement the plan in accordance with the schedule approved by the building authority.

2. ***Ambient odor limits:*** The maximum ambient intensity standard for odors generated by uses located in the I-L zone shall not exceed the following levels when the odor is measured in the zone indicated:

4.0 in any industrial or business zone for odors resulting from any industrial use.

3.0 in any residential zone for odors resulting from any industrial use.

(g) ***Smoke:*** Discharges of smoke shall not exceed opacity percentage of forty (40) percent or number 2 on the Ringelmann chart.

(h) ***Emissions:*** All emissions shall be made in accordance with all applicable state and federal regulations.

(i) ***Radiation:*** Radiation at a site shall comply with all applicable state and federal regulations.

(j) ***Discharge into sewers:*** No discharge shall be permitted at any point into any private sewage disposal system, or stream, or into the ground of any materials in such a way or of such nature or temperature as to contaminate any water supply, or otherwise cause the emission of dangerous or objectionable elements, except in accordance with standards approved by the health authority or by the public works authority.

(k) ***Lighting:*** All lighting shall be designed and installed with cut-off fixtures to direct illumination onto the site and to prevent illumination from such fixtures on neighboring properties.

(Ord. No. 164-97, § 6, 1-6-97)

Sec. 14-237. thru 14-245. Reserved.

DIVISION 14. I-M, I-Ma AND I-Mb INDUSTRIAL ZONES*

***Editor's note—**Ord. No. 164-97, § 7, passed Jan. 6, 1997, repealed div. 14, §§ 14-246—14-251 of this article and enacted new provisions as herein set out. Formerly, such provisions pertained to the I-2 and I-2b industrial zones and derived from §§ 602.12.A—602.12.F of the 1968 Code as amended by Ord. No. 499-74, § 5, adopted Aug. 19, 1974; Ord. No. 334-76, §§ 2, 3, adopted Jul. 7, 1976; Ord. No. 234-88, adopted Feb. 1, 1988; Ord. No. 330-90, § 2, adopted May 7, 1990; Ord. No. 15-92, § 18, adopted Jun. 15, 1992; Ord. No. 193A-93, § 2, adopted Feb. 17, 1993; and Ord. No. 154-96, § 15, 12-16-96.

Sec. 14-246. Purpose.

The moderate impact industrial zones are intended to provide zones in areas of the city in which light and moderate impact industries and transportation-related uses will coexist.

The moderate impact industrial (I-M and I-Ma) zones are located on arterials or collectors. The I-Mb zones are similarly located on the peninsula. These locations provide for direct access onto arterials, thereby protecting residential neighborhoods from drive-through traffic.

The I-M, I-Ma and I-Mb industrial zones are intended to provide for larger industrial buildings and for the limited or controlled use of areas outside of structures for storage of materials and machinery. These facilities often require large volumes of imported materials and products which result in large volumes of shipping and receiving. Often uses may be highway-oriented and transportation-related, thus relying on citywide and regional transportation infrastructure.

Industrial uses in the moderate impact industrial zones may require separation from higher impact uses, which should be directed to the high impact industrial zone.
(Ord. No. 164-97, § 7, 1-6-97)

Sec. 14-247. Permitted uses.

The following uses are permitted whether provided by private or public entities in the I-M moderate impact industrial zone, the I-Ma and the I-Mb zone:

(a) Low impact industrial uses, including but not limited to bakeries, breweries, bottling, printing and publishing, pharmaceuticals, machine shops, musical instruments, precision instruments, watchmakers, toys and sporting goods, wood products, jewelry, assembly of electrical components, tool and die shops and the packaging of food.

(b) Research and development and back office uses.

(c) Building contractors and construction and engineering services.

(d) Wholesale trade.

(e) Warehousing and distribution facilities, including

outdoor storage.

(f) Intermodal transportation facilities and transportation terminals.

(g) Repair services, including all types of automotive repair services.

(h) Indoor amusement or recreational centers.

(i) Plant and tree nurseries, including associated recycling activities.

(j) Lumber yards.

(k) Commercial kitchens or other food preparation, provided that the food is not prepared for service on the premises.

(l) Recycling facilities, provided that all storage and recycling operations occur within a fully enclosed structure.

(m) Food and seafood processing for human consumption.

(n) Municipal or regional solid waste disposal facilities, provided that all disposal activities are carried out within an enclosed structure.

(o) Day care facilities, provided that:

1. Proof of licensing with the Maine Department of Human Services is submitted to the city prior to issuance of a certificate of occupancy;

2. ***Off-street parking***: Off-street parking is requird as provided in division 20 (off-street parking) of this article;

3. Off-street loading shall be located in a safe location;

4. There shall be an on-site outdoor play area with seventy-five (75) feet of land area per child; and

5. The outdoor play area shall be fenced and screened with a landscaped buffer.

(p) Dairies.

(q) Utility substations.

(r) Correctional prerelease facilities for up to twelve (12) persons, plus staff, serving a primary clientele of parolees or persons in correctional prerelease programs, provided that:

1. No correctional prerelease facility shall be located within one thousand (1,000) feet of another, as measured in a radius from the center of the lot;

2. Such facilities shall not be permitted in the I-Ma or I-Mb zones;

3. If a facility requires state or federal licensing, staffing of the facility shall be as required by such license. If a facility does not require state or federal licenses, there shall be a minimum of one (1) staff person for every ten (10) residents or fraction thereof; and

4. The facility shall provide twenty-four-hour supervision of program participants.

(s) Incidental accessory uses.

(t) General, business and professional offices.

(u) Storage lots for towed or impounded vehicles, provided that such lots are located at least 300 feet from any residential zone or existing conforming residential use. For the purposes of this section, "existing conforming residential use" does not include a legally nonconforming residential use as described in division 23 of this chapter.

(v) Registered medical marijuana cultivation facilities.

(w) Wind energy systems, as defined and allowed in Article X,

Alternative Energy.

(x) Street vendors licensed pursuant to Chapter 19.

(Ord. No. 164-97, § 7, 1-6-97; Ord. No. 137-97, § 3, 11-3-97; Substitute Ord. No. 72-01/02, § 1, 10-1-01; Ord. No. 97-06/07, 11-20-06; Ord. No. 240-09/10, 6-21-10; Ord. No. 283-09/10, 7-19-10 emergency passage; Ord. No. 33-11/12, 1-18-12; Ord. No. 10-12/13, 7-16-12)

Sec. 14-248. Performance based uses.

Uses not expressly permitted as provided in section 14-247 or expressly prohibited in section 14-249 may be permitted if they meet the following conditions and standards:

(a) The proposed development is consistent with the purposes of this zone.

(b) The proposed development is designed and operated so that it will prevent undue adverse environmental impacts, substantial diminution of the value or utility of neighboring structures, or significant hazards to the health or safety of neighboring residents by controlling noise levels, emissions, traffic, lighting, odor, and any other potential negative impacts of the proposal.

(Ord. No. 164-97, § 7, 1-6-97)

Sec. 14-248.1. Conditional uses.

The following use shall be permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses), and any special provisions, standards or requirements specified below:

(a) Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

1. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

2. Towers shall be constructed according to plans

and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

3. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

4. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

5. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

6. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

7. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

8. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents

to remove the facility at the end of the use period.

(b) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 29-09/10, 8-3-09, emergency passage; Ord. No. 33-11/12, 1-18-12)

Sec. 14-249. Prohibited uses.

Uses that are not expressly enumerated herein as permitted uses are prohibited. Those uses that are prohibited shall include, but are not limited to, the following:

(a) Residential uses.

(b) Retail trade that is not ancillary to a permitted use.

(c) Restaurant uses.

(d) Junk yards.

(e) Amusement parks.

(f) Crematoriums.

(g) Mining and drilling operations.

(h) Refining of petroleum or its products, including tar distillation.

(i) Petroleum tank farms.

(j) Commercial excavation of building or construction materials other than in the normal course of building or construction or site preparation.

(k) Distillation of bones; fat rendering; glue, soap, or fertilizer manufacture.

(l) Dumping, disposal, incineration, or reduction of garbage, sewage, offal, dead animals, or refuse.

(m) Stockyard or slaughtering of animals.

(n) Smelting of iron, copper, tin, zinc, or any other ore.

(o) Manufacture of primary chemicals.

(p) Manufacture of cement, lime, gypsum, or plaster of paris.

(q) Manufacture of bleaching powder, matches, paper, or rubber.

(r) Manufacture of explosives or fireworks. Bulk storage of explosives or fireworks is also prohibited unless such storage is done as an accessory use to a permitted use located on the same site and all required state and local permits have been acquired.

(s) Tanning, curing or storage of raw hides or skins.

(t) Coal distillation or coke ovens.

(u) Creosote treatment.

(v) Drop forging.

(w) Steel mills or furnaces.

(x) Coal- or coke-fired kilns.

(y) Used tire storage.

(z) Extraction of raw materials.

(aa) Concert halls or dance halls.

(bb) Banquet facilities.

(Ord. No. 164-97, § 7, 1-6-97; Ord. No. 137-97, § 4, 11-3-97; Substitute Ord. No. 72-01/02, § 2, 10-1-01)

Sec. 14-250. Dimensional requirements.

(a) *Minimum lot size:*

1. Correctional prerelease facilities: Ten thousand (10,000) square feet.

2. Other uses: None.

(b) ***Maximum impervious surface ratio:*** I-M and I-Ma zone: Seventy-five (75) percent. I-Mb zone: One hundred (100) percent.

(c) ***Maximum building height:*** I-M and I-Mb zones: Seventy-five (75) feet. I-Ma zone: Forty-five (45) feet.

(d) ***Minimum side yards:*** Principal and accessory structures in the I-M and the I-Ma zone: Each structure shall be set back one (1) foot from each side property line for each one (1) foot of building height, up to twenty-five (25) feet, except that the minimum side yard shall be thirty-five (35) feet when the side property line abuts a residential zone.

Principal and accessory structures in the I-Mb zone: None, except that the minimum side yard shall be twenty-five (25) feet when the side property line abuts a residential zone.

(e) ***Minimum rear yards:*** Principal and accessory structures in the I-M and I-Ma zone: Each structure shall be set back one (1) foot from the rear property line for each one (1) foot of building height, up to twenty-five (25) feet, except that the minimum rear yard shall be thirty-five (35) feet when the rear property line abuts a residential zone.

Principal and accessory structures in the I-Mb zone: None, except that the minimum rear yard shall be twenty-five (25) feet when the rear property line abuts a residential zone.

(f) ***Minimum front yard:*** Principal and accessory structures in the I-M and I-Ma zone: Each structure shall be set back one (1) foot from the front property line for each one (1) foot of building height.

Principal and accessory structures in the I-Mb zone: None.

(g) ***Minimum street frontage:*** Sixty (60) feet.

(h) ***Pavement setback from lot boundaries:*** Ten (10) feet.
(Ord. No. 164-97, § 7, 1-6-97)

Sec. 14-251. Other requirements.

(a) Off-street parking shall meet the requirements of division 20 of this article.

(b) Off-street loading shall meet the requirements of division 21 of this article.

(c) Signs shall be subject to the provisions of division 22 of this article.

(d) ***Shoreland and floodplain management regulations:*** Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5 of this article.

(e) All uses shall be operated within a fully enclosed structure, except for those customarily operated in open air.

(f) Any storage of new materials, finished products, or related equipment must be suitably screened from the public way and from abutting properties by a solid fence at least five (5) feet in height, or by a solid evergreen planting strip.

(g) All waste shall be stored in covered containers that do not leak or otherwise permit liquids or solids to escape from the container.

(h) All food processing waste shall be stored within a completely enclosed structure and if not refrigerated shall be removed from the site in an enclosed container within forty-eight (48) hours of its generation. All enclosed and exterior food processing waste storage areas shall be cleaned and sanitized on a regular basis.

(i) Outdoor storage of refuse, debris or previously used materials awaiting reuse shall be either in an appropriate container or located within a designated, screened area.

(j) Any permitted outdoor storage of materials shall be done in such a manner as to prevent the breeding and harboring of insects or vermin, to prevent the transfer of such materials from the site by natural causes or forces and to contain fumes, dust, or other materials which constitute a fire hazard. This storage shall be accomplished within enclosed containers or by one (1) or more of the following methods: raising materials above ground, separating materials, preventing stagnant water, or by some other means. No outdoor storage shall be permitted between the front of any building on the site and the street, except for storage for plant

and tree nurseries or lumber yards.
(Ord. No. 164-97, § 7, 1-6-97)

Sec. 14-252. Performance standards.

Uses in the I-M, I-Ma, and I-Mb zones shall meet the following standards:

(a) *Noise:*

1. *Definitions:*

a. Tonal sounds are defined as sound waves usually perceived as a hum or whine because their instantaneous sound pressure varies essentially as a simple sinusoidal function of time.

b. Impulse sounds are defined as sound events characterized by brief excursions of sound pressure, each with a duration of less than one (1) second.

2. *Measurement:* Sound levels shall be measured with a sound level meter with a frequency weighting network manufactured according to standards prescribed by the American National Standards Institute (ANSI) or its successor body. Measurements shall be made at all major lot lines of the site, at a height of at least four (4) feet above the ground surface. In measuring sound levels under this section, sounds with a continuous duration of less than sixty (60) seconds shall be measured by the maximum reading on a sound level meter set to the A weighted scale and the fast meter response (L maxfast). Sounds with a continuous duration of sixty (60) seconds or more shall be measured on the basis of the energy average sound level over a period of sixty (60) seconds (LEQ_1).

3. *Maximum permissible sound levels:* The maximum permissible sound level of any continuous, regular or frequent source of sound produced by an activity shall be as follows:

a. Seventy (70) dBA between the hours of 7:00 a.m. and 10:00 p.m.

b. Fifty-five (55) dBA between the hours of 10:00 p.m. and 7:00 a.m., as measured at or within the boundaries of any residential zone.

In addition to the sound level standards established above, all uses located within this zone shall employ best practicable sound abatement techniques to prevent tonal sounds and impulse sounds or, if such tonal and impulse sounds cannot be prevented, to minimize the impact of such sounds in residential zones.

4. *Exemptions:*

a. Noises created by construction and maintenance activities between 7:00 a.m. and 10:00 p.m. are exempt from the maximum permissible sound levels set forth in subsection (d)3 of this section. Construction activities on a site abutting any residential use between the hours of 10:00 p.m. of one (1) day and 7:00 a.m. of the following day shall not exceed fifty (50) dBA.

b. The following uses and activities shall also be exempt from the requirements of subsection (d)3 of this section:

i. The noises of safety signals, warning devices, emergency pressure relief valves, and any other emergency devices.

ii. Traffic noise on public roads or noise created by airplanes and railroads.

iii. Noise created by refuse and solid waste collection, provided that the activity is conducted between 6:00 a.m. and 7:00 p.m.

iv. Emergency construction or repair work by public utilities, at any hour.

v. Noise created by any recreational activities which are permitted by law and for which a license or permit has been granted by the city, including but not limited to parades, sporting events, and fireworks displays.

(b) ***Electromagnetic interference:*** There shall be no electromagnetic interference that adversely affects the operation of any equipment other than that belonging to the creator of such interference, or that does not conform to the regulations of the Federal Communications Commission.

(c) ***Vibrations:*** Any use creating earthshaking vibrations shall be controlled in such a manner as to prevent transmission beyond lot lines of vibrations causing a displacement of .003 or greater on one (1) inch, as measured by a vibrograph or similar instrument at the property boundaries.

(d) ***Glare, heat:*** Any use shall be in an enclosed structure in such a manner that glare and heat shall be imperceptible from neighboring properties.

(e) ***Discharge of toxic or noxious matter:*** All discharges of toxic or noxious matter shall be made in accordance with all applicable state and federal regulations.

(f) ***Odor:*** It shall be a violation of this chapter to create an odor nuisance.

1. ***Determination of odor nuisance:*** An odor nuisance shall be considered to exist when ten (10) confirmed complaints occur in an area within two (2) separate twenty-four-hour periods. The ten (10) confirmed complaints must originate from ten (10) different households in an area zoned residential or from ten (10) different individuals in a commercial or industrial facility. The building authority shall only respond to a complainant who confirms that the odor is detectable at the time of the actual complaint. In order to confirm a complaint, the building authority or its designee

shall first determine that an odor is detectable in the area of the complaint. The building authority or its designee shall interview the complainant to verify that the detectable odor is in fact the odor that resulted in the complaint. If the complainant verifies the odor as the source of the complaint, then the building authority shall notify the owner or operator of the alleged odor source either in person or by telephone within one (1) working day, with a written confirmation within seven (7) working days of the complaint. In the event that the building authority is unable to contact the owner or operator of the alleged odor source in person or by telephone within one (1) working day, then the building authority shall send written notice to the operator within seven (7) working days of the complaint.

In the event that ten (10) complaints are confirmed as set forth in subsection (1) in two (2) separate twenty-four-hour periods within a ninety-day period, the building authority shall cause a certified odor inspector to investigate any odor complaints received in the next thirty (30) days following the receipt of the tenth confirmed complaint from the second twenty-four-hour period. If the odors remain under the ambient intensity standard as established in this subsection for the next thirty (30) days, then a new odor nuisance must be established after that time in accordance with the requirements of this section. The certified odor inspector shall do the following in response to a complaint under this section:

a. Verify that an odor is detectable in the area of the complaint and confirm that it is the odor that resulted in the complaint;

b. Quantify the intensity of the odor on the eight-point n-butanol intensity scale as defined in regulations promulgated by the director of the planning authority to establish training and technical standards to support this section; and

c. Track the odor to its source.

When the certified odor inspector determines that a violation has occurred because an odor has exceeded the maximum ambient odor levels set forth in this section, the building authority shall notify the owner or operator either by telephone or in person of the violation within one (1) working day of the violation. The building authority shall confirm this notification in writing within seven (7) working days of this initial notice. In the event that the building authority is unable to contact the owner or operator by telephone or in person within the required time period, then it will send written notification within seven (7) working days of the violation.

Upon receipt of the written notice of violation, the owner or operator of the odor source shall do the following:

a. Implement odor reduction procedures immediately upon notification by the building authority that the facility has violated this section wherever odor reduction can be achieved by operational or procedural changes at the facility;

b. Submit to the building authority, within thirty (30) days of the written notice of violation, an odor reduction plan which is designed to reduce ambient odors attributable to emissions from that source to the maximum allowable intensity for that zone. The plan shall include a detailed summary of the measures that the owner or operator will take to mitigate the community annoyance and estimated dates for completion of those measures. In the event that it will take longer than thirty (30) days to develop the odor reduction plan, the owner or operator of the facility shall submit within the thirty-day time period a schedule for the development of the odor reduction plan. The building authority shall review this plan to

determine whether it will be adequate to resolve the odor nuisance in a reasonable time period; and

c. Implement the plan in accordance with the schedule approved by the building authority.

2. ***Ambient odor limits:*** The maximum ambient intensity standard for odors generated by uses located in the I-M zones shall not exceed the following levels when the odor is measured in the zone indicated:

4.0 in any industrial or business zone for odors resulting from any industrial use.

3.0 in any residential zone for odors resulting from any industrial use.

(g) ***Smoke:*** Discharges of smoke shall not exceed opacity percentage of forty (40) percent or number 2 on the Ringelmann chart.

(h) ***Emissions:*** All emissions shall be made in accordance with all applicable state and federal regulations.

(i) ***Radiation:*** Radiation at a site shall comply with all applicable state and federal regulations.

(j) ***Discharge into sewers:*** No discharge shall be permitted at any point into any private sewage disposal system, or stream, or into the ground of any materials in such a way or of such nature or temperature as to contaminate any water supply, or otherwise cause the emission of dangerous or objectionable elements, except in accordance with standards approved by the health authority or by the public works authority.

(k) ***Lighting:*** All lighting shall be designed and installed with cut-off fixtures to direct illumination onto the site and to prevent illumination from such fixtures on neighboring properties.

(l) ***Traffic:*** Development in the I-M, I-Ma and I-Mb zones shall utilize to the greatest extent possible arterial streets as delineated on the Maine Department of

Transportation Map, a copy of which is on file in the Department of Planning and Urban Development.

(Ord. No. 164-97, § 7, 1-6-97)

Sec. 14-253 - Sec. 14-260. Reserved.

DIVISION 15. I-H AND I-Hb INDUSTRIAL ZONES*

***Editor's note—**Ord. No. 164-97, § 8, passed Jan. 6, 1997, repealed div. 15, §§ 14-261—14-266 of this article and enacted new provisions as herein set out. Formerly, such provisions pertained to the I-3 and I-3b industrial zones and derived from §§ 602.13.A—602.13.F of the 1968 Code as amended by Ord. No. 499-74, § 5, adopted Aug. 19, 1974; Ord. No. 334-76, §§ 4—6, adopted Jul. 7, 1976; Ord. No. 198-88, adopted Nov. 21, 1988; Ord. No. 201-88, adopted Nov. 21, 1988; Ord. No. 330-90, § 3, adopted May 7, 1990; Ord. No. 15-92, § 19, adopted Jun. 15, 1992; and Ord. No. 193A-93, §§ 3, 4, adopted Feb. 17, 1993.

Sec. 14-261. Purpose.

The high impact industrial zones are intended to provide areas suitable for higher impact industrial uses than are permitted in other industrial zones and other uses including hospital campuses that are capable of demonstrating, through design, layout and topography, their compatibility with, or non-intrusion on, existing or future higher impact industrial uses on adjacent or neighboring I-H zoned properties.

Due to the intensity of use, the I-H zones are intended for uses which may require extensive outdoor storage and usage and may utilize heavy equipment. Processes may require separation from residential or sensitive environmental areas. The I-H zones are separated from other nonindustrial uses as well as natural or constructed features.

High impact industrial uses will be of a higher intensity, with a greater lot coverage, than the other zones. Due to the intensity of uses, the performance standards will allow for the higher intensity of use.

(Ord. No. 164-97, § 8, 1-6-97; Ord. No. 106-01/02, § 1, 12-3-01)

Sec. 14-262. Permitted uses.

The following uses are permitted whether provided by private or public entities in the high impact industrial zone and the I-Hb

zone:

(a) Low impact industrial uses, including but not limited to bakeries, breweries, bottling, printing and publishing, pharmaceuticals, machine shops, musical instruments, precision instruments, watchmakers, toys and sporting goods, wood products, jewelry, assembly of electrical components, tool and die shops and the packaging of food.

(b) Research and development.

(c) Wholesale trade.

(d) Warehousing and distribution facilities.

(e) Intermodal transportation facilities and transportation terminals.

(f) Repair services, including all types of automotive repair services.

(g) High impact industrial uses.

(h) Building contractors and construction services.

(i) Plant and tree nurseries, including associated recycling activities.

(j) Lumber yards.

(k) Fish waste processing facility, provided that it has received all required licenses and is in compliance with all applicable licensing requirements.

(l) Commercial kitchens or other food preparation, provided that the food is not prepared for service on the premises.

(m) Recycling facilities.

(n) Food and seafood processing.

(o) Dairies.

(p) Municipal or regional solid waste disposal facilities,

provided that all disposal activities are carried out within an enclosed structure.

(q) Utility substations.

(r) Correctional prerelease facilities for up to twelve (12) persons, plus staff, serving a primary clientele of parolees or persons in correctional prerelease programs, provided that:

1. No correctional prerelease facility shall be located within one thousand (1,000) feet of another, as measured in a radius from the center of the lot;

2. Such facilities shall not be permitted in the I-Hb zone;

3. If a facility requires a state or federal license, staffing of the facility shall be as required by such license. If a facility does not require state or federal licenses, there shall be a minimum of one (1) staff person for every ten (10) residents or fraction thereof; and

4. The facility shall provide twenty-four-hour supervision of program participants.

(s) Storage lots for towed or impounded vehicles.

(t) Registered medical marijuana cultivation facilities.

(u) wind energy systems, as defined and allowed in Article X, Alternative Energy.

(v) Street vendors licensed pursuant to Chapter 19.

(Ord. No. 164-97, § 8, 1-6-97; Ord. No. 137-97, § 5, 11-3-97; Ord. No. 97-06/07, 11-20-06; Ord. No. 283-09/10, 7-19-10 emergency passage; Ord. No. 33-11/12, 1-18-12; Ord.No. 10-12/13, 7-16-12)

Sec. 14-262.1. Conditional uses.

The following use shall be permitted only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses), and any special provisions, standards or

requirements specified below:

(a) Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

1. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

2. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

3. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

4. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

5. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

6. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

7. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

8. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

(b) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 29-09/10, 8-3-09, emergency passage)

Sec. 14-263. Prohibited uses.

Uses that are not expressly enumerated herein as permitted uses are prohibited. Those uses that are prohibited shall include, but are not limited to, the following:

(a) Junk yards.

(b) Amusement parks.

(c) Refining of petroleum or its products, including tar distillation.

(d) Distillation of bones; fat rendering; glue, soap, or fertilizer manufacture, except that fish waste processing may be permitted as set forth in section 14-262.

(e) Dumping, disposal, incineration, or reduction of garbage, sewage, offal, dead animals, or refuse.

(f) Stockyard or slaughtering of animals.

(g) Smelting of iron, copper, tin, zinc, or any other ore.

(h) Manufacture of explosives or fireworks.

(i) Coal distillation or coke ovens.

(j) Creosote treatment.

(k) Drop forging.

(l) Steel mills or furnaces.

(m) Coal- or coke-fired kilns.

(n) Used tire storage.

(o) Extraction of raw materials.

(p) Concert halls or dance halls.

(q) Banquet facilities.

(Ord. No. 164-97, § 8, 1-6-97; Ord. No. 137-97, § 6, 11-3-97; Ord. No. 106-01/02, § 2, 12-3-01)

Sec. 14-264. Contract or conditional zoning.

A conditional or contract rezoning shall only be approved if, after public hearing and opportunity for public comment, the reviewing body finds that the applicant has carried the burden of proof to show that the proposed development meets the following standards:

(a) The proposed development is consistent with the comprehensive plan.

(b) The proposed development is consistent with the purposes of this zone.

(c) The proposed development is designed and operated so that it will prevent undue adverse environmental impacts, substantial diminution of the value or utility of neighboring structures, or significant hazards to the health or safety of neighboring residents by controlling noise levels, emissions, traffic, lighting, odors, and any other potential negative impacts of the proposal.

(d) All plans must include complete information of processes, materials or methods of storage to be used by the development and shall specify how hazardous impacts to neighboring properties will be prevented.

(Ord. No. 164-97, § 8, 1-6-97)

Sec. 14-265. Dimensional requirements.

(a) *Minimum lot size:*

1. Correctional prerelease facilities: Ten thousand (10,000) square feet.

2. Other uses: None.

(b) *Maximum impervious surface ratio:* I-H zone: Eighty-five (85) percent. I-Hb zone: One hundred (100) percent.

(c) *Maximum building height:* Seventy-five (75) feet.

(d) *Minimum side yards:* Principal and accessory structures in the I-H zone: Thirty-five (35) feet. Principal and accessory structures in the I-Hb zone: None.

(e) *Minimum rear yards:* Principal and accessory structures in the I-H zone: Thirty-five (35) feet. Principal and accessory structures in the I-Hb zone: None.

(f) *Minimum front yard:* Principal and accessory structures in the I-H zone: Twenty-five (25) feet. Principal and accessory structures in the I-Hb zone: None.

(g) *Minimum street frontage:* Sixty (60) feet.

(h) *Pavement setback from lot boundaries:* Ten (10) feet.

(Ord. No. 164-97, § 8, 1-6-97)

Sec. 14-266. Other requirements.

(a) Off-street parking shall meet the requirements of division 20 of this article.

(b) Off-street loading shall meet the requirements of division 21 of this article.

(c) Signs shall be subject to the provisions of division 22 of this article.

(d) ***Shoreland and floodplain management regulations:*** Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5 of this article.

(e) All uses shall be operated within a fully enclosed structure, except for those customarily operated in open air.

(f) Any storage of new materials, finished products, or related equipment must be suitably screened from the public way and from abutting nonindustrial use properties by a solid fence at least five (5) feet in height, or by a solid evergreen planting strip.

(g) All waste shall be stored in covered containers that do not leak or otherwise permit liquids or solids to escape from the container.

(h) All food processing waste shall be stored within a completely enclosed structure and if not refrigerated shall be removed from the site in an enclosed container within forty-eight (48) hours of its generation. All enclosed and exterior food processing waste storage areas shall be cleaned and sanitized on a regular basis.

(i) Outdoor storage of refuse, debris or material awaiting reuse shall be in an appropriate container or located within a designated, screened area.

(j) Any permitted outdoor storage of materials shall be done in such a manner as to prevent the breeding and harboring of insects or vermin, to prevent the transfer of such materials from the site by natural causes or forces and to contain fumes, dust, or other materials which constitute a fire hazard. This storage shall be accomplished within enclosed containers or by one (1) or more of the following methods: raising materials above ground, separating materials, preventing stagnant water, or by some other means. No outdoor storage shall be permitted between the front of any building on the site and the street, except for storage for plant and tree nurseries or lumber yards.

(Ord. No. 164-97, § 8, 1-6-97)

Sec. 14-267. Performance standards.

Uses in the I-H and I-Hb zones shall meet the following standards:

(a) *Required landscaping:* Where a front yard abuts an arterial or a major collector street, it shall be landscaped. Rear yards, side yards and the perimeter of any parking area for greater than fifteen (15) vehicles shall be landscaped if visible from a street, public open space or residential zone.

(b) *Noise:*

1. *Definitions:*

a. Tonal sounds are defined as sound waves usually perceived as a hum or whine because their instantaneous sound pressure varies essentially as a simple sinusoidal function of time.

b. Impulse sounds are defined as sound events characterized by brief excursions of sound pressure, each with a duration of less than one (1) second.

2. *Measurement:* Sound levels shall be measured with a sound level meter with a frequency weighting network manufactured according to standards prescribed by the American National Standards Institute (ANSI) or its successor body. Measurements shall be made at all major lot lines of the site, at a height of at least four (4) feet above the ground surface. In measuring sound levels under this section, sounds with a continuous duration of less than sixty (60) seconds shall be measured by the maximum reading on a sound level meter set to the A weighted scale and the fast meter response (L maxfast). Sounds with a continuous duration of sixty (60) seconds or more shall be measured on the basis of the energy average sound level over a period of sixty (60) seconds (LEQ_1).

3. *Maximum permissible sound levels:* The maximum permissible sound level of any continuous, regular or frequent source of sound produced by an activity shall be as follows:

   a. Seventy-five (75) dBA between the hours of 7:00 a.m. and 10:00 p.m.

   b. Fifty-five (55) dBA between the hours of 10:00 p.m. and 7:00 a.m., as measured at or within the boundaries of any residential zone.

   In addition to the sound level standards established above, all uses located within this zone shall employ best practicable sound abatement techniques to prevent tonal sounds and impulse sounds or, if such tonal and impulse sounds cannot be prevented, to minimize the impact of such sounds in residential zones.

4. *Exemptions:*

   a. Noises created by construction and maintenance activities between 7:00 a.m. and 10:00 p.m. are exempt from the maximum permissible sound levels set forth in subsection (a)3 of this section. Construction activities on a site abutting any residential use between the hours of 10:00 p.m. of one (1) day and 7:00 a.m. of the following day shall not exceed fifty (50) dBA.

   b. The following uses and activities shall also be exempt from the requirements of subsection (a)3 of this section:

      i. The noises of safety signals, warning devices, emergency pressure relief valves, and any other emergency devices.

      ii. Traffic noise on public roads or noise created by airplanes and railroads.

      iii. Noise created by refuse and solid waste

collection, provided that the activity is conducted between 6:00 a.m. and 7:00 p.m.

iv. Emergency construction or repair work by public utilities, at any hour.

v. Noise created by any recreational activities which are permitted by law and for which a license or permit has been granted by the city, including but not limited to parades, sporting events, and fireworks displays.

(b) ***Electromagnetic interference:*** There shall be no electromagnetic interference that adversely affects the operation of any equipment other than that belonging to the creator of such interference, or that does not conform to the regulations of the Federal Communications Commission.

(c) ***Vibrations:*** Any use creating earthshaking vibrations shall be controlled in such a manner as to prevent transmission beyond lot lines of vibrations causing a displacement of .003 or greater on one (1) inch, as measured by a vibrograph or similar instrument at the property boundaries.

(d) ***Glare, heat:*** Any use shall be in an enclosed structure in such a manner that glare and heat shall be imperceptible from neighboring properties.

(e) ***Discharge of toxic or noxious matter:*** All discharges of toxic or noxious matter shall be made in accordance with all applicable state and federal regulations.

(f) ***Odor:*** It shall be a violation of this chapter to create an odor nuisance.

1. ***Determination of odor nuisance:*** An odor nuisance shall be considered to exist when ten (10) confirmed complaints occur in an area within two (2) separate twenty-four-hour periods. The ten (10) confirmed complaints must originate from ten (10) different households in an area zoned residential or from ten (10) different individuals in a

commercial or industrial facility. The building authority shall only respond to a complainant who confirms that the odor is detectable at the time of the actual complaint. In order to confirm a complaint, the building authority or its designee shall first determine that an odor is detectable in the area of the complaint. The building authority or its designee shall interview the complainant to verify that the detectable odor is in fact the odor that resulted in the complaint. If the complainant verifies the odor as the source of the complaint, then the building authority shall notify the owner or operator of the alleged odor source either in person or by telephone within one (1) working day, with a written confirmation within seven (7) working days of the complaint. In the event that the building authority is unable to contact the owner or operator of the alleged odor source in person or by telephone within one (1) working day, then the building authority shall send written notice to the operator within seven (7) working days of the complaint.

In the event that ten (10) complaints are confirmed as set forth in subsection (a) in two (2) separate twenty-four-hour periods within a ninety-day period, the building authority shall cause a certified odor inspector to investigate any odor complaints received in the next thirty (30) days following the receipt of the tenth confirmed complaint from the second twenty-four-hour period. If the odors remain under the ambient intensity standard as established in this subsection for the next thirty (30) days, then a new odor nuisance must be established after that time in accordance with the requirements of this section. The certified odor inspector shall do the following in response to a complaint under this section:

a. Verify that an odor is detectable in the area of the complaint and confirm that it is the odor that resulted in the complaint;

b. Quantify the intensity of the odor on the eight-point n-butanol intensity scale as

defined in regulations promulgated by the director of the planning authority to establish training and technical standards to support this section; and

c. Track the odor to its source.

When the certified odor inspector determines that a violation has occurred because an odor has exceeded the maximum ambient odor levels set forth in this section, the building authority shall notify the owner or operator either by telephone or in person of the violation within one (1) working day of the violation. The building authority shall confirm this notification in writing within seven (7) working days of this initial notice. In the event that the building authority is unable to contact the owner or operator by telephone or in person within the required time period, then it will send written notification within seven (7) working days of the violation.

Upon receipt of the written notice of violation, the owner or operator of the odor source shall do the following:

a. Implement odor reduction procedures immediately upon notification by the building authority that the facility has violated this section wherever odor reduction can be achieved by operational or procedural changes at the facility;

b. Submit to the building authority, within thirty (30) days of the written notice of violation, an odor reduction plan which is designed to reduce ambient odors attributable to emissions from that source to the maximum allowable intensity for that zone. The plan shall include a detailed summary of the measures that the owner or operator will take to mitigate the community annoyance and estimated dates for completion of those measures. In the event that it will take longer than thirty (30) days to develop the

odor reduction plan, the owner or operator of the facility shall submit within the thirty-day time period a schedule for the development of the odor reduction plan. The building authority shall review this plan to determine whether it will be adequate to resolve the odor nuisance in a reasonable time period; and

c. Implement the plan in accordance with the schedule approved by the building authority.

2. ***Ambient odor limits:*** The maximum ambient intensity standard for odors generated by uses located in the I-H zones shall not exceed the following levels when the odor is measured in the zone indicated:

4.0 in any industrial or business zone for odors resulting from any industrial use.

3.0 in any residential zone for odors resulting from any industrial use.

(g) ***Smoke:*** Discharges of smoke shall not exceed opacity percentage of forty (40) percent or number 2 on the Ringelmann chart.

(h) ***Emissions:*** All emissions shall be made in accordance with all applicable state and federal regulations.

(i) ***Radiation:*** Radiation at a site shall comply with all applicable state and federal regulations.

(j) ***Discharge into sewers:*** No discharge shall be permitted at any point into any private sewage disposal system, or stream, or into the ground of any materials in such a way or of such nature or temperature as to contaminate any water supply, or otherwise cause the emission of dangerous or objectionable elements, except in accordance with standards approved by the health authority or by the public works authority.

(k) ***Lighting:*** All lighting shall be designed and installed with cut-off fixtures to direct illumination onto the site and to prevent illumination from such fixtures on

neighboring properties.
(Ord. No. 164-97, § 8, 1-6-97)

DIVISION 15.1. B-6 EASTERN WATERFRONT MIXED ZONE

Sec. 14-268. Purpose.

The purpose of the B-6, eastern waterfront mixed zone is to establish a zoning district for the upland portion of the eastern waterfront area. The B-6 zone encourages this district to acquire a distinctly urban from through development that emphasizes a quality pedestrian experience, promotes public transit, and demonstrates exemplary urban design. The zone promotes a range of uses to achieve twenty-four urban vitality and shared use of parking infrastructure as recommended in the eastern waterfront master plan for redevelopment.

The zone language established herein provides regulatory framework to promote the mixed-use development pattern envisioned for urban land on Portland's peninsula. Specific development criteria, including building height overlays and design standards, may be established for this district to supplement the provisions of this section. District-specific design standards and overlay maps can be found at the city planning and development office.
(Ord No. 80-04/05, 12-8-04)

Sec. 14-269. Permitted uses.

The following uses are permitted in the B-6 zone:

(a) *Commercial:*

1. Professional, business and general offices;

2. Restaurants and other eating and drinking establishments;

3. Hotels and inns limited to no more than 150 rooms;

4. Craft and specialty shops, including the on-premises production of handcrafted goods;

5. Retail and retail service establishments, excluding those with gas pumps;

6. Theatres;

7. Banking services, excluding vehicular drive-up services;

Editor's Note: Drive-up banking facilities located in the interior of parking structures are allowed as a conditional use subject to the criteria outlined below in the conditional use provisions of this section.

---

8. Cabinet and carpentry shops;

9. Personal services;

10. Business services;

11. Offices of business trades people;

12. Miscellaneous repair services, excluding all types of automotive repair except for automobile repair and service establishments;

13. Telecommunication and broadcast and receiving facilities, except as prohibited in section 14-271 (prohibited uses);

    In addition, building mounted telecommunications antennas, discs, transmitting and receiving equipment and the like shall adhere to the following criteria. Such roof-mounted equipment shall be:

    a. No taller than 15 feet above the highest structural steel of the building roof; and

    b. Set back no less than 15 feet from the building perimeter; and

    c. Integrated into the architecture of the building in placement, form, color, and material so as to screen or camouflage such equipment from public view.

14. Brew pubs and microbreweries without associated bottling facilities; and brewpubs and microbreweries with associated bottling facilities limited to 5,000 bottles per year output.

15. Electronic data storage;

16. Marine products wholesaling and retailing;

17. Harbor and marine supplies and services, chandlery and ship supply;

18. Bakeries, coffee roasters, and commercial kitchens with building footprints limited to fifteen thousand (15,000) square feet of contiguous building space.

19. Printing establishments.

(b) *Residential:*

1. Attached dwellings including row houses, two-family and multifamily dwellings;

2. Handicapped family units;

3. Combined living/working spaces, including but not limited to artist residences with studio space;

4. Mixed use residential and commercial structures.

(c) *Public:*

1. Utility substations, including sewage collection and pumping stations, water pumping stations, transformer stations, telephone electronic equipment enclosures and other similar structures;

2. Landscaped pedestrian parks, plazas and other similar outdoor pedestrian spaces;

3. Pedestrian and multi-use trails;

(d) *Other:*

1. Studios for artists, photographers and craftspeople including but not limited to, painters, sculptors, dancers, graphic artists and musicians;

2. Accessory uses customarily incidental and subordinate to the location, function and operation of permitted uses, except that parking lots shall not be considered a permitted accessory use and such parking is subject to the conditional use section of the B-6 zone.

3. Health clubs, martial arts and mediation facilities.

4. Intermodal transportation facilities.

5. Nursery schools, kindergartens, and daycare facilities or home babysitting services.

(e) Wind energy systems, as defined and allowed in Article X, Altenrative Energy.

(Ord. No. 33-11/12, 1-18-12)

Sec. 14-270. Conditional uses.

(a) The following uses shall be permitted as conditional uses in the B-6 zone as provided in 14-474 (conditional uses), provided that, notwithstanding section 14-474(a) or any other provision of this code, the planning board shall be substituted for the board of appeals as the reviewing authority:

(1) *Commercial:*

a. Meeting and exhibition facilities limited to a total of 20,000 gross square feet of interior floor area.

b. Wholesaling, providing the wholesale operation is associated with an onsite retail establishment and that the wholesaling component of the facility occupies a building footprint of less

than 15,000 square feet.

c. Drive-up banking facilities located in the interior of parking structures, subject to the following criteria:

i. All drive-up features, such as automated teller machines and service windows, shall not extend nearer than twenty-five (25) feet to the street line;

ii. The site must have adequate stacking capacity for vehicles waiting to use these service features without impeding vehicular or pedestrian circulation or creating hazards to vehicular or pedestrian circulation on adjoining streets;

iii. Drive-up vehicle circulation shall not create an impediment for retail or mixed-use development for the first floor of the subject garages along any adjacent public streets.

d. Research and development and related production facilities, including but not limited to biotechnology, subject to the following conditions:

i. Associated manufacturing and warehousing uses combined are not to exceed 15,000 square feet.

ii. Biotechnology facilities must demonstrate approvals by all applicable regulatory authorities prior to commencement of operations.

(2) *Parking:*

a. All surface parking lots shall meet the applicable conditions outlined below.

Editor's note: These conditions promote parking development in a manner that creates an urban street form with streetscapes dominated by

buildings, not surface parking. This code recognizes that many parcels will develop incrementally over time and a phased approach may be needed to fully achieve the goals of this provision.
---

i. No surface parking lot shall be encumbered by lease or other use commitment exceeding a twenty-four month term.

ii. Any such parking shall in its lease stipulate that developer/owner reserves the right to relocate said parking (to a parking structure) or convert surface parking to structured parking as long as the replacement parking is located a reasonable distance from the associated use.

iii. Surface lots shall be laid out in a manner conducive to development of future buildings, and/or structured parking.

b. All structured parking, including multi-level parking garages shall meet the applicable conditions outlined below.

i. Parking garages shall incorporate first floor retail space or other mixed use (an active use other than parking) along all street frontages unless the applicant requests from the planning board a waiver of this provision subject to the following criteria:

ii. Waivers: the planning board may waive the requirement for first floor mixed use upon demonstration that the project meets one or more of the criteria listed under provisions a, b, and c below.

Where the board allows a waiver of first floor mixed use, garages shall display architecture that enhances the pedestrian experience and disguises the parking use to the extent possible.

Editor's note: Use of traditional storefront design concepts and

traditional building materials is encouraged. Developers should look to the eastern waterfront design guidelines for additional direction in meeting these standards.

Standards for waiving first floor mixed use:

a. That the applicant demonstrates that steepness of grade or the character of the adjacent street will not support retail or first-floor mixed use in the foreseeable future.

b. That the first floor of the garage is set back a minimum of ***35 feet*** from the street right of way and its design does not provide an impediment for development of such space for mixed use in the future. Such space (between the garage and the street) shall, in the interim, not be used for surface parking.

c. Where the applicant can demonstrate to the satisfaction of the Planning Board that a market for first floor mixed uses currently does not exist, the Planning Board may grant a waiver of this condition, provided that the structure of the garage is designed to accommodate retail and or mixed uses in the future.

The Planning Board will need to find that on the street level deck of a proposed parking garage a minimum of twenty (20) feet horizontal distance of depth from the street and nine (9) feet finished floor to finished ceiling clearance could in future house retail and or mixed use. The applicant will further need to demonstrate that the garage design anticipates the future development of utilities and circulation necessary for non-parking uses.

Where a parking garage fronts on more than one public street and where there is a existing change in grade elevation of over 5% across the footprint of the garage, the nine foot floor to ceiling requirement of this section only applies to the primary (higher traffic volume) street.

(b) The following use shall be permitted only upon the issuance of a conditional use permit subject to the provisions of section 14-474 (conditional uses), and any special provisions, standards or requirements specified below:

(1) Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

(Ord. No. 80-04/05, 12-8-04; Ord No.200-04/05, 4-4-05; Ord. No. 29-09/10, 8-3-09, emergency passage)

Sec. 14-271. Prohibited uses.

Uses, which are not enumerated as permitted or conditional uses in the B-6 zone are prohibited. Those uses that are prohibited shall include, without limitation:

(a) Ground-mounted telecommunication towers, antennas, discs, transmitting and receiving equipment and the like;

(b) Waste, scrap, and/or byproduct storage and processing facilities;

(c) Major or minor auto service stations including all types of automotive repair;

(d) Drive-up facilities, except banking drive-up services in the interior parking structures, as allowed in the conditional use section 14-270.

Sec. 14-272. Dimensional requirements.

In addition to the provisions of article III, division 25 of this Code, lots in the B-6 Eastern Waterfront Business Zone shall meet the following requirements:

(a) *Minimum lot size:* None.

(b) *Minimum frontage:* None.

(c) *Yard dimensions:*

1. Minimum yards in the B-6 zone:

Front setback: None required except as provided in 3. below:

Side setback: None required.

Rear setback: None required.

2. Maximum building setback from street line except for parking garages, public transportation facilities and provided in 3. below: 10 feet.

a. For lots fronting on more than one street, the setback can be increased more than ten (10) feet if all of the following conditions are met:

i. The increased setback occurs at the intersection of the streets;

ii. The increased setback area is the primary pedestrian entrance to the building;

iii. Seventy-five (75) percent of the total building wall length facing the abutting

streets shall be setback no greater than ten (10) feet; and

iv. All building wall segments, which make up the increased setback shall be included in the calculation of the total building wall length noted in subsection iii above.

In addition, for any new construction on a lot abutting three or more streets, the maximum setback shall apply only to the two most major streets. (For purposes of this section, major street shall mean that street with the highest traffic volume or the greatest street width in comparison with the remaining streets).

3. View Corridors and Key Street Wall Development

Not withstanding sections 1. and 2. above, new structures located in the blocks located south of Fore Street and north of Commercial Street and its extension, shall build to the key building envelops shown on the ***Eastern Waterfront Building Height Overlay Map***. Parking structures and the buildings for public transportation facilities may, however, set back beyond the key building envelopes (toward the interior of blocks), but may not occupy the land between the key building envelope and the street right of way.

(d) ***Minimum length of building wall required to be located along street frontage of lot.***

i. 70% of lot street frontage; or

ii. 25% of building perimeter,

iii. For buildings fronting on two or more streets, the minimum building wall on one street may be decreased so long as the frontage is proportionally increased on other streets in so far that the building wall on the secondary street is not reduced to less than 25 feet.

(e) ***Maximum lot coverage:*** One hundred (100) percent.

(f) ***Maximum building height***: 65 feet, or as otherwise governed by a Building Height Overlay map (for example, in the Eastern Waterfront). Building Height Overlay maps are found in the Planning and Development Department Office.

(g) Minimum building height: No new construction of any building shall have less than three (3) floors of habitable space above the average adjacent grade within twenty five (25) feet of any public street.

This provision shall not apply to:

i. Parking attendant booths,

ii. Information kiosks and ticketing booths,

iii. Parking garages,

iv. Public transportation facilities,

v. Additions to buildings existing as of December 8, 2004 provided that the cumulative additions since December 8, 2004 does not exceed 25% of the building footprint on December 8, 2004 except that such restriction shall not apply to those portions of the building addition that are constructed closer to the street line than the building footprint existing as of December 8, 2004,

vi. Buildings or building additions of less than 2,000 square feet footprint, on lots or available building sites of less than 2,000 square feet,

vii. Utility substations, including sewage collection and pumping stations, water pumping stations, transformer stations, telephone electronic equipment enclosures and other similar structures, and

viii. Additions to and/or relocations of designated

historic structures.

Sec. 14-273. Performance standards.

All new development in the B-6 Eastern Waterfront Business Zone shall comply with the following standards:

(a) *Storage:* Any storage of new materials, finished products, or related equipment must be suitably screened from the public way and from abutting properties by a solid fence at least five (6) feet in height. All waste shall be stored in covered containers that do not leak or otherwise permit liquids or solids to escape from the container. All food processing waste shall be stored within a completely enclosed structure and if not refrigerated shall be removed from the site in an enclosed container within forty-eight (48) hours of its generation. All enclosed and exterior areas shall be cleaned and sanitized on a regular basis. Outdoor storage of refuse or debris shall be in an appropriate container or located within a designated, screened area.

(b) *Noise:*

1. *Definitions:*

a. Tonal sounds are defined as sound waves usually perceived as a hum or whine because their instantaneous sound pressure varies essentially as a simple sinusoidal function of time.

b. Impulse sounds are defined as sound events characterized by brief excursions of sound pressure, each with duration of less than one (1) second.

2. *Measurement:* Sound levels shall be measured with a sound level meter with a frequency weighting network manufactured according to standards prescribed by the American National Standards Institute (ANSI) or its successor body. Measurements shall be made at all major lot lines of the site, at a height of at least four (4) feet above the ground surface. In measuring sound levels

under this section, sounds with a continuous duration of less than sixty (60) seconds shall be measured by the maximum reading on a sound level meter set to the A weighted scale and the fast meter response (L maxfast). Sounds with a continuous duration of sixty (60) seconds or more shall be measured on the basis of the energy average sound level over a period of sixty (60) seconds (LEQ_1).

3. *Maximum permissible sound levels:* The maximum permissible sound level of any continuous, regular or frequent source of sound produced by an activity shall be as follows:

   a. Sixty (60) dBA between the hours of 7:00 a.m. and 10:00 p.m.

   b. Fifty (50) dBA between the hours of 10:00 p.m. and 7:00 a.m., as measured at or within the boundaries of any residential zone.

   In addition to the sound level standards established above, all uses located within this zone shall employ best practicable sound abatement techniques to prevent tonal sounds and impulse sounds or, if such tonal and impulse sounds cannot be prevented, to minimize the impact of such sounds in residential zones.

4. *Exemptions:*

   a. Noises created by construction and maintenance activities between 7:00 a.m. and 10:00 p.m. are exempt from the maximum permissible sound levels set forth in subsection (a)3 of this section. Construction activities on a site abutting any residential use between the hours of 10:00 p.m. of one (1) day and 7:00 a.m. of the following day shall not exceed fifty (50) dBA.

   b. The following uses and activities shall also be exempt from the requirements of subsection (a)3 of this section:

i. The noises of safety signals, warning devices, emergency pressure relief valves, and any other emergency devices.

ii. Traffic noise on public roads or noise created by airplanes and railroads.

iii. Noise created by refuse and solid waste collection, provided that the activity is conducted between 6:00 a.m. and 7:00 p.m.

iv. Emergency construction or repair work by public utilities, at any hour.

v. Noise created by any recreational activities which are permitted by law and for which a license or permit has been granted by the city, including but not limited to parades, sporting events, and fireworks displays.

(c) ***Vibration:*** Vibration inherently and recurrently generated shall be imperceptible without instruments at lot boundaries.

(d) ***Federal and state environmental regulations:*** All uses shall comply with federal and state environmental statutes and regulations regarding emissions into the air, except where provisions of this Code are more stringent.

(e) ***Storage of vehicles:*** Outdoor storage of any unregistered automotive vehicle on the premises for more than ten (10) days, and outdoor storage of any used automotive tires on the premises shall not be permitted.

(f) ***Off-street parking and loading:*** Off street parking is required as provided in division 20 (off-street parking) of this article. Division 21 (off-street loading) of this article shall not apply.

(g) ***Shoreland and flood plain management regulations:*** Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of

division 26 and/or division 26.5.

(h) ***Glare, radiation or fumes:*** Glare, radiation or fumes shall not be emitted to an obnoxious or dangerous degree beyond lot boundaries.

(i) ***Enclosure of uses:*** All uses shall be operated within a fully enclosed structure, except for those customarily operated in open air.

(j) ***Materials or wastes:*** Any permitted outdoor storage of materials shall be done in such a manner as to prevent the breeding and harboring of insects or vermin, to prevent the transfer of such materials from the site by natural causes or forces and to contain fumes, dust, or other materials which constitute a fire hazard. This storage shall be accomplished within enclosed containers or by one (1) or more of the following methods: raising materials above ground, separating materials, preventing stagnant water, or by some other means. Any areas used for permitted outdoor storage of materials shall be screened from view of any adjoining properties and public rights-of-way. No outdoor storage shall be permitted between the front of any building on the site and the street.

(k) ***Odor:*** Uses in the B-6 zone shall adhere to the odor regulations of the IL zone.

(l) ***Smoke:*** Discharges of smoke shall not exceed opacity percentage of forty (40) percent or number 2 on the ringelman chart.

(m) ***Discharge into sewers:*** No discharge shall be permitted at any point into any private sewage disposal system, or surface drain, or into the ground, of any materials in such a way or of such nature or temperature as to contaminate any water supply, or the harbor, or otherwise cause the emission of dangerous or objectionable elements, except in accordance with standards approved by the health authority or by the public works authority.

(n) ***Lighting:*** All lighting shall be designed and installed with cut-off fixtures to direct illumination onto the site and to prevent illumination from such fixtures on

neighboring properties and as otherwise governed by the site lighting standards of the City of Portland Techncial Manual.

(Ord. No. 80-04/05, 12-8-04; Ord. NO. 240-09/10, 6-21-10; ORd. No. 278-09/10, 7-19-10)

DIVISIONS 16. WAYNFLETE SCHOOL OVERLAY ZONE*

Editor's note—Ord. No. 164-97, § 9, passed Jan. 6, 1997, repealed divs. 16 and 17 of this article, which pertained to the I-4 industrial zone and the I-P industrial park zone, respectively. Formerly, such divisions consisted of substantive §§ 14-276—14-282, 14-291—14-297 and derived from 602.13B.A—602.13B.F, 602.13B.H, 602.10A.A—602.10A.E and 602.10A.H of the 1968 Code as amended by Ord. No. 536-74, § 2, adopted Aug. 19, 1974; Ord. No. 334-76, §§ 6, 7, adopted Jul. 7, 1976; Ord. No. 159-87, adopted Nov. 2, 1987; Ord. No. 235-88, adopted Feb. 1, 1988; Ord. No. 330-90, §§ 4, 5, adopted May 7, 1990; Ord. No. 15-92, §§ 20, 21, adopted Jun. 15, 1992; and Ord. No. 193A-93, § 5, adopted Feb. 17, 1993; pursuant to Order 138-09/10 passed on 1/20/10 Division 16 (Waynflete School Overlay Zone) was adopted in its entirety.

Sec. 14-276. Purpose.

The intention of this division is to establish an overlay zone which protects the value and integrity of established residential neighborhoods, establishes clearly defined boundaries beyond which residential conversions cannot occur and results in no net loss of dwelling units, while allowing Waynflete School, an existing private day school, to continue and reasonably augment its existing uses and programs, thereby maintaining compatible development at medium densities appropriate to the existing neighborhood patterns. As used in this division, the term "Waynflete School" includes any successor institution that operates as a private day school.

(Ord. No. 138 – 09/10, 1-20-10)

Sec. 14-276.1. Location and applicability of Waynfete School Overlay Zone.

The Waynflete School Overlay Zone, as shown on the zoning map, is intended to encompass and define Waynflete School's principal campus on the Portland peninsula. Properties in the Waynflete School Overlay Zone shall continue to be governed by the regulations applicable to the underlying zoning districts except as specifically modified by this division.

(Ord. No. 138-09/10, 1-20-10)

Sec. 14-276.2. Overlay Zone sub-districts.

The Waynflete School Overlay Zone consists of two sub-districts, as shown on the Waynflete School Overlay Zone sub-district map, incorporated herein by reference, as follows:

(a) The Campus Core sub-district defines the interior core of the campus and is intended to allow compact development of school uses, with specific space and bulk regualtions designed to accommodate school uses.

(b) The Campus Edge sub-district is intended to preserve residential character along the streets bordering the campus, by limiting the amount of residential space which can be converted to school uses, by maintaining a nmber of dwelling units within the sub-district which equals the number of dwelling units existing in the sub-district at the time of enactment of this Overlay Zone and by encouraging mixed use building s along the street frontages. The space and bulk regulations of the R-4 district continue to apply within the Campus Edge sub-district.

Except where otherwise specified in this division, all provisions of this Waynflete School Overlay Zone apply in both sub-districts.
(Ord. No. 138-09/10, 1-20-10)

Sec. 14-276.3. Permitted uses.

In addition to the permitted uses allowed in the underlying zoning districts and notwithstanding anything to the contrary I nthe use regulations for the underlying zoning districts, the following uses are permitted uses in the Waynflete School Overlay Zone.

(a) *School uses.* Elementary, middle and secondary school uses including, but not limited to, the following:

1. Classrooms;

2. Laboratory facilities;

3. Dining halls;

4. Auditoriums;

5. Concert halls;

6. Lecture halls;

7. Gymnasiums;

8. Libraries;

9. Outdoor use areas, such as "quads", greens, parks, gardens, art installations, and other active and passive recreation spaces;

10. Parking lots;

11. Parking structures;

12. Community meeting spaces;

13. Administrative offices;

14. Faculty offices;

15. Transporation facilities;

16. Maintenance facilities;

17. Utility buildings;

18. Student health services;

19. Bookstores;

20. Accessory uses which are customarily incidental and subordinate to the location, function and operation of a private day school.

(b) *Residential uses.*

1. Faculty or staff housing, which shall be considered a residential use, and not a school use, for all purposes under this overlay zone.

(Ord. No. 138-09/10, 1-20-10)

Sec. 14-276.4. Prohibited uses.

(a) Boarding schools;

(b) Dormitories.

(Ord. No. 138-09/10, 1-20-10)

Sec. 14-276.5. Residential conversions prohibited.

(a) Conversions of existing residential buildings within the Waynflete School Overlay zone shall be prohibited.

(b) The existing houses at 11 Fletcher Street, 3 Storer Street, 305 Danforth Street and 299 Danforth Street shall not be relocated from their locations existing as of January 20, 2010. This provision shall not apply to garages.

(c) At no time shall the number of dwelling units within the Waynflete School Overlay Zone be reduced below the four (the number existing at the time of enactment of this Overlay Zone).

(Ord. No. 138-09/10, 1-20-10)

Sec. 14-276.6. Dimenional requirements.

Buildings and structures in the Waynflete School Overlay zone shall be subject to the applicable dimensional requirements of the underlying zoning districts, except as follows:

(a) *Minimum yard dimensions* shall be the same as in the underlying zone, except that side and rear yards shall not be required between buildings on contiguous lots owned or occupied by Waynflete School on the condition that such contiguous lots shall be considered merged and shall not be separately conveyed unless required yard dimensions in the underlying zones are provided.

(b) *Minimum street frontage* shall be the same as in the underlying zone, except that all the land within the Waynflete School Overlay Zone owned or occupied by Waynflete School shall be considered a single lot for the purpose of complying with minimum street frontage.

(c) *Maximum coverage by buildings* shall be the same as I nteh underlying zone, except that in the Campus Core sub-district the maximum coverage by buildings shall be 40% and al lthe land within the Campus Core sub-district

owned or occupied by Waynflete School shall be considered a single lot for the purpose of calculating maximum coverage by buildings.

(Ord. No. 138-09/10, 1-20-10)

Sec. 14-276.7. Parking.

The amount of parking required for an ychange of use, new building or building addition within the zone shall be determined during site plan reviewe, based on an analysis of school-wide demand and supply, pursuant to a comprehensive school-wide Transportation Demand Management Plan (TDM), and treating all land owned by Waynflete School within the Waynflete School Overlay Zone as one lot. An yexisting parking management or TDM plan approved as part of a previous approval shall remain in effect until revised or updated pursuant to this section. In determining the amount of parking required for any building within the Waynflete School Overlay Zone, the Planning Authority or the Planning Board may take into account such factors as:

(a) The use of centrally located on-campus parking facilities so situated that students, faculty, staff and visitors arriving on campus can reasonably be expected to park in the central facilities and walk to their various on-campus destinations during th course of a school day.

(b) Shared use of a single parking facility by two or more buildings when the peak parking demand periods for such buildings do not overlap.

(c) Development and implementation of a parking management plan which discourages on-stsreet parking.

(d) Development and implementation of a TDM plan subject to the review and approval of the planning authority or the planning board. The TDM plan shall employe elements such as public transit initiatives, parking cash-out, car sharing, car and van pooling incentives, provision of bicycle and pedestrian commuting accommodations, guaranteed ride home programs, employee surveys, newsletters and alternative transportation information sharing and other such strategies that reduce signle occupancy vehicle trips to and from Waynflete school. Waynflete School shall follow the standards and guidelines for developing a TDM plan found in the TDM

section of the City of Portlnad Technical and Design Standards and Guidelines.

(Ord. No. 138-09/10, 1-20-10)

14-276.8. Loading.

The requiremetns of section 14-351 shall not apply to buildings within the Waynflete School Overlay one. Instead, the amount of locading area required for any building within the zone shall be determined by the planning board during site plan review, based on a campus-wide analysis, treating all land owned by Waynflete School within the Waynflete School Overlay Zone as one lot. In determining the amount of loading space required for any building within the Waynflete School Overlay zone, the planning board may take into account such factors as:

(a) The use of centrally located on-campus loading facilities so situated that vehicles making deliveries can load and unload in central facilities, provided no single location is overburdened with loading facilities.

(b) Shared use of a single loading facility by two or more buildings.

(c) Impacts of the loading area on adjacent uses outside the Waynflete School Overlay Zone.

(Ord. No. 138-09/10, 1-20-10)

Sec. 14-276.9. Signage.

Signs shall comply with the requirements of Division 22.

(Ord. No. 138-09/10, 1-20-10)

Sec. 14-276.10. Restrictions outside the Waynflete School Overlay Zone.

Notwithstanding the provisions of section 14-103(b)(1) or section 14-137(b)(1), Waynflete School cannot locate a school use listed in section 14-276.3(a) on any lot in the R-4 or R-6 Districgts outside the boundaries of the Waynflete School Overlay Zone that was occupied by a residential use or structure on or after January 20, 2010. This restriction does not prevent Waynflete School from seeking a conditional use permit for a school use, where otherwise allowed by the zoning district regulations, on lots outside the Waynflete School Overlay Zone that were not occupied by a residential use or structure on or after January 20,

2010.

DIVISION 17. B-7 MIXED DEVELOPMENT DISTRICT ZONE

Sec. 14-294. Purpose.

The purpose of the B-7, mixed development district zone is to establish a zoning district for urban areas in which the city has adopted master plans for redevelopment. Certain districts, including but not limited to bayside, lie at the perimeter of the established downtown and contain significant redevelopment opportunities. The B-7 zone encourages these districts to acquire a distinctly urban form through dense development featuring a mix of uses such as housing, retail, offices, research and development, and artisan studios and that emphasizes a quality pedestrian experience, promotes public transit, and demonstrates exemplary urban design. Utilization of transportation, other than the automobile is strongly encouraged and is advanced by the installation of bicycle amenities, such as bicycle racks and storage areas. The zone promotes a wide range of uses in high quality structures and public open spaces to achieve twenty-four (24) hour urban vitality and shared parking infrastructure.

The following regulatory framework is intended to promote the mixed-use development pattern envisioned on Portland's peninsula. District-specific design standards and overlay maps

can be found at the city planning and development office.
(Ord. No. 201-05/06, 4-19-06)

Sec. 14-295. Permitted uses.

The following uses are permitted in the B-7 zone:

(a) *Commercial:*

1. Professional, business, and general offices:

2. Restaurants and other eating and drinking establishments;

3. Hotels, inns, and bed and breakfasts;

4. Craft and specialty shops, including the on-premises production of handcrafted goods;

5. Retail and retail service establishments, excluding those with fuel pumps;

6. Theaters, concert halls, dance halls,meeting facilities, and exhibition halls;

7. Banking services, excluding vehicular drive-up services (see also conditional use section, [c][3];

8. Cabinetry and carpentry and mill working shops;

9. Indoor amusement and recreation centers;

10. Personal services;

11. Business services;

12. Billiard parlors;

13. Offices of business trades-people;

14. Miscellaneous repair services, excluding all types of automotive repair.

15. Telecommunication and broadcast and receiving facilities, except as prohibited in section 14-297

(prohibited uses);

In addition, building mounted telecommunications antennae, discs, transmitting and receiving equipment and the like shall adhere to the following criteria. Such roof-mounted equipment shall be:

a. No taller than fifteen (15) feet above the highest structural steel of the building roof; and
