b. Set back no less than fifteen (15) feet from the building perimeter; and

c. Integrated into the architecture of the building as described in the City of Portland Design Manual.

16. Brew pubs and microbreweries without associated bottling facilities, and brewpubs and microbreweries with associated bottling facilities limited to five-thousand (5,000) bottles per year output;

17. Studios for performance or training in dance, music, or similar pursuits;

18. Electronic data storage;

19. Research and development including laboratories;

20. Studios for artists, photographers and craftspeople including but not limited to, painters, sculptors, cabinet makers, dancers, graphic artists, and silk screeners and musicians;

21. Health clubs, martial arts personal health and wellness facilities;

22. Registered medical marijuana dispensaries.

23. Hostels, provided the applicant submits a site plan and operations plan demonstrating compliance with the following conditions:

a. All applicable provisions of Article V of this chapter shall be met.

b. Parking shall be provided in compliance with Division 20 of this Article.

c. No unaccompanied minors under the age of eighteen (18) shall be permitted in the facility.

d. The length of stay for transient guests shall not exceed fifteen (15) days out of any sixty-day period.

e. The building shall meet the applicable occupant load requirements as defined by the International Building Code and the NFPA Life Safety Code, as such codes are amended or adopted by the city.

24. Surface parking existing as of March 9, 2005 and in continuous existence thereafter, including the reorganization of parking spaces and maneuvering aisles. This section shall apply to surface parking accessory to a principle use and a parking lot as a principal use. Existing surface parking that does not comply with the standards of sec. 14-299 (f) may continue, provided that any modifications to the site layout, development constituting a site plan, or building renovations exceeding a value of thirty (30) percent of the assessed value of the building on file at the City of Portland Assessor's Office, shall require the parking to be upgraded to meet the standards of sec. 14-299 (f) to the extent practicable.

25. Surface parking created after March 9, 2005, provided that the spaces (and newly created maneuvering aisles) are thirty-five (35) feet or greater from a street and further that the standards below (a to c) are also met. This section shall apply to surface parking accessory to a principal use or a parking lot as principle use. The thirty-five (35) foot setback need not apply

in the case of a property in which eighty (80%) of the property frontage has a building within ten (10) feet of the property frontage and or a driveway located perpendicular to the site. The parking area shall meet the standards of sec. 14-299 (f).

a. No surface parking shall be encumbered by lease or other use commitment to an off-site use exceeding twenty-four month term; and

b. For surface parking areas of twenty- thousand (20,000) square feet or greater in area, lease or other use agreements for surface parking shall not preclude the relocation of such parking for more than twenty-four (24) month terms; and

c. Any such parking shall in its lease stipulate that developer/owner reserves the right to relocate said parking or convert surface parking to structured parking as long as the replacement parking is located a reasonable distance from the associated use.

(b) ***Residential:***

1. Attached housing including row houses, condominiums, two-family and multifamily dwellings but not planned residential unit developments;

2. Handicapped family units;

3. Lodging houses;

4. Combined living/working spaces, including but not limited to artist residences with studio space;

(c) ***Public:***

1. Utility substations, including wastewater collection and pumping stations, transformer stations, telephone electronic equipment enclosures, electric transmission and distribution substations and other similar structures, provided

such facilities occupies up to one-hundred (100) square feet (see also conditional use section);

2. Museums, art galleries, and educational exhibition space;

3. Landscaped pedestrian parks, plazas and other similar outdoor pedestrian spaces;

4. Pedestrian and multi-use trails;

5. Emergency or safety facilities;

6. Municipal offices;

7. Active recreation parks and facilities, including but not limited to ball fields, skateboard parks, and basketball courts.

(d) *Institutional:*

1. Public or private schools;

2. Medical and mental health clinics but not methadone or other controlled substance addiction treatment centers;

3. Places of assembly;

4. Colleges, universities, or trade schools;

5. Governmental buildings and uses;

6. Nursery and pre-schools, kindergartens, and child day care facilities or home babysitting services;

7. Educational, research, and laboratory facilities;

8. Adult day care center.

(e) *Other:*

1. Accessory uses customarily incidental and subordinate to the location, function and operation of permitted uses. All drive-up services for all

retail or drive-up repair facilities are prohibited except that bank drive-up services, where permitted, area conditional use.

2. Intermodal transportation facilities.

3. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 201-05/06, 4-19-06; Ord. No. 283-09/10, 7-19-10 emergency passage; Ord. No. 278-09/10, 7-19-10; Ord. No. 149-10/11, 3-7-11; Ord. No. 240-10/11, 6-6-11; Ord. No. 279-09/10, 6-6-11; Ord. No. 33-11/12, 1-18-12; Ord. No. 113-11/12, 2-22-12)

Sec. 14-296. Conditional uses.

(a) The following uses shall be permitted as conditional uses in the B-7 zone as provided in section 14-474 (conditional uses), provided that, notwithstanding section 14-474 (a) or any other provision of this code, the planning board shall be substituted for the board of appeals as the reviewing authority:

1. *Commercial use:*

a. Meeting, convention and exhibition halls limited to a total of twenty-five thousand (25,000) gross square feet of interior floor area.

b. Wholesaling, providing that the wholesale operation is associated with an onsite retail establishment and that the wholesaling component of the facility occupies a building gross floor area of less than fifteen thousand (15,000) square feet.

c. Drive-up banking provided that:

i. The drive-up is accessory to a banking service occupying a minimum floor area of four thousand (4,000) square feet; and

ii. The drive-up is attached to or included within a building with a minimum floor area of twenty thousand (20,000) square feet; and

iii. All drive-up features, such as automated teller machines and service windows, shall not extend nearer than twenty-five (25) feet to

the street right-of-way line; and

iv. The site must have adequate stacking capacity for vehicles waiting to use these service features without impeding vehicular or pedestrian circulation or creating hazards to vehicular or pedestrian circulation on adjoining streets; and

v. Drive-up vehicle circulation shall not be located between the building and any adjacent public streets; and

vi. The drive-up shall be limited to two vehicle drive-up lanes; and

vii. The location of any drive-up shall be limited to the geographic area between Somerset Street/I-295/Franklin Arterial/Forest Avenue.

d. The expansion of automotive repair facilities existing as of March 9, 2005, but in no case shall such expansion over the life of the building exceed fifty percent (50%) of the gross floor area existing on March 9, 2005.

2. *Industrial uses:*

a. High technology manufacturing of biotechnology, pharmaceutical, and nanotechnology products, including accessory warehousing, provided that:

i. A minimum of one-third of the total square footage devoted to manufacturing is conducted in a laboratory environment, in a controlled environment with specialized air handling systems that exceed levels for pressurization and filtration found in office environments and traditional manufacturing facilities; and

ii. Rooftop equipment shall be integrated into the overall building design and shall be screened as necessary; and

iii. Where warehousing cannot be located on the

same lot because the land area is too small to accommodate the warehousing on the same lot, one remote warehouse may be located within six-hundred (600) feet of the principle use referenced above.

b. Breweries including associated bottling activities;

c. Bakeries, coffee roasters, and commercial kitchens having no retail sales within the principal structure;

d. Printing and publishing establishments having no retail sales within the principal structure;

e. Machine and tool and die shops;

All industrial uses listed above must also conform to the following additional requirements. Where redundant or contradictory performance standards exist, the more restrictive standard applies:

a. Glare, radiation, fumes, noise or smoke shall not be emitted to an obnoxious or dangerous degree beyond lot boundaries; and

b. The building footprint devoted to industrial use shall not exceed fifteen thousand (15,000) square feet of contiguous building space except for uses contained in 14-296(2)(a); and

c. The use shall be operated within a completely enclosed structure; and

d. No materials or wastes shall be stored outside; and

e. Truck loading and access shall be located in the rear or side yard where possible; and

f. Industrial uses shall conform to the performance standards of the I-L zone; and

g. Industrial uses shall conform to the B-7 mixed development district design standards.

3. *Structured parking provided that:*

a. Parking structures located in the B-7 zone shall adhere to the following conditions:

i. The first floor of any parking structure shall contain one or more permitted uses (not conditional uses) found in §14-295 along all primary street frontages (excluding frontage dedicated to entrances, lobbies, and stair towers). Such first floor space shall be provided with a minimum of nine (9) foot floor to ceiling clearance height and a minimum twenty-five (25) foot depth (measured from the exterior building wall); or

ii. The parking structures shall be set back at least thirty-five (35) feet from the primary street right-of-way. The land located between the parking structure and the street right-of-way may not be occupied by surface parking, and shall be designated for future use development. Such land between the garage and the street shall not by lease or other prohibition be encumbered against future development. The land shall be provided with all stubbed utilities and other provisions needed to accommodate further development; or

iii. The parking structures shall be designed with a façade (to a height of the first two floors) that enhances the pedestrian experience as described in the City of Portland B-7 bayside design standards.

4. *Utility substations including wastewater collection and pumping stations, water pumping stations, transfer stations, telephone electronic equipment enclosures, electrical transmission and distribution substations and similar structures larger than one-hundred (100) square feet of floor area are permitted provided the following standards are met:*

a. Notwithstanding sec. 14-298 (maximum setback) utility substations shall be setback no less than

thirty-five (35) feet from the street right-of-way except in the case of a lot having frontage on Marginal Way and I-295 provided the minimum thirty-five (35) foot setback is met along Marginal Way; and

b. The applicant demonstrates that the structure is as small in size as practicable; and

c. The remainder of the lot not consumed by the utility substation and its related access; and shall be designed and designated for future development; and

d. The substation equipment is fully enclosed within a structure.

5. *Buildings in the bayside gateway urban height district A greater than one-hundred twenty-five (125) feet but no more than one-hundred sixty-five (165) feet in height provided that:*

a. Such buildings shall be sited to minimize encroachment into designated view corridors and visual landmarks to and from the downtown or that do not substantially further obstruct such corridors blocked by existing development as referenced in the Bayside Height Study Map and the B-7 design standards; and

b. Portions of such buildings higher than one hundred twenty-five (125) feet shall be stepped back at upper levels to provide light and air to adjacent streets, trails, and open spaces, with a ratio of no less than at least to the extent that the ratio of building height to width of adjacent streets, trails and open spaces is equivalent to 1.5 to 1 except that the Planning Board may modify this requirement as provided for in Section 14-526(d)(9)(viii); and

c. Such buildings provide publicly accessible and usable open space, meeting the B-7 urban design standards, of at least ten (10) percent of the building lot area; and

d. If located on lots including or adjacent to planned or proposed street or pedestrian way connections, land dedication to such street or connection shall be credited toward the ten (10) percent open space requirement. Buildings over one hundred and twenty-five (125) feet in height that are being reviewed as separate phases of a Master Development plan shall be entitled to meet the ten (10%) percent open space requirement of Section 14-296(a)(5)(c) in aggregate for all such buildings over one hundred and twnty-five (125) feet in height, provided that the open space shall not fall below ten (10%) percent at any built phase or combination of built phases; and

e. Such development shall comply with all other zoning requirement and B-7 urban design standards as required by this article.

(b) The following use shall be permitted only upon the issuance of a conditional use permit subject to the provisions of section 14-474 (conditional uses), and any special provisions, standards or requirements specified below:

1. Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times

the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

2. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 201-05/06, 4-19-06; Ord. 29-09/10, 8-3-09, emergency passage; Ord. No. 240-10/11, 6-6-11; Ord. No. 33-11/12, 1-18-12; Ord. No. 175-12/13, 4-22-

Sec. 14-297. Prohibited uses.

Uses which are not enumerated as permitted or conditional uses in the B-7 zone are prohibited. Prohibited uses include, without limitation:

(a) Ground-mounted telecommunication towers, antennas, discs, transmitting and receiving equipment and the like;

(b) Waste, scrap, and/or byproduct storage and processing facilities;

(c) Major or minor auto service stations including all types of automotive repair except that automotive repair facilities existing as of March 9, 2005 are permitted;

(d) Drive-up facilities, except banking drive-up services, as allowed in the conditional use section 14-296.

(e) Major telecommunication substations over five-thousand (5000) square feet.

(Ord. No. 201-05/06, 4-19-06)

Sec. 14-298. Dimensional requirements.

In addition to the provisions of article III, division 25 of this code, lots in the B-7 mixed use urban district zone shall meet the following requirements:

(a) *Minimum lot size:* None.

(b) *Minimum frontage:* None.

(c) *Yard dimensions:*

1. Minimum yards in the B-7 zone:

Front setback: None required except as provided in 2 below.

Side setback: Non required.

Rear setback: None required.

2. *Maximum street setback:* Parking structures, public transportation facilities, utility substations, secondary building components such as truck loading docks, mechanical equipment enclosures and refrigeration units are not subject to the maximum setbacks contained herein. The following maximum street setbacks shall otherwise apply in the B-7 zone:

   a. Ten (10) feet. The setback can be increased more than ten (10) feet if all of the conditions below are met:

      i. Seventy-five (75) percent of the total building wall length of an individual building facing the abutting streets is setback no greater than ten (10) feet; and

      ii. The increased setback area shall include a functional and accessible public pedestrian entrance into the building that faces the street unless a public pedestrian entrance already exists along the same street; and

      iii. The increased setback is not used for surface parking.

   b. For a corner lot having frontage on two (2) streets, the maximum setback shall apply to both streets. In the case of a lot having frontage on two or more street corners, newly constructed buildings shall be sited at street corners and meet the maximum setback requirement prior to other free-standing buildings being constructed on the lot which shall also meet the maximum street setback. In the case of a corner lot having frontage on a third street (but not a corner) the maximum setback need not apply to the third street.

c. In the case of a lot having frontage on two (2) streets but not on a corner, the maximum setback shall apply to all streets but in the case of a lot having frontage on three (3) streets but not on a corner, the maximum setback shall apply to only two streets. For purposes of this subsection, only, the first building on a lot shall meet the maximum setback on at least one street with future buildings required to meet the maximum setback on the remaining street(s).

d. In the case of a lot in which a minimum seventy-five (75) percent of the total lot frontage has a building within ten (10) feet of the street, other buildings may be located on the lot more than ten feet from the street. In the case of a lot having frontage on Marginal Way and I-295, the property edge along I-295 shall not be considered street frontage.

e. The maximum building setback shall not apply to vertical building expansions in the following cases:

i. The upper floors of a building in which the lower floors meet the maximum setback and the minimum height requirement.

ii. The building existed as of March 9, 2005 and meets the minimum height requirement.

iii. A building not meeting the maximum street setback and the minimum height requirement may vertically expand a total of one floor from March 9, 2005.

iv. In the case of a building in which at least fifty (50%) of the building wall(s) abutting street(s) is within 20 feet of the street.

v. Additions to parking garages existing as of March 9, 2005.

f. Additions to buildings existing as of March 9, 2005 that re nonconforming as to the maximum setback need not conform to the maximum street setback provided the cumulative building footprint since March 9, 2005 does not exceed fifty percent (50%) of the existing building footprint. Such restriction shall not apply to those portions of the building addition that are constructed closer to the street line than the building footprint existing as of March 9, 2005 and to vertical expansions as provided for in Sec. 14-298(c)(2)(e).

g. Lots having frontage on streets in which the curve of the street frontage precludes a rectangular shaped building along the street line, for purposes of calculating the setback, the average setback of the building from the street line may be used, but in no event shall the average setback along the length of the building edge exceed an average setback of fifteen (15) feet nor shall the maximum setback exceed twenty (20) feet. The increased setback shall not be used for surface parking, vehicular loading or vehicular circulation.

h. Additions to and relocations of designated historic structures or structures determined to be eligible by the historic preservation committee shall be exempt from the maximum setback requirement.

(d) Minimum length of building wall required to be located long street frontage of lot except that additions to and relocations of designated historic structures or structures determined to be eligible by the historic preservation committee shall be exempt from this subsection.

1. Minimum seventy-five percent (75%) of lot street frontage within ten (10) feet of the street; or

2. Minimum twenty-five percent (25%) of building perimeter within ten (10) feet of the street.

(e) ***Maximum building lot coverage:*** One-hundred percent(100%).

(f) ***Maximum residential density:*** None

(g) ***Maximum building height:*** As detailed on the bayside height overlay map on file in the planning and development department office.

(h) ***Minimum building height:*** Newly constructed buildings shall have the required minimum of floors as provided by the bayside height overlay map within fifty (50) feet of any street frontage. Such floors shall be occupiable or habitable and above the average grade of the abutting street.

This minimum floor provision shall not apply to:

1. Accessory building components such as truck loading docks, mechanical equipment enclosures and refrigeration units.

2. Information kiosks and ticketing booths.

3. Parking garages.

4. Public transportation facilities.

5. Additions to buildings existing as of (March 9, 2005) provided that the cumulative additions since (March 9, 2005) does not exceed fifty percent (50%) of the ground floor building footprint on (March 9, 2005) except that such restriction shall not apply to those portions of the building addition(s) that are constructed closer to the street line than the building footprint existing as of (March 9, 2005).

6. Utility substations, including sewage collection

and pumping stations, water pumping stations, transformer stations, telephone electronic equipment enclosures and other similar structures.

7. Additions to and/or relocation of designated historic structures or structures determined by the historic preservation committee to be eligible for such designation.

8. Portions of buildings more thanfifty (50) feet from the street line.

(Ord No. 201-05/06, 4-19-06; Ord. No. 240-10/11, 6-6-11)

Sec. 14-299. Performance standards.

All uses in the B-7 mixed development district zone shall comply with the following standards. Standards 14-299(a),(f),(j),(m),(n) and (o) below shall be reviewed by the Planning Authority.

(a) *Storage:* Any storage of new materials, finished products, or related equipment must be suitably screened from the public way and from abutting properties by a solid fence at least six feet in height. All waste shall be stored in covered containers that do not leak or otherwise permit liquids or solids to escape from the container. All food processing waste shall be stored within a completely enclosed structure and if not refrigerated shall be removed from the site in an enclosed container within forty-eight (48) hours of its generation. All enclosed and exterior areas shall be cleaned and sanitized on a regular basis. Outdoor storage of refuse or debris shall be in an appropriate container or located within a designated, screened area. All dumpsters shall be screened on all four (4) sides by a minimum six (6) foot high solid fence or shall otherwise be fully enclosed as approved by the planning board or the planning department.

(b) *Noise*:

1. *Definitions:*

a. Tonal sounds are defined as sound waves usually perceived as a hum or whine because their instantaneous sound pressure varies essentially as a simple sinusoidal function of time.

b. Impulse sounds are defined as sound events characterized by brief excursions of sound pressure, each with duration of less than one (1) second.

2. *Measurement:* Sound levels shall be measured with a sound level meter with a frequency weighting network manufactured according to standards prescribed by the American National Standards Institute (ANSI) or its successor body. Measurements shall be made at all major lot lines of the site, at a height of at least four (4) feet above the ground surface. In measuring sound levels under this section, sounds with a continuous duration of less than sixty (60) seconds shall be measured by the maximum reading on a sound level meter set to the A weighted scale and the fast meter response (L maxfast). Sounds with a continuous duration of sixty (60) seconds or more shall be measured on the basis of the energy average sound level over a period of sixty (60) seconds (LEQ_1).

3. *Maximum permissible sound levels:* The maximum permissible sound level of any continuous, regular or frequent source of sound produced by an activity shall be as follows:

a. Sixty (60) dBA between the hours of 7:00 a.m. and 10:00 p.m.

b. Fifty (50) dBA between the hours of 10:00 p.m. and 7:00 a.m., as measured at or within the boundaries of any residential zone.

In addition to the sound level standards established above, all uses located within this zone shall employ best practicable sound abatement techniques to prevent tonal sounds and

impulse sounds or, if such tonal and impulse sound cannot be prevented, to minimize the impact of such sounds in residential zones.

4. *Exemptions:*

a. Noises created by construction and maintenance activities between 7:00 a.m. and 10:00 p.m. are exempt from the maximum permissible sound levels set forth in subsection (a)3 of this section. Construction activities on a site abutting any residential use between the hours of 10:00 p.m. of one (1) day and 7:00 a.m. of the following day shall not exceed fifty (50) dBA.

b. The following uses and activities shall also be exempt from the requirements of subsection (a)3 of this section:

i. The noises of safety signals, warning devices, emergency pressure relief valves, and any other emergency devices.

ii. Traffic noise on public roads or noise created by airplanes and railroads.

iii. Noise created by refuse and solid waste collection, provided that the activity is conducted between 6:00 a.m. and 7:00 p.m.

iv. Emergency construction or repair work by public utilities , at any hour.

v. Noise created by any recreational activities which are permitted by law and for which a license or permit has been granted by the city, including but not limited to parades, sporting events, and fireworks displays.

(c) ***Vibration:*** Vibration inherently and recurrently generated shall be imperceptible without instruments

at lot boundaries.

(d) ***Federal and state environmental regulations:*** All uses shall comply with federal and state environmental statutes and regulations regarding emissions into the air, except where provisions of this code are more stringent.

(e) ***Storage of vehicles:*** Outdoor storage of any unregistered automotive vehicles on the premises for more than ten (10) days, and outdoor storage of any used automotive tires on the premises shall not be permitted.

(f) ***Off-street parking and loading:*** Off-street parking is required as provided in division 20 (off-street parking) of this article. Division 21 (off-street loading) of this article shall not apply. Surface parking shall meet the following standards:

1. None of the spaces shall occupy all or a portion of a sidewalk within a street right-of-way.

2. Driveway entrances shall meet the City of Portland Technical Manual standards.

3. The parking area shall meet the landscape and buffer standards of the City of Portland Technical and Design Manuals.

(g) ***Shoreland and flood plain management regulations***: Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5

(h) ***Glare, radiation or fumes:*** Glare, radiation or fumes shall not be emitted to an obnoxious or dangerous degree beyond lot boundaries.

(i) ***Enclosure of uses:*** All uses shall be operated within a fully enclosed structure, except for those customarily operated in open air.

(j) ***Materials or wastes:*** Any permitted outdoor storage of

materials shall be done in such a manner as to prevent the breeding and harboring of insects or vermin, to prevent the transfer of such materials from the site by natural causes or forces and to contain fumes, dust, or other materials which constitute a fire hazard. This storage shall be accomplished within enclosed containers or by one (1) or more of the following methods: raising materials above ground, separating materials, preventing stagnant water, or by some other means. Any areas used for permitted outdoor storage of materials shall be screened from view of any adjoining properties and public rights-of-way. NO outdoor storage shall be permitted between the front of any building on the site and the street.

(k) ***Odor***: Uses in the B-7 zone shall adhere to the odor regulations of the IL zone.

(l) ***Smoke:*** Discharges of smoke shall not exceed opacity percentage of forty percent (40%) or number two (2) on the ringelman chart.

(m) ***Discharge into sewers:*** No discharge shall be permitted at any point into any private sewage disposal system, or surface drain, or into the ground, of any materials in such a way or of such nature or temperature as to contaminate any water supply, or the harbor, or otherwise cause the emission of dangerous or objectionable elements, except in accordance with standards approved by the health authority or by the public works authority.

(n) ***Lighting:*** All lighting shall be designed and installed with cut-off fixtures to direct illumination onto the site and to prevent illumination from such fixtures on neighboring properties and as otherwise governed by the site lighting standards of the City of Portland Technical Manual.

(o) ***Building entrances:*** All buildings shall have a minimum of one (1) public pedestrian entrance facing the street frontage of the lot. Such building entrances shall also be reviewed under the B-7 bayside design standards.

(Ord. No. 201-05/06, 4-19-06; Ord. No. 240-09/10, 6-21-10; Ord. No. 278-

DIVISION 17.5. EASTERN WATERFRONT PORT ZONE*

***Editor's Note-** Order No. 297-05/06 adopted on September 18, 2006, implemented a new Eastern Waterfront Port Zone for the Maine State Pier and Portland Ocean Terminal. The proposed changes for the Portland Ocean Terminal and the Maine State Pier would allow for a wider range of uses for the piers and properties of the Portland Ocean Terminal.

Sec. 14-300. Purpose.

The Eastern Waterfront Port Zone is created to nurture deepwater dependent activity within the context of the established waterfront. The transport of goods and passengers by water is an important component of both the local and regional economies and this transport and other forms of marine industry are dependent upon land and piers with direct access to Portland Harbor. Given the existing pier infrastructure, proximity to deep water, and urban context, Portland's Eastern Waterfront is uniquely situated to support a wide range of water-dependent industry and commerce through a variety of marine activities.

The support and expansion of Portland's marine industry requires piers, uplands, and circulation consistent with the transportation purpose and use of marine facilities. The growth of Portland's marine passenger industry also requires supporting services and activities to provide a safe, convenient, and enjoyable travel experience for users of marine passenger facilities. Non-marine uses that complement the marine passenger industry, are compatible with existing and future water-dependent uses, and provide opportunities for residents and visitors alike to enjoy the Eastern Waterfront throughout the year, are encouraged.

The primary use of the deep-water resources must be for the berthing and support of large vessels. Non-marine uses that complement and support the deepwater infrastructure and do not conflict or compete for limited space with existing or anticipated deepwater-dependent uses are encouraged. Existing and future pier infrastructure and upland support areas should be designed and maintained to support a variety of marine uses and be responsive to future technologies and trends in the marine industry.

Given the need to nurture and support deepwater-dependent uses and the need for non-deepwater dependent uses to complement the marine passenger industry and to support the maintenance and repair of pier infrastructure, the Eastern Waterfront Port Zone recognizes the following hierarchy of uses:

(a) The first priority of this zone is to protect and nurture existing and potential deepwater dependent uses (those uses requiring a minimum of 15 feet of water depth);

(b) The second priority is to allow shallow water-dependent and other permitted marine uses, so long as they do not interfere with deepwater dependent uses, either directly by displacement or indirectly by placing incompatible demands on the zone's infrastructure; and

(c) Other uses specified herein are allowed only if they do not interfere with and are not incompatible with higher priority uses.

(Ord. No. 297-05/06, 9-18-06)

Sec. 14-300.1. No adverse impact on marine uses.

No use shall be permitted, approved or established in this zone if it will have an impermissible adverse impact on future marine development opportunities. A proposed non-water dependent component of a development will have an impermissible adverse impact if it will result in any one (1) or more of the following:

(a) The proposed use will displace an existing water-dependent use;

(b) The proposed use will reduce existing commercial vessel berthing space;

(c) The proposed use, structure or activities, including but not limited to access, circulation, parking, dumpsters, exterior storage or loading facilities, and other structures, will unreasonably interfere with the activities and operation of existing water-dependent uses or significantly impede access to vessel berthing

or other access to the water by water-dependent uses; or

(d) The siting of a proposed use will substantially reduce or inhibit existing public access to marine or tidal waters.

(Ord. No. 297-05/06, 9-18-06)

Sec.14-301. Permitted uses.

Subject to a determination that the proposed use meets the standards of section 14-300.1. (no adverse impact on marine uses), the following uses are permitted in the Eastern Waterfront Port Zone:

(a) *Marine passenger:*

1. Intermodal marine passenger facilities;

2. Cruise ship home port and port of call berthing and support;

3. International and domestic ferries.

(b) *Marine commercial:*

1. Transient and long-term commercial berthing;

2. Marine-related warehousing;

3. Marine related construction, manufacturing, fabrication, salvage and repair;

4. Storage and repair of fishing equipment;

5. Ship and other marine vessel construction, building, servicing, and repair;

6. Boat and marine equipment storage;

7. Marine fuel storage and dispensing provided that on-site fuel storage structures shall be used solely for the purpose of fueling vessels and shall be limited, cumulatively, to 20,000 gallons

of storage capacity within the zone;

8. Public, non-profit, or commercial marine transportation and excursion services, including captained charter services, sport fishing and water taxis;

9. Ship and off-shore support services, including but not limited to tug boats, pilot boats, and chandleries;

10. Facilities for marine pollution control, oil spill cleanup, and servicing of marine sanitation devices.

(c) *Commercial:*

1. Professional, business, government, and general office located in upper floors of structures existing as of September 18, 2006.

***Editor's Note—**On-site parking for non-marine commercial uses are permitted as conditional uses subject to the provisions of section 14-301.1. (conditional uses, parking) below.

---

2. Temporary events, except festivals as otherwise governed under section 14-301I3 below.

Buildings, piers and lands within the EWPZ may be used for temporary public and private events including but not limited to exhibitions, conferences, meetings, and trade shows under the following conditions:

a. Temporary events occupying more than 10,000 square feet of building or outdoor space shall not exceed a combined total of sixty (60) days between May 1st to October 31st;

b. No temporary event may continue for more than 14 days of continuous operation;

c. Any temporary event that anticipates more than 5,000 people in attendance on any

single day must provide and be subject to a parking management plan. The parking management plan must be submitted for the review and approval of the public works authority at least 60 days prior to the first day of the event.

3. Festivals subject to City license.

(d) *Public:*

1. Fire, police and emergency services;

2. Governmental agency emergency operations/crisis centers; 3. Research, military and visiting attraction vessel berthing;

4. Landscaped pedestrian parks, plazas and other similar outdoor pedestrian spaces, including without limitation pedestrian and/or bicycle trails.

(e) *Other:*

1. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 297-05/06, 9-18-06; Ord. No. 33-11/12, 1-18-12)

Sec. 14-301.1. Conditional uses.

(a) The following uses shall be permitted as conditional uses in the Eastern Waterfront Port Zone, provided that, notwithstanding section 14-471(c), section 14-474(a), or any other provision of this code, the planning board shall be substituted for the board of appeals as the reviewing authority, and provided further that in addition to the provision of section 14-474(c)(2) such uses will not impede or preclude existing or potential water-dependent development within the zone, will allow for adequate right-of-way access to the water, are compatible with marine uses, and meet all additional standards set forth below:

1. Conditional use standard:

a. *Marine compatibility:* The proposed use shall be

compatible with existing and potential marine uses in the vicinity, as required by section 14-304(n) and (o) (compatibility of non-marine uses with marine uses and functional utility of piers and access to the water's edge); and

b. *Parking and traffic circulation:*

i. Parking and traffic circulation plan: All applications for conditional use in the EWPZ shall submit a parking and circulation plan for review and approval by the planning board. The parking and circulation plan shall show the location of all existing and proposed structures, travel ways and parking under the common ownership and/or control of the subject pier or property. The plan shall demonstrate that the parking and circulation of the conditional use does not interfere with the functional marine utility of the property and otherwise meets the standards and conditions of the EWPZ.

2. Conditional uses:

a. *Marine:*

i. Marine products, wholesaling and retailing;

ii. Ice-making services;

iii. Marine freight facilities providing service for, and/or intermodal transfer of, container and breakbulk freight;

iv. Marine educational facilities;

v. Seafood retailing, wholesaling, packaging and shipping;

vi. Seafood processing for human consumption, subject to the performance standards of the IL zone set forth in section 14-236 in addition to the performance standards of section 14-304;

vii. Commercial marinas serving commercial and recreation boats, provided that such facilities are located in areas that do not conflict with the navigation and handling of deepwater dependent vessels accessing existing or potential deepwater berthing;

viii. Fish byproducts processing, provided that:

a. Any fish byproducts processing facility has a valid rendering facility license under chapter 12 of the Portland city code; and

b. Any fish byproducts facility shall employ current and appropriate odor control technology to eliminate or minimize detectable odors from such a process, and in no case shall odors exceed the odor limitation performance standards of the IM zone (section 14-252); and

c. The processing other material wastes or byproducts shall not be deemed a lawful accessory use Permitted herein.

b. *Commercial:*

a. Structured parking available to the general public;

b. Professional, business, government and general offices uses in upper floors of structures constructed after September 18, 2006;

c. Passenger support services supporting a marine passenger use listed under 14-301(a)(marine passenger). The total ground floor area occupied by any combination of the following uses (regardless of ownership) shall not exceed 35% of the gross floor are of the principle associated marine passenger

use and no more than 35,000 square feet cumulative within the EWPZ:

i. Retail;

ii. Restaurants/food service;

iii. Retail service;

iv. Passenger information services.

c. ***Industrial:*** The following industrial uses are permitted provided that such uses shall conform to the IM zone performance standards set forth in section 14-252 in addition to the performance standards of 14-304. Where redundant or contradictory performance standards exist, the more restrictive standard applies.

i. Non-marine related warehousing in structures existing as of September 18, 2006;

ii. Facilities for combined marine and general construction;

iii. Low impact industrial uses as permitted in the IL zone in structures existing as of September 18, 2006, excluding all auto repair service facilities.

d. ***Public:***

i. ***Utility substations:*** Public utility substations, including but not limited to electrical transformers, sewage and stormwater pumps and telecommunication switching stations, are permitted under the following conditions:

a. The facility is located more than 100 feet from the water's edge;

b. The facility occupies no more than 50 square feet of structure above ground;

c. The facility provides no dedicated on-site parking and all subsurface elements of the facility are installed and operated such that land occupied by the facility is otherwise useable and made available for marine related uses, including but not limited to parking, travel ways, and/or storage; and

d. The facility shall be sized, sited and screened to minimize visual impact and prominence from public ways.

ii. Maritime museums, limited to 5,000 square feet of ground floor footprint.

***Editor's Note—**On-site parking for non-marine commercial and industrial uses are permitted as conditional uses subject to the provisions of section 14-301.1. (conditional uses, parking) below.

---

e. *Parking for non-marine uses:* Notwithstanding sections 14-304(h), 14-331, 14-334 (regarding off-street parking requirements) and article V (site plan) of this chapter, no parking shall be allowed in this zone for non-marine uses unless the applicant can demonstrate that the number of parking spaces on-site exceeds the number of parking spaces needed to accommodate the demand for marine and water-dependent uses that are permitted by section 14-301 (permitted marine uses) and 14-301.1. (conditional marine uses) which are or may be located on the subject property (see editor's note below). The remainder of parking Required, if any, for such non-marine uses shall be provided off-site.

***Editor's Note—**Vacant ground floor space should be considered to have a parking demand similar to other space housing an existing water-dependent use elsewhere on the subject property or on a comparable property.

(b) The following use shall be permitted only upon the issuance of a conditional use permit subject to the provisions of section 14-474 (conditional uses), and any special provisions, standards or requirements specified below:

1. Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

   a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

   b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

   c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

   d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

   e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

   f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

2. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 297-05/06, 9-18-06; Ord. No. 29-09/10, 8-3-09, emergency passage; Ord. No. 33-11/12, 1-18-12)

Sec.14-301.2. Prohibited uses.

Uses, whether floating or fixed to land, which are not enumerated in either section 14-301 or 14-301.1. as permitted or conditional uses are prohibited. Those uses that are specifically prohibited shall include, without limitation:

(a) Residential uses;

(b) Amusement/theme parks;

(c) Bulk freight facilities;

(d) On-site gambling casinos not accessory to and located aboard either a ferry or inter-port cruise ship.

(Ord. No. 297-05/06, 9-18-06)

Sec. 14-302. Contract or conditional rezoning.

In addition to those marine and non-marine uses authorized in section 14-301 (permitted uses) and 14-301.1(conditional uses) an applicant may apply to locate a non-marine use not otherwise permitted, if the reviewing body finds the applicant has met the standards of section 14-300.1 (no adverse impact),

the performance standards of 14-304(a-o), and the applicable standards of contract/conditional rezoning contained in sections 14-60 to 14-63 and conforms to the following requirements:

(a) *Standards for contract or conditional rezoning:*

1. All non-marine uses are either permitted or conditionally permitted in the B-5 zone, and are not specifically prohibited in section 14-301.2 (prohibited uses) above. Any hotel, inn, or other similar transient lodging establishment proposed must be located landward of the spring tide line and westerly of the extension of the India Street right-of-way; and

2. The aggregate ground floor area of any development permitted hereunder located within 100 feet of the pier edge or working edge of the hardened shoreline shall be occupied by at least 50% of one or more marine uses set forth in section 14-301 (permitted, marine uses) and 14-301.1 (conditional marine uses). **Note: the circulation areas and areas occupied for accessory parking serving marine uses shall not be used as the basis for calculating the 50% provision above; and**

3. The development is consistent with the comprehensive plan and without the non-marine use component authorized herein, the site could not otherwise support an economically viable water-dependent use; and

4. The project's public benefits outweigh its potential negative impacts, provided that such public benefits include one or more of the following: protection of existing water-dependent uses, preservation of future water-dependent use development opportunities, contribution to the development of and/or on-going maintenance of the marine infrastructure for commercial vessels, and visual and physical access to the waterfront for the general public; and

5. The non-marine portion of the development will

not significantly restrict air or light for marine uses located in the immediate vicinity; will not create significant adverse local climatic effects on marine uses such as an undue increase of winds or shadowing; and will not adversely affect the efficient operation of marine uses, such as by producing less efficient traffic, parking or circulation patterns; and

6. The rezoning contains adequate provisions and/or conditions to ensure that on-site water-dependent infrastructure remains occupied by commercial marine use(s) listed in section 14-301 (permitted uses) and 14-301.1 (conditional uses) and that said use is not abandoned after the project is developed; and

7. Notwithstanding section 14-304(h) (performance standard *"Parking")* and section 14-526 (a) 4.a.(i), all on-site parking constructed or used for non-marine uses allowed only by contract or conditional rezoning shall be subject to the conditional use provisions section 14-301.1 (e) (*parking for non-marine uses)*.

   Additionally, the total amount of parking shall be established by the city council in the conditional or contract rezoning agreement after consideration of the planning board's recommendation on the same.

(Ord. No. 297-05/06, 9-18-06; Ord. No. 278-09/10, 7-19-10)

Sec. 14-303. Dimensional requirements.

In addition to the provisions of article III, division 25 of this code, lots in the EWPZ shall be subject to the following requirements:

(a) *Minimum lot size:* None.

(b) *Minimum frontage:* None.

(c) *Minimum yard dimensions:*

1. Front setback: None.

2. Side setback: None.

3. Rear setback: None.

4. Setback from pier line: Notwithstanding the above requirements, a minimum setback of twenty-five(25) feet from the edge of any pier, wharf or working edge of the hardened shoreline shall be required for any structure. The setback area may be utilized for water-dependent uses and public uses and activities, subject to the provisions of sections 14-300.1 (no adverse impact) and 14-301.1 (conditional use provisions), and shall not be utilized for restaurant, drinking, or other non water-dependent uses or for off-street parking. The edge of any pier, wharf or bulkhead shall include any attached apron(s).

(d) ***Maximum impervious surface:*** One hundred (100%) percent.

(e) ***Maximum building height:*** Forty-five (45) feet, except as follows:

1. For purposes of this section only, moveable elements such as cranes and gantries, connection devices such as conveyors or bridges, and floating vessels shall not be subject to the space and bulk requirements, but shall be subject to a determination by the Federal Aviation Administration that the location of such equipment will not create a hazard to air traffic.

2. Rooftop appurtenances may exceed the maximum height limits of forty-five (45) feet providing that their design and placement is either fully screened or integrated into the architecture of the structure on which they sit.

3. The applicant must provide a determination from the Federal Aviation Administration that structures and equipment in excess of forty-five (45) feet will not exceed the applicable height

guidelines for the runway approach and will not create a conclusive evidence that the proposed development will not create a hazard.

(Ord. No. 297-05/06, 9-18-06; Ord. No. 27-11/12, 8-15-11)

Sec. 14-304. Performance standards.

Development in the Eastern Waterfront Port Zone shall comply with the following standards:

(a) *Outdoor storage of materials:* Outdoor storage of commodities and materials accessory to normal conduct of business shall be entirely contained, including runoff contaminants and residual material, within a designated area.

(b) *Noise:*

1. The level of sound, measured by a sound level meter with frequency weighting network (manufactured according to standards prescribed by the American National Standards Institute, Inc.), inherently and recurrently generated within the EWPZ between the hours of 7:00 p.m. and 7:00 a.m. from facilities or operations commenced on or after July 1, 1988, shall not exceed fifty-five (55) decibels on the A scale at or within the boundaries of any residential zone, except for sound from construction activities, sound from traffic on public streets, sound from temporary activities such as festivals, sound created as a result of, or relating to, an emergency, including sound from emergency warning signal devices, and maritime navigation signals.

2. In measuring sound levels under this section, sounds with a continuous duration of less than sixty (60) seconds shall be measured by the maximum reading on a sound level meter set to the A weighted scale and the fast meter response (L maxfast). Sounds with a continuous duration of sixty (60) seconds or more shall be measured on the basis of the energy average sound level over a period of sixty (60) seconds (LEQ1).

3. In addition to the sound level standards otherwise established, facilities or operations established or built in the EWPZ on or after July 1, 1988, shall employ best practicable sound abatement techniques to prevent tonal sounds and impulse sounds or, if such tonal and impulse sounds cannot be prevented, to minimize the impact of such sounds in residential zones. Tonal sound is defined as a sound wave usually perceived as a hum or which because its instantaneous sound pressure varies essentially as a simple sinusoidal function of time. Impulse sounds are defined as sound events characterized by brief excursions of sound pressure, each with a duration of less than one (1) second.

(c) ***Vibration:*** Vibration inherently and recurrently generated shall be imperceptible without instruments at lot boundaries. This shall not apply to vibration resulting from activities aboard a vessel or from railroad vehicle activities, or from activities on a pile-supported pier.

(d) ***Federal and state environmental regulations:*** All uses shall comply with federal and state environmental statutes and regulations regarding emissions into the air, except where provisions of this code are more stringent.

(e) ***Discharges into harbor areas:*** No discharge into harbor water areas shall be permitted, unless permitted by the Maine Department of Environmental Protection under a waste discharge license and as approved by the department of public works in accordance with chapter 24, article III of this code. All private sewage disposal or private wastewater treatment facilities shall comply with the provisions of chapter 24, article II of this code and federal and state environmental statutes and regulations regarding wastewater discharges.

(f) ***Storage of vehicles:*** Storage of any unregistered automotive vehicle on the premises for more than ten (10) days shall not be permitted.

(g) ***Landfill of docking and berthing areas:*** Landfill of docking and berthing areas shall be governed by 38 M.R.S.A. § 471-478, and permitted only if the landfill does not reduce the amount of linear berthing areas or space, or berthing capacity. If approved, construction shall be undertaken using methods approved by the department of public works and shall be accomplished in accordance with the provisions of division 25 of this article and in a manner so as to ensure that a stable and impermeable wall of acceptable materials will completely contain the fill material and will not permit any fill material to leach into docking areas or navigable waters.

(h) ***Off-street parking:*** Off-street parking is required as provided in division 20 (off-street parking) of this article.

(i) ***Off-street loading:*** Off-street loading is required as provided in division 21 of this article.

(j) ***Shoreland and flood plain management regulations:*** Any lot or a portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(k) ***Lighting:*** All lighting on the site shall be shielded such that direct light sources shall not interfere with vessels transiting the harbor, nor have an unreasonable adverse impact on adjacent residential zones, and shall be complaint with the Site Lighting Standards of the City of Protland Technical Manual.

(l) ***Signs:*** Signs shall be permitted as set forth in division 22 of this article.

(m) ***Storage of pollutants and oily wastes:*** On-premises storage of pollutants and oily wastes shall not be permitted for more than forty-five (45) days.

(n) ***Compatibility of non-marine uses with marine uses:*** Non-marine uses, structures and activities, including but not limited to access, circulation, parking, dumpsters, exterior storage and loading facilities or

other structures shall neither unreasonably interfere with the existence or operation of marine uses nor significantly impede access to vessel berthing or other access to the water by existing or potential marine uses.

(o) ***Functional utility of piers and access to the water's edge:*** All development, whether for marine or non-marine uses, must anticipate current and future needs of water-dependent uses to functionally access the water's edge for the transfer of goods, materials, and passengers between berthed vessels and land bound vehicles. Provisions for the storage and movement of goods, materials, and passengers must be designed into all waterside development and internal circulation routes must be maintained or otherwise provided as an element of any development.

(Ord. No. 297-05/06, 9-18-06; Ord. No. 240-09/10, 6-21-10; Ord. No. 278-09/10, 7-19-10)

DIVISION 18. WATERFRONT CENTRAL ZONE*

***Editor's note—**Ord. No. 168-93, § 2, adopted Jan. 4, 1993, repealed former Divs. 18, 18.5 and 18.7, §§ 14-306—14-320.2, which pertained to waterfront zones, and enacted new provisions as Divs. 18, 18.5 and 18.7 to read as herein set out. Formerly, such provisions derived from Ord. No. 426-83, § 1, adopted Apr. 25, 1983; Ord. No. 427-83, § 1, adopted Apr. 25, 1983; Ord. No. 355-85, § 1, adopted Jan. 7, 1985; Ord. No. 438-86, § 1, adopted Apr. 7, 1986; Ord. No. 189-87, § 3, adopted Feb. 7, 1987; Ord. No. 174-87, 's; 1, 2, adopted Mar. 4, 1987; Ref. of May 5, 1987; Ord. No. 385-87, adopted Apr. 6, 1987; Ord. No. 36-89, §§ 1, 2, adopted June 28, 1989; and Ord. No. 15-92, §§ 22, 23, adopted June 15, 1992.

Sec. 14-305. Purpose.

The waterfront central zone was created to protect and nurture water-dependent and marine-related support uses so that they may grow and prosper in an environment and area dedicated to this purpose. The following priority of uses is recognized:

(a) The first priority of this zone is to protect and nurture existing and potential water-dependent uses in a setting that enforcestheir continued economic viability;

(b) The second priority is to encourage other marine and marine-related support uses so long as they do not

interfere with water-dependent uses, either directly by displacement or indirectly by placing incompatible demands on the zone's infrastructure;

(c) Non-marine uses are encouraged provided that they do not interfere with and are not incompatible with first and second priority uses. Non-marine uses are beneficial to the waterfront economy because they provide the financial return to property owners necessary for the maintenance and improvement of the marine infrastructure.

Water-dependent and marine-related support uses by their nature have activities and operational needs that are unique to this area and are not shared by other commercial and industrial uses in the city. These first and second priority uses and related activities may result in noise, odor, dust, hourso f operation, parking and traffic patterns and traffic control needs that are necessary for the convenient and successful conduct of such uses. Other uses may not be compatible with these types of effects. Other specified uses are permitted in the waterfront central zone, provided that they do not significantly interfere with the activities and operation of water-dependent and marine-related support uses. Such uses must be, and are assumed to be, aware of the impacts associated with marine uses and therefore must accept and be tolerant of them. Other specified uses in thezone shall accommodate to those patterns and needs of the higher priority uses so long as those higher priority uses are not detrimental to public health and safety and the higher priority activities are conducted in accordance with sound practices or practices customary in the trade.

Commercial Street is recognized as an important economic center for the city and region. Marine compatible uses are encouraged to locate and grow along Commercial Street while higher priority marine uses are protected on the waterfront.

(Ord. No. 168-93, § 2, 1-4-93; Ord. No. 193-05/06, 4-19-06; Ord.No. 103-10/11, 12-20-10)

Editor's Note—**Pursuant to Council Order 103-10/11 passed on 12/20/10 Section 14-306 ***No adverse impact on marine uses was repealed in it's entirety and remaining sections were re-numbered accordingly.

Sec. 14-306. Definitions.

For the purposes of the waterfront central zone only the following terms shall have the following definitions:

Common circulation drives: private driveways, roadways and circulation areas accessible to all on-site tenants and/or occupants of a lot within the waterfront central zone providing access from/to the public street network.

Lot: any abutting property under common ownership.

Non-marine use overlay zone (NMUOZ): The non-marine use overlay zone (NMUOZ) is a portion of the waterfront central zone, as described below, where new and existing development may be occupied with 100% non-marine use tenants listed under 14-307(b), subject to the standards and use limitations provided in section 14-311(b).

The geographic limits of the NUMUOZ are defined by parcels of land and piers within the waterfront central zone located on the landward side of a line established one hundred fifty (150) feet southerly from the southerly sideline of Commercial Street and modified as follows: the seaward limit of the NMUOZ extends to a line 500 feet southerly from the southerly sideline of Commercial Street in the area between the easterly sideline of Long Wharf to the westerly sideline of Union Wharf. Additionally, all areas subject to this provision are set back landward at least twenty-five (25) feet from the average high tide line of Portland Harbor and associated coastal wetlands. All offset distances are measured horizontally.

All applicants for development within the NUMUOZ are responsible for demonstrating their location within NMUOZ according to the findings of a site specific land survey conducted by a professional land surveyor licensed by the State of Maine. The limits of the NMUOZ shallbe shown on all site plans and subdivision plats for proposed development within the NMUOZ. A map showing the presumed boundaries of the NMUOZ is on file with the Departmetn of Planning and Urban Development. Said map is for illustrative purposes only and shall not be relied upon in determining whether a proposed development is located within the NMUOZ.

On-Site shall mean that portion of any lot included within or directly impacted by a proposed development.
(Ord. No. 193-05/06, 4-19-06; Ord. No. 103-10/11, 12-20-10)

Sec. 14-307. Permitted uses.

Subject to a determination that the proposed use meets the standards of section 14-311, as applicable, the following uses are permitted in the waterfront central zone:

(a) *Marine:*

1. Marine products, wholesaling, distribution and retailing;

2. Marine repair services and machine shops;

3. Tugboat, fireboat, pilot boat and similar services;

4. Harbor and marine supplies and services, chandleries, and ship supply such as fueling and bunkering of vessels;

5. Marine industrial welding and fabricating;

6. Shipbuilding and facilities for construction, maintenance and repair of vessels;

7. Commercial marine transport and excursion services, including ferries, captained charter services, sport fishing and water taxis;

8. Cargo handling facilities, including docking, loading and related storage;

9. Boat repair yards;

10. Boat storage facilities, excluding rack storage facilities; (Boat rack storage facilities are included in conditional use, section 14-308(b)(3) below);

11. Seafood processing;

12. Seafood packing and packaging;

13. Seafood loading and seafood distribution;

14. Fabrication, storage and repair of fishing

equipment;

15. Ice-making services;

16. Facilities for marine construction and salvage;

17. Facilities for marine pollution control, oil spill cleanup, and servicing of marine sanitation devices;

18. Fabrication of marine-related goods;

19. Fishing and commercial vessel berthing;

20. Non-commercial berthing of a maximum of fifty (50) linear feet per pier. A non-commercial berth may not displace a commercial berth.

    Parking for any non-commercial berthing is subject to the provisions of section 14-311(d)8.

21. Marine office, including but not limited to offices of owners of wharves or their agents, and naval architects, and seafood brokers;

22. Public landings;

23. Marine research, education, and laboratory facilities;

24. Bait sales and processing;

25. Harbor security and emergency response services including but not limited to Harbor Master, Marine Patrol and Coast Guard.

(b) ***Non-marine commercial and industrial uses:*** Non-marine uses permitted by this section are subject to the standards listed in section 14-311.

1. Professional, business, government, and general offices;

2. Retail and service establishments, including craft and specialty shops. Convenience stores with gas

pumps shall not be permitted under this section;

3. Restaurants provided that full course meal food service and consumption shall be the primary function of the restaurant, and full course meal service shall be continued up until the hours of closing;

4. Banking services without drive-up services;

5. Laundry and dry cleaning services;

6. Cabinet and carpentry shops, studios for artists and crafts people;

7. Intermodal transportation facilities;

8. Cold storage facilities;

9. Museums and art galleries; and

10. Outside accessory activities.

(c) *Public:*

1. Landscaped pedestrian parks, plazas and other similar outdoor pedestrian spaces, including without limitation pedestrian and/or bicycle trails;

(d) *Other:*

1. Accessory uses:

a. Interior accessory uses customarily incidental and subordinate to the location, function and operation of permitted uses. Food service establishments, newsstands and other similar retail and service support uses shall only be permitted as accessory uses if they are part of and located within the lot lines of a use set forth in section 14-307(a)(1), (a)(7), or (a)(22); that such uses do not exceed two-thousand (2,000) square feet in total floor area of the building, or twenty-five percent

(25%) of the total floor area of the building, whichever is less, and that each individual use does not exceed one-thousand (1,000) square feet in total floor area of the building; and further provided that such accessory uses provide goods or services that are supportive of the principal use and its clientele. Exterior accessory usesshall be otherwise subject to the provision of 14-311(a); and

b. Interior meeting or classroom space accessory to uses permitted in section 14-307(a)(23) (marine research, education, and laboratory facilities) may be rented out for meeting use by marine-related or non-marine related groups or organizations, or the general public, and such accessory uses shall not be subject to the limitations contained in paragraph b, but shall onlybe permitted as accessory uses if the total of all support uses, including interior meeting or classroom space, does not exceed three-thousand (3,000) square feet in total floor area per building, or fifteen percent (15%) of the total floor area per building, whichever is less.

2. Street vendors licensed pursuant to chapter 19.

3. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 168-93, § 2, 1-4-93; Ord. No. 131-01/02, § 1, 1-23-02; Ord. No. 309-01/02, § 1, 7-15-02; Ord. No. 38-02/03, § 1, 9-4-02;Ord. No. 193-05/06, 4-19-06; Ord. No. 103-10/11, 12-20-10; Ord. No. 33-11/12, 1-18-12)

Sec. 14-308. Conditional use.

The uses listed herein shall be permitted as conditional uses in the waterfront central zone, provided that, notwithstanding section 14-471 and section 14-474(a), or any other provision of this code, the planning board shall be substituted for the board of appeals as the reviewing authority, and further provided that in addition to the provisions of section 14-474(c)(2), they shall also meet the applicable waterfront central zone development standards in section 14-311:

(a) Commercial marine conditional uses:

1. ***Fish by-products processing,*** provided that:

a. Any fish by-products processing facility has a valid rendering facility license under chapter 12;

b. Any existing fish by-products facility shall employ current and appropriate odor control technology (and any new fish by-product use shall employ current, available odor control technology) to eliminate or minimize detectable odors from such a process, and in no case shall odors exceed the odor limitation performance standards of the I-M zone; and

c. The processing of other material wastes or by-products shall not be deemed a lawful accessory use under any other provision of this article.

2. ***Boat rack storage facilities,*** provided that:

a. Parking shall be provided for one-hundred percent (100%) of the demand generated by the use (nothwithstanding 14-311(d)8, performance standard for parking), and such parking shall be provided off-site, in another zone permitting such use.

b. Boat rack structures shall not exceed ten thousand (10,000) square feet of building footprint.

(b) ***Residential:*** The primary owner of a marine business listed under section 14-307(a) located on the same site may occupy upper floor space with a residential use, provided the following conditions are met:

1. The applicant demonstrates a compelling business related need for living on-site that cannot otherwise be accomplished;

2. The residential living space shall not exceed one thousand (1,000) square feet, inclusive of all exterior porches and decks;

3. The occupancy of said space shall be limited to the primary owner of the marine related business. The residential use is not transferable to friends, family or anyone other than the primary business owner. No such residential space shall be leased out by or allowed to be used for occupancy by other than the primary owner of the marine related business;

4. The residential use shall be limited to one unit per wharf;

5. The residential use shall be year round use only, and shall not be used on a seasonal basis; and

6. Upon the vacancy in excess of three (3) months of the residential living space by the primary owner of the marine related business, the residential use shall automatically terminate and shall not be continued without new conditional use approval under this subsection.

For purposes of this subsection, "primary owner of the marine related business" shall mean a person who legally owns fifty percent (50%) or more of the marine business listed under section 14-307(a), permitted marine uses.

(c) ***Utility substations:*** Public utility substations, including but not limited to electrical transformers, sewage and stormwater pumps, and telecommunication switching stations, are permitted under the following conditions:

1. The facility is located more than one-hundred (100) feet from the water's edge;

2. The facility occupies no more than fifty (50) square feet of structure above ground;

3. The facility provides no dedicated on-site parking

and all subsurface elements of the facility are installed and operated such that land occupied by the facility is otherwise usable and made available for marine uses, including but not limited to parking, travel ways, and/or storage; and

4. The facility shall be sized, sited and screened to minimize visual impact and prominence from public ways.

(d) Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

1. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

2. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

3. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

4. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

5. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting

from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

6. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

7. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

8. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

(e) Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 168-93, § 2, 1-4-93; Substitute Ord. No. 00-42, 8-7-00; Ord. No. 73-01/02, § 1, 10-15-01, Ord. No. 131-01/02, § 2, 1-23-02; Ord. No. 193-05/06, 4-19-06; Ord. No. 29-09/10, 8-3-09, emergency passage; Ord. No. 240-09/10, 6-21-10; Ord. No. 278-09/10, 7-19-10; Ord. No. 103-10/11, 12-20-10; Ord. No. 33-11/12, 1-18-12)

Section 14-309. Prohibited uses.

Uses which are not enumerated in either section 14-307 or 14-308 as permitted or conditional uses are prohibited. Those uses that are prohibited shall include, without limitation:

(a) Except as provided in section 14-308, residential uses (not in existence on May 5, 1987);

(b) Hotels, motels or boatels;

(c) Auditoriums, civic centers, convention centers or other

meeting facilities;

(d) Drinking establishments;

(e) Ground mounted telecommunication towers, antennas, and/or disks; and

(f) Drive-up services for any use other than a permitted use listed under 14-307(a) or 14-308(a)(1).

(Ord. No. 168-93, § 2, 1-4-93; Ord. No. 73-01/02 § 2, 10-15-01; Ord. No. 193-05/06, 4-19-06; Ord. No. 103-10/11, 12-20-10)

Sec. 14-310. Dimensional requirements.

In addition to the provisions of division 25 of this article, lots in the waterfront central zone shall be subject to the following requirements:

(a) *Minimum lot size:* None.

(b) *Minimum frontage along Commercial Street:* Seventy-five (75) feet.

(c) *Minimum lot width within the NMUOZ:* Fifty (50) feet measured parallel with Commercial Street and such lot width shall be continuous for the full depth of the lot located within the NUMUOZ.

(d) *Minimum yard dimensions:*

1. Front setback: None.

2. Side setback: None

3. Rear setback: None.

4. Setback from pier edge: Notwithstanding the above requirements, a minimum setback of five (5) feet from the edge of any pier, wharf or bulkhead shall be required for any structure. The edge of any pier, wharf or bulkhead shall include any attached apron(s).

(e) *Maximum lot coverage:* One-hundred (100) percent.

(f) *Maximum building height:* Fifty (50) feet. Except as provided in (h) below, a structure in the waterfront central zone shall provide no more than three habitable floors; however, typical rooftop appurtenances and/or enclosed or open mechanical installations shall be allowed over the third floor.

(g) *Minimum ground floor clearance:* Any new building proposed to be larger than three-hundred (300) square feet, and located more than 35 feet from the southerly sideline of Commercial Street, shall provide no less than fifteen (15) feet of first floor to ceiling vertical clearance to promote marine industrial use potential. New buildings less than three-hundred (300) square feet or additions to existing multistory buildings are exempt from this provision but shall provide the maximum ground floor clearance practicable.

(h) *New non-marine use building exception for usable floors and minimum ground floor clearance:* Notwithstanding provisions (f) and (g) above, for new non-marine use buildings permitted within the NMUOZ, four (4) usable floors are allowed and ground floor clearance minimums do not apply.

(Ord. No. 168-93, §2, 1-4-93; Ord. No. 309-01/02, § 2, 7-15-02; Ord. No. 193-05/06, 4-19-06, Ord. No. 103-10/11, 12-20-10)

Sec. 14-311. Development standards.

(a) *Standards for non-marine uses located outside of the NMUOZ:* Non-marine uses listed above in Sec. 14-307(b) and 14-308(b) that are located outside of the NMUOZ shall be subject to the performance standards listed in 14-311(d) as well as the following standards:

1. *55% marine use required on ground floors:* At least 55% of the ground floor of all of the buildings on the lot (defined in 14-306 above), when calculated using the aggregate of all such ground floors, shall be occupied by marine uses, as listed under 14-307(a) or 14-308(a)(1).

2. *55% marine use required for all open areas:* After subtracting areas used for common circulation drives (defined in 14-306 above), at least 55% of un-built

area (meaning area not occupied by a building) on the lot, when calculated using the aggregate of all such un-built areas, shall be occupied by marine uses, as listed under 14-307(a) or 14-308 (a)1.

3. ***Ground floor vacancies and change of occupancy offered to water dependent/marine uses:*** Ground floor vacant space and areas proposed for a change of occupant outside of the NMUOZ shall not be filled with any non-marine use without adequate opportunity for marine uses to occupy the space.

   a. ***Ground floor vacancy and change of occupant outside of the NMUOZ advertised to marine users:*** In any lot or portion of lot outside of the NMUOZ, each time a ground floor occupant departs or gives notice to depart from the lot, the space must be made available to new marine occupants.

      Prior to renting to a non-marine user the property owner shall advertise for a new marine occupant for not less than a (60) day period in targeted media and by other means reasonably calculated to reach marine users. Should one or more marine users apply, the property owner shall make the space available to a marine occupant, in accordance with terms and rates generally consistent with comparable space in the 55% marine use portion of the zone (outside of the NMUOZ.) The property owner may stop advertising sooner than the end of the 60 day period if a lease is signed with a marine user. Should no marine user apply by the end of the 60 day period, the owner may fill the space with a non-marine user provided that the new non-marine occupant will not cause the lot to exceed the non-marine use occupancy maximum of 45% of the ground floor area or open area.

   b. ***Uses inventoried:*** To demonstrate adherence to the 55% marine use requirement, the applicant shall submit to the planning authority, upon request, an inventory which lists each occupant (tenant or otherwise), as well as a map which depicts the location of each occupant. The map

shall show all ground level space, including buildings, parking, open areas and submerged lands associated with the subject lot. For each occupant, the property woner must indicate the square footage of area occupied and whther the occupant is a marine use as defined herein. For vacant space, the last previous occupant shall be listed, along with the date of departure.

c. Applicants for site plan review or a change of use permit outside of the NMUOZ shall provide the planning authority with proof of compliance with the requirements of this section nas a condition of approval.

d. The city planning authority shall compile and report inventories of ground level uses, as reported under (b) above, into an annual report of ground level uses and investment in the Central Waterfront. The report shall include an aggregated assessment of ground floor marine and non-marine use ossupancy and a catalogue of marine infrastructyure investment for the reporting period. The report shall be submitted to the City Council as a communication not less than once every calendar year.

4. Pier or bulkhead edge reserved for marine uses: Notwithstanding anything in contained in 14-311(c) (Contract or conditional rezoning) or any other provision of this ordinance to the contrary, excepting only the portion of any pier which might be used for non-commercial berthing pursuant to 14-307(a)(20), all berthing and/or dockage space and associated floats plus the entire linear edge of that portion of every pier or bulkhead which is adjacent to greater than zero feet of water depth at mean low water, to a minimum setback line of at least five feet from the edge of the pier, builkhead, or engineered shoreline may only be used or occupied by one or more marine uses as defined in 14-307(a)) or 14-308(b). Said edge shall be the seaward extent of any engineered shoreline or working deck of any pier or wharf.

(b) ***NMUOZ standards:*** Non-marine uses listed under 14-

307(b) and 14-308 located within the NMUOZ, as defined in 14-306, shall be subject to the performance standards listed in 14-311(d) as well as the following standards:

1. ***Vessel access:*** Non-marine uses allwed under this provision shall not disrupt or block access to vessel berthing and shall otherwise adhere to the performance standards of this zone described in Sec. 14-311(d).

2. ***Maximum setback for new development on lots with seventy-five (75) or more feet of Commercial Street frontage:*** Any new non-marine development constructed subject to this provision which is located on a lot with seventy-five (75) or more feet of frontage along the Commercial Street right of way shall be located with its front façade no further than thirty-five feet (35) from the southerly sideline of the Commercial Street right of way. Furthermore, any such development shall orient its front façade and its primary pedestrian entrance toward Commercial Street and no vehicular circulation or parking may occupy the land or pier area between the front façade of the building and Commercial Street.

   Non-marine development subject to this provision on lots with fewr than seventy-five (75) feet of frontage along the Commercial Street right-of-way, changes of use within existing buildings, and/or building additions of less than 5,000 square feet of new development to existing buildings are exempt from the maximum setback provisions established herein.

3. ***Investment in marine infrastructure:*** All applicants for site plan review or a change of use permit for non-marine development in the NMUOZ are required to invest in marine infrastructure as a condition of development, provided that the total project costs exceed $250,000. The value of the investment shall be not less than five percent (5%) of total project costs over $250,000 for constructing non-marine space and associated site improvements in the NMUOZ.

   Required investment may occur by one or both the following methods:

a. Direct investment in marine infrastructure located on the same lot: Investment shall be for the benefit of marine uses listed in 14-307(a) within the same lot as the proposed non-marine development. Investment may include dredging, pile replacement, new or replaced structural decking (but not pavement resurfacing), new or replaced fendering systems, new or replaced floats, pier expansions, permanent conversions of recreational berthing to commercial berthing, bulkhead or seawall repair or improvements, or any combinationof similar improvements. Plans for the marine infrastructure investment shall be submitted to the planning authority with the application for site plan review or change of use permit and shall include details and a commitment as to how the marine infrastructure will be utilized by marine users. The marine infrastructure improvements shall be completed prior to the issuance of a certificate of occupancy for the non-marine development project.

b. Financial contribution: If direct investment in marine infrastructure is not made, the developer shall make a financial contributionto the ***city's waterfront loan and investment fund.***

(c) ***Contract or conditional rezoning standards:*** Applications for proposals deviating from any dimensional requirements under section 14-310 and/or including uses not listed under sections 14-307 and 14-308 may only be considered if the reviewing body finds the applicant has met the performance standards listed under 14-311(d) and the following standards:

1. ***Conditional or contract rezoning located outside of the NMUOZ:*** The ground level floor area of any building, existing or proposed, on the subject lot and the un-built area of the subject lot and the un-built area of the subject lot shall be subject to and meet the requirements of section 14-311(a) of this code.

2. ***Conditional or contract rezoning located within the NMUOZ:*** Conditional or contract rezoning applications located within the NMUOZ are subject to the provisions

of 14-311(b)(3) (*Investment in marine infrastructure).*

3. Residential dwellings are prohibited.

4. The development is consistent with the comprehensive plan and without the development the site could not otherwise support an economically viable water-dependent use.

5. Any physical or legal impediments which preclude or impede functional access from the site of the development to any portion of the water's edge are not the result of action taken by the current owner, the applicant for rezoning, or any prior owner after January 4, 1993.

6. The project's public benefits outweigh its potential negative impacts, taking into consideration as public benefits: protection of existing water-dependent uses, preservation of future water-dependent use development opportunities, contribution to the development of and/or on-going maintenance of the marine infrastructure for commercial vessels, and visual and physical access to the waterfront for the general public.

7. The development responds to any unique physical conditions and development opportunities along the shoreline in a manner that is consistent with section 14-305 (purpose).

8. The non-marine portion of the proposed development will not adversely affect the efficient operation of marine uses, such as producing less efficient traffic, parking or circulation patterns. Parking for the non-marine portion of the proposed development shall be subject to review under section 14-311(d)(8).

9. The rezoning contains adequate provisions and/or conditions to ensure that any associated water-dependent infrastructure remains occupied by any commercial marine use as listed in 14-307(a) and that said use is not abandoned after the project is developed.

(d) ***Performance standards***: All uses in the waterfront central zone shall comply with the following standards. Standards 8, 10, 13, 14, 15, 16, and 17 below shall be reviewed by the planning authority:

1. ***Outdoor storage of materials:*** Outdoor storage of commodities and materials accessory to normal conduct of business, except pilings and/or cranes, shall be permitted to a maximum height of forty-five (45) feet, and such materials shall be entirely contained, including runoff contaminants and residual material, within a designated area within the lot boundaries.

2. ***Noise:*** The level of sound, measured by a sound level meter with frequency weighting network (manufactured according to standards prescribed by the American National Standards Institute, Inc.), inherently and recurrently generated within the waterfront central zone shall not exceed seventy-five (75) decibels on the A scale at the boundaries of any lot, except for sound from construction activities, sound from traffic on public streets, sound from temporary activities such as festivals, and sound created as a result of, or relating to, an emergency, including sound from emergency warning signal devices. In measuring sound levels under this section, sounds with a continuous duration of less than sixty (60) seconds shall be measured by the maximum reading on a sound level meter set to the A weighted scale and the fast meter response (L maxfast). Sounds with a continuous duration of sixty (60) seconds or more shall be measured on the basis of the energy average sound level over a period of sixty (60) seconds (LEQ_1).

3. ***Vibration:*** Vibration inherently and recurrently generated shall be imperceptible without instruments at lot boundaries. This shall not apply to vibration resulting from activities aboard a vessel or from railroad vehicle activities, or from activities on a pile supported pier.

4. ***Federal and state environmental regulations:*** All uses shall comply with federal and state environmental statutes and regulations regarding emissions into the air, except where provisions of this Code are more stringent.

5. ***Discharges into harbor areas:*** No discharge into harbor water areas shall be permitted, unless permitted by the Maine Department of Environmental Protection under a waste discharge license and as approved by the department of public services in accordance with chapter 24, article III of this code. All private sewage disposal or private wastewater treatment facilities shall comply with the provisions of chapter 24, article II of this code and federal and state environmental statutes and regulations regarding wastewater discharges.

6. ***Storage of vehicles:*** Storage of any unregistered automotive vehicle on the premises for more than sixty (60) days shall not be permitted.

7. ***Landfill of docking and berthing areas:*** Landfill of docking and berthing areas shall be governed by 38 M.R.S.A. sections 480-A through480-HH, and permitted only if the landfill does not reduce the amount of linear berthing areas or space, or berthing capacity. If approved, construction shall be undertaken using methods approved by the department of public services and shall be accomplished in accordance with the provisions of division 25 of this article and in a manner so as to ensure that a stable and impermeable wall of acceptable materials will completely contain the fill material and will not permit any fill material to leach into docking areas or navigable waters.

8. ***Off-street parking and loading:*** Division 20 (off-street parking) and division 21 (off-street loading) of this article shall not apply.

The planning authority shall review applications for non-marine use parking against the following standards:

a. Applicants for non-marine parking in the waterfront central zone shall submit a parking and traffic circulation plan showing the location of all existing and proposed structures, travel ways and parking on the subject lot.

b. Outside of the NMUOZ, non-marine use parking is subject to the limitations described in 14-311(a)

("55% rule").

c. Non-marine use parking shall only be located on a lot where, based on the parking and traffic circulation plan and a parking analysis to be submitted for planning authority review, the marine use parking supply is reasonably sufficient to serve marine use space located on the subject lot.

d. Water-dependent use parking spaces shall be located as close as reasonably possible to associated vessels and/or ground floor lease areas.

9. ***Shoreland and flood plain management regulations:*** Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5 of this article.

10. ***Lighting:*** All lighting on the site shall be shielded such that direct light sources shall not unreasonably interfere with vessels transiting the harbor nor have an unreasonable adverse impact on adjacent residential zones.

11. ***Signs:*** Signs shall be permitted as set forth in division 22 of this article.

12. ***Storage of pollutants and oily wastes:*** On-premises storage of pollutants and oily wastes shall not be permitted for more than forty-five (45) days.

13. ***Urban design:*** Construction of new structures located within thirty-five (35) feet of the southerly edge of Commercial Street between Maine Wharf and the easterly property line of the city fish pier shall conform to the guidelines set forth in the downtown urban design guidelines, unless such structures are also located within one-hundred (100) feet of the water. Such structures that are also located within one-hundred (100) feet of the water shall conform to the extent practicable to the downtown urban design guidelines.

14. ***Pier and wharf expansions:*** In addition to meeting Harbor Commission and Coast Guard requirements for navigation,

any expansion or extension of a pier and or wharf in the waterfront central zone shall demonstrate its compatibility with fixed route ferry service and emergency vessel operations.

15. ***Compatibility of non-marine uses with marine uses:*** Non-marine uses, structures and activities, including but not limited to access, circulation, parking, dumpsters, exterior storage and loading facilities or other structures shall neither interfere with the existence or operation of marine uses nor impede access to vessel berthing or other access to the water by existing or potential marine uses. Siting of a use not set forth in section 14-307(a) shall not substantially reduce or inhibit existing public access to marine or tidal waters.

16. ***Functional utility of piers and access to the water's edge:*** All new development, whether for marine or non-marine uses, should anticipate current and future functional and operational needs of water-dependent pier tenants to access the water's edge for the transfer of goods and materials between berthed vessels and land bound vehicles, and shall demonstrate adherence to the following provisions:

    a. Provisions for the storage and movement of goods and materials must be designed into all waterside development and internal circulation routes must be maintained or otherwise provided as an element of any development. The siting, design, and circulation of non-marine uses, particularly those allowed on first floors, shall adjust if needed to accommodate reasonable access for pedestrians, vehicles, and freight transfer to and from berthed vessels.

    b. Any development that proposes to site a building within ten (10) feet of a pier edge (thus precluding vehicle use of the pier edge) should provide openings and circulation through or around the building to allow the transfer of goods and materials to trucks and circulation routes within the interior of the pier.

c. With the exception of non-commercial berthing allowed under section 14-307(a)(20), there is to be no other non-commercial berthing.

d. Except for common circulation drives as defined in 14-306, access ways, parking and loading areas designated for marine uses shall be exclusively for marine uses and shall not be shared with non-marine uses.

17. ***Public view protection:*** Any new development in the waterfront central zone shall perform a public view impact analysis for review and approval by the planning board or planning authority as a condition of site plan approval. The analysis shall: (a) demonstrate the project's adherence to the ***Portland View Corridor Protection Plan*** (City of Portland Comprehensive Plan, 2002)to the extent practicable; and (b) promote the public's visual access to the water through sensitive building placement.

The planning board or planning authority shall find at a minimum that the proposed development (a) retains street corridor views as extended across Commercial Street from the Portland peninsula; (b) retains panoramic views of the water from Commercial Street to the extent practicable; and (c) where loss of existing public views to the water is shown to be necessary for the reasonable development of the site, the developer provides alternative public views to the water through newly established view corridors or publicly accessible pedestrian ways. Such pedestrian ways shall not interfere with existing or potential water-dependent uses, nor shall they endanger the public through uncontrolled proximity to industrial activity.

(Ord. No. 103-10/11, 12-20-10)

Sec. 14-312 thru Sec. 14-317. Reserved.

DIVISION 18.5. WATERFRONT PORT DEVELOPMENT ZONE*

***Editor's Note—**See the editor's note to division 18 of this article.

Sec. 14-318. Purpose.

Transport of goods by water to and from Portland is an important component of both the local and regional economy. This commerce is dependent upon land with direct access to the dredged deep water channel of the Fore River.

Waterfront land with direct deep water access shall be restricted to uses which contribute to port activity. This zone exists, therefore, to ensure the continued viability of the Port of Portland. Uses in the port development zone, while governed by the same performance standards as other industrial zones, are limited to those uses which are dependent upon deep water and which contribute to port activity.

Nonmarine industrial activity may be allowed only on a temporary basis and only to the extent it will not preclude or impede any future water-dependent development.
(Ord. No. 168-93, § 2, 1-4-93)

Sec. 14-318.5. No adverse impact on marine uses.

No use shall be permitted, approved or established in this zone if it will have an impermissible adverse impact on future marine development opportunities. A proposed development will have an impermissible adverse impact if it will result in any one (1) or more of the following:

(a) The proposed nonwater-dependent use will displace an existing water-dependent use;

(b) The proposed use will reduce existing commercial vessel berthing space;

(c) The proposed nonwater-dependent use, structure or activities, including but not limited to access, circulation, parking, dumpsters, exterior storage or loading facilities, and other structures, will unreasonably interfere with the activities and operation of existing water-dependent uses or significantly impede access to vessel berthing or other access to the water by water-dependent uses; or

(d) The siting of a proposed nonwater-dependent use will substantially reduce or inhibit existing public access to marine or tidal waters.

(Ord. No. 168-93, § 2, 1-4-93)

Sec. 14-319. Permitted uses.

Subject to a determination that the proposed use meets the standards of section 14-318.5 (no adverse impact on marine uses), the following uses are permitted in the waterfront port development zone:

(a) *Marine:*

1. Marine repair services and machine shops;

2. Tugboat, fireboat, pilot boat and similar services;

3. Harbor and marine supplies and services and ship supply such as fueling and bunkering of vessels;

4. Shipbuilding and facilities for construction, maintenance and repair of vessels;

5. Marine cargo handling facilities, including docking, loading and related storage;

6. Boat repair yards;

7. Facilities for marine construction and salvage;

8. Facilities for marine pollution control, oil spill cleanup, and servicing of marine sanitation devices.

(b) *Commercial:*

1. Intermodal transportation facilities principally for vessels with regularly scheduled destination service or for railroad transportation service;

2. Warehousing and storage of goods which are awaiting shipment via cargo carriers;

3. Marine cargo container and chassis maintenance and

repair.

(c) *Public:*

Public uses including pedestrian and bicycle trails.

(d) *Other:*

1. Accessory uses customarily incidental and subordinate to the location, function and operation of permitted uses. Food service establishments, newsstands and other similar retail and service support uses shall only be permitted as accessory uses if they are part of and located within the lot lines of a use set forth in section 14-319(a)3, 6, or (b)1, if all such uses do not exceed two thousand (2,000) square feet in total floor area of the building or twenty-five (25) percent of the total floor area of the building, whichever is less, and if each individual use does not exceed one thousand (1,000) square feet in total floor area of the building; and further provided that such accessory uses provide goods or services that are supportive of the principal use and its clientele.

2. Street vendors licensed pursuant to Chapter 19 are a permitted use, but only in the following area of the waterfront port development zone: on Commercial Street from the intersection of India Street to the westerly side of the Maine State Pier.

3. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 168-93, § 2, 1-4-93; Ord. No. 38-02/03, § 2, 9-4-02; Ord. No. 33-11/12, 1-18-12)

Sec. 14-320. Conditional uses.

(a) The following uses shall be permitted as conditional uses in the waterfront port development zone, provided that, notwithstanding section 14-471(c), section 14-474(a), or any other provision of this Code, the Planning Board shall be substituted for the board of appeals as the reviewing authority, and provided further that in addition to the provisions of section 14-474(c)(2)

such uses will not impede or preclude existing or potential water-dependent development on other lots, will allow for adequate right-of-way access to the water, are compatible with marine uses, and are physically adaptable or relocatable to make way for future development for water-dependent uses, and meet any additional standards set forth below:

1. *Marine:*

    a. Marine products, wholesaling and retailing;

    b. Boat storage facilities, excluding rack storage;

    c. Seafood processing;

    d. Seafood packing and packaging;

    e. Fabrication, storage and repair of fishing equipment;

    f. Ice-making services;

    g. Fabrication of marine-related goods;

    h. Fish by-products processing, provided that:

        i. Any fish by-product processing facility has a valid rendering facility license under chapter 12; and

        ii. The processing of other material wastes or by-products shall not be deemed a lawful accessory use under any other provision of this article.

2. *Commercial:*

    Off-street parking lots, excluding parking structures.

3. *Industrial:*

    a. Storage of goods in existing structures;

    b. Facilities for combined marine and general construction;

c. Low impact industrial uses, including but not limited to bakeries, breweries, bottling, printing and publishing, pharmaceuticals, machine shops, manufacture of products, assembly of electrical components, tool and die shops, and the packaging of food, provided that such uses shall be subject to the performance standards set forth in §14-252.

4. *Public:*

Utility substations, including sewage collection and pumping stations, water pumping stations, transformer stations, telephone electronic equipment enclosures and other similar structures, provided that such structures are located more than one hundred (100) feet from the water.

(b) The following use shall be permitted only upon the issuance of a conditional use permit subject to the provisions of section 14-474 (conditional uses), and any special provisions, standards or requirements specified below:

1. Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

a. Towers may be installed for the purpose of wind data collection for no more than two (2) years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

2. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 168-93, § 2, 1-4-93; Ord. No. 149-01/02, 2-4-02; Ord. No. 29-09/10, 8-3-09, emergency passage; Ord. No. 33-11/12, 1-18-12)

Sec. 14-320.1. Prohibited uses.

Uses which are not enumerated in either section 14-319 or 14-320 as permitted or conditional uses are prohibited. Those uses that are prohibited shall include, without limitation:

a. Residential uses (not in existence on May 5, 1987).

b. Hotels, motels or boatels.

c. Auditoriums, civic centers, convention centers or other meeting facilities.

d. Restaurants and drinking establishments.

(Ord. No. 168-93, § 2, 1-4-93)

Sec. 14-320.2. Dimensional requirements.

In addition to the provisions of article III, division 25 of this Code, lots in the waterfront port development zone shall be subject to the following requirements:

(a) *Minimum lot size:* None.

(b) *Minimum frontage:* None.

(c) *Minimum yard dimensions:*

Front setback: None.

Side setback: None.

Rear setback: None.

Setback from pier line: Notwithstanding the above requirements, a minimum setback of five (5) feet from the edge of any pier, wharf or bulkhead shall be required for any structure. The setback area may be utilized for activities related to the principal uses carried on in the structure, subject to the provisions of sections 14-319 and 14-320, but shall not be utilized for off-street parking. The edge of any pier, wharf or bulkhead shall include any attached apron(s).

(d) *Maximum lot coverage:* One hundred (100) percent.

(e) ***Maximum building height:*** Forty-five (45) feet, except as follows:

1. In the areas bounded as described below, facilities for bulk storage of materials delivered to a site by waterborne transportation or awaiting transportation from the site by means of waterborne transportation may be erected up to the maximum heights indicated (above mean sea level):

   a. In the area that lies between Danforth Street and the Veterans Memorial Bridge: One hundred forty-five (145) feet.

   b. In the area between Danforth Street and the projection of the centerline of Vaughn Street between its intersections with Orchard Street and Danforth Street: Seventy (70) feet.

   c. In the area between the projection of the centerline of Vaughn Street between its intersections with Orchard Street and Danforth Street and the projection of the centerline of Fletcher Street between its intersections with Orchard Street and Danforth Street: Seventy-five (75) feet.

   d. In the area formed by the projection of the centerline of Fletcher Street between its intersections with Orchard Street and Danforth Street easterly to the projection of the centerline of Emery Street between its intersections with Taylor Street and Danforth Street: Seventy-five (75) feet.

   e. In those areas where the maximum height may not exceed forty-five (45) feet above grade, no structure may exceed sixty-five (65) feet in height above mean sea level.

   For purposes of this section, a projection of the centerline of a street shall consist of an extension of the centerline of the street to the water side boundary of the waterfront port development zone.

2. Additional bulk, height and location standards for structures exceeding forty-five (45) feet in height above grade within the waterfront port development zone:

   a. The maximum horizontal diagonal measurement of portions of a structure, cluster of structures or equipment exceeding forty-five (45) feet in height above grade shall not exceed one hundred (100) feet, except that for each foot that the structure, cluster of structures, or equipment is lowered from the maximum permitted height, the maximum horizontal measurement may increase by one (1) foot.

   b. In addition to any other setback requirements, portions of structures or clusters of structures exceeding forty-five (45) feet in height above grade shall be set back a minimum of one (1) foot from the exterior property line of the owner of the underlying fee interest for each foot that the structure or cluster of structures exceeds forty-five (45) feet in height above grade.

   c. No structure or cluster of structures exceeding forty-five (45) feet in height above grade may be located closer than one hundred fifty (150) feet from any other such structure or cluster of structures.

   d. The cumulative width of the portion of structures exceeding forty-five (45) feet in height above grade shall not exceed more than thirty (30) percent of the average width of the lot as measured by a line drawn parallel to the water.

   e. No structure shall exceed forty-five (45) feet in height above grade within the view corridors established by the projection of the street right-of-way lines of Vaughn Street or Emery Street.

f. For purposes of this section only, moveable elements such as cranes and gantries, and connection devices such as conveyors or bridges shall not be subject to the space and bulk requirements, but shall be subject to a determination by the Federal Aviation Administration that the location of such equipment will not create a hazard to navigation. Other rooftop appurtenances shall not exceed the maximum height limits set forth in this section.

g. The applicant must provide a determination from the Federal Aviation Administration that structures and equipment will not exceed the applicable height guidelines for the runway approach and will not create a hazard to navigable airspace. Such a determination shall be accepted as conclusive evidence that the proposed development will not create a hazard.

h. Accessory uses in structures which exceed forty-five (45) feet in height above grade shall not be located higher than forty-five (45) feet within the structure.

(Ord. No. 168-93, § 2, 1-4-93)

Sec. 14-320.3. Performance standards.

All uses in the waterfront port development zone shall comply with the following standards:

(a) ***Outdoor storage of materials:*** Outdoor storage of commodities and materials accessory to normal conduct of business, except pilings and/or cranes, shall be permitted to a maximum height of forty-five (45) feet, and such materials shall be entirely contained, including runoff contaminants and residual material, within a designated area within the lot boundaries.

(b) ***Noise:***

1. The level of sound, measured by a sound level meter with frequency weighting network (manufactured according to standards prescribed by the American

National Standards Institute, Inc.), inherently and recurrently generated within the waterfront port development zone between the hours of 7:00 p.m. and 7:00 a.m. from industrial facilities or operation commenced on or after July 1, 1988, shall not exceed fifty-five (55) decibels on the A scale at or within the boundaries of any residential zone, except for sound from construction activities, sound from traffic on public streets, sound from temporary activities such as festivals, and sound created as a result of, or relating to, an emergency, including sound from emergency warning signal devices.

2. In measuring sound levels under this section, sounds with a continuous duration of less than sixty (60) seconds shall be measured by the maximum reading on a sound level meter set to the A weighted scale and the fast meter response (L maxfast). Sounds with a continuous duration of sixty (60) seconds or more shall be measured on the basis of the energy average sound level over a period of sixty (60) seconds (LEQ_1).

3. In addition to the sound level standards otherwise established, facilities or operations established or built in the waterfront port development zone on or after July 1, 1988, shall employ best practicable sound abatement techniques to prevent tonal sounds and impulse sounds or, if such tonal and impulse sounds cannot be prevented, to minimize the impact of such sounds in residential zones. Tonal sound is defined as a sound wave usually perceived as a hum or which because its instantaneous sound pressure varies essentially as a simple sinusoidal function of time. Impulse sounds are defined as sound events characterized by brief excursions of sound pressure, each with a duration of less than one (1) second.

(c) ***Vibration:*** Vibration inherently and recurrently generated shall be imperceptible without instruments at lot boundaries. This shall not apply to vibration resulting from activities aboard a vessel or from railroad vehicle activities, or from activities on a pile supported pier.

(d) ***Federal and state environmental regulations:*** All uses shall comply with federal and state environmental statutes and regulations regarding emissions into the air, except where provisions of this Code are more stringent.

(e) ***Discharges into harbor areas:*** No discharge into harbor water areas shall be permitted, unless permitted by the Maine Department of Environmental Protection under a waste discharge license and as approved by the department of parks and public works in accordance with chapter 24, article III of this Code. All private sewage disposal or private wastewater treatment facilities shall comply with the provisions of chapter 24, article II of this Code and federal and state environmental statutes and regulations regarding wastewater discharges.

(f) ***Storage of vehicles:*** Storage of any unregistered automotive vehicle on the premises for more than sixty (60) days shall not be permitted.

(g) ***Landfill of docking and berthing areas:*** Landfill of docking and berthing areas shall be governed by 38 M.R.S.A. Sections 471 through 478, and permitted only if the landfill does not reduce the amount of linear berthing areas or space, or berthing capacity. If approved, construction shall be undertaken using methods approved by the department of parks and public works and shall be accomplished in accordance with the provisions of division 25 of this article and in a manner so as to ensure that a stable and impermeable wall of acceptable materials will completely contain the fill material and will not permit any fill material to leach into docking areas or navigable waters.

(h) ***Off-street parking:*** Off-street parking is required as provided in division 20 (off-street parking) of this article.

(i) ***Off-street loading:*** Off-street loading is required as provided in division 21 of this article.

(j) ***Shoreland and flood plain management regulations:*** Any lot or portion of a lot located in a shoreland zone as

identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(k) ***Lighting:*** All lighting on the site shall be shielded such that direct light sources shall not unreasonably interfere with vessels transiting the harbor nor have an unreasonable adverse impact on adjacent residential zones.

(l) ***Signs:*** Signs shall be permitted as set forth in division 22 of this article.

(m) ***Storage of pollutants and oily wastes:*** On-premises storage of pollutants and oily wastes shall not be permitted for more than forty-five (45) days.

(n) ***Compatibility of nonmarine uses with marine uses:*** Nonmarine uses, structures and activities, including but not limited to access, circulation, parking, dumpsters, exterior storage and loading facilities or other structures shall neither unreasonably interfere with the existence or operation of marine uses nor significantly impede access to vessel berthing or other access to the water by existing or potential marine uses.

(Ord. No. 168-93, § 2, 1-4-93; Ord. No. 240-09/10, 6-21-10)

DIVISION 18.7. WATERFRONT SPECIAL USE ZONE*

***Editor's Note—**See the editor's note to division 18 of this article.

Sec. 14-320.5. Purpose.

The waterfront special use zone recognizes that the uses appropriate in this zone are constrained by its proximity to heavy industrial use on the western end, a high-density residential neighborhood on the north, and park and R-OS land to the east. Uses to be located in this zone must be compatible with these existing neighborhood uses.

At a minimum, parcels in this zone generally enjoy visual access to the port. It is further recognized that this area has historically been used for marine uses and that some of the parcels

have the capacity to accommodate active water-dependent uses. While physical access to the water may not currently be legally available to all parcels in this zone, it is anticipated that developments in this zone may be able to negotiate easements for access. At a minimum, development in this zone should not be incompatible with marine and water-dependent uses. Uses which contribute to the maintenance and improvement of the infrastructure along the water's edge as a condition of use are strongly encouraged.
(Ord. No. 168-93, § 2, 1-4-93)

Sec. 14-320.5.5. No adverse impact on marine uses.

No use shall be permitted, approved or established in this zone if it will have an impermissible adverse impact on future marine development opportunities. A proposed development will have an impermissible adverse impact if it will result in any one (1) or more of the following:

(a) The proposed nonwater-dependent use will displace an existing water-dependent use;

(b) The proposed use will reduce existing commercial vessel berthing space;

(c) The proposed nonwater-dependent use, structure or activities, including but not limited to access, circulation, parking, dumpsters, exterior storage or loading facilities, and other structures, will unreasonably interfere with the activities and operation of existing water-dependent uses or significantly impede access to vessel berthing or other access to the water by water-dependent uses; or

(d) The siting of a proposed nonwater-dependent use will substantially reduce or inhibit existing public access to marine or tidal waters.

(Ord. No. 168-93, § 2, 1-4-93)

Sec. 14-320.6. Permitted uses.

Subject to a determination that the proposed use meets the standards of section 14-320.5.5 (no adverse impact on marine uses):

(a) The following uses are permitted in the waterfront special use zone on both the north and south sides of the

railroad line indicated on the City of Portland Zoning Map:

1. *Marine:*

   a. Marine products, wholesaling, distribution and retailing;

   b. Marine repair services and machine shops;

   c. Tugboat, fireboat, pilot boat and similar services;

   d. Harbor and marine supplies and services, chandleries, and ship supply such as fueling and bunkering of vessels;

   e. Marine industrial welding and fabricating;

   f. Shipbuilding and facilities for construction, maintenance and repair of vessels;

   g. Commercial marine transport and excursion services, including ferries, captained charter services, sport fishing and water taxis;

   h. Cargo handling facilities, including docking, loading and related storage;

   i. Boat repair yards;

   j. Boat storage facilities, including rack storage facilities;

   k. Seafood processing;

   l. Seafood packing and packaging;

   m. Seafood loading and seafood distribution;

   n. Fabrication, storage and repair of fishing equipment;

   o. Ice-making services;

p. Facilities for marine construction and salvage;

q. Facilities for marine pollution control, oil spill cleanup, and servicing of marine sanitation devices;

r. Fabrication of marine-related goods;

s. Fishing and commercial vessel berthing;

t. Noncommercial berthing;

u. Marine office, including but not limited to offices of owners of wharves or their agents, and naval architects, and seafood brokers;

v. Public landings;

w. Marinas;

x. Intermodal transportation facilities.

2. *Industrial uses:*

Industrial uses which meet the performance standards of the I-2 zone.

3. *Public:*

Pedestrian and bicycle trails.

The following uses are permitted in the waterfront special use zone only on the north side of the railroad tracks indicated on the City of Portland Zoning Map only in (a) buildings in existence on January 4, 1993, or (b) one (1) new structure per parcel (as defined in 30-A M.R.S.A. Section 4401(6)), which parcel was in existence on January 4, 1993, of up to five thousand (5,000) square feet in total floor area. No construction of a new structure of more than five thousand (5,000) square feet in total floor area or in excess of one (1) per parcel for uses other than those specified in subsections (1) through (3) above is allowed without approval of a conditional use pursuant to section 14-320.6.5 or conditional or contract rezoning pursuant to division 1.5 of this article:

4. *Commercial uses:*

a. Professional, business, and general offices;

b. Business service establishments;

c. Restaurants, provided that food service and consumption shall be the primary function of the restaurant;

d. Cabinet and carpentry shops;

e. Cold storage facilities;

f. Museums and art galleries.

5. *Other:*

a. Accessory uses customarily incidental and subordinate to the location, function and operation of permitted uses or temporary exhibition uses, provided that all such exhibition uses on a lot do not exceed a combined total of sixty (60) days per year and that the total floor area utilized for such uses does not exceed seventy thousand (70,000) square feet at any one (1) time;

b. Parking: Parking shall be permitted as long as it does not impede access to water by existing or potential marine uses.

c. Institutional uses including marine research, education and laboratory facilities. Such uses shall not include any type of overnight accommodations.

d. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

6. *Public:*

a. Utility substations, including sewage collection and pumping stations, water pumping stations, transformer stations, telephone

electronic equipment enclosures and other similar structures, provided that such structures are located more than one hundred (100) feet from the water;

b. Municipal uses;

c. Landscaped pedestrian parks, plazas and similar outdoor pedestrian spaces, including without limitation pedestrian and bicycle trails.

7. *Industrial uses:*

Warehousing and wholesaling.

(Ord. No. 168-93, § 2, 1-4-93; Ord No. 187-99, 1-4-99; Ord. No. 33-11/12, 1-18-12)

Sec. 14-320.6.5. Conditional uses.

(a) The following uses shall be permitted only upon the issuance of a conditional use permit, subject to the provisions of sections 14-320.5.5, 14-474 and any special provisions, standards or requirements specified below, and further provided that, notwithstanding section 14-474(a) or any other provision of this Code, the Planning Board shall be substituted for the board of appeals as the reviewing authority:

1. Any use permitted in section 14-320.6(d)2, 4, 5 or 6, (e), (f) or (g), in one (1) new structure of more than five thousand (5,000) square feet, but not more than ten thousand (10,000) square feet in total floor area per parcel.

(b) The following use shall be permitted only upon the issuance of a conditional use permit subject to the provisions of section 14-474 (conditional uses), and any special provisions, standards or requirements specified below:

1. Temporary wind anemometer towers, as defined in Sec 14-47, are permitted provided the following standards are met in addition to Sec 14-430:

a. Towers may be installed for the purpose of wind data collection for no more than two (2)

years after the issuance of a Certificate of Occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the Board of Appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the Board of Appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in terms of strength, stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to Corporation Counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meteorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, or the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

2. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Ord. No. 168-93, § 2, 1-4-93; Ord. No. 29-09/10, 8-3-09, emergency passage; Ord. No. 33-11/12, 1-18-12)

Sec. 14-320.7. Contract or conditional zoning.

An applicant may only construct a new structure of either more than five thousand (5,000) square feet in total floor area for occupancy by uses enumerated in section 14-320.6(d)1, or ten thousand (10,000) square feet in total floor area for occupancy by uses enumerated in section 14-320.6(d)2, 4, 5 or 6, (e), (f) or (g) or in excess of one (1) per parcel for occupancy by those same uses if a rezoning is approved pursuant to division 1.5 of this article. A conditional or contract rezoning shall only be approved if, after public hearing and opportunity for public comment, the reviewing body finds that the applicant has carried the burden of proof to show that the proposed development meets the standards of section 14-320.55 and all of the following standards:

(a) The proposed development is consistent with the comprehensive plan.

(b) The project's public benefits outweigh its potential negative impacts, taking into consideration as public benefits protection of existing water-dependent uses, preservation of future water-dependent use development opportunities, contribution to the development of and/or on-going maintenance of the marine infrastructure for commercial vessels (either on- or off-site), and visual and physical access to the waterfront for the general public.

(c) The proposed development responds to any unique physical conditions and development opportunities along the

shoreline.

(d) The proposed development is sensitive to design opportunities and local environmental conditions, makes use of creative design solutions, does not significantly restrict air, light or water views of other structures located in the vicinity and does not create significant adverse local climatic effects such as increased winds, shadowing, or less efficient traffic, parking or circulation patterns.

(e) The proposed development is consistent with the Portland Waterfront Public Access Design Guidelines, a copy of which is on file in the department of planning and urban development.

(f) The proposed rezoning contains adequate provisions and/or conditions to ensure that the water-dependent use is not abandoned after the project is developed.

(Ord. No. 168-93, § 2, 1-4-93)

Sec. 14-320.8. Prohibited uses.

Uses which are not enumerated in section 14-320.6 as permitted or in section 14-320.6.5 as conditional uses are prohibited.

(Ord. No. 168-93, § 2, 1-4-93)

Sec. 14-320.9. Dimensional requirements.

In addition to the provisions of article III, division 25 of this Code, lots in the waterfront special use zone shall be subject to the following requirements:

(a) *Minimum lot size:* None.

(b) *Minimum frontage:* None.

(c) *Minimum yard dimensions:*

Front setback: None.

Side setback: None required unless adjacent to a residential zone; if adjacent to a residential zone, twenty-five (25) feet.

Rear setback: None required unless adjacent to a

residential zone; if adjacent to a residential zone, twenty-five (25) feet.

Setback from pier line: Notwithstanding the above requirements, a minimum setback of five (5) feet from the edge of any pier, wharf or bulkhead shall be required for any structure. The setback area may be utilized for activities related to the principal uses carried on in the structure, subject to the provisions of sections 14-313 and 14-314, but shall not be utilized for off-street parking. The edge of any pier, wharf or bulkhead shall include any attached apron(s).

(d) ***Maximum lot coverage:*** One hundred (100) percent.

(e) 1. ***Maximum building height:*** Forty-five (45) feet, except in the area formed by the projection of the centerline of Atlantic Street between its intersections with Wilson Street and the Eastern Promenade easterly to the easternmost boundary of the waterfront special use zone, where facilities for bulk storage of materials delivered to a site by waterborne transportation or awaiting transportation from the site by means of waterborne transportation may be erected to heights that shall not exceed sixty-five (65) feet above mean sea level. In those areas where the maximum height may not exceed forty-five (45) feet above grade, no structure may exceed sixty-five (65) feet in height above mean sea level. For purposes of this section, a projection of the centerline of a street shall consist of an extension of the centerline of the street to the water side boundary of the waterfront special use zone.

2. ***Additional bulk, height and location standards for structures exceeding forty-five (45) feet in height above grade within the waterfront special use zone:***

a. The maximum horizontal diagonal measurement of portions of a structure, cluster of structures or equipment exceeding forty-five (45) feet in height above grade shall not exceed one hundred (100) feet, except that for each foot that the structure, cluster of structures, or

equipment is lowered from the maximum permitted height, the maximum horizontal measurement may increase by one (1) foot.

b. In addition to any other setback requirements, portions of structures or clusters of structures exceeding forty-five (45) feet in height above grade shall be set back a minimum of one (1) foot from the exterior property line of the owner of the underlying fee interest for each foot that the structure or cluster of structures exceeds forty-five (45) feet in height above grade.

c. No structure or cluster of structures exceeding forty-five (45) feet in height above grade may be located closer than one hundred fifty (150) feet from any other such structure or cluster of structures.

d. The cumulative width of the portion of structures exceeding forty-five (45) feet in height above grade shall not exceed more than thirty (30) percent of the average width of the lot as measured by a line drawn parallel to the water.

e. No structure shall exceed forty-five (45) feet in height above grade within the view corridors established by the projection of the street right-of-way lines for Atlantic Street, Vesper Street or for O'Brion Street.

f. For purposes of this section only, moveable elements such as cranes and gantries, and connection devices such as conveyors or bridges shall not be subject to the space and bulk requirements, but shall be subject to a determination by the Federal Aviation Administration that the location of such equipment will not create a hazard to navigation. Other rooftop appurtenances shall not exceed the maximum height limits set forth in this section.

g. The applicant must provide a determination from the Federal Aviation Administration that structures and equipment will not exceed the applicable height guidelines for the runway approach and will not create a hazard to navigable airspace. Such a determination shall be accepted as conclusive evidence that the proposed development will not create a hazard.

h. Accessory uses in structures which exceed forty-five (45) feet in height above grade shall not be located higher than forty-five (45) feet within the structure.

(Ord. No. 168-93, § 2, 1-4-93)

Sec. 14-320.10. Performance standards.

All uses in the waterfront special use zone shall comply with the following standards:

(a) *Outdoor storage of materials:* Outdoor storage of commodities and materials accessory to normal conduct of business, except pilings and/or cranes, shall be permitted to a maximum height of forty-five (45) feet, and such materials shall be entirely contained, including runoff contaminants and residual material, within a designated area within the lot boundaries.

(b) *Noise:*

1. The level of sound, measured by a sound level meter with frequency weighting network (manufactured according to standards prescribed by the American National Standards Institute, Inc.), inherently and recurrently generated within the waterfront special use zone between the hours of 7:00 p.m. and 7:00 a.m. from industrial facilities or operations commenced on or after July 1, 1988, shall not exceed fifty-five (55) decibels on the A scale at or within the boundaries of any residential zone, except for sound from construction activities, sound from traffic on public streets, sound from temporary activities such as festivals, and sound created as a result of, or relating to, an emergency, including sound from emergency warning

signal devices.

2. In measuring sound levels under this section, sounds with a continuous duration of less than sixty (60) seconds shall be measured by the maximum reading on a sound level meter set to the A weighted scale and the fast meter response (L maxfast). Sounds with a continuous duration of sixty (60) seconds or more shall be measured on the basis of the energy average sound level over a period of sixty (60) seconds (LEQ_1).

3. In addition to the sound level standards otherwise established, facilities or operations established or built in the waterfront special use zone on or after July 1, 1988, shall employ best practicable sound abatement techniques to prevent tonal sounds and impulse sounds or, if such tonal and impulse sounds cannot be prevented, to minimize the impact of such sounds in residential zones. Tonal sound is defined as a sound wave usually perceived as a hum or which because its instantaneous sound pressure varies essentially as a simple sinusoidal function of time. Impulse sounds are defined as sound events characterized by brief excursions of sound pressure, each with a duration of less than one (1) second.

(c) ***Vibration:*** Vibration inherently and recurrently generated shall be imperceptible without instruments at lot boundaries. This shall not apply to vibration resulting from activities aboard a vessel or from railroad vehicle activities, or from activities on a pile supported pier.

(d) ***Federal and state environmental regulations:*** All uses shall comply with federal and state environmental statutes and regulations regarding emissions into the air, except where provisions of this Code are more stringent.

(e) ***Discharges into harbor areas:*** No discharge into harbor water areas shall be permitted, unless permitted by the Maine Department of Environmental Protection under a waste discharge license and as approved by the department of parks and public works in accordance with chapter 24,

article III of this Code. All private sewage disposal or private wastewater treatment facilities shall comply with the provisions of chapter 24, article II of this Code and federal and state environmental statutes and regulations regarding wastewater discharges.

(f) ***Storage of vehicles:*** Storage of any unregistered automotive vehicle on the premises for more than sixty (60) days shall not be permitted.

(g) ***Landfill of docking and berthing areas:*** Landfill of docking and berthing areas shall be governed by 38 M.R.S.A. Sections 471 through 478, and permitted only if the landfill does not reduce the amount of linear berthing areas or space, or berthing capacity. If approved, construction shall be undertaken using methods approved by the department of parks and public works and shall be accomplished in accordance with the provisions of division 25 of this article and in a manner so as to ensure that a stable and impermeable wall of acceptable materials will completely contain the fill material and will not permit any fill material to leach into docking areas or navigable waters.

(h) ***Off-street parking:*** Off-street parking is required as provided in division 20 (off-street parking) of this article.

(i) ***Off-street loading:*** Off-street loading is required as provided in division 21 of this article.

(j) ***Shoreland and flood plain management regulations:*** Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(k) ***Lighting:*** All lighting on the site shall be shielded such that direct light sources shall not unreasonably interfere with vessels transiting the harbor nor have an unreasonable adverse impact on adjacent residential zones.

(l) ***Signs:*** Signs shall be permitted as set forth in division 22 of this article.

(m) ***Storage of pollutants and oily wastes:*** On-premises storage of pollutants and oily wastes shall not be permitted for more than forty-five (45) days.

(n) ***Compatibility of nonmarine uses with marine uses:*** Nonmarine uses, structures and activities, including but not limited to access, circulation, parking, dumpsters, exterior storage and loading facilities or other structures shall neither unreasonably interfere with the existence or operation of marine uses nor significantly impede access to vessel berthing or other access to the water by existing or potential marine uses.

(Ord. No. 168-93, § 2, 1-4-93; Ord. No. 240-09/10, 6-21-10)

DIVISION 19. R-P RESOURCE PROTECTION ZONE

Sec. 14-321. Use.

No building shall be erected, altered, enlarged, rebuilt or used, and no premises shall be used, in a R-P resource protection zone except for the following uses:

(a) Nonintensive recreational uses not requiring structures, such as fishing and hiking;

(b) Motorized and nonmotorized vehicular traffic on existing roads, trails and rails, as appropriate;

(b2) Bikeways, pedestrian trails and walkways;

(c) Fire prevention activities;

(d) Wildlife management activities;

(e) Soil and water conservation activities;

(f) Surveying and natural resource analysis;

(g) Emergency operations as defined in section 14-47;

(h) Harvesting of wild crops;

(i) Nonresidential structures for educational, scientific or nature interpretation purposes, containing a maximum

floor area of not more than ten thousand (10,000) square feet;

(j) Public and private parks and recreational areas, including one (1) or more structures containing a total maximum floor area of not more than ten thousand (10,000) square feet;

(k) Permanent and temporary piers, docks, wharves, bridges and uses projecting into water bodies, as allowed in section 14-449(b);

(l) Reserved;

(m) Storehouses for fishermen's gear;

(n) Reserved;

(o) Essential services as defined in section 14-47 accessory to the uses permitted herein;

(p) Signs, as allowed in division 22 of this article;

(q) Road construction, in accordance with the provisions of section 14-449;

(r) Parking facilities for uses permitted under this section;

(s) Reserved;

(t) Landfill and other earth-moving activity, as allowed in section 14-449(d).

(u) The following uses are permitted in the R-P zone only upon the issuance of a conditional use permit, subject to the provisions of section 14-474 (conditional uses) of this article and any special provisions, standards or requirements specified below.

1. Temporary wind anemometer towers, as defined in section 14-47, are permitted provided the following standards are met in addition to section 14-430:

a. Towers may be installed for the purpose of wind data collection for no more than two (2)

years after the issuance of a certificate of occupancy for the tower. At the conclusion of the aforementioned two (2) years, the tower must be dismantled and removed from the site within sixty (60) days; and

b. Towers shall be constructed according to plans and specifications stamped by a licensed professional engineer, which shall be provided to the board of appeals with the application; and

c. Towers shall be set back from habitable buildings by a distance equal to 1.1 times the tower height; and

d. The applicant shall provide a safety report prepared and stamped by a licensed professional engineer to the board of appeals with their application for conditional use, which demonstrates how the proposed temporary wind anemometer tower is safe in temrs of strength, stability, security, grounding, icing impacts and maintenance; and

e. The applicant shall provide evidence of commercial general liability insurance, such insurance to be satisfactory to corporation counsel and cover damage or injury resulting from construction, operation or dismantling of any part of the temporary wind anemometer tower; and

f. Towers and associated guy wires shall be sited to minimize their prominence from and impacts on public ways (including pedestrian ways); and

g. Towers shall be used for installing anemometers and similar devices at a range of heights from the ground to measure wind characteristics (speed, direction, frequency) and related meterorological data, but shall not be used for any other purpose; and

h. A performance guarantee shall be required for the cost of removal of the tower, guy wires and anchors. This requirement may be satisfied by surety bond, letter of credit, escrow account or by evidence, acceptable to the City, of the financial and technical ability and commitment of the applicant or its agents to remove the facility at the end of the use period.

2. Wind energy systems, as defined and allowed in Article X, Alternative Energy.

(Code 1968, § 602.13A.A; Ord. No. 499-74, § 6, 8-19-74; Ord. No. 15-92, § 24, 6-15-92; Ord. No. 33-11/12, 1-18-12)

Sec. 14-322. Space and bulk.

No building or structure shall be erected, altered, enlarged, rebuilt, or used in a R-P resource protection zone which does not comply with the following requirements:

(a) *Minimum rear yards:* Principal building or structure, other than a boathouse or storehouse for fishermen's gear: Seventy-five (75) feet.

(b) *Minimum side yards:*

1. Principal building or structure: Fifteen (15) feet.

2. Accessory building or structure: Five (5) feet.

(c) *Minimum side yard on side streets:*

1. Principal building or structure: Twenty (20) feet.

2. Accessory building or structure: Twenty (20) feet.

(d) *Minimum front yards:*

1. Principal building or structure: Twenty-five (25) feet.

2. Accessory building or structure: Twenty-five (25) feet.

(e) *Maximum height:*

1. Principal building or structure: Two (2) stories or twenty-five (25) feet.

2. Accessory building or structure: One (1) story or fifteen (15) feet.

(f) *Maximum building area:* Principal building or group of buildings: Ten (10) percent of lot area.

(g) *Minimum lot area:* Twenty thousand (20,000) square feet.

(h) *Minimum width of lot:* One hundred (100) feet.

(i) *Minimum lot frontage on street or shoreline:* One hundred (100) feet.

(j) *Minimum shoreline setback:* All principal structures other than permitted piers, docks, wharves, breakwaters, causeways, bridges, boathouses and storehouses for fishermen's gear: Seventy-five (75) feet.

(Code 1968, § 602.13A.B; Ord. No. 499-74, § 6, 8-19-74)

Sec. 14-323. Off-street parking.

Any off-street parking in a R-P resource protection zone is required as provided in division 20 of this article.

(Code 1968, § 602.13A.B; Ord. No. 499-74, § 6, 8-19-74)

Sec. 14-324. Shoreland and flood plain management regulations.

Any lot or portion of a lot located in a shoreland zone as identified on the city shoreland zoning map or in a flood hazard zone shall be subject to the requirements of division 26 and/or division 26.5.

(Ord. No. 15-92, § 25, 6-15-92)

DIVISION 19.5. HELISTOP OVERLAY ZONE

Sec. 14-325. Purpose.

The intent of this zone is to create an overlay zone in which helicopter landing areas are permitted on individual sites in addition to those uses permitted in the underlying zone. The

purpose of this zone is to protect the public health and safety by allowing helicopters serving medical needs to land in certain areas, while protecting surrounding areas from any negative effects associated with such a use.
(Ord. No. 48-93, 7-19-93)

Sec. 14-326. Helistop defined.

A helistop, for purposes of this division, shall be defined as an area used for the landing of helicopters at any location other than an airport. Such area shall include a landing area or pad, and may include parking required for access to the landing area or pad, a loading and unloading area for emergency vehicles, and other related facilities other than maintenance and repair facilities.
(Ord. No. 48-93, 7-19-93)

Sec. 14-327. Regulations for helistops.

(a) *Helistops which have more than five landings per month:*

(1) All such helistops must comply with all applicable Federal Aviation Association regulations, including those for marking of landing areas.

(2) All take-off, landing and parking areas at such a helistop site shall be surfaced with grass or with a dust-proof material.

(3) Each landing pad shall be set back at least two hundred (200) feet from any residence, school or church. Each landing pad shall be set back at least fifty (50) feet from any commercial or industrial structure. All setbacks shall be measured from the edge of the landing pad.

(4) The area in which a landing pad is located shall be enclosed by a fence or other barrier of not less than three (3) feet in height or shall be secured by a locked gate, as approved by the fire department.

(5) All such helistops shall be subject to review under article V of this chapter.

(b) *Helistops which have five or fewer landings per month:*

(1) All such helistops must comply with all applicable

Federal Aviation Association regulations.

(2) All such helistops shall be subject to approval by the zoning administrator and the fire department.

(3) Such helistops shall not be subject to review under article V of this chapter.

(Ord. No. 48-93, 7-19-93)

Sec. 14-328 – Sec. 14-330. Reserved.

DIVISION 19.7. RESERVED.

Sec. 14-330.1. – Sec. 14-330.5 Reserved.

***Editor's Note-** Pursuant to Order 142-06/07 passed on 2/21/07 repealed Division 19.7.(Formula Businesses) Sections 14-330.1.-14-330.5. in its entirety and established a task force on business diversity to develop a strategy for preserving and enhancing the economic health of Portland's downtown business district related to its unique character, business diversity, economic vitality, and quality of life. As part of its charge, the Task Force shall undertake the following actions:

1. Study and report on the strengths and challenges of various regulatory tools
used in other municipalities to maintain business diversity, including community impact review; formula business restrictions; local purchasing preferences; site plan review standards; Tax Increment Financing; and District Improvement Financing.

2. Consider the legality of the various regulatory tools noted in paragraph 1.

3. Consider the potential economic impact of the various regulatory tools noted in paragraph 1 on the downtown business district, including but not limited to consideration of measured impacts of the Formula Business Ordinance adopted in November of 2006; development patterns in and surrounding the downtown business district; review of lease rates and real estate values within the downtown business zone; and a review of openings and closings of establishments within the zone in the recent past.

4. Upon completion of its review, the Task Force will prepare a report summarizing its research and findings, including any recommendations needed to maintain the economic health of Portland's downtown business district. Such report shall be submitted to the Council and Planning Board for review and consideration.

The Task Force shall consist of 15 individuals appointed by the Mayor representing the following groups:

Portland City Council: Two City Councilors who shall be Co-chairs.
One representative nominated by the Maine Real Estate and Developers Association.
One representative nominated by the Portland Community Chamber of Commerce.
One representative nominated by Portland Buy Local.
One representative nominated by the Bayside Community Development Corporation.
One representative nominated by the Portland Downtown District.
One District One resident.
One District Two resident.
One District Three resident.
One District Four resident.
One District Five resident.
One representative of formula businesses.
One representative of small independent businesses.
One representative of downtown Portland property owners.

DIVISION 19.8. DOWNTOWN ENTERTAINMENT OVERLAY ZONE

Sec. 14-330.11. Purpose.

The purpose and intent of this section is to regulate the location of businesses with entertainment licenses in order to maintain and improve public safety and the quality of life of Portland residents by preventing an over concentration of businesses with entertainment licenses, particularly those which also have liquor licenses, and the public safety problems that have and will be experienced when too many of these businesses are located too close to each other. These problems include large late-night crowds within which fights and assaults, disorderly conduct and other breaches of the peace occur and that are difficult to effectively police and that expose not only innocent bystanders but also police officers to danger and personal injury.
(Ord. No. 164-06/07, 4-4-07)

Sec. 14-330.12. Definitions.

(a) *After-hours entertainment license.* For the purpose of the after-hours entertainment prohibition in section 14-330.15, "after-hours entertainment license" means any of the music, dancing and special entertainment licenses required or authorized by article III, chapter 4 of this Code.

(b) *Downtown entertainment overlay zone.* For the purposes of this section, the "downtown entertainment overlay zone"

includes and is defined by the boundaries of the following zones as shown on the attached downtown entertainment overlay zone map: B-3, B-3(c) and WCZ zones, a copy of which is on file in the department of planning and urban development.

Any property that lies partly within the overlay zone and partly outside it shall be subject to this ordinance.
(Ord. No. 164-06/07, 4-4-07)

Sec. 14-330.13. Dispersal requirement for facilities with entertainment license in downtown entertainment overlay zone.

A business with an entertainment license as required or authorized by section 4-51(a) of this code located within the downtown entertainment overlay zone may not be located within 100 feet of another business with an entertainment license, as measured along or across public ways from the main entrance or entrances of each.
(Ord. No. 164-06/07, 4-4-07)

Sec. 14-330.14. Exemption.

(a) A business with an entertainment license located in the downtown entertainment overlay zone on or before January 3, 2006 shall not have to comply with the requirements of this section and if located within 100 feet of another licensee shall be considered a non-conforming use controlled by chapter 14, division 23 of this code. Such a business is considered an entertainment business for the purpose of calculating dispersion requirements under section 14.330.13 for a new or relocating entertainment business in the downtown entertainment overlay zone.

(b) A business with an entertainment license that does not allow amplified entertainment shall not have to comply with the dispersal requirement of section 14-330.13.
(Ord. No. 164-06/07, 4-4-07; Ord. No. 68-09/10, 10-19-09)

Sec. 14-330.15. Separate business entities.

Where two or more entertainment businesses operate on one site, and where each business entity requires or has a separate business license, or displays in a manner visible from public property separate business trademarks, logos, service marks or other mutually identifying names or symbols, each business entity shall be counted as a separate entertainment business for

the purpose of this section.
(Ord. No. 164-06/07, 4-4-07)

Sec. 14-330.16. Conditions on after-hours food service in the downtown entertainment overlay zone.

(a) Following a hearing held pursuant to chapter 15, section 15-10, the clerk may impose conditions to maintain or improve public safety on the food service license of any business in the downtown entertainment overlay zone that operates between 1:00 a.m. and 4:00 a.m., following a written recommendation from the Portland police department that such conditions are necessary.

(b) The clerk's decision may be appealed to the city manager pursuant to section 15-9 of this code.

(c) Nothing in this section shall be construed to limit the clerk's authority in chapter 15 to deny, suspend or revoke any license pursuant to the standards and process in that chapter.
(Ord. No. 164-06/07, 4-4-07)

DIVISION 20. OFF-STREET PARKING

Sec. 14-331. Defined.

Off-street parking, either by means of open-air spaces or by garage spaces which meet the standards set forth in the City of Portland Technical Manual, as hereafter amended, in addition to being a permitted use in certain zones, shall be considered as an accessory use when required or provided to serve conforming uses in any zone.
(Code 1968, § 602.14.A; Ord. No. 272-77, 5-16-77; Ord. No. 389-89, § 1, 4-3-89; Ord. No. 278-09/10, 7-19-10)

Cross reference(s)—Definitions and rules of construction generally, § 1-2.

Sec. 14-332. Uses requiring off-street parking.

Except as provided in Section 14-332.1, 14-332.2 (exceptions) and 14-345 (fee in-lieu of parking) of this division, for the uses listed below the following minimum off-street parking requirements shall be provided and maintained in the case of new construction, alterations which increase the number of units, and changes of use:

(a) *Residential structures:*

1. For new construction, two, (2) parking spaces for each dwelling unit, plus one (1) additional parking space for every six (6) units or fraction thereof.

2. For alterations or changes of use in existing structures, which create new or additional dwelling units in such structures, and for accessory units pursuant to §§14-68,78,88, one (1) additional parking spaces for each such unit. Existing parking spaces shall not be used to meet the parking requirements of this paragraph, unless the existing parking spaces exceed one (1) space for each dwelling unit.

3. For residential development on the peninsula (area defined as southerly of I-295).

   a. One (1) space per unit;

   b. The required parking for multi-unit residential buildings may be partially met through provision of shared-use vehicles, which are vehicles owned and maintained by the owner/manager of the building and available for use on a fee basis to the residents of the building. One shared use vehicle shall be deemed to satisfy eight (8) required car spaces, but in no case shall more than 50% of the parking requirement be satisfied by shared vehicle use.

   c. The planning board may establish a parking requirement that is less than the normally required number of spaces upon a finding of unique conditions that result in a lesser parking demand, such as housing for persons who cannot drive, housing that participates in a travel demand management program, availability of transit, or housing which includes permanent restrictions on automobile usage, and which is permanently restricted from utilizing resident on-street parking stickers.

4. For residential development in the B-2, B-2b, B-2c zones:

   a. One (1) parking space per dwelling unit.

(b) ***Motel:*** One (1) parking space for each sleeping room.

(c) ***Hotels:*** One (1) parking space for each four (4) guest rooms.

(d) ***Schools providing instruction for students up to and including those fifteen (15) years of age:*** One (1) parking space for each room used for purposes of instruction.

(e) ***Schools providing instruction for students sixteen (16) years of age and over:*** One (1) parking space for each ten (10) seats or major fraction thereof, used for purposes of instruction; if no fixed seats, one (1) parking space for each one hundred (100) square feet or major fraction thereof used for purposes of instruction.

(f) ***Hospitals:*** One (1) parking space for each five hundred (500) square feet or major fraction thereof, of floor area, exclusive of cellar.

(g) ***Auditoriums, theaters, assembly halls, funeral homes:*** One (1) parking space for each five (5) seats or for each one hundred (100) square feet, or major fraction thereof, of assemblage space if no fixed seats.

(h) ***Retail stores:*** One (1) parking space for each two hundred (200) square feet of first floor area in excess of two thousand (2,000) square feet not used for bulk storage and one (1) parking space for each seven hundred (700) square feet, or major fraction thereof, for each floor above the first floor not used for bulk storage.

(i) ***Restaurants or establishments constructed and intended for the dispensing of food and drink as the principal activity:*** One (1) parking space for each one hundred fifty (150) square feet, or major fraction thereof, of floor area not used for bulk storage or food preparation.

(j) ***Offices; professional and public buildings:*** One (1) parking space for each four hundred (400) square feet, or major fraction thereof, of floor area exclusive of cellar not used for bulk storage.

(k) ***Places of assembly (which includes private club and fraternal halls, places of religious assembly, and community halls):*** One (1) parking space for reach one hundred and twenty five (125) square feet, or major fraction thereof, of floor area used for assembly area not including bathrooms, bulk storage, stairways, closets or other non-assembly areas.

(l) ***For that part of every business, manufacturing, and industrial building not catering to retail trade and with floor area over three thousand (3,000) square feet:*** One (1) parking space for each one thousand (1,000) square feet of floor area, or major fraction thereof.

(m) ***Hostels:*** One (1) parking space for each eight (8) beds, or major fraction thereof. This requirement may be reduced to one (1) parking space for each twelve (12) beds if the site is within one quarter (1/4) mile of a public transit stop.

(n) ***Long-term, extended care and intermediate care facilities:*** One (1) parking space for each five (5) beds, or major fraction thereof, plus one (1) parking space per each employee normally present during one (1) weekday morning shift.

(o) ***Lodging houses:*** One (1) parking space for each five (5) rooming units, except in the R-5 zone; in the R-5 zone, one (1) parking space for every two (2) rooming units.

(p) ***Sheltered care group homes and emergency shelters:*** One (1) parking space for every two (2) employees.

(q) ***Congregate care facilities:*** One (1) parking space for every three (3) living units.

(r) ***Special needs independent living units:*** One (1) parking space per every four (4) living units, plus one (1) parking space for each staff member, if any, normally present at any one time.

(s) *Bed and breakfast:*

1. *Except in the I-B zone:* One (1) parking space for each two (2) guest rooms or fraction thereof for the first four (4) guest rooms; one (1) parking space for each additional guest room in excess of four (4).

2. *In the I-B zone:* No off-street parking required.

(t) *Day care facilities*: Off-street parking shall be provided on the site for all staff of the facility. Parking for the facility shall not interfere with access to or use of play areas. In residential zones parking spaces may be stacked or placed side by side in order to less their impact on the residential character of the lots and the neighborhood, and shall not be located closer than five (5) feet from the property line of any abutting residential use or residentially zoned site.

(u) *Private clubs:* One (1) parking space for each one hundred fifty (150) square feet, or major fraction thereof, of floor area.

(v) *Neighborhood Centers:* One (1) parking space for each 150 square feet, or major fraction thereof, of floor area, except for neighborhood centers which serve primarily clientele from the surrounding neighborhood, the parking requirement shall be one (1) parking space per 1,000 square feet, or major fraction thereof, of floor area.

(Code 1968, § 602.14.B; Ord. No. 268-77, 5-16-77; Ord. No. 431-82, § 2, 2-22-82; Ord. No. 575-86, §§ 1, 2, 5-19-86; Ord. No. 65-87, 11-2-87; Ord. No. 230-90, § 2, 3-5-90; Ord. No. 33-91, § 14, 1-23-91; Ord. No. 243-91, § 1, 3-11-91; Ord. No. 33A-91, § 8, 4-17-91; Ord. No. 125-97, § 10, 3-3-97; Ord. No. 232, §4, 3-15-99; Ord. No. 94-99, 11-15-99; Ord. No. 241-09/10, 11-15-10; Ord. No. 149-10/11, 3-7-11; Ord. No. 279-09/10, 6-6-11)

Sec. 14-332.1. Zone specific off-street parking exceptions and modifications.

The off-street parking requirements established for uses, established above in section 14-332 of this division, are hereby modified for the following zones a according to the provisions

described below.

(a) ***IR-3, Island Residential Zone, Off-street parking:*** Off-street parking shall not be required irrespective of the requirements of division 20 (off-street parking) of this article.

(b) ***USM Overlay Zone, parking:*** The parking requirements of section 14-332 (division 2) shall not apply to university buildings. Instead, the amount of parking required for any university building or building addition shall be determined by the planning board during site plan review, based on an analysis of campus-wide parking demand and supply, pursuant to a comprehensive university parking management plan, and treating all contiguous land (including land on opposite sides of the street) owned by the university as one lot. In determining the amount of parking required for any university building, the planning board may take into account such factors as:

1. The availability of off-campus parking and shuttle transportation to and from such off-campus facilities.

2. The ratio of commuter students to resident students.

3. The use of centrally located on-campus parking facilities so situated that students, faculty, staff and visitors arriving on campus can reasonably be expected to park in the central facilities and walk to their various on-campus destinations during the course of a school day.

4. Shared use of a single parking facility by two or more buildings when the peak parking demand period for such buildings do not overlap.

5. Development and implementation of a parking management plan which discourages on-street parking. On-street parking shall not be used to satisfy the university's parking demand.

6. Development and implementation of programs designed to reduce the number of automobiles

parking on campus, such as ride share programs and incentives for use of bicycles and public transportation.

(c) ***Recreation open space zone:*** Off-street parking adequate to serve projected employee and visitor needs shall be provided. Parking needs projections provided by the applicant or the planning department should be considered in the review.

(d) ***Change of use in the B-2b zone:***

1. A change of use of 10,000 sq. ft. or less of floor area of a building or a portion of a building need not provide parking for non-residential uses, provided that if the number of existing parking spaces serving the site is less than the requirements of this division, that number of parking spaces may not be reduced lower than the required amount prior to the change of use except:

   a. To the extent necessary to meet the requirements of the Americans with Disability Act; or

   b. To the extent it is a requirement or a condition of site plan review; or

   c. To the extent the change of use requires less parking than the previous use and the total number of parking spaces serving the site exceeds the parking requirements of this division for all uses on the site including the change of use.

2. A newly constructed building, a building addition or a change of the use of a building exceeding 10,000 sq. ft. of floor area, shall provide the parking required by this division.

(e) ***B-3 Zone***: No off-street parking is required for changes of use.

(f) ***I-R1, Island Business Zone:*** Off-street parking shall be required at twenty-five (25%) percent of the

required number of parking spaces for specified uses as provided in division 20 (off-street parking) of this article, except that residential uses shall meet the full parking requirement.

(g) *B-5 Zone:* No off-street parking shall be required.

(h) *B-6 Eastern Waterfront Mixed Use Zone:* Off-street parking for all projects regardless of size shall be governed by 14-332.2(c) of this article.

(i) *B-7, Mixed Development District Zone:* Off-street parking for all projects regardless of size, shall be governed by 14-332.2(c) of this article.

(j) *Waterfront Zone parking requirements; Eastern Waterfront Port Zone; Waterfront Central Zone; Waterfront Port Development Zone; Waterfront Special Use Zone*: Off-street parking is required at fifty (50%) percent of the required number of parking spaces for specifi8ed uses as otherwise provided in division 20 of this article.

(Ord. No. 240-09/10, 6-21-10)

Sec. 14-332.2. Categorical exceptions and modifications to off-street parking requirements.

Regardless of which zone a project of use is located, the following exceptions to the off-street parking requirements listed above in section 14-332 are additionally hereby established.

(a) *Home occupations, Section 14-410:* Any need for parking generated by the conduct of a home occupation allowed under section 14-410 of this article shall be met off the street and other than in a required front yard.

(b) *Incentives for affordable housing- parking reductions:* For each affordable housing unit for rent or sale within an eligible project under the Affordable Housing Ordinance established in 14-488(b) of this article, no more than one (1) parking space shall be required. The planning board may establish a parking requirement for affordable housing units for rent or sale within an eligible project that is less than one (1) parking

space per affordable housing unit, regardless of the size of the structure.

(c) *Site plans over 50,000 square feet and projects in the B-6, B-7, and USM Overlay Zones:* Where construction is proposed of new structures having a total floor area in excess of fifty thousand (50,000) square feet, the planning board shall establish the parking requirement for such structures. The parking requirement shall be determined based upon a parking analysis submitted by the applicant and upon the recommendation of the city transportation engineer.

(d) *Exception for historic structures:* No parking in excess of that existing on or servicing the lot as of March 15, 1999 shall be required for any structure under Article IX of this chapter, as a contributing structure in a local or National Register historical district, or as a locally designated or National Register landmark building; however, parking may not be decreased from that existing on or servicing the lot on March 15, 1999 except to the extent necessary to meet the requirements of the Americans with Disabilities Act.

(Ord. No. 240-09/10, 6-21-10)

Sec. 14-332.3. Uses requiring off-street bicycle parking.

In all zones where off-street motor vehicle parking is required, minimum off-street bicycle parking requirements shall be provided and maintained in the case of new construction, alterations and changes of use as specified in Section 14-526(a)(2) (Site Plan Standards).

(Ord. NO. 134-07/08, 2-4-08)

Sec. 14-333. To be located on lot with principal use in residential zones; exceptions.

Required off-street parking in all residential zones and accessory off-street parking in R-1 through R-5 zones shall be located on the same lot with the principal building or use, except that the Board of Appeals may permit such off-street parking to be located at a distance of not more than three hundred (300) feet from the principal building or use, measured along lines of public access where it cannot reasonably be provided on the same lot if the premises to be used for parking are held under the same

ownership or lease as the building or use served and if said premises are located in the same or a less restricted zone as the building or use served. Evidence of such control, either deed or lease, shall be required. The Planning Board may be substituted for the Board of Appeals only where an applicant is otherwise before the Planning Board for site plan approval.

Whenever any exception to the parking requirements under this section has been finally denied on its merits by either the Zoning Board of Appeals or the Planning Board, a second request for an exception seeking essentially the same relief, whether or not in the same form or on the same theory, shall not be brought before either body within one (1) year of such denial unless, in the opinion of the board before which it was initially brought, substantial new evidence is available or a mistake of law or fact significantly affected the prior denial.
(Code 1968, § 602.14.C; Ord. No. 94-99, 11-15-99)

Sec. 14-334. To be located on lot with principal use in nonresidential zones; exceptions.

Required off-street parking in all nonresidential zones shall be located on the same lot with the principal building or use, or within one hundred (100) feet measured along lines of public access, except the Board of Appeals, or Planning Board when applicable, may permit off-street parking located further than one hundred (100) feet from the principal building or use upon finding that such off-street parking meets the following standards:

(a) *Distance from principal building or use site:* Off-street parking shall be located no more than 1500 ft. from the principal building or use site measured along lines of public access.

(b) *Control by ownership or lease:* The premises to be used for parking shall be held under the same ownership as the principal building or use or by lease with a term of not less than five (5) years with an option to renew. Evidence of such control, shall be required by showing for review and approval by City Corporation Counsel, at a minimum, a signed letter of intent, purchase and sale agreement, or option for sale or lease at the time of approval, and an executed deed or lease prior to issuance of any certificate of occupancy.

The Planning Board may be substituted for the Board of Appeals only where an applicant is otherwise before the Planning Board for site plan approval.

Whenever any exception to the parking requirements under this section has been finally denied on its merits by either the Zoning Board of Appeals or the Planning Board, a second request for an exception seeking essentially the same relief, whether or not in the same form or on the same theory, shall not be brought before either body within one (1) year of such denial unless, in the opinion of the board before which it was initially brought, substantial new evidence is available or a mistake of law or fact significantly affected the prior denial.

(Code 1968, § 602.14.D; Ord. No. 430-83, § 1, 4-25-83; Ord. No. 94-99, 11-15-99; Ord. No. 241-10/11, 11-15-10)

Sec. 14-335. Off-street parking restricted.

Off-street parking shall not include:

(a) More than one (1) commercial motor vehicle in any residence zone, the R-P zone or any B-1 zone;

(b) More than six (6) commercial motor vehicles in any B-2 zone;

(c) Loading, sales, dead storage, repair, or servicing of any kind, except when customarily incidental or accessory to a conforming principal building or use when located in an I-2, I-2b, I-3 zone and I-3b zone;

(d) Except in the case of a car dealer, more than one (1) unregistered motor vehicle stored outside for a period in excess of thirty (30) days in any residence zone, the R-P zone or any business zone;

(e) Notwithstanding (1) above, any truck body, commercial trailer or similar commercial vehicles in any residence zone or the R-P zone.

(Code 1968, § 602.14.E; Ord. No. 298-88, 5-31-88)

Sec. 14-336. Location in residence zones for six or fewer vehicles.

(a) Where off-street parking for six (6) or fewer vehicles is required or provided in any residence zone, it shall not be located closer than fifty (50) feet to any street line if less than five

(5) feet from any lot line and shall not be closer to any street line than the required depth of the front yard for the same lot, except on a corner lot where the minimum depth from the line of the side street shall be the minimum width of the side yard on the side street. Lots in the R-6 zone shall not be required to provide the five-foot setback required by this section, but parking in the R-6 zone shall meet the front yard setbacks set forth in this section.

(b) Parking shall be prohibited in the front yard of lots containing two (2) or more dwelling units, except within one (1) driveway on the lot. "Driveway," as used in this paragraph, shall not include any turnaround area.

(Code 1968, § 602.14.F; Ord. No. 231-90, § 1, 3-5-90; Ord. No. 310-98, § 2, 5-4-98)

Sec. 14-337. Location in residence zones for more than six vehicles.

Where off-street parking for more than six (6) vehicles is required or provided for nonresidential uses in residence zones, it shall not be located closer than twenty-five (25) feet to any residential structure on an adjoining lot.

(Code 1968, § 602.14.G)

Sec. 14-338. When located within required open yard areas in residence zones.

(a) Where off-street parking for more than six (6) vehicles is required or provided on a lot in a residence zone and vehicles are to be or may be parked within the area otherwise required to be kept open and unoccupied for front, side and rear yards in the zone in which such parking is located, the following requirements shall be met:

(1) A continuous curb guard, rectangular in cross-section, at least six (6) inches in height and permanently anchored, shall be provided and maintained at least five (5) feet from the street or lot line between such off-street parking and that part of the street or lot line involved; or a continuous bumper guard of adequate strength, the top of which shall be at least twenty (20) inches in height, shall be provided and maintained between such off-street parking and that part of the street or lot line involved so that bumpers of vehicles cannot project beyond its face toward the street or lot line involved,

either above or below the impact surface.

(2) Where such off-street parking shall abut a lot in residential use or an unoccupied lot which is located in a residence zone, a chain link, picket or sapling fence, not less than forty-eight (48) inches in height, shall be provided and maintained between such off-street parking and that part of the lot line involved.

(b) Notwithstanding the provisions of subsection (a) of this section, parking shall be prohibited in the front yard of lots containing two (2) or more dwelling units, except within one (1) driveway on the lot. "Driveway," as used in this paragraph, shall not include any turnaround area.

(Code 1968, § 602.14.H; Ord. No. 231-90, § 2, 3-5-90)

Sec. 14-339. When located adjacent to a street or a residential use.

Where off-street parking for more than six (6) vehicles is required or provided on a lot in any business zone, the following requirements shall be met:

(a) Where vehicles are to be or may be parked within ten (10) feet of any street line, a continuous curb guard, rectangular in cross-section, at least six (6) inches in height and permanently anchored, shall be provided and maintained at least five (5) feet from the street line between such off-street parking and that part of the street line involved; or a continuous bumper guard of adequate strength, the top of which shall be at least twenty (20) inches in height, shall be provided and maintained between such off-street parking and that part of the street line involved so that bumpers of vehicles cannot project beyond its face toward the street line involved either above or below the impact surface.

(b) Where such off-street parking shall abut a lot in a residence zone or a lot in residential use, a chain link, picket or sapling fence, not less than forty-eight (48) inches in height, shall be provided and maintained between such off-street parking and that part of the lot line involved.

(Code 1968, § 602.14.1)

Sec. 14-340. Construction requirements when more than six vehicles parked.

Where off-street parking for more than six (6) vehicles is required or provided, the following construction requirements shall apply:

(a) Appropriate driveways from streets or alleys, as well as maneuvering areas, shall be provided. Location and width of approaches over public sidewalks shall be approved by the traffic engineer.

(b) The surface of driveways, maneuvering areas and parking areas shall be uniformly graded with a subgrade consisting of gravel or equivalent materials at least six (6) inches in depth, well compacted, and with a wearing surface equivalent in quantities of compaction and durability to fine gravel.

(c) A system of surface drainage shall be provided in such a way that the waste run-off shall not run over or across any public sidewalk or street.

(d) Where artificial lighting is provided, it shall be shaded or screened so that no light source shall be visible from outside the area and its access driveways.

(Code 1968, § 602.14.J; Ord. No. 96-88, § 1, 7-19-88)

***Editor's note—**Ord. No. 96-88, § 1, adopted July 19, 1988, amended subsection (a) of this section to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 96-88.

Sec. 14-341. Aisles required for six or more spaces.

In parking facilities containing six (6) or more parking spaces, there shall be provided vehicular access by one (1) or more aisles. Aisle widths shall be in conformance with the standards set forth in the City of Portland Technical Manual, as hereafter amended.

(Code 1968, § 602.14.A; Ord. No. 272-77, 5-16-77; Ord. No. 389-89, § 2, 4-3-89; Ord. No. 278-09/10, 7-19-10)

Sec. 14-342. Reserved.

***Editor's note**—Section 1 of Ord. No. 354-85, adopted Jan. 7, 1985, repealed § 14-342, relative to a reduction of requirements by the board of appeals, which derived from Code 1965, § 602.14.K.

Sec. 14-343. Either the Board of Appeals or the Planning Board may approve joint use.

(a) Except as provided in subsection (b) below, the Board of Appeals may approve the joint use of a parking facility by two (2) or more principal buildings or uses where it is clearly demonstrated that the parking facility will substantially meet the intent of the requirements by reason of variation in the probable time of maximum use by patrons or employees among such establishments. This section shall apply to residential uses in the B-1, B-1b, B-2, B-2c and B-3 zone which propose joint use of a parking facility with another principal use in the B-1, B-1b, B-2 and B-3 zone. The Planning Board may be substituted for the Board of Appeals only where an applicant is otherwise before the Planning Board for site plan approval.

Whenever any exception to the parking requirements under this section has been finally denied on its merits by either the Zoning Board of Appeals or the Planning Board, a second request for an exception seeking essentially the same relief, whether or not in the same form or on the same theory, shall not be brought before either body within one (1) year of such denial unless, in the opinion of the board before which it was initially brought, substantial new evidence is available or a mistake of law or fact significantly affected the prior denial.

(b) Requests for joint use of parking in the B-2b zone shall be reviewed and approved by the Zoning Administrator only in the following circumstances:

1. Residential uses above the first (1st) floor in buildings in the B-2b zone shall be permitted to share parking spaces with commercial uses located in the same building; and

2. It is clearly demonstrated that the joint parking arrangement will substantially meet the intent of the parking requirements by reason of a variation in the probable time of maximum use by patrons or employees of the commercial establishment and tenants of the

residential dwelling units; and

3. Parties involved in the joint use of parking shall provide evidence of a binding agreement for the joint use of parking. Any subsequent modifications to the structure or change in the tenant occupancy of the commercial use(s) shall require review by the Zoning Administrator for conformance with this section.

Any decision by the Zoning Administrator on shared parking requests may be appealed to the Zoning Board of Appeals as an interpretive appeal pursuant to 14-471(a).

(Code 1968, § 602.14.L; Ord. No. 243-91, § 2, 3-11-91; Ord. No. 94-99, 11-15-99; Ord. No. 36-09/10, 8-17-09)

Sec. 14-344. Either the Board of appeals or the Planning Board may authorize parking in certain residence zones.

In R-3 through R-5 zones, the Board of Appeals may permit off-street parking for passenger cars only accessory to a use located in and conforming with the provisions of a nearby business or industrial zone (except B-1 zones) if the lot on which the use is proposed is located wholly within three hundred (300) feet, measured along lines of public access, of the principal building of the use to which the proposed use would be accessory and provided further that:

(a) The lot where the parking use is proposed shall be under the control of the owner of the use to which the parking use would be accessory. Evidence of such control by deed or lease shall be required before the certificate of occupancy is issued. If such control should be abrogated, the parking use thus allowed shall automatically revert to a nonconforming use in violation of this article and shall be terminated forthwith.

(b) The Board of Appeals may impose such conditions as deemed necessary to insure development compatible with that of the immediate neighborhood notwithstanding the provisions of any other section of this article and may at its discretion limit the period of such use.

(c) The Planning Board may be substituted for the Board of Appeals only where an applicant is otherwise before the Planning Board for site plan approval.

Whenever any exception to the parking requirements under this section has been finally denied on its merits by either the Zoning Board of Appeals or the Planning Board, a second request for an exception seeking essentially the same relief, whether or not in the same form or on the same theory, shall not be brought before either body within one (1) year of such denial unless, in the opinion of the board before which it was initially brought, substantial new evidence is available or a mistake of law or fact significantly affected the prior denial.
(Code 1968, § 602.14.M; Ord. No. 541-84, 5-7-84; Ord. No. 94-99, 11-15-99)

Sec. 14-345. Peninsula fee-in-lieu of parking.

Any major or minor development subject to site plan review located in a non-residential zone on the Portland Peninsula shall either provide the required parking or pay a fee according to the provisions of (a) and (b) below.

(a) Provide the number of off-street parking spaces according to the provisions of section 14-332 (uses requiring off-street parking) and section 14-334 (off-site parking) of this division; or,

(b) Pay a fee-in-lieu of parking of not less than $5,000.00 as adjusted annually per (c) below, per space not provided. Fees shall be deposited into the Sustainable Transportation Fund, as established in section 14-346 of this division.

(c) The value of the fee shall be adjusted annually according to the Engineer's News Record construction index as published on January 1st of the current calendar year. The fee adjustment shall be calculated by taking the index amount published on January 1st, of the current year, divided by the index amount published on January 1, 2010 (8660), multiplied by (the fee amount from (b) above). The base fee, the adjustment index, or the calculation method may be otherwise amended by action of the city council from time to time.

(d) The fee shall be paid on or before the date upon which a certificate of occupancy is issued. Payment shall be secured by a bond at the time the amount of the fee is

set.
(Ord. No. 241-09/10, 11-15-10)

Sec. 14-346. Sutainable transportation fund established.

By act of the Portland City Council, the Sustainable Transportation Fund is hereby established.
(Ord. No. 241-09/10, 11-15-10)

Sec. 14-346.1 Sustainable transportation fund purpose.

The purpose of the fund is to implement those provisions of the Peninsula Transit Study Report, and Action Plan, as adopted by the Portland City Council on August 3, 2009 as a component of the city's Comprehensive Plan, which recommended creation of a Sustainable Transportation Fund. The Peninsuala Transit Study Report and Action Plan establish a goal to reduce the number and impact of single occupancy vehicle trips to and from the Portland Peninsula. Achieving this goal requires transportation choice for residents, businesses, and visitors to the Portland Peninsula. This ordinance establishes a funding source for broadening transportation choice and facilitating development with lower traffic impacts and reduced parking requirements.

The mechanism and protocol for collecting fees and spending funds are consistent with state requirements for utilizing transportation related impact fees.
(Ord. No. 241-09/10, 11-15-10)

Sec. 14-346.2. Deposits and expenditures for the Sustainable Transportation Fund.

(a) *Deposits*

1. The city shall establish a Sustainable Transportation Fund to be set up as a seprate account within the city. Deposits into the fund shall include:

   a. 100% of the revenue generated by the fee in-lieu of parking program, as established in section n14-345 of the city Land Use Code;

   b. Funds appropriated for deposite into the fund by vote of the city council;

c. Voluntary contributions of money or other liquid assets to the fund; and,

d. Any federal, state or private grant or loan funds provided to the fund.

2. ***Accounting of deposits by project and sub-district:*** Funds from the fee in-lieu of parking program, as established in section 14-345 above, shall be individually collected and accounted for by project and the geographic ***fee in-lieu of parking sub-district*** in which it is located, as shown on the Portland Peninsula fee in-lieu of parking sub-district map on file with the Department of Planning and Urban Development.

3. ***Funds to be used within 10 years of deposit:*** Funds collected under the fee in-lieu of parking ordinance shall be spent on eligible infrastructure and/or capital improvements or expenses, as outlined in (b) and (c) below, within 10 years of the date of collection. Any funds which are not so utilized and which exceed the City's actual costs of implementing the infrastructure improvement or improvements for which such fees were collected shall be refunded. Refunds shall be paid to the owner of records of the property for which the funds were collected, determined as of the date the refund is made.

4. ***Use of funds by sub-district:*** Funds collected under the fee in-lieu of parking ordinance shallbe spent on permitted expenditures of the fund, as outlined in (b) below, within the same geographic fee in-lieu of parking sub-district as the contributing project as depicted on the Portland Peninsula Fee In-Lieu of Parking Sub-district Map on file with the Department of Planning and Urban Development. However, for projects located within two hundred fifty (250) feet of an abutting sub-district, contributed fees can be used for eligible infrastructure projects in either abutting sub-district.

(b) ***Permitted expenditures of the fund***.

The Sustainable Transportation Fund may only be expended on the activities as described below:

1. Funds collected as fees in-lieu of parking shall be expended toward capital transportation improvements on the Portland Peninsula. Such capital improvements shall include but are not limited to the following:

    a. Parking Infrastructure

        i. Shared-use, publicly accessible parking facilities;

        ii. Publicly accessible bicycle racks and bicycle parking shelters;

    b. Transit Capital Improvements and Expenses

        i. Bus shelters, bus turnouts, transit signage and other transit amenities;

        ii. Buses andtransit vehicles;

        iii. Transit and transportation information systems;

        iv. Fixed guide way and/or rail transit systems;

    c. Pedestrian and Bicycle Infrastructure

        i. Multi-use trails, and non-vehicular transportation corridors;

        ii. Pedestrian infrastructure and amenities located on publicly accessible rightsof way including, but not limited to cross walks, signalization, landscaping, street furniture, wayfinding signage, traffic calming, and lighting;

        iii. New publicsidealksa nd new bicycle lanes along publicly accessible rights of way

or corridors where such facilities are not previously provided;

d. Other such improvements intended to enhance transportation choice and promote transit and non-automotive transport on the Portland Peninsula.

2. Funds collected or appropriated by means other than from a fee in-lieu of parking may be used for any of the capital transportation improvements listed above in (b)(1), and for any of the following uses:

a. Transportation Demand Management Program administration;

b. On or off-peninsula transit and/or non-automotive transportation capital or operating expenses;

c. Transit and/or non-automotive transportation promotion and education material; and

d. Other such programs or improvements intended to enhance transportation choice and promote transit and non-automotive transport for the City of Portland.

(c) *Annual Sustainable Transportation Plan and Appropriations Schedule:*

Annually, the city manager shall submit to the city council a recommended sustainable transportation plan and appropriations schedule, utilizing the revenues of the Sustainable Transportation Fund. The Transportation Committee of the city council or such other committee as the council shall designate shall recommend and refer the plan and appropriations schedule to the city council for action.

(Ord. No. 241-09/10, 11-15-10)

***Editor's Note—**The effect of Section 14-346.2(a)(iv) above is to establish the western boundary of the central sub-district as State Street, no High Street.

Sec. 14-347. - Sec. 14-350 Reserved.

DIVISION 21. OFF-STREET LOADING

Sec. 14-351. Minimum loading bays or loading berths.

In those zones where off-street loading is required, the following minimum off-street loading bays or loading berths shall be provided and maintained in the case of new construction, alterations and change of use:

(a) Office buildings and hotels with a gross floor area of more than one hundred thousand (100,000) square feet: One (1) bay.

(b) Retail, wholesale and industrial operations with a gross floor area of more than five thousand (5,000) square feet:

1. 5,000 to 40,000: 1 bay;

2. 40,001 to 100,000: 2 bays;

3. 100,001 to 160,000: 3 bays;

4. 160,001 to 240,000: 4 bays;

5. 240,001 to 320,000: 5 bays;

6. 320,001 to 400,000: 6 bays;

7. Each 90,000 over 460,000 square feet: 1 additional bay.

(c) Hospitals and nursing and convalescent homes: Two (2) off-street loading areas shall be provided whereby one (1) service area for ambulance and other emergency vehicles shall be separate from one (1) service area accommodating supply vehicles, and whereby both off-street loading areas shall be separate from parking and entrance locations.

(Code 1968, § 602.15.A; Ord. No. 49-74, 1-7-74)

Sec. 14-352. Dimensions.

Each loading bay shall have minimum dimensions of fifty (50) feet by fourteen (14) feet and may be located either within a building or outside and adjoining an opening in the building, except that in the cue of hospitals and nursing homes and convalescent homes, the off-street loading area provided for ambulance and other emergency vehicles shall be exempt from the minimum dimension requirement but shall be of sufficient width and depth to permit expeditious access and egress from the loading area. Every part of such loading bay shall be located completely off the street. In case trucks, trailers, or other motor vehicles larger than the dimensions of the minimum loading bay habitually serve the building in question, additional space shall be provided so that such vehicle shall park or stand completely off the street. (Code 1968, 602.15.B; Ord. No. 49-74, 1-7-74)

Sec. 14-353. Requirements to be met for additional bays and for alterations or modifications.

Any additional loading bays which are provided in excess of the requirements of this article or any loading bays otherwise established shall meet the requirements of section 14-352, and no alterations or modifications shall be made in an existing building or structure whereby loading openings or platforms are constructed or established unless the provisions of section 14-352 are met. (Code 1968, § 602.15.C)

Sec. 14-354. Reserved.

***Editor's note—**Section 2 of Ord. No. 354-85, adopted Jan. 7, 1985, repealed § 14-354, relative to variance prohibited, exception, which derived from Code 1968, § 602.15.D.

Sec. 14-355. - Sec. 14-365. Reserved.

DIVISION 22. SIGNS*

***Editor's note—**Ord. No. 252-94, § 2, passed Apr. 4, 1994, repealed Div. 22 of this article, §§ 14-366—14-368, relative to signs and billboards, and added new provisions relative to signs as set forth in §§ 14-366—14-372.5. Formerly, such provisions derived from §§ 602.10A.G, 602.13B and 602.16.A—602.16.C of the 1968 Code as amended by the following legislation:

Ord. No.	Section	Date	Ord. No.	Section	Date
499-74	7	8-19-74	538-81	1	2-18-81
536-74	2	8-19-74	39-85	1	7-15-85
334-76	7	7- 7-76	284-88		12-12-88
269-77		5-16-77	371-91	1	6- 5-91
270-77		5-16-77			

Cross reference(s)—Signs prohibited in cemeteries, § 7-137.

Sec. 14-366. Purpose.

The purpose of this division is to balance the need for adequate identification, communication and advertising for all land uses with the need to protect the public safety and welfare and to maintain and enhance the aesthetic environment of the City of Portland. The following policies shall apply in regulating signs:

(a) To allow for the orderly advertisement and identification of goods and services by public and private establishments in the city;

(b) To enhance public awareness of and access to goods, services and attractions by promoting visual order and clarity on city streets;

(c) To promote traffic safety by controlling the location, design and placement of signs on city streets; and

(d) To protect property values by ensuring the appropriate location, size, number and use of signs in neighborhoods and business districts.

(Ord. No. 252-94, § 2, 4-4-94)

Sec. 14-366.5. Applicability.

A sign may be erected, placed, established, painted, created or maintained in the city only in conformance with the standards,

procedures, exemptions and other requirements of this division.

All signage of a commercial nature, whether or not exempt from the receipt of a permit hereunder, shall be removed within thirty (30) days from the earlier of: vacancy of the advertised space by the applicable owner and/or tenant, or the cessation of the commercial enterprise so advertised. This subsection shall not apply to signs which have acquired historic significance, such as painted wall signs, as so determined by the Historic Preservation Program Manager. The owner of the building and/or any tenant advertising through the use of such signage each shall be responsible for adhering to this requirement.
(Ord. No. 252-94, § 2, 4-4-94; Ord. No. 187-02/03, 4-7-03)

Sec. 14-367. Definitions.

For the purposes of this division, the following definitions shall apply, in addition to the provisions of section 14-47:

Animated sign: Any sign that uses movement or change of lighting to depict action or create a special effect or scene.

Awning sign: Any sign that is a part of or attached to an awning, canopy or other fabric, plastic or structural protecting cover over a door, entrance, window, storefront or outdoor service area or any internally illuminated awning sign. A marquee shall not be considered an awning.

Banner: Any sign of lightweight fabric or similar material that is permanently mounted to a pole or a building by a permanent frame at one (1) or more edges. National, state and municipal flags or the official flag of any institution or business shall not be considered banners.

Beacon: Any light with one (1) or more beams directed into the atmosphere or directed at one (1) or more points not on the same lot as the light source or any light with one (1) or more beams that rotate or move.

Building marker: Any sign indicating the name of a building, date of construction, or other incidental information about its construction and/or history.

Building sign: Any wall sign, projecting sign, suspended sign, or any sign attached to any exterior part of a building. Interior

window signs shall not be considered building signs and shall not be included in the calculation of maximum cumulative sign area or maximum number of permitted signs.

Bus shelter signs: as specified in 23 M.R.S.A. § 1908-A, a bus shelter sign is any outdoor sign visible to the traveling public from a public way that is affixed to a publicly owned bus shelter where a public transport bus stops for the purpose of sallowing passengers to board and/or leave the bus.

Changeable copy sign: A sign or portion thereof with characters, letters or illustrations that can be changed or rearranged without altering the face or the surface of the sign. A sign on which the message changes more than eight (8) times per day shall be considered an animated sign and not a changeable copy sign for the purposes of this division. A sign on which the only copy that changes is an electronic or mechanical indication of time or temperature shall be considered a time and temperature portion of a sign and not a changeable copy sign for purposes of this division.

Commercial message: Any sign wording, logo or other representation that, directly or indirectly, names, advertises or calls attention to a business, product, service or other commercial activity.

Community/cultural banner: Banners located in the public right-of-way intended to serve a community purpose or convey information of community-wide interest.

Department: The department of planning and urban development.

Directory sign: A sign located at or near the entrance of a multi-tenant building, lot or park, the sole purpose of which is to provide a listing of names of individual tenants located thereon.

Flag: Any fabric, banner or bunting containing distinctive colors, patterns or symbols, used as a symbol of a government, political subdivision or other entity.

Freestanding sign: Any sign supported by structures or supports that are placed on or anchored in the ground and that are independent from any building or other structure.

Incidental sign: A sign, generally informational, that has a purpose secondary to the use of the lot on which it is located,

such as "no parking," "entrance," "loading only," "telephone," and other similar directives. Directional signs indicating the location of a building, tenant or entrance shall also be considered incidental signs. No sign with a commercial message legible from a position off the lot on which the sign is located shall be considered incidental.

Internally illuminated awning sign: An awning that is translucent and lighted from within and which either incorporates any commercial message, trademark or symbol or is readily concurrently visible with another internally illuminated awning sign that incorporates a commercial message, trademark or symbol.

Landmark sign: An existing sign determined by the department to have attained a high degree of community, cultural, aesthetic or historic significance.

Marquee: Any permanent roof-like structure projecting beyond a building or extending along and projecting beyond the wall of the building, generally designed and constructed to provide protection from the weather.

Marquee sign: Any sign attached to in any manner, or made part of, a marquee.

Multi-tenant lot: Any lot with more than one (1) business or more than one (1) use with exterior signs.

Nonconforming sign: Any sign that does not comply with the requirements of this division.

Pennant: Any lightweight plastic, fabric or other material, whether or not containing a message of any kind, suspended from a rope, wire or string, usually in a series, designed to move in the wind.

Portable sign: Any sign not permanently attached to the ground or some type of permanent structure, or a sign designed to be transported including, but not limited to, signs designed to be transported by means of wheels; signs converted to or located on A- or T-frames; menu and sandwich board signs; inflatable signs or large-scale tethered balloons; and/or signs attached to or painted on vehicles parked and visible from the public right-of-way, unless said vehicle is used in the normal day-to-day operations of the business.

Principal facade: Any facade or facades that constitute the primary visual and functional orientation of the building or tenant space, characterized by a combination of such features as principal entry, storefront and visibility from streets or parking areas.

Projecting sign: Any sign affixed to a building or wall in such a manner that its leading edge extends more than twelve (12) inches beyond the surface of the building or wall. A projecting sign may be either perpendicular or parallel to a wall and may have a message on more than one (1) face.

Readily concurrently visible signs: Any combination of signs that can be clearly and simultaneously viewed by an individual from any publicly accessible vantage point.

Residential sign: Any sign located in a district zoned for residential uses that contains no commercial message except advertising for goods and services offered on the premises where the sign is located, provided that offering such goods or services conforms with all requirements of this article.

Roof sign: Any sign erected and constructed wholly on and over the roof of a building, including attachment to a rooftop mechanical parapet supported by the roof structure, and extending vertically above the highest portion of the roof.

Roof sign, integral: Any sign incorporated as an integral or essentially integral part of a normal roof structure of any design, including attachment to a rooftop mechanical parapet, where no part of the sign extends vertically above the highest portion of the roof and such that no part of the sign is separated from the rest of the roof by a space of more than six (6) inches.

Security sign: Any sign that is placed upon a lot or a building to inform of the location of a security or other alarm system located upon the lot or within the building.

Sign: Any device, fixture, placard or structure that uses any color, form, graphic, illumination, symbol or writing to advertise, announce the purpose of, or identify the purpose of a person or entity, or to communicate information of any kind to the public.

Street frontage: The distance for which a lot line of a lot adjoins a public street, from one (1) lot line intersecting said

street to the furthest distant lot line intersecting the same street.

Suspended sign: A sign that is suspended from the underside of a horizontal plane surface and is supported by that surface.

Temporary sign: Any sign, except for a window sign, that is used for a period of not more than thirty (30) days and that is not permanently mounted.

Wall area: The area of a wall within a single plane.

Wall sign: Any sign parallel and attached to a wall, painted on the wall surface of, or erected and confined within the limits of an outside wall of any building or structure, which is supported by such wall or building, and which displays only one (1) sign surface.

Window sign: Any sign, pictures, symbol or combination thereof, designed to communicate information about an activity, business, commodity, event, sale or service, that is placed inside a window or upon the interior face of window panes or glass, and is visible from the exterior of the window.
(Ord. No. 252-94, § 2, 4-4-94; Ord. No. 37 06/07, 9-6-06; Ord. No. 91-11/12, 5-21-12)

Sec. 14-368. Regulations.

(a) ***Signs allowed on private property with and without permits.*** Signs shall be allowed on private property in the city in accordance with, and only in accordance with, Table 1 of section 14-369.5. If the notation "A" appears for a sign type in a column, such sign is allowed without prior approval as provided in this division in the zoning district(s) represented by that column. If the notation "B" appears for a sign type in a column, such sign is allowed only with prior permit approval in the zoning district(s) represented by that column. Special conditions may apply in some cases. If the notation "D" appears for a sign type in a column, such a sign is not allowed in the zoning district(s) represented by that column under any circumstances.

Although permitted under the previous paragraph, a sign designated by an "A" or "B" in Table 1 of section 14-369.5 shall be allowed only if:

1. The sum of the area of all building and freestanding signs on the lot conforms with the maximum permitted sign areas for such as determined by the formula for the zoning district in which the lot is located as specified in Table 2 of section 14-369.5; and

2. The size, location and number of signs on the lot conform with the requirements of Table 2 of section 14-369.5, which establish permitted sign dimensions by sign type, and with any additional limitations listed therein.

(b) ***Permits required.*** If a sign requiring a permit under the provisions of this division is to be placed, constructed, erected or modified on a lot, the owner of the lot shall secure a sign construction permit prior to the construction, placement, erection or modification of such a sign in accordance with the requirements of section 14-368.5. In addition, the property owner shall maintain in force at all times a sign construction permit for such sign in accordance with section 14-368.5.

No signs shall be erected in the public right-of-way except in accordance with subsection (e) of this section and the permit requirements of section 14-368.5.

No sign permit of any kind shall be issued for an existing or proposed sign unless such sign is in compliance with the requirements of this division, including those protecting existing signs.

(c) ***Design, construction and maintenance.*** All signs shall be designed, constructed and maintained in accordance with the following standards:

1. All signs shall comply with applicable provisions of the building code and the electrical code of the city at all times;

2. Except for banners, flags, temporary signs, portable signs and window signs conforming in all respects with the requirements of this division, all signs shall be constructed of permanent materials and shall be permanently attached to the ground, a building or another structure by direct attachment to a rigid wall, frame or structure; and

3. All signs shall be maintained in good structural condition, in compliance with all building and electrical codes, and in conformance with this Code, at all times;

4. Signs located in or adjacent to residential zones shall not cause light spillover or glare into properties within the residential zone.

(d) ***Signage plan.*** No permit shall be issued for an individual sign requiring a sign construction permit unless and until a signage plan for the lot on which the sign will be erected has been submitted to the department.

For any lot on which the owner proposes to erect one (1) or more signs requiring a permit, the owner shall submit to the department a signage plan containing the following:

1. A sketch plan of the lot. The sketch plan should indicate the location of buildings and driveways on the lot, as well as any abutting streets. Length of building frontages and street frontage(s) should also be noted;

2. An indication on the sketch plan of the proposed location of each existing and proposed sign of any type, except that incidental, portable, temporary and window signs need not be shown. For building signs, a sketch or a photograph of each building wall shall be provided indicating wall and sign dimensions; and

3. Computations of the following:

   a. A listing of each building sign (existing and proposed), identifying the location of each such sign and its sign area;

   b. A listing of each freestanding sign (existing and proposed), indicating the area, height and setback of each such sign; and

4. A sketch of proposed signs, indicating dimensions, materials, source of illumination and construction method.

For purposes of this section, a sketch plan shall not require a stamp by a licensed professional such as an engineer or an

architect. Measurements may be estimated. For multi-tenant lots or buildings, individual tenants shall be required to submit only those measurements applicable to their individual frontage or as otherwise required to review their application. Once a sketch plan has been filed for a property, the department shall keep a record of such plan so that a new sketch plan shall not be required for later changes to signage on a site for which a sketch plan has been previously submitted.

(e) ***Signs in the public right-of-way.*** No signs shall be allowed in the public right-of-way, except for the following:

1. Permanent signs, limited to the following: Public signs erected by or on behalf of a governmental body to post legal notices, identify public property, convey public information, and direct or regulate pedestrian or vehicular traffic, including parking regulatory signs; bus stop signs erected by a public transit company; informational signs of a public utility regarding its poles, lines, pipes or facilities.

2. Signage meeting the requirements of section 14-370.

3. Emergency warning signs erected by a governmental agency, a public utility company or a contractor doing authorized or permitted work within the public right-of-way.

4. Community/cultural banners.

5. Permanent directional signs retail/accessory retail in residential zones. A lawfully existing retail business, existing as of March 1, 2008 and located in a residential zone, qualifies for an off-premise sign if it meets the following requirements: 1) the establishment is not a home occupation; 2) the establishment is not located within 500 feet of a major or minor arterial; 3) the sign would be no larger than 12 inches x 48 inches and would otherwise adhere to the requirements set out by MDOT/MUTCD in their standard sign manual. Such establishment may qualify for one, two-sided, or two one-sided, off-premise signs to be located on a major or minor arterial in a location determined safe by the city traffic engineer and upon the payment of an initial fee of $300.00, with an annual renewal fee of $30.00. In the event the sign is damaged or destroyed, the replacement

of any sign shall be the sole responsibility of the permittee. The permittee shall be required to obtain a permit for said sign from the building inspections department, after securing $400,000 insurance for said sign, naming the City of Portland as an additional insured.

6. Bus shelter signs as provided for in section 14-371 (k).

(f) ***Signs in historic districts, in historic landscape districts, or on individual landmark properties.*** Signs in historic districts, in historic landscape districts, or on individual landmark properties shall also be subject to the provisions of article IX of this chapter. Where the regulations of article IX are either more or less stringent than those set forth in this division, the more stringent standard shall apply.

(g) ***Signs in Pedestrian Activities District (PAD) overlay zone and PAD encouragement areas.*** Signs in PAD overlay zone and PAD encouragement areas of the B-3 zone shall also be subject to the standards set forth in the Downtown Urban Design Guidelines. Where those standards are either more or less stringent than the regulations set forth in this division, the more stringent standard shall apply.

(Ord. No. 252-94, § 2, 4-4-94; Ord. No. 143-07/08, 5-19-08; Ord. No. 91-11/12, 5-21-12)

Sec. 14-368.5. Permits.

The procedures set forth below shall govern the application for, and issuance of, all sign permits under this division, unless a sign is also subject to review under any other division or section of this chapter or any other chapter of this Code, including site plan and historic preservation ordinances. Where a sign requires such other review, the time periods set forth in the ordinance for that review process shall control.

(a) ***Applications.*** All applications for sign permits of any kind shall be submitted to the department on an application form or in accordance with application specifications published by the department.

(b) ***Fees.*** Each application for a sign permit shall be accompanied by the applicable fees, which shall be established by the council order.

(c) ***Action on sign permit application.*** Within ten (10) working days of receipt of a complete application, the department shall either:

1. Issue the sign permit, if the sign that is the subject of the application conforms in every respect with the requirements of this division; or

2. Deny the sign permit if the sign that is the subject of the application fails in any way to conform with the requirements of this division. In the event of a denial, the department shall set forth in writing the reasons for the denial.

(d) ***Permits to construct or modify signs.*** Signs identified with the notation "B" on Table 1 shall be erected, installed or created only in accordance with a duly issued and valid sign construction permit issued by the department. Such permits shall be issued only in accordance with the requirements and procedures of subsection (f) of this section.

(e) ***Application for new sign or for sign modification.*** An application for construction, creation or installation of a new sign or for modification of an existing sign shall be accompanied by drawings to show the dimensions, design, source of illumination, construction method and location of each particular sign. One (1) application and construction permit may include more than one (1) sign on the same lot.

(f) ***Assignability of sign permits.*** A current and valid sign permit issued under this division shall be freely assignable to a successor as owner of the property or operator of the premises. The assignment shall not require approval by the department. This provision shall also apply to signs lawfully in existence on April 4, 1994, which are further subject to the provisions of section 14-372.

(g) ***Issuance pursuant to level II site plan review.*** An applicant for a permit or other approval under this division whose application has been denied for failure to meet the regulations contained in section 14-369.5 may

apply to the planning authority for review of the denied signage pursuant to the standards set forth in section 14-526(d)8, provided, however, that no site plan fee shall be required for this review and no site plan submission materials shall be required beyond those necessary to allow review under this section.

(Ord. No. 252-94, § 2, 4-4-94; Ord. No. 278-09/10, 7-19-10)

Sec. 14-369. Computations.

Sign area, sign height and number of signs shall be computed in accordance with the following principals:

(a) *Computation of area of individual signs:* For all signs other than awning signs, the area of a sign face shall be computed by means of the smallest square, circle, rectangle, triangle or simple polygon that will encompass the extreme limits of the writing, representation, emblem or other display, together with any material or color forming an integral part of the background of the display, but not any supporting framework, bracing or decorative fence or wall when such fence is clearly incidental to the display itself.

(b) *Computation of area of multifaced signs:* The sign area for a sign with more than one (1) face shall be computed by adding together the area of all sign faces visible from any one (1) point. When two (2) identical sign faces are placed back to back so that both faces cannot be viewed from any point at the same time and when such sign faces are part of the same sign structure and are not more than forty-two (42) inches apart, the sign shall be computed by the measurement of one (1) of the faces.

(c) *Computation of area of awning signs:*

1. For opaque awnings, only those sections which incorporate writing, symbols, emblems or other types of graphics used for the purposes of identification or advertisement shall be included in computing sign area. The methods set forth in subsection (1) of this section shall be utilized in measuring sign area on opaque awnings. Street names and numbers on opaque awnings shall not be considered to be signs for purposes of this

section, unless a business located within the building has the street name and/or the street number as its name.

2. For awnings that are translucent and internally illuminated and that incorporate any commercial message, trademark or symbol, the sign area shall be computed as the two-dimensional projection of the awning onto the face of the building on which the awning is to be installed. Such awnings which wrap around building corner(s) shall be treated as separate awnings on each respective building face and shall be considered as signs if they include any message, trademark or symbol. Internally illuminated bands shall be permitted across the building face without being included in the calculations under this subsection, provided that such bands do not include any message, trademark or symbol and that the bands do not exceed three (3) feet in height.

3. Where only a portion of the awning is translucent and internally illuminated, only the area of the translucent illuminated portion shall be included in computing sign area, unless commercial message content appears on other opaque portion(s) of the awning. Opaque portions of these types of awnings shall be computed in accordance with subsection a. above.

(d) ***Computation of height:*** The height of a sign shall be computed as the distance from the base of the sign at normal grade to the top of the highest attached component of the sign. Normal grade shall be considered the lower of either existing grade prior to construction or the newly established grade after construction excluding any filling, berming, mounding or excavating accomplished solely for the purpose of locating the sign. In cases where the normal grade cannot reasonably be determined, sign height shall be computed based upon the assumption that the elevation of the normal grade at the base of the sign is equal to the elevation of the nearest point of the crown of a public street or the grade of the land at the principal entrance to the principal structure on the lot, whichever is lower.

(e) *Computation of number of signs:* For purposes of computing the number of signs, a single sign shall be considered either enclosed within a single frame or composed of modular parts with identical frame elements designed to be joined together to form a single composite sign.

(Ord. No. 252-94, § 2, 4-4-94)

Sec. 14-369.5. Tables.

Notes for Table 1 (Permitted Sign Types by Zone).

(a) This column does not represent a zoning district. It applies to institutional uses permitted under the zoning ordinance in residential zoning districts. Such uses may include, but are not necessarily limited to, churches, schools and hospitals.

(b) The following limiting provision shall apply to freestanding signs in the B-1, B-2 and B-3 zones on the Portland Peninsula (except for the B-2 zone in the vicinity of St. John Street): Such signs shall be allowed only if the front facade of the building (or individual tenant's/tenants' frontage in the case of a multi-tenant

building) is set back a distance of at least twenty (20) feet from either of the front facades of the abutting buildings (or other tenants' frontage in the same multi-tenant building). Notwithstanding the limitations of this section, freestanding signs shall be permitted for gas stations provided that all signage for such gas stations conform to the requirements of this division.

(c) No commercial message allowed on sign, except for a commercial message drawing attention to an activity legally offered on premises.

(d) No commercial message of any kind allowed on a sign if such message is legible from any location off the zone lot on which the sign is located.

(e) Only address and name of occupant allowed on sign.

(f) May include only building name, date of construction, or historical data on historical site.

(g) If such a sign is suspended or projects above a public right-of-way, the issuance and continuation of a sign permit shall be conditioned on the sign owner obtaining and maintaining in force liability insurance for such a sign.

(h) The provisions governing portable/temporary signs shall apply. See section 14-370.

(i) Window signs shall be allowed without a permit and shall not be included when calculating cumulative sign area. However, in no event shall more than fifty (50) percent of window area be obscured.

(j) Directory signs, freestanding or on buildings, shall be allowed without a permit and shall not be included when calculating cumulative sign area, provided the sign area for each tenant does not exceed one and one-half (1.5) square feet.

(k) Flags used as a symbol of a government, political subdivision or other entity. Any flag not meeting this description shall be considered a banner sign or pennant and shall be subject to regulation as such.

(b) ***Table 2. Sign regulations by zone.*** Table 2 is comprised of fourteen (14) individual charts outlining sign regulations for each zone in the city. Regulations are for permanent freestanding and building signs and shall not apply to portable/temporary signs, special sign types, incidental signs, directory signs or exempt signs. See applicable sections of this division for regulations governing such signs.

Other applicable regulations:

* Signs in historic districts, in historic landscape districts, or on individual landmark properties shall also be subject to the provisions of article IX of this chapter. Where the regulations of article IX are more stringent than those set forth in this division, the more stringent standard shall apply.

* Signs associated with projects otherwise subject to site plan review shall also be subject to the provisions of article V of this chapter.

* Signs located in the Pedestrian Activities District (PAD) overlay zone and in PAD Encouragement Areas within the B-3 zone shall also be subject to the standards set forth in the Downtown Urban Design Guidelines.

Contents of Table 2:

2.1 Sign Regulations for R-1—R-7, IR-1—IR-3 Residential Zones

2.2 Sign Regulations for Institutional Uses in Residential Zones

2.3 Sign Regulations for RP Residence-Professional Zone

2.4 Sign Regulations for ROS/RPZ Open Space Zones & Signs in all Municipal Parks

2.5 Sign Regulations for B-1 Neighborhood Business Zone — Single Tenant Lots

2.6 Sign Regulations for B-2 Regional Business Zone — Single Tenant Lots

2.7 Sign Regulations for AB Airport Business Zone — Single Tenant Lots

2.8 Sign Regulations for B-3 Downtown Business, B-5 Urban Commercial, B-6 and B-7 Mixed Use Urban, WC Waterfront Central, WSU Waterfront Special Use, and EWP, Eastern Waterfront Port Zones

2.9 Sign Regulations for IB Island Business Zone — Single Tenant Lots

2.10 Sign Regulations for B-4 Commercial Corridor Zone — Single Tenant Lots

2.11 Sign Regulations for OP Office Park Zones

2.12 Sign Regulations for I-L, I-Lb, I-M, I-Ma, I-Mb, I-H, I-Hb Industrial and WPD Waterfront Port Development Zones

2.13 Sign Regulations for B-1, B-2, AB, IB, and B-4 Business Zones — Multi-Tenant Lots

2.14 Sign Regulations for Gas Stations — All Zones Where Permitted

TABLE 2.1 R1 — R6, IR1 — IR3: RESIDENTIAL AND ISLAND RESIDENTIAL ZONES

Freestanding Signs

	Single-Family Lots	*PRUDs, Single-Family Subdivisions & Multifamily Developments — Development Identification*

		Signs
Area	2 sq. ft.	15 sq. ft.
Height	5 feet	5 feet
Setback	5 feet	5 feet
Number freestanding signs per lot	1(a)	1 per major entrance

(a) A maximum of one (1) sign is allowed per lot. Such sign may be either a freestanding or a building sign.

Building Signs

	Single-Family Lots	*PRUDs, Single-Family Subdivisions & Multifamily Developments — Development Identification Signs*
Maximum permitted sign area	2 sq. ft.	10 sq. ft.
Number building signs permitted per lot	1(a)	1(b)

(a) A maximum of one (1) sign is allowed per lot. Such sign may be either a freestanding or a building sign.

(b) One (1) allowed per street frontage, provided there are no freestanding signs on the lot or development.

TABLE 2.2 INSTITUTIONAL USES IN RESIDENTIAL ZONES

(Regulations apply to institutions permitted as conditional uses in residential zoning districts. Such uses may include, but are not necessarily limited to, churches, schools, private clubs, fraternal organizations and hospitals.)

Freestanding Signs

	Street Frontage < 100'	*Street Frontage 100' to 250'*	*Street Frontage > 250'*
Area	15 sq. ft.	25 sq. ft.	50 sq. ft.
Height	6 feet	8 feet	8 feet
Setback	5 feet	5 feet	5 feet
Number freestanding signs per lot	1/st. frontage(a)(b)	1/st. frontage(a)(b)	1/st. frontage(a)(b)

(a) Lots fronting on two (2) or more streets are allowed one (1) freestanding sign for each frontage. However, the area of each sign shall correspond to the length of the applicable frontage. Freestanding signs shall be positioned such that they are not readily concurrently visible.

(b) Where one (1) lot contains more than one (1) affiliated use, each use shall be allowed one (1) sign per street frontage.

Note: Pertinent directional information shall, to the extent possible, be included on the principal freestanding sign. Additional directional signs shall be allowed only in the event that necessary information cannot fit reasonably within the permitted sign area. The size of additional signs shall be the minimum necessary to achieve the informational objective.

Building Signs (a)

Maximum permitted sign area	na
Percent of wall area on which sign is to be placed	5%
Number building signs permitted per lot	1/building face(b)

(a) Building signs shall be reviewed for compliance with sign standard(s) included in site plan ordinance and shall under no circumstances be internally illuminated.

(b) One (1) sign is allowed per building face, provided such signs are not readily concurrently visible.

TABLE 2.3 RESIDENCE-PROFESSIONAL (R-P) ZONE

Freestanding Signs

Area	30 sq. ft.
Height	8 feet
Setback	5 feet
Number permitted per lot	1(a)

(a) Lots fronting on two (2) or more streets are allowed one (1) freestanding sign of equivalent size for each street frontage with vehicular entry, provided such signs are not readily concurrently visible.

Building Signs

None allowed, other than incidental and/or directory signs.

TABLE 2.4 ROS & RPZ OPEN SPACE ZONES AND SIGNS IN ALL MUNICIPAL PARKS

These regulations shall not apply to municipal stadiums with a seating capacity of greater than six thousand (6,000) seats.

See also section 14-370.7 (special sign types) for regulation of signs associated with seasonal sales/markets, special events, fairs/festivals, etc. Signs in designated historic landscape districts shall also be subject to the provisions of article IX of this chapter.

Freestanding Signs(a)

	General Park Identification Sign	*Concession/Facility Signs(b)*
Area	20 sq. ft.	16 sq. ft.
Height	5 feet	8 feet
Setback	5 feet	5 feet
Number freestanding signs per lot	1 per major vehicular entry	1 per concession or facilityI

(a) All signs shall be integrated with existing landscape features or shall be visually related to existing architecture in terms of materials, color, scale, etc., as determined by the planning authority.

(b) Product trademarks shall be limited to not more than five (5) percent of the total sign area.

(c) Concession stands or other facilities located within an RPZ or ROS zone shall be allowed one (1) freestanding sign or building sign, not both.

Building Signs(a)

	Concession/Facility Signs
Maximum permitted sign area	20 sq. ft.
Square feet per linear foot of building facade on which sign will be placed	1 sq. ft.
Number building signs permitted per lot	1 per concession or facility(b)

(a) Building signs shall be visually related to the building on which they are located in terms of materials, color, scale, etc., as determined by the planning authority. Product trademarks shall be limited to not more than five (5) percent of the total sign area.

(b) Concession stands or other facilities located within an RPZ or ROS zone shall be allowed one (1) freestanding sign or building sign, not both.

Scoreboards

Scoreboard size shall correspond to the size and type of facility in which it is to be located, as determined by the recreation director. Commercial sign content shall not exceed fifteen (15) percent of surface area of scoreboard.

Ballfield Booster or Sponsor Signs

Such signs shall be exempt from regulation, provided they remain in place only for the applicable season and do not exceed thirty-two (32) square feet in area each.

TABLE 2.5 NEIGHBORHOOD BUSINESS (B-1) ZONE—SINGLE TENANT LOTS

Freestanding Signs

Area	32 sq. ft.
Height	16 feet
Setback	5 feet
Number freestanding signs permitted per lot	1

Building Signs

	As of Right
Maximum cumulative area of all building signs	100 sq. ft.
Square feet per linear foot of building facade on which sign will be placed	1 1/2 feet
Number building signs permitted per lot	1 per building facade facing on abutting st. + 1 additional

TABLE 2.6 REGIONAL BUSINESS (B-2) ZONE — SINGLE TENANT LOTS

Freestanding Signs

	Facing Street Frontage < 200'	*Facing Street Frontage > 200'*
Area	65 sq. ft.	100 sq. ft.
Height	18 feet	18 feet
Setback	5 feet	5 feet

Number permitted per lot	1(a)	1(a)

(a) If lot fronts on more than one (1) street, one (1) freestanding sign is permitted for each additional frontage, but at one-half the maximum allowable area for the original, except in those instances where the freestanding signs are not concurrently visible. In such an instance, additional freestanding signs shall be permitted the full area allowance.

Building Signs

	Building Face < 150 Linear Feet	*Building Face > 150 Linear Feet*
Maximum cumulative area of all building signs (b)	150 square feet (a)	225 (a)
Square feet per linear foot of building facade on which sign will be placed	2 feet	Same
Number of building signs permitted per lot	1 per building facade facing an abutting street + 1 additional	Same

(a) If any one (1) building face on which a sign is to be placed exceeds one hundred fifty (150) linear feet, then the maximum allowable sign area for the building as a whole is increased to two hundred twenty-five (225) square feet. However, the limit of two (2) square feet per linear foot of building frontage still applies for purposes of calculating maximum sign area for each building face.

(b) Where a building features two (2) principal entry facades

facing parallel streets, each such entry facade shall be eligible for the full amount of signage relative to its frontage, notwithstanding the maximum cumulative sign area.

TABLE 2.7 AIRPORT BUSINESS (AB) ZONE

Freestanding Signs

	Facing Street Frontage < 200'	*Facing Street Frontage > 200'*
Area	32	65
Height	16	16
Setback	5	5
Number permitted per lot	1(a)	1(a)

(a) If lot fronts on more than one (1) street, one (1) freestanding sign is permitted for each additional frontage, provided such signs are not readily concurrently visible.

Building Signs

Maximum cumulative area of all building signs	na
Square feet per linear foot of building facade on which sign will be placed — or -	2 sq. ft.; or
Maximum percent of wall area on which sign(s) is(are) to be placed	6%

Number building signs permitted per lot	1 per building facade facing an abutting street + 1 additional

TABLE 2.8 SIGN REGULATIONS BY ZONE

Downtown Business (B-3), Urban Commercial (B-5), Waterfront Central (WC), and Waterfront Special Use (WSU) Zones

* Signs located on individual landmark properties or within historic districts, PAD overlay districts or PAD encouragement areas shall, in addition to the provisions herein, be subject to article IX of this Code or the Downtown Urban Design Guidelines, as applicable. Where the design guidelines are more restrictive than these regulations, the design guidelines shall supersede the otherwise applicable dimensional standards.

(o) Freestanding signs shall be allowed only if the front facade of the building (or individual tenant's/tenants' frontage in the case of a multi-tenant building) is set back a distance of at least twenty (20) feet from either of the front facades of the abutting buildings (or other tenants' frontage in the same multi-tenant building).

Freestanding Signs

	Single & Multi-Tenant Buildings
Area	16 sq. ft.
Height	6 ft.
Minimum setback	5 ft.
Number of freestanding signs	1 per abutting street

per lot	

Building Signs

		Multi-Tenant Buildings	
	Single Tenant Buildings	*Building ID Sign and/or Upper Floor Tenant Signs*	*Ind. Ground Floor Tenant Signs*
Maximum cumulative permitted area of all building signs	Na	*Na*	*na*
Square feet per linear feet of building facade on which sign will be placed	2 sq. ft.	na	2 sq. ft. per ft. of tenant's building frontage
Maximum percent of wall area on which sign(s) is(are) to be placed	Na	5%	na
Number of building signs permitted per lot	1 per facade + 1	1 per facade + 1 per tenant	1 per tenant (a)

(a) If individual tenant fronts on more than one (1) street, one (1) additional building sign is permitted for each additional frontage.

TABLE 2.9 ISLAND BUSINESS (IB) ZONE

Freestanding: None allowed, except for marine-related uses serving vessel traffic. Such signs shall not exceed twenty (20) square feet in area and ten (10) feet in height. One (1) such sign is allowed per use.

Building

Maximum permitted sign area	40 sq. ft.
Square feet per linear feet of building facade on which sign will be placed	1 sq. ft.
Number of building signs permitted per lot	1 per building facade facing an abutting street + 1 additional

TABLE 2.10 COMMERCIAL CORRIDOR (B-4) ZONE — SINGLE TENANT LOTS

Freestanding Signs

	Facing Street Frontage < 200'	*Facing Street Frontage > 200'*
Area	65 sq. ft.	100 sq. ft.
Height	25 ft.	35 ft.
Setback	5 ft.	Same
Number permitted per lot	1 (a)	Same

(a) If lot fronts on more than one (1) street, one (1)

freestanding sign is permitted for each additional frontage, provided such signs are not readily concurrently visible.

Building Signs

	Building Face < 150 Linear Feet
Maximum cumulative area of all building signs	na
Square feet per linear feet of building facade on which sign will be placed —or-	2 sq. ft. —or-
Maximum percent of wall area on which sign(s) is(are) to be placed	6%
Number of building signs permitted per lot	1 per bldg. facade facing an abutting street and 1 additional

TABLE 2.11 OFFICE PARK (O-P) ZONE

Freestanding Signs

	Joint Identification Sign (a)	*Individual Tenant Signs (a)*
Maximum permitted area	50 sq. ft.	15 sq. ft.
Height	8 ft.	5 ft.
Setback	5 ft.	5 ft.

Number of freestanding signs per lot	1 per major vehicular entry	1 per tenant

(a) In the case of multi-tenant office parks, individual tenants may be identified on joint identification sign at park entranceway, on directory signs within the office park development, and/or on individual signs located immediately in front of individual business establishment, but shall not be allowed additional freestanding signs at the principal entryway(s) into the development.

Building Signs

	Single Tenant Buildings	*Multi-Tenant Buildings*
Maximum permitted sign area	na	na
Maximum percent of wall area on which sign(s) is(are) to be placed	6%	8%
Number of building signs permitted per lot	1	1 per tenant

TABLE 2.12 INDUSTRIAL I-L, I-Lb, I-M, I-Ma, I-Mb, I-H, I-Hb AND WATERFRONT PORT DEVELOPMENT ZONES

Freestanding Signs

	Single Tenant Buildings	*Multi-Tenant Buildings*
Maximum permitted area	35 sq. ft.	70 sq. ft.

Height	10 ft.	15 ft.
Setback	5 ft.	5 ft.
Number of freestanding signs per lot	1 (a)	1 (a)

(a) If lot fronts on more than one (1) street, one (1) freestanding sign of equivalent permitted sign area is allowed for each additional frontage, provided such signs are not readily concurrently visible.

Building Signs

	Single Tenant Buildings	*Multi-Tenant Buildings*	
Maximum permitted sign area	Na	na	
Maximum percent of wall area on which sign(s) is(are) to be placed	6%	Principal facade(s) 8%	All other facade(s) 2%
Number of building signs permitted per lot	2/building face	1/tenant plus 1 additional per building face (a)	

(Editor's note: "TABLE 2.12 (CONTINUED) SPECIAL PROVISION FOR ZONES WITHIN 800 FEET OF I-295" repealed by Ord. No. 15-00, 6-7-00, retroactive to 6/01/00)

TABLE 2.13 MULTI-TENANT LOTS — B-1, B-2, AB, B-4, AND IB ZONES

Freestanding Signs (a)

	B-1, B-2, AB, B-4, IB Zones		
	Land Area		
	< 1 acre	1—2.5 acres	☎□◑2.5 acres
Area	Same as single	100	140
Height	Tenant	Same as for single tenant lots in applicable zones	
Number permitted per lot (b)	lots	1	1

(a) Freestanding signs shall be for purposes of joint identification. Individual tenants shall not be permitted their own freestanding sign. Such sign may identify name of center and may also include names of individual tenants.

(b) Lots fronting on two (2) or more streets are allowed an additional freestanding sign of one-half the area of the first for each frontage which includes a vehicular entry point, provided signs are not readily concurrently visible. Such signage cannot be accumulated and used on one (1) street in excess of that allowed for lots with only one (1) street frontage.

Building Signs

a. *Joint identification sign (a):*

	B-1, IB	*B-2, AB, B-4 I*
Maximum area	na	250 sq. ft. I

Number permitted per lot (b)	not allowed	1 (b)

(a) Sign identifying name of building or shopping center only. Unused sign area cannot be applied to area allowances for other freestanding or individual tenant signs. Where name of shopping center is the same as or incorporates name of one (1) or more of the businesses located within the center, such business(es) shall elect between a joint identification sign and an individual business sign and shall not be allowed both.

(b) See (a) above.

(c) Allowed only on shopping centers featuring four (4) or more tenants and occupying a land area in excess of two and one-half (2.5) acres.

TABLE 2.13, CONTINUED

b. *Individual business signs:*

Alternative 1

	B-1, B-2, AB, B-4, IB Zones	
	Tenant's Frontage < 150 linear ft.	*Tenant's Frontage 150 linear ft.*
Maximum area	150 sq. ft.	Na
Square feet per linear feet of building front	1.5 sq. ft.	na
Maximum percent of wall area on which sign(s) is(are) to be placed	na	5%
Number permitted per business (a)	1	1

(a) If individual tenant fronts on more than one (1) street, one (1) additional building sign is permitted for each additional frontage, but at one-half the maximum allowable area of the first.

Alternative 2

Note: Alternative 2 is available as an option to proprietors of multi-tenant lots needing greater flexibility in allocating signs to tenants. This option requires the submission of a signage plan as described in section 14-368(d) as evidence that all building signs on the subject lot comply with the provisions of this division, including the size and number limits of this table. All nonconforming building signs must be brought into compliance to be eligible for the Alternative 2 option.

Maximum permitted sign area	na	
Maximum percent of wall area on which signs are to be placed	Principal facade(s) 5%	All other facade(s) 2%
Number of building signs permitted per lot	1 per tenant plus 1 additional per building face	

TABLE 2.14 GAS STATIONS — ALL ZONES WHERE PERMITTED

Freestanding Signs

	B-1, IB	*B-4*	*All Other Zones*
Area	32 sq. ft./10 sq. ft./20 sq.	60 sq. ft./20 sq. ft./30 sq.	40 sq. ft./15 sq. ft./24 sq.

	ft. (a)	ft. (a)	ft. (a)
Height	16 feet	35 feet	18 feet
Setback	5 feet	5 feet	5 feet
Number permitted per lot	1/major principal and auxiliary use + 1 price sign (a)(b)	Same	Same

(a) Area limits are broken down according to sign types, as follows: Sign area for principal use/sign areas for additional major auxiliary use(s) on site (for example, car wash, repair garage, convenience store)/sign area for gas prices. In the B-1 and IB zones, for example, the maximum permitted sign area for the principal use is twenty-five (25) square feet. The maximum permitted sign area for each auxiliary use is ten (10) square feet and the maximum permitted area for the gas price sign is twenty (20) square feet.

(b) All signs shall be mounted on the same base.

Building/Canopy Signs

	All Zones
Maximum permitted area	30 sq. ft. for principal building sign/10 sq. ft. for each additional major activity/20 sq. ft. for canopy sign
Square feet per linear foot of building facade on which sign will be placed	Na

Maximum vertical dimension	2 feet
Number permitted per lot	1 building sign for each major activity/2 canopy signs (a)

(a) Maximum two (2) signs allowed on large canopy; one (1) each on opposite facing planes.

Miscellaneous Signs

Signs placed on individual pumps shall be considered incidental signs and shall not be calculated in total allowable sign area. Incidental signs shall not be limited in number. However, no individual sign shall exceed one (1) square foot.
(Ord. No. 252-94, § 2, 4-4-94; Ord. No. 164-97, § 10, 1-6-97; Ord. No. 37-06/07, 9-6-06)

Sec. 14-369.6. Signs prohibited under this division.

All signs not expressly permitted under this division or exempt from regulation hereunder in accordance with section 14-371 are prohibited.
(Ord. No. 252-94, § 2, 4-4-94)

Sec. 14-370. Portable/temporary signs.

(a) *On private property.* Portable and temporary signs shall meet, in addition to the other requirements of this division, the following requirements:

1. *Number of signs.* There shall be no more than one (1) portable or one (1) temporary sign on any lot.

2. *Term.* A portable or temporary sign permit shall allow the use of a portable or temporary sign for a specified thirty-day period.

3. *Number of permits.* No more than two (2) portable or temporary sign permits shall be issued to each business on the same lot in any calendar year. In no event shall any lot have a portable or temporary sign for more than sixty (60) days in one (1) calendar year.

4. ***Other conditions.*** A portable or a temporary sign shall be allowed only in those districts indicated on Table 1 of section 14-369.5.

5. ***Permit sticker.*** Each portable sign and each temporary sign shall display a permit sticker issued by the building authority. The sticker shall contain the expiration date of the permit.

(b) ***Additional requirements for freestanding portable or temporary signs.*** In addition to the requirements of subsection (a) of this section, freestanding portable or temporary signs on private property shall meet the following requirements:

1. No portable or temporary sign shall interfere with the sight distance of traffic passing the site. The determination of sight distance shall be made by the traffic engineer.

2. Portable and temporary signs shall be set back a minimum of five (5) feet from the side line of the city right-of-way and a minimum of five (5) feet from any property line.

3. No portable or temporary sign shall exceed four (4) feet by eight (8) feet in size.

(c) ***Portable signs in the city right-of-way.*** Portable signs to be located in the city right-of-way shall receive a license from the building authority and shall be subject to the regulations promulgated by the building authority.

(d) ***Calculations.*** Portable and temporary signs shall not be included in calculations for other types of signage permitted by this division.
(Ord. No. 252-94, § 2, 4-4-94)

Sec. 14-370.7. Special sign types.

(a) ***Window signs.*** Window signs shall be permitted without a permit and shall not be included when calculating cumulative sign area. In no event, however, shall window signs cover more than fifty (50) percent of the area of any window.

(b) ***Real estate/construction/for sale or lease signs.*** Such signs shall be permitted without a permit, provided that in residential zones there shall be no more than one (1) such sign for each residential unit offered for sale or lease and such sign shall not exceed fifteen (15) square feet in area. In commercial and industrial zones, there shall be no more than one (1) such sign per unit offered for sale or lease for each street frontage of the property and the area of such signs shall not exceed sixty-four (64) square feet in the aggregate for each frontage.

(c) ***Works of art containing signage.*** Decorative murals, outdoor paintings, sculpture or other bona fide works of art that contain any commercial message, trademark or symbol are permitted in all zones except residential zones, provided that such commercial message, trademark or symbol does not comprise more than ten (10) percent of the total area of the artwork. Works of art containing a commercial message, trademark or symbol shall be permitted in residential zones only where such signage is ornamental in nature and does not serve any type of advertising function for the site upon which it is located or for any other site owned or controlled by the residential property owner or tenant.

(d) ***Building marker.*** Building markers shall be permitted without a permit.

(e) ***Seasonal sales/special activities signs.*** Signs associated with special events or activities that are licensed or authorized by the city council or its designee, such as seasonal sales or markets, special events, fairs and festivals, shall be permitted subject to applicable conditions or limitations that are imposed as part of the licensing or authorization process.

(f) ***Directory signs.*** Except where prohibited by section 14-369.5, directory signs, freestanding or attached to buildings, shall be allowed without a permit and shall not be included when calculating cumulative sign area, provided that the sign area for each tenant does not exceed one and one-half (1.5) square feet.
(Ord. No. 252-94, § 2, 4-4-94)

Sec. 14-371. Exemptions.

The following signs shall be exempt from regulation under this division and shall not be included when calculating cumulative sign area:

(a) Any public notice or warning required by a valid and applicable federal, state or local law, regulation or ordinance;

(b) Any sign inside a building that is not attached to a window or door;

(c) Works of art that do not include a commercial message;

(d) Holiday lights and decorations with no commercial message;

(e) Traffic control signs on private property, such as stop, yield and similar signs, the face of which meets department of transportation standards and which contains no commercial message of any sort;

(f) Public signs erected by or on behalf of a governmental body to post legal notices, convey public information, and direct or regulate pedestrian or vehicular traffic, including parking regulatory signs; bus stop signs erected by a public transit company; informational signs of a public utility regarding its poles, lines, pipes or facilities;

(g) Political signs, subject to the provisions of 23 M.R.S.A. § 1913;

(h) Signs inside office park developments with a single tenant, where such signs are not visible from any public street or public open space;

(i) Landmark signs; and

(j) Security signs, except that no commercial message of any kind shall be allowed on a sign if such message is legible from any location off the lot on which the sign is located.

(k) Bus shelter signs, as defined in section 14-367, subject to the provisions of Section 1 of the Technical Manual concerning the placement and permitted dimensions of bus shelter signs.

(Ord. No. 252-94, § 2, 4-4-94; Ord. No. 91-11/12, 5-21-12)

Sec. 14-372. Nonconforming signs.

(a) All signs lawfully existing on April 4, 1994, that do not conform to the terms of this division may be continued, subject to subsection (b) of this section.

(b) Notwithstanding subsection (a) of this section, lawfully nonconforming signs shall be made to conform or shall be removed if any of the following occurs, unless such improvements are required to achieve compliance with applicable federal, state or local regulations, other than the provisions of this division, and such improvements do not require replacement of the nonconforming sign:

1. Level III site plan review is sought for any new structures or building additions on the site, except as provided in subsection (5).

2. A building permit is sought for a rehabilitation of a building where the value of the rehabilitation exceeds fifty (50) percent of the assessed value of the building, or one hundred thousand dollars ($100,00.00), whichever is less, provided that where rehabilitation is of a multi-tenant building, only the tenant or tenants whose building or area is being rehabilitated shall be required to come into conformance with this division.

3. An application is filed for a new sign permit, except as provided in subsection (5), in accordance with the following:

    a. When an application is filed for a new building sign, all building signs on the lot shall be required to come into compliance with all requirements of this division for building signs.

    b. When an application is filed for a new freestanding sign, all freestanding signs on the lot shall be required to come into compliance with all requirements of this division for freestanding signs.

4. A sign is modified in any way, except for routine maintenance or repair of sudden and accidental damage, or for a change in the message panel only, unless otherwise

required to conform under this section. Repair of sudden and accidental damage shall not include replacement of the entire sign, which shall be treated as a modification under this subsection. Letters on nonconforming signs designed for changeable messages may be changed without triggering the terms of this subsection as long as no other change is made to the sign. Replacement of an awning covering with substantially the same material and text shall also not be considered a modification.

5. In the case of nonconforming freestanding joint identification signs for multi-tenant properties, signs may be added or modified to reflect a change in individual tenants without triggering the terms of this subsection, provided that the degree of nonconformity is not increased. In the case of building signs on multi-tenant properties, this subsection shall apply only to the individual business tenant that is adding or modifying a sign or seeking level III site plan review and shall not trigger the conformance requirement for other tenants' building signs, unless the building owner(s) elects to proceed under alternative 2 of Table 2.13- of section 14-369.5. In that case, all building signs on the subject lot shall be made to conform to the provisions of this division or shall be removed.

6. In no event shall the degree of nonconformity of any sign or type of signage on any lot be increased.

(Ord. No. 252-94, § 2, 4-4-94; Ord. No. 278-09/10, 7-19-10)

Sec. 14-372.5. Violations and enforcement.

Failure to perform any act required by this division or by any permit issued hereunder or performance of any act prohibited by this division shall constitute a violation and shall be subject to penalties as set forth in 30-A M.R.S.A. § 4452. Each day on which a violation exists shall constitute a separate violation for purposes of this section. The building authority shall be responsible for enforcement of this division.

(Ord. No. 252-94, § 2, 4-4-94)

DIVISION 22.5. ADULT BUSINESS ESTABLISHMENTS*

***Cross reference(s)—**Amusements, Ch. 4.

Sec. 14-373. Findings and purpose.

The council hereby finds that, because of their unique and potentially offensive nature, adult business establishments can have a blighting influence on the surrounding neighborhood if permitted at all in certain zones, or if allowed to concentrate in certain other zones, within the city. Moreover, such establishments are incompatible with uses characterized by family and youth-related activities. The purpose of this division is, therefore, to prevent such deleterious effects and, thus, protect the public health, safety, and general welfare by regulating the location and certain other aspects of adult business establishments.

(Ord. No. 187-81, § 602.16A(1), 9-21-81; Ord. No. 356-82, 1-18-82)

Sec. 14-374. Definitions.

Except as provided herein or in section 14-47, all words used in this division shall have their common meanings unless the context clearly implies otherwise.

Adult business establishment means and includes any retail business, including but not limited to any bookstore, newsstand, novelty store, nightclub, bar, cabaret, amusement arcade, or theater, which:

(a) Keeps for public patronage or permits or allows the operation of any adult amusement device as defined in section 4-16; or

(b) Customarily exhibits motion pictures or displays any other visual representation described or advertised as being "X-rated" or "for adults only," or which customarily excludes persons from any portion of the premises by reason of immaturity of age by the use of such, or similar, phrases; or

(c) Is adjudged to be in violation of 17 M.R.S.A. §§ 2911, 2912.

Customarily means more often than an average of one (1) calendar week during any calendar month of operation.

Sexually explicit means the display or depiction of sex organs

during actual or simulated sexual intercourse or sexual acts as defined in 17-A M.R.S.A. § 251.
(Ord. No. 187-81, § 602.16A(2), 9-21-81; Ord. No. 356-82, 1-18-82)

Cross reference(s)—Definitions and rules of construction generally, § 1-2.

Sec. 14-375. Adult business establishments permitted; special requirements.

(a) Notwithstanding any other provision of this article, adult business establishments shall be permitted only in the B-2 and B-3 zones, provided that such establishments, but for this division, would otherwise be permitted therein, and subject to the following special requirements:

1. Such establishment shall be at least one thousand (1,000) feet from any other adult business establishment, and at least five hundred (500) feet from any residential zone, as measured in a straight line, without regard to intervening structures or objects;

2. No sexually explicit materials, entertainment, or activity shall be visible from the exterior of the premises.

(b) Except as expressly provided herein, nothing in this division shall be construed to waive or otherwise affect any other provision of this article.
(Ord. No. 187-81, § 602.16A(3), 9-21-81; Ord. No. 356-82, 1-18-82; Ord. No. 54-85, 6-17-85; Ord. No. 164-97, § 11, 1-6-97)

Sec. 14-376. – Sec. 14-380. Reserved.

DIVISION 23. NONCONFORMING USE AND NONCONFORMING BUILDINGS

Sec. 14-381. Continuation.

Any lawful use of buildings, structures, premises or parts thereof, existing on June 5, 1957, and made nonconforming by the provisions of this article or any amendment thereto may be continued although such use does not conform with the provisions of this article or amendment thereto.
(Code 1968, § 602.17.A)

Sec. 14-382. Increase in nonconforming use of structure or alterations to nonconforming structures limited.

(a) A lawful nonconforming non-residential structure may be maintained, repaired, or reconstructed in kind within a one (1) year period or within a two (2) year period for a nonconforming residential structure, but no alterations, modifications or additions shall be made to it, except as provided in this division.

(b) A building whose use is wholly nonconforming shall not be altered so as to increase the cubical content or the degree of nonconformity.

(c) No alterations, modifications or additions shall be made so as to increase the cubical content or the degree of nonconforming use, nor shall a nonconforming use be extended to any other part of such building, unless such part was clearly arranged and designed for such nonconforming use prior to June 5, 1957, or such extension of a nonconforming use is solely for the purpose of bringing the use into compliance with health or safety codes, or to correct a condition that may not technically be in violation but which is determined by the board of appeals to constitute a health or safety problem. In either case, the expansion shall be limited to the minimum necessary to accomplish that purpose.

(d) Alteration, modification or addition may be made to a building which is lawfully nonconforming as to space and bulk or any dimensional requirement where the proposed changes in existing exterior walls and/or roofs would be within the space occupied by the existing shell of the building, and would not create any new nonconformity nor increase any existing nonconformity. This subsection shall not apply to buildings located within shoreland zones and existing on June 15, 1992, which are nonconforming only as to setbacks from wetlands, tributary streams or other water bodies, which shall be regulated in accordance with subsection (f) of this section.

(e) Except as expressly provided herein, any alteration, modification or addition permitted under this section shall be in compliance with all other applicable sections of this chapter. Nothing within this section shall be construed to permit an increase in the number of nonconforming units in a building which is nonconforming as to the number of dwelling units or will become nonconforming as a result of such alteration, modification or addition.

(f) ***Expansions.*** A non-conforming structure may be added to

or expanded after obtaining a permit from the same permitting authority as that for a new structure, if such addition or expansion does not increase the non-conformity of the structure and is in accordance with the sections below.

1. After January 1, 1989, if any portion of a structure is less than the required setback from the normal high water line of a water body or tributary stream or the upland edge of a wetland that portion of the structure shall not be expanded, as measured in floor area or volume, by thirty (30%) percent or more, during the lifetime of the structure. If a replacement structure conforms with the requirements of section 14-382, and is less than the required setback from a water body, tributary stream or wetland, the replacement structure may not be expanded if the original structure existing on January 1, 1989 had been expanded by thirty (30%) percent in floor area and volume since that date.

2. Whenever a new, enlarged, or replacement foundation is constructed under a non-conforming structure, the structure and new foundation must be placed such that the setback requirement is met to the greatest practical extent as determined by building authority, basing its decision the criteria specified in subsection (3) below. If the completed foundation does not extend beyond the exterior dimensions of the structure, except for expansion in conformity with section (f) above, and the foundation does not cause the structure to be elevated by more than three (3) additional feet as measured from the uphill side of the structure (from original ground level to the bottom of the first floor sill), it shall not be considered to be an expansion of the structure.

3. A nonconforming structure may be relocated within the boundaries of the parcel on which the structure is located, provided that the site of the relocation conforms to all setback requirements to the greatest practical extent as determined by the building authority, and provided that the applicant demonstrates that the present subsurface sewage disposal system meets the requirements of state law, the State of Maine Subsurface Wastewater Disposal Rules (Rules), or that a new system can be installed in compliance with state law, such rules, and all applicable sections of this Code. In no

event shall a structure be relocated in a manner that causes the structure to be more nonconforming. In determining whether the building relocation meets the setback requirements to the greatest practical extent, the building authority shall consider the size of the lot, the slope of the land, the potential for soil erosion, the location of other structures on the property and on adjacent properties, the location of septic system and other on-site soils suitable for septic systems, the type and amount of vegetation to be removed to accomplish the relocation. When it is necessary to remove vegetation within the water or wetland setback are in order to relocate a structure, the building authority shall require replanting of native vegetation to compensate for the destroyed vegetation. In addition, the area from which the relocated structure was removed must be replanted with vegetation. Replanting shall be required as follows:

a. Trees removed in order to relocate a structure must be replanted with at least one native tree, three (3) feet in height, for every tree removed. If more than five trees are planted, no one species of tree shall make up more than fifty (50%) percent of the number of trees planted. Replaced trees must be planted no further from the water or wetland than the trees that were removed.

   Other woody and herbaceous vegetation, and ground cover, that are removed or destroyed in order to relocate a structure must be re-established within the setback area. The vegetation and/or ground cover must consist of similar native vegetation and/or ground cover that was disturbed, destroyed or removed.

b. Where feasible, when a structure is relocated on a parcel the original location of the structure shall be replanted with vegetation which may consist of grasses, shrubs, trees, or a combination thereof.

4. Buildings in existence on January 1, 1989, and located in shoreland zones may be expanded once during the lifetime of the structure up to twenty-five (25) feet toward a freshwater wetland or tributary stream, provided that a

minimum setback of forty (40) feet is maintained and that the existing floor area or volume is not increased by more than thirty (30%) percent, and shall not create any undue environmental impact or flood prone condition.

(Code 1968, § 602.17.B; Ord. No. 271-89, 2-22-89; Ord. No. 96-89, § 2, 9-18-89; Ord. No. 15-92, § 26, 6-15-92; Ord. No. 284-99, §1, 5-17-99, enacted as an emergency; Ord. No. 296-08/09, 6-15-09; Ord. No. 139-12/13, 2-4-13)

Sec. 14-383. Extension of nonconforming use of land prohibited.

A lawful nonconforming use existing on premises outside of a building shall not be extended to or allowed to occupy any part or parts of such premises outside of the building.

(Code 1968, § 602.17.C; Ord. No. 354-85, § 3, 1-7-85)

Sec. 14-384. Change of nonconforming use.

A lawful nonconforming use in a structure designed for a use permitted in the zone in which it is located shall not be changed to any use other than a use permitted in the zone in which the structure is located. When a nonconforming use in such a structure has been changed to a permitted use, it shall not thereafter be changed back to any non-permitted use. For purposes of this section, a use shall be deemed to have been so changed when an existing nonconforming use shall have been terminated and a permitted use shall have commenced and continued for a period of seven (7) days. Any change of use in violation of this division shall be deemed to be an abandonment of the lawfully existing nonconforming use. A lawful nonconforming use in a structure not designed for a use permitted in the zone in which it is located shall not be changed to any use other than a use permitted in the zone in which the use is located or to any use other than a nonconforming use of a more restricted zone, as set forth in the following schedule, provided that in no such case shall any structural alterations be made in any building except those required by law, ordinance or other regulations:

(a) In a business zone, from any use permitted in an industrial zone to any use permitted in a business zone.

(b) In a B-1 zone, from any use permitted in a B-3 zone to any use permitted in a B-2 zone.

(c) In a residence zone, from any use permitted in a B-2 zone to any use permitted in a B-1 zone.

(d) In a residence zone, from any use permitted in any other residence zone to any use permitted in a more restricted residence zone. For the purpose of this subsection, an R-6 zone shall be deemed the least restricted and an R-2 zone shall be deemed the most restricted, with the intervening zones restricted in order of zone number.

(Code 1968, § 602.17.D; Ord. No. 499-74, § 8, 8-19-74)

Sec. 14-385. Restoration or reconstruction within an existing footprint of damaged nonconforming structure.

A nonconforming structure damaged by fire, explosion, flood, riot, act of the public enemy, accident of any kind, decay or otherwise may be restored or rebuilt only where:

(a) The restoration or reconstruction is of a building which is nonconforming only as to land area, setbacks or any other dimensional requirements; and

(b) Where the restoration or reconstruction will occur entirely within the existing footprint and previous shell of the building and will not create a new nonconformity; and

(c) Restoration or reconstruction occurs within one (1) year for a nonconforming non-residential structure, or two (2) years for a nonconforming residential structure, of the initial damage where such damage is sudden and accidental. Note that for buildings in SHoreland zones, stte regulations may also govern and provide for a shorter period for restoration or reconstruction of non-conforming structures; and

(d) Restoration or reconstruction necessitated by decay must be completed within one (1) year of the demolition of the building or the commencement of the restoration or reconstruction, whichever occurs first; and

(e) Any reconstruction, under this provision, in the residential R-6 zone on a lot with 10,000 square feet or less, other than the exact restoration of a previously existing building on the site, shall comply with the applicable standards contained within the Planning and Development Design Manual; and

(f) A nonconforming building located in the R-6 which is destroyed by fire, explosion, flood, riot, act of the enemy, or accident may be rebuilt under the small residential lot development provisions of the R-6 zone as if the lot were vacant as of January 1, 2005 and such reconstruction shall meet the setback requirements contained therein to the extent practicable; otherwise the building shall be reconstructed within the footprint of the previously existing building such that any nonconformity will not be enlarged.

For the purpose of this section, the footprint of a building is the perimeter of the foundation supporting a structure.
(Code 1968, § 602.17.E; Ord. No. 89-88, 7-19-88; Ord. No. 284-99, §2, 5-17-99, enacted as an emergency; Ord. No.254-05/06, 6-5-06; Ord. No. 61-07/08, 10-1-07; Ord. No. 240-09/10, 6-21-10; Ord. No. 139-12/13, 2-4-13)

***Editor's note—**Ord. No. 89-88, adopted July 19, 1988, amended this section to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 89-88.

Sec. 14-386. Discontinuance of use of land for ninety days.

A nonconforming use of land where no buildings or only incidental or accessory buildings are employed together with such use shall not be changed to any other nonconforming use, and if such use is discontinued for a period of ninety (90) days, it shall not be reestablished.
(Code 1968, § 602.17.G)

Sec. 14-387. Discontinuance of use of property.

If a legally nonconforming non-residential use is discontinued for a period of twelve (12) months or if a legally nonconforming residential use is discontinued for a period of twenty-four (24) months, such discontinuance shall constitute an abandonment of the use and the property shall not thereafter be occupied or used except in conformity with the provisions of this article. In cases of foreclosure or similar situations involving a legally nonconforming residential structure, the Planning Authority shall be authorized to extend the aforementioned period up to an additional five (5) years provided that the extension is for good cause and the minimum length considered necessary to resume the

legally nonconforming use of the structure. A nonconforming use of land which is incidental or accessory to such nonconforming structure shall be considered as being discontinued at the same time as the nonconforming use of the structure. Note that for buildings in SHoreland zones, state regulations may also govern and provide for a shorter period of time for nonconforming properties.
(Code 1968, § 602.17.F; Ord. No. 499-74, § 9, 8-19-74; Ord. No. 139-12/13, 2-4-13)

Sec. 14-388. Reserved.

***Editor's Note—**Per Council Order 125-09/10 passed on January 4, 2010 Section 14-388 (Nonconformity as to the area of dwelling) was repealed in its entirety.

Sec. 14-389. Nonconformity as to off-street parking.

A building or structure which is nonconforming as to the requirements for off-street parking shall not be enlarged or altered to create additional dwelling units, or seats as in the case of places of public assembly, or floor area as in the case of industrial, business, manufacturing, institutional or recreational buildings, or accommodations as in the case of hotels, tourist homes and tourist courts, unless required off-street parking is provided for such addition or enlargement.
(Code 1968, § 602.17.I)

Sec. 14-390. Nonconformity as to off-street loading.

A building which is nonconforming as to the requirements for off-street loading shall not be enlarged or added to, unless off-street loading is provided sufficient to satisfy the requirements of this article for both the addition or enlargement and the original building or structure.
(Code 1968, § 602.17.J)

Sec. 14-391. Nonconformity as to number of dwelling units.

(a) Purpose. The purpose of this provision is to establish a process whereby certain dwellings which contain more dwelling units than the number permitted by the applicable provisions of the Land Use Code may be recognized as legal, nonconforming uses. This provision shall not apply to rooming units.

(b) Approval by Zoning Administrator.

1. Application. Application for validation of such non-conforming dwelling units shall be on a form provided by the Division of Housing and Neighborhood Services, Inspection Services Office. The application fee will be $300.00 for each dwelling unit which is the subject of the application, and will be accompanied by: (i) a plan, drawn to scale, which shows the location of the building(s) on the lot, parking, easements, dumpsters, fencing, public ways and any other significant feature and (ii) a floor plan for each unit in the dwelling, whether or not it is the subject of the application.

(c) Eligibility. In order for a nonconforming dwelling unit to be validated by administrative action of the Zoning Administrator as authorized herein, the Zoning Administrator must find, based on competent evidence, supported by public records, that:

1. The nonconforming dwelling units were either in existence April 1, 1995, or the structure in which they are located was originally designed to accommodate more than the number of such units presently in use.

2. The applicant neither constructed nor established the non-conforming dwelling units.

3. The nonconforming dwelling units comply with or can be made to comply with current standards of the National Fire Protection Association Life Safety Code (§16-1)and the National Fire Protection Association 1: Fire Prevention Code (§10-16), as amended.

4. Each of the nonconforming dwelling units complies with provisions of the City's Housing Code or can be made to conform with, as amended, including, but not limited to, the requirements of §6-110, Minimum Standards for Space and Occupancy and §6-111, Minimum Plumbing Standards, and §6-112 Minimum Ventilation Standards.

5. The structure containing the nonconforming dwelling units is located in the R-3, R-4, R-5, R-6 or R-7 Zones; or the B-1, B-1(b), B-2, B-2(b) or B-3 Zones.

6. In the absence of legally competent evidence, supported

by records, (such as, but not limited to, Assessor's records, purchase and sale agreements, affidavits, deeds, mortgages, as well as reliable secondary sources, such as the Portland Director), that the conditions of subsections c(1), C(2), c(3), c(4), or c(5) can be met, the Zoning Administrator may not approve the application, but shall advise the applicant that the matter may be appealed to the Board of Appeals.

(d) Notice to Abutters. Upon receipt of a completed application, the Zoning Administrator will provide both the owners of abutting properties as well as the owners of property situated within 300 feet of the structure of the essential information contained in the application, along with a notice that they may object to the Zoning Administrator's acting on the application and require the applicant to appeal to the Board of Appeals. The notice shall be in conspicuous type and advise the abutters and owners of property within 300 feet that any objection must be submitted in writing to the Zoning Administrator within ten (10) days of the date of the notice sent to them.

The failure of any property owner to receive the notice described above shall not invalidate any action by the Zoning Administrator. The Zoning Administrator shall promptly notify the applicant of receipt of the objection, that the Zoning Administrator is without authority to proceed and advise the applicant that, within 30 days from receipt of the letter, an application may be filed to have the matter reviewed by the Board of Appeals as a conditional use.

(e) Approval of Application.

1. The Zoning Administrator may approve the application, provided: (i) the evidence presented satisfies all of the requirements of this section; (ii) the Office of Inspection Services and Fire Prevention Bureau have certified that the nonconforming units conform with or can be made to conform with the applicable codes; and (iii) no abutter nor person entitled to notice has requested that the application be referred to the Board of Appeals, instead of the Zoning Administrator.

2. Upon approval of the application and receipt of an additional fee in the amount of $75.00 for each

nonconforming dwelling unit which has been recognized as a lawful, nonconforming use, the Zoning Administrator will issue a certificate of occupancy.

(f) Disapproval of Application. In the event the application is not approved by the Zoning Administrator or in the event of a timely objection filed by a person qualified herein to file such an objection, the applicant, within (30) days from the decision of the Zoning Administrator or objection, may appeal the matter to the Board of Appeals as a conditional use.

(g) Action by Board of Appeals. The Board of Appeals shall treat applications filed under this section as an application for a conditional use (§14-474) applying the standards applicable to conditional uses as well as the requirements of this section.

(h) Dimensional and Parking Requirements. In marking decisions under this section neither the Zoning Administrator nor the Board of Appeals shall apply the dimensional or parking requirements which would otherwise apply in the zones where the nonconforming dwelling units are situated.

(i) Exclusions.

1. The provisions of this section shall not apply to rooming units (§14-47), but shall apply to efficiency apartments (§6-110(b)).

2. The Board of Appeals is without jurisdiction to grant any relief (including, but not limited to, variances) which would recognize the particular dwelling units which are the subject of this section as legal, nonconforming uses, except in strict compliance with each requirement of this section.

(j) Prior Judicial and Administrative Action. Decisions of any court or administrative body, including but not limited to, the Zoning Administrator, the Planning Board or the Board of Appeals made prior to the effective date of this section and which addressed the number of nonconforming dwelling units in a particular structure, will not bar relief under this section.

(Ord. No. 153-03/04, 02/23/04)

***Editor's note—**Section 4 of Ord. No. 354-85, adopted Jan. 7, 1985, repealed the pre-2004 version of § 14-391, relative to the Board of Appeals permitting temporary nonconforming uses, which derived from Code 1968, § 602.17.K.

Sec. 14-392. - Sec. 14-400. Reserved.

DIVISION 24. USE REGULATIONS AND EXCEPTIONS

Sec. 14-401. Generally.

The requirements of this article shall be subject to the use regulations and exceptions of this division.
(Code 1968, § 602.18)

Sec. 14-402. Relationship of buildings to lots.

Every building hereafter erected shall be located on a lot as defined in section 14-47.
(Code 1968, § 602.18.A)

Sec. 14-403. Street access.

(a) *In general.* No building intended for use as a habitation shall be erected on a lot which has its only street frontage on a street less than thirty-five (35) feet wide. No building shall be erected on a lot, except on the islands in Casco Bay, which does not abut a street meeting the minimum requirements for street improvements set forth in this section. For purposes of this section, street shall be as defined in section 14-47, except that a dedicated street which may no longer be accepted due to lapse of time and an accepted street which may have been discontinued by abandonment shall also be deemed to be streets, provided that an applicant for a building permit respecting any lot abutting such street shall, without compensation or claim for damages, and at his own cost and expense, first submit to the building authority (a) a deed from the owner of such lot conveying to the city all his right, title and interest in and to such street or any portion thereof; and (b) an agreement by such owner forever releasing the city from any and all claims for damages for the laying out and taking of such street and indemnifying the city against any and all other such claims, both such instruments to be executed and in recordable form acceptable to the corporation counsel and to encumber and run with the land.

(b) ***Minimum requirements for street improvements on unimproved and improved but unpaved streets.*** For a lot abutting any portion of a street which is unimproved or improved but not permanently paved, that portion which abuts the lot, and any like portion between such portion and the nearest permanently paved street or portion which is the principal access to such lot, shall be improved, including sewers, storm drains, pavements, curbs and, if located on a designated school walking route, sidewalks, in accordance with the minimum technical standards promulgated by the public works authority pursuant to section 14-498(a) of article IV of this chapter. Where the nearest permanently paved street does not have granite curbing, the public works authority may waive the requirement of curbing under this section, if it determines that an acceptable alternative drainage plan will be provided. Prior to the issuance of a building permit for erection of a building on a lot abutting any portion of a street which is unimproved or improved but not permanently paved, the following shall occur: (1) A plan of the street improvements required by this section shall be submitted to the public works authority; and (2) upon determination by the public works authority that the plan meets the street improvement requirements established by this subsection, a performance guarantee and inspection fee for said improvements shall be submitted to the city as set forth in section 14-501. Also as set forth in section 14-501, a one-year defect bond shall be tendered to the city prior to release of the performance guarantee required hereby. The provisions of this subsection (b) shall not apply to the erection of any single-family dwelling on any lot where the owner of the lot establishes that he or she was the owner of that same lot on November 19, 1984, and at all times thereafter, and states his or her intention under oath to make the structure his or her personal residence.

I ***Exceptions.*** The requirements of this section shall not apply to the following city streets upon their construction by the public works authority to such standards as are determined by the authority to be the most feasible:

1. Dingley Court;

2. Morgan Court.

(Code 1968, § 602.18.B; Ord. No. 193-84, § 1, 11-19-84; Ord. No. 178-87, 11-2-87; Ord. No. 372-89, 3-20-89; Ord. No. 273-90, 3-19-90)

Sec. 14-404. Accessory use.

The term "accessory use" shall include only the following:

(a) A subordinate use of land or building which is customarily incidental to the main building or to the principal use of the land and which is located on the same lot with the principal building or use. No "garage sale," "lawn sale," "attic sale," "rummage sale," or other similar casual sale of tangible personal property which is advertised by any means whatsoever whereby the public at large is or can be made aware of such sale, shall be deemed to be "customarily incidental" if such sale occurs after sales have been conducted on the same premises for six (6) or more days previously during the calendar year.

Except where the principal use consists of the sale of alcoholic beverages for consumption on premises or where the principal structure is an airline terminal, pinball machines or amusement devices shall not be considered to be accessory uses whenever there are more than a total of two (2) such machines or devices on the premises.

(b) Off-street parking when serving conforming uses located in any zone.

(c) Home occupations as defined in section 14-47 and section 14-410.

(d) Signs as defined in division 22 of this article.

(e) The letting of rooms within an existing dwelling unit in any residential zone, provided that:

1. There shall be no more than two (2) persons occupying such room or rooms;

2. There shall be not more than two (2) rooms per dwelling unit occupied for such use; and

3. There shall be no increase in the bathroom and/or kitchen facilities in the dwelling, and no such facility shall have been constructed in the immediately preceding two (2) years.

(Code 1968, § 602.18.C; Ord. No. 574-81, 4-6-81; Ord. No. 66-87, § 1, 11-2-87; Ord. No. 240-09/10, 6-21-10)

Sec. 14-405. Business entrances.

In any business zone which abuts a residence zone in such a manner that the dividing line between the zones is one hundred (100) feet or less from the main business street of such business zone, no building of nonconforming use in such residence zone shall be built and no such existing building shall be altered so as to have its front or any entrance door or any part thereof used for a nonconforming use in such residence zone facing upon any other street than the main business street unless such entrance is at a distance greater than sixty (60) feet from the nearest residence zone.
(Code 1968, § 602.18.D)

Sec. 14-406. Garages.

No building in any zone shall be erected, altered or used as a garage for the storage of more than three (3) motor vehicles or for the business of repairing motor vehicles, if any part of either old or new building when completed would be closer than five (5) feet to any part of any church, public or private hospital or school; or if any part of either old or new building when completed would be less than fifteen (15) feet from the boundary line of any lot upon which any part of any church, public or private hospital or school is located. No existing garage used for the storage of more than three (3) motor vehicles or for the business of repairing motor vehicles shall be deemed to become a nonconforming use through the subsequent erection of such church, hospital or school closer than the aforesaid distance to such a garage.
(Code 1968, § 602.18.E)

Sec. 14-407. Temporary stands.

(a) No premises shall be used for business purposes consisting of temporary stands, booths, platforms or vehicles intended for the sale of merchandise or other mercantile purposes, if any part of such stand, booth, platform or vehicle is proposed to be located nearer than one hundred twenty-five (125) feet to any residence zone, except that stands for the sale of agricultural products shall be permitted as specified in division 2 of this article.

(b) A single produce stand shall be permitted on the premises of a community garden for the sale of flowers, vegetables, herbs or

fruit produced on the premises; provided that the stand is no more than one hundred (100) square feet in floor area or open table area and is located a minimum of five feet from any property line; and that sales are limited to two days per week between the hours of 9:00 a.m. and 6:30 p.m. during the growing season from May 25 through October 31 and that the stand has received all necessary permits. The use of produce stands shall be seasonal and temporary. Any properly permitted structure may remain on the premises year round. If the community garden is owned or operated by a non-profit organization, sales of flowers, vegetables, herbs or fruit produced in other gardens or farms in Maine owned or operated by said organization shall be permitted within the same limitations listed above. For purposes of this section, community garden means a parcel of open land used for the cultivation of flowers, vegetables, herbs, or fruit by a group of city residents either jointly as a single plot or through individual garden plots or beds.

(c) A single produce stand shall be permitted on the premises of a non-profit organization with the permission of the owner and and on the premise of public schools with the permission of the school department; provided that the stand is for the sale of local fruit, vegetables, flowers, seedlings and plants produced by the seller; that the stand is no more than one hundred (100) square feet in floor area or open table area and is located a minimum of five feet from any property line; that sales on the premises are limited to two days per week between the hours of 9:00 a.m. and 6:30 p.m. during the growing season from May 25 through October 31; and that the stand has received all necessary permits. The use of produce stands shall be seasonal and temporary. Any properly permitted structure may remain on the premises year round.

(d) For purposes of this Section, non-profit organization shall mean a non-profit organization incorporated pursuant to the laws of the State of Maine.

(Code 1968, § 602.18.F; Ord. No. 75-10/11, 11-15-10;Ord. No. 59-12/13, 9-19-12)

Sec. 14-408. Exceptions to performance standards.

The operation on public streets, airports and railroad rights-of-way of motor vehicles and other vehicles for the transportation of goods or persons shall be excepted from the limitations of the sections entitled “external effects.”

(Code 1968, § 602.18.G)

Sec. 14-409. Heliports.

Heliports shall meet the following minimum specifications, subject to regulations of the Civil Aeronautics Administration when such regulations are greater:

(a) *Roof heliport:*

1. Take-off area: Two hundred (200) feet by two hundred fifty (250) feet minimum.

2. Parking area: Thirty (30) feet by ninety (90) feet minimum.

(b) *Ground heliport:*

1. Take-off area: Three hundred (300) feet by seven hundred (700) feet minimum.

2. Parking area and station building shall be located out of flight area.

(c) *Maximum elevation of operational area above street:* One hundred (100) feet.

(d) *Minimum clearance from lateral obstruction*: One hundred (100) feet.

(e) *Minimum width of approach and departure path*: Five hundred (500) feet at landing area, tapering outward fifteen (15) degrees on each side to a width of one thousand (1,000) feet.

(f) *Slope:* With emergency landing areas: One (1) to eight (8): Without emergency landing areas: One (1) to twenty (20).

(g) *Curved approach:* Minimum radius to turn, six hundred fifty (650) feet.

(h) *Approach zone transition area:* Slope, one (1) in two (2).

(Code 1968, § 602.18.H)

Sec. 14-410. Home occupation.

Purpose. The purpose of home occupations is to allow the secondary and incidental use of a residence for the conduct of appropriate occupations whose external activity levels and impacts are so limited as to be compatible with the residential character of the neighborhood.

(a) In connection with the operation of a home occupation, within a dwelling unit, the following requirements shall be met:

1. A home occupation shall not occupy more than five hundred (500) square feet of floor area or more than twenty-five (25) percent of the total floor area of such a dwelling unit, whichever is less, or in the case of licensed family day care homes, or home babysitting services, to accommodate not more than six (6) children plus two (2) children after school and having no nonresidential employees;

2. There shall be no outside storage of goods and materials nor shall there be exterior displays, or display of goods visible from the outside;

3. Storage of materials related to the home occupation shall count as a part of the occupancy limitations in subsection (a)1 above, but shall not constitute a dominant part of such occupancy provided, however, storage of such materials or products in garages or other accessory structures is prohibited;

4. Exterior signs shall be limited to one (1) nonilluminated sign not exceeding a total area of two (2) square feet, affixed to the building and not projecting more than one (1) foot beyond the building;

5. Any exterior alterations to the residence shall be compatible with the architecture of the building and maintain the residential appearance by virtue of exterior materials, lighting, and signs;

6. ***Off-street parking:*** Off-street parking is required as provided in division 20 (off-street parking) of this article;

7. The home occupation shall not produce offensive noise, vibration, smoke, dust or other particulate matter, odorous matter, heat, humidity, glare or other objectionable effects;

8. There shall be no more than one (1) nonresident employed in the home occupation, provided, however, family day care or home babysitting services shall have no nonresident employees;

9. No traffic shall be generated by the home occupation in greater volumes than would normally be expected in a residential neighborhood;

10. No motor vehicle exceeding a gross vehicle weight of six thousand (6,000) pounds shall be stored on the property in connection with the home occupation.

(b) No residence shall be occupied, altered or used for any home occupation except the following:

1. Accountants and auditors;

2. Answering services (telephone);

3. Architects;

4. Artists and sculptors;

5. Authors and composers;

6. Computer programming;

7. Custodial services;

8. Custom furniture repair and upholstering;

9. Dentists, doctors, therapists, and health care practitioners;

10. Direct mail services;

11. Dressmakers, seamstresses and tailors;

12. Engineers;

13. Family planning services;

14. Hairdressers (limited to no more than two (2) hair dryers);

15. Home crafts, such as model making, rug weaving, lapidary work, cabinet making, weaving, ceramics;

16. Interior decorators;

17. Lawyers, justices of the peace and notary publics;

18. Licensed family day care home or babysitting services;

19. Musicians or music teachers, including group instruction not to exceed six (6) students at any time but not including performances or band rehearsals, which shall meet the following requirements in addition to those set forth in subsection (a) of this section:

    a. Electronic amplification is prohibited;

    b. The applicant shall demonstrate that noise attenuation is provided which minimizes perception of sound at property lines at all times during the use. Noise attenuation measures may include, but are not limited to, insulation, double-pane windows, air conditioners or any combination of these or similar noise attenuation measures;

    c. Hours of operation shall be limited to 8:30 a.m. to 9:30 p.m.

20. Office facility of a minister, rabbi, or priest;

21. Photographic studios;

22. Professional counseling and consulting services;

23. Professional research services;

24. Sales persons provided that no retail or wholesale transactions are made on the premises;

25. Small appliance repair;

26. Snow plowing provided that only one (1) snow plow vehicle is stored on or generated from the site;

27. Special tutoring or instruction (not to exceed three (3) pupils at any given time);

28. Stenographic and other clerical services.

(c) A home occupation that is not listed in paragraph (b) of this section but is similar to and no more objectionable than those home occupations listed in that paragraph, shall be permitted as a conditional use subject to the requirements of paragraph (a) of this section and section 14-474 (conditional use) of this article. This provision shall not include veterinarians, kennels, animal raising, funeral homes, retail uses including antique shops, restaurants, dancing studios, towing services, repair and painting of automobiles as home occupations.

(Code 1968, § 602.18.I; Ord. No. 277-77, 11-7-77; Ord. No. 548-85, § 1, 5-6-85; Ord. No. 76-85, § 1, 7-1-85; Ord. No. 66-87, § 2, 11-2-87; Ord. No. 329-90, 5-7-90; Ord. No. 240-09/10, 6-21-10)

Sec. 14-411. - Sec. 14-420. Reserved.

DIVISION 25. SPACE AND BULK REGULATIONS AND EXCEPTIONS

Sec. 14-421. Generally.

The requirements of this article shall be subject to the space and bulk regulations and exceptions of this division.

(Code 1968, § 602.19.A)

Sec. 14-422. Reduction of lot area prohibited.

No lot shall be so reduced that yards, lot width, lot

frontage, lot area, area per dwelling unit, and space for off-street parking and/or off-street loading shall be less than the minimum required under this article.
(Code 1968, § 602.19.A)

Sec. 14-423.Reserved.

---

*__Editor's Note:__ Pursuant to Council Order No. 240-09/10, passed on June 21, 2010, Section 14-423 (Joint occupancy) was repealed in it's entirety.

Sec. 14-424. Required open space.

No part of a yard or other open space required about any building under this article shall be included as a part of a yard or other open space required for another building.
(Code 1968, § 602.19.C)

Sec. 14-425. Projections in required yard areas.

Any yard may be occupied by a one-story entrance porch not enclosed, with or without a roof, if the area of the porch does not exceed fifty (50) square feet nor the projection from the building exceed six (6) feet. A basement bulkhead of similar size, but not more than twenty four (24) inches in height, is also permitted. A cornice eave, sill, canopy, chimney, or other similar architectural feature, but not including a bay window, may project into any required yard a distance of not more than two (2) feet.
(Code 1968, § 602.19.D; Ord. No. 78-03/04, 10-20-03)

Sec. 14-426. Fences.

In residence zones no wall or fence along a street line or within twenty-five (25) feet of a street line shall be more than four (4) feet in height unless said fence is located in the side or rear yard and is reviewed by the public works authority and found not to be a traffic or public safety hazard, subject to the provisions of section 14-434.
(Code 1968, § 602.19.E; Ord. No. 247-97, 4-9-97)

Sec. 14-427. Enclosure of porches.

Any open porch existing with a roof over the same on June 5, 1957, and encroaching upon any yard required by this article may be enclosed if the major portion of the enclosure is of glass.

Sec. 14-428. Corner lots.

In case a dwelling house has its front yard upon the long side of a corner lot, the rear yard may be reduced to a depth not less than the width required for a side yard on the lot, provided the aggregate of the widths of both sides and depths of front and rear yards is not less than the similar aggregate of required dimensions of all yards required if the front yard were faced on the short side of the lot.
(Code 1968, § 602.19.G)

Sec. 14-429. Lot surrounded by streets or alleys.

Where a lot containing ten thousand (10,000) square feet or less is completely surrounded by streets or alleys, the building area may be increased twenty (20) percent.
(Code 1968, § 602.19.H)

Sec. 14-430. Height limits.

(a) ***Roof structure.*** Roof structures for the housing of elevators, stairways, tanks, fans, or other building operating equipment not intended for human occupancy, skylights, steeples, roof signs, flag poles, chimneys, smokestacks, radio or television masts, water tanks, or silos may be erected above the height limitation herein prescribed for buildings. Roof-mounted wind energy systems shall not be considered to be roof sturctures for the purposes of Article X, Alternative Energy.

(b) ***Public art.*** Except in residential zones, public art that has been individually accepted by the city council for inclusion within the public art collection, pursuant to Article XI, Public Art Program of the Land Use Code, (Section 14-852(c)), shall not be subject to the height limitations for buildings within the underlying zone.

(c) ***Temporary wind anemometer towers.*** Temporary wind anemometer towers may be erected above the height limitation for buildings within the underlying zone, subject to receiving Board of Appeals approval and FAA approval, if necessary.

(d) ***Wind energy systems.*** Wind energy systems may be erected above the height limitation for principal buildings

within the underlying zone, pursuant to Article X, Alternative Energy.
(Code 1968, § 602.19.I; Ord. No. 428-83, § 1, 4-25-83; Ord. No. 36-89, § 3, 6-28-89; Ord. No. 96-08/09, 11-17-08; Ord. No. 29-09/10, 8-3-09 emergency passage; Ord. No. 33-11/12, 1-18-12)

Sec. 14-431. Yards.

The height in stories or feet of that part of the principal building adjoining a yard shall be used in determining the required width or depth of that yard, but in no case shall any higher part of the building be closer to the property line than width or depth of yard required for that height. In case an addition is to be made to a building which existed on June 5, 1957, the side yard spaces of which complied with the ordinance in effect on that date, the aggregate side yards may be the same as required on that date, provided the yard on the side where the addition is intended would comply with the minimum width required by the present ordinance. Yards as prescribed for residential uses shall be required for an apartment house or hotel erected above the ground floor of a building where the ground floor is designed exclusively for business purposes.
(Code 1968, § 602.19.J)

Sec. 14-432. Swimming pools.

Outdoor swimming pools accessory to dwellings, apartment houses, hotels or motels shall be permitted on lots, provided the following conditions are met:

(a) No swimming pool shall be sited in the front yard.

(b) No part of any swimming pool shall be located closer than ten (10) feet from the principal structure, nor closer than ten (10) feet from the side or rear lot lines.

(Code 1968, § 602.19.K; Ord. No. 271-77, 5-16-77; Ord. No. 90-88, 7-19-88)

***Editor's note—**Ord. No. 90-88, adopted July 19, 1988, amended § 14-432 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 90-88.

Sec. 14-433. Lots of record and accessory structure setbacks for existing buildings.

Any lot of record as of June 5, 1957, and held under separate

and distinct ownership from adjacent lots and having a street frontage of forty (40) feet, or to which a means of access has been previously approved by the city council as provided elsewhere in this article, may be considered a buildable lot in any residential zone except as provided below for island residential zones, with a minimum lot size of five thousand (5,000) square feet, except that a lot in the R-6 zone may have a minimum lot size of three thousand (3,000) square feet, provided that the applicable yard dimensions can be met.

A lot in the R-1, R-2, R-3, R-4, R-5, R-5A or R-6 zones that was described in a subdivision plat approved by the Planning Board after June 5, 1981, or a lot of record that conformed to the applicable lot size requirement, lot width and street frontage as of June 5, 1984, shall be considered a buildable lot, provided that the applicable yard dimensions can be met.

Where such a lot has a principal structure which existed as of July 19, 1988, an accessory structure or building addition may be located within the following side and rear yards, provided that the normal applicable yard requirements cannot be met provided, however, that less restrictive zoning requirements which meet the requirements contained within 14-139(b) for residential small lot development shall apply:

a. *R-1, R-2:*

Rear yard: Ten (10) feet.

Side yard: Five (5) feet.

b. *R-3, R-4, R-5, R-5A, R-6:*

Rear yard: Five (5) feet.

Side yard: Five (5) feet.

Any detached or accessory structure in the R-4 or R-6 zones, with a ground coverage exceeding two hundred fifty (250) square feet and which was in existence on January 1, 1940, may be converted to dwelling uses without meeting front, side or rear year set backs, provided there is no enlargement of any nonconforming portion of the existing building footprint and provided the conversion will conform to the minimum land area per dwelling unit.

Any lot of record as of July 15, 1985, and held under separate and distinct ownership from adjacent lots and meeting the applicable street frontage requirements of that time may be considered a buildable lot in the IR-1 and IR-2 zones, provided that the applicable yard dimensions can be met and provided further that a lot in the IR-1 zone shall have a minimum area of ten thousand (10,000) square feet and a lot of the IR-2 zone shall have a minimum area of six thousand five hundred (6,500) square feet unless it is served by both public sewer and public water, in which case it shall have a minimum area of five thousand (5,000) square feet.

A lot in the IR-1, IR-2 and I-B zones that was described in a subdivision plat approved by the Planning Board after July 15, 1982, shall be considered a buildable lot, provided that the applicable yard dimensions can be met.

(Code 1968, § 602.19.L; Ord. No. 539-84, 5-7-84; Ord. No. 32-85, § 1, 7-15-85; Ord. No. 91-88, 7-19-88; Ord. No. 310-89, 1-30-89; Ord. No. 166-89, 12-11-89)

***Editor's note—**Ord. No. 91-88, adopted July 19, 1988, amended § 14-433 to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 91-88. Subsequently, § 14-433 was amended by Ord. No. 310-89, adopted Jan. 30, 1989, to read as set out, which ordinance further provided that it be applicable to all pending proceedings and be enacted as an emergency.

Sec. 14-434. Corner clearance.

No obstruction higher than three and one-half (3 1/2) feet above the lowest elevation at the curbline shall be permitted on a corner lot within the area of a triangle formed by a line intersecting the street lines of the intersecting streets at points twenty-five (25) feet from the corner, unless said obstruction is located in the side or rear yard and is reviewed by the public works authority and found not to be a traffic or public safety hazard. For the purpose of this section, the word "obstruction" shall mean any shrub, wall, fence, temporary building, sign, a pile of material, but shall not include permanent buildings or structures where permitted elsewhere in this article.

(Code 1968, § 602.19.M; Ord. No. 247-97, 4-9-97; Ord. No. 56-08/09)

Sec. 14-435. Unsewered residential district.

Where a lot in a residence zone is not served by public sewers and septic tank disposal systems are required, the minimum lot area

required shall be determined from the following table, except that on the islands in Casco Bay, such variation as shall be approved by the health officer may be permitted in the minimum required lot areas:

Standard Percolation Test Rate of Percolation (minutes)	*Lot Area Required (square feet)*
2	7,800
3	8,400
4	8,800
5	9,100
10	10,500
15....	11,800
30	13,800
45	15,500

(Code 1968, § 602.19.N)

Sec. 14-436. Building extensions.

Existing non-residential and residential principal structures which are nonconforming as to any area and/or yard requirements may be enlarged within the existing footprint subject to the following provisions:

(a) *For principal structures lawfully nonconforming as to land area per dwelling unit as of July 19, 1988*: The floor area of the expansion shall be limited to no more than fifty (50) percent of the first floor footprint.

The additional floor area shall be created in the uppermost floor by the use of dormers, turrets or similar structures needed to provide the minimum height required for habitable space while preserving the existing roof configuration to the maximum extent possible.

(b) *For residential principal structures conforming as to land area per dwelling unit as of July 19, 1988, but lawfully nonconforming as to any yard setback or nonresidential principal structures that are lawfully nonconforming as to any yard setback*: The floor area of the expansion shall be limited to no more than eighty (80) percent of the first floor footprint. The additional floor area shall be created by raising the existing roof configuration the minimum amount required to create an additional story of habitable space, or by the use of dormers, turrets or similar structures.

Building expansions under this section may occur only once during the lifetime of an existing structure.
(Ord. No. 61-97, 8-18-97; Ord. No. 284-99, §3, 5-17-99, enacted as an emergency to take effect immediately pursuant to Article II, Sec. 8 of the Portland City Charter)

***Editor's note—**Ord. No. 61-97, adopted Aug. 18, 1997, repealed former § 14-436 and enacted similar new provisions as herein set out. Formerly, such section derived from § 602.19.O of the 1968 Code as amended by Ord. No. 92-88, adopted July 19, 1988.

Sec. 14-437. Setback reductions.

(a) *Authority.* The zoning administrator may grant setback reductions to the extent provided by this section.

(b) *Procedure.* Application for a setback reduction shall be submitted to the building inspections division. A payment of a nonrefundable application fee, as established from time to time by order of the city council to cover administrative costs, shall accompany each application. The application shall be in such form as prescribed by the zoning administrator and shall contain at least the following information and documentation:

1. The name and address of the applicant and his or her interest in the subject property;

2. The name and address of the owner, if different from the applicant;

3. The address or location and the city assessor's chart, block and lot number of the subject property;

4. The present use and zoning classification of the subject property;

5. Plot plan showing sufficient information to indicate the location of all structures existing and proposed in relation to the lot lines. Such a plan must be prepared by a state registered land surveyor. If, in the opinion of the surveyor, sufficient monumentation is not available, then a standard boundary survey will be necessary to meet the requirements of this section.

(c) *Purpose.* The purpose of setback reductions is to validate the sites of mislocated single-family, owner-occupied residential structures and those structures accessory thereto, which are not otherwise legally sited and which were in existence on November 15, 1993.

(d) Conditions for setback reductions. Setback reductions which may be granted by the zoning administrator are subject to the following conditions:

1. The sole use of the property is (and, if the application should be granted, will remain) as a single-family detached dwelling.

2. The property is located in R-1, R-2, R-3, R-4, R-5, R-6, IR-1, IR-2, IR-3 or RP zones.

3. The reduction sought cannot be reduced by more than the following:

IR-1, IR-2, IR-3, R-3, RP, R-1, R-2, R-4 and R-5 zones:

Front yard: Ten (10) feet

Rear yard: Ten (10) feet

Side yard: Five (5) feet

R-6 zone:

Front yard: Five (5) feet

Rear yard: Ten (10) feet

Side yard: Five (5) feet

4. No relief may be granted under this section in cases where the building authority determines that the setback violation was the result of a willful act by either the applicant or a prior owner.

5. This section shall only apply to the inadvertent misplacement of a structure.

6. Recording of setback reduction: The zoning administrator shall provide a signed instrument in recordable form, indicating any setback reduction granted under the terms of this section. The applicant for such reduction shall be responsible for recording this instrument in the Cumberland County Registry of Deeds.

(Ord. No. 138-93, 11-15-93)

Sec. 14-438. Setback reductions for porches and other similar uses.

(a) Porches, decks and sheds which are accessory to single-family dwellings built five (5) years prior to the date of application will be eligible for setback reductions as provided in this section. Such structures are not subject to the limitations in section 14-437, must be set back two (2) feet from the rear and side property lines, and must comply with the front yard setback required for the applicable zone. A reduced setback may be permitted only when the applicant can show that there will be no development within the setback required by the zoning ordinance on adjacent property which abuts the area for which a reduced setback is sought. The applicant will demonstrate compliance with the above requirement by providing an affidavit from the abutting property owner stating that the area in question will never be developed. Reduced setbacks will not be permitted when the area proposed for such setbacks abuts either city or state owned property. No setback reduction may be granted which would permit any structure on the lot which is the subject of the application to be within fifteen

(15) feet of any existing residential structure on an adjacent lot.

(b) Recording of setback reduction. The zoning administrator shall provide a signed instrument in recordable form, indicating any setback reduction granted under the terms of this section. The applicant for such reduction shall be responsible for recording this instrument in the Cumberland County Registry of Deeds. The abutter's affidavit will also be recorded.
(Ord. No. 139-93, 11-15-93)

Sec. 14-439. Setback reductions in the industrial zones.

Where a setback is required in an industrial zone the Planning Board may grant a reduction of such setback upon the submission of a site plan meeting the requirements of article V of this chapter and as set forth below if at least one (1) of the following conditions exists:

(a) The property is encumbered by an easement or right-of-way that substantially impedes or prohibits development;

(b) The yard for which the setback reduction is sought abuts an easement or right-of-way area that prohibits buildings within the area of such easement or right-of-way; or

(c) The yard for which the setback reduction is sought abuts an area whose natural features, such as slopes or drainage areas, prohibit development in such area.

The Planning Board may reduce the required setback to the extent necessary for development, but in no event shall any side or rear setback be reduced to less than ten (10) feet or any front setback be reduced to less than five (5) feet. The Planning Board may require increased buffering to mitigate the impacts of a setback reduction under this section. This section shall not apply to reductions of setbacks required by division 26 of this chapter.

The planning authority shall be responsible for providing to the applicant for setback reduction an instrument signed by the chair or vice-chair of the Planning Board, indicating any setback reduction granted under the terms of this section. The applicant for such setback reduction shall be responsible for recording this instrument in the Cumberland County Registry of Deeds within sixty (60) days of the Planning Board's grant of the reduction. Failure to record such instrument within the required time period shall

render the reduction null and void.
(Ord. No. 227-97, 3-17-97)

Sec. 14-440. Exterior egress.

Notwithstanding any other provision of this Code, the building authority may permit the installation of an exterior egress stair or an upgrade of an existing exterior fire escape for a conforming or lawfully nonconforming dwelling unit existing as of January 5, 1998, if such egress is required to meet current fire or other life safety codes, provided that the owner demonstrates to the building authority that:

(a) There is no practical and economically reasonable way to provide such egress within the interior of the building, as demonstrated by the submission of detailed floor plans showing the projected cost of and the impact on the existing dwelling from an interior stair;

(b) The stairway and associated landings and other building fixtures are designed and will be constructed to have a minimal visual impact upon the building, especially as viewed from any public way or public open space, as demonstrated by photographs of the front and any other affected facades of the building and plans or drawings of the proposed egress stairs;

(c) Reductions to setbacks granted under this section shall be the least amount required to meet life safety code requirements; and

(d) Exterior stairways on buildings subject to regulation under article IX of this chapter shall require review and approval under the provisions of that article.

(Ord. No. 181-98, 1-5-98)

Sec. 14-441. - Sec. 445. Reserved.

DIVISION 26. SHORELAND REGULATIONS

Sec. 14-446. Purposes.

The purposes of this division are to further the maintenance of safe and healthful conditions; prevent and control water pollution; protect fish spawning grounds, aquatic life, bird and

other wildlife habitat; protect buildings and lands from flooding and accelerated erosion; protect archaeological and historic resources; protect commercial fishing and maritime industries; protect freshwater and coastal wetlands; control building sites, placement of structures and land uses; conserve shore cover, visual as well as actual points of access to inland and coastal waters and natural beauty, as appropriate in an urbanized environment; and to anticipate and respond to the impact of development in shoreland areas.
(Code 1968, § 602.19A.A; Ord. No. 499-74, § 10, 8-19-74; Ord. No. 15-92, § 27, 6-15-92)

Sec. 14-447. Applicability.

This division applies to all land areas, uses, structures and land use activities within two hundred fifty (250) feet, horizontal distance, of the normal high water line of any river; within two hundred fifty (250) feet, horizontal distance, of the upland edge of a coastal wetland, including all areas affected by tidal actions within two hundred fifty (250) feet, horizontal distances, of the upland edge of a freshwater wetland; and within seventy-five (75) feet, horizontal distance, of the normal high water line of a stream. This division also applies to any structure built on, over or abutting a dock, wharf or pier, or other structure extending beyond the normal high water line of a water body or within a wetland.
(Code 1968, § 602.19A.B; Ord. No. 499-74, § 10, 8-19-74; Ord. No. 15-92, § 28, 6-15-92; Ord. No. 296-08/09, 6-15-09)

Sec. 14-448. Zoning districts and shoreland regulations.

The regulations and controls of this division apply to all land areas, uses, structures and land use activities cited in section 14-447, in all zones of the city.
(Code 1968, § 602.19A.C; Ord. No. 499-74, § 10, 8-19-74)

Sec. 14-449. Land use standards.

All land uses and land use activities subject to this division shall conform to the following standards and regulations, as applicable:

(a) *Principal and accessory structures:*

1. All principal and accessory structures shall be set back at least seventy-five (75) feet horizontal

distance, from the normal high water line of water bodies, the upland edge of a wetland or associated tributary streams within a shoreland zone, except that in the following zones the setback shall be as indicated below:

a. B-3, B-5, B-5b, I-L (south and east of I-295), and I-M (south and east of I-295): Twenty-five (25) feet.

b. W-C, W-PD, W-SU, I-B, EWP: No setback required. Pier edge setbacks apply in EWP (Sec. 14-303(c)(4), W-C (Sec. 14-310(d)(4), W-PD (Sec. 320.2(c)), and W-SU (Sec. 320.9(c)).

For the principle structures, setback measurements shall be taken from the top of a costal bluff that has been identified on Coastal Bluff maps as being "highly unstable" or "unstable" by the Maine Geological Survey pursuant "Classification of Coastal Bluffs", and published in the most recent Coastal Bluff Map as further referenced on the Zoning Map.

Notwithstanding this requirement, when a lot is a lot of record as defined in section 14-433 or cannot otherwise meet the setback requirement of this section due to physical limitations of the site, the Planning Board may approve a reduction of the setback requirement for a principal structure to the least amount necessary to achieve a building dimension of twenty-eight (28) feet, provided that the setback is not reduced to less than forty (40) feet. Structures in existence on June 15, 1992, may be expanded once during the lifetime of the structure up to twenty-five (25) feet toward a freshwater wetland, stream or tributary stream, provided that the setback is not reduced to less than forty (40) feet and the floor area or volume is not increased by more than thirty (30) percent. In no event shall the setback from a coastal wetland be reduced to less than seventy-five (75) feet, except in the B-3, B-5, B-5b, EWP, W-C, W-PD, W-SU,I-B, I-L and I-M zones, where setbacks shall be as set forth above in this subsection.

In all cases, accessory detached structures of less than one hundred (100) square feet of floor area shall be permitted with no setback, provided that such structures shall be used only for the storage of fish, bait, and related equipment. No setback shall be required for piers, docks, retaining walls, or any other structures which require direct access to the water as an operational necessity.

2. Development activities within the shoreland zone are reviewed by the Zoning Administrator for compliance with required setbacks of this Division. Submission of plans for such development activity shall be prepared by competent professionals, based upon a boundary survey.

3. The lowest floor elevation or openings of all buildings and structures including basements shall be elevated at least one (1) foot above the elevation of the one hundred (100) year flood, the flood of record, or in the absence of these, the flood as defined by soil types identified as recent flood plain soils.

4. Notwithstanding the requirements of this section, stairways or similar structures may be allowed with a permit from the building authority to provide shoreline access in areas of steep slopes or unstable soils, provided that:

   a. The structure is limited to a maximum of four (4) feet in width;

   b. The structure does not extend below or over the normal high water line of a water body or upland edge of a wetland, unless permitted by the department of environmental protection pursuant to 38 M.R.S.A. Section 480-C; and

   c. The applicant demonstrates that no reasonable access alternative exists on the property.

(b) ***Piers, docks, wharves, bridges and other structures and uses extending over or below the normal high water line***

of a water body or within a wetland:

1. Access from shore shall be developed on soils appropriate for such use and constructed so as to control erosion;

2. The location shall not interfere with existing developed or natural beach areas;

3. The facility shall be located so as to minimize adverse effects on fisheries;

4. The facility shall be no larger in dimension than necessary to carry on the activity and shall be consistent with surrounding character and uses;

5. New permanent structures, and expansions thereof, projecting into or over water bodies shall require a permit from the Department of Environmental Protection pursuant to the national Resources Protection Act, 38 M.R.S.A. § 480-C. Permits may also be required from the Army Corps of Engineers if located in navigable waters.

6. Except in the W-C, EWP, W-PD, W-SU, and I-B zones, no new structure shall be built on, over or abutting a pier, wharf, dock or other structure extending beyond the normal high water line of a water body or within a wetland unless the structure requires direct access to the water as an operational necessity;

7. No existing structures built on, over or abutting a pier, dock, wharf or other structure extending beyond the normal high water line of a water body or within a wetland shall be converted to residential dwelling units in any zone.

(c) *Clearing or removal of vegetation:*

1. In all shoreland areas in resource protection zones, the cutting or removal of vegetation shall be limited to that which is necessary for uses expressly authorized in that zone.

2. The clearing or removal of vegetation standards of this section shall not apply to the following zones: EWP, WCZ, WPD, WSU, B-3, B-5, B-5b, B-6, B-7, I-L (south and east of I-295) and I-M zones (south and east of I-295).

3. Other than cutting or removal of vegetation as provided for in this section, timber harvesting shall not be permitted. For purposes of this section, timber harvesting is defined as the cutting and removal of timber for the primary purpose of selling or processing forest products. The cutting or removal of trees in the shoreland zone on a lot that has less than (2) acres within the shoreland zone shall not be considered timber harvesting. Cutting or removal of such trees shall be regulated pursuant to this section.

4. For purposes of this section, vegetation is defined as all live trees, shrubs and other plants including without limitation, trees both over and under 4 inches in diameter, measured at 4 ½ feet above ground level.

   a. In all areas other than resource protection zones, a buffer strip of vegetation shall be preserved, except where clearance is required for development of permitted uses, within a strip of land extending seventy-five (75) feet, horizontal distance, from the normal high-water or upland edge of a coastal wetland, river, stream or tributary stream within a shoreland zone, in accordance with the following:

      i. There shall be no cleared opening greater than two hundred fifty (250) square feet in the forest canopy or other existing vegetation if a forested canopy is not presented as measured from the outer limits of the tree or shrub crown. Notwithstanding this limitation, a footpath not to exceed six (6) feet in width as measured between tree trunks and/or shrub stems is allowed provided

that a cleared line of sight to the water through the buffer strip is not created.

ii. Selective cutting of trees within the buffer strip is allowed provided that a well-distributed stand of trees and other vegetation is maintained. For the purposes of this section, a "well-distributed stand of trees" adjacent to a water body, tributary stream or wetland shall be defined as maintaining a minimum rating score of sixteen (16) or more in any twenty-five-foot by fifty-foot rectangle area as determined by the following rating system:

Diameter of tree at four and one-half (4 ½) feet above ground level

(Inches)	*Points*
2 ≤ 4	1
4 ≤ 8	2
8 — 12	4
12 in. or greater	8

The following shall govern in applying this point system:

a. The 25-foot by 50-foot rectangular plots must be established where the landowner or lessee proposes clearing within the required buffer;

b. Each successive plot must be adjacent to, but not overlap a previous plot;

c. Any plot not containing the required points must have no vegetation removed except as otherwise allowed

by this ordinance;

d. Any plot containing the required points may have vegetation removed down to the minimum points required or as otherwise allowed by this ordinance;

e. Where conditions permit, no more than 50% of the points on any 25-foot by 50-foot rectangular area may consist of trees greater than 12 inches in diameter.

For the purposes of this section, "other natural vegetation" is defined as retaining existing vegetation under three (3) feet in height and other ground cover and retaining at least five (5) saplings less than two (2) inches in diameter at four and one-half (4 ½) feet above ground level for each 25-foot by 50-foot rectangular area. If five samplings do not exist, no woody stems less than two (2) inches in diameter can be removed until 5 samplings have been recruited into the plot.

Notwithstanding the above provisions, no more than forty (40%) percent of the total volume of trees four (4) inches or more in diameter, measured at four and one-half (4 ½) feet above ground level may be removed in any ten-year period.

iii. In order to protect water quality and wildlife habitat, existing vegetation under three (3) feet in height and other groundcover, including leaf litter and the forest duff layer, shall not be cut, covered, or removed, except to provide a footpath or other permitted uses as described in this section.

iv. Pruning of tree branches on the bottom one-third of the tree is allowed.

v. In order to maintain a buffer strip of vegetation when the removal of storm-damaged, diseased, unsafe or dead trees results in the creation of cleared openings, these openings shall be replanted with native tree species unless existing new tree growth is present.

The provisions contained in subsection b. of this section shall not apply to those portions of public recreational facilities adjacent to public swimming areas. Cleared areas in these locations shall be limited to the minimum amount necessary.

2. Selective cutting of not more than forty (40%) percent of the volume of trees four (4) inches or more in diameter, measured four and one-half (4 1/2) feet above ground level, shall be allowed within any ten-year period at distances greater than seventy-five (75) feet, horizontal distance, from the normal high water line of any other water body, tributary stream, or the upland edge of a wetland, except to allow for the development of permitted uses. Tree removal in conjunction with the development of permitted uses shall be included in the forty (40) percent calculation. For the purposes of these standards, volume may be considered to be equivalent to basal area. In no event shall cleared openings for any purpose, including but not limited to, principal and accessory structures, driveways, lawns and sewage disposal areas, exceed in the aggregate twenty-five (25%) percent of the lot area within the shoreland zone, including land previously cleared.

3. Legally existing nonconforming cleared openings may be maintained but shall not be enlarged, except as allowed by this division.

4. Fields and other cleared openings which have reverted to primarily shrubs, trees, or other woody vegetation shall be regulated under the provisions of this section.

(d) *Erosion and sedimentation control:*

1. All activities which involve filling, grading, excavation or other similar activities which result in unstabilized soil conditions and which require a permit shall require a written soil erosion and sedimentation control plan in accordance with Maine Erosion and Sediment Control Handbook for Construction: Best Management Practices, published by the Cumberland County Soil and Water Conservation District and the Maine Department of Environmental Protection and the City of Portland Technical Manual. The plan shall be submitted to the permitting authority for approval and shall include, where applicable, provisions for:

   a. Mulching and revegetation of disturbed soil.

   b. Temporary runoff control features such as hay bales, silt fencing or diversion ditches.

   c. Permanent stabilization structures such as retaining walls or riprap.

2. In order to create the least potential for erosion, development shall be designed to fit with the topography and soils of the site. Areas of steep slopes where high cuts and fills may be required shall be avoided wherever possible, and natural contours shall be followed as closely as possible.

3. Erosion and sedimentation control measures shall apply to all aspects of the proposed project involving land disturbance, and shall be in operation during all stages of the activity. The amount of exposed ground area at every phase of construction shall be minimized to reduce the potential for erosion.

4. Any exposed ground area shall be temporarily or permanently stabilized within one (1) week from the time it was last actively worked, by use of riprap, sod, seed, and mulch, or other effective measures. In all cases, permanent stabilization shall occur within nine (9) months of initial exposure. The following standards shall also be met:

a. Where mulch is used, it shall be applied at a rate of at least one (1) bale per five hundred (500) square feet and shall be maintained until a catch of vegetation is established.

b. Anchoring the mulch with netting, peg and twine or other suitable method may be required to maintain the mulch cover.

c. Additional measures shall be taken where necessary in order to avoid siltation into the water. Such measures may include the use of staked hay bales and/or silt fences.

5. Natural and man-made drainage ways and drainage outlets shall be protected from erosion from water flowing through them. Drainage ways shall be designed and constructed in accordance with the City of Portland Technical Manual.

(e) ***Soils:*** All land uses shall be located on soils in or upon which the proposed uses or structures can be established or maintained without causing adverse environmental impacts, including severe erosion, mass soil movement, improper drainage, and water pollution, either during or after construction. Proposed uses requiring subsurface wastewater disposal and commercial or industrial development or other similar intensive land uses shall require a soils report based on an on-site investigation and prepared by state-certified professionals. Certified persons may include Maine Certified Soil Scientists, Maine Registered Professional Engineers, Maine State Certified Geologists and other persons who have training and experience in the recognition and evaluation of soil properties. The report shall be based upon the analysis of the characteristics of the soil and surrounding land and water areas, maximum ground water elevation, presence of ledge, drainage conditions, and other pertinent data which the evaluator deems appropriate. The soils report shall include recommendations for a proposed use to counteract soil limitations where they exist.

(f) ***Water quality:*** No activity shall deposit on or into the ground or discharge to the waters of the state any

pollutant that by itself or in combination with other activities or substances will impair designated uses or the water classification of the water body, tributary stream or wetland.

(g) ***Archaeological sites:*** Any proposed land use activity involving structural development or soil disturbance on or adjacent to sites listed on, or eligible to be listed on, the National Register of Historic Places, as determined by the department of planning and urban development, shall be submitted by the applicant to the Maine Historic Preservation Commission for review and comment at least twenty (20) days prior to action being taken by the building authority. The building authority shall consider comments received from the commission prior to rendering a decision on the application. Such sites shall also comply with all applicable provisions of article IX of this chapter.

(h) ***Installation of public utility service:*** No public utility of any kind shall install services to any new structure located in the shoreland zone unless written authorization attesting to the validity and currency of all local permits required under this Code has been issued by the appropriate municipal authorities. Following installation of service, the public utility shall forward the written authorization to the appropriate municipal authorities, indicating that installation has been completed.

(i) ***Essential services:***

1. Where feasible, the installation of essential services shall be limited to existing public ways and existing service corridors.

2. The installation of essential services, other than road-side distribution lines and within existing service corridors, is not allowed in a Resource Protection or Stream Protection District, except where the applicant demonstrates that no reasonable alternative exists.

3. Damaged or destroyed public utility transmission and distribution lines, towers and related

equipment may be replaced or reconstructed without a permit.

(j) *Roads and driveways:*

1. Roads and driveways shall be setback a minimum of seventy-five (75) feet from the normal high-water or upland edge of a coastal wetland, freshwater wetland, river or tributary stream within a shoreland zone, except:

   a. In the EWP, WC, WPD, WSU, B-3, B-5, B-5b, I-L (south and east of I-295) and I-M (south and east of I-295) roads and driveways shall be setback as established for structures in those zones; as specified in Sec. 14-449(a)1.

   b. Where the planning board determines that no other reasonable alternative exists. If no other reasonable alternative exists, the planning board may reduce the road and/or driveway setback requirement to no less than fifty (50) feet, horizontal distance, upon clear showing by the applicant that appropriate techniques will be used to prevent sedimentation of the water body, tributary stream or wetland. Such techniques may include, but are not limited to, the installation of settling basins, and/or effective use of additional ditch relief culverts and turnouts place so as to avoid sedimentation of the water body, tributary stream or wetland.

2. Existing public roads may be expanded within the legal road right of way regardless of their setback from a waterbody, tributary stream or wetland.

3. New roads and driveways are prohibited in a Resource Protection Zone except that the planning board may grant a permit to construct a road or driveway to provide access to permitted uses within the district. A road or driveway may also be approved by the planning board in a Resource Protection Zone, upon a finding that no reasonable

alternative route or location is available outside the district. When a roadway or driveway is permitted in a Resource Protection District the road and/or driveway shall be setback as far as practicable from the normal high-water line of a water body, tributary stream, or upland edge of wetland.

4. Road and driveways banks shall be no steeper than slope of two (2) horizontal to one (1) vertical, and shall be graded and stabilized in accordance with the provisions for erosion and sedimentation control contained in sec. 14-449(d).

5. Road and driveway grades shall be no grater than ten (10%) percent except segments of less than two hundred (200) feet.

6. In order to prevent road and driveway surface drainage from directly entering water bodies, tributary streams or wetlands, roads and driveways shall be designed, constructed, and maintained to empty onto an unscarified buffer strip at least (50) feet plus two times the average slope, in width between the outflow point of the ditch or culver and the normal high-water line of a water body, tributary stream or upland edge of a wetland. Surface drainage which is directed to an unscarified buffer strip shall be diffused or spread out to promote infiltration of the runoff and to minimize channelized flow of the drainage through the buffer strip.

7. Ditch relief (cross drainage) culverts, drainage dips and water turnout shall be installed in a manner effective in directing drainage onto unscarified buffer strips before the flow gains sufficient volume or head to erode the road, driveway, or ditch. To accomplish this, the following shall apply:

   a. Ditch relief culverts, drainage dips and associated water turnouts shall be spaced along the road, or driveway at intervals no greater than indicated in the following

table:

Grade (percent)	Spacing (feet)
0-2	250
3-5	200-135
6-10	100-80
11-15	80-60
16-20	60-45
21+	40

b. Drainage dips may be used in place of ditch relief culverts only where the grade is ten (10%) percent or less.

c. On sections having slopes greater than ten (10%) percent, ditch relief culverts shall be placed at approximately a thirty (30) degree angle downslope from a line perpendicular to the centerline of the road or driveway.

d. Ditch relief culverts shall be sufficiently sized and properly installed in order to allow for effective functioning, and their inlet and outlet ends shall be stabilized with appropriate materials.

8. Ditches, culverts, bridges, dips, water turnouts and other storm water runoff control installations associated with roads and driveways shall be maintained on a regular basis to assure effective functioning.

(k) ***Parking areas:*** Parking areas shall be set back a minimum of seventy-five (75) feet from the normal high-water or upland edge of a coastal wetland, freshwater wetland, river or tributary stream within a shoreland zone except:

1. In the EWP, WC, WPD WSU, B-3, B-5, B-5b, I-L and I-M zones, parking setbacks shall be as established for structures in those zones; as specified in Sec. 14-449(a)1.

2. Parking setbacks in the S-P (stream protection)

zones are as established in Division 26.7.

3. Where the Planning Board finds that no other reasonable alternative exists further from the shoreline or tributary stream, the board may reduce the parking setback requirement to no less than fifty (50) feet in the R-OS, and I-B zones to the least amount necessary for construction, provided that the applicant proves by a preponderance of the evidence that appropriate techniques will be used to prevent sedimentation of the water body.

(l) *Septic waste disposal:*

All subsurface sewage disposal system shall be installed in conformance with the State of Maine Subsurface Wastewater Disposal Rules and the following:

a. Clearing or removal of woody vegetation necessary to site a new system and any associated fill extensions, shall not extend closer than seventy-five (75) feet, horizontal distance, from the normal high-water line of a water body or the upland edge of a wetland;

b. A holding tank is not allowed for a first-time residential use in the shoreland zone.

(m) *Stormwater runoff:*

1. All new construction and development shall be designed to be in compliance with the City of Portland Technical Manual to minimize stormwater runoff from the site in excess of the natural predevelopment conditions. Where possible, existing natural runoff control features, such as berms, swales, terraces and wooded areas shall be retained in order to reduce runoff and encourage infiltration of stormwater.

2. Stormwater runoff control systems shall be maintained as necessary to ensure proper functioning.

(n) *Agriculture:*

1. All spreading or disposal of manure shall be accomplished in conformance with the ***Manure Utilization Guidelines*** published by the Maine Department of Agriculture on November 1, 2001, and the Nutrient Management Law (7 M.R.S.A. §§ 4201-4209).

2. Manure shall not be stored or stockpiled within seventy-five (75) feet, horizontal distance, of water bodies, tributary streams, or wetlands. All manure storage areas within the shoreland zone must be constructed or modified such that the facility produces no discharge of effluent or contaminated stormwater.

3. Agricultural activities involving tillage of soil greater than forty thousand (40,000) square feet in surface area within the shoreland zone shall require a conservation plan to be filed with the building authority.

4. There shall be no new tilling of soil within seventy-five (75) feet, horizontal distance, from water bodies and coastal wetlands or within twenty-five (25) feet, horizontal distance, of tributary streams and freshwater wetlands when such new tilling, by itself or combined with all other contiguous tillage, shall exceed forty thousand (40,000) square feet in surface area. Operations in existence on the effective date of this section and not in conformance with these provisions may be maintained but shall not be expanded. When the new tilling, by itself or combined with all other contiguous tillage, shall total forty thousand (40,000) square feet or less, the tillage shall be set back a minimum of twenty-five (25) feet from all water bodies, tributary streams or wetlands.

5. Newly established livestock grazing areas shall not be permitted within seventy-five (75) feet, horizontal distance, of water bodies and coastal wetlands or within twenty-five (25) feet, horizontal distance, of tributary streams and wetlands. Livestock grazing associated with ongoing

farm activities and which are not in conformance with the above setback provisions may continue, provided such grazing is conducted in accordance with a soil and water conservation plan filed with the building authority.

(o) ***General site plan features:*** The Planning Board or planning authority shall approve a site plan located within a shoreland zone if it finds that the following standards, in addition to the standards set forth in section 14-526, are met:

1. The proposal will maintain safe and healthful conditions;

2. The proposal will not result in water pollution, erosion, or sedimentation to surface waters;

3. The proposal will adequately provide for the disposal of all wastewater;

4. The proposal will not have an adverse impact on spawning grounds, fish, aquatic life, bird or other wildlife habitat;

5. The proposal will conserve shore cover and visual, as well as actual, points of access to inland and coastal waters;

6. The proposal will protect archaeological and historic resources;

7. The proposal will not adversely affect existing commercial fishing or maritime activities;

8. The proposal will avoid problems associated with flood plain development and use; and

9. The proposal is in conformance with the standards set forth in this section.

(Code 1968, § 602.19A.D; Ord. No. 499-74, § 10, 8-19-74; Ord. No. 38-85, § 1, 7-15-85; Ord. No. 15-92, § 29, 6-15-92; Ord. No. 164-97, § 12, 1-6-97; Ord. No. 296-08/09, 6-15-09; Ord. No. 278-09/10, 7-19-10; Ord. No. 27-11/12, 8-15-11)

Sec. 14-450. Reserved.

DIVISION 26.5. FLOOD PLAIN MANAGEMENT REGULATIONS*

***Editor's note**—Ord. No. 660-86, adopted July 7, 1986, amended Ch. 14, Art. III, by the addition of Div. 26A, §§ 14-450.1—14-450.8, which provisions have been included herein as Div. 26.5 at the discretion of the editor in order to conform with the existing numbering of divisions contained in this article.

Sec. 14-450.1. Establishment.

The City of Portland, Maine, elects to comply with the 42 USC Section 4001 et seq. requirements of the National Flood Insurance Act of 1968, as amended from time to time. The National Flood Insurance Program, established in the aforesaid act, provides that areas of the city having a special flood hazard be identified by the Federal Emergency Management Agency and that flood plain management measures be applied in such flood hazard areas. This division establishes a flood hazard development permit system and review procedure for development activities in the designated flood hazard areas of the city.

(Ord. No. 660-86, 7-7-86; Ord. No. 579-87, 6-15-87; Ord. No. 156-98, 11-16-98)

Sec. 14-450.2. Purposes.

The purposes of this division are to reduce future flood risks and losses, protect against financial and human loss resulting from flood disasters, and to control the placement of structures, construction materials, and methods used to minimize potential property damage due to flooding.

(Ord. No. 660-86, 7-7-86; Ord. No. 579-87, 6-15-87; Ord. No. 156-98, 11-16-98)

Sec. 14-450.3. Applicability.

This division applies to all land areas, uses, structures, and land use activities lying in the special flood hazard areas as identified by the Federal Emergency Management Agency in a report entitled "Flood Insurance Study — City of Portland, Maine, County of Cumberland," with accompanying "flood insurance rate map" and "flood boundary and floodway map," dated July 17, 1986. This Flood Insurance Study with accompanying maps, and any subsequent amendments thereto, is hereby adopted by reference and declared to be a part of this Code.

(Ord. No. 660-86, 7-7-86; Ord. No. 579-87, 6-15-87; Ord. No. 135-97, 11-3-97; Ord. No. 156-98, 11-16-98)

Sec. 14-450.4. Zoning districts and flood plain management regulations.

The regulations and controls of this division apply to all land areas, uses, structures, and land use activities cited in section 14-450.3, in all zones of the city.
(Ord. No. 660-86, 7-7-86; Ord. No. 579-87, 6-15-87; Ord. No. 156-98, 11-16-98)

Sec. 14-450.5. Definitions.

For the purpose of this division, the following terms and words shall have the meanings given herein:

Area of special flood hazard: The land in the flood plain having a one (1) percent or greater chance of flooding in any given year as specifically identified in the Flood Insurance Study cited in section 14-450.3.

Base flood: The flood having a one (1) percent chance of being hereof or exceeded in any given year (i.e., a one-hundred-year storm).

Building authority: The division of inspection services within the department of planning and urban development.

Coastal high hazard area: The area subject to high velocity waters, including but not limited to, hurricane wave wash or tsunamis. The area is designated on the flood insurance rate map as zone V1-30.

Development: Any man-made change to improved or unimproved real estate, including but not limited to, the construction of, alteration or addition to, any buildings or other structures, mining, dredging, filling, grading, paving, excavation, drilling operations, or storage of equipment or materials.

Floodproofing: Any combination of structural or nonstructural additions, changes or adjustments to structures which reduce or eliminate flood damage to real estate or improved real estate, to water and sanitary facilities, structures and their contents.

Floodway: The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface

elevation more than one (1) foot as designated on the flood boundary and floodway map. When not designated on the flood boundary and floodway map, it is considered to be the channel of a river or other watercourse and the adjacent land areas to a distance of one-half (1/2) the width of the flood plain, as measured from the normal high water mark to the upland limit of the flood plain.

Flood boundary and floodway map: The official map issued by the Federal Emergency Management Agency (FEMA) on which the boundaries of the flood have been designated. (This may alternatively be referred to as a flood hazard boundary map.)

Flood insurance rate map: The official map (FIRM) on which the Federal Emergency Management Agency (FEMA) has delineated both the areas of special flood hazard and the risk premium zones applicable to the city.

Lowest floor: The lowest floor of the lowest enclosed area (including basement). An unfinished or flood-resistant enclosure, usable solely for parking of vehicles, building access or storage, in an area other than a basement area, is not considered a building's lowest floor, provided that such enclosure is not built so as to render the structure in violation of the applicable nonelevation design requirements of this division.

Manufactured home or housing: As defined in section 14-47 (definitions) of this Code.

Mean high tide: The mean height of tidal high waters at a particular point or station over a period of time to such length that increasing its length does not appreciably change this mean. For tidal waters, the cycle of change covers a period of nineteen (19) years, and mean high tide is defined as the average of the high waters over a nineteen-year period.

Mean sea level: For purposes of the National Flood Insurance Program, the National Geodetic Vertical Datum (NGVD) of 1929 or other datum, to which base flood elevations shown on the city's FIRM are referenced.

Structure: A walled and roofed building, including a gas or liquid storage tank, that is principally above ground, or manufactured housing. "Principally above ground," as used above, means either that at least two-thirds (2/3) of its floor-to-ceiling height is above the average adjoining ground level, or at least

fifty-one (51) percent of the actual cash value of the structure, less land value, is above ground.

Substantial improvement: Any repair, reconstruction, addition to or other improvement of a structure, the cost of which equals or exceeds fifty (50) percent of the market value of the structure either before the improvement or repair is started or, if the structure has been damaged and is being restored, before the damage occurred. For purposes of this definition "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. The term does not, however, include any project for improvement of a structure to comply with existing state or local health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions or for any alteration of a structure listed on the National Register of Historic Places or a state inventory of historic places.

(Ord. No. 660-86, 7-7-86; Ord. No. 579-87, 6-15-87; Ord. No. 156-98, 11-16-98)

Sec. 14-450.6. Application for permit—Filing.

(a) *Permit required.* Before any development begins within any areas of special flood hazard, a flood hazard area development permit shall be obtained from the building authority. This permit shall be required prior to issuance of a building permit, if one is required, and shall be in addition to any other permits, and site plan and subdivision review, which may be required pursuant to the Codes and ordinances of the city.

(b) *Submission.* The application for a flood hazard area development permit shall be submitted in writing to the building authority and shall include the following:

1. A final site plan, where applicable, showing information as required in section 14-527 (final site plan) for either a level I, II or III site plan as defined in section 14-523 (required approvals and applicability);

2. A final subdivision plat, where applicable, providing information as required in section 14-496 (plat requirements);

3. For any development which does not meet the minimum threshold as a development requiring site plan review as

authorized by section 14-523 (required approvals and applicability), the following information shall be provided:

a. The name, address and phone number of the applicant, owner and contractor;

b. A map with address indicating the location of the development site;

c. A site plan showing the location of existing and proposed development, including but not limited to, specific dimensions of existing and proposed structure(s), wastewater disposal facilities, water supply facilities, areas to be developed and the dimensions of the lot;

d. A statement of the intended use of any structure and/or other development;

e. A statement of the cost of the development including all materials and labor; and

f. A statement of the type of wastewater disposal system proposed.

4. In addition to the foregoing, all applications for a permit shall include the following information:

a. The elevation in relation to the National Geodetic Vertical Datum (NGVD), (or to a locally established datum for Zone A only) of the:

i. Base flood at the proposed site of all new or substantially improved structures, which is determined:

a. In Zones A1-30, AE, AO, AH, V1-30, and VE from data contained in the "Flood Insurance Study — City of Portland, Maine," as described in section 14-450.3; or

b. In Zone A, to be the elevation of the ground at the intersection of the flood plain boundary and a line perpendicular to the

shoreline which passes along the ground through the site of the proposed building;

ii. Highest and lowest grades at the site adjacent to the walls of the proposed building;

iii. Lowest floor, including basement; and whether or not such structures contain a basement; and

iv. Level, in the case of nonresidential structures only, to which the structure will be floodproofed;

b. A description of an elevation reference point established on the site of all new or substantially improved structures;

c. Either an elevation certificate (FEMA Form 81-31, 03/97, as amended) completed by a professional land surveyor, registered professional engineer or architect; or, for nonresidential structures to be floodproofed, a floodproofing certificate (FEMA Form 81-65, 05/93, as amended) completed by a registered professional engineer or architect. These certificates verify that the elevations shown on the application are accurate;

d. Certifications by a registered professional engineer or architect that:

i. Nonresidential structures will meet the floodproofing criteria of section 14-450.6(a)4a.; section 14-450.8(g); and other applicable standards in section 14-450.8;

ii. Construction in coastal high hazard areas, Zones V1-30 and VE, will meet the criteria of section 14-450.8(p); and other applicable standards in section 14-450.8;

iii. Engineered hydraulic openings in foundation walls will meet the standards of section 14-450.8(l)2;

iv. Bridges will meet the standards of section 14-450.8(m);

v. Containment walls will meet the standards of section 14-450.8(n);

e. A description of the extent to which any watercourse will be altered or relocated as a result of the proposed development; and

f. A statement of construction plans describing in detail how each applicable development standard in section 14-450.8 will be met.

g. Cross section(s) of the site acceptable to the public works authority.

(Ord.No. 660-86, 7-7-86; Ord. No. 579-87, 6-15-87; Ord. No. 156-98, 11-16-98; Ord. No. 278-09/10, 7-19-10)

Sec. 14-450.7. Same—Review.

(a) Upon determination by the building authority that an application is complete, the building authority shall transmit the application to the planning authority for review for compliance with this division. The planning authority shall coordinate review of the application by the city. No permit shall be issued by the building authority until the planning authority, or the Planning Board in the case of an application requiring subdivision or site plan review by said board, finds that the development proposal is in compliance with the standards of this division. Compliance with the provisions of this division shall be required prior to beginning any development as defined herein.

(b) The planning authority, and Planning Board when applicable, shall, when reviewing subdivisions and other proposed developments that require review under federal law, state law or local ordinances or regulations and all projects on five (5) or more acres, or in the case of manufactured home parks divided into two (2) or more lots, assure that:

1. All such proposals are consistent with the need to minimize flood damage.

2. All public utilities and facilities, such as sewer, gas, electrical and water systems are located and constructed

to minimize or eliminate flood damages.

3. Adequate drainage is provided so as to reduce exposure to flood hazards.

4. All proposals include base flood elevations, flood boundaries and, in a ravine flood plain, floodway data. These determinations shall be based on engineering practices recognized by the Federal Emergency Management Agency.

5. Any proposed development plan must include a condition of plan approval requiring that structures on lots in the development be constructed in accordance with section 14-450.8 of this division. The condition shall clearly articulate that the municipality may enforce any violation of the construction requirement. The construction requirement shall also be clearly stated on any map, plat, or plan to be signed by the Planning Board or planning authority as part of the approval process.

(c) In the review of all flood hazard development permit applications for compliance with the standards herein:

1. The planning authority, or Planning Board as appropriate, shall utilize the base flood data contained in the Flood Insurance Study, Portland, Maine, Cumberland County, as described in section 14-450.3. In special flood hazard areas where base flood elevation data are not provided in the above-cited study, the planning authority, or Planning Board as appropriate, shall obtain, review and reasonably utilize any base flood elevation data available from federal, state or other reasonably reliable sources in order to administer this section;

2. The public works authority shall make interpretations of the location of boundaries of special flood hazard areas shown on the maps described in section 14-450.3 herein;

3. Prior to approval of issuance of the flood hazard area development permit, the planning authority, or Planning Board as appropriate, shall determine that all necessary permits have been obtained from those federal, state and local authorities, from which prior approval is required by federal or state law, including but not limited to

Section 404 of the Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. 1334 as may be amended from time to time); provided, however, that conditional approval may be granted pending proof of receipt of any required permits, but no flood hazard area development permit shall be finally issued until proof of issuance of all such other permits is received by the building authority; and

4. The building authority shall notify adjacent municipalities, the Maine Department of Environmental Protection and the Maine Flood Plain Management Program in the State Planning Office, prior to any alteration or relocation of a watercourse, and submit copies of such notifications to the Federal Emergency Management Agency.

5. The building authority shall maintain, as a permanent record, copies of all flood hazard development permit applications, corresponding permits issued, and data relevant thereto, including reports of the board of appeals on variances granted under the provisions of section 14-450.12 of this division, and copies of elevation certificates, floodproofing certificates, certificates of compliance and certifications of design standards required under the provisions of sections 14-450.6, 14-450.8, and 14-450.10.

(Ord.No. 660-86, 7-7-86; Ord. No. 579-87, 6-15-87; Ord. No. 156-98, 11-16-98; ORd. No. 278-09/10, 7-19-10)

Sec. 14-450.8. Standards.

When reviewing flood hazard area development permit applications hereunder, the planning authority or Planning Board, where applicable, shall approve the plans under this division only if the following standards are met:

(a) *All development:* All development shall:

1. Be designed or modified and adequately anchored to prevent flotation (excluding piers and docks), collapse or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy;

2. Use construction materials that are resistant to

flood damage;

3. Use construction methods and practices that will minimize flood damage; and

4. Use electrical, heating, ventilation, plumbing, and air conditioning equipment, and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during flooding conditions.

(b) ***Water supply:*** All new and replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the systems.

(c) ***Sanitary sewage systems:*** All new and replacement sanitary sewage systems shall be designed and located to minimize or eliminate infiltration of flood waters into the system and discharges from the system into flood waters.

(d) ***On-site waste disposal systems:*** On-site waste disposal systems shall be located and constructed to avoid impairment to them or contamination from them during floods.

(e) ***Watercourse carrying capacity:*** All development associated with altered or relocated portions of a watercourse shall be constructed and maintained in such a manner that no reduction occurs in the flood carrying capacity of the watercourse.

(f) ***Residential:*** New construction or substantial improvement of any residential structure located within:

1. Zones A1-30, AE, and AH shall have the lowest floor (including basement) elevated to at least two (2) feet above the base flood elevation.

2. Zones AO and AH shall have adequate drainage paths around structures on slopes, to guide flood water away from the proposed structures.

3. Zone AO shall have the lowest floor (including basement) elevated above the highest adjacent grade:

a. At least two (2) feet higher than the depth specified in feet on the community's Flood Insurance Rate Map; or

b. At least three (3) feet if no depth number is specified.

4. Zone A shall have the lowest floor (including basement) elevated to at least two (2) feet above the base flood elevation utilizing information obtained pursuant to section 14-450.6(b)4.a.ii.; section 14-450.7(b)4; or section 14-450.7(c)1.

5. Zones V1-30 and VE shall meet the requirements of section 14-450.8(p).

(f) ***Nonresidential:*** New construction or substantial improvement of any nonresidential structure located within:

1. Zones A1-30, AE, and AH shall have the lowest floor (including basement) elevated to at least two (2) feet above the base flood elevation, or together with attendant utility and sanitary facilities shall:

a. Be floodproofed to at least two (2) feet above the base flood elevation so that below that elevation the structure is watertight with walls substantially impermeable to the passage of water;

b. Have structural components capable of resisting hydrostatic and hydrodynamic loads and the effects of buoyancy; and

c. Be certified by a registered professional engineer or architect that the design and methods of construction are in accordance with accepted standards of practice for meeting the provisions of this section. Such certification shall be provided with the application for a flood hazard development permit, as required by section 14-450.6(b)4d and shall include a

record of the elevation above mean sea level to which the structure is floodproofed.

2. Zones AO and AH shall have adequate drainage paths around structures on slopes, to guide flood water away from the proposed structures.

3. Zone AO shall have the lowest floor (including basement) elevated above the highest adjacent grade:

   a. At least two (2) feet higher than the depth specified in feet on the community's Flood Insurance Rate Map; or

   b. At least three (3) feet if no depth number is specified; or

   c. Together with attendant utility and sanitary facilities be floodproofed to meet the elevation requirements of this section and floodproofing standards of section 14-450.8(g).

4. Zone A shall have the lowest floor (including basement) elevated to at least two (2) feet above the base flood elevation utilizing information obtained pursuant to section 14-450.6(b)4.a.ii.; section 14-450.7(b)4; section 14-450.7(c)1; or

5. Zones V1-30 and VE shall meet the requirements of section 14-450.8(p).

(h) ***Manufactured homes:*** New or substantially improved manufactured homes located within:

1. Zones A1-30, AE, and AH shall:

   a. Be elevated on a permanent foundation such that the lowest floor is at least two (2) feet above the base flood elevation; and

   b. Be securely anchored to an adequately anchored foundation system to resist flotation, collapse, or lateral movement. Methods of

anchoring may include, but are not limited to:

i. Over-the-top ties anchored to the ground at the four (4) corners of the manufactured home, plus two (2) additional ties per side at intermediate points (manufactured homes less than fifty (50) feet long require one (1) additional tie per side); or by

ii. Frame ties at each corner of the home, plus five (5) additional ties along each side at intermediate points (manufactured homes less than fifty (50) feet long require four (4) additional ties per side).

iii. All components of the anchoring system described in section 14-450.8(h)1.b.i. and ii. Shall be capable of carrying a force of four thousand eight hundred (4,800) pounds.

2. Zones AO and AH shall have adequate drainage paths around structures on slopes, to guide flood water away from the proposed structures.

3. Zone AO shall have the lowest floor (including basement) elevated above the highest adjacent grade:

a. At least two (2) feet higher than the depth specified in feet on the community's Flood Insurance Rate Map; or

b. At least three (3) feet if no depth number is specified; and

c. Meet the requirements of section 14-450.8(h)1.b.

4. Zone A shall:

a. Be elevated on a permanent foundation such that the lowest floor is at least two (2) feet

above the base flood elevation utilizing information obtained pursuant to section 14-450.6(b)4.a.ii; section 14-450.7(b)4; section 14-450.7(c)1; and

b. Meet the requirements of section 14-450.7(2)b.

5. Zones V1-30 and VE shall meet the requirements of article VI.P.

(i) ***Recreational vehicles:*** Recreational vehicles located within:

1. Zones A1-30, AH and AE shall either:

a. Be on the site for fewer than one hundred eighty (180) consecutive days;

b. Be fully licensed and ready for highway use. A recreational vehicle is ready for highway use if it is on its wheels or jacking system, is attached to the site only be quick disconnect type utilities and security devices, and has no permanently attached additions; or

c. Be permitted in accordance with the elevation and anchoring requirements for "manufactured homes" in section 14-450.8(h)1a and b.

2. Zones V1-30 and VE shall meet the requirements of either section 14-450.8(i)1.a. or b. or section 14-450.8(p).

(j) ***Accessory structures:*** Accessory structures located within Zones A1-30, AE, AO, AH and A, shall be exempt from the elevation criteria required in section 14-450.8(f) and (g) above, if all other requirements of section 14-450.8 and all the following requirements are met. Accessory structures shall:

1. Be five hundred (500) square feet or less and have a value less than three thousand dollars ($3,000.00);

2. Have unfinished interiors and not be used for human

habitation;

3. Have hydraulic openings, as specified in section 14-450.8(l), in at least two (2) different walls of the accessory structure;

4. Be located outside the floodway;

5. When possible be constructed and placed on the building site so as to offer the minimum resistance to the flow of flood waters and be placed further from the source of flooding than is the primary structure; and

6. Have only ground fault interrupt electrical outlets. The electric service disconnect shall be located above the base flood elevation and when possible outside the special flood hazard area.

(k) *Floodways:*

1. In Zones A1-30 and AE, encroachments, including fill, new construction, substantial improvement, and other development shall not be permitted in ravine areas, for which a regulatory floodway is designated on the community's Flood Insurance Rate Map or Flood Boundary and Floodway Map, unless a technical evaluation certified by a registered professional engineer is provided demonstrating that such encroachments will not result in any increase in flood levels within the community during the occurrence of the base flood discharge.

2. In Zones A1-30 and AE riverine areas, for which no regulatory floodway is designated, encroachments, including fill, new construction, substantial improvement, and other development shall not be permitted in the floodway as determined in section 14-450.8(11)3. unless a technical evaluation certified by a registered professional engineer is provided demonstrating that the cumulative effect of the proposed development, when combined with all other existing development and anticipated development:

a. Will not increase the water surface elevation of the base flood more than one (1) foot at any point within the community; and

b. Is consistent with the technical criteria contained in chapter 5 entitled "Hydraulic Analyses," *Flood Insurance Study – Guidelines and Specifications for Study Contractors, (FEMA 37/January 1995, as amended).*

3. In Zones A1-30, AE, and A riverine areas for which no regulatory floodway is designated, the regulatory floodway is determined to be the channel of the river or other watercourse and the adjacent land areas to a distance of one-half (1/2) the width of the flood plain as measured from the normal high water mark to the upland limit of the flood plain. Encroachments, including fill, new construction, substantial improvement, and other development shall not be permitted unless a technical evaluation certified by a registered professional engineer is provided meeting the requirements of section 14-450.8(k)2.a. and b.

(l) *Enclosed areas below the lowest floor:* New construction or substantial improvement of any structure in Zones A1-30, AE, AO, AH and A that meets the development standards of article VI, including the elevation requirements of section 14-450.8, paragraphs (f), (g) or (h) and is elevated on posts, columns, piers, piles, "stilts," or crawl spaces may be enclosed below the base flood elevation requirements provided all the following criteria are met or exceeded:

1. Enclosed areas are not basements;

2. Enclosed areas shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of flood water. Designs for meeting this requirement must either:

a. Be engineered and certified by a registered professional engineer or architect; or

b. Meet or exceed the following minimum criteria:

(a) A minimum of two (2) openings having a total net area of not less than one (1) square inch for every square foot of the enclosed area;

(b) The bottom of all openings shall be no higher than one (1) foot above the lowest grade; and

I Openings may be equipped with screens, louvers, valves, or other coverings or devices provided that they permit the entry and exit of flood waters automatically without any external influence or control such as human intervention, including the use of electrical and other non-automatic mechanical means;

3. The enclosed area shall not be used for human habitation; and

4. The enclosed areas are usable solely for building access, parking vehicles, or storing of articles and equipment used for maintenance of the building.

(m) ***Bridges:*** New construction or substantial improvement of any bridge in Zones A1-30, AE, AO, AH, A, V1-30 and VE shall be designed such that:

1. When possible, the lowest horizontal member (excluding the pilings, or columns) is elevated to at least two (2) feet above the base flood elevation; and

2. A registered professional engineer shall certify that:

a. The structural design and methods of construction shall meet the elevation requirements of this section and the floodway standards of section 14-450.8(k); and

b. The foundation and superstructure attached

thereto is anchored to resist flotation, collapse and lateral movement due to the effects of wind and water loads acting simultaneously on all structural components. Water loading values used shall be those associated with the base flood.

(n) ***Containment walls:*** New construction or substantial improvement of any containment wall located within:

1. Zones A1-30, AE, AH, V1-30 and VE shall:

   a. Have the containment wall elevated to at least two (2) feet above the base flood elevation;

   b. Have structural components capable of resisting hydrostatic and hydrodynamic loads and the effects of buoyancy; and

   c. Be certified by a registered professional engineer or architect that the design and methods of construction are in accordance with accepted standards of practice for meeting the provisions of this section. Such certification shall be provided with the application for a flood hazard development permit, as required by section 14-450.6(b)d.4.

2. Zones AO and AH shall have adequate drainage paths around containment walls on slopes, to guide flood water away from the proposed walls.

3. Zone AO shall have the top of the containment wall elevated above the highest adjacent grade:

   a. At least two (2) feet higher than the depth specified in feet on the community's Flood Insurance Rate Map; or

   b. At least three (3) feet if no depth number is specified.

4. Zone A shall have the containment wall elevated to at least two (2) feet above the base flood elevation utilizing information obtained pursuant

to section 14-450.6(b)4.a.ii.; section 14-450.7(a)4; or section 14-450.7(c)1.

(o) ***Wharves, piers and docks:*** New construction or substantial improvement of wharves, piers, and docks are permitted in Zones A, A1-30, AE, AO, AH, V1-30, and VE, in and over water and seaward of the mean high tide if the following requirements are met:

1. Wharves, piers, and docks shall comply with all applicable local, state and federal regulations; and

2. Commercial wharves, piers, and docks involving fill shall adhere to the design and construction standards contained in the U.S. Army Corps of Engineers' ***Shore Protection Manual.***

(p) ***Coastal flood plains:***

1. All new construction located within Zones A1-30, AE, A, V1-30 and VE shall comply with all applicable local, state and federal regulations.

2. New construction or substantial improvement of any structure located within Zones V1-30 or VE shall:

   a. Be elevated on posts or columns such that:

      i. The bottom of the lowest horizontal structural member of the lowest floor (excluding the pilings or columns) is elevated to two (2) feet above the base flood elevation;

      ii. The pile or column foundation and the elevated portion of the structure attached thereto is anchored to resist flotation, collapse, and lateral movement due to the effects of wind and water loads acting simultaneously on all building components; and

      iii. Water loading values used shall be those associated with the base flood. Wind

loading values used shall be those required by applicable state and local building standards.

b. Have the space below the lowest floor:

i. Free of obstructions; or

ii. Constructed with open wood lattice-work, or insect screening intended to collapse under wind and water without causing collapse, displacement, or other structural damage to the elevated portion of the building or supporting piles or columns; or

iii. Constructed with nonsupporting breakaway walls which have a design safe loading resistance of not less than ten (10) or more than twenty (20) pounds per square foot.

3. A registered professional engineer or architect shall:

a. Develop or review the structural design, specifications, and plans for the construction, which must meet or exceed the technical criteria contained in the ***Coastal Construction Manual, (FEMA-55/February, 1986);*** and

b. Certify that the design and methods of construction to be used are in accordance with accepted standards of practice for meeting the criteria of section 14-450.8(p)2.

4. The use of fill for structural support in Zones V1-30 and VE is prohibited.

5. Human alteration of sand dunes within Zones V1-30 and VE is prohibited unless it can be demonstrated that such alterations will not increase potential flood damage.

6. The enclosed areas may be used solely for parking vehicles, building access, and storage.

7. Lobster sheds and fishing sheds located seaward of mean high tide shall be exempt from the elevation requirement in section 14-450.8(g) only upon review and approval by the planning authority or Planning Board and if all the following requirements of section 14-450.8(a), (k) and (l) are met:

   a. The conditional use shall be limited to low value structures such as metal or wood sheds two hundred (200) square feet or less and shall not exceed more than one (1) story.

   b. The structure shall be securely anchored to the wharf or pier to resist flotation, collapse and lateral movement due to the effect of wind and water loads acting simultaneously on all building components.

   c. The structure will not adversely increase wave or debris impact forces affecting nearby buildings.

   d. The structure shall have unfinished interiors and shall not be used for human habitation.

   e. Any mechanical, utility equipment and fuel storage tanks must be anchored and either elevated or floodproofed to two (2) feet above the base flood elevation.

      All electrical outlets shall be ground fault interrupt type. The electrical service disconnect shall be located on shore above the base flood elevation and when possible outside the special flood hazard area.

      <u>If a flood hazard permit application is granted, the applicant shall be notified in writing that flood insurance is not available for structures located entirely over water or seaward of mean high tide.</u>

(Ord. No. 660-86, 7-7-86; Ord. No. 579-87, 6-15-87; Ord. No. 156-98, 11-16-98;

Sec. 14-450.9. Permit.

Upon determination that the development or substantial improvement plan is in compliance with this division, the building authority shall issue one (1) of the following Flood Hazard Area Development Permits based on the type of development:

(a) Issue a two-part flood hazard development permit for elevated structures. Part I shall authorize the applicant to build a structure to and including the first horizontal floor only above the base flood level. At that time the applicant shall provide the code enforcement officer with a second elevation certificate completed by a professional land surveyor, registered professional engineer or architect based on the Part I permit construction, "as built," for verifying compliance with the elevation requirements of section 14-450.8(f), (g), (h) or (p). Following review of the elevation certificate data, which shall take place within seventy-two (72) hours of receipt of the application, or as soon as practicable thereafter, the code enforcement officer shall issue Part II of the Flood Hazard Development Permit. Part II shall authorize the applicant to complete the construction project; or

(b) Issue a Flood Hazard Development Permit for Floodproofing of Nonresidential Structures that are new construction or substantially improved nonresidential structures that are not being elevated but that meet the floodproofing standards of section 14-450.8(g)1.a.—c. The application for this permit shall include a floodproofing certificate signed by a registered professional engineer or architect; or

(c) Issue a Flood Hazard Development Permit for all level I and level II site plans that are not new construction or a substantial improvement, such as repairs, maintenance, renovations, or additions, whose value is less than fifty (50) percent of the market value of the structure. Level I and level II site plans also include, but are not limited to: accessory structures as provided for in section 14-450.8(j), mining, dredging, filling, grading, paving, excavation, drilling operations, storage of

equipment or materials, deposition or extraction of materials, public or private sewage disposal systems or water supply facilities that do not involve structures; and nonstructural projects such as bridges, dams, towers, fencing, pipelines, wharves, and piers.

(Ord. No. 660-86, 7-7-86; Ord. No. 579-87, 6-15-87; Ord. No. 156-98, 11-16-98; Ord. No. 278-09/10, 7-19-10)

Sec. 14-450.10. Certificate of compliance.

No land in an area of special flood hazard shall be occupied or used in violation of this division, and no structure in such an area which is developed or substantially improved shall be occupied until a Certificate of Compliance is issued by the building authority. Said Certificate of Compliance shall be issued only after an applicant files the following certifications of the "as-built" development with the building authority:

(a) For new construction or substantial improvement of any structure the applicant shall submit to the building authority:

1. An elevation certificate completed by a professional land surveyor, registered professional engineer, or architect, for compliance with applicable provisions of section 14-450.8; and

2. For structures in Zones V1-30 and VE, certification by a registered professional engineer or architect that the design and methods of construction to be used are in compliance with applicable provisions of section 14-450.8(p)3.

(b) The applicant shall submit written notification to the building authority that the development is complete and complies with the provisions of this division.

(c) Within thirty (30) working days, the building authority shall:

1. Review the elevation certificate and the applicant's written notification; and

2. Upon determination that the development conforms with the provisions of this division, shall issue a

certificate of compliance.

(Ord. No. 660-86, 7-7-86; Ord. No. 579-87, 6-15-87; Ord. No. 156-98, 11-16-98)

Sec. 14-450.11. Fee.

A nonrefundable flood hazard area development permit fee of fifty dollars ($50.00) shall be paid to the building authority, and a copy of a receipt for the same shall accompany the application.

(Ord. No. 660-86, 7-7-86; Ord. No. 579-87, 6-15-87; Ord. No. 156-98, 11-16-98)

Sec. 14-450.12. Appeals and variance processes.

(a) The board of appeals shall hear and decide appeals from and review orders, decisions, determinations or interpretations or the failure to act of the building authority as authorized in section 14-472 (appeals).

(b) The board of appeals may authorize variances from the provisions of this division as authorized in section 14-473 (variances), except:

1. As otherwise expressly provided in section 14-473I(3); or

2. Variances shall not be granted within any designated regulatory floodway if any increase in flood levels during the base flood discharge would result.

(c) Section 14-473 notwithstanding, variances from the requirements of this division shall be granted only upon:

1. A showing of good and sufficient cause; and

2. A determination that should a flood comparable to the base flood occur, the granting of a variance will not result in increased flood heights, additional threats to public safety, public expense, or create nuisances, cause fraud or victimization of the public or conflict with existing local laws or ordinances; and

3. A showing that the issuance of the variance will not conflict with other state, federal or local laws or ordinances; and

4. A determination that failure to grant the variance would result in "undue hardship," which in this subsection

means:

a. That the land in question cannot yield a reasonable return unless a variance is granted; and

b. That the need for a variance is due to the unique circumstances of the property and not to the general conditions in the neighborhood; and

c. That the granting of a variance will not alter the essential character of the locality; and

d. That the hardship is not the result of action taken by the applicant or a prior owner.

(d) Variances shall only be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.

(e) Variances may be issued for the repair, reconstruction, rehabilitation, or restoration of historic structures upon the determination that:

1. The development meets the criteria of section 14-450.12(a) through (d); and

2. The proposed repair, reconstruction, rehabilitation, or restoration will not preclude the structure's continued designation as a historic structure and the variance is the minimum necessary to preserve the historic character and design of the structure.

(f) Variances may be issued for new construction, substantial improvements, or other development for the conduct of a functionally dependent use provided that:

1. The criteria of this section and section 14-450.8 are met; and

2. The structure or other development is protected by methods that minimize flood damages during the base flood and create no additional threats to public safety.

(g) Any applicant who meets the criteria of this section shall be notified by the board of appeals in writing over the

signature of the chairman of the board of appeals that:

1. The issuance of a variance to construct a structure below the base flood level will result in greatly increased premium rates for flood insurance up to amounts as high as twenty-five dollars ($25.00) per one hundred dollars ($100.00) of insurance coverage;

2. Such construction below the base flood level increases risks to life and property; and

3. The applicant agrees in writing that the applicant is fully aware of all the risks inherent in the use of land subject to flooding, assumes those risks and agrees to indemnify and defend the municipality against any claims filed against it that are related to the applicant's decision to use land located in a flood plain and that the applicant individually releases the municipality from any claims the applicant may have against the municipality that are related to the use of land located in a flood plain.

(h) The above paragraph(s) shall be included with or on all applications for a variance hereunder, as well as the following statements:

1. The applicant understands and is fully aware of all of the risks inherent in the use of land subject to flooding and understands and agrees that he/she is fully assuming any potential or actual liability resulting therefrom. Applicant agrees to indemnify and defend the municipality against any claims filed against it that are related to the applicant's decision to use the land located in a flood plain and that the applicant individually releases the municipality from any claims the applicant may have against the municipality that are related to the use of land located in a flood plain. Applicant further understands and agrees that the city has no responsibility therefore, and in the event a variance is granted to applicant, applicant agrees to inform any purchaser, assignee or other transferee of applicant of the existence of said variance and of this agreement.

2. Applicant shall signify in writing that he/she has read, understands and agrees to all of the stipulations in this

subsection and subsection (7) immediately above.

(i) The board of appeals shall submit to the building authority a report of all variance actions, including justification for the granting of the variance and an authorization for the building authority to issue a flood hazard development permit, which includes any conditions to be attached to said permit.

(Ord. No. 660-86, 7-7-86; Ord. No. 579-87, 6-15-87; Ord. No. 156-98, 11-16-98)

Sec. 14-450.13. Records; reports.

(a) The director of planning and urban development shall maintain, as a permanent record, copies of all flood hazard area development permits issued, certificates of compliance and data relevant thereto, including reports of the board of appeals on variances granted hereunder.

(b) The director of planning and urban development shall be responsible for filing such annual reports regarding participation in the National Flood Insurance Program as may be required by FEMA. Said annual reports shall include, but not be limited to, a report on implementation of this division and on any variances granted hereunder. A copy of such annual reports shall also be sent to the state planning office.

(Ord. No. 660-86, 7-7-86; Ord. No. 579-87, 6-15-87; Ord. No. 156-98, 11-16-98)

Sec. 14-450.14. Enforcement and penalties.

It shall be the duty of the building authority to enforce the provisions of this ordinance pursuant to Title 30-A M.R.S.A. § 4452. The penalties contained in Title 30-A M.R.S.A. § 4452 shall apply to any violation of this ordinance.

In addition to any other actions, the building authority, upon determination that a violation exists, shall submit a declaration to the Administrator of the Federal Insurance Administration requesting a denial of flood insurance. The valid declaration shall consist of:

(a) The name of the property owner and address or legal description of the property sufficient to confirm its identity and location;

(b) A declaration that the property is in violation of a cited state or local law, regulation, or ordinance;

(c) A clear statement that the public body making the declaration has authority to do so and a citation to that authority;

(d) Evidence that the property owner has been provided notice of the violation and the prospective denial of insurance; and

(e) A clear statement that the declaration is being submitted pursuant to Section 1316 of the National Flood Insurance Act of 1968, as amended.

(Ord. No. 156-98, 11-16-98)

Sec. 14-450.15. Conflict with other ordinances.

This division shall not repeal, annul or in any way impair or remove the necessity of compliance with any other rules, regulations, permits or provisions of law. Where one (1) section of this Code imposes a greater restriction upon the use of land, buildings or structures than another section, the provisions of the stricter section shall control.

(Ord. No. 660-86, 7-7-86; Ord. No. 579-87, 6-15-87; Ord. No. 156-98, 11-16-98)

Sec. 14-450.16. Validity and severability.

If any section or provision of this division is declared by the courts to be invalid, such decision shall not invalidate any other section or provision of this division.

(Ord. No. 156-98, 11-16-98)

Sec. 14-450.17.- 14-450.30. Reserved.

DIVISION 26.7. S-P STREAM PROTECTION ZONE

Sec. 14-451. Purposes.

The purposes of the S-P stream protection zone are to preserve and protect significant streams as defined in 38 M.R.S.A. Section 438-A(1) by providing a buffer from land development activities in order to conserve stream channel capacity and to minimize siltation and stream bank erosion.

(Ord. No. 15-92, § 30, 6-15-92)

Sec. 14-452. Applicability.

The S-P stream protection zone includes all land areas within seventy-five (75) feet, horizontal distance, of the normal high water line of a stream as shown on the City of Portland Zoning Map. The regulations set forth in this division shall not apply to a stream and its associated shoreland area when they are also located in an area designated as a shoreland zone. Streams located within shoreland zones shall be subject to the provisions of division 26.
(Ord. No. 15-92, § 30, 6-15-92)

Sec. 14-453. Development standards.

(a) *Minimum building setback from normal high water line of stream:* Seventy-five (75) feet. Notwithstanding this requirement, when a lot is a lot of record as defined in section 14-433 or cannot otherwise meet the setback requirement of this section due to physical limitations of the site, the Planning Board may approve a reduction of the setback requirement for a principal structure to the least amount necessary to achieve a building dimension of twenty-eight (28) feet, provided that the setback is not reduced to less than forty (40) feet. Structures in existence on June 15, 1992, may be expanded once during the lifetime of the structure up to twenty-five (25) feet toward a stream or tributary stream, provided that the setback is not reduced to less than forty (40) feet and the floor area or volume is not increased by more than thirty (30) percent.

(b) *Filling of material within a stream protection zone:* Filling of material within a stream protection zone shall require site plan review in accordance with article V of this chapter.

(c) *Minimum parking setback from normal high water line of stream:* Seventy-five (75) feet. Notwithstanding this requirement, the Planning Board may reduce the parking setback where the required setback cannot be met to the least extent necessary, provided that such setback shall not be less than the setback of the principal structure from the stream.
(Ord. No. 15-92, § 30, 6-15-92; Ord. No. 278-09/10, 7-19-10)

Sec. 14-454. - Sec. 14-460. Reserved.

DIVISION 27. ADMINISTRATION AND ENFORCEMENT*

***Cross reference(s)—**Administration, Ch.2.

Sec. 14-461. Building authority to enforce article.

It shall be the duty of the building authority to enforce the provisions of this article. No permit or certificate of occupancy shall be issued for the construction, alteration, enlargement, moving, use or change of use of any building, structure, or part thereof, or for the use or change of use of any premises, unless the plans and intended use indicate that the building, structure or premises is to conform in all respects with the provisions of this article.

(Code 1968, § 602.22.A)

Sec. 14-462. Change to nonconforming use.

The use of any part of any building or structure for a one-family dwelling house, two-family dwelling house, lodging house, hotel, tenement or apartment house, dormitory, educational use, club, church, farm use, hospital, sanitarium, institution, aviation facility, office or bank, place of amusement or assembly, retail business or service other than a filling station or garage, wholesale business, manufacturing or storage facility, warehouse, filling station, stable, minor garage for not more than one (1) commercial motor vehicle, minor garage for more than one (1) commercial motor vehicle, public garage, any use prohibited in an industrial zone, or for any other distinctive use shall not be changed to any other use in this list of uses or to any other distinctive use, whether alterations in the building or structure are involved or not, until a permit and certificate authorizing such change of use has first been secured from the building authority, unless the proposed use conforms with the requirements of this article for the zone in which the building or structure or part thereof is located. Failure to secure such a permit before such a change is made shall be a violation of this article.

(Code 1968, § 602.22.B)

Sec. 14-463. Certificate of occupancy required.

No building or part thereof shall be constructed, altered, enlarged or moved unless a permit for such action has been issued by the building authority. Applications for building permits and certificates of occupancy required by the building code shall also serve as applications for permits required by this article. After

the building, structure or part thereof has been completed, altered, enlarged or moved, a certificate of occupancy shall be obtained for the proposed use before the same may be occupied or used. A certificate of occupancy shall be required for any of the following:

(a) Any increase in the number of dwelling units in a building;

(b) Establishment of any home occupation;

(c) Change in the use of a nonconforming use, whether of land or buildings;

(d) Occupancy and use, or change of use, of vacant land, except for the raising of crops;

(e) Change in the use of an existing building, whether or not alterations are involved, from any use in the following list to any of the other uses on the list:

1. Manufacturing or processing;

2. Residential;

3. Retail;

4. Storage or warehouse;

5. Transportation;

6. Other industrial;

7. Institutional;

8. office;

9. Other commercial;

10. Water-dependent use;

11. Marine use.

(Code 1968, § 602.22.C; Ord. No. 293-84, § 1, 11-19-84; Ord. No. 168-93, § 4, 1-4-93)

Sec. 14-464. Plans to be submitted.

A site plan showing the dimensions of the lot and of all buildings, yards and parking spaces, existing or proposed, shall accompany each application to the building authority for a building permit or certificate of occupancy. Site plans of all off-street loading and off-street parking, whether or not such parking is located on the same lot with the building for which it is required or which it is to serve, shall be provided.
(Code 1968, § 602.22.D)

Sec. 14-465. Zoning Determination Fee.

Upon request of any person and payment of a $150.00 fee, the building authority shall issue a written decision, determination or interpretation regarding the zoning code. The fee shall not apply to any such decision, determination or interpretation made in regard to a single-family residence which is owned and occupied by the person making the request.
(Ord. No. 224-00, 5-15-00; Ord. No. 119-01/02, § 3, 12-3-01)

Sec. 14-466. - Sec. 14-470. Reserved.

DIVISION 28. JURISDICTION OF BOARD OF APPEALS*

***Cross reference(s)—**Administration, Ch. 2; boards generally, § 2-31 et seq.; board of appeals, § 14-541 et seq.

Sec. 14-471. Jurisdiction and authority.

The board of appeals shall have the following jurisdiction and authority:

(a) Subject to the provisions of section 14-472, to hear and decide appeals from, and review orders, decisions, determinations or interpretations made by the building authority;

(b) Subject to the provisions of section 14-473, to hear and grant or deny applications for variances from the terms of this article;

(c) Subject to the provisions of section 14-474, to hear and grant or deny applications for conditional uses, as

specified in this article;

(d) To initiate changes and amendments to this article.

(Code 1968, § 602.24.A; Ord. No. 437-74, 7-1-74; Ord. No. 354-85, § 5, 1-7-85)

Sec. 14-472. Appeals.

(a) ***Authority.*** The board of appeals shall hear and decide appeals from and review orders, decisions, determinations or interpretations or the failure to act of the building authority.

(b) ***Procedure:***

1. ***Notice of appeal.*** An appeal may be taken to the board of appeals by any person affected by a decision of the building authority. Such appeal shall be taken within thirty (30) days of the action complained of by filing with the building authority a notice of appeal specifying the grounds thereof. A payment of a nonrefundable filing fee, as established from time to time by the city council to cover administrative costs and costs of hearing, shall accompany notice of appeal. The building authority shall forthwith transmit to the board of appeals all of the papers constituting the record upon which the action appealed from was taken.

2. ***Public hearing.*** A public hearing shall be set, advertised and conducted by the board of appeals in accordance with article VI of this chapter.

3. ***Action by the board of appeals.*** Within thirty (30) days following the close of the public hearing, the board of appeals shall render a decision on the appeal in the manner and form specified in article VI of this chapter. The failure of the board to act within thirty (30) days shall be deemed an approval of the appeal unless mutually extended in writing by the appellant and the board. Within five (5) days of such decision or failure to act notice thereof shall be mailed by the secretary to each party.

4. ***Right to grant variance in deciding appeals.*** In any case where the notice is accompanied by an application for variance in accordance with section 14-473(b)(1), the board of appeals shall have the authority to grant, as

part of the relief, a variance, but only in strict compliance with each provision of section 14-473 hereof.

5. *Conditions and limitations on rights granted by appeal.* Any right granted by the board of appeals on appeal shall be subject to the same conditions and limitations as if secured without the necessity of an appeal.

(Code 1968, § 602.24.B; Ord. No. 437-74, 7-1-74)

Sec. 14-473. Variances.

(a) *Authority.* Except as otherwise expressly provided in subsection (c)(3) and (c)(4), the board of appeals may authorize variances from the provisions of this article as meet the requirements of this division including but not limited to use variance, dwelling unit conversion, space and bulk such as lot size, density and side yard, parking, loading and signs.

(b) *Procedure:*

1. *Application.* Application for a variance shall be submitted to the building authority. A payment of a nonrefundable application fee, as established from time to time by the city council to cover administrative costs and costs of a hearing, shall accompany each application. The application shall be in such form as prescribed by the building authority and contain at least the following information and documentation:

   a. The name and address of the applicant and his or her interest in the subject property;

   b. The name and address of the owner, if different from the applicant;

   c. The address or location of the subject property;

   d. The present use and zoning classification of the subject property;

   e. Where the site plan approval is required by article V of this chapter, a preliminary or final site plan as defined by article V of this chapter;

   f. The relief sought from the board of appeals.

2. ***Public hearing.*** A public hearing shall be set, advertised and conducted by the board of appeals in accordance with article VI of this chapter.

   A copy of each variance request pertaining to division 26 (shoreland regulations) including the application and all supporting information supplied by the applicant, shall be forwarded by the municipal officials to the Commission of the Department of Environmental Protection at least twenty (20) days prior to action by the board. Any comments received from the Commissioner prior to action by the board shall be made part of the record and shall be taken into consideration by the board.

3. ***Action by board of appeals.*** Within thirty (30) days following the close of the public hearing, the board of appeals shall render its decision granting or denying the variance, in the manner and form specified by article VI of this chapter. The failure of the board to act within thirty (30) days shall be deemed an approval of the variance unless mutually extended in writing by the applicant and the board. Within seven (7) days of such decision or the expiration of such period, the secretary shall mail notice of such decision or failure to act to the applicant.

(c) ***Conditions for variances:***

1. ***Undue hardship required; defined.*** Except as provided in subsection (2) below, a variance may be granted by the board only where strict application of the ordinance, or a provision thereof, to the petitioner and his property would cause undue hardship. The words "undue hardship" as used in this subsection mean:

   a. That the land in question cannot yield a reasonable return unless a variance is granted;

   b. That the need for a variance is due to the unique circumstances of the property and not to the general conditions in the neighborhood;

   c. That the granting of a variance will not alter the

essential character of the locality; and

d. That the hardship is not the result of action taken by the applicant or a prior owner.

2. *Disability variance:* Notwithstanding the provisions of subsection (c)(1) of this section, the board may grant a variance to an owner of a residential dwelling for the purpose of making that dwelling accessible to a person with a disability who resides in or regularly uses the dwelling. The board shall restrict any variance granted under this subsection solely to the installation of equipment or the construction of structures necessary for access to or egress from the dwelling by the person with the disability. The board may impose conditions on the variance, including limiting the variance to the duration of the disability or to the time that the person with the disability lives in the dwelling. The term "structures necessary for access to or egress from the dwelling" shall include railing, wall or roof systems necessary for the safety or effectiveness of the structure. For the purpose of this subsection, a disability has the same meaning as a physical or mental handicap under 5 M.R.S.A. Section 4553.

3. *Practical difficulty variance:*

a. Notwithstanding the provisions of subsections 14-473(c)(1) and (2) of this section, the board of appeals may grant a variance from the dimensional standards of this article when strict application of the provisions of the ordinance would create a practical difficulty, as defined herein, and when all the following conditions are found to exist:

1. The need for a variance is due to the unique circumstances of the property, and not to the general conditions in the neighborhood;

2. The granting of the variance will not produce an undesirable change in the character of the neighborhood and will not have an unreasonably detrimental effect on either the use or fair market value of abutting properties;

3. The practical difficulty is not the result of action taken by the applicant or a prior owner;

4. No other feasible alternative is available to the applicant, except a variance;

5. The granting of a variance will not have an unreasonably adverse effect on the natural environment; and

6. The property is not located, in whole or in part, within a shoreland area, as defined in 38 M.R.S.A. § 435, nor within a shoreland zone or flood hazard zone, as defined in this article.

b. The following words have the meanings set forth below:

1. ***Dimensional standards:*** Those provisions of this article which relate to lot area, lot coverage, frontage, and setback requirements.

2. ***Practical difficulty:*** A case where strict application of the dimensional standards of the ordinance to the property for which a variance is sought would both preclude a use of the property which is permitted in the zone in which it is located and also would result in significant economic injury to the applicant.

3. ***Significant economic injury:*** The value of the property if the variance were denied would be substantially lower than its value if the variance were granted. To satisfy this standard, the applicant need not prove that denial of the variance would mean the practical loss of all beneficial use of the land.

c. Except as modified above, the other provisions of section 14-473 will apply to practical difficulty

variances, including, but not limited to, the provisions of section 14-473(b)(2) (public hearing), and section 14-473(d) (specified variances prohibited).

d. A practical difficulty variance may not be used to grant relief from the provisions of section 14-449 (land use standards), to increase either volume or floor area, nor to permit the location of a structure, including, but not limited to, single-component manufactured homes, to be situated on a lot in a way which is contrary to the provisions of this article.

4. *Specified variances prohibited:*

a. No use permitted in medium- and high-density residential districts shall be permitted in low-density residential districts. No use permitted in business districts shall be permitted in any residential district. No use permitted in industrial districts shall be permitted in any business or residential district. No use permitted in residential districts shall be permitted in any industrial district. The general use categories are listed below:

1. Low-density residential: IR-1, IR-2, IR-3, R-1, R-2, R-3.

2. Medium- and high-density residential: R-4, R-5, R-6.

3. Business: R-P, B-1, B-2, B-3, A-B, B-4, B-5, I-B.

4. Industrial: I-L, I-Lb, I-M, I-Ma, I-Mb, I-H, I-Hb.

b. No variance shall be granted which would permit the creation of a lot or parcel that cannot be developed in compliance with the zoning, subdivision and other regulations applicable thereto.

c. No variance shall be granted which would result in a use or development of the lot or parcel in question which would not be in harmony with the general purpose and intent of this article or the land development plan of the city; which would be materially detrimental to the public welfare or materially injurious to the enjoyment, use or development of property or improvement permitted in the vicinity; or which would materially impair an adequate supply of light and air to properties and improvements in the vicinity, substantially increase congestion in the public streets, increase the danger of flood or fire, or endanger the public safety.

d. No variance shall be granted which would be greater than the minimum variance necessary to relieve the undue hardship or the hardship of the applicant.

e. Except for appeals concerning nonconforming dwelling units in existence and use prior to April 18, 1984, no variance shall be granted which would permit the alteration of a structure to accommodate any additional dwelling unit as a conditional use without meeting the requirements which would otherwise be a condition precedent to such conditional use treatment.

f. No variance shall be granted which would permit the alteration of an existing residential structure in an R-4 or an R-5 zone to accommodate more than three (3) dwelling units. No such variance shall be granted unless:

1. No additional unit shall have less than six hundred (600) square feet of floor area, exclusive of common hallways and storage in basement and attic;

2. No open outside stairways or fire escapes above the ground floor shall be or have been constructed in the immediately preceding five (5) years;

3. A lower level dwelling unit shall have a

minimum of one-half of its floor-to-ceiling height above the average adjoining ground level;

4. No existing dwelling unit shall be decreased to less than one thousand (1,000) square feet of floor area;

5. The building shall have been in existence prior to January 1, 1984;

6. A minimum of nine thousand (9,000) square feet of land area shall be required;

7. A minimum of four (4) on-site parking spaces shall be required;

8. A minimum of seventy-five (75) feet of street frontage shall be required; provided, further, before a building permit may be issued, site plan approval under article V of this chapter shall be required with the following additional review standards:

   (i) Any addition or exterior alterations such as facade materials, building form and roof pitch shall be designed to be compatible with the architectural style of the structure;

   (ii) The scale and surface area of parking, driveways, and paved areas shall be arranged and landscaped to be compatible in size and scale with neighboring properties in the area and to properly screen vehicles from adjacent properties and streets;

provided, further, that no variance shall be granted with respect to any of the preceding additional requirements.

g. No variance shall be granted from the minimum lot sizes set forth in section 14-433 for lots in the IR-1, IR-2 and I-B zones.

h. No variance shall be granted from the requirements in Section 14-403.

(d) ***Conditions on variances; variances less than requested.*** Reasonable conditions and safeguards relating to construction, character, location, landscaping, screening and other matters may be imposed upon the premises benefited by a variance as considered necessary to prevent injurious effects upon other property and improvements in the vicinity or upon public facilities and services. Such conditions shall be expressly set forth in the resolution granting the variance and in the notice informing the applicant thereof. Violation of such conditions and safeguards shall be a violation of this article. A variance less than or different from that requested may be granted when the record supports the applicant's right to some relief but not to the relief requested.

(e) ***Limitations on variances.*** No variance permitting the erection or alteration of a building shall be valid for a period longer than six (6) months, or such other time as may be fixed at the time granted not to exceed two (2) years, unless a building permit for such erection or alteration is issued and construction is actually begun within that period and is thereafter diligently pursued to completion. One (1) or more extensions of said expiration dates may be granted if the facts constituting the basis of the decision have not materially changed and the two-year period is not exceeded thereby. No variance relating to the establishment or maintenance of a use not involving a building or structure shall be valid for a period longer than six (6) months, or such other time as may be fixed at the time granted not to exceed two (2) years, unless an occupancy permit is issued and a use commenced within such period; provided, however, that one (1) or more extensions of said time may be granted if the facts constituting the basis of the decision have not materially changed, and the two-year period is not exceeded thereby.

(f) ***Recording of variances.*** No variance shall be valid unless, within thirty (30) days of final approval of the variance, a certificate describing the variance has been recorded by the applicant for the variance in the registry of deeds as required by 30 M.R.S.A. Section 4963.

(Code 1968, § 602.24.C; Ord. No. 437-74, 7-1-74; Ord. No. 467-83, § 1, 4-20-83; Ord. No. 563-84, 5-7-84; Ord. No. 357-84, § 1, 12-17-84; Ord. No. 354-85, § 6, 1-7-85; Ord. No. 40-85, § 1, 7-15-85; Ord. No. 67-87, § 5, 11-2-87; Ord. No.

93-88, 7-19-88; Ord. No. 167-89, 12-11-89; Ord. No. 324-92, 4-22-92; Ord. No. 164-97, § 13, 1-6-97; Ord. No. 208-98, §§ 1, 2, 2-2-98; Ord. No. 253-05/06, 7-17-06; Ord. No. 296-08/09, 6-15-09; Ord. No. 60-12/13, 11-19-12)

***Editor's note—**Ord. No. 93-88, adopted July 19, 1988, amended § 14-473 by adding subsection (f) to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 93-88.

Sec. 14-474. Conditional uses.

(a) *Authority.* The board of appeals may, subject to the procedures, standards and limitations set out in this section, approve the issuance of a conditional use permit authorizing development of conditional uses listed in this article.

(b) *Procedure:*

1. *Application.* Applications for conditional use permits shall be submitted to the building authority. A nonrefundable application fee, as established from time to time by the city council to cover administrative costs and costs of a hearing, shall accompany each application. The application shall be in such form and shall contain such information and documentation as shall be prescribed from time to time by the building authority but shall in all instances contain at least the following information and documentation:

    a. The applicant's name and address and his or her interest in the subject property;

    b. The owner's name and address if different than the applicant;

    c. The address, or chart, block and lot number as shown in the records of the office of the assessor of the subject property;

    d. The zoning classification and present use of the subject property;

    e. The particular provision of this article authorizing the proposed conditional use;

f. A general description of the proposed conditional use;

g. Where site plan approval is required by article V of this chapter, a preliminary or final site plan as defined by article V of this chapter.

2. ***Public hearing.*** A public hearing shall be set, advertised and conducted by the board of appeals in accordance with article VI of this chapter.

3. ***Action by the board of appeals.*** Within thirty (30) days following the close of the public hearing, the board of appeals shall render its decision, in a manner and form specified by article VI of this chapter, granting the application for a conditional use permit, granting it subject to conditions as specified in subsection (d), or denying it. The failure of the board to act within thirty (30) days shall be deemed an approval of the conditional use permit, unless such time period is mutually extended in writing by the applicant and the board. Within five (5) days of such decision or the expiration of such period, the secretary shall mail notice of such decision or failure to act to the applicant and, if a permit is authorized, shall issue such permit, listing therein any and all conditions imposed by the board of appeals.

(c) ***Conditions for conditional uses:***

1. ***Authorized uses.*** A conditional use permit may be issued for any use denominated as a conditional use in the regulations applicable to the zone in which it is proposed to be located.

2. ***Standards.*** Upon a showing that a proposed use is a conditional use under this article, a conditional use permit shall be granted unless the board determines that:

a. There are unique or distinctive characteristics or effects associated with the proposed conditional use;

b. There will be an adverse impact upon the health, safety, or welfare of the public or the surrounding area; and

c. Such impact differs substantially from the impact which would normally occur from such a use in that zone.

(d) ***Conditions on conditional use permits.*** The board of appeals may impose such reasonable conditions upon the premises benefited by a conditional use as may be necessary to prevent or minimize adverse effects therefrom upon other property in the neighborhood. Such conditions shall be expressly set forth in the resolution authorizing the conditional use permit and in the permit. Violation of such conditions shall be a violation of this article.

(e) ***Effect of issuance of a conditional use permit.*** The issuance of a conditional use permit shall not authorize the establishment or extension of any use nor the development, construction, reconstruction, alteration or moving of any building or structure, but shall merely authorize the preparation, filing and processing of applications for any permits or approvals which may be required by the codes and ordinances of the city, including but not limited to a building permit, a certificate of occupancy, subdivision approval and site plan approval.

(f) ***Limitations on conditional use permits.*** No conditional use permit shall be valid for a period longer than six (6) months from the date of issue, or such other time as may be fixed at the time granted not to exceed two (2) years, unless the conditional use has been commenced or is issued and construction is actually begun within that period and is thereafter diligently pursued to completion; provided, however, that one (1) or more extensions of said time may be granted if the facts constituting the basis of the decision have not materially changed, and the two-year period is not exceeded thereby. A conditional use permit shall be deemed to authorize only the particular use for which it was issued and such permit shall automatically expire and cease to be of any force or effect if such use shall for any reason be discontinued for a period of twelve (12) consecutive months or more.

(g) ***Appeals from board decisions.*** Appeals from any decision of the board of appeals or, where applicable, the Planning Board respecting a conditional use permit shall be to superior court.
(Code 1968, § 602.24.D; Ord. No. 437-74, 7-1-74; Ord. No. 407-83, 2-2-83; Ord. No. 467-83, § 2, 4-20-83; Ord. No. 237-83, 10-17-83)

Sec. 14-475. Reserved.

***Editor's note**—Section 7 of Ord. No. 354-85, adopted Jan. 7, 1985, repealed § 14-475, relative to nonconforming uses, which derived from Code 1968, § 602.24.E, and Ord. No. 437-74, adopted July 1, 1974.

Sec. 14-476. Successive applications.

Whenever any application, appeal or other request filed pursuant to this article has been finally denied on its merits, a second application, appeal or other request seeking essentially the same relief, whether or not in the same form or on the same theory, shall not be brought within one (1) year of such denial unless, in the opinion of the officer or board before which it is brought, substantial new evidence is available or a mistake of law or fact significantly affected the prior denial.

(Code 1968, § 602.24.F; Ord. No. 437-74, 7-1-74)

Sec. 14-477. Violations.

In addition to any other remedies available, the board of appeals after notice and hearing may revoke any variance or other relief granted under this article when the provisions of this article or the conditions under which the relief was granted have not been complied with.

(Code 1968, § 602.24.G; Ord. No. 437-74, 7-1-74)

Sec. 14-478. - 14-482. Reserved.

***Editor's Note**—Pursuant to Council Order 280-09/10 passed on 7/19/10 Division 29 (Preservation and Replacement of Housing Units) was repealed in its entirety and replaced with a new Division 29 (Housing Preservation and Replacement).

DIVISION 29. HOUSING PRESERVATION AND REPLACEMENT

Sec. 14-483. Housing preservation and replacement.

(a) *Purpose*. The purpose of these regulations is:

1. To promote and facilitate an adequate supply of housing, particularly affordable housing for all economic groups;

2. To limit the net loss of housing units in the city;

3. To preserve housing in zones where housing is permitted for in the city for all residents in order to promote the health, safety and welfare of its citizens.

(b) ***Definitions.***

Dwelling unit. A dwelling unit is one (1) or more rooms with private bath and kitchen facilities comprising an independent self-contained dwelling unit. For purposes of this section only it also includes single family, two-family and multi-family dwellings and any dwelling units in those dwellings, or dwelling units, or rooms that people rent or sleep in within lodging houses, dormitories, shelters and sheltered care group homes.

Loss of dwelling or dwelling unit for purposes of this section means the elimination or conversion to nonresidential use of a dwelling or dwelling units; elimination includes dwelling units lost due to demolition unless the demolition resulted from accidents outside of the owner's control, fire, natural disasters, or acts of war.

Original site means the location where the demolition or conversion to non-residential use of dwellings and dwelling units will take place.

(c) ***Applicability.*** Except as otherwise provided in this section, this section shall apply to the loss of three or more dwelling units in a five year period, provided that such dwelling units were a legally registered residential use as of July 1, 2002.

Except as otherwise provided in this section, this section shall also apply to proposals that (a) result in the loss of fewer than three (3) dwelling units which were legally registered residential use as of July 1, 2002, and (b) creates surface parking.

Determination of number of the dwelling units within a strtucture or structures and the number of units lost will be based

on records in the Department of Planning and Urban Development indicating the legal, registered use of the property since July 1, 2002 through the time of application. The actual use of the preopety for purposes of applicability of this section may be rebutted by the owner by proof of documentary evidence including but not limited to photographs, letters, and swron affidavits. The Planning Authority may conduct its own investigation of the actual use and shall determine the applicability of this section based on the totality of the evidence.

(d) *Exemptions.*

This section does not apply to:

1. Consolidation, elimination or reconfiguration of one (1) or more dwelling units within an existing structure, as long as all the resulting units remain as dwelling units after such consolidation, elimination or reconfiguration, except as provided by subsection 5 below. Conversion of a dwelling unit to a hotel or motel room shall not qualify for the exemption provided by the paragraph.

   The amendments to paragraph (d)(1) approved by the City Council on June 6, 2011 shall have an effective date of April 25, 2011 but not apply to any final determination regarding the applicability of this section made by the Planning Authority prior to April 25, 2011.

2. Proposals that result in a number of units equal to or greater than the number of units lost as determined by the Planning Authority; or

3. Grandfathered dwelling units existing in zones which no longer permit residential uses.

4. Property which has been ordered demolished by the City, pursuant to 17 M.R.S.A. §2851, et seq., as amended, except where it is determined by the Building Authority that the deterioration was caused by neglect or lack of maintenance.

5. Subparagraph 1, above notwithstanding, the conversion to a non-residential use of any dwelling units located on

the ground floor of a building within a business zone.

(e) ***Site plan administrative authorization or approval required.*** Notwithstanding any other provision of this section, a person who proposes to demolish or to convert to a nonresidential use three or more dwellings or dwelling units in the City, in a zone where such use is otherwise permitted, must first obtain administrative authorization or site plan approval from the City's Planning Authority or Planning Board pursuant to Sec. 14-521, et. seq.

In addition the requirements of 14-521, et. seq., where this section is applicable, the applicant must also submit a statement certifying the number of dwelling units to be demolished or converted to nonresidential use, as well as a description of the characteristics of each of those units.

(f) ***Tenant Notification Requirements.*** Prior to elimination as a result of demolition or conversion to non-residential use, the owner shall:

1. Provide the Planning Authority a list containing the name of each tenant currently residing in the dwelling units to be demolished or converted to non-residential use, as well as verification of compliance with tenant notice requirements of this section.

2. Deliver to each tenant who occupies such a dwelling unit a written notice to vacate the unit. The notice shall either be sent by certified mail, return receipt requested, or served in-hand. The notice will grant the tenant not less than ninety (90) days from the date of receipt of the notice to vacate the unit; and

3. File proof of service of the notice with the Planning Authority.

(g) ***Housing Replacement Requirements.*** In addition to the requirements of 14-521, et. seq, the Planning Authority shall require, as a condition of approval, that an owner shall replace any dwelling units that are demolished or converted to non residential use.

This section may be satisfied in any one of the following ways:

1. Construction of Units. The construction of housing units within a new structure or a new addition either on site or off-site;

2. Residential Conversion. The conversion of a nonresidential building to residential use; or

The applicant may use either of the two methods or a combination of the two to fulfill their replacement requirement.

(h) ***Replacement Unit Requirement.*** In addition to the foregoing, all replacement units built pursuant to sub-section (g)(1) or (2) above shall:

1. Be located within the City of Portland.

2. Not previously have been on the market as of the date of application.

3. Be situated within a development which has not been a candidate for site plan approval as of the date of the application.

4. Be comparable in size to the units replaced; for the purpose of this section, "comparable in size" means that the aggregate size of the replacement units will be no less than 80% of the size of the aggregate of the original units.

(i) ***Contribution to the Housing Trust Fund.***

1. The applicant may meet the requirements of this section by depositing $50,000 for each dwelling unit into the City's Housing Trust Fund in section 14-489.

2. Beginning on January 1, 2004 and annually thereafter, the amount of the contribution shall be adjusted by multiplying this amount originally deposited for each unit by a fraction, the denominator of which shall be the "Consumer Price Index for Urban Wage Earners and Clerical Workers ("CPI-W")," U.S. City Average, "All Items Index," as published by the United States Bureau of Labor Statistics ("the Index") for January 1, 2003 Year, and the numerator of which shall

be the Index for the same month in each subsequent year. In the event that the Index is not then in existence, the parties shall use such equivalent price index as is published by any successor governmental agency then in existence; or, if none, then by such nongovernmental agency as may then be publishing an equivalent price index, in lieu of and adjusted to the Index. If the Index shall cease to use 1982-84 equals 100 as the basis of calculation, or if a substantial change is made in the terms or number of items contained in the Index, the Base Index shall be adjusted to conform to such change, using such computation thereof, if available, as shall be employed by the United States Department of Labor in computing same. Notwithstanding anything herein to the contrary, contributions made after January 1, 2004 shall not be less than the amount originally required to be deposited pursuant to sub-section (i)(1) for each rooming or dwelling unit.

(j) ***Performance Guaranty/Letter of Credit.*** Owners or affiliates must post a performance guaranty in the form of a letter of credit, or other security acceptable to the city attorney in amount equivalent to the amount the applicant would have been required to contribute to the City's Housing Trust Fund if the applicant had chosen that option pursuant to sub-section g.

(k) ***Partial waiver of replacement requirements.*** Any owner who has applied for site plan review for elimination or conversion to non-residential use of dwelling units may apply to the Zoning Board of Appeals for a partial waiver from the housing replacement requirements of this section. Such waiver may be a downward adjustment of up to fifty percent (50%) of the owner's housing replacement obligation if the owner establishes to the board's satisfaction that:

1. The proposed development is consistent with the comprehensive plan;

2. The proposed development provides significant value and benefit to the immediate and surrounding neighborhood, including, but not limited to, community enhancement, social benefits or job creation;

3. The applicant demonstrates with objective evidence that

the imposition of the requirements of this section would impose such an economic burden upon the project relative to its scope that it renders the project impossible to develop; and

4. The requested relief does not constitute a grant of a special privilege inconsistent with the limitations upon similar properties.

The Zoning Board of Appeals must make positive findings on each of the four (4) criteria above in order for any such adjustment to be valid. An applicant aggrieved of a decision of the Zoning Board of Appeals may appeal a decision under this sub-section pursuant to Sec. 14-553 of the City Code.

(l) *Effect of Other City Ordinances*.

1. *Historic Preservation*. Nothing in this division shall permit the demolition or conversion to non-residential use, of dwelling units in residential property protected by the Historic Preservation Ordinance (Sections 14-601, et seq.), except as permitted by that ordinance.

2. *Conditional Zone*. A conditional zone may not be used to circumvent the application of this section. The terms of this section shall apply to any conditional zone which involves dwelling units affected by this section. Notwithstanding the foregoing, nothing herein shall be deemed to prevent the City and the applicant from agreeing to terms which exceed those imposed by this section by means of a conditional zone.

(m) *Appeals*. Any applicant aggrieved by a decision of the Planning Authority under this section may appeal to the Zoning Board of Appeals within 30 days of that decision.
(Ord. No. 27-02/03, 10-7-02; Ord. No. 280-09/10, 7-19-10; Ord. No. 241-10/11, 6-6-11)

DIVISION 30. INCENTIVES FOR AFFORDABLE HOUSING

Sec.14-484. Purpose.

The city believes that it is in the public interest to promote an adequate supply of affordable housing for its residents. The purpose of this division therefore is to offer

incentives to developers to include units of affordable housing within development projects, thereby mitigating the impact of market rate housing construction on the limited supply of available land for suitable housing, and helping to meet the housing needs of all economic groups within the city. The city believes that this division will assist in meeting the city's comprehensive goals for affordable housing, in the prevention of overcrowding and deterioration of the limited supply of affordable housing, and by doing so promote the health, safety and welfare of its citizens.
(Ord. No. 98-06/07, 12-4-06)

Sec. 14-485. Definitions.

Affordable housing unit for rent means a dwelling unit for which:

(a) The rent is affordable to a household earning 80% or less of the U.S. Department of Housing and Urban Development moderate-income figure for metropolitan Cumberland county Maine for a household of that size; and

(b) Annual rent increases for that unit are limited in perpetuity by deed restriction or other legally binding agreement to the percentage increase in the U.S. Department of Housing and Urban Development moderate-income figure for metropolitan Cumberland county Maine for a household of that size.

Affordable housing unit for sale means a dwelling unit for which:

(a) The sale price is affordable to a household earning 120% or less of the U.S. Department of Hou7sing and Urban Development moderate-income figure for metropolitan Cumberland county Maine for a household of that size; and

(b) The resale price is limited by deed restriction or other legally binding agreement for all future sales of the unit to an amount that is affordable to a household earning 120% of the U.S. Department of Housing and Urban Development moderate-income figure for metropolitan Cumberland county Maine for a

household of that size, as calculated for the year in which the sale takes place.

Development fees means:

(a) The following fees, as described in this chapter: site plan review and inspection fees; subdivision review and inspection fees; and administrative fees; and

(b) Construction and permit fees as described in chapter 6. "Development fees" does not include any fees charged for reviews conducted by a party other than the city.

Dwelling unit has the same meaning as that term is defined in section 14-47.

Eligible project means a development project:

(a) That is permissible under the provisions of this chapter in the zone in which it is proposed;

(b) That will be a multi-family dwelling ,as defined in section 14-47, and will not be located in an R-1 or R-2 zone;

(c) Reserve; and

(d) That creates new dwelling units, among which is at least one affordable housing unit for rent or sale, through new construction, substantial rehabilitation of existing structures, adaptive reuse or conversion of a non-residential use to residential use, or any combination of these elements. Affordable housing units for sale or rent may not differ in exterior design from other units within an eligible project.

(Ord. No. 98-06/07, 12-4-06; Ord. No. 84-08/09, 10-20-08)

Sec. 14-486. Reduction of fees.

Notwithstanding any other provision of this chapter or chapter 6 to the contrary, development fees shall be reduced by the city for an eligible project in the manner described in the following table:

Percentage of new units that	**Percentage discount of**

are affordable units	development fees
5% up to but not including 10%	5% reduction
10% up to but not including 15%	10% reduction
15% up to but not including 20%	15% reduction
20% up to but not including 25%	20% reduction
25% or more	25% reduction

(Ord. No. 98-06/07, 12-4-06)

Sec. 14-487. Priority review.

The planning division shall perform its review of an eligible project in as expedited a manner as is practical, without impairing the scope or thoroughness of the review. The planning division may adopt administrative procedures to prioritize review of eligible projects and facilitate this expedited review.

The planning board shall make its best efforts to give priority in scheduling workshops and public hearings related to any plans or applications required for an eligible project that are within the planning board's jurisdiction, without impairing the scope or thoroughness of its review. At the conclusion of these public meetings, the planning board shall promptly issue a decision on all such plans and applications before it for consideration.

(Ord. No. 98-06/07, 12-4-06)

Sec. 14-488. Density, parking and dimensional bonuses and reductions.

Notwithstanding any other provision of this chapter to the contrary:

(a) *Density bonuses.* The maximum number of units that would otherwise be allowed under this chapter shall be increased for an eligible project in the manner described in the following table:

Percentage of new units that are affordable units	Percentage increase in maximum number of units allowed

5% up to but not including 10%	5% increase
10% up to but not including 15%	10% increase
15% up to but not including 20%	15% increase
20% up to but not including 25%	20% increase
25% or more	25% increase

(b) Off-street p*arking.* Off-street parking is required as provided in Division 20 (off-street parking) of this article.

(c) *Building height bonus.* The maximum structure height for an eligible project building:

1. That is located in a B-2 or B-2b community business zone;

2. That contains five (5) or more dwelling units; and

3. Of which 20% or more of new dwelling units created are affordable units for rent or sale, is an additional ten feet above the maximum structure height that would otherwise apply to the building pursuant to this chapter.

The total height of the eligible project, including any bonus received pursuant to this subsection, may not exceed the maximum height recommended for the location of the project pursuant to a height study that has been adopted as part of the city's comprehensive plan.

(Ord. No. 98-06/07, 12-4-06; Ord No. 240-09/10, 6-21-10)

DIVISION 31. HOUSING TRUST FUND

Sec. 14-489. Housing trust fund.

(a) *Purpose.* The purpose of enacting this section is:

1. To establish a City of Portland housing trust fund for the promotion, retention and cration of an adequate

supply of housing, particularly affordable housing, for all economic groups and to limit the net loss of housing units in the City.

2. To serve as a vehicle for addressing very low, low, and median income housing needs through a combination of funds as set out in section 14-483 of this chapter.

(b) ***Definitions.***

Very low income household. A household having an income not exceeding fifty (50%) percent of median income for area of residence as set forth in regulations promulgaged from time to time by the United States Department of Housing and Urban Development pursuant to 42 U.S.C. section 1437 et seq.

Low income household. A household having an income not exceeding eighty (80%) percent of median income for area of residence as set forth in regulations promulgated from time to time by the United States Department of Housing and Urban Development pursuant to 42 U.S.C. sections 1437 et seq.

Moderate income household. A household having an income not exceeding one hundred twenty (120%) percent of median income for area of residence as set forth in regulations promulgated from time to time by the United Sates Department of Housing and Urban Development pursuant to 42 U.S.C. sections 1437 et seq.

(c) ***Establishment of the housing trust fund.*** The city council shall establish a special revenue account under the name "City of Portland Housing Trust Fund." Deposits into the fund shall include:

1. Contributions from the city's housing replacement ordinance under 14-483(i);

2. Funds appropriated to be deposited into the fund by vote of the city council;

3. Voluntary contributions of money or other liquid assets to the fund;

4. Any federal, state or private grant or loan funds provided to the fund:

5. Interest from fund deposits and investments; and

6. Repayments of loans made from the fund.

(d) ***Management of the trust fund.*** The city manager, or his or her designee, shall serve as the manager of the housing trust fund. The responsibilities of the manager, subject to the orders of the city council, shall include:

1. Maintaining the financial and other records of the housing trust fund;

2. Disbursing and collecting housing trust fund monies in accordance with the housing trust fund annual plan; and

3. Monitoring the use of monies distributed to successful applicants for housing trust fund support to assure on-going compliance with the purposes of the fund and the conditions under which these monies were granted or loaned.

(e) ***Housing trust fund annual plan.*** Each fiscal year, the city council shall adopt a housing trust fund annual plan. The city manager shall submit to the city council a recommended housing trust fund annual plan, utilizing the revenues of the housing trust fund as well as any other funds the manager may propose as appropriate. The housing committee of the city council or such other committee as the council shall designate shall conduct public hearings on the recommended plan and refer the matter to the council for action.

The housing trust fund annual plan shall include:

1. A description of all programs to be funded in part or in full by the housing trust fund;

2. A description of how funds from the housing trust fund will be distributed among very-low-income, low-income and moderate income households; and

3. The amount of funds budgeted for programs funded in part or in full from the housing trust fund.

Priority for the expenditure of funds collected pursuant to the housing replacement ordinance (see Sec. 14-483) shall be

given to the creation of new housing stock, through either new construction or conversion of non-residential buildings to residential use.

(f) *Distribution and use of the housing trust fund's assets.*

1. All distribution of principal, interest or other assets of the housing trust fund shall be made in furtherance of the public purposes set out in section 14-483.

2. During each year, the housing trust fund shall disburse as grants or loans so much of the housing trust fund's assets as the city council in its discretion has approved in the housing trust fund annual plan.

3. Funds shall not be used for city administrative expenses.

4. Funds shall not be used for property operating expenses or supporting services.

5. No grants or loans shall be awarded by the housing trust fund to corporations, partnerships or individuals who are delinquent, at the time of application in the payment of property taxes or other fees to the city of Portland, who Have been convicted of arson, who have been convicted of discrimination in the sale or lease of housing under the fair housing laws of the State of Maine, or who have pending violations of current city electrical, plumbing building or housing codes or zoning ordinances.

(g) *Term of affordability.*

1. Whenever funds from the housing trust fund are used for the acquisition, construction or substantial rehabilitation of an affordable rental or cooperative unit, the City of Portland shall impose enforceable requirements on the owner of the housing unit that the unit remain affordable for the remaining life of the housing unit, assuming good faith efforts by the owner to maintain the housing unit and rehabilitate it as

necessary. The remaining life of the housing unit shall be presumed to be a minimum of thirty (30) years.

2. Whenever funs from the housing trust fund are used for the acquisition, construction or substantial rehabilitation of ownership housing, the city of Portland shall impose enforceable resale restrictions on the owner to keep the housing unit affordable for the longest feasible time, while maintaining and equitable balance between the interests of the owner and the interests of the city of Portland.

3. The affordability restriction requirements described in this section shall run with the land and the city of Portland shall develop appropriate procedures and documentation to enforce these requirements and shall record such documentation in the Cumberland County Registry of Deeds.

(Ord. No. 281-09/10, 7-19-10)

Sec. 14-490. Reserved.

ARTICLE IV. SUBDIVISIONS*

***Cross reference(s)--**Ordinances dedicating or accepting any plat or subdivision in the city saved from repeal, § 1-4(h).

State law reference(s)--Land subdivisions, 30-A M.R.S.A. § 4403.

Sec. 14-491. Authority and purpose.

This article is adopted pursuant to the terms and provisions of 30-A M.R.S.A. Sections 3001 and 4403, as amended. The purpose of this article is to provide for the harmonious and economic development of the city; for the orderly subdivision of land and its development; for the orderly development of the general area surrounding such subdivision; for the coordination of streets within the general area; for adequate provisions for drainage, flood control, light, air and other public purposes; for the adequate and proper installation of streets, drainage, sanitary sewers, water and other utilities and facilities; for the dedication to the city of land for streets, alleys or other public

purposes or the transfer to the city of easements or other rights or privileges; for the reservation for the city of land to be acquired for public facilities; and to protect public safety.
(Code 1968, § 603.1; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79; Ord. No. 155-89, § 1, 11-20-89)

Sec. 14-492. Jurisdiction.

This article shall govern each and every subdivision of land within the limits of the city unless specifically exempted in section 14-508. When application is made for the resubdividing of a previously recorded subdivision under the provisions of these regulations, it shall be treated as a new subdivision provided the applicant is the owner of rights in the recorded subdivision.
(Code 1968, § 603.3; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79)

Sec. 14-493. Definitions.

The following words and phrases, when used in this article, shall have the meanings respectively ascribed to them:

Alley shall mean any way designed primarily for vehicular or utility access to the back or side of premises otherwise abutting on a street, except driveways unless officially designated otherwise.

Easement shall mean a right, privilege or liberty which one has in land owned by another for some special and definite purpose.

Engineer shall mean a registered professional engineer in good standing with the state board of registration for engineers.

Esplanade shall mean that portion of a street right-of-way which is located between the curbline and the edge of the sidewalk closest to the street.

Freshwater wetland shall mean freshwater swamps, marshes, bogs and similar areas which are:

(a) Inundated or saturated by surface or groundwater at a frequency and for a duration sufficient to support, and which under normal circumstances do support, a prevalence of wetland vegetation typically adapted for life in saturated soils; and

(b) Not considered part of a great pond, coastal wetland, river, stream or brook.

These areas may contain small stream channels or inclusions of land that do not conform to the criteria of this subsection.

Land development plan shall mean any part or element of the land development plan for the city as adopted by city council resolution No. 540 of 1974, as amended.

Lot shall mean a parcel or portion of land in a subdivision or plat of land, separated from other parcels or portions by description as on a subdivision of record or survey map or by metes and bounds, for the purpose of sale or lease to another.

Nonresidential subdivision shall mean a subdivision which is not intended for human habitation, such as a commercial or industrial subdivision.

Performance guarantee shall mean a letter of credit or escrow account in an amount and form meeting the requirements of section 14-501.

Planned unit development shall mean a residential subdivision consisting of attached dwellings or a series of attached dwellings intended for separate ownership, with open spaces, recreational areas, access ways and buildings which are designed, built and controlled in accordance with a unified development plan.

Recording plat shall mean the completed subdivision plat in form for approval and recording.

Roadway shall mean that portion of a street between the regularly established curblines, or that part of a street or alley devoted to vehicular traffic.

Sidewalk shall mean that portion of a street not included in the roadway, and devoted in whole or part to pedestrian traffic.

Sketch plan shall mean a very simple layout to show the location of the subdivision to gain informal comments of city staff.

Street shall mean a public way for vehicular and pedestrian traffic, whether designated as a street, highway, thoroughfare,

parkway, throughway, road, avenue, boulevard, land, place or however otherwise designated, excepting, however, an alley.

(a) ***Arterial street*** shall mean a heavily traveled street of considerable continuity used primarily as a traffic artery among large areas.

(b) ***Collector street*** shall mean a nonarterial street which carries traffic from a minor street to arterial streets, including the principal entrance to streets of a residential development and streets for circulation within such a development.

(c) ***Marginal access street*** shall mean a minor street which is adjacent to and substantially parallel with an arterial street and which provides access to abutting properties and protection from through traffic.

(d) ***Minor street*** shall mean a street which services one (1) or more minor streets used primarily for access to abutting properties.

(e) ***Cul-de-sac or dead-end street*** shall mean with only one (1) outlet.

Subdivider or applicant shall mean any individual, firm, association, syndicate, partnership, corporation, trust or any other legal entity commencing proceedings under these regulations to effect a subdivision of land hereunder for himself or for another.

Subdivision shall mean the division of a lot, tract or parcel of land into three (3) or more lots, including lots of forty (40) acres or more, within any five-year period whether accomplished by sale, lease, development, buildings or otherwise and as further defined in 30-A M.R.S.A. Section 4401. The term subdivision shall also include the division of a new structure or structures on a tract or parcel of land into three (3) or more dwelling units within a five-year period and the division of an existing structure or structures previously used for commercial or industrial use into three (3) or more dwelling units within a five-year period. The area included in the expansion of an existing structure is deemed to be a new structure for the purposes of this paragraph. A dwelling unit shall include any part of a structure which, through sale or lease, is intended for human habitation, including

single-family and multifamily housing condominiums, time-share units and apartments.

Subdivision plat shall mean a plan of the proposed subdivision for presentation to the Planning Board and the public.

Surveyor shall mean a qualified registered surveyor of good standing with the state board of registration.

Tract (or parcel) of land shall mean all contiguous land in the same ownership, provided that lands located on opposite sides of a public or private road shall be considered each a separate tract or parcel of land unless such road was established by the owner of land on both sides thereof.

Vicinity sketch shall mean a sketch of the proposed subdivision location, not necessarily drawn to scale, showing the proximity of the subdivision to surrounding streets and highways.
(Code 1968, § 603.5; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79; Ord. No. 127-87, § 1, 2-18-87; Ord. No. 247-88, 11-28-88; Ord. No. 155-89, § 2, 11-20-89; Ord. No. 25-11/12, 8-15-11)

Cross reference(s)--Definitions and rules of construction generally, § 1-2.

Sec. 14-494. Guidance to subdivider.

The purpose of the preapplication procedure is to afford the subdivider an opportunity to avail himself of the advice and assistance of the Planning Board, and to consult early and informally with the board staff before preparation of the subdivision plat and before formal application for its approval, to insure the development of a subdivision plan with mutual benefits for the subdivider and the city.
(Code 1968, § 603.2; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79)

Sec. 14-495. Procedure for approval of a subdivision.

(a) *Application for approval:*

1. To obtain approval of a proposed subdivision the subdivider or applicant shall prepare for the Planning Board a subdivision plat, a vicinity sketch, and a recording plat in accordance with the requirements and standards established by this article.

2. The sketch plan may be prepared for staff and Planning

Board review if desired by the applicant prior to formal submission of the subdivision plat.

3. The subdivider shall supply and submit five (5) copies of the complete subdivision plat and the vicinity sketch to the office of the planning authority at least fifteen (15) days prior to a regularly scheduled meeting of the Planning Board, to be in order for consideration by the board at the meeting.

4. The planning authority shall forward a copy of the subdivision plat and vicinity sketch to the public works authority, parks authority, fire department and building authority, all of which shall submit recommendations to the planning authority by the time of the initial hearing on the subdivision plat.

5. Prior to the date upon which the planning authority meets to consider the subdivision plat the applicant shall pay all costs incurred in providing public notice. The planning authority shall determine the amount of this fee based on the actual costs incurred in newspaper advertising and postage, and shall also be responsible for collecting and accounting for such fee. Public notice in the form of newspaper advertisement shall be provided as required under 14-32.

6. Notice shall be provided in accordance with section 14-32. Notice shall also be sent to the clerk and the reviewing authority of municipalities that abut or include any portion of a proposed subdivision.

7. The city council may from time to time establish by order reasonable application fees to defray the costs of reviewing subdivisions.

(b) ***Timing of subdivision review:*** A public hearing shall be commenced within thirty (30) days following the receipt of a complete subdivision application. The staff shall notify the applicant in writing either that the application is complete or, if it is determined to be incomplete, the specific additional materials needed to make it a complete application. The Planning Board shall render its decision on any application submitted to it within sixty (60) days following receipt of a complete application, or such other time as may be mutually agreed to by the Planning

Board and the applicant.

(c) ***Engineering requirements:***

1. The applicant shall furnish the public works authority with all engineering data and plans necessary for the completion of the required improvements, as enumerated in section 14-496(b). Such plans may be furnished apart from but at the same time as the subdivision plat and vicinity sketch and shall be certified by a registered professional engineer.

2. The public works authority shall review the plans submitted as required in subsection (c)(1) above and shall approve, approve conditionally, or disapprove same within ten (10) days of submission as to whether such plans are in conformance with the standards set forth in this article.

(d) ***Subdivision plat approval:*** The Planning Board shall approve, approve conditionally or disapprove such subdivision plat at a public meeting. If approved conditionally, the conditions and reasons shall be stated and given in writing to the subdivider and, if necessary, the Planning Board may require the subdivider to submit a revised subdivision plat. If the Planning Board should disapprove the subdivision plat, the reasons for such action shall be stated and given in writing to the subdivider, and the board may state the conditions under which the proposed subdivision would be approved. One (1) copy of the subdivision plat as acted upon by the Planning Board shall be retained in its office, one (1) copy forwarded to the public works authority and one (1) copy returned to the subdivider.

(e) ***Effect of subdivision plat approval:*** Receipt of the approved copy of the subdivision plat of the subdivider is not authorization that he may proceed with the construction of any improvements. No construction will proceed until the recording plat has been approved by the Planning Board and has been properly recorded as required hereinafter in subsection (g).

(f) ***Recording plat approval:***

1. The applicant shall submit the recording plat and five (5) copies thereof to the planning authority at least fifteen (15) days prior to the date of the meeting of the

Planning Board at which it is intended to be considered, which copies shall be distributed as hereinafter provided.

2. Consideration of the recording plat, however, shall not take place until approvals required in subsections (c) and (d) are obtained.

(g) ***Recording:***

1. When the recording plat is approved, the subdivider shall pay the actual cost of recording and reproducing five (5) copies of the plat, one (1) of which shall be on mylar for the public works authority records.

2. The recording plat shall be recorded in the office of the county registry of deeds by the subdivider.

3. The registry book and page numbers will then be recorded on the five (5) copies of the plan, of which one (1) shall be kept at the office of the Planning Board, one (1) sent to the building authority, one (1) copy on mylar sent to the public works authority, one (1) to the assessor's office and one (1) to the subdivider.

4. Unless the subdivider shall record his or her approved recording plat within three (3) years after the Planning Board has approved the subdivision plat, the recording plat approval shall become null and void. The preceding sentence notwithstanding, if the Planning Board's initial approval of a subdivision is based in part upon the granting of a variance from any of the applicable subdivision approval standards, no such variance shall be valid unless that fact shall be expressly noted on the face of the recording plat and shall be noted in a certificate, each of which shall conform to 30-A M.R.S.A. Section 4406, and such recording plat or such certificate or both of them are recorded in the Cumberland County Registry of Deeds within ninety (90) days of final subdivision approval.

(h) ***Sectional recordings:*** Following subdivision plat approval, the Planning Board may permit the subdivision to be divided into two (2) or more sections for recording purposes subject to any conditions that the board deems necessary in order

to insure the orderly development of the plan. The applicant may seek approval of and record a sectional recording plat with the county registry of deeds only if the section constitutes at least twenty (20) percent of the total number of lots contained in the approval plat and, in addition, shows the entire tract or parcel. In these circumstances, if the first section of the plat has been recorded within three (3) years after Planning Board approval, subdivision plat approval of the remaining sections of the plat shall remain in effect for five (5) years after Planning Board approval.

(Code 1968, § 603.6; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79; Ord. No. 692-81, 5-18-81; Ord. No. 123-85, 10-7-85; Ord. No. 127-87, §§ 2--4, 2-18-87; Ord. No. 94-88, 7-19-88; Ord. No. 155-89, §§ 3, 4, 11-20-89; Ord. No. 227-01, 4-2-01)

***Editor's note--**Ord. No. 94-88, adopted July 19, 1988, amended § 14-495(g)(4) to read as herein set out. See also the editors note to Art. III of this chapter for additional provisions relative to Ord. No. 94-88.

Sec. 14-496. Plat requirements.

Each and every modification of the information required to be shown on the plat in this section shall be applied for in writing by the subdivider. The decision of the Planning Board on such request shall be final.

(a) *Information on subdivision plat.* The following information shall be shown on one (1) subdivision plat unless otherwise indicated:

1. Date, north point, title and graphic scale. Scale shall not be more than sixty (60) feet to the inch unless lots are more than an acre, but in no event more than one hundred (100) feet to the inch;

2. Based on a recent survey by the subdivider, existing contours at two (2) feet intervals or as otherwise required by the public works authority. Existing structures which are to remain will be delineated;

3. Names of proposed streets, width of rights-of-way, and typical cross section reservation, and depth of construction materials;

4. Locations, widths and purposes of other rights-of-way or easements to be recorded;

5. All appropriate street curve information, including point of curvature, point of tangency, tangent distance, radii and interior angle, in standard engineering format;

6. Location of those utilities existing on or adjacent to the tract to be subdivided, including size and elevation of buried or underground utilities (may be shown on separate plan);

7. Tract boundary lines and property lines of lots, with accurate dimensions and either bearings or deflection angles. All lots shall be numbered;

8. Names of adjacent property owners with parcels over twenty-five thousand (25,000) square feet or names of adjacent subdivision;

9. Designation of flood hazard areas, as defined by the National Flood Insurance Program and shown on the city flood hazard boundary map, as well as any other areas in the subdivision subject to inundation by storm water or storm sewer overflow;

10. Existing historic sites and structures which either appear on the National Register or are nominated to the National Register by the state historic preservation officer;

11. Proposed private and public utility system including water, gas, telephone, fire hydrants, and any other services which shall supply the area (may be shown on separate plan);

12. Sanitary sewer and storm drain plans and profiles showing size, kind and slope of pipe, proposed manhole rim and invert elevations and catch basin locations and drains (may be shown on separate plan);

13. Lighting plan showing the location, design, height

and spacing from each other of the support poles, in accordance with standards and specifications established by the public works authority (may be shown on separate plan);

14. Tree plan showing groups of existing, sizeable trees which the subdivider intends to preserve (may be shown on separate plan);

15. A detailed plan of the entire subdivision and the immediate vicinity showing all existing and proposed drainage both on and off-site including drainage swales, ditches, etc., with directional flow arrows and approximate slope grades, and showing proposed finished "spot elevations" around the perimeter of the subdivision. Proposed drainage shall be shown as it may affect or restrict development on individual lots and with reference to improvements for which a performance guarantee is required under this article. Where deemed feasible by the public works authority, proposed finished contours at intervals of two (2) feet shall be provided on the drainage plan upon request (may be shown on separate plat):

16. Location and designation of any zoning district boundaries affecting the subdivision:;

17. All future phases and sections of the subdivision proposed by the subdivider (may be shown on separate plat);

18. Proposed parks and school sites, or other public open space that the developer proposes to convey to the city;

19. Names and addresses of registered professional engineer, subdivider and owner:

20. At the option of the subdivider, any other information that may be necessary for the full and proper consideration of the subdivision shall be submitted in writing;

21. Streets and right-of-way monuments and property

line markers;

22. Vicinity sketch, as defined in section 14-493 (may be shown on separate plan);

23. Total site data, including total area of the subdivision, total area in streets, total area in recreation or open space and number of house lots;

24. Additional submission items if required by the Planning Board and insofar as feasible (may be shown on separate sheets or by other appropriate method):

    a. When private sewage systems are used, the results and supporting data of a soil test of each lot in the subdivision conducted by a soil evaluator licensed in the state;

    b. When the adequacy of the subdivision's load bearing capacity is in question, the results and supporting data of test borings conducted by a professional engineer registered in the state;

    c. When conditions warrant, a program which shall be implemented by the subdivider to control dust, erosion and sedimentation and/or vehicular traffic during construction;

    d. Evidence of the applicant's financial capability to carry out all phases of the proposed development;

    e. Evidence of state and federal approvals, licenses or permits required by law, or the status of applications therefor;

    f. Price range of houses that will be built in the subdivision;

    g. Traffic impact analysis;

    h. High intensity soil survey, if required by the planning authority;

i. Evidence of technical capacity to undertake the development;

j. Types and estimated quantities of solid waste to be generated by the development;

k. Construction plan outlining the anticipated sequence of construction of the major features of the project including without limitation roads, retention basins, sewer lines, seeding and other erosion and sedimentation control measures, and pollution abatement measures and also setting forth the approximate dates for commencement and completion of the project;

l. A narrative and a plan showing all proposed buffer strips, their dimensions, and maintenance plans and responsibilities; and

m. A description of any wetlands, wildlife and fisheries habitats, archaeological sites or unusual natural areas located on or near the project site and a description of the methods that will be used to protect such areas.

n. Where submission drawings are available in electronic form, the applicant shall submit any available electronic CADD.DXF files with final plans.

(b) ***Recording plat.*** The recording plat shall be an original ink drawing on linen or mylar, or as necessary to be acceptable to the registry of deeds, and shall be tied to an accepted street or to a proposed street under construction and bonded to insure construction. This plat also shall show the following:

1. Title, date, graphic scale, north arrow, name, signature and registration number or seal of a registered land surveyor licensed in the state, name and address of developer and owner;

2. Tract boundary lines and property lines of lots, with accurate dimensions and either bearings or

deflection angles. All lots shall be numbered;

3. All appropriate street curve information, including point of tangency, tangent distance, radii and interior angles, in standard engineering form;

4. Street names, width of street rights-of-way and typical cross section showing only surface dimensions of roadway pavement, esplanade and sidewalk reservation;

5. Street and right-of way monuments and property markers. Iron pipes shall be designated by a small circle at the point of installation;

6. Locations, dimensions and purposes of any easement or right-of-way;

7. Purpose for which sites, other than residential lots, are dedicated or reserved; it being understood that any reservations of areas shall be subject to the proper zoning thereof;

8. Reference to recorded subdivision plats of adjoining platted land by book and page number;

9. Space for the signatures of the Planning Board and date of approval;

10. Where required by 30-A M.R.S.A. Section 4406, the fact that initial approval or subsequent amendment of a subdivision is based in part upon the granting of a variance from any of the applicable subdivision approval standards.

(c) ***Alterations to an approved plot.*** The planning authority may approve alterations to an approved recording plat when all of the following conditions are met; otherwise, a new subdivision plat must be submitted to the Planning Board:

1. The rearrangement of lot lines does not increase the number of lots within a block or other subdivision unit or area;

2. The alteration will not affect any street, alley, utility easement or drainage easement;

3. The alteration meets all of the minimum requirements of this article, article III of this chapter on zoning and other applicable state and local codes:

4. The alteration is approved by the public works authority and the fire department.

Such approved alterations shall be properly recorded in the registry within thirty (30) days thereof or they shall be null and void. Recording of approved alterations also shall be in accordance with the requirements of 30-A M.R.S.A. Section 4406.

(d) ***Vacation of plats.*** Any such plat recorded, or any portion thereof, may be vacated with the consent of the city council as follows:

1. At any time before the sale of any lot therein, by written instrument, signed by the city and the owners of such subdivision, declaring the same to be vacated and describing therein the part or portion to be so vacated.

2. At any time after the sale of any lot therein and by written instrument, signed by the city and all owners of record of lots shown on the plat, declaring the same to be vacated and describing therein the part or portion to be so vacated.

Any instrument so executed vacating all or a portion of any plat shall be duly filed and recorded in the county registry of deeds. The execution and recording of the instrument described in subsection (d)2 above shall vest fee simple title to the centerline of the street, alley or easement for public passage so vacated in the owners of abutting properties. Title to property located within the vacated streets, alleys or easements for public passage shall pass to abutting property owners free and clear of any rights of the public or other owners of lots shown in the plan, but subject to the rights of the owners of any public utility installations which have

been previously erected therein.

(Code 1968, § 603.7; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79; Ord. No. 127-87, §§ 5, [12], 2-18-87; Ord. No. 95-88, §§ 1, 2, 7-19-88; Ord. No. 155-89, § 5, 11-20-89; Ord. No. 177-93, §§ 1, 2, 1-4-93; Ord. No. 165-97, 1-6-97)

***Editor's note--**Ord. No. 95-88, adopted July 19, 1988, amended subsections (b) and (c) of this section to read as herein set out. See also the editor's note to Art. III of this chapter for additional provisions relative to Ord. No. 95-88.

Sec. 14-497. General requirements.

(a) ***Review criteria.*** When reviewing any subdivision for approval, the Planning Board shall consider, among others, the following review criteria and before granting approval shall determine that the proposed subdivision:

1. Will not result in undue water or air pollution. In making this determination it shall at least consider the elevation of land above sea level and its relation to the flood plains, the nature of soils and subsoils and their ability to adequately support waste disposal; the slope of the land and its effect on effluents; the availability of streams for disposal of effluents; the conformity to the applicable state and local health and water resources regulations;

2. Has sufficient water available for the reasonably foreseeable needs of the subdivision;

3. Will not cause unreasonable burden on an existing water supply;

4. Will not cause unreasonable soil erosion or reduction in the capacity of the land to hold water so that a dangerous or unhealthy condition may result;

5. Will not cause unreasonable highway or public road congestion or unsafe conditions with respect to use of the highway or public roads existing or proposed;

6. Will provide for adequate sanitary waste and storm water disposal and will not cause an unreasonable burden on municipal services if they are utilized;

7. Will not cause an unreasonable burden on the ability of the city to dispose of solid waste and sewage if municipal services are to be utilized;

8. Will not have an undue adverse effect on the scenic or natural beauty of the area, aesthetics, historic sites, significant wildlife habitat identified by the department of inland fisheries and wildlife or by the city, or rare and irreplaceable natural areas or any public rights for physical or visual access to the shoreline. For subdivisions within historic districts designated pursuant to article IX of this chapter, the Planning Board shall apply the standards of section 14-651(c) of article IX. The Planning Board may request that the historic preservation committee prepare an evaluation of the proposed subdivision based upon the standards of section 14-651(c);

9. Is in conformance with the land development plan or its successor;

10. The subdivider has adequate financial and technical capacity to meet the standards of this section;

11. Whenever situated, in whole or in part, within the watershed of any pond or lake or within two hundred fifty (250) feet of any wetland, great pond or river as defined in Title 38, chapter 3, subchapter I, article 2-B, will not adversely affect the quality of such body of water or unreasonably affect the shoreline of such body of water;

12. Will not, alone or in conjunction with existing activities, adversely affect the quality or quantity of groundwater;

13. Is or is not in a flood-prone area, based on the Federal Emergency Management Agency's Flood Boundary and Floodway Maps and Flood Insurance Rate Maps, and information presented by the applicant. If the subdivision, or any part of it, is in such an area, the subdivider shall determine the 100-year flood elevation and flood hazard boundaries within the subdivision. The proposed subdivision plan must include a condition of plan approval requiring that principal structures in the subdivision will be constructed with their lowest floor,

including the basement, at least one (1) foot above the 100-year flood elevation;

14. All potential wetlands within the proposed subdivision shall be identified on any maps submitted as part of the application, regardless of the size of those wetlands. Any mapping of wetlands may be done with the help of the local soil and water conservation district; and

15. Any river, stream or brook within or abutting the proposed subdivision shall be identified on any maps submitted as part of the application. For purposes of this section, "river, stream or brook" has the same meaning as in Title 38 M.R.S.A. Section 480-B, subsection 9.

(b) ***Burden of proof.*** In all instances the burden of proof shall rest upon the person proposing the subdivision.

(c) ***Conformity with Code.*** Any proposed subdivision shall be in conformity with all relevant provisions of this Code.

(d) ***Reserved.***

(e) ***Construction records and inspection.***

1. The project engineer and city engineer shall have the right to enter and inspect the construction site during all phases of the project to ensure compliance with this article.

2. After approval of the subdivision plat and prior to the construction of any of the subdivision's public improvements, the subdivider shall supply the city engineer with a complete set of engineering drawings on mylar or linen showing all streets, sanitary sewers and surface water drains and all appurtenant work within the subdivision.

3. The subdivider shall provide the project engineer with a complete and accurate list of any changes from the engineering drawings as approved by the Planning Board prior to the release of the performance bond.

(Code 1968, § 603.8; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79; Ord. No. 127-87, §§ 6, [13], 2-18-87; Ord. No. 155-89, § 6, 11-20-89; Ord. No. 15-92,

Sec. 14-497.5. Adjustment of dimensional requirements for subdivisions in the R-3 zone.

Notwithstanding section 14-90 and any other section of this chapter, up to twenty-five (25) percent of the lots in a subdivision located in the R-3 zone may have reduced street frontage and/or lot widths, provided that the Planning Board finds as part of subdivision approval that the following standards are met:

(a) The subdivision is approved for the first time on or after December 1, 1997;

(b) The subdivision has a minimum land area of three (3) acres;

(c) The fire department determines that the reduced street frontage is adequate to provide access required to provide emergency services to each lot; and

(d) A lot with reduced lot width shall meet all required setbacks.

(Ord. No. 165-97, § 6, 12-1-97)

Sec. 14-498. Technical and design standards.

(a) *Adoption and amendment of standards:* The public services authority and the planning authority may promulgate technical and design standards for subdivisions and site plans. Such technical and design standards or any amendments thereto shall become effective only upon approval of the Planning Board following a public hearing before the Planning Board. In approving the technical and design standards, the Planning Board may direct staff to make changes with respect to format and text but, to the extent that standards are based upon sound engineering practice, shall not direct changes in the standards themselves. Such standards shall be additional to and consistent with the provisions of this article and shall be necessary and reasonable and shall be in accord with sound engineering practice. The public services authority and planning authority shall maintain for public inspection current copies of the effective standards.

(b) *Street plan:*

1. All streets shall be platted along contour elevations which result in minimum grades and greatest visibility whenever practicable, with consideration given for anticipated use of the land.

2. The proposed street layout shall be coordinated with the street system of the surrounding areas. All streets must provide for the continuation or appropriate projection of streets in surrounding areas and provide means of ingress and egress for surrounding acreage tracts.

   When connecting streets within residential neighborhoods, new streets shall contribute to a neighborhood street system characterized by a network of interconnected streets, which minimizes through-traffic in residential neighborhoods. The layout of subdivision lots, streets, and pedestrian ways shall promote multiple paths of travel to get to destinations within and between neighborhoods by foot and bicycle, as well as auto.

   The interconnection of new and existing streets is further subject to the following provisions to minimize and mitigate through-traffic in residential neighborhoods:

   a. Where a determination is made that a proposed street connection will result in substantial increases in traffic volume and speed on the effected public streets, the planning board may require appropriate traffic calming solutions as set forth in the traffic calming ordinance. (Section 28-250) The department of public services (DPS) may by regulation and amendment to the ***Technical Manual*** establish standards for determining what is a "substantial increase in traffic volume and speed"; and

   b. In any circumstances where a street connection is allowed, the planning board may condition subdivision approval to require the developer to monitor future traffic patterns to determine whether, using existing traffic calming standards, new or additional traffic calming measures should be employed. The extent and design of traffic

calming shall be determined by the DPW to mitigate the post development impact of connecting new and existing streets.

In cases where post development monitoring shows that increased traffic volume and speed is such that further traffic calming would be insufficient to mitigate traffic negative impacts of through-traffic, the DPW may require that the connection be modified to exclude regular vehicular traffic, while retaining bicycle, pedestrian, and where needed, emergency vehicle connections. The DPW shall develop typical standards and specifications for bicycle, pedestrian, and emergency vehicle connections and/or turnarounds.

c. Where a determination is made by the DPW that a proposed street connection will result in substantial increases in traffic volume and speed on the affected public streets, the planning board may disallow a proposed street connection for vehicular purposes in favor of a connection for non-vehicular purposes in situations where a proposed residential street connection meets all of the following criteria:

   i. the new street would result in the connection of two arterials; and

   ii. the street would be located in a neighborhood where there is no existing public through-street network connecting the same arterials; and

   iii. there is no likelihood that other public street connections will be developed in the future that would connect the arterials, whether because of topography limitations, existing development patterns, or other similar reason.

In circumstances where vehicular connections are disallowed per section (c) above, the planning board shall require that adequate right-of-way is reserved to permit the extension of the street for

pedestrian, bicycle, emergency use, and potential vehicle connections as may develop in the future.

3. Reserve strips or spite strips for unspecified or unacceptable purposes are prohibited.

4. Street right-of-way widths shall not be less than:

   a. Fifty (50) feet for marginal access street;

   b. Fifty (50) feet for minor street;

   c. Sixty (60) feet for collector street.

Proposed subdivisions along existing, or dedicated, or platted streets where rights-of-way are inadequate shall provide additional land to meet the minimum standards.

5. Streets shall not occupy more land than needed to provide access nor create unnecessary fragmentation of the subdivision into small blocks. Streets will be designed to discourage outside traffic from traversing the development.

6. All dead-end streets shall provide for a cul-de-sac or, in the case of a dead-end street which will be extended, a temporary turn-around at the end of the street, subject to the approval of the public works authority.

7. The minimum roadway width including esplanades and sidewalks shall be:

   a. Fifty (50) foot right-of-way, street pavement width, curbing, sidewalk width and esplanade width to conform to the requirements contained within the City of Portland Technical Manual.

   b. Sixty (60) foot right-of-way, street pavement width, curbing, sidewalk width and esplanade width to conform to the requirements contained within the City of Portland technical and design standards and guidelines manual.

   c. Street right-of-way on the islands in Casco Bay shall comply with article III of chapter 25.

8. Sidewalks and curbs:

   a. Sidewalks shall be constructed on each side of each street in accordance with article III of chapter 25. Sidewalks to be used by pedestrians are to be so located as to minimize contacts with normal automotive traffic, with preference given to interior walks away from streets in common open space in block interiors.

   b. Curbs shall be constructed on each side of each street. The curbing shall be constructed as provided in article VI of chapter 25.

(c) *Street design:*

1. Profiles of each street or way in the subdivision shall be shown on the subdivision plat. They shall be drawn to a longitudinal scale of forty (40) feet to one (1) foot and a vertical scale of four (4) feet to one (1) inch. Such profiles shall include separate profiles of each side line and center line of the street or way. Any buildings abutting on the street shall be shown in standard engineering format as requested by the public works authority.

2. Street grades in all proposed subdivisions shall be subject to the approval of the public works authority.

3. The public works authority shall establish the sequence in which work is to be accomplished. Where it is determined by the public works authority that work has been completed prior to the receipt of all approvals required by this article or which is out of sequence or is not in compliance with the standards of this section and of chapter 25, the director of parks and public works or an inspector from the public works authority may issue a stop work order. Work shall recommence only after the stop work order has been lifted by the director of parks and public works or an inspector from the public works authority. Violation of the stop work order shall be considered an offense.

(d) *Street and subdivision names:*

1. Street names for all subdivisions shall appear on the subdivision plat and be subject to approval by the Planning Board.

2. Subdivision names for plats shall be subject to approval by the Planning Board and not duplicate the name of any plat already recorded.

(e) ***Exception for private streets within PRUD's and manufactured housing parks.*** Private streets within PRUD's and manufactured housing parks shall be exempt from the street right-of-way and roadway width requirements set forth above, provided that no such street shall be accepted by the city unless it is first improved to the standards set forth above at the expense of those persons requesting the street acceptance. Private streets within a PRUD or a manufactured housing park shall meet specifications established by the public works department. All private streets shall be designed by a professional engineer and shall be built according to accepted engineering standards.

(f) ***Sewers and storm drains:***

1. The design of all sewers and storm drains shall be subject to approval by the public works authority.

2. All subdivisions shall be provided with adequate storm drain systems within the subdivision separate from any sanitary sewer system required in article III of chapter 25.

3. Any natural or manmade areas, systems or facilities designated for stormwater control purposes and intended for city maintenance shall, except for detention or retention ponds or basins and regularly free-flowing watercourses, be structurally enclosed in accordance with the standards of the public works authority, and shall be dedicated with sufficient land for maintenance purposes. Warranty deeds to such areas shall be submitted for acceptance by the city council at the same time as the acceptance of streets. All such areas as are not intended for city maintenance shall be permanently protected and maintained by private agreement, deed covenant or restriction, as appropriate, in form approved by the corporation counsel.

4. The approval of the plumbing inspector is required for all subdivisions involving the use of septic tanks and drainage fields for sewage disposal.

5. The subdivider shall be responsible for the construction of all sewers and storm drains including manholes, catch basins and any other appurtenances as may be deemed necessary by the public works authority. All work shall be in accordance with public works specifications.

6. The public works authority shall establish the sequence in which work is to be accomplished. Where it is determined by the public works authority that work has been completed prior to the receipt of all approvals required by this article or which is out of sequence or is not in compliance with the standards of this section and of chapter 24, the director of parks and public works or an inspector from the public works authority may issue a stop work order. Work shall recommence only after the stop work order has been lifted by the director of parks and public works or an inspector from the public works authority. Violation of the stop work order shall be considered an offense.

(g) *Blocks:*

1. A maximum block length of eight hundred (800) feet, measured from the nearest street lines of intersecting streets, shall be observed except where, in the opinion of the Planning Board, conditions justify a departure from this standard. In general, block size should be the maximum consistent with the use and shape of the site and the convenience and safety of the occupants.

2. In blocks exceeding eight hundred (800) feet in length, measured from the nearest street lines of intersecting streets, the Planning Board may require where feasible the reservation of a twenty (20) foot wide easement to the city through the block to provide for the crossing of underground utilities and pedestrian traffic where needed or desirable and may further specify, at its discretion, that a four (4) foot wide paved foot path be included.

3. The length, width and shape of blocks shall be determined

on the basis of:

a. Provision of adequate building sites suitable to the special needs of the type of use contemplated;

b. Zoning requirements as to lot sizes, setbacks and dimensions;

c. Needs for convenient access, circulation, control and safety of street traffic;

d. Limitations and opportunities of topography.

4. Blocks with lots having double frontage on streets shall be avoided.

5. The foregoing dimensions may be adjusted by the Planning Board where type of use or topography requires such modification.

(h) *Lots:*

1. Lot sizes shall conform to the zoning ordinance in article III of this chapter and the city health code.

2. Where easements for public utilities, storm or sanitary sewers are contemplated, the lot lines shall be located in such a manner as to facilitate construction of such facilities and the maintenance thereof.

3. Lots which are reserved or laid out for business, commercial or industrial purposes shall have sufficient width and depth to accommodate the off-street parking and loading facilities required for the type of use and development contemplated, as established in article III of this chapter.

4. Where feasible, side lot lines shall be at right angles to street lines (or radial to curving street lines).

(i) *Public open space:*

1. In all subdivisions open space may be provided for parks, recreational and other public areas. Where no public open space or recreational areas exist in close proximity to

the subdivision, or where a lack of such areas in the subdivision would require its disapproval under section 14-497(a), general requirements, the Planning Board may require provision of land for park or recreational purposes. Such lands may be designated for public or private ownership in accordance with the conditions stated in this section, subject to the approval of the Planning Board.

2. If a tract or parcel is intended for public ownership and is so designated on the subdivision plat, the acceptance of such land shall be first recommended by the various departments and the Planning Board and sent to the city council for final determination.

3. If a tract or parcel is designed or intended to be owned and used in common for recreational or other public or semipublic purposes and such intent is so designated on the subdivision plat, appropriate documents in form approved by the corporation counsel shall be submitted to the Planning Board. Such documents shall clearly:

   a. Set forth the nature of the permanent organization under which common ownership is to be established, including its purpose; how it shall be governed and administered; the provisions made for permanent care and maintenance of the common property for its share of the cost of administering and maintaining such common property;

   b. Set forth the extent of common interest held by the owner of each individual parcel in the tract held in common with others.

(j) *Access to shoreline:*

1. In all subdivisions having shore frontage on the island of Casco Bay, existing legal rights of public access to the shoreline shall be preserved. The proposed street layout and circulation plan shall be suitably integrated with such existing public access in a manner that reasonably promotes the public use of such access. The proposed street layout and circulation plan shall also be designed to preserve any legal rights to any significant water views and scenic vistas from such rights-of-way.

2. In all subdivisions having any lots within the shoreland zone, legal rights of private access to waters shall, to the extent reasonably feasible, be established for the benefit of all lots within the subdivision not otherwise having such access.

(Code 1968, 603.9; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79: Ord. No. 41-84, § 1, 6-18-84; Ord. No. 98-85, § 1, 7-15-85; Ord. No. 127-87, §§ 7, 8, 2-18-87; Ord. No. 104-87, 10-19-87; Ord. No. 66-88, 7-18-88; Ord. No. 201-89, § 1, 12-18-89; Ord. No. 218-04/05, 5-2-05; Ord. No. 86-05/06, 10-17-05; Ord. No. 278-09/10, 7-19-10)

***Editor's note--**Ord. No. 66-88, adopted July 18, 1988, amended § 14-498 by adding subsections (c)(3) and (f)(6). The ordinance further provided as follows:

Be it further ordained and determined by the city council that the above amendments are necessary in order to prevent further work being done which is not in accordance with City technical standards. Therefore, this enactment shall take effect immediately as an emergency pursuant to Article II, Section 8 of the Charter and shall further apply to all pending proceedings, applications, petitions and to all projects which have work that remains to be completed at the date of enactment of these amendments.

Sec. 14-499. Required improvements.

Prior to the release of the approved recording plat the subdivider shall file a guarantee as hereinafter provided, and prior to release of such guarantee the subdivider shall have completed all improvements as follows:

(a) All streets shall be graded in conformity with the requirements set out in section 14-498 and in accordance with article III of chapter 25.

(b) On all streets, side streets, and alleys, a suitable hard surfaced permanent pavement shall be installed meeting the requirements set forth in article III of chapter 25.

(c) Water, gas and sanitary sewer mains and storm drains shall be constructed prior to the installation of paving with all mains being extended from all lots having sufficient stub outs to avoid subsequent breaking of pavement.

(d) Sidewalks and curbs shall be constructed as required in section 14-498.

(e) Adequate storm drains shall be constructed subject to the provisions of section 14-496 and in accordance with the department of public works specifications.

(f) A total of two (2) trees per lot, which shall be street trees, shall be planted near the street line in full public view on private property, as directed by the city arborist pursuant to "Standards for Landscaping and Landscape Preservation" contained in the City of Portland Technical Manual. Existing healthy trees may be credited toward this requirement, subject to the approval of the city arborist.

(g) Permanent markers will be set as prescribed by the public works authority.

(h) All utility lines shall be placed underground unless otherwise approved by the Planning Board.

(i) Street lighting shall be installed in accordance with the standards of the public works authority.

(j) A public water supply shall be installed subject to the approval of the Portland Water District.

(k) Erosion control measures shall be taken both during and after construction in accordance with the standards of the public works authority.

(Code 1968, § 603.10; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79; Ord. No. 127-87, § 9, 2-18-87; Ord. No. 105-87, § 1, 10-19-87; Ord. No. 278-09/10, 7-19-10)

Sec. 14-499.5. Additional requirements for manufactured housing parks.

All manufactured housing parks and subdivisions as defined in section 14-47 shall meet the requirements for residential subdivisions established by this article, the site plan and the zoning ordinance, in addition to the following requirements for manufactured housing parks:

(a) The entire development shall be properly screened from abutting neighborhoods and uses. Such screen shall consist of plantings, or a combination of earth berm and

plantings, not less than three (3) feet in width and six (6) feet in height at the time of initial occupancy of such development, and shall be set back on corner lots so as to comply with section 14-434. Individual shrubs or trees, as approved by the city arborist, shall be planted so as to establish a dense visual screen year round. At least fifty (50) percent of the plantings shall consist of evergreens. Such screen shall thereafter be permanently maintained in a condition meeting the specifications and intent of this subsection. In cases where such screen areas are to be separately owned, the deed of conveyance shall contain a requirement that the grantee shall likewise maintain the screen area. Such requirement shall be in a form acceptable to the corporation counsel. Any area intended to be owned and used in common shall thereafter be maintained by a permanent organization as set forth in section 14-498(i)(3). Existing vegetation may substitute for new plantings if it forms an acceptable dense visual screen consistent with the intent of this subsection.

(b) All manufactured housing units and any accessory structure within such development shall be located at least fifty (50) feet from any external property boundary of the development where the proposed park density is two (2) or more times greater than the density of residential development on adjacent parcels or the maximum permitted density of adjacent vacant parcels.

(c) All units within such development shall be set back from any existing collector or arterial street, as defined in section 14-493, in accordance with the setback provisions for the underlying zone.

(d) All fuel oil supply systems shall be constructed and installed within the foundation wall or underground in accordance with all applicable codes and regulations.

(e) All trash containers, bottled gas tanks, storage sheds, utility meters, or other similar items or accessory structures except parking garages, shall be located and suitably screened by plantings or fencing so as not to be clearly visible from the street or abutting properties.

(f) All manufactured housing units shall be placed either on

a foundation which forms a complete enclosure under exterior walls, or on suitable blocks on a foundation pad, in which case the unit shall be boxed or skirted with suitable material designed for such use.

(g) All manufactured housing units shall be properly installed, blocked and leveled or affixed to a foundation wall, so as to rest on the wheels used to transport the unit. Any hitch or tow bar shall be removed from the unit after it is placed on its foundation.

(h) Notwithstanding the provisions of sections 14-498 and 14-499, private roads within a manufactured housing park shall be a minimum of twenty-three (23) feet wide, with a minimum pavement width of twenty (20) feet.

(Ord. No. 611-82, § 1, 7-7-82; Ord. No. 358-84, § 1, 12-17-84; Ord. No. 201-89, § 2, 12-18-89)

Sec. 14-500. Additional requirements for nonresidential subdivisions.

All nonresidential subdivisions must meet the requirements for residential subdivisions established by this article, the site plan in article V of this chapter and the zoning ordinance in article III of this chapter, in addition to the following considerations, except as waived by the Planning Board due to the commercial or industrial nature of the development:

(a) Proposed industrial parcels shall be suitable in area and dimensions to the commercial or industrial development anticipated.

(b) Street rights-of-way and pavement shall be adequate to accommodate the type, weight and volume of traffic anticipated to be generated.

(c) The design and installation of public utilities including water, sewers and storm water drainage, shall be adequate to accommodate the anticipated usage.;

(d) Streets carrying truck traffic shall not normally be extended to the boundaries of adjacent existing or potential residential areas.

(Code 1968, § 603.11; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79)

Sec. 14-501. Performance and defect guarantees; engineering review, inspection fees and administrative fees.

(a) The performance guarantee shall be a letter of credit or escrow account with a responsible financial institution or the deposit, with the finance department of the city, of a sum required for the guarantee. (The city shall hold such funds in a noninterest bearing account until the completion of all of the improvements.) The performance guarantee shall be in the name of the city and shall be approved by the finance director as to financial sufficiency and the corporation counsel as to proper form and legal sufficiency.

(b) Performance guarantees shall be required to ensure the fulfillment of all improvements as required by section 14-499, as well as the requirement in article III of chapter 25 that the subdivider shall give to the city, prior to the release of the performance guarantee a warranty deed (with metes and bounds description) to the property within each street within the subdivision, as well as delivery to the city of the warranty deeds to all other improvements intended for city maintenance. Such guarantee shall specify the completion date of the improvements required in the subdivision and the delivery date to the city of such deed or deeds prior to the expiration of the performance guarantee. The performance guarantee shall be for a term not less than one (1) year. Furthermore, the performance guarantee shall be released only upon the completion, to the satisfaction of the city, of the public improvements and the tendering of a defect guarantee as required in subsections (e) and (f).

(c) The guarantee shall be equal in value to one hundred (100) percent of the estimated cost of the improvements as determined by the public works authority and the planning authority. The guarantor shall not be released from the guarantee except by a release in writing from the public works authority and the planning authority.

(d) Performance guarantees may be reduced periodically by the public works authority and the planning authority in the manner provided herein. Upon request, but in no event more than three (3) times in any calendar year, the developer shall be eligible to receive reductions in the performance guarantee equal to the estimated cost of the completed improvements. In no case, however, shall any performance guarantee be reduced (1) by less than one hundred thousand dollars ($100,000.00) or fifty (50) percent of the

initial amount of the performance guarantee, whichever is less, at any one (1) time; or (2) in any line item where improvements remain to be completed: or (3) to a value which is less than the estimated cost of completing all remaining prescribed improvements for which a performance guarantee is required by section 14-530 as determined by the public services authority. Notwithstanding any other provision of this section, no performance guarantee shall be reduced to less than the amount of the defect guarantee to be posted upon completion of the improvements.

(e) Upon the satisfactory completion of the subdivision's prescribed improvements, excepting tree planting and other landscaping if in the opinion of the city arborist the installation of such plantings is not feasible due to weather conditions, and following the city's receipt of the warranty deeds referred to in (b) above, the subdivider shall file a defect guarantee with the city. The defect guarantee shall ensure the workmanship and the durability of all materials used in the construction of the roadways, curbing, esplanades, sidewalks, sanitary sewerage systems (including manholes and house drain laterals), storm drainage systems (including manholes, catch basins and catch basin drains), street lighting, tree planting, other appropriate landscaping and all other public improvements which may become defective within one (1) year period, all as determined by the public works authority. The defect guarantee shall also ensure the proper installation of any required tree plantings or landscaping which were not installed prior to the filing of the defect guarantee during the next appropriate planting season, as determined by the city arborist. The defect guarantee shall be filed prior to the release of the performance guarantee and it shall not expire between October 30 and April 15 of the following year.

(f) The defect guarantee shall be a letter of credit or escrow account with a responsible financial institution or the deposit, with the finance department of the city, of a sum required for the guarantee (the city shall hold such funds in a noninterest bearing account until the completion of all of the improvements), equal in value to ten (10) percent of the estimated cost of public improvements. It shall be in the name of the city and shall be approved by the finance director as to financial sufficiency and the corporation counsel as to proper form and legal sufficiency. A guarantee which contains appropriate terms and conditions to cover both the performance and defect guarantee provisions as specified in subsections (a)--(e) above is an acceptable form of guarantee.

(g) A performance guarantee and defect guarantee shall also be required to ensure the completion of all improvements as required by section 14-499.5, as well as all improvements for the circulation, recreation, landscaping, light, air, drainage and service needs of a planned unit development which are not subject to section 14-501(b). For purposes of this subsection, sections 14-501(c) and (d) shall also apply. The planning authority may waive all or any portion of this requirement if it determines that the developer has a proven record of satisfactory performance and sufficient financial capability.

(h) At the same time that the developer posts a performance guarantee, the developer shall also pay to the city the subdivision inspection fee equal to two (2) percent of the estimated costs of improvements required by this article, with actual inspection costs in excess of two (2) percent invoiced by the city at the completion of the project or as deemed necessary by the city. If a performance guarantee is extended beyond its original expiration date, then an additional inspection fee in an amount to be determined by the city shall be required.

(i) The developer shall also pay a fee to cover the engineering review costs and administrative costs to be incurred by the city. The fee shall be based upon the actual hours of review time and prevailing hourly rate for reimbursement of city costs, and shall be invoiced periodically by the city.

No land use permits or applications of any kind shall be processed, reviewed or issued, no signed subdivision plats shall released or recorded, and no building permits of any kind shall be issued, for any project whose permit fee is governed by this ordinance unless all charges due under this ordinance have been paid and the developer is otherwise in compliance with the city code. No performance guarantee shall be released until all fees generated by the project are paid to the city, including but not limited to engineering, inspection and administrative fees as provided in section 14-530.

(Code 1968, § 603.12;.Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79; Ord. No. 611-82, §§ 2, 3, 7-7-82; Ord. No. 127-87, § 10, 2-18-87; Ord. No. 524-87, §§ 1, 2, 5-18-87; Ord. No. 122-91, § 1, 9-16-91; Ord. No. 262-96, §§ 1, 2, 5-20-96; Ord. No. 227-00, §2, 5-15-00; Ord. No. 278-09/10, 7-19-10)

Sec. 14-502. Extension of the guarantee period.

When the subdivider constructs improvements for which a

performance guarantee is required and the public works authority has reasonable doubt concerning the stability or proper construction of such improvements, the subdivider shall be required to do such further work on the improvements as the public works authority shall order before the improvements will be accepted by the city. If the subdivider's current performance guarantee shall expire before the extent or necessity for such further work can be determined, the subdivider shall be required to extend his or her guarantee covering such improvements, or secure a new guarantee, for such further period and in such amount as the public works authority shall deem necessary.

(Code 1968, § 603.13; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79; Ord. No. 127-87, § 11, 2-18-87)

Sec. 14-503. Sale of partially completed subdivisions.

The purchasing party or other succeeding owner of a subdivision for which a recording plat has received prior approval shall assume full responsibility for completion of the subdivision's improvements until acceptance of such improvements by the city. The purchaser or other succeeding owner of an unaccepted subdivision shall be required to comply with all the provisions of this article as if he were the original subdivider, and shall become responsible for completing such improvements in the same manner as the original subdivider.

(Code 1968, § 603.14; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79)

Sec. 14-504. Enforcement, conveyance, markers and recording.

(a) No person may sell, lease, develop or build upon or convey for consideration, offer or agree to sell, lease, develop or build upon or convey for consideration any land in a subdivision unless the subdivision has been approved by the Planning Board, and unless a recording plat showing permanent marker locations at all lot corners has been recorded in the county registry of deeds.

(b) The term permanent marker is limited to the following: A granite monument for street monumentation and an iron pin or drill hole in ledge for property delineation, or as otherwise approved by the public works authority. No subdivision plan shall be recorded by the registry of deeds which has not been approved as required by this article. Approval for the purpose of recording shall appear in writing on the recording plat. No public utility, water district, sanitary district or any utility company of any kind shall install services to any lot in a subdivision which has not received

(c) Any person who sells, leases, develops or builds upon or conveys for consideration any land in a subdivision which has not been approved as required by this article shall be punished by a fine of not more than five hundred dollars ($500.00) for each such occurrence. The city may institute proceedings to enjoin any violation of this section.

(d) Notwithstanding the foregoing, alterations may be made to a site with a pending subdivision application if:

(1) At minimum, a performance guarantee for the proposed site alterations has been posted and final site plans have been submitted to the planning authority; and

(2) Written permission has been received from the director of planning and urban development or his designee that such site alterations may proceed pending subdivision approval. Such permission is solely within the discretion of the director of planning and urban development and shall be granted only after submission of a written request setting forth the work proposed to be done on the site. All such work shall be done in compliance with information provided with the subdivision application. An erosion control plan shall also be submitted when deemed necessary by the planning authority. Such written permission shall not be required when the only work proposed is the digging of test pits.

(Code 1968, § 603.15; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79; Ord. No. 95-01/02, 11-5-01)

Sec. 14-505. Appeals.

An appeal from any final decision of the Planning Board regarding subdivision approval may be taken by the applicant or his authorized agent to superior court in accordance with Rule 80B of the Maine Rules of Civil Procedure.

(Code 1968, § 603.16; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79)

Sec. 14-506. Modifications.

(a) Except for the requirements set forth in sections 14-498 and 14-499 pertaining to the provision and construction of curbs and sidewalks, the Planning Board if it finds that extraordinary

conditions exist or that undue hardship may result from strict compliance with these regulations may vary the regulations so that substantial justice may be done and the public interest secured; provided that such variation will not have the effect of nullifying the intent and purpose of the land development plan and the regulations of this article.

(b) Where the Planning Board or planning authority finds that, for each of the requirements listed below, two or more of the conditions exist with respect to compliance with the requirements set forth in sections 14-498 and 14-499 pertaining to the provision and construction of curbs and/or sidewalks, it may waive, in whole or in part, the regulations so that substantial justice may be done and the public interest secured:

Sidewalks-

1. There is no reasonable expectation for pedestrian usage coming from, going to and traversing the site.

2. There is no sidewalk in existence or expected within 1000 feet and the construction of sidewalks does not contribute to the development of a pedestrian oriented infrastructure.

3. A safe alternative-walking route is reasonably and safely available, for example, by way of a sidewalk on the other side of the street that is lightly traveled.

4. The reconstruction of the street is specifically identified and approved in the first or second year of the current Capital Improvement Program or has been funded through an earlier CIP or through other sources.

5. The street has been constructed or reconstructed without sidewalks within the last 24 months.

6. Strict adherence to the sidewalk requirement would result in the loss of significant site features related to landscaping or topography that are deemed to be of a greater public value.

Curbing-

1. The cost to construct the curbing, including any

applicable street opening fees, is in excess of 5% of the overall project cost.

2. The reconstruction of the street is specifically identified and approved in the first or second year of the current Capital Improvement Program or has been funded through an earlier CIP or through other sources.

3. The street has been rehabilitated without curbing in the last 60 months.

4. Strict adherence to the curb requirement would result in the loss of significant site features related to landscaping or topography that are deemed to be of a greater public value.

5. Runoff from the development site or within the street does not require curbing for stormwater management.

In no event shall the waiver have the effect of creating potentially hazardous vehicle and pedestrian conflict or nullifying the intent and purpose and policies of the land development plan relating to transportation and pedestrian infrastructure and the regulations of this article.

At its discretion, the planning authority may refer any petition for a waiver from the curb and sidewalk requirement to the Planning Board for decision.

(c) The standards and requirements of this article may be modified by the Planning Board in the case of a plan and program for a planned unit development which in the judgment of the Planning Board provides adequate public spaces and improvements for the circulation, recreation, light, air and service needs of the tract when fully developed and populated, and which also provides such covenants or other legal provisions as will assure conformity to and achievement of the land development plan.

(d) If at any time before or during the construction of the required improvements the subdivider demonstrates to the satisfaction of the project engineer and the public works authority that unforeseen conditions make it necessary or preferable to modify the design of the required improvements, the public works authority may authorize modifications provided that the modifications do not amount to a waiver or substantial alteration

of the function of any improvements required by the Planning Board.
(Code 1968, § 603.17; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79; Ord. No. 41-84, §§ 2, 3, 6-18-84; Ord. No. 204-02/03, 5-29-03)

Sec. 14-507. Conditions.

In granting variances and modifications, the Planning Board and city council may require such conditions as will, in their judgment, secure substantially the objectives of the standards or requirement so varied or modified.
(Code 1968, § 603.18; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79)

Sec. 14-508. Exemptions.

(a) This article does not apply to subdivisions approved prior to June 6, 1979, nor to subdivisions in existence prior to June 6, 1979, nor to subdivisions which have been legally recorded in the registry of deeds prior to June 6, 1979.

(b) A division accomplished by devise, condemnation, order of court, gift to a person related to the donor by blood, marriage or adoption, unless the intent of such gift is to avoid the objectives of this article, or by transfer of any interest in land to the owner abutting thereon shall not be considered to create a lot or lots for purposes of this article.
(Code 1968, § 603.19; Ord. No. 158-68, § 10, 5-6-68; Ord. No. 149-79, 6-6-79)

Sec. 14-509. – Sec. 14-520. Reserved.

ARTICLE V. SITE PLAN*

***Editor's note--**Ord. No. 355-89, adopted July 17, 1989, amended Art. V, site plan, in its entirety, in effect repealing former §§ 14-521--14-530 and enacting similar new provisions in lieu thereof as §§ 14-521--14-528. The ordinance was enacted as an emergency in order for the Planning Board to have the necessary tools to protect the health, safety and welfare of the citizens and further provided that such amendments would be applicable to any alterations, modifications, revisions, amendments or filed changes to any previously approved site plan as provided in the article but would not be construed to invalidate any prior approval. Formerly, Art. V derived from §§ 604.1--604.6, 604.7.B, 604.8 and 604.9 of the city's 1968 Code, as amended by the following:

Ord. No.	Section	Date	Ord. No.	Section	Date

348-74		5-20-74	316-87	1	3- 4-87
442-78		8- 7-78	524-87	3—5	5-18-87

88-84	2--6	7-16-84	301-88		5-31-88
292-84	1	11-19-84	67-88		7-18-88
294-84	1	11-19-84	96-88	2	7-19-88
359-84	1	12-17-84	97-88		7-19-88
370-85	1--3	1-21-85	98-88		7-19-88
128-87	1	2-18-87			

***Editor's Note—**Pursuant to Council Order 277-09/10, passed on 7-19-10 Article V, Site Plan was repealed in its entirety and replaced with a new Article V, Site Plan.

Sec. 14-521. Purposes.

Pursuant to Portland's Comprehensive Plan, the Site Plan Ordinance advances the vision for a sustainable City with shared goals for the environment, community and economy. The Site Plan Ordinance complements the regulations of the Zoning Ordinance in Article III of this chapter and the Subdivision Ordinance in Article IV of this chapter.

(Ord. No. 277-09/10, 7-19-10)

Sec. 14-522. Definitions.

For the purposes of this article all terms and words shall have their ordinary meanings, except as defined herein.

Approval by any board or department under this article shall include any approval with conditions.

Building addition: Any attached structure which increases the

total floor area of the structure.

Building Authority: The Director of the Department of Planning and Urban Development or his/her designee.

Change of use: Any change in use of an existing building, whether or not alterations are involved, from any use in the following list to any other uses on the list:

1. Manufacturing or processing, storage and warehouse, and other industrial;

2. Residential

3. Transportation

4. Institutional

5. Retail and Commercial

6. Water-dependent use and marine use

7. Office

Development: Any construction, site alteration or change of use which is identified in Section 14-523, Required Approvals and Applicability.

Dwelling, two-family: A single building containing two dwelling units used exclusively for occupancy by two (2) families living independently of each other.

Final Plan: A site plan meeting the requirements of Section 14-527.

Master development plan: A Master Development Plan is a regulatory option for sites with one acre or more in cumulative lot area that's designed as a cohesive and integral development program consisting of multiple buildings and associated site improvements built in phases over an extended timeframe. This option shall not apply in residential zones except for institutional uses.

Multiple-family development; The construction or creation of three (3) or more dwelling units on any parcel of land or the addition of two (2) or more dwelling units cumulatively within a

three-year period.

Owner: Any person that has any interest, legal or beneficial, in any parcel proposed for development.

Planning Authority: The Director of the Department of Planning and Urban Development or his/her designee.

Preliminary Plan: A site plan that provides an existing site inventory and analysis along with the potential design layout for a proposed development that meets the criteria of Section 15-527.

Public Services Authority: The Director of the Department of Public Services or his/her designee.

Site: *A*ll contiguous land under the same ownership or control, whether proposed for development or not, except where development is limited to a lot or lots within a subdivision.

Temporary parking: The parking of vehicles permitted by a temporary certificate of occupancy for a limited period of time not to exceed one (1) year in anticipation of future development.
(Ord. No. 277-09/10, 7-19-10; Ord. No. 176-12/13, 4-22-13)

Sec. 14-523. Required Approvals and Applicability.

(a) ***Required Approval.*** An application for site plan approval shall be reviewed by the Planning Board or Planning Authority as specified below. The Planning Board or Planning Authority shall approve, approve with conditions or deny an application pursuant to the standards, procedures, technical criteria and design criteria contained in this article, as demonstrated by the applicant.

1. The Planning Authority shall administratively authorize developments that meet all of the requirements of Section 14 – 523 (c).

2. Level I Site Plan Review shall require the approval of the Planning Authority.

3. Level II Site Plan Review shall require the approval of the Planning Authority only, except as otherwise expressly provided by this article.

4. Level III Site Plan Review shall require the approval of the Planning Board, except as otherwise expressly provided by this article.

5. Master Development Plan Review shall require the Master Development Plan approval of the Planning Board as provided in Section 14-524(d)(9).

(b) ***Applicability.*** No person shall undertake development identified in Section 14-523 without obtaining a site plan improvement permit under this article.

(c) ***Administrative Authorization.*** Administrative Authorization means the Planning Authority may grant administrative authorization to exempt a development proposal from complete or partial site plan review that meet the standards below, as demonstrated by the applicant.

1. The proposed development will be located within existing structures, and there will be no new buildings, external demolitions, or building additions other than those permitted by subsection 2 of this subsection;

2. Any building addition shall have a new building footprint expansion of less than five hundred (50**0)** square feet;

3. The proposed site plan does not add any new curb cuts, driveways, or parking areas; the existing site has no more than one (1) curb cut and will not disrupt the circulation flows and parking on-site; and there will be no drive-through services provided;

4. The curbs and sidewalks adjacent to the lot are complete and in sound condition, as determined by the Public Services Authority, with granite curb with at least four-inch reveal, and sidewalks are in good repair with uniform material and level surface and meet accessibility requirements of the Americans with Disabilities Act;

5. The use does not require additional or reduce existing parking, either on or off the site, and the project does not significantly increase traffic generation;

6. There are no known stormwater impacts from the proposed use or any existing deficient conditions of stormwater management on the site;

7. There are no evident deficiencies in existing screening from adjoining properties;

8. Existing utility connections are adequate to serve the proposed development and there will be no disturbance to or improvements within the proposed right-of-way;

9. There are no current zoning violations;

10. Any emergency generators are to be located to minimize noise impacts to adjoining properties and documentation that routine testing of the generators occur on weekdays between the hours of 9 a.m. to 5 p.m. Documentation pertaining to the noise impacts of the emergency generator shall be submitted; and

11. There are no anticipated noise, vibration, glare, fumes or other foreseeable impacts associated with the project.

(d) ***Level I Site Plan Review.*** Minor residential development and site alterations meeting the criteria below will undergo Level 1 Site Plan Review as follows.

1. Level I: Minor Residential Development:

   a. With respect to development of a single-family or a two-family building, excluding building additions, decks, or accessory structures, such development shall be deemed minor residential development for purposes of this article regardless of its size.

   b. The addition of one or two dwelling units to a two-family dwelling or multifamily structure shall be deemed a Level I minor residential development for purposes of this article, if the additional dwelling unit or units does not require subdivision review under Maine State Statutes and Portland's Subdivision Ordinance.

2. Level I: Site Alteration:

a. Alteration of a watercourse or wetland as defined in Section 14-47 of the City Code.

b. Alteration of a site. The disturbance of land areas of less than one (1) acre that are stripped, graded, grubbed, filled or excavated. The Planning Authority shall exempt from review the loam and seeding of lawns and the cumulative placement of less than fifteen (15) cubic yards of fill on any lot provided such loaming or placement does not alter a drainage course, swale, wetland or redirect water onto adjoining property and does not violate any other provision of the Portland City Code or state or federal law. "Disturbed area" does not include routine maintenance, but does include re-development and new impervious areas.

c. The construction of any temporary or permanent parking area, paving of existing unpaved surface parking areas between 1,000 and 7,500 square feet, or creation of other impervious surface areas between 1,000 and 7,500 square feet.

d. The rehabilitation or reconstruction, but not new construction, of piers, docks, wharves, bridges, retaining walls, and other structures located within the shoreland zone.

e. A site alteration in which vehicle access is proposed from more than one (1) street;

(e) ***Level II Site Plan Review.*** Development meeting the criteria listed below will undergo Level II Site Plan Review as follows:

1. The construction of any new structures having a total floor area of less than ten thousand (10,000) square feet in all zones except in the Industrial zones. In any Industrial zone, the construction of new structures having a total floor area of less than twenty thousand (20,000) square feet;

2. The construction of any new temporary or permanent parking area, paving of existing unpaved surface parking areas in excess of 7,500 square feet and serving less than 75 vehicles, or creation of other impervious surface area greater than 7,500 square feet;

3. The construction of any building addition(s) having a total floor area of less than ten thousand (10,000) square feet cumulatively within a three-year period in all zones except in the Industrial zones. In any Industrial Zone, the construction of building addition(s) having a total floor area of less than twenty thousand (20,000) square feet.

4. Park improvements consisting of new structures or buildings of less than 10,000 square feet and/or facilities encompassing an area of greater than 7,500 square feet and less than 20,000 square, excluding the rehabilitation or replacement in kind of existing facilities.

5. The new construction of piers, docks, wharves, bridges, retaining walls, and other structures located within the shoreland zone.

6. The disturbance of land areas of between one and three acres that are stripped, graded, grubbed, filled or excavated.

7. A change in the use of a total floor area of between ten thousand (10,000) and twenty thousand (20,000) square feet in any existing building cumulatively within any three-year period in all zones.

8. Lodging houses and bed and breakfast facilities;

9. Emergency shelters

10. Special needs independent living units;

11. Construction or installation of any signage for which approval is sought pursuant to section 14-526(d)8.a.(iv).

12. The construction of any new major or minor auto

service station with a structure of less than ten thousand (10,000) square feet of building area in any permitted zone other than the B-2, or B-5 zones;

13. The creation of day care facilities or home babysitting services in a residential zone not permitted as a home occupation under section 14-410 in any principal structure that has not been used as a residence in whole or in part within the five (5) years immediately preceding the application for a day care or home babysitting use, where such facilities serve more than twelve (12) children;

14. Any drive-through facility that is not otherwise reviewed as a conditional use under Article III.

(f) ***Level III Site Plan Review.*** Development meeting the criteria listed below will undergo Level III Site Plan Review as follows:

1. The construction of any new structures having a total floor area of ten thousand (10,000) square feet or more in all zones except the Industrial zones. In any Industrial zone, the construction of new structures having a total floor area of twenty thousand (20,000) square feet or more;

2. The construction of any new temporary or permanent surface parking area(s) or paving of existing unpaved surface areas for more than seventy-five (75) vehicles except in the case of temporary parking;

3. The construction of any building addition(s), cumulatively having either a total floor area of ten thousand (10,000) square feet or more within any three-year period in all zones except in the Industrial zones for the construction of building addition(s) having a total floor area of twenty thousand (20,000) square feet or more;

4. A change in the use of a total floor area of twenty thousand (20,000) square feet or more in any existing building cumulatively within any three-year period in all zones,

5. Multiple-family development;

6. The addition of one or two dwelling units to a building, if the additional dwelling unit or units requires subdivision review under Maine State Statutes and Portland's Subdivision Ordinance;

7. The construction of any new major or minor auto business in the B-2 or B-5 zone, or the construction of any new major or minor auto business with a structure greater than ten thousand (10,000) square feet of building area in any other permitted zone; or

8. Correctional prerelease facilities.

9. Park improvements consisting of new structures greater than 10,000 square feet and/or facilities encompassing an area of 20,000 square feet or greater, excluding the rehabilitation or replacement of existing facilities. Any park improvements including the provision of new nighttime outdoor lighting or sports, athletic or recreation facilities not previously illuminated.

10. The disturbance of land areas of three (3) acres or more that are stripped, graded, grubbed, filled or excavated.

(g) *Master development plan:* A Master Development Plan meeting the criteria listed below will undergo a master development plan review as follows:

1. A Master Development Plan for a site with one acre or larger in a cumulative lot area that is designed as a cohesive and integral development program consisting of multiple buildings and associated site improvements proposed to be built in phases.

2. The Master Development Plan option shall not apply in residential zones, except for institutional uses.

(Ord. No. 277-09/10, 7-19-10; Ord. No. 25-11/12, 8-15-11; Ord. No. 176-12/13, 4-22-13)

Sec. 14-524. Site plan review processes.

(a) The site plan review process for reach applicable development review type is listed below.

1. *Administrative Authorization*:

a. ***Filing the Application.*** An applicant seeking an administrative authorization under this subsection shall submit an administrative authorization application for review, detailing the site plan with dimensions of proposed improvements and distances from all property lines, and stating that the proposal meets all of the provisions in standards a-k of Section 14-423 (b)1.

b. ***Review.*** Upon receipt of such a complete application, the Planning Authority will process it and render a written decision of approval, approval with conditions or denial, with all associated findings.

c. ***Decision.*** If a full administrative authorization is granted, the application shall be approved without further review under this article, and no performance guarantee shall be required. In the event that the Planning Authority determines that standards 1 and 2 of section 14-523 (c) and at least four (4) of the remaining standards have been met, the Planning Authority shall review the site plan according to all applicable review standards of Section 14-526 that are affected by the standards in this subsection that have not been met. If an exemption or partial exemption from site plan review is not granted, the applicant must submit a site plan application that will undergo a full review by the Planning Board or Planning Authority according to the standards of section 14-526.

2. ***Level I site plan review:***

a. ***Filing the application.***

(i) Every application submitted to the building authority or planning authority for a level I minor residential development or site alteration shall include a digital set of the plans and documents that shall be uploaded to the City's designated web site for an electronic review of the material.

b. *Public notices.*

(i) When an application for a level I: minor residential development is submitted, all public notices will be sent according to the section 14-525.b of the site plan ordinance.

(ii) When an application for a level I: site alteration is submitted, all public notices will be sent according to the section 14-525.b of the site plan ordinance.

c. *Review.*

(i) The planning authority shall approve, approve with conditions or deny the level I: minor residential development plan and shall advise the building authority in writing of its action. Such decision shall be made part of the building authority's review.

(ii) The planning authority shall approve, approve with conditions or deny the level I: site alteration plan with all associated findings and shall advise the applicant in writing of its action.

d. *Standards of review.*

(i) Level I: Minor residential site plans shall only be subject to the following site plan standards, as applicable, as contained in Section 14-526:

(a) Transportation Standards
- 2.a. Site Access and Circulation: (i) and (ii)
- 2.c. Sidewalks: if site plan is a two-family or multi-family building only.
- 4.a. Location and rquried number of vehicle parking spaces:(i)and (iv)

(b) Environmental Quality Standards

- 1. Preservation of significant natural features.
- 2.a. Landscaping and landscape preservation.
- 2.b. Site landscaping: (iii) Street trees.
- 3. Water quality, stormwater management and erosion control: a.,d. e. and f.

(c) Public Infrastructure and Community Safety Standards

- 1. Consistency with city master plans.
- 2. Public safety and fire prevention.
- 3. Availability and adequate capacity of public utilities: a.,c.,d., and e.

(d) Site Design Standards

- 5. Historic resources and 9. Zoning related design standards.

Except as provided in article III, or to conditions imposed under section 14-526(e) only, or to those submission requirements set forth in section 14-527 as relate solely thereto.

(ii) Level I: Site alteration plans shall only be subject to the following site plan standards, as applicable, as contained in section 14-526:

(a) Transportation standards

- 1. Impact on surrounding street systems, 2. Access and circulation, and 4 Parking.

(b) Environmental quality standards

- 1. Preservation of significant natural features, 2. Landscaping and landscape preservation, and 3. Water quality, stormwater management and erosion control.

(c) Public infrastructure and community safety standards.

- 1. Consistency with city master plans.

(d) Site design standards

- 5. Historic resources, 6. Exterior lightning, 8. Signage and wayfinding and 9. Zoning related design standards.

Except as provided in article III, or to conditions imposed under section 14-526(e) only, or to those submission requirements set forth in section 14-527 as relate solely thereto.

e. *Decisions.*

(i) The planning authority shall approve, approve with conditions or deny a level I site plan application based upon the applicable review standards. All improvements are subject to the applicable standards of the Technical Manual and the Design Manual, incorporated herein by reference. In apply said standards, the planning authority, as applicable, may vary or modify them as provided in section 14-506.

f. *Performance Guarantees.*

(i) Performance Guarantees for Level I: Site Alteration plans work shall be required subject to the provisions of Section 14-530 (b)4.d.

(ii) Level 1: Minor residential development shall be subject to an inspection fee, but shall be exempt from the performance guarantee provisions set forth in section 14-525, except as provided by section 14-403 and 14-530 (c)4 as provided herein, such development shall otherwise be fully subject to the provisions of this article.

3. *Level II and level III site plan review:*

a. *Pre-application Conference.*

(i) Applicants for site plan review for a Level II, Level III, or Master Development Plan applications are encouraged to schedule a pre-application conference with the Planning Authority or designated staff to introduce the development concept. The purpose of this meeting is to familiarize the applicant with the review procedures, application submission requirements and applicable review standards. A pre-application conference shall not cause the plan to be a pending application or proceeding under Title 1 MRSA 302. No decisions relative to the plan shall be made. Nor shall any advice or information provided by the city be construed as a decision.

b. *Preliminary Plan.*

(i) ***Application Process***: Applicants for Level II or Level III site plan reviews may submit an application for preliminary plan review prior to the submission of a final site plan. A preliminary plan must contain a preliminary site assessment for potential development.

(ii) ***Filing the Application***: Every application submitted to the Planning Authority for preliminary site plan review shall include a digital set of the plans and documents that shall be uploaded to the City's designated web site for an electronic review of the material. Any proposed revisions to that site plan and

any amended statement(s) shall be filed in the same way as the original submission.

(iii) ***Public Notices***: All public notices will be sent according to the Section 14-525 of the Site Plan Ordinance.

(iv) ***Complete Application***: The Planning Authority shall determine whether the application contains all of the items required in (Sec 14-527) and the Zoning Administrator will conduct a preliminary zoning review for compliance with article III of this chapter. If the application is deemed incomplete or not in compliance with Chapter III, the applicant will be contacted in writing of the finding and the additional material required to complete the submission. A review of the application will not be conducted until the application is complete. These steps shall be repeated until the application is found to be complete.

(v**)** ***Staff Review***: When the application meets the submittal requirements, the preliminary plan will be distributed to the City departments for review and comments.

(vi) ***Written review***: Written comments from the reviewers shall be provided to the applicant, which will include a planning staff recommendation to submit a revised preliminary plan or to submit an application for a final site plan.

c. *Master Development Plan Review.*

(i) ***Application process:*** Applicants for Level III site plan reviews may submit a Master Development Plan for a large, multi-phase development program consisting of multiple buildings and associated site improvements on a site of one (1) acre or more of total land area, which is designed as a cohesive and

integral development program. The purpose of a Master Development Plan is to provide for a mix of land development responsive to the assets of a site. A Master Development Plan is a well-integrated development in terms of land uses, functional activities, and major design elements such as buildings, roads, utilities, drainage systems and open space. The Master Development Plan is deemed appropriate to large scale mixed use projects that are intended to be developed in phases. The Master Development Plan shall be reviewed by the Planning Board and may be reviewed independently or concurrently with review as a site plan for a phased development. A Master Development Plan must address the submission requirements of Section 14-527.

(ii) The site plan review process for a Master Development Plan shall proceed in the same manner as a Preliminary Site Plan, as detailed in Sec. 14-524 (3)(b) (ii)-(vi).

(iii) ***Standards of Review.*** A Master Development Plan shall adhere to the following general requirements and features, and shall meet the Master Development Plan Site Plan Standards of 14-526 (d) (9):

a. A designated tract of land consisting of a parcel or parcels of contiguous land or land on both sides of a public street, totaling one (1) acre or more;

b. Developed in a comprehensive, design-integrated manner, according to an overall master development plan;

c. Consistent with the objectives of this ordinance;

d. Consistent with the City's Comprehensive Plan and consistent with City Council approved master plans and facility plans for off-premise infrastructure, including

but not limited to, trails, pedestrian and bicycle network, view corridors, environmental management, sewer and stormwater, streets, or other facilities (see Section 15 of the Technical Manual);

e. Developed so as to locate buildings and improvements in a manner that provides usable open space, preserves significant natural features, as defined by the site plan ordinance standards, and preserves existing trees to the maximum extent possible;

f. Developed so as to be in conformance with Portland's Historic Preservation Ordinance standards for designated landmarks or for properties within designated historic districts or designated historic landscapes,if applicable. When proposed adjacent to or within one hundred (100) feet of designated landmarks, historic districts or historic landscapes, the Master Plan shall be developed so as to be generally compatible with the major character-defining elements of the landmark or portion of the district in the immediate vicinity of the proposed development;

g. An efficient use of land which properly considers topography and protects significant natural features including, but not limited to, waterways, wetlands, floodplains and wildlife;

h. An efficient use of land demonstrating full coordination of its own site development and surrounding context including, but not limited to, the land uses and functions contemplated, architecture, open space and pedestrian networks, vehicular access and circulation, and all other infrastructure;

i. Linked and coordinated with surrounding land uses, infrastructure and off-site public facilities, including but not limited to the public school system, where appropriate, in a manner that is safe, efficient, non-injurious to the public, and an improvement or benefit to the public where possible;

j. Designed with sizing of street and other infrastructure systems to accommodate the overall service demand of the Master Plan;

k. Designed to create a street grid pattern that reflects average city block sizes of the neighborhood for street connectivity;

l. Designed as to create a cohesive identity through building scale, massing, and articulation; use of quality exterior materials, architectural detailing at pedestrian scale; consistency of design and materials for streetscape and pedestrian amenities; framing of outdoor open space and linkages; a clear conveyance of the function and significance of various buildings, entrances, and features; and to generally comply with design and development standards of the zone in which it is located;

m. Inclusive of provisions for the ownership and maintenance of usable open space as appropriate; and

n. For areas proposed as future development phase(s), the proposed interim conditions shall be managed and maintained to ensure stable, safe and attractive site conditions.

(iv) ***Phasing.*** One or more phases of the Master

Development Plan may be reviewed as a final level III site plan concurrently with the review and approval of the Master Development Plan.

d. *Neighborhood Meetings for Level III Site Plans and Master Development Plan Applications.*

(i) *Neighborhood Meeting for Level III Site Plans*:

Timing and location of meeting. An applicant for a subdivision of five or more units or lots and all other Level III site plan review categories shall conduct at least one neighborhood meeting within thirty (30) calendar days of filing a preliminary site plan, if applicable, or within twenty-one calendar days of filing a final site plan and the neighborhood meeting will be held on a date no less than seven (7) calendar days before a public hearing, if no preliminary plan is submitted. The meeting shall be held at a convenient location within the City of Portland neighborhood surrounding the proposed site. All costs associated with the neighborhood meeting shall be borne by the applicant.

(ii) *Neighborhood Meeting Required for Master Development Plan:* An applicant for a Master Development Plan shall conduct at least one (1) neighborhood meeting within thirty (30) calendar days of filing a Master Development Plan application. The meeting(s) will be held on a date no less than seven (7) calendar days from a public workshop or public hearing. The neighborhood meeting for a Master Development Plan shall not be combined with any required neighborhood meeting for the Level III applications associated with the overall phased development. The meeting shall be held at a convenient location within the City of Portland neighborhood surrounding the proposed site. All costs associated with the neighborhood meeting shall be borne by the

applicant. The workshop shall meet all other provisions of section 14-524 (d)(i).

(iii) ***Procedures for the meeting.*** The following procedures shall be followed in noticing and conducting the neighborhood meeting. At least ten (10) calendar days prior to the neighborhood meeting, the applicant shall do the following:

a. ***Mail notice.*** Mailed notice of said meeting to all property owners within five hundred (500) feet of the subject property lines, except that the notice range for subdivisions within industrial zones shall be one thousand (1000) feet, and to all others, including neighborhood organizations, as may be required by the Planning Authority.

b. ***Digital Copy.*** Provide the Planning Authority with a digital copy of the neighborhood notice, which the City shall forward by e-mail to the City's list of interested citizens.

c. ***Notice Description.*** Such notice shall contain a brief description of the application and the date, time and place of the neighborhood meeting.

d. ***Attendance Sheet.*** At the neighborhood meeting the applicant shall circulate a sign-in sheet for those in attendance who choose to sign. Such sheet shall be submitted to the Planning Authority and shall become part of the Planning Authority report submitted to the Planning Board.

e. ***Minutes.*** The applicant shall keep minutes of the meeting to be submitted to the Planning Authority and shall become part of the Planning Authority

report submitted to the Planning Board. Any other individual or entity also may submit comments on the neighborhood meeting to the Planning Authority and said comments shall become part of the Planning Authority report submitted to the Planning Board.

f. ***Presentation***. At the neighborhood meeting the applicant shall explain the pending proposal and provide an opportunity for public questions and comment.

e. *Planning Board Workshops.*

(i) ***Request a Workshop***: The applicant may request a workshop(s) with the Planning Board for a Level III site plan. The workshop will be scheduled on a date that follows the scheduled date of the neighborhood meeting, if applicable. The proposal will be scheduled for the next available Planning Board meeting that meets all public noticing requirements contained in Section 14-525.

(ii) ***Required Workshop for Master Development Plan:*** A workshop with the Planning Board is required for a Master Development Plan application. The workshop will be scheduled on a date that follows the scheduled date of the required neighborhood meeting. The proposal will be scheduled for the next available Planning Board meeting that meets all public noticing requirements contained in section 14-524.

(iii) ***Workshop Procedures***: The Planning Board workshop shall be informational and shall not result in any formal approval or disapproval of the project. The Board shall review the submission to determine if the information provides a clear understanding of the site and identifies opportunities and constraints of the site and proposed development, air public comments questions and issues, and provide

direction to the applicant regarding issues to be addressed during the final review process.

f. *Planning Board Master Development Plan Decisions.*

(i) ***Review and approval:*** An applicant proposing a Master Development Plan is seeking approval for an overall concept of development that may be brought for Final Plan approval in two or more phases and in a phase sequence that extends beyond the timeframes allowed above for Final Plan expiration of approvals. Master Development Plan approval may be sought separately or currently with the Phase I Final Level III site plan approval, and shall have an initial approval period of six (6) years, with potential extension periods as provided for in section 14-532(d).

(ii) ***Review process.*** The site plan review process for a Master Development Plan shall proceed in the same manner as a Preliminary Site Plan as detailed above, Sec. 14-524 (3)(b)(i)-(vi) and as a Master Development Plan as detailed above, Sec. 14-524 (3)(c)(i)-(iii).

(iii) ***Public hearing.*** The Planning Board shall consider a Master Development Plan at a public hearing that meets all public noticing requirements contained in Section 14-32 and the Site Plan ordinance.

(iv) ***Decisions.*** The Planning Board shall approve, approve with conditions, or deny a Master Development Plan application based upon the applicable review standards. The Planning Board may waive site plan or technical standards related to the Master Development Plan application based upon the applicable review standards. An approval, including an approval of waivers, establishes the general parameters to be adhered to for the development, including the supporting documentation for floor area ratio and/or residential density, general types of uses,

building coverage, generalized open space plans and infrastructure systems.

A Master Development Plan approval shall not be construed as final authorization of the development. Approval shall confer pending proceeding status upon the development with the effect of maintaining the applicability of regulations in effect at the time of approval for as long as the master Development Plan approval remains valid, including permissible extensions if granted.

All Level III site plans for each phase shall be in general conformance with the Master Development Plan.

g. *Final Plan*.

(i) ***Application Process***: All applications for Level II or Level III site plans shall submit a final plan for review by the Planning Authority or the Planning Board.

(ii) ***Filing Application***: Every application submitted to the Planning Authority for site plan approval shall be submitted as required under Section 14-**527**. Any proposed revisions to that site plan and any amended statement(s) shall be filed in the same way as any original submission.

(iii) Phased Development: A phased development plan may be proposed for a Level III site plan. The Planning Board may permit the Level III site plan to be divided into up to three (3) sections for phased development purposes and subject to any conditions that the board deems necessary in order to insure the orderly development of the plan. The applicant may seek approval of a phased development only if the section constitutes at least twenty (20) percent of the total development and in addition, shows the entire tract or parcel. Each phase of such project shall conform to

all standards of this article in the event that subsequent phases do not go forward. The Planning Board may extend the site plan approval for all phases up to three years from the date of approval.

(iv) Public Notices: All public notices will be sent according to the Section 14-525 of the Site Plan Ordinance.

(v) Development Review Process for Final Plan:

(a) ***Complete Application.*** The Planning Authority shall determine whether the application contains all of the items required in (Sec 527) and the Zoning Administrator will conduct a zoning review for compliance with article III of this chapter. If the application is deemed incomplete or not in compliance with Chapter III, the applicant will be contacted in writing of the finding and the additional material required to complete the submission. A review of the application will not be conducted until the application is complete. These steps shall be repeated until the application is found to be complete.

(b) ***Plan Distribution.*** When the application is complete, the final plan will be distributed to the departments for review and comments.

(c) ***Review.*** Written comments from the reviewers shall be provided to the applicant, which will include a planning staff recommendation to submit a revised final plan or to proceed to a public hearing with the Planning Board if it is a Level III site plan. The applicant may request that the Level III final site plan be submitted for a public hearing rather than submit a revised set of plans.

(d) ***One Revised Plan Set.*** Only one set of revised plans may be submitted for review at the final plan stage. The revised plans undergo the same review steps as the original submittal.

(e) ***Staff Recommendation.*** At the completion of the staff review of the final plans, the planning staff will make a recommendation to the Planning Authority or the Planning Board to approve, approve with conditions or deny the final site plan.

(f) ***Referral of plans to Planning Board.*** If at any time before approval or disapproval of a site plan for Level II development by the Planning Authority, the applicant may request a referral to the Planning Board review and a decision. The application will be scheduled for the next available planning board meeting where all public noticing requirements contained in Section 14-32 and the site plan ordinance can be met.

(g) ***Public Hearing.*** When a final site plan for a Level III development is ready to proceed to a Planning Board public hearing, it will be scheduled for the next available Planning Board meeting that meets all public noticing requirements contained in Section 14-32

and site plan ordinance.

(h) ***Decisions.*** The Planning Authority or the Planning Board shall approve, approve with conditions or deny a final site plan application based upon the applicable review standards. All improvements are subject to applicable standards of the Technical Manual and Design Manual, incorporated herein by reference. In applying said standards, the Planning Board or authority, as applicable, may vary or modify them as provided in section 14-506.

1. ***Level II Site Plan.*** The Planning Authority shall not approve a Level II Site Plan until at least ten (10) days after the required public notice has been mailed. The Planning Authority shall render a written decision to approve, approve with conditions, or deny, with all associated findings, after receipt and review of a complete final site plan and accompanying statements for Level II development.

2. ***Level III Site Plan***: When a site plan requires approval by the Planning Board, a public hearing shall be scheduled. The Planning Board shall notify the applicant in writing of its approval or disapproval of the project with all associated findings after the board's final vote to approve or disapprove the project.

4. *Expiration of Application:*

A site plan application must be diligently pursued from the date of submission. Notwithstanding the submission of a complete application, any applicant

shall delineate on the plan or supply such other information, studies or reports from qualified professionals when determined by the Planning Board or the Planning Authority to be reasonably necessary to make any of the determinations required by this article. Failure to submit required information within one hundred twenty (120) days of the date upon which the written request was made shall cause the application to expire and be deemed null and void.

(Ord. No. 277-09/10, 7-19-10; Ord. No. 25-11/12, 8-15-11; Ord. No. 176-12/13, 4-22-13)

Sec. 14-525. Public notices.

(a) *Administrative authorization.* Administrative authorization applications are exempt from noticing requirements for section 14-525.

(b) *Level I site plan: minor residential development:*

1. *Receipt of Application.* When an application for Level I: Minor Residential Site Plan is submitted for review, the Planning Authority shall notify by mail the owners of all property abutting the proposed site and any property owners directly across the street from the site.

2. *Site Plans:* Level I Site Alteration, Level II, Level III and Master Development Plan.

   a. *Receipt of Application.* When an application for Level I Site Alteration Level II or Level III development is submitted for site plan review, the Planning Authority shall notify, by mail the following, where applicable:

      (i) *Notice for Level I*: Site Alteration and Level II Site Plans shall be sent to all property owners within five hundred (500)feet of the subject property lines and to all others, including neighborhood organizations, as may be required by the Planning Authority.

      (ii) Notice for Level III Site Plans and Master Development Plan applications shall be sent to

all property owners within five hundred (500) feet of the subject property lines or within one thousand (1,000) feet if it is a subdivision within an industrial zone, unless the Planning Authority, in its discretion, chooses to notice a larger area and incur the additional expense for the expanded notification and notices shall be sent to all others, including neighborhood organizations, as may be required by the Planning Authority.

b. *Planning Board Workshop or Public Hearing.*

(i) In the case of workshops and public hearings, notice as described above shall be given to the general public by publication in a newspaper of general circulation in the City of Portland at least two (2) times, the date of the first publication to be at least seven (7) days prior to the hearing. The legal notice shall appear on the City's web site.

(ii) In the case of workshops and public hearings, notice shall be sent by regular United States mail to the applicant, to the owner(s) of the subject property and to all owners of property located within five hundred (500) feet of the subject property lines or within one thousand (1,000) feet if it is a subdivision within an industrial zone unless the Planning Authority, in its discretion, chooses to notice a larger area and incur the additional expense for the expanded notification and notices shall be sent to all others, including neighborhood organizations, as may be required by the Planning Authority.

c. *Content of the Public Notice*

(i) The public notice shall contain a brief description of the proposed development the address or location of the property involved, and contact information for the City where additional information may be obtained. The cost of said notice shall be charged to the

applicant.

(Ord. No. 277-09/10, 7-19-10; Ord. No. 25, 11-12, 8-15-11; Ord. No. 176-12/13, 4-22-13)

Sec. 14-526. Site plan standards.

Requirements for approval. The Planning Board or Planning Authority shall not approve a site plan application unless the development proposal meets the following criteria:

(a) *Transportation Standards*

1. *Impact on Surrounding Street Systems:*

The provisions for vehicular loading and unloading and parking and for vehicular and pedestrian circulation on the site and onto adjacent public streets and ways; and the incremental volume of traffic will not create or aggravate any significant hazard to safety at or to and including intersections in any direction where traffic could be expected to be impacted; and will not cause traffic congestion on any street which reduces the level of service below Level "D" as described in the 1985 Highway Capacity Manual published by the Transportation Research Board of the National Research Council, a copy of which manual is on file with the public works authority, or substantially increase congestion on any street which is already at a level of service below Level "D";

2. *Access and Circulation*:

a. Site Access and Circulation.

(i) The development shall provide safe and reasonable access and internal circulation for the entire site for all users of the site and shall comply with the standards set forth in Sections 1 of the Technical Manual.

(ii) Points of access and egress shall be located to avoid conflicts with existing turning movements and traffic flows.

(iii) Where drive up features such as gasoline pumps, vacuum cleaners and menu/order boards are permitted, they shall not extend nearer than twenty five (25) feet to the street line. The site must have stacking capacity for vehicles waiting to use these service features without impeding on-site vehicular circulation or creating hazards to vehicular circulation on adjoining streets.

b. Loading and Servicing.

(i) All developments served by delivery or other service vehicles shall provide a clear route and travel way geometric design that permits safe turning and backing for the maximum vehicle length that would service the development and does not impede site access, vehicle circulation, pedestrian movements or parking.

c. Sidewalks.

(i) All proposed developments shall provide sidewalks along all frontages in accordance with Sections 14-498 and 14-499 of the City Code, installed to City specifications as described in Section 1 of the Technical Manual. An applicant may request a waiver from curb and sidewalk installation requirements if they meet applicable waiver criteria listed in Section 14-506 (b) of the City Code.

(ii) Where sidewalks already exist but are in substandard condition, they shall be repaired or replaced in conformance with Chapter 25 of the City Code and Section 1 of the Technical Manual.

(iii) Continuous internal walkways shall be provided between existing or planned

public sidewalks adjacent to the site, transit stops and street crossings and primary building entrances on the site.

3. *Public Transit Access:*

a. For any residential development consisting of twenty (20) or more dwelling units or commercial or institutional development of at least 20,000 square feet gross floor area, a transit facility shall be constructed where the following criteria are met:

(i) The development is proposed along an existing public transit route on a local principal or minor arterial roadway, as shown in the Federal Street Classification Map provided in Section 1 of the Technical Manual.

(ii) The nearest existing transit shelter and/or bus pullout on the route is ¼ mile(1,320 feet) or more away from the closest primary building on the site, 1measured along rights-of-way.

b. Transit facilities shall consist of a transit shelter and a transit pullout bay.

c. Transit facilities shall be connected to the public sidewalk system.

d. Waiver: All or some of this standard may be waived if the Reviewing Authority determines one or more of the following:

(i) That some or all of the required improvements cannot reasonably be made due to site constraints and/or insufficient right of way width; or

(ii) That the development is not anticipated to generate public transit usage due to particular characteristics or proposed use of the development.

4. *Parking:*

a. Location and Required Number of Vehicle Parking Spaces:

(i) Off-street parking shall meet the applicable zoning requirements, except the Planning Board shall determine the parking requirement, based upon the applicant's parking study and a recommendation from the City Transportation Engineer, for new structures, building additions and changes of use with a total floor area of 50,000 sf or more and for projects, regardless of size, in the B-6, B-7 and USM Overlay zone.

(ii) Where a parking study is required, the City encourages Transportation Demand Management (TDM) strategies to be employed.

(iii) Developments proposing to exceed minimum parking requirements by 10% or more must demonstrate through a parking analysis that the amount of parking is appropriate for the proposed use of the site.

(iv) Parking spaces and aisles shall meet applicable dimensional standards as detailed in Section 1 of the Technical Manual.

(v) Parking lots, except for temporary lots to be used for less than one year, shall be constructed of a permanent and durable hard surface that is not subject to ponding or erosion.

b. Location and Required Number of Bicycle Parking Spaces:

(i) The site plan shall provide secure

bicycle parking in conformance with Section 1 of the Technical Manual and shall meet the following requirements:

(a) ***Residential structures.*** Two (2) bicycle parking spaces for every five (5) dwelling units shall be required.

(b) ***Non-residential structures.*** Two (2) bicycle parking spaces for every ten (10) vehicle parking spaces for the first one hundred (100) required vehicle parking spaces, plus one (1) bicycle parking space for every twenty (20) required motor vehicle parking space over one hundred (100) required vehicle parking spaces.

(c) Development with zero (0) to ten (10) required vehicle parking spaces shall provide at least two (2) bicycle parking spaces.

(ii) ***Waiver:*** The reviewing authority may reduce the required number of bicycle parking spaces if it is determined, based on evidence submitted by the applicant, that the proposed development is expected to generate reduced demand for bicycle parking due to characteristics or uses such as elderly or disabled persons housing or industrial uses located in outlying areas.

c. *Motorcycle and Scooter Parking.*

(i) The site plan shall accommodate access and parking for two-wheeled motorized vehicles such as motorcycles and scooters.

d. *Snow Storage.*

(i) The site plan shall include areas for snow storage or shall include an acceptable snow removal plan.

(ii) Snow storage areas may not encroach on areas designated to meet minimum parking requirements or on pedestrian walkways and shall not be located where they would adversely impact the functionality of bioretention or other stormwater management systems. Landscaping in designated snow storage areas shall be such that it can withstand the snow pile.

5. *Transportation Demand Management (TDM):*

a. The following types of development shall design and implement a Transportation Demand Management (TDM) plan:

(i) All Level III development in the B7 zone;

(ii) All commercial or institutional uses of 50,000 sf or more total floor area;

(iii) All commercial or institutional uses designed to accommodate 100 or more employees and, for educational institutions, 100 or more students.

b. The TDM Plan shall establish trip reduction targets and shall employ a combination of the following elements to achieve these targets:

(i) Public transit incentives;

(ii) Parking cash-out;

(iii) Car sharing;

(iv) Car and van pooling incentives;

(v) Guaranteed ride home programs;

(vi) Other such strategies that reduce single

occupancy vehicle trips to and from the development.

c. The development shall comply with the City of Portland TDM standards as described in Section 1 of the Technical Manual.

(b) *Environmental Quality Standards*

1. *Preservation of Significant Natural Features:*

a. The site plan shall preserve and protect significant natural features by incorporating them into site design. Significant natural features shall be defined as:

(i) Populations of trees and plants listed on the Official List of Endangered and Threatened Plants in Maine, published by the Maine Natural Areas Program.

(ii) Habitat for species appearing on the official state of federal list of endangered or threatened animal species;

(iii) High and moderate value waterfowl and wading bird habitat including nesting and feeding areas, as defined by the Department of Inland Fisheries and Wildlife;

(iv) Aquifers on islands in Casco Bay, as identified in the City of Portland Island Groundwater Management Study and/or by the Maine Geological Survey;

(v) Waterbodies including wetlands, watercourses, significant vernal pools and floodplains. These features may also be regulated by Division 26, Shoreland Regulations, Division 26.5, Flood Plain Management Regulations and Division 26.7, Stream Protection Ordinance of the City Code, along with Sections 5 and 8 of the Technical Manual or other State

regulations.

b. Where areas set aside for preservation are part of a larger existing habitat block extending beyond the boundaries of the site, the contiguity of these features shall be preserved, where possible.

c. Waiver: Where complete preservation of significant natural features substantially compromises development of the site otherwise permitted by zoning, the Reviewing Authority may reduce the requirement to accommodate development provided that the applicant demonstrates compliance with applicable state and federal regulations and implements preservation measures to the extent practicable.

2. *Landscaping and Landscape Preservation:*

a. *Landscape Preservation.*

(i) Site development shall be designed to incorporate, and limit disturbance to or removal of existing trees, as specified below. Preserved trees may be counted towards site landscaping requirements.

(ii) All development subject to zoning setbacks shall preserve a minimum of 30% of existing trees ten (10) inches DBH or greater within the required setback area unless trees are non-native invasive species, as identified in Section 4 of the Technical Manual, or are deemed unsalvageable by the Portland City Arborist or their designee.

(iii) Protection during Construction: The site plan shall include adequate measures to protect vegetation to be preserved from construction impacts, in accordance with the tree preservation standards listed in Section 4 of the Technical Manual.

(iv) Waiver: Where the applicant can demonstrate that preservation of existing vegetation would compromise development of the site, the Reviewing Authority may permit the substitution of replacement landscaping in other areas of the site, and/or a financial contribution to the City of Portland Tree Fund for an amount proportionate to the cost of trees removed, as described below:

(a) For each tree required to be preserved that is removed and is greater than 16" in caliper DBH, two (2) replacement trees of a species identified on the City of Portland Recommended Tree List shall be planted on the site as detailed in Section 4 of the Technical Manual).

(b) For each tree required to be preserved that is removed and is between ten (10) and sixteen (16) inch DBH, one (1) replacement tree of a species identified on the City of Portland Recommended Tree List shall be planted on the site as detailed in Section 4 of the Technical Manual).

(c) Where the planting of replacement trees on the site is not feasible, the applicant shall contribute an amount proportionate to the cost of required replacement trees to the City of Portland Tree Fund, as detailed in Section 4 of the Technical Manual.

(v) In addition to the provisions of this section, all development within the Shoreland Zone shall meet the requirements of Division 26, Shoreland

Regulations.

b. *Site Landscaping.*

(i) Landscaped Buffers:

(a) ***Screening.*** Loading and servicing areas, dumpsters, storage areas and utility structures, except for renewable energy systems, shall be screened from view from public sidewalks, streets and adjacent properties by dense evergreen landscaping, fencing, masonry wall building walls, or a combination thereof.

(b) ***Understory Plantings.*** All development subject to required zoning setbacks shall include a minimum of six (6) shrubs per forty five (45) linear feet of all frontages as measured along the property line. A shrub shall be defined as one shrub, one ornamental grass, and/or 3 perennials. Required shrubs may be installed anywhere on the site, including a green roof, if proposed, and may be planted in any arrangement. Existing vegetation to be preserved on the site may be counted towards this requirement as detailed in Section 4 of the Technical Manual.

(c) ***Industrial and Commercial Zones.*** For non-residential development proposed in an industrial or commercial zone subject to required zoning setbacks and abutting a residential zone, an evergreen, densely landscaped buffer of not less than ten (10) ft wide and six (6) ft tall is required along the side abutting the

residential zone. Where site constraints prevent such a buffer from being established, the width of the landscaped buffer may be reduced but shall include architectural quality fencing of not less than six (6) ft tall and a mix of evergreen and deciduous trees spaced no further than twenty (20) ft apart along the abutting the residential zone.

(d) *Buffer from Surrounding Development.* All residential development shall provide and/or preserve evergreen vegetated buffers where necessary to buffer the development from detrimental impacts of existing surrounding development.

(ii) *Parking Lot Landscaping:*

(a) Developments with five (5) or more parking spaces shall include at least two (2) trees (or one (1) tree and three (3) shrubs) per five (5) parking spaces planted in landscaped islands to screen shade and break up parking. Trees and shrubs in parking lots may be in informal groups, straight rows, or concentrated in clusters as detailed in Section 4 of the Technical Manual.

(b) Landscaped islands shall be distributed so that uninterrupted pavement does not exceed forty (40) parking spaces.

(c) Landscaped islands shall be curbed and a minimum of eight (8) feet in width, not including curbing. The incorporation of bioretention into landscaped islands is strongly

encouraged.

(d) Vehicle display lots shall be subject to the parking lot landscaping standards of **this section.**

(e) Waiver: Where site constraints prevent implementation of all or a portion of required parking lot landscaping, as determined by the Reviewing Authority, the requirements may be all or partially waived and the applicant shall contribute an amount proportionate to the cost of required parking lot trees to the City of Portland Tree Fund.

(iii) *Street Trees:*

(a) All development shall include street trees in numbers and locations as specified in Section 4 of the Technical Manual. Street trees shall be planted in the right of way, as specified in Section 4 of the Technical Manual. Street trees shall be of a species identified on the City of Portland Recommended Tree List, unless otherwise approved by the Portland City Arborist or his/her designee.

(b) Waiver. Where the applicant can demonstrate that site constraints prevent the planting of required street trees in the City right of way, the Reviewing Authority may permit the planting of street trees in the front yard, within ten feet of the property line. Existing preserved healthy trees that are six (6) inches or more in caliper and are on the site within ten (10) feet

of the property line may be counted towards this requirement. If planting street trees is neither feasible in the City right of way nor within the site, the applicant shall contribute to the City of Portland Tree Fund an amount proportionate to the cost of required street trees.

3. *Water Quality, Stormwater Management and Erosion Control:*

a. All development must demonstrate that the proposed site improvements are designed to minimize the amount of stormwater leaving the site. This must include consideration of the design and location of improvements to minimize the total area of impervious surface on the site and stormwater management techniques to minimize both the volume and rate of runoff from the lot. The stormwater management plan must demonstrate the following:

(i) Any stormwater draining onto or across the lot in its pre-improvement state will not be impeded or re-directed so as to create ponding on, or flooding of, adjacent lots;

(ii) Any increase in volume or rate of stormwater draining from the lot onto an adjacent lot following the improvement can be handled on the adjacent lot without creating ponding, flooding or other drainage problems and that the owner of the lot being improved has the legal right to increase the flow of stormwater onto the adjacent lot;

(iii) Any increase in volume or rate of stormwater draining from the lot onto City property following the improvement can be handled without creating ponding,

flooding or other drainage problems and that the owner of the lot being improved has the legal right to increase the flow of stormwater onto the City's property; and

(iv) Any increase in volume or rate of stormwater draining from the lot into the City's separate storm sewer system can be accommodated in the system without creating downstream problems or exceeding the capacity of the storm sewer system.

b. All development, except Level I minor residential development, shall comply with the standards of Section 5 of the Technical Manual including basic, general and flooding standards, as applicable, to prevent and control the release of pollutants to waterbodies, watercourses, wetlands and groundwater, and reduce adverse impacts associated with increases or changes in flow, soil erosion and sedimentation.

c. All development, except Level I minor residential development, that are located within the watershed of an Urban Impaired Stream shall comply with the Urban Impaired Stream standards pursuant to Maine DEP Chapter 500 Stormwater Management Rules, as described in Section 5 of the Technical Manual.

d. Level I: minor residential development shall comply with basic erosion control standards, as described in Section 6 of the City of Portland Technical Manual.

e. Development shall not pose a risk of groundwater contamination either during or post-construction, as described in Sections 5 and 9 of the Technical Manual.

f. Development shall provide for adequate and sanitary disposal of sewage as described in Section 2 of the Technical Manual.

(c) *Public Infrastructure and Community Safety Standards.*

1. *Consistency with City Master Plans:*

a. All developments shall be designed so as to be consistent with City Council approved master plans and facilities plans and with off-premises infrastructure, including but not limited to sewer and stormwater, streets, trails, pedestrian and bicycle network, environmental management or other public facilities (see Section 15 of the Technical Manual).

b. The site plan shall include suitable easements, rights and improvements to connect or continue off-premises public infrastructure as may be required by the reviewing authority.

2. *Public Safety and Fire Prevention:*

a. The development shall incorporate the following public safety principles for Crime Prevention through Environmental Design (CPTED) into site design to enhance the security of public and private spaces and to reduce the potential for crime:

(i) Natural surveillance that promotes visibility of public spaces and areas.

(ii) Access control that promotes authorized and/or appropriate access to the site.

(iii) Territorial reinforcement that promotes a sense of ownership and responsibility through environmental design.

b. Provide adequate emergency vehicle access to the site in accordance with City standards for

street widths and turning radii, as described in Section 1 of the Technical Manual.

c. Be consistent with City public safety standards, Section 3 of the City of Portland Technical Manual, including but not limited to availability and adequacy of water supply and proximity of fire hydrants to structures.

3. *Availability and Adequate Capacity of Public Utilities:*

a. The development shall not overburden sanitary sewers and storm drains, water lines, or other public infrastructure and utilities. Development shall provide adequate utility capacity and distribution network on-site and in connection to surrounding locations and facilities.

b. Electrical service shall be underground unless otherwise specified for industrial uses, or if it is determined to be unfeasible due to extreme cost, the need to retrofit properties not owned by the applicant or complexity of revising existing overhead facilities.

c. Installation of new or upgrades to existing sanitary sewers, storm drains, water lines or other utilities shall meet the provisions outlined in Section 2 and Section 9 of the Technical Manual.

d. All development within 200 feet of a public sanitary collection and treatment system shall connect sanitary sewer lines into the nearest available public sewer. If a public sanitary collection and treatment system is not available, a private wastewater system may be used according to the requirements of Chapter 24 of the City Code and Section 2 of the Technical Manual.

e. All sanitary sewer and stormwater utilities proposed as part of the development shall be

designed to City standards as specified in Section 2 and Section 4, Chapter 500 Stormwater Management Standards, of the Technical Manual.

f. All residential development of 20 units or more, commercial development and industrial development shall provide for the temporary storage and timely removal of all trash and recyclable materials including, at a minimum, paper, corrugated cardboard, plastics and metals. Storage containers for recyclable materials shall be separated from trash containers. All exterior storage of trash and recyclables shall be screened from view from public sidewalks, streets and adjacent properties.

4. Reserved.

(d) *Site Design Standards*

1. *Massing, Ventilation and Wind Impact:*

a. The bulk, location or height of proposed buildings and structures shall not result in health or safety problems from a reduction in ventilation to abutting structures or changes to the existing wind climate that would result in unsafe wind conditions for users of the site and/or adjacent public spaces.

b. The bulk, location or height of proposed buildings and structure shall minimize, to the extent feasible, any substantial diminution in the value or utility to neighboring structures under different ownership and not subject to a legal servitude in favor of the site being developed.

c. Development shall locate all HVAC venting mechanisms to direct exhaust away from public spaces and residential properties directly adjacent to the site.

2. *Shadows:*

a. All development outside the B3, B5, B6 and B7 zones shall be designed to avoid and/or mitigate the adverse impacts of shadows cast by new structures or building additions from falling on publicly accessible open space where such shadowing would adversely affects the viability of its use and/or the viability of existing vegetation. Examples of publicly accessible open spaces that may require direct sunlight for a portion of the day to maintain the viability of existing vegetation and/or use(s) include but shall not be limited to sitting or sunning areas, community gardens, grass sports fields, landscaped areas, children's play areas). For submittal requirements and additional information, please refer to Section 11 of the Technical Manual.

3. *Snow and Ice Loading:*

a. The development shall be designed to prevent significant amounts of accumulated snow and ice from loading or falling onto adjacent properties or public ways.

4. *View corridors:*

a. The massing, location and height of development shall not substantially obstruct public views corridors identified in the Downtown Vision View Corridor Protection Plan, as provided in the City of Portland Design Manual, Appendix 1.

5. *Historic Resources:*

a. Developments affecting designated landmarks or within designated historic districts or historic landscape districts: Any proposed development required to obtain a certificate of appropriateness under article IX (historic

preservation) of the land use code shall be exempt from the following design standards, as described in the Design Manual:

(i) Section (b) of the Design Manual (development in B-3 zone), except for (b) (1) e.2. (increasing setback beyond street build-to line), (b) (1)f. (shadow impact on open space), (b)(1)h. (wind impacts), and (b)(1)g. (setbacks from existing structures);

(ii) Section (c) of the Design Manual (development in B-5 and B-5b zones), except for (c)a. (shared infrastructure) and (c)d. (parking lot location);

(iii) Section (k) of the Design Manual (small residential lot development in R-6 zone);

(iv) Section (e) of the Design Manual (University of Southern Maine);

(v) Section (f) of the Design Manual (development in B-7 zone), except for (f)(1)a. (transportation demand management);

(vi) Section (g) of the Design Manual (development in Eastern Waterfront zone).

b. Development adjacent to designated landmarks, historic districts or historic landscape districts: when any part of a proposed development is within one hundred (100) feet of any designated landmark, historic district or historic landscape district, such development shall be generally compatible with the major character-defining elements of the landmark or portion of the district in the immediate vicinity of the proposed development. Character-defining elements of landmarks and historic districts are identified in the historic resources inventory and respective historic district designation reports For the purposes of this provision,

"compatible" design shall be defined as design which respects the established building patterns and visual characteristics that exist in a given setting and, at the same time, is a distinct product of its own time. To aid the planning board in its deliberations, historic preservation staff shall provide a written analysis of the proposed development's immediate context, identifying the major character-defining elements and any established building patterns that characterize the context.

c. Preservation and/or Documentation of Archaeological Resources. Where a state or local archaeological resource is known to exist or is discovered on the site, the developer shall inform the City and State and shall protect and/or document such resources.

(i) Protection shall include leaving archaeological resources untouched beneath a new development through adaptation of foundation design or architectural layout.

(ii) Where the applicant can demonstrate that complete protection is not feasible, the applicant shall excavate and document archeological resources. Such measures shall be conducted in consultation with the City Historic Preservation Program and Maine Historic Preservation Commission. For resources of state significance, excavation and documentation shall be conducted by a qualified professional, in coordination with Maine Historic Preservation Commission. Local archeological resources may or may not be recognized by the Maine Historic Preservation Commission as significant and shall include the following:

(a) Original seawall structure located

landward of Commercial Street.

(b) Inactive historic family cemetery plots.

(c) Historic railroad beds including but not limited to the Portland-Lewiston interurban railroad.

(d) Original structure and/or landforms associated with the Cumberland and Oxford Canal.

(e) Buried portions of colonial and post-colonial period structures or built features located on the Portland Peninsula predating the Great Fire of 1866.

(f) Pre-colonial occupation sites identified by shell middens or other evidence.

(g) Sites listed or eligible for listing on the National Register of Historic Places.

(iii) Waiver Criteria: In order to preserve archeological resources, the Planning Authority may wave standards listed in the City of Portland Technical Manual where necessary if it is determined that such a waiver would not jeopardize the health, safety or welfare of the development's occupants, the public, or the natural environment.

6. *Exterior Lighting:*

a. *Site Lighting.*

(i) All exterior site lighting, including lighting of building entrances, shall be full cutoff with no light emitted above the horizontal plane or spilled onto adjacent properties and streets.

Illumination levels shall be adequate but not excessive for the safety, comfort and convenience of occupants and users of the site, and shall confirm to applicable standards of Section 12 of the Technical Manual.

(ii) For major or minor site plans within or abutting a residential use or zone where light from the proposed development may adversely impact adjacent residential properties, exterior lighting shall employ house-side shielding.

b. *Architectural and Specialty Lighting.*

(i) Architectural and specialty lighting, but not up-lighting, of such features as architectural details, monuments, public art or other site features shall be designed to illuminate specific details or attributes only and shall meet the standards of Section 12 of the Technical Manual.

(ii) Up-lighting by any method is prohibited except for public buildings and parklands, clock towers and steeples, landscape features, designated historic landmarks, flags of state, federal or national jurisdictions, and public art. Such light fixtures, brackets, conduits and all other components shall be designed by a lighting professional and shall be scaled and placed to minimize their visibility and installed in accordance with the standards contained in Section 12 of the Technical Manual.

c. *Street Lighting.*

(i) Municipal street lighting shall be adequate for the safety and comfort of pedestrians and motorists and, where applicable, shall conform to specific

lighting district requirements, as specified in Section 10 of the Technical Manual.

7. *Noise and Vibration:*

Projected noise levels for all developments shall meet applicable zoning requirements.

a. *HVAC and Mechanical Equipment.*

(i) All heating, ventilation and air conditioning equipment (HVAC), air handling units (AHU), emergency generators, and similar equipment shall meet applicable state and federal emissions requirements and shall comply with the following:

(a) Be located to the interior of the site, away from abutting residential properties;

(b) Be screened from view from any public street and from adjacent sites by structure walls, evergreen landscaping, fencing, masonry wall or a combination thereof.

(ii) In addition to the requirements listed above, emergency generators shall not be activated for more than one hour per week for routine maintenance and testing. Noise levels shall not exceed City standards except in designated emergencies or for emergency generator testing. Emergency generator testing is permitted only between the hours of 9:00 a.m. and 5:00 p.m., Monday through Friday.

8. *Signage and Wayfinding:*

a. All signage shall meet applicable requirements

of Division 22 of the City Code, in addition to provisions listed below:

(i) Historic Preservation: Any new sign or change in appearance of an existing sign located on a designated Historic Landmark or in a Historic District or Historic Landscape District shall be subject to the standards of Article IX and shall require a Certificate of Appropriateness. If there is a conflict between the standards of Article IX and of Division 22 or other provisions of the City Code, the stricter standards shall apply.

(ii) Commercial Signage and Directional Traffic Signage: The size, scale, proportions, design, materials, placement and source and intensity of illumination of all permanent or freestanding building signs shall be designed to complement the subject building and its immediate context, as follows:

(a) Signage shall not conceal architectural features such as window sills, lintels or cornices from view.

(b) Signs shall be designed and sized to fit the scale and proportions of the building and the feature or area of the building to which it is affixed.

(c) Freestanding signs shall not adversely affect visibility at intersections or access drives.

(d) Sign lighting shall be downwardly directed, internally illuminated and/or shielded to avoid glare and light spillover towards the sky.

(e) Signs shall not be affixed to rooftop mechanicals, mechanical

penthouses or other rooftop appurtenances unless those appurtenances have been screened and integrated into the architecture of the development.

(iii) On-site directional traffic signage may be provided to enable users to safely and easily navigate into, around and out of the site. Directional signage shall not adversely affect visibility at intersections on or off the site.

(iv) Waiver Criteria: An applicant for site plan review that was either denied for failure to comply with the requirements of or is seeking a waiver as part of their site plan application from Section 14-369.5 shall meet the following standards for approval:

(a) Signs shall meet the requirements of Section 14-526 (e) 2. - Signage and Wayfinding;

(b) The size, scale, proportions, design, materials, placement, quantity and source and intensity of illumination of any approved signage shall be designed to complement and enhance the architectural attributes of the building(s) to which they are attached or to which they are visually related. In addition, such signs shall be appropriate to the scale and character of the neighborhood in which it is located and shall be designed to suit the conditions from which it will be viewed, especially in relation to the distance, travel speed, and mode of travel of the viewing public;

(c) The signage shall either be of special design merit or shall

respond to unique circumstances or characteristics associated with the subject property;

(d) The provisions of this subsection shall be limited to commercial uses in business or industrial zones, industrial uses or institutional uses.

9. *Zoning Related Design Standards:*

a. Development of certain types and/or proposed in certain zones, as specified below, are subject to design standards in addition to the provisions of Section 14-526 (a) in order to ensure designs that contribute to and enhance the goals and policies for specific districts of the City. The City of Portland Design Standards is listed in the City of Portland Design Manual, which is included by reference. If the development is located in a historic district or associated with a historic landmark, City of Portland Historic Preservation standards shall supersede:

(i) B3, B5, B5-b, B7 Zones, and B6 and EWPZ Waterfront Zones: Development in the B3, B5, B5-b, B7 business zones and in the EWPZ waterfront zone shall be designed to support the development of dense, mixed-use neighborhoods with attractive, safe and convenient street level pedestrian environments as demonstrated by compliance with all applicable design standards listed in the Design Manual.

(ii) RP Zone: Development in the RP Residential Professional zone where there is a discernable architectural style or character to existing structures in the immediate vicinity in which the development is proposed shall not be incongruous to that established style or character as demonstrated by compliance

with all applicable design standards listed in the Design Manual.

(iii) B1, B1-b, B2, B2-b Zones: Development in the B1, B1-b, B2 and B2-b business zones shall provide an established street wall with entrances and public portions of the building oriented to and directly accessible from the public sidewalk and shall be designed and scaled to be compatible with surrounding residential and commercial development as demonstrated by compliance with all applicable design standards listed in the Design Manual.

(iv) USM Overlay Zone: Development in the University of Southern Maine (USM) Overlay Zone shall be designed to support a cohesive campus environment while integrating with and respecting the residential character of surrounding neighborhoods as demonstrated by compliance with all applicable design standards listed in the Design Manual.

(v) Residential Developments: Residential developments, as listed below, shall integrate with and respect the character of surrounding residential development in terms of architectural form, landscaping and open space, façade materials, roof pitch, massing and height as demonstrated by compliance with all applicable design standards as listed in the Design Manual.

(vi) Residential Development in the following districts:

(a) Planned Residential Unit Developments (PRUDS) in the R3, R5 and R5a residential zones;

(b) Multiple family and multiplex developments in the R5 zone;

(c) Small residential lot development of single family homes in the R5 zone;

(d) Multiple family and multiplex development in the R6 zone on lots of 10,000 square feet or less.

(vii) Residential Development of the following types:

(a) Manufactured housing parks;

(b) Two-family and multiple family housing not already specified in (a) above;

(c) Special needs independent living units;

(d) Lodging houses;

(e) Bed and breakfasts;

(f) Emergency shelters.

(viii) ***B-7 Design Standards for Additional Height in District A:*** In the B-7 zone, the Planning Board, when conducting review of a Master Development Plan or a Level III Site Plan, as applicable, may modify the stepback provisions of Section 14-296(a)(5)(b), relating to buildings allowed as a conditional use to exceed one hundred and twenty-five (125) feet up to one hundred and sixty-five (165) feet in height, provided the following conditions are met:

(a) Each building exceeding one-hundred and twenty-five (125) feet shall contain at least 20 dwelling units per building.

(b) Building wall stepback requirements

along public street frontage:

i. Building with frontage on one street: minimum ten (10) foot stepback between third and fifth stories and a minimum ten (10) foot stepback between the one hundred twenty-five (125) and one hundred forty-five (145) foot level.

ii. ***Building with frontage on multiple streets:*** Above paragraph (i) requirement along longest building façade street wall, and of the remaining street walls the same requirement as paragraph (i) or a 15 foot wide streetscape improvements area containing a public sidewalk, landscaping and other streetscape improvements within the abutting street right-of-way and/or private property along the remaining street frontage. A building with frontage on four streets shall meet the above requirement except that two of the streets shall have the stepback requirement.

iii. The Planning Board shall have the authority to waive one or more of the required stepbacks provided the following is met:

1. The depth of the building lot precludes a building having an average minimum lot depth dimension of one hundred seventy (170) feet; or

2. The proposed building has an architecturally significant design that is articulated to avoid a monolithic appearance

and emphasizes slender, vertically-oriented proportions while employing a variety of scales, materials, fenestration, and massing to assure a rich visually interesting experience as viewed within the context of the downtown skyline and provide visual interest and human scale at the pedestrian level;

3. In the event such a waiver is granted the Planning Board may require the applicant to mitigate the impacts of the waiver by requiring the following:

   a. Along all public street frontages and public open spaces, all buildings (regardless of height) shall meet the B-7 Design Standard E-4 Articulation to maintain a pedestrian scale through the use of building elements at the street level as listed in this standard along no less than 60% of the building's horizontal length.

   b. Along all public street frontages and public open space for the building(s) over one hundred twenty-five (125) feet, a canopy, awning or similar permanent architectural feature to provide pedestrian protection and wind mitigation shall be provided within the first thirty-five

(35) feet of height.

c. In order to preserve view corridors and to maintain a varied skyline, all buildings above one hundred twenty-five (125) feet within a single development site should be separated to avoid the appearance of a tall, solid block massing. In accordance with this policy, development sites of 500 feet or greater as measured parallel to Marginal Way, the aggregate building façade widths above 85 feet shall not exceed fifty percent (50% of the total development site distance parallel to Marginal Way. Buildings over one hundred twenty-five (125) feet in height that are being reviewed as separate phases of a Master Development Plan shall be entitled to meet the fifty percent (50%) building requirement in aggregate for all such buildings over one hundred twenty-five (125) feet in height in the Master Development Plan, provided that view corridors are retained as each phase is built.

d. The applicant shall demonstrate building design elements and location will reasonably mitigate downdraft effects of the proposed building or buildings.

b. ***Master Development Plan Design Standards***: A Master Plan shall comply with the design and development standards of the zone in which it is located, and shall achieve a cohesive land development consistent with the assets of the site, land uses, functional activities, and major design elements, such as buildings, roads, utilities, drainage systems and open space as well as with the Master Development Plan Standards of Review contained in Section 14-524.

10. ***Reserved.***

(e) ***Conditions***

1. Notwithstanding the provisions of subsections (a)through (d) of this section, the Planning Authority or Planning Board may impose any condition upon its approval of any site plan: (1) to minimize or abate any adverse impact of the proposed development on the value or utility of other private property, or on public property or facilities, to the extent feasible; or (2) to bring the development into compliance with the requirements of subsections (a) through (d); or (3) to minimize any other adverse environmental effects of the proposed development. Such conditions may include, but are not limited to, enclosing of equipment or operations, imposing limitations upon the hours of operation, or requiring the employment of specific design technologies, modes of operation, or traffic patterns, and may also include the construction of, or financial contribution to the construction of, on- or off-premises public facilities including, without limitation, streets and sewers impacted by the development. All such conditions shall be consistent with the purposes set forth in section 14-521.

(f) ***General Waiver***

1. Except for the requirements set forth in Section

14-526 (a)-(d) for which individual waiver criteria are provided, the Reviewing Authority if it finds that extraordinary conditions exist or that undue hardship may result from strict compliance with these regulations may vary the regulations so that substainal justice may be done and the public interest secured; provided that such variation will not have the effect of nullifying the intent and purpose of the land development plan and the regulations of this article.

(Ord. No. 277-09/10, 7-19-10; Ord. No. 175-12/13, 4-22-13; Ord. No. 176-12/13, 4-22-13)

Sec. 14-527. Content of site plan applications.

(a) ***Level I General Submissions.*** The applicant shall submit for review a packet of materials and submissions in a form and content as specified by the Department of Planning and Urban Development. Such submissions shall contain, at a minimum, the following elements:

1. Application Form;

2. Applicable Fees;

3. Project Description;

4. Evidence of Right, Title and Interest;

5. Evidence of State and/or Federal Approvals, if applicable;

6. Written assessment of project compliance with applicable zoning requirements;

7. Summary of existing and/or proposed easements, covenants, public or private rights-of-way, or other burdens on the site;

8. Written requests for waivers from the City's Site Plan or Technical Standards, if applicable;

9. Boundary survey stamped by a professional surveyor licensed to practice in the State of Maine, drawn to

scale and tied into the State Plane Coordinates, NAD 1983, Maine West Zone, as specified in Section 13 of the Technical Manual.

(b) ***Level I Site Plan Submissions.*** Site plans submitted as part of a Level I site plan application for a minor residential or site alteration proposal shall include a site plan based upon the boundary survey showing the following information:

1. Existing and proposed structures, as applicable, and distance from property lines;

2. Existing and proposed paved areas, if applicable;

3. For minor residential only, proposed ground floor area and finish floor or sill elevation;

4. For minor residential only, exterior building elevation drawings (all sides);

5. Location of proposed utilities;

6. Identification and proposed protection measures for any significant natural features, as defined in Section 14-526 (b);

7. Identification and proposed protection for alterations of watercourses, if applicable;

8. Identification and, if applicable, proposed impacts and protection measures for wetlands;

9. For Level I minor residential projects only, soil type;

10. Existing and proposed grades and contours;

11. Location, dimensions and ownership of easements, public or private rights of way, both existing and proposed;

12. Proposed stormwater management control;

13. Soil erosion control plan;

14. Existing vegetation to be preserved, proposed site landscaping, screening and proposed street trees, if

applicable;

15. Existing and proposed curb and sidewalk;

16. Location, area, and limits of the proposed site disturbance or alteration;

17. Proposed Pier, Dock, Wharf, Pier, or Slope Stabilization reconstruction in the Shoreland Zone, if applicable.

(c) ***Level II, III, and Master Development Plan General Submissions.*** The applicant shall submit for review a packet of materials and submissions in a form and content as specified by the department of planning and urban development. Such submissions shall contain, at a minimum, the following elements.

1. Application form;

2. Applicable fees;

3. Project description;

4. Evidence of right, title and interest;

5. Evidence of state and/or federal approvals, if applicable;

6. Written assessment of project compliance with applicable zoning requirements;

7. Summary of existing and/or proposed easements, covenants, public or private rights-of-way, or other burdens on the site;

8. Written requests for waivers from the city's site plan or technical standards, if applicable;

9. Evidence of financial and technical capacity;

10. Boundary survey stamped by a professional survey or licensed to practice in the State of Maine, drawn to scale and tied into the State Plane Coordinates, NAD 1983, Maine West Zone, as specified in section 13 of the Technical Manual. A boundary survey of the site, may be waived by the Planning Authority for a review of Master

Development Plan, where an existing conditions plan is available. The Boundary Survey requirement shall be met for each phase of development.

(d) ***Level II and Level III Preliminary Site Plan Submissions.*** A preliminary site plan is an optional submittal as part of the Level II and III site plan application review process. If the applicant elects to submit a preliminary site plan for review, it shall include the following information:

1. Proposed grading and contours;

2. Existing structures with distances from property lines;

3. Proposed site layout and dimensions for all proposed structures, paved areas, and pedestrian and vehicle access ways;

4. Preliminary design of proposed stormwater management system in accordance with Section 5 of the Technical Manual;

5. Preliminary infrastructure improvements;

6. Preliminary Landscape Plan in accordance with Section 4 of the Technical Manual;

7. Location of significant natural features located on the site as defined in Section 14-526 (b)(1);

8. Proposed buffers and preservation measures for significant natural features, as defined in Section 14-526(b)(1);

9. Location, dimensions and ownership of easements, public or private rights of way, both existing and proposed.

10. Exterior building elevations.

(e) ***Master Development Plan.*** A Master Development Plan is an optional submittal as part of the Level III site plan application review process. If the applicant elects to submit a Master Development Plan for review, it shall include the following information in addition to the general submission requirements of Sec. 14-527 (c)(d):

1. A neighborhood context map, at a scale not less than one (1) inch equals one hundred (100) feet, providing a graphic description of the neighborhood in which the tract lies, including roads, utilities and other public facilities, major existing buildings and structures. There shall also be a statement and/or plan as to the general impact of the proposed Master Development Plan upon the area, indicating how the Master Development Plan relates to surrounding properties and what measures will be taken to create appropriate transitions and access from the subject property to abutting public properties (i.e. parks, waterfront, etc.) or other neighboring tracts (if applicable).

2. A conceptual site plan drawn to a scale of not less than one (1) inch equaling fifty (50) feet, or series of drawings at the same scale, and any necessary supporting information, showing:

   (i) The approximate boundary lines of existing and proposed lots within and immediately adjacent to the Master Development Plan, with approximate areas and dimensions. With respect to residential areas, the proposed density, lot configuration, circulation and a typical plot plan shall be included in the application.

   (ii) An analysis of the natural features of the site, including existing and/or adjacent natural waterways, wetlands, floodplains, topography, soil conditions and other natural features requested or required by the Planning Authority.

   (iii) An analysis of the designated view corridors, historic resources, and archeological resource associated with the site.

   (iv) Existing/proposed buildings and other significant structures, building groupings, exterior building elevations and entrances, parking areas, and other significant physical features of the site.

   (v) Context drawings, perspective renderings, photographic montages, or computer generated

graphics depicting the proposed development within the surrounding building and environmental context. Building elevation drawings shall include the following:

a. Illustrations of all sides of the structures;

b. Views of major entries or prominent building features;

c. Illustration of building articulation and elements;

d. Building finish composition; and

e. Pedestrian and streetscape elements of the Master Development Plan.

The submission shall include a digital three-dimensional model tied to a specific location that is submitted as a KML, KMZ, DXF, or DWG file on a CD or DVD or such format as approved by the Planning Authority. It is the applicant's responsibility that the model is complete and represents the proposed development accurately using best practice modeling techniques and layering standards.

(vi) Major circulation patterns surrounding and serving the site, the existing and proposed lines of streets (including the street width), ways, easements and any public areas within or next to the site.

(vii) Major landscaping elements, features, open space, and plans for preservation of natural features.

(viii) An analysis of the public safety services needed to support the master plan.

(ix) An analysis of the anticipated impacts on the public school system to support the Master Development Plan.

(x) A generalized drainage plan for the site, indicating drainage ways, flow, points of outfall, and indicating impacts of development on affected drainage basins. The plan shall include contour information at not less than two-foot (2') contour intervals and document anticipated quantities of run-off characteristics. General statements concerning storm water management techniques shall also be submitted with the application.

(xi) The plan shall clearly show Master Development Plan boundaries, north arrow, date, scale, legend, the title "Master Development Plan Concept Site Plan" followed by the formal project name, and the name(s) of applicant(s), engineer(s), designer(s) and/or agent(s).

(xii) A traffic analysis and recommendations prepared by a registered professional engineer qualified to conduct such studies, including current traffic counts for streets surrounding the project, analysis of the existing capacity of those streets, projections of the amount of traffic that will be generated by the proposed development, and the ability of the street system to absorb the increased traffic without decreasing the level of service below an acceptable level – said level to be determined by the Planning Authority in concert with the Department of Public Services. In cases where the Master Development Plan is subject to a Traffic Movement Permit (TMP) for all phases, the TMP submissions and review shall supersede these requirements.

(xiii) A utilities analysis and recommendations prepared by a registred professional engineer qualified to conduct such studies. Said analysis shall contain an inventory of existing utilities including, but not limited to, storm sewers and drains, sanitary sewers, electrical lines, fire alarm boxes and lines, gas lines/mains, water mains, lighting, curb and gutter, etc. Said inventory shall

illustrate utility locations, sizes, diameters, carrying capacity and present load on the system. The engineer's report shall state if the current system is capable of adequately serving the proposed development. If the current utility system is found to be inadequate for the proposed development, the report shall confirm the deficiencies and make recommendation(s) as to the infrastructure improvements necessary to properly service the proposed development and maintain the existing service. The report shall also present a formal plan for infrastructure improvements, documenting timing, funding mechanisms and coordination with the City; and

(xiv) Any other supportive information the applicant feels may be beneficial in the evaluation of the request.

(xv) The Planning Authority or Planning Board may reduce the level of information required at the Master Development Plan review stage, provided more detailed supportive documentation is provided at final Level III Site Plan Review of the Master Development Plan or phases thereof.

(f) ***Level II and III Final Site Plans.*** A final site plan for a Level II or III site plan application shall be based upon a standard stamped boundary survey meeting City of Portland standards, be stamped by a professional engineer licensed to practice in the State of Maine, shall be submitted with all required written submittals and shall include the following information:

1. Existing and proposed structures, as applicable, and distance from property lines;

2. Approximate location of structures on parcels abutting the site;

3. All streets and intersections adjacent to the site and any proposed geometric modifications to those streets or intersections;

4. Location, dimensions and materials of all existing and proposed driveways, vehicle and pedestrian access ways, and bicycle access ways, with corresponding curb lines;

5. Engineered construction specifications and cross-sectional drawings for all proposed driveways, paved areas, sidewalks;

6. Location and dimensions of all proposed loading areas including turning templates for applicable design delivery vehicles;

7. Existing and proposed public transit infrastructure with applicable dimensions and engineering specifications;

8. Location of existing and proposed vehicle and bicycle parking spaces with applicable dimensional and engineering information;

9. Location of all snow storage areas and/or a snow removal plan;

10. A traffic control plan as detailed in Section 1 of the Technical Manual;

11. Proposed buffers and preservation measures for significant natural features, where applicable, as defined in Section 14-526(b)(1);

12. Location and proposed alteration to any watercourse;

13. A delineation of wetlands boundaries prepared by a qualified professional as detailed in Section 8 of the Technical Manual;

14. Proposed buffers and preservation measures for wetlands;

15. Existing soil conditions and location of test pits and test borings;

16. Existing vegetation to be preserved, proposed site landscaping, screening and proposed street trees, as applicable;

17. A stormwater management and drainage plan, in accordance with Section 5 of the Technical Manual;

18. Grading plan;

19. Ground water protection measures;

20. Existing and proposed sewer mains and connections;

21. Location of all existing and proposed fire hydrants and a life safety plan in accordance with Section 3 of the Technical Manual;

22. Location, sizing, and directional flows of all existing and proposed utilities within the project site and on all abutting streets;

23. Location and dimensions of off-premises public or publicly accessible infrastructure immediately adjacent to the site;

24. Location and size of all on-site solid waste receptacles, including on-site storage containers for recyclable materials for any commercial or industrial property;

25. Plans showing the location, ground floor area, floor plans and grade elevations for all buildings;

26. A shadow analysis as described in Section 11 of the Technical Manual, if applicable;

27. A note on the plan identifying the Historic Preservation designation and a copy of the Application for Certificate of Appropriateness, if applicable, as specified in Section Article IX, the Historic Preservation Ordinance;

28. Location and dimensions of all existing and proposed HVAC and mechanical equipment and all proposed screening, where applicable;

29. An exterior lighting plan in accordance with Section 12 of the Technical Manual;

30. Signage: A signage plan showing the location, dimensions, height and setback of all existing and

proposed signs;

31. Location, dimensions and ownership of easements, public or private rights of way, both existing and proposed.

(g) *Level II and III Final Written Materials*

1. Construction Management Plan;

2. A traffic study and other applicable transportation plans in accordance with Section 1 of the Technical Manual, where applicable;

3. A narrative describing any significant natural features, wildlife and fisheries habitats or archaeological sites subject to the provisions of Section 14-526(a) that are located on or near the project site and a description of the methods that will be used to protect such areas or sites during and post construction;

4. A narrative describing site layout, on and off-site watershed hydrology, new and existing buildings and facilities, total impervious area, disturbed area and developed area created by the project;

5. Stormwater runoff calculations as described in Section 5 of the Technical Manual;

6. A narrative describing the development's consistency with applicable City Master Plans;

7. Evidence of Utility Capacity to Serve;

8. Estimated types and quantities of solid waste to be generated by the development. For new commercial and industrial development, a description of the estimated amount and type of recyclable material to be generated;

9. A code summary referencing NFPA 1 and all Fire Department technical standards;

10. Where applicable, an assessment of the development's consistency with any applicable design standards contained in Section 14-526(a) and/or in the City of Portland Design Manual;

11. Manufacturer's verification that all proposed HVAC and manufacturing equipment meets applicable state and federal emissions requirements.

(Ord. No. 277-09/10, 7-19-10; Ord. No. 25-11/12, 8-15-11; Ord. No. 176-12/13, 4-22-13)

Sec. 14-528. Reserved.

Sec. 14-529. Appeals.

(a) When the planning authority has approved, approved with conditions, or denied a site plan, or has approved a request to extend the expiration date of a Master Development Plan, any person aggrieved may appeal the decision to the planning board within thirty (30) calendar days of the date of the written decision of the planning authority. Upon the taking of such an appeal, the application or request for an extension shall be reviewed as a new application or request.

(b) When the planning board has finally approved, approved with conditions, or disapproved a site plan, any person aggrieved or the City may appeal the decision to the superior court, pursuant to Rule 80B of the Maine Rules of Civil Procedure within thirty (30) days of the vote on the original decision by the planning board.

(Ord. No. 277-09/10, 7-19-10; Ord. No. 25-11/12, 8-15-11; Ord. No. 176-12/13, 4-22-13)

Sec. 14-530. Development review fees and post approval requirements.

(a) *Development Review Fees.*

1. Payment of fees and costs: Prior to the issuance of permits of any kind or the release of a signed subdivision plat for recording for any project whose permit fee is governed by this ordinance, all current charges due under this ordinance shall be paid and the developer must otherwise be in compliance with the provisions of the City Code.

2. Development Review and administrative fees:

a. Review Fees. The developer shall pay the

development review fees to cover the third-party review costs for engineers or other professional reviews and administrative costs for all Levels of review unless otherwise noted below, including but not limited to staff review, legal ads, plan duplication, and mailed public notices, incurred by the City. The fee shall be based upon the hours of review time and prevailing hourly rate for reimbursement of City costs. The City shall periodically invoice the developer for the development review and administrative costs incurred by the City, which invoice shall be paid promptly by the developer. Prior to the issuance of permits of any kind or the release of a signed subdivision plat for recording for any project whose permit fee is governed by this ordinance, all current charges due under this ordinance shall be paid The balance of any remaining engineering and administrative costs invoiced or incurred after a permit has been issued shall be paid promptly in full by the developer prior to the issuance of any temporary or permanent certificate of occupancy.

3. The City Council, shall, from time to time, establish by order, reasonable application and administrative fees to defray the costs of administering this article.

4. *Site Plan Review Expenses.*

a.	Level I: Minor Residential	$300(flat fee)
b.	Level I: Site Alteration	$200
c.	Level II: Site Plan	$400
d.	Level III: Site Plan	
	i. Under 50,000 sf	$500
	ii. 50,000-100,000 sf	$1,000
	iii. 100,000-200,00 sf	$2,000
	iv. 200,000-300,000 sf	$3,000

v. Over 300,000 sf $5,000

vi. Parking lots over 100 spaces $1,000

e. Master Development Plan $1,000

f. After the Fact Review $1,000 plus application fee

g. Amendment to Site Plans

i. Planning Board Review $500

ii. Administrative Review $250

h. Other Site Plan Reviews

i. Administrative Authorization $50

ii. Special Exception Sign Review $75

iii. Section 14-403 Street Extensions $400 plus $25 per lot

i. Fee for Development Review Services

i. Planning fee per hour $40

ii. Legal fee per hour $75

iii. Third-party Review Fees assessed by the Third Party Professional

j. State Delegated Review Fees

i. Site Location of Development $3,000, except for residential projects which will be $200 per lot.

ii. Traffic Movement Permit $1,000

iii. Stormwater Quality Permit $250

k. Performance Guarantee

1. As required in Section 14-530 (b)(4).

l. Inspection Fees, as required in Section 14-530 (b)(5)

i. Level I: Site Alteration, Level II and Level III: 2% of the performance guarantee or as assessed by Planning or Public Works Engineer at $45 an hours with minimum inspection fee of $300 Level I: Minor Residential Inspection Fee $100 (flat fee).

m. Street vacation $2,000

(b) *Post-approval submissions.*

1. ***Final Plans.*** Following final site plan approval and prior to issuance of any building permit, the developer shall submit final plans meeting all the conditions of the site plan approval, including without limitation all streets, sewers, drainage structures and landscaping. Thereafter, limited and minor departures from the approved site plan shall be approved by the Public Services Authority as field changes pursuant to Section 14-532 below. Amendments or revisions to the approved site plan shall be reviewed by the Planning Authority pursuant to 14-532.

2. ***As-built plans.*** Upon completion of a Level II or Level III development, the applicant shall submit the as-built plans as specified in the Technical Manual.

3. *Performance Guarantee and Defect Guarantee*:

a. ***Performance Guarantee Required.*** Following approval of Level I, II and III site plan applications and prior to the issuance of a building permit, the developer shall post with the City a performance guarantee in the form and amount specified in section 14-501 specifying the completion of the required site plan improvements within two (2) years from the origination date of such guarantee. In no case shall the term of such guarantee be for a period of less than one (1) year, nor shall any

performance guarantee expire between October 30 and April 15 of the following year.

b. ***Required site improvements.*** Development improvements include, but are not limited to, sanitary sewers, storm drains, drainage systems, erosion control, catch basins, manholes, other improvements constructed chiefly below grade, slope stabilization, curbing, paving, sidewalks, lighting, landscaping and buffers.

c. ***Phased Project.*** A project may be reviewed and approved for up to thee (3) phases. A performance guarantee shall be posted for each phase. Each phase of such project shall be independent of subsequent phases and shall conform to all standards of this article in the event that subsequent phases do not go forward.

d. ***Exemptions.***

i. Level I minor residential development is exempt from performance guarantee requirements except for those projects that complete construction in the winter and the site work is incomplete due to weather conditions. A performance guarantee will be required that is sufficient to complete the remaining site work as approved on the site plan. The performance guarantee must be reviewed and approved by the Planning Authority prior to the release of a temporary certificate.

e. ***Abandoned site.*** In the event that a development is abandoned or the site improvements do not meet City standards as approved in the site plan, the performance guarantee may be utilized to stabilize, secure, complete and/or restore the site as may be necessary, including, but not limited to, revegetation of areas, grading and fencing.

f. ***Performance Guarantee Reductions.*** The developer shall be eligible to receive up to three reductions in the performance guarantee in a calendar year equal to the estimated cost of the completed

improvements. The developer shall submit a written request for a reduction that reports what work has been done and what is left to complete along with the associated costs to complete that work. In no case, however, shall any performance guarantee be reduced:

i. In any line item where improvements remain to be completed; or

ii. To a value which is less than the estimated cost of completing all remaining prescribed improvements for which a performance guarantee is required by section 14-530(b)4.b.

g. Notwithstanding any other provision of this section, no performance guarantee shall be reduced to less than the amount of the defect guarantee to be posted upon completion of the improvements.

h. ***Required One Year Defect Guarantee.*** Prior to the release of the performance guarantee, the developer shall provide an one-year defect guarantee, which shall not expire between October 30 and the following April 15. The amount of the defect guarantee shall be ten (10) percent of the initial amount of the performance guarantee.

4. *Inspection fee*:

a. ***Inspection fees and costs.*** At the same time that the developer posts a performance guarantee, the developer shall also initially pay to the City a site plan improvement inspection fee equal to two (2) percent of the estimated costs of required site improvements for which a performance guarantee is to be posted. At the conclusion of the project, and before a temporary or permanent certificate of occupancy is issued, the developer shall pay to the City the balance of any inspection fees actually incurred by the City in its review of the project.

b. The required inspection fee for all Level I Minor

Residential Development plans minimum—shall be one hundred dollars ($100.00) and for all other development the minimum inspection fee shall be three hundred dollars ($300.00).

5. *Certificates of Occupancy:*

a. *Temporary Certificates of Occupancy.*

i. Notwithstanding sections 14-463, 14-524(b) or any other provision of this Code, a certificate of occupancy may be issued for a development or portion of a development which has otherwise been completed in accordance with final site plan approval and all applicable provisions of this Code where the applicant submits a written request therefore to the Planning Authority stating those improvements which remain to be completed, the reasons why such improvements have not been completed, and the cost and time to complete the remaining work. In no event shall any temporary or permanent certificate of occupancy be issued where:

(a) Conditions exist which would justify denial of a certificate of occupancy under chapter 6; or

(b) Required improvements to the City right-of-way remain to be completed by the developer; or

(c) All access roads and any other roads and driveways required for the building or building(s) for which the certificate(s) are requested have not been improved to a passable condition; or

(d) A remaining balance for fees incurred by the City exists; or

(e) The developer otherwise is in violation of the City Code.

ii. Where a temporary certificate of occupancy is sought for a portion of any development prior to the completion of the entire development, the following standards shall be met, in addition to all applicable requirements set forth above, prior to the issuance of any certificate of occupancy:

(a) Those parking areas required for the portion of the development for which a certificate of occupancy is sought shall be available for use. Alternative arrangements must be made on-site for parking for any periods during which such parking areas will not be available for use.

(b) All foundation plantings and other landscaping required for the portion of a development for which a certificate of occupancy is sought shall be installed prior to the issuance of a certificate of occupancy. This requirement may only be waived where, in the opinion of the public works authority, landscaping improvements cannot practically be completed due to seasonal weather conditions.

(c) A performance guarantee shall be in place and in an amount sufficient to cover all remaining required improvements and not less than 10% of the initial performance guarantee amount.

iii. No temporary or permanent certificate of occupancy shall be issued to any portion of development where, in the opinion of the reviewing authority, the site conditions or work required to complete the development will endanger the health or safety of persons visiting or inhabiting the completed portion.

b. *Final Certificate of Occupancy.*

i. *Final Certificate.*

(a) All improvements which are not completed prior to the issuance of any temporary certificate of occupancy must be completed prior to the completion date specified in the performance guarantee required by section 14-525(j) or by the temporary certificate of occupancy, whichever occurs first, in order for a final certificate of occupancy to be issued by the City.

c. *Non-compliance.*

i. Non-compliance with temporary certificate of occupancy. Where any person accepts a temporary certificate of occupancy and does not complete the improvements as specified in the certificate, the City is authorized to enter upon such property itself or through its agents or contractors to complete such improvements with no liability therefore and may recover the costs thereof through the mechanic's lien procedure for the improvement of real property to the extent that the performance guarantee may be inadequate.

(Ord. No. 277-09/10, 7-19-10; Ord. No. 25-11/12, 8-15-11; Ord. No. 176-12/13, 4-22-13)

Sec. 14-531. Reserved.

Sec. 14-532. General requirements and enforcement.

(a) *Approved site plans and required permits.*

1. An approved site plan is a prerequisite to issuance of building, street opening or certificate of occupancy permits for development subject to the provisions of this ordinance, except the Planning Authority may grant written authorization for the release of a demolition or

interior building permit upon written request of the applicant describing the extent of proposed work. Any exterior demolition requires a performance guarantee for site stabilization.

2. Neither the acceptance of any application nor any determination or approval hereunder shall authorize the issuance of a permit under Chapter 6 (Building Code) for any use which would violate the provisions of Article III of this chapter.

3. No building permit, certificate of occupancy or street opening permit shall be issued until a final site plan, or applicable components thereof, has been approved under this article and such permit is determined to be consistent with the plan and any conditions of approval. In the event of any inconsistency between the approved site plan and any permit issued, the approved site plan shall control; provided, however, site plan approval shall not excuse failure to meet any independent requirement of any other law or ordinance.

4. The site shall be developed and maintained as depicted in the site plan and the written submission of the applicant. Modification of any approved site plan or alteration of a parcel which was the subject of site plan approval after May 20, 1974, shall require the prior approval of a revised site plan by the Planning Board or the Planning Authority pursuant to the terms of this article. Any such parcel lawfully altered prior to the enactment date of these revisions shall not be further altered without approval as provided herein. Modification or alteration shall mean and include any deviations from the approved site plan including, but not limited to, topography, vegetation and impervious surfaces shown on the site plan.

(b) *Revisions and amendments to Master Plans and approved site plans.*

1. *Amendments to a Master Development Plan.*

a. *Minor amendments.* A minor amendment to a Master Development Plan shall be defined as a change which is generally consistent with the approved

Master Developmetn Plan layout of buildings, circulation infrastructure, and open spaces, and:

(i) Does not propose any new general type of use beyond those approved initially;

(ii) Does not increase the building ground coverage, floor area ratio or residential density of the Master Development Plan;

(iii) Does not decrease any specified area regulations or enumerated parking ratios; and

(iv) Does not substantially change access, circulation, or infrastructure on or adjacent to the site.

The Planning Authority shall be authorized to approve such minor amendments to a Master Development Plan upon written application and explanation of the change(s) by the owner (or its agent) of the property. No further public hearings shall be required.

2. ***Approved site plan:*** If at any time before or during development the applicant requests minor amendments to an approved plan for Level III development, the Planning Authority may approve such minor amendments under the procedures for minor development, provided that they do not amount to a waiver or substantial alteration of the site plan, and do not affect any condition or requirement of the Planning Board. The applicant shall supply an application and written statement of the proposed amendment(s) and proposed amended plans to the Planning Authority, whose decision as to whether the amendment is minor shall be final. The Planning Authority shall determine if a notice of amendment shall be required and the extent of such notice based on the extent and nature of the proposed amendment to plan and the demonstrated public interest related thereto.

3. ***Limited In-Field Changes***: approved by the Public Services Authority must be in writing and submitted to the Planning Authority and are specifically limited to minor

variation necessary to deal with unforeseen difficulties that arise during the course of construction involving such technical detail as utility location and substitution of equivalent plantings and shall not include any substantial alteration of the approved plan or change any condition imposed by the Planning Board or Planning Authority.

(c) *Expiration of site plan approval.*

1. A site plan approved under this article shall expire twelve (12) months from the date of approval unless:

   a. Development has been undertaken in accordance with the approved plan and site work or building construction is ongoing. Any lapse in construction for a period in excess of twelve (12) months shall result in an expiration of the site plan; or

   b. Prior to the expiration of the site plan, such other time period is agreed upon, in writing, by the Planning Authority and the applicant, not to exceed three (3) years from the date of approval;

   Provided that such extensions may not be granted if changes to the City's zoning ordinance would render the development nonconforming in any respect or if changes in the subdivision or site plan ordinance or in the Public Services Technical Standards Manual or Planning and Development Design Standards would otherwise significantly impact the approved site plan as determined by the Director of Planning and Urban Development.

2. Where the approval or any related land use approval granted to the same applicant by any agency of the City with respect to the same development is appealed to any court by an opponent of the development, the applicant shall be granted further extensions, beyond the expiration of said period, where the applicant has exercised due diligence with respect to defending such appeal, which extensions shall not last beyond one (1) year from entry of final judgment.

(d) *Expiration of Master Development Plan:*

1. A Master Development Plan approved under this article shall expire six (6) years from the date of approval unless:

   a. Prior to the expiration nof the Master Development Plan, an applicant may submit a written request to the Planning Authority for an extension of a Master Development Plan approval and associated waivers. Only two (2) such extensions may be granted by the Planning Authority, and each such extension shall be limited to two (2) years from the date of expiration of the Master Development Plan. Provided there have not been substantial changes to the underlying zoning or site plan standards since the date of the Master Development Plan approval that would have a substantial impact on the Master Development approval, the Planning Authority may grant an extension. The Planning Authority may condition the extension on an amendment of the Master Development Plan to comply with such applicable ordinance or site plan standard changes provided that the Planning Authority may not require changes in the uses approved on the Master Development Plan or changes that would reduce the gross floor area of the buildings described or shown on the approved Master Development Plan. For the purposes of this provision, gross floor area includes the sum of the gross horizontal areas of each floor of each building or structure from the exterior face of exterior walls, or from the centerline of a wall separating two buildings, but excluding any space where the floor to ceiling height is less than six (6) feet. Any decision by the Planning Authority regarding the granting of an extension may be appealed to the Planning Board as provided for in Section 14-529;

   b. Approved major or minor amendments to a Master Development Plan do not alter the expiration date for the Master Plan that is based upon the original date of approval.

(e) *Enforcement.*

1. All construction or alterations to the site performed under authorization of building permits or certificates of occupancy issued for development within the scope of the article shall be in conformance with the approved final site plan or an amendment thereto under section 14-532. The Department of Planning and Urban Development shall institute or cause to be instituted any and all actions, legal or equitable, that may be appropriate or necessary for the enforcement of this article. Where work is required pursuant to the terms of chapters 24 or 25 as part of an approval granted under this article, such work shall be accomplished in the sequence established by the Public Services Authority. Where the Public Services Authority determines that work has been completed prior to the receipt of all approvals required by this article or which is out of sequence or is not in compliance with the standards of chapters 24 and 25, the Public Services Authority or an inspector from the Department of Planning and Urban Development may issue a stop work order. Work shall recommence only after such order has been lifted by the Department of Public Services or the Building Authority on the basis of an approved mitigation plan or action by the developer.

2. No alterations shall be made to a site with a pending or approved site plan application until:

   a. The performance guarantee has been posted and final site plans have been submitted to the Planning Authority.

   b. Written permission has been received from the Director of Planning and Urban Development or his/her designee. Such permission shall be granted only after submission of a written request describing the proposed scope of work to be conducted on the site and the planning authority concludes that the request is reasonable, time is imperative and the work will not compromise any aspect of the ensuing review process. All such work shall be done in compliance with information provided with the site plan application including, but not limited to, an erosion control plan. Such written permission shall not be required if the only work

proposed is the digging of test pits.

3. Where construction, alteration or modification to a site is performed without a valid site plan improvement permit, an after-the-fact permit shall be obtained from the Planning Board or Planning Authority, as applicable. The cost of an after-the-fact permit shall be as provided in section 6-18 of this code, plus the cost of engineering and administrative costs associated with the review and processing of the after-the-fact permit.

(Ord. No. 277-09/10, 7-19-10; Ord. No. 176-12/13, 4-22-13)

Sec. 14-533. Reserved.

Sec. 14-537. Reserved.
Sec. 14-538. Reserved.
Sec. 14-539. Reserved.

Sec. 14-540. Evaluation of article V.

Within five years from adoption of the site plan ordinance, the planning board will evaluate the effectiveness of the ordinance in advancing Portland's vision for a sustainable City and report their findings to the City Council along with any recommendations for site plan ordinance amendments.

(Ord. No. 277-09/10, 7-19-10)

ARTICLE VI. BOARD OF APPEALS*

***Cross reference(s)--**Administration, Ch. 2; boards generally, § 2-31 et seq.; jurisdiction of board of appeals for zoning, § 14-471 et seq.

Sec. 14-541. Creation; composition.

There shall be a board of appeals of seven (7) members. Members of the board shall be residents of the city and shall not be officers or employees of the city or any of its agencies or departments.

(Code 1968, § 605.1; Ord. No. 438-74, 7-1-74; Ord. No. 107-76, § 1, 3-1-76; Ord. No. 545-76, § 1, 10-6-76; Ord. No. 147-79, § 1, 8-6-79)

Sec. 14-542. Appointment; terms.

The members of the board of appeals shall be appointed by the city council for terms of three (3) years. Terms shall be staggered so that the terms of no more than three (3) members shall expire in any calendar year. Such members shall serve until their successors are duly elected and qualified provided, however, that such service shall not extend to over one hundred twenty (120) days after expiration of their term.
(Code 1968, § 605.1; Ord. No. 438-74, 7-1-74; Ord. No. 107-76, § 1, 3-1-76; Ord. No. 545-76, § 1, 10-6-76; Ord. No. 148-79, § 1, , 8-6-79; Ord. No. 278-83, 11-7-83; Ord. No. 122-85, 8-19-85)

Sec. 14-543. Compensation.

Members of the board of appeals shall serve without compensation.
(Code 1968, § 605.1; Ord. No. 438-74, 7-1-74; Ord. No. 107-76, § 1, 3-1-76; Ord. No. 545-76, § 1, 10-6-76; Ord. No. 148-79, § 1, 8-6-79)

Sec. 14-544. Vacancies.

Permanent vacancies on the board of appeals shall be filled by the city council, in the same manner as other appointments under this article, for the unexpired term of a former member whose place has become vacant.
(Code 1968, § 605.1; Ord. No. 438-74, 7-1-74; Ord. No. 107-76, § 1, 3-1-76; Ord. No. 545-76, § 1, 10-6-76; Ord. No. 148-79, § 1, 8-6-79)

Sec. 14-545. Removal of members.

Any member of the board of appeals may be removed for cause by the city council at any time; provided, however, that before any such removal, such member shall be given an opportunity to be heard in his own defense at a public hearing.
(Code 1968, § 605.1; Ord. No. 438-74, 7-1-74; Ord. No. 107-76, § 1, 3-1-76; Ord. No. 545-76, § 1, 10-6-76; Ord. No. 148-79, § 1, 8-6-79)

Sec. 14-546. Chair.

The members of the board of appeals shall annually elect one (1) of their number as chair to preside at all meetings and hearings and to fulfill the customary functions of that office. In the absence of the chair, the secretary shall act as chair and shall have all the powers of the chair.
(Code 1968, § 605.2)

Sec. 14-547. Secretary.

The members of the board of appeals shall annually elect one (1) of their number as secretary. The secretary shall act as chair in the absence of the chair and shall fulfill the duties provided by statute and this article and have such other duties as may from time to time be provided by the rules of the board.
(Code 1968, § 605.3)

Sec. 14-548. Quorum and necessary vote.

No business shall be transacted by the board of appeals without a quorum, consisting of four (4) members, being present. The concurring vote of at least four (4) members of the board shall be necessary to grant any request or application or to sustain any appeal. Any matter that receives fewer than four (4) votes shall be deemed to have been denied.
(Code 1968, § 605.4; Ord. No. 545-76, § 2, 10-6-76; Ord. No. 106-07/08, 12-17-07)

Sec. 14-549. Meetings, hearing, and procedures.

(a) Regular meetings of the board of appeals shall be held at the call of the chair or as provided by the rules of the board. Special meetings shall be called by the chair at the request of any two (2) members of the board or at the request of the city council. All meetings and hearings of the board shall be open to the public.

(b) The board of appeals shall adopt its own rules of procedure for the conduct of its business not inconsistent with the statutes of the state and this article. Such rules shall be filed with the secretary and with the city clerk. Any rule so adopted which relates solely to the conduct of hearings, and which is not required by the statutes of the state or by this article, may be waived by the board upon good cause being shown.
(Code 1968, § 605.5)

Sec. 14-550. Public hearings.

(a) *Setting hearing.* For all matters properly brought before the board of appeals, the board shall select a reasonable time and place for a public hearing following the submission of the subject application.

(b) *Notice.* The secretary shall give notice of such public hearings in the form and manner and to the persons herein

specified. The notice shall include the time and place of such hearing, a description of the contents of the matter to be heard and the address or location of the property involved. Where notice by mail is required, it shall be mailed at least seven (7) days in advance of the hearing date by regular United States mail. Notices shall be given to each of the following as specified:

1. In all cases, to all residents of the city by publication in a newspaper of general circulation in the city at least once, not more than thirty (30) nor less than five (5) days before the date of the hearing, and by mail to each of the following persons, each of whom shall be made a party of record in each case: The applicant, the city council and the Planning Board;

2. In the case of hearings related to a use variance, nonconforming use, or a conditional use involving a particular parcel or tract of land, by mail to the owners of all the property within five hundred (500) feet of such parcel or tract;

3. In the case of hearings related to variances or appeals other than use variances, by mail to the owners of property directly abutting, and directly across a street or alley from the subject property;

4. For purpose of this section, the owners of property shall be considered to be the parties listed by the assessor's department as those against whom taxes are assessed. Failure of any property owner to receive a notice of public hearing shall not necessitate another hearing and shall not invalidate any action of the board.

(c) ***Conduct of hearings:***

1. ***Rights of all persons.*** Any person may appear and testify at a public hearing, either in person or by a duly authorized agent or attorney, and may submit documentary evidence, provided, however, that the board shall exclude irrelevant, immaterial and unduly repetitious evidence.

2. ***Rights of parties.*** The applicant and any interested party shall in addition have the following rights:

   a. To present witnesses on their own behalf and offer

rebuttal evidence;

b. To cross-examine all witnesses testifying in opposition to their position through the chair; and

c. To examine and introduce any documents produced at the hearing.

3. *Board rules to govern.* All other matters pertaining to the conduct of hearings shall be governed by the provisions of the relevant state statutes, this article, and the rules promulgated by the board of appeals.

(Code 1968, § 605.6; Ord. No. 349-78, 6-26-78)

Sec. 14-551. Records and decisions.

(a) The transcript of testimony, if any, together with the minutes of the secretary and all exhibits, papers, applications and requests filed in any proceeding before the board of appeals and the decision of the board shall constitute the record.

(b) Every decision of the board of appeals shall include findings of the fact, shall refer to the evidence in the record and the exhibits, plans or specifications upon which such decision is based, shall specify the reason or reasons for such decision, and shall contain a conclusion or statement separate from the findings of fact setting forth the specific relief granted or denying relief.

(c) The secretary shall cause notice of any decision of the board to be delivered or mailed to the applicant, city council and Planning Board within five (5) days of such decision.

(Code 1968, § 605.7)

Sec. 14-552. Conflicts.

No member of the board of appeals shall participate in the hearing or disposition of any matter in which he has an interest. Any question of whether a member has a conflict of interest sufficient to disqualify him shall be decided by a majority vote of the members, except the member who is being challenged; where such a vote results in a tie, the challenged member shall be deemed disqualified.

(Code 1968, § 605.8)

Sec. 14-553. Appeals.

An appeal from any final decision of the board of appeals may be taken by any aggrieved party to the superior court in accordance with Rule 80B of the Maine Rules of Civil Procedure.

ARTICLE VII. CONDOMINIUM CONVERSION

Sec. 14-565. Purpose.

The purpose of this article is to regulate the conversion of rental housing to condominiums; to minimize the potential adverse impacts of such conversion on tenants; to ensure that converted such housing is safe and decent; and to maintain a reasonable balance of housing alternatives within the city for persons of all incomes. To these ends, this article shall be liberally construed.
(Ord. No. 213-81, § 608.1, 11-16-81)

Sec. 14-566. Applicability.

This article shall apply to the conversion of any rental unit to a condominium unit.
(Ord. No. 213-81, § 608.2, 11-16-81)

Sec. 14-567. Definitions.

For the purpose of this article, the following terms shall be defined as follows, unless otherwise clearly implied:

Condominium means any interest in real estate created pursuant to the Unit Ownership Act, 33 M.R.S.A. § 560 et seq., or its equivalent, as it may from time to time be amended.

Developer means and includes any person or other legal entity, but not including an established lending institution unless it is an active participant in a common promotional scheme, who, whether acting as principal or agent, records a declaration of condominium that includes real estate, any portion of which was previously a rental unit.

Tenant means and includes any occupant in lawful possession of a rental unit, whether by lease, sublease, or otherwise.

Unit means any building, or portion thereof, used or intended to be used primarily as a separate dwelling.
(Ord. No. 213-81, § 608.3, 11-16-81)

Cross reference(s)--Definitions and rules of construction generally, § 1-2.

Sec. 14-568. Protection of tenants.

(a) *Notice of intent to convert.* A developer shall give to each tenant written notice of intent to convert at least one hundred twenty (120) days before the tenant is required by the developer to vacate. If a tenant has been in possession of any unit within the same building for more than four (4) consecutive years, the notice period shall be increased by thirty (30) additional days for each additional year, or fraction thereof, to a maximum of two hundred forty (240) additional days. The notice shall set forth specifically the rights of tenants under subsections (a) and (b) of this section and section 14-569, and shall contain the following statement:

If you do not buy your apartment, the developer of this project is required by law to assist you in finding another place to live and in determining your eligibility for relocation payments. If you have questions about your rights under the law, or complaints about the way you have been treated by the developer, you may contact the Building Inspection Division, Department of Planning and Urban Development, City of Portland, 389 Congress Street, Portland, Maine 04101 (telephone: 874-8703).

If the notice specifies a date by which the tenant is required to vacate, the notice may also serve as a notice of termination under the applicable law of forcible entry and detainer, if it meets the requirements thereof. The notice shall be hand-delivered to the tenant or mailed, by certified mail, return receipt

requested, postage prepaid, to the tenant at the address of the unit or such other address as the tenant may provide. The notice shall be effective when actually received. No tenant may be required by a developer to vacate without having been given notice as required herein, except for the reasons specified in the applicable law of forcible entry and detainer, and in accordance with the procedures thereof. The terms of a tenancy, including rent, may not be altered during the notice period, except as expressly provided in a preexisting written lease. If, within one hundred twenty (120) days after a tenant is required by a developer to vacate, the developer records a declaration of condominium without having given notice as required herein, the developer shall be presumed to have converted in violation of this article.

(b) ***Option to purchase.*** For a sixty-day period following the giving of notice as required in subsection (a), the developer shall grant to the tenant an exclusive and irrevocable option to purchase the unit of which the tenant is then possessed, which option may not be assigned. If the tenant does not purchase or contract to purchase the unit during the sixty-day period, the developer may not convey or offer to convey the unit to any other person during the following one hundred eighty (180) days at a price or on terms more favorable than the price or terms previously offered to the tenant, unless the more favorable price or terms are first offered exclusively and irrevocably to the tenant for an additional sixty-day period. This subsection shall not apply to any rental unit that, when converted, will be restricted exclusively to nonresidential use. If, within two (2) years after a developer records a declaration of condominium, the use of any such unit is changed such that but for the preceding sentence, this subsection would have applied, the developer shall be presumed to have converted in violation of this article.

(Ord. No. 213-81, § 608.4, 11-16-81)

Sec. 14-569. Relocation payments.

If the tenant does not purchase the unit, the developer shall, before the tenant is required by the developer to vacate, make a cash payment to the tenant in an amount equal to the amount of rent paid by the tenant for the immediately preceding two (2) months; provided that this requirement shall not apply to any tenant whose gross income exceeds eighty (80) percent of the median income of the Portland SMSA, adjusted for family size, as determined by the U.S. Department of Housing and Urban Development at the time notice is given as required in section 14-568(a). Additionally, the

developer shall, upon demand, provide assistance to the tenant in the form of referrals to other reasonable accommodations and in determining the tenant's eligibility for relocation payments as provided herein.
(Ord. No. 213-81, § 608.5, 11-16-81)

Sec. 14-570. Conversion permit.

Before conveying or offering to convey a converted unit, the developer shall obtain a conversion permit from the building inspection division of the department of planning and urban development. The permit shall issue only upon receipt of a completed application therefor in a form to be devised for that purpose, payment of a fee of one hundred and fifty dollars ($150.00) per unit, and a finding, upon inspection, that each unit, together with any common areas and facilities appurtenant thereto, is in full compliance with all applicable provisions of article II of chapter 6 (building code), article III of chapter 6 (electrical installations), article V of chapter 6 (minimum standards for dwellings) and article II of chapter 10 (fire prevention code) of this Code, and the Life Safety Code as adopted by the state. The developer shall post a copy of the permit in a conspicuous place in each unit, and shall make copies available to prospective purchasers upon request.
(Ord. No. 213-81, § 608.6, 11-16-81)

Sec. 14-571. Variation by agreement.

No provision of, or right conferred by, this article may be waived by a tenant, by agreement or otherwise, and any such waiver shall be void. Any attempt to require, encourage, or induce a tenant to waive any provision hereof, or right conferred hereby, shall be a violation of this article. Nothing herein shall be construed to void any term of a lease which offers greater rights than those conferred hereby.
(Ord. No. 213-81, § 608.7, 11-16-81)

Sec. 14-572. – 14-582. Reserved.

ARTICLE VIII. REGULATION OF EXPLOSIVES*

***Editor's note--**Ord. No. 125-98, adopted Oct. 19, 1998, repealed Art. VIII, §§ 14-583--14-585, relative to moratorium on residential developments.

Formerly, such provisions derived from Ord. No. 152-81, §§ 607.1--607.3, adopted Aug. 17, 1981, and Ord. No. 180-87, adopted Nov. 2, 1987. The new Article VIII, regarding regulation of explosives, was passed on March 17, 2003.

Sec. 14-583. Purpose.

The purpose of this ordinance is to protect the public's health, safety and general welfare by regulating and controlling blasting operations within the City.
(Ord. No. 177-02/03, 3-17-03)

Sec. 14-584. Applicability.

This ordinance shall apply to all blasting operations related to construction and development of real estate within the City. The City of Portland Technical Manual is incorporated into this section by reference. Standards listed in the Technical Manual shall be additional to the provisions of this article.
(Ord. No. 177-02/03, 3-17-03; Ord. No. 74-10/11, 11-15-10)

Sec. 14-585. Definitions.

For the purposes of this Article, the following words and phrases shall have the respective meanings ascribed to them:

Blasting plan means the detailed plan for conduct of any blasting operations, and any amendments thereto where over three hundred (300) cubic yards of material shall be removed, which plan has been reviewed by the Planning and Urban Development Department in accordance with the provisions of this ordinance.

Blasting operations means the use of explosives for purposes of breaking up and removing soil, rock and ledge, related to construction and development of real estate within the City.

Blasting permit means a permit issued by the City Fire Department in accordance with the provisions of this ordinance to allow blasting operations within the City.

Blasting submittal means the plan for conduct of any blasting operation where between fifty (50) and three hundred (300) cubic yards of material shall be removed, which plan has been submitted to the Planningand Urban Development Department in accordance with

the provisions of this ordinance.

Explosives means any material or container containing a chemical compound or mixture that is commonly used or intended for the purpose of producing an explosion and that contains any oxidizing and combustible materials or other ingredients in such proportions, quantities, or packaging that an ignition by fire, by friction, by compound or mixture may cause such a sudden generation of highly heated gasses that the resultant gaseous pressures are capable of producing destructive effects on contiguous objects, but shall not mean the components for handloading rifle, pistol and shotgun ammunition, or fireworks.

(Ord. No. 177-02/03, 3-17-03; Ord. No. 74-10/11, 11-15-10)

Sec. 14-586. Administration.

(a) This ordinance shall be administered by thePlanning and Urban Development Department and the Fire Department, which departments shall have the ability to promulgate amendments to the standards listed in the City of Portalnd Technical Manual that implement this ordinance.

(b) City Council shall enact the initial Rules required for implementing this Article.

(c) The procedure for amendment of rules shall be as follows:

1. Department staff shall draft proposed rule amendments to the technical standards for presentation to the Planning Board.

2. The Planning Board shall hold a public hearing on the proposed rule amendments and provide interested parties an opportunity for comment, both written and oral, on the proposed rule amendments.

3. The department shall review comments made by the Planning Board and interested parties and make changes to the proposed rule amendments at its discretion. The amendments to the rules shall go into effect within thirty (30) days of the public hearing held by the Planning Board.

(Ord. No. 177-02/03, 3-17-03; Ord. No. 74-10/11, 11-15-10)

Sec. 14-587. Permit Required.

No person may conduct blasting operations within the City without first obtaining a permit from the Fire Department, as required by the National Fire Protection Association 1 Fire Prevention Code, as adopted and amended in section 10-16 et seq. Of this Code. Fees for this permit shall be as established by Order of the City Council.
(Ord. No. 177-02/03, 3-17-03)

Sec. 14-588. Application Requirements.

Prior to the issuance of a permit pursuant to section 14-587 the following information shall be submitted to the City:

(a) A blasting plan shall be submitted by the applicant to the Planning and Urban Development Department for all projects where more than three hundred (300) cubic yards of material shall be removed. The blasting plan shall conform to the provisions of this section and of Section 3 of the City of Portland Technical Manual.

(b) A blasting submittal shall be submitted to the Planning and Urban Development Department where between fifty (50) and three hundred (300) cubic yards of material shall be removed. The blasting submittal shall conform to the provisions of this section and of Section 3 of the City of Portland Technical Mannual.

(c) A blasting application shall be submitted to the Planning and Urban Development Department where less than fifty (50) cubic yards of material shall be removed, or where utility trench work in the accepted public right of way, including City or Portland Water District infrastructure is proposed. Small blasts where less than fifty (50) cubic yards of material shall be removed, are not required to submit either a blasting plan or blasting submittal. Such projects must conform to the National Fire Protection Association Fire Prevention Code and applicants shall submit a monitoring report upon request. Information provided in the blasting application shall confirm that the proposed small blast conforms to all applicable provisions of this ordinance and of Section 3 of the City of Portland Technical Manual.

(d) A blasting plan or blasting submittal may be required for

any blasting operation at the discretion of the Planning and Urban Development Department when it determines that conditions at or near the site of the blasting operations warrant the provision of a plan.

(Ord. No. 177-02/03, 3-17-03; Ord. No. 74-10/11, 11-15-10)

Sec. 14-589. Storage and handling.

All explosives shall be stored and handled in accordance with the provisions of this code, the laws of the State of Maine and the National Fire Protection Association 1 Fire Prevention Code.

(Ord. No. 177-02/03, 3-17-03)

Sec. 14-590. Enforcement.

(a) This ordinance shall be enforced by the Planning and Urban Development Department and the Fire Department. Either department shall have the authority to issue a written stop work order in the event of a violation of this ordinance or a failure to follow the approved blasting plan.

(b) The issuance of a stop work order may be appealed to the Director of Planning and Urban Development within two (2) business days of its issuance. The decision of the Director of Planning and Urban Development on the appeal shall be final.

(Ord. No. 177-02/03, 3-17-03; Ord. No. 74-10/11, 11-15-10)

Sec. 14-591. Penalties.

(a) In addition to the stop work order which may be issued pursuant to section 14-590, the Permittee shall be subject to the following penalties:

1st offence	$500.00
2nd offence	$1,000.00
Subsequent offences	$1,000.00.

(b) In the event that there are more than three documented violations of the blasting plan, blasting submittal, or blasting permit, the Planning and Urban Development Department and/or Fire Department shall have the right to issue a stop work order on all construction or development related to the permitted operation. The Permittee shall then be required to submit a revised blasting plan to the Planning and Urban Development Department for review and approval. Work shall not be allowed to continue until the revised

blasting plan is approved.
(Ord. No. 177-02/03, 3-17-03; Ord. No. 74-10/11, 11-15-10)

Sec. 14-592. Notice requirements.

(a) At least ten (10) days prior to the start of any blasting operation, notice shall be published in a newspaper of local publication and shall be mailed by first class mail to all property owners within the distance specified below of the perimeter of the blasting site:

> ***Small blast*** (trench blast or under fifty (50) cubic yards of rock removed): All property owners within two hundred and fifty (250) feet of the perimeter of the blasting site.
>
> ***Medium blast*** (removal of 50-300 cubic yards of rock material): All property owners within five hundred (500) feet of the perimeter of the blasting site.
>
> ***Large blast*** (removal of over 300 cubic yards of rock material): All property owners within six hundred (600) feet of the perimeter of the blasting site.

(b) Notice shall conform to the model notice contained in Section 3 of the City of Portalnd Technical Manual and shall include a description of the proposed blasting operations, estimated schedule and duration of blasting operations, description of the blasting signals to be used during operations, the complaint protocol and the complete address, telephone numbers and email contact for the blasting contractor, Planning andUrban Development Departmetn and Fire Departmetn where neighbors and property owners may request further information and notification.

(c) For medium blasts where 50-300 cubic yards of rock material is to be removed, and large blasts where over 300 cubic yards of rock material is to be removed, additional notification requirements shall apply during construction, as detailed in Section 3 of the City of Portland Technical Manual.

(d) If blasting operations are to occur within two hundred and fifty (250) feet of any structure, additional notification requriemetns shall apply, as detailed in Section 3 of the City of Portland Technical Manual, in order to prevent adverse public health and safety impacts due to blasting-related carbon monoxide

migration.
(Ord. No. 74-10/11, 11-15-10)

Sec. 14-593. Hours of blasting.

Blasting shall occur Monday through Friday, between the hours of 9am and 4pm, unless otherwise approved by the Planning and Urban Development Department. Requests for extension of hoursof blasting must be submitted by the applicant in writing.
(Ord. No. 74-10/11, 11-15-10)

Sec. 14-594. Waiver provision.

Upon written request by the applicant, the Planning and Urban Development Department, based on a positive recommendation by the Fire Department, may waive all or a portion of the blasting provisions of Section 3 of the City of Portland Technical Manual, provided thall all waivers are consistent with the purposes set forth in Section 14-583.
(Ord. No. 74-10/11, 11-15-10)

Sec. 14-595. Suspension of blasting operations.

If it is determined that blasting operations pose any risk to public health, safety or general welfare, the Director of Planning and Urban Development or the Fire Chief or their designee shall have the authority to suspend the blasting permit at any time until theydeem it safe for blasting operations to continue.
(Ord. No. 74-10/11, 11-15-10)

Sec. 14-596. – Sec. 14-600. Reserved.

ARTICLE IX. HISTORIC PRESERVATION

DIVISION 1. GENERALLY

Sec. 14-601. Purpose.

The purpose of this article is to promote the educational, cultural, economic and general welfare of the City of Portland by:

(a) Creating a mechanism to identify, preserve and enhance distinctive areas, sites, structures and objects that have historic, cultural, architectural and archeological

significance;

(b) Providing a resource of information and expertise to help those interested in rehabilitation or new construction in a district or restoring a landmark;

(c) Applying design standards in a reasonable and flexible manner to prevent the unnecessary loss of the community's historical features and to ensure compatible new construction and rehabilitation in historic districts while not stifling change and development or forcing modern recreations of historic styles;

(d) Fostering civic pride in the city's history and development patterns as represented in such distinctive areas, sites, structures and objects;

(e) Protecting and enhancing neighborhood character;

(f) Stabilizing and improving the values of designated properties and areas;

(g) Protecting and enhancing the attractiveness of the city to its home buyers, home owners, residents, tourists, visitors, businesses and shoppers;

(h) Fostering and encouraging preservation, restoration and rehabilitation that respects the historic, cultural, architectural and archeological significance of distinctive areas, sites, structures and objects.

(Ord. No. 235-90, 2-26-90; Ord. No. 165-08/09, 3-16-09)

Sec. 14-602. Definitions.

Alteration: Any act or process requiring a building permit and any other act or process not requiring a building permit but specifically listed in this article as a reviewable action, including without limitation the repair, reconstruction, demolition or relocation of any structure or object, or any part of a structure or object.

Applicant: A person who submits an application for issuance of a certificate of appropriateness.

Application: A form submitted for approval of alteration,

construction, demolition or removal that requires issuance of a certificate of appropriateness.

Business day: A day on which the department is open for business.

Certificate of appropriateness: A certificate issued by the department evidencing approval of specific plans for alteration of a structure or new construction on a site in accordance with this article.

Certificate of economic hardship: A certificate issued by the department evidencing a hardship variance approved by the board of appeals in accordance with division 8 of this article.

Certificate of non-applicability: A certificate issued by the department evidencing a determination that specific plans for alteration of a structure or new construction on a site do not require approval under this article.

Contributing: A classification applied to a site, structure or object within a historic district signifying that it contributes generally to the qualities that give the historic district cultural, historic, architectural or archeological significance as embodied in the criteria for designating an historic district, but without being itself a landmark.

Council: The city council.

Demolition: Any act or process that partially or totally destroys a structure or object.

Department: The department of planning and urban development.

Design guideline: Any design standard specified for alteration or new construction which is unique to a particular landmark, historic district or historic landscape district.

Design manual: The historic resources design manual described in section 14-675.

District: An historic district or historic landscape district.

Historic district: An area designated as an "historic district" by the council.

Historic landscape district: An area designated as an "historic landscape district" by the council.

Landmark: A property, site, structure or object designated as a "landmark" by the council as having a high degree of historical, cultural and/or architectural significance.

Level I site plan: As defined in article V of this chapter.

Level II site plan: As defined in article V of this chapter.

Level III site plan: As defined in article V of this chapter.

New construction: The adding to a structure by an addition; the erection or placement of any new structure on a lot or property; or the comprehensive redesign/renovation of an existing structure.

Noncontributing: A classification applied to a site, structure, object, or portion thereof, within a historic district signifying that 1) it does not contribute generally to the qualities that give the historic district cultural, historic, architectural or archaeological significance as embodied in the criteria for designating a historic district; 2) was built within 50 years of the date of district designation unless otherwise designated in the historic resources inventory; or 3) where the location, design, setting, materials, workmanship and association have been so altered or have so deteriorated that the overall integrity of the site, structure or object has been irretrievably lost. A portion of an otherwise contributing or landmark structure may be determined by the historic preservation board to be non-contributing if it meets one or more of the above conditions.

Object: Anything constructed, fabricated or created, the use of which does not require permanent or semi-permanent location on or in the ground.

Open space: Any park and any other area outside of a building open to the public.

Ordinary maintenance: Acts of maintenance or repair which do not include a change in the design, material or outer appearance of a structure, including without limitation repainting, replacement of materials or windows of the same scale, texture and color, and

landscaping other than within an historic landscape district.

Owner: The person or persons holding record title to the building, site or property; provided, however, the last previous tax roll in the records of the city assessor's office may be relied upon as showing record ownership in the absence of substantial evidence to the contrary.

Property: Land and improvements identified as a separate lot for purposes of subdivision, site plan, or zoning regulation.

Relocation: Any removal or relocation of a structure on its site or to another site.

Restoration: Any act which returns a structure or a feature of a structure to a prior state of historic significance.

Sign: As defined in section 14-47.

Site: The location of an event, activity, structure or object.

Street: The entire width between boundary lines of every way publicly owned and maintained or which way is open to the use of the public for purposes of vehicular or pedestrian traffic.

Structure: Anything constructed or erected, having a permanent or semi-permanent location on another structure or in the ground, including without limitation buildings, garages, fences, gazebos, advertising signs, billboards, antennas, satellite sending or receiving dishes, and swimming pools.
(Ord. No. 235-90, 2-26-90; Ord. No. 220-93, § 1, 5-17-93; Ord. No. 165-08/09, 3-16-09; Ord. No. 278-09/10, 7-19-10)

DIVISION 2. HISTORIC PRESERVATION BOARD

Sec. 14-603. Composition.

The historic preservation board shall consist of seven (7) voting members who shall serve without compensation. Members shall have demonstrated interest, knowledge, ability, experience or expertise in restoration, rehabilitation, or neighborhood conservation or revitalization and shall be residents of the city.
(Ord. No. 235-90, 2-26-90)

Sec. 14-604. Appointment and terms.

(a) Members shall be appointed by the council for terms of three (3) years. Appointments shall be staggered so that the terms of not more than three (3) members expire in any calendar year.

(b) Vacancies on the historic preservation board shall be filled within sixty(60) days. However, every member shall continue in office after expiration of the term until a successor has been appointed. Vacancies on the historic preservation board shall be filled for the unexpired term of the former member.
(Ord. No. 235-90, 2-26-90; Ord. No. 197-03/04, 9-8-04)

Sec. 14-605. Removal of historic preservation board member.

Members may be removed for cause by the council. Cause shall include, but is not limited to, the failure to attend meetings without good cause. Any member proposed to be removed shall be given written notice and an opportunity to be heard prior to final action.
(Ord. No. 235-90, 2-26-90)

Sec. 14-606. Officers.

(a) Officers of the historic preservation board shall consist of a chair and vice-chair.

(b) Officers shall be elected by the historic preservation board and shall serve a term of one (1) year and shall be eligible for re-election. No person shall serve as chair for more than two (2) consecutive years.

(c) The chair shall preside at all meetings and hearings and fulfill the customary functions of that office.

(d) In the absence of the chair, the vice-chair shall act as chair and shall have all the powers of the chair. The vice-chair shall have such other powers and duties as may from time to time be provided by the rules of the historic preservation board.

(e) The director of the department or his or her designated representative shall serve as staff secretary to the historic preservation board and shall attend all its meetings. The secretary shall provide for the keeping of tape recordings or minutes of the proceedings of the historic preservation board, showing the vote of

each member on every question or his or her absence or failure to vote, and shall maintain the records and decisions of all meetings, hearings and proceedings and all correspondence of the historic preservation board. Copies of permanent records shall be filed with the city clerk. The secretary shall publish and distribute copies of the minutes, reports and decisions of the historic preservation board to historic preservation board members and to others upon approval of the historic preservation board. The department shall assign necessary staff to assist the historic preservation board and the planning board in carrying out their responsibilities under this article.
(Ord. No. 235-90, 2-26-90)

Sec. 14-607. Meetings, hearing, procedures and decisions.

(a) Regular meetings of the historic preservation board shall be held no less frequently than monthly. Special meetings may be called by the chair or any four (4) members or at the request of the chair of the planning board.

(b) The historic preservation board may adopt procedural rules for the conduct of its business not inconsistent with this article, including the creation of a subcommittee structure to enhance efficiency in consideration of historic preservation board business. Such rules shall be filed with the secretary and with the city clerk. All such rules shall be subject to veto, in whole or in part, by the council within forty-five (45) days of such filing. The initial rules shall take effect when filed, subject to veto as provided above. Amendments to the rules shall take effect upon expiration of said veto period. Any rule may be waived by the chair upon good cause being shown.

(c) No final action shall be taken by the historic preservation board which could in any manner deprive or restrict the owner of a property in its use, alteration, maintenance, disposition or demolition, until such owner either has knowledge of the proceeding or is sent notice offering opportunity to be heard. This paragraph shall not affect the interim protection provisions of division 5.

(d) Every recommendation or recommended decision shall include written findings of fact and shall specify the reason or reasons for such action.

(e) The secretary shall mail notice of any final action of

the historic preservation board to the applicant and any designated interested parties and send a copy thereof to the planning board within five (5) business days following such action.
(Ord. No. 235-90, 2-26-90)

Sec. 14-608. Conflicts of interest.

No member of the historic preservation board shall participate in the hearing or disposition of any matter in which he or she has a pecuniary interest.
(Ord. No. 235-90, 2-26-90)

Sec. 14-609. Responsibilities.

The historic preservation board shall have the following responsibilities:

(a) To conduct or administer an ongoing survey to identify historically, culturally, architecturally and archaeologically significant areas, sites, structures and objects.

(b) To review all areas, sites, structures and objects listed in the National Register of Historic Places, including the boundaries of areas so listed, and make recommendations to the planning board and council for the adoption of ordinances designating those areas, sites, structures and objects as landmarks or districts.

(c) To investigate and recommend to the planning board the adoption of ordinances designating areas, sites, structures and objects not listed in the National Register of Historic Places as landmarks and districts and to make recommendations to the planning board concerning sites, structures and objects that have contributing significance or are intrusions within nominated or designated districts.

(d) To keep a register of all areas, sites, structures and objects that have been designated as landmarks or districts, including all information required as part of each designation.

(e) To create an appropriate system of plaques for identification of individual landmarks and make

recommendations for the design and implementation of specific marking of streets and routes leading from one (1) landmark or district to another.

(f) Upon request, to advise and assist owners of landmarks and property, sites, structures or objects within districts on physical and financial aspects of preservation, renovation, rehabilitation and reuse and for procedures for inclusion on other registers of significant areas, sites, structures and objects, including the National Register of Historic Places.

(g) To recommend to the planning board the nomination of areas, sites, structures and objects to the National Register of Historic Places or to any State of Maine Register of Historic Places that may be established.

(h) At the direction of the council, to prepare application for, and participate in, the "certified local government" program of the National Historic Preservation Act Amendments of 1980 and the Main Historic Preservation Commission; and carry out any responsibilities delegated to it under that program, including review and comment on any National Register nominations submitted to the historic preservation board; upon request of the council, participate in any review of federal actions or undertakings pursuant to Section 106 of the National Historic Preservation Act; attend informational and educational programs sponsored by the Maine Historic Preservation Commission; and prepare an annual report of the activities of the historic preservation board.

(i) To inform and educate the citizens of Portland concerning the cultural, historic, architectural and archeological heritage of the city by publishing appropriate maps, newsletters, brochures and pamphlets and by sponsoring programs and seminars.

(j) To hold meetings and public hearings to review applications for certificates of appropriateness affecting proposed or designated landmarks and districts; to recommend approval or disapproval of certificates of appropriateness.

(k) To provide testimony to the board of appeals in

connection with any application for a certificate of economic hardship.

(l) To develop design guidelines affecting landmarks or districts for review and approval by the planning board.

(m) To advise the planning board as to recommendations on any preservation or conservation easements that the City of Portland may have or be offered as a gift or otherwise.

(n) To advise the planning board as to the administration of such gifts, grants and money as may be appropriated for the purposes of this article upon authorization and approval by the council.

(o) To provide comment, as appropriate, to the planning board and/or city council on matters pertaining to historic preservation in Portland.

(p) To confer recognition upon the owners of landmarks or properties, sites, structures or objects within districts by means of certificates, plaques or markers.

(q) To assist the planning board in the development of a preservation component in the comprehensive plan of the City of Portland.

(r) To periodically review this Code and to make recommendations to the planning board concerning any amendments appropriate for the protection and continued use of landmarks or properties, sites, structures or objects within districts.

(s) To annually report to the council with respect to the following matters:

1. Survey work in progress or completed;

2. The number of projects reviewed (by type);

3. How many certificates of each type were issued.

(Ord. No. 235-90, 2-26-90; Ord. No. 165-08/09, 3-16-09)

DIVISION 3. CATEGORIES AND CRITERIA FOR DESIGNATION

Sec. 14-610. Minimum criteria for designation.

(a) The historic preservation board shall limit its consideration to the following criteria in making a determination on a proposed nomination of an area, site, structure or object for designation by ordinance as a landmark or district:

1. Its value as a significant example of the cultural, historic, architectural, archeological or related aspect of the heritage of the City of Portland, State of Maine, New England region, or the United States;

2. Its location as a site of a significant historic or prehistoric event or activity which may have taken place within or which involved the use of any existing structure on the property;

3. Its identification with a person or persons who significantly contributed to the cultural, historic, architectural, archeological or related aspect of the development of the City of Portland, State of Maine, New England region, or the United States;

4. Its exemplification of a significant architectural type, style or design distinguished by innovation, rarity, uniqueness or overall quality of design, detail, materials or craftsmanship;

5. Its identification as the work of an architect, designer, engineer or builder whose individual work is significant in the history or development of the City of Portland, the State of Maine, the New England region, or the United States; or

6. Its representation of a significant cultural, historic, architectural, archeological or related theme expressed through distinctive areas, sites, structures or objects that may or may not be contiguous.

(b) In the case of a nominated historic district, the historic preservation board shall also determine whether a substantial number of the properties, sites, structures or objects have a high degree of cultural, historic, architectural or archeological significance and integrity, many of which may qualify

as landmarks, and which may also have within its boundaries other properties, sites, structures or objects which, while not of such cultural, historic, architectural or archeological significance to qualify as landmarks, nevertheless contribute to the overall visual characteristics of the significant properties, sites, structures or objects located within it.

(c) In the case of a nominated historic landscape district, the historic preservation board shall also consider its significance as a geologic, natural or man-made landscape feature associated with the development, heritage or culture of the City of Portland, State of Maine, New England region, or the United States.

(d) The planning board and council shall apply the criteria of subsections (a), (b) and (c) but shall also consider the effect of such designation on other aspects of the comprehensive plan of the city.
(Ord. No. 235-90, 2-26-90)

Sec. 14-611. Integrity of landmarks and historic districts.

Any area, structure or object that meets the criteria in section 14-610 must also have sufficient integrity of location, design, condition, materials and workmanship to make it worthy of preservation or restoration.
(Ord. No. 235-90, 2-26-90)

Sec. 14-612. Designation of historic landscape districts.

An historic landscape district may be nominated and considered for designation only if the entire area of the district is owned by a unit of federal, state or local government, or any combination of such ownership.
(Ord. No. 235-90, 2-26-90; Ord. No. 220-93, § 2, 5-17-93)

Sec. 14-613. Reserved.

DIVISION 4. NOMINATION, CONSIDERATION AND DESIGNATION

Sec. 14-614. Procedure.

The provisions of this division shall govern the nomination, consideration and designation of landmarks and districts.
(Ord. No. 235-90, 2-26-90)

Sec. 14-615. Initiation of nomination.

(a) Nomination of an area, site, structure or object for consideration of designation as a landmark, historic district or historic landscape district shall be submitted to the department, on a form provided by the department, by the following:

1. Any two (2) members of the historic preservation board on their own initiative, by written notice to the department; or

2. By written petition of any owner, in the case of a landmark; or

3. By written petition of one (1) or more owners of affected property in the case of a district; provided two (2) members of the historic preservation board must sponsor the petition.

(b) A nomination shall be completed and filed with the department with all required signatures and any fees specified therefor for the nomination to be pending.

(c) Upon nomination, the department shall notify the owner or owners of the nomination and shall transmit the nomination to the historic preservation board for its consideration at its next scheduled meeting, which in no event shall be held later than thirty (30) days following nomination.

(d) At any time after a complete nomination is filed for an historic district, the owner of a structure who seeks a permit for demolition may apply to the historic preservation board for a determination that the structure to be demolished is noncontributing and eligible for a demolition permit. The determination of the historic preservation board that the structure is eligible for a permit shall be conclusive.
(Ord. No. 235-90, 2-26-90; Ord. No. 165-08/09, 3-16-09)

Sec. 14-616. Notification of nomination and public hearing.

(a) A public hearing on the nomination shall be held by the historic preservation board within thirty (30) days following the first scheduled meeting referred to in section 14-615(c), but in no event later than sixty (60) days following receipt of the completed

nomination form by the department. Notice of the nomination and of the public hearing shall be in accordance with the procedures for public hearings before the planning board for site plan approval.

(b) The hearing shall be conducted in accordance with procedures adopted by the historic preservation board. The historic preservation board shall consider all testimony or evidence relating to the designation criteria in division 3 from any person who makes written submissions or appears at the public hearing. Historic preservation board members may also present testimony or make submissions. The owner of a nominated landmark or of property within a nominated district shall be allowed reasonable opportunity to present testimony or evidence concerning the applicability of the designation criteria in division 3.
(Ord. No. 235-90, 2-26-90)

Sec. 14-617. Recommendation by historic preservation board.

Within thirty (30) days following the close of the public hearing, the historic preservation board shall make recommendation to the council in the case of a landmark, or to the planning board in the case of a district, upon the evidence as to whether the nominated landmark or district meets the criteria for designation in division 3. Such recommendation shall be approved by at least four (4) members of the historic preservation board and shall be accompanied by a report to the council or planning board containing the following information:

(a) Explanation of the significance or lack of significance of the nominated landmark or district as it relates to the criteria for designation.

(b) Explanation of the integrity or lack of integrity of a nominated landmark or historic district.

(c) Proposed design guidelines for review of alteration or construction. The specific design guidelines may provide explanation by text and/or schematic examples of visual compatibility for purposes of division 7.

(d) Relationship of the nominated landmark or district to the ongoing effort by the committee to identify and nominate all potential areas, sites, structures and objects that meet the criteria for designation.

(e) A map showing the location of the nominated landmark and the boundaries of the nominated district.

(f) A list, including the address, of every site, structure and object in each nominated historic district indicating their degree of cultural, historic, architectural or archeological significance by classification as of a landmark or contributing significance.

Where a motion either in favor of a recommendation or in opposition to a recommendation results in a vote of fewer than four (4) members, the item shall automatically be tabled to the next regularly scheduled meeting.
(Ord. No. 235-90, 2-26-90; Ord. No. 220-93, § 3, 5-17-93)

Sec. 14-618. Reserved.

Sec. 14-619. Notification of historic preservation board recommendation.

(a) The recommendation of the historic preservation board, including a copy of the report, shall be transmitted to the city council in the case of a landmark and to the planning board in the case of a district. Notice of the recommendation shall be sent by mail to the owner of a nominated landmark and to all owners within a nominated district within ten (10) business days following adoption of the recommendation and report.

(b) If the recommendation of the historic preservation board is that the property or district not be designated, the nomination process shall terminate and no new nomination shall be submitted for the identical property or area for a period of one (1) year from the date of termination, except upon a showing of substantial and material newly discovered information.
(Ord. No. 235-90, 2-26-90)

Sec. 14-620. Determination by planning board.

(a) The planning board, upon receipt of a recommendation and a report from the historic preservation board concerning nomination of a district, may hold a workshop meeting pursuant to the provisions of section 14-26. After review of the historic preservation board recommendation and report, the planning board shall hold a public hearing.

(b) All meetings, hearings and deliberations of the planning board to consider the recommendation and report of the historic preservation board shall be held in conformity with sections 14-24 through 14-28.

(c) The planning board may request the chair of the historic preservation board, or a member designated by the chair, to appear at any meeting, hearing or deliberation to explain any recommendation or report.

(d) The planning board shall make its final determination including written findings as to whether the nominated district meets the criteria for designation in division 3 within forty-five (45) days following receipt of the recommendation and report from the historic preservation board. A copy of the determination of the planning board shall be sent by regular mail to all owners within a nominated district within ten (10) business days following the determination.
(Ord. No. 235-90, 2-26-90)

Sec. 14-621. Planning board recommendation to city council.

The recommendation of the planning board regarding a nominated district shall be filed with the city clerk within ten (10) business days. It shall be accompanied by a copy of the report and recommendation of the historic preservation board and, in the case of a recommendation that the council designate a draft of a proposed designation ordinance, including any proposed design guidelines for review of alteration, construction, removal or demolition. The recommendation of the planning board may include proposed changes in other city ordinances, policies, infrastructure, or recommendations with respect to the comprehensive plan of the city relating to the proposed designation.
(Ord. No. 235-90, 2-26-90)

Sec. 14-622. Action by city council.

(a) Within sixty (60) days after the filing of a recommendation on the nomination with the city clerk pursuant to section 14-620, the council shall designate the landmark or district or reject designation. Any designation ordinance may include design guidelines for the designated landmark or district.

(b) Designation of a district shall be accompanied by a list,

including the address, of every site, structure and object in the district which is determined to be a landmark or considered to be contributing or noncontributing, indicating their degree of cultural, historic, architectural or archeological significance. This list may be amended thereafter by the council upon recommendation from the planning board under the same procedures as set forth above. Where there are no express findings by the council in the designation ordinance, there shall be a presumption that the council found that all requirements of sections 14-610 and 14-611 were met.

(c) Notice of the proposed action of the council shall be provided by mail to the nominator and the owner of the nominated landmark and/or of all properties adjacent thereto prior to council action. The notice shall include a copy of the resolution or designation ordinance and design guidelines.

(d) Notice of council action to the same persons shall be sent within ten business days following the council action. A copy of each designation ordinance and design guidelines shall be sent to the planning board, the historic preservation board and the department. A complete schedule of all landmarks and districts, including design guidelines and a listing of landmark and contributing structures, shall be maintained by the department as part of the design manual and shall be available for public inspection and copying during ordinary business hours.
(Ord. No. 235-90, 2-26-90; Ord. No. 165-08/09, 3-16-09)

Sec. 14-623. Amendment and rescission of designation.

Amendment and rescission of any designation shall be upon the request of a person or persons authorized to nominate the property or properties affected, or upon request of the council, and shall follow the procedure set forth in division 4 for designation. The council may rescind or amend a designation only after all of these procedures have been followed. The standards for rescission or amendment applied by the committee, planning board and council shall be limited to those provided in section 14-610(a) and section 14-611. Amendments may include refinement or correction of design guidelines, maps, and other parts of any designation ordinance.
(Ord. No. 235-90, 2-26-90)

Sec. 14-624.- Sec. 14-627. Reserved.

***Editor's note –** Order No. 197-03/04 adopted 9/8/04, repealed §14-625 Projects of Special Merit in its entirety.

Sec. 14-628. Time limits.

(a) Any time limit specified for any step in the process for nomination or designation of a landmark may be extended with the consent of the property owner.

(b) Any time limit specified for any step in the process for nomination or designation of a district may be extended where at least ten (10) percent of the owners of property within the boundaries of the proposed district have given written consent to the extension.

(c) Failure to comply with any time limit in the nomination and designation process as provided in divisions 3 or 4 shall not affect the validity of any designation nor the interim protection provided by division 5.

(Ord. No. 235-90, 2-26-90)

Sec. 14-629. Reserved.

DIVISION 5. INTERIM PROTECTION FOR NOMINATIONS

Sec. 14-630. Nominated landmarks and districts.

(a) From the time of nomination until the historic preservation board acts upon such nomination, a site, structure, object or area nominated but not yet designated as a landmark or district shall be subject to all of the provisions of divisions 8 and 10 governing demolition and minimum maintenance, to the same extent as if designated. Upon final action of the historic preservation board recommending designation, the site, structure, object or area nominated shall be subject to all of the protection of this article until a final decision on designation by the council becomes effective. If the council rejects designation or fails to designate a property, that property shall no longer be subject to the provisions of divisions 8 and 10 of this article.

(b) Alteration or new construction commenced pursuant to a building permit issued prior to nomination shall not require a certificate of appropriateness, unless such permit has expired,

been canceled or revoked. No project for which any application is pending, and which has received substantive review by the planning board prior to nomination, shall be affected by nomination. Substantive review, as used in this paragraph, shall include workshop review of any completed application under articles IV or V of this chapter.

(Ord. No. 235-90, 2-26-90; Ord. No. 220-93, § 4, 5-17-93; Ord. No. 165-08/09, 3-16-09)

Sec. 14-631. National Register of Historic Places.

(a) Every property, landmark or district listed in the National Register of Historic Places prior to adoption of this article, as shown in the design manual, is hereby designated as a landmark or district and shall be subject to all of the protection of this article, until such time as such designation is amended or rescinded as provided by section 14-623. Listed properties which would qualify for designation as historic landscape districts shall be subject to the applicable provisions of this article. If there is any inconsistency between the boundaries of any landmark or district as shown in the designation ordinance, if any, the design manual and/or the National Register, such inconsistency shall be resolved in favor of such ordinance and the design manual in that order. A certificate of appropriateness shall be obtained for every alteration or new construction affecting said listed properties and districts.

(b) Upon notice to the city that a property or area has been listed in the National Register after the adoption of this article, a nomination shall be deemed submitted to the historic preservation board for designation of such property or area as a landmark, historic district or historic landscape district under this article, and the procedures of this division shall be applicable thereto.

(Ord. No. 235-90, 2-26-90; Ord. No. 165-08/09, 3-16-09)

Sec. 14-632. Properties eligible for listing on National Register or for local designation.

A certificate of economic hardship shall be obtained prior to demolition of any structure which has not been designated in accordance with this article but which is eligible for listing on the National Register of Historic Places under the criteria established by 16 U.S.C. Section 470(a) or its successor statute and/or regulations made thereunder or which is eligible for local

listing under the criteria for designation of this article. The determination of eligibility for listing shall be made by the department, which may refer such a determination to the historic preservation board, and by the board of appeals if an appeal is taken. Upon determination of eligibility, the structure so determined shall also be subject to the provisions of division 10 until a final decision by the council on designation becomes effective. If the council rejects designation or fails to designate a structure which has been determined to be eligible under the terms of this section, that structure shall no longer be subject to the provisions of divisions 8 and 10 of this article.
(Ord. No. 235-90, 2-26-90; Ord. No. 220-93, § 5, 5-17-93)

Sec. 14-633. Reserved.

DIVISION 6. CERTIFICATES OF APPROPRIATENESS AND NONAPPLICABILITY

Sec. 14-634. Certificate of appropriateness required.

(a) Except as provided in sections 14-635 and 14-636, a certificate of appropriateness shall be required before the following actions affecting any landmark, contributing or noncontributing structures, objects, sites or property in a district may be undertaken and shall be a condition precedent to the issuance of any permit authorizing such work:

1. Any exterior alteration or new construction requiring a building permit from the City of Portland, including, but not limited to the following:

   a. Removal and replacement of architectural detailing including, but not limited to, porch spindles and columns, railings, window moldings and cornices;

   b. Moving of structures or objects on the same site or to another site;

   c. Construction of rooftop additions or decks;

   d. Alteration of accessory structures such as garages;

   e. Porch replacement or new construction of porches;

   f. Installation of exterior access stairs;

g. Window or door replacement requiring enlargement of openings;

h. Installation of antennas and satellite receiving dishes;

i. Installation of solar collectors.

2. Any exterior alteration that does not require a building permit but which involves any one (1) of the following activities:

a. Installation or replacement of either roofing or gutters where the roofing or gutters are a significant and integral feature of the structure including, but not limited to, mansard roofs, cupola roofs, ornamental slate roof features, and built-in gutter systems and the installation or replacement of siding;

b. Window and door replacement whether or not it requires enlargement of openings;

c. Masonry work including, without limitation, tuckpointing, sandblasting, chemical cleaning;

d. Site features other than vegetation including, without limitation, fencing, walls, paving and grading. However, required review for alterations to cemeteries designated under this article shall not include review of alterations to headstones made for the purpose of recognition of additional decedents or installation of grave markers and/or tombs;

e. Landscaping within an historic landscape district;

f. Exterior lighting where proposed in conjunction with commercial and institutional signage or awnings, where placed on street-fronting facades of designated structures;

g. Exterior utilities including mechanical, plumbing and electrical, where placed on street-fronting

facades.

3. Installation or alteration of any exterior sign.

4. Any relocation of a landmark or contributing structure within a district.

(b) There shall be a rebuttable presumption that any structure within a district shall be noncontributing unless the design manual expressly identifies it as such. Where the department or the owner believes that the identification is erroneous, the historic preservation board shall determine whether the structure is noncontributing.

(Ord. No. 235-90, 2-26-90; Ord. No. 220-93, § 6, 5-17-93; Ord. No. 62-93, 8-2-93; Ord. No. 165-08/09, 3-16-09)

Sec. 14-635. Exceptions to requirement of certificate of appropriateness.

A certificate of appropriateness is not required:

(a) Where a certificate of non-applicability has been issued within the previous twelve (12) months;

(b) Where the work consists solely of ordinary maintenance and/or restoration, provided that there is no substitution of materials or alteration of architectural details;

(c) Where the work consists solely of emergency repair of a temporary nature;

(d) Where a certificate of economic hardship has been issued and remains valid;

(e) In the case of either alteration of a structure (other than a landmark) or of new construction within a district, a certificate of appropriateness shall not be required where the department determines that the proposed exterior changes to a structure are not readily visible at pedestrian heights, when viewed at any height between four (4) and six (6) feet from any open space or street. Where a certificate of appropriateness is required for such changes, it shall be limited to those portions of the structure or structures so visible.

(Ord. No. 235-90, 2-26-90; Ord. No. 197-03/04, 9-8-04; Ord. No. 165-08/09, 3-16-09)

Sec. 14-636. Exterior work within historic landscape districts.

A certificate of appropriateness shall be obtained before any alteration or new construction within an historic landscape district may be undertaken, except where a certificate of non-applicability has been issued or where construction or alteration is pursuant to a master plan approved by a prior certificate of appropriateness within five (5) years of commencement.
(Ord. No. 235-90, 2-26-90; Ord. No. 165-08/09, 3-16-09)

Sec. 14-637. Applications for certificate of appropriateness.

(a) Application for a certificate of appropriateness shall be made on a form prepared by the city and shall be submitted to the department along with the applicable fee. Upon receipt of a complete application, the item shall be scheduled for the next available historic preservation board meeting, provided that the notice requirements of this article can be met prior to that meeting. The department shall transmit a copy of the complete application to the Planning Board and the historic preservation board, as applicable, at least four (4) days prior to their next scheduled meeting. The department shall not issue or act upon the application until the historic preservation board and the planning board, as applicable, have completed their review and approval process.

(b) An application for a certificate of appropriateness shall be treated as an application for a certificate of economic hardship under division 8, whenever the historic preservation board or the Planning Board, as applicable, determines that the proposed alteration includes any demolition which would:

1. Have the effect of causing the structure to no longer meet the criteria for designation of division 3; or

2. Materially impair the significance and integrity of the structure.

(c) Where a determination under paragraph (b) is made by the historic preservation board, the planning board shall review that decision as a preliminary matter, whether the historic preservation board has taken final action with respect to the application or

not. Upon any final determination that an application for a certificate of appropriateness is required to be treated as an application for a certificate of economic hardship, no further action shall be taken with respect to the application until that certificate is applied for and is granted.

(d) Where the applicant has done work or caused work to be done on a structure or a property for which a certificate of appropriateness is sought and such work is either not done in compliance with an approval received under this article or was performed without the approvals required under this article, no application for such structure or property shall be considered by the department or by the historic preservation board until such work is brought into compliance with the requirements of this article. The historic preservation board may waive this requirement if the historic preservation board determines that the work does not alter the essential character of the structure or district and one (1) or more of the following standards are also met:

1. The work was needed to bring a building into conformance with any building or safety code;

2. The applicant can demonstrate a good faith belief that necessary approvals had been received for the work at issue prior to the commencement of the work; or

3. The applicant can demonstrate a good faith belief that the work done was not subject to review under this article.

Review of any application by the department or by the historic preservation board shall not constitute waiver of any future claims by the city concerning violations and shall not stop the city from prosecuting any violation.

(e) Once a completed application has been submitted, it shall be diligently pursued. Failure of an applicant to attend two (2) or more historic preservation board meetings at which an application is scheduled for review shall cause the application to expire and to be deemed null and void, unless the department determines that good cause is shown for the failure to attend. Where good cause is shown for a failure to attend, the historic preservation board shall table an application to a date mutually agreed upon in writing.

(Ord. No. 235-90, 2-26-90; Ord. No. 220-93, § 7, 5-17-93)

Sec. 14-638. Review process for certificate of appropriateness, except as provided elsewhere in this division.

(a) The process for review of an application for a certificate of appropriateness shall be as follows, except to the extent specifically provided elsewhere in this division:

1. The department shall review the application and make a recommendation to the historic preservation board based upon the standards in division 7, except as provided in subsection (b) for historic plaques or markers. The recommendation of the department shall be made within (30) days of receipt of a complete application.

2. Whenever the recommendation of the department is that the application shall be approved, the application shall be placed upon the next consent agenda of the historic preservation board, except as provided in subsection (b). Any member of the historic preservation board may remove an application from the consent agenda for the purpose of giving it a public hearing.

3. Whenever the recommendation of the department is that the application not be approved or there is no timely recommendation, the application shall be scheduled for a public hearing at the next meeting of the historic preservation board which allows for adequate notice.

4. The historic preservation board shall either conduct a public hearing or make a decision on the application within thirty (30) days following receipt of the application from the department. The historic preservation board shall review the application and any negative recommendation of the department. If an item is scheduled for historic preservation board review, the historic preservation board shall cause notice of the application to be given to all property owners within one hundred (100) feet of the property at least seven (7) days prior to the date of the hearing.

5. The historic preservation board shall enter findings of fact concerning the relationship between the application and the applicable standards of division 7 immediately following a denial or conditional approval of any

certificate of appropriateness.

6. Written notice of the determination of the historic preservation board on the application, including a copy of the findings of fact, shall be sent by regular mail to the applicant and to the planning board within ten (10) business days following its determination.

7. The applicant and any owner of abutting property or of property located within the same district aggrieved by the decision may object to the proposed decision by filing a notice of objection with the department within thirty (30) days following the mailing of the notice of determination of the historic preservation board; provided, however, only the applicant may object where no building permit or site plan review is required for the work which requires the issuance of the certificate of appropriateness, and a proposed decision approving any such application shall be deemed final upon being reduced to writing and provided to the applicant. In the absence of filing of such objection, upon expiration of said thirty (30) days the proposed decision shall become final. If a timely objection is received, the application shall be placed on the planning board agenda and shall be disposed of in accordance with section 14-639. The planning board shall deny the appeal unless it finds that the action of the historic preservation board was arbitrary or capricious or was not based on substantial evidence. Review by the planning board under this section is intended to be appellate in nature. Except where the planning board determines that injustice would result, the planning board shall determine the appeal without considering any facts or arguments which were not presented to the historic preservation board. Where the planning board finds it necessary to consider such new evidence in order to do substantial justice, it shall remand the matter to the historic preservation board for further consideration, unless it determines that the resulting delay is likely to result in undue hardship to the applicant.

(Ord. No. 235-90, 2-26-90; Ord. No. 371-91, § 2, 6-5-91; Ord. No. 220-93, § 8, 5-17-93; Ord. No. 197-03/04, 9-8-04)

Sec. 14-639. Review process involving level III site plans.

The process for review of an application for alteration or new construction that is also a level III site plan as defined in Article V of this chapter shall be as follows:

(a) Site plan review by the planning board and historic preservation review by the historic preservation board shall, to the extent feasible, proceed concurrently. Any proposed level III site plan required to obtain a certificate of appropriateness under this article shall be exempt from the design standards included in article V as provided for in Sec. 14-526 (d)5a. of the site plan ordinance.

(b) Upon receipt of the application for a certificate of appropriateness, the department shall review the application and schedule a workshop for preliminary review by the historic preservation board. The historic preservation board shall conduct a workshop on the application within thirty (30) days following receipt of the application from the department. The department shall prepare an analysis of the application based upon the standards in division 7 for consideration at the workshop. The historic preservation board shall cause notice of the workshop to be given to all property owners within five hundred (500) feet of the property at least seven (7) days prior to the date of the meeting.

Additional workshops may be scheduled by the historic preservation board with the consent of the applicant.

(c) Following preliminary workshop(s) and upon determination by the historic preservation board that the application is complete, the historic preservation board shall conduct a public hearing and make a final decision on the application. The historic preservation board shall cause notice of the public hearing to be given consistent with the procedures outlined in (b) above.

(d) If the historic preservation board finds that the application meets the applicable standards of division 7, it shall issue a certificate of appropriateness, with or without conditions. If the action by the historic preservation board is a denial or conditional approval, the historic preservation board shall make findings of fact concerning the relationship between the application

and the applicable standards of division 7.

(e) Written notice of the determination of the historic preservation board on the application, including a copy of the findings of fact, if any, shall be sent by regular mail to the applicant within ten (10) business days following its determination.

(f) The applicant and any owner of abutting property or of property located within the same district aggrieved by the decision may object to the proposed decision as provided in Section 14-638(7).

(Ord. No. 235-90, 2-26-90: Ord. No. 63-97, 8-18-97; Ord. No. 197-03/04, 9-8-04; Ord. No. 165-08/09, 3-16-09; Ord. No. 278-09/10, 7-19-10)

Sec. 14-640. Review process involving installation or alteration of any exterior sign; minor alterations; and temporary alterations, construction or improvements.

(a) An application for a certificate of appropriateness for installation or alteration of any exterior sign; minor alterations; and temporary alterations, construction or improvements shall be reviewed by the department for compliance with the standards of division 7 and the design manual. Where the department determines that such an application meets these requirements, the certificate of appropriateness shall be issued by the department without presentation to the historic preservation board for approval. The department shall provide the historic preservation board with written notice of such action at the next historic preservation board meeting.

(b) If the department approves an application with conditions, the applicant may request review by the historic preservation board. The application shall then be subject to review by the historic preservation board pursuant to section 14-638.

(c) If the department determines that the application does not meet the requirements of division 7 and the design manual, the application shall be scheduled for review by the historic preservation board pursuant to section 14-638, unless the applicant withdraws the application.

(d) For purposes of this section only, temporary is defined as either a one-time occurrence that does not exceed fourteen (14) days or as an annual occurrence that does not exceed one (1)

fourteen-day period each year. Minor alterations are defined as incidental changes or additions to a building, site features or exterior utilities which require building permits but will neither result in substantial changes to any significant historic features nor obscure such features. In no event shall any change be deemed minor when, in the opinion of the department, such change shall alter the historic character of the building or site.
(Ord. No. 220-93, § 9, 5-17-93)

Sec. 14-641. Action by planning board.

Upon any appeal from the historic preservation board determination pursuant to section 14-638, the planning board shall review the appeal and the decision of the historic preservation board and shall take final action appeal within sixty (60) days following receipt of appeal; provided, however, whenever the planning board also is considering a site plan for development of the site, it shall proceed in accordance with the time frames applicable to site plan review. The planning board shall notify the applicant by regular mail within ten (10) business days following its decision on appeal.
(Ord. No. 235-90, 2-26-90; Ord. No. 197-03/04, 9-8-04)

Sec. 14-642. Issuance of certificate of appropriateness.

(a) The department shall issue the certificate of appropriateness within ten (10) business days following a proposed affirmative decision by the historic preservation board becoming final.

(b) Unless work authorized by a certificate of appropriateness shall be commenced within six (6) months of the date of issuance of the certificate of appropriateness, the certificate of appropriateness shall expire and shall become null and void. The department may approve additional extensions of this six-month period, not to exceed a total of two (2) years, provided that a written request for extension is received prior to the expiration date of the certificate of appropriateness. In the event of litigation arising out of the granting of a certificate of appropriateness, the certificate shall remain valid until one (1) year after the entry of final judgment in the litigation or until the end of the two-year period, whichever is later.
(Ord. No. 235-90, 2-26-90; Ord. No. 220-93, § 10, 5-17-93;Ord. No. 197-03/04, 9-8-04)

Sec. 14-643. Certificate of non-applicability.

(a) The department shall issue a certificate of non-applicability as to property subject to this article when requested to do so when:

1. The department determines that none of the proposed work requires a certificate of appropriateness;

2. The department determines that all of the proposed work is ordinary maintenance, restoration, or a combination thereof;

3. In the case of the alteration of a structure other than a landmark or of new construction within a district, where the department determines that the proposed exterior changes to a structure are not readily visible at pedestrian heights from any open space or street when viewed from any height between four (4) and six (6) feet above such space or street. Where a certificate of appropriateness is required for such changes, a certificate of non-applicability shall be issued upon request for those portions of the structure or structures not visible at such heights; provided, however, this paragraph shall not apply to alteration of a landmark or to any demolition; or

4. After any appeal where the historic preservation board, planning board or any court determines that paragraphs (1), (2) or (3) of this subsection are applicable.

(b) The department shall act upon any application for a certificate of non-applicability within five (5) business days of receiving a complete written description of all work to be undertaken.

(Ord. No. 235-90, 2-26-90)

Sec. 14-644. Amendments to approved certificates of appropriateness.

If at any time before or during work approved under the procedures set forth in this division the applicant requests minor amendments to approved work, the department may approve such minor amendments under the procedures set forth in section 14-638(b), provided that such amendments will not result in a waiver or

substantial alteration of the approval or any condition attached to the approval. The applicant shall supply a written statement of the proposed amendment and amended plans or drawings to the department. The decision of the department as to whether an amendment may be reviewed under this section shall be final.
(Ord. No. 220-93, § 11, 5-17-93)

Sec. 14-645. Review process for demolition of landmarks or structures within a district.

(a) Any applicant seeking demolition of a landmark or contributing structure must apply for a certificate of economic hardship to the board of appeals in accordance with division 8 of this article. Said application must be approved by the board of appeals before a demolition permit can be issued.

(b) Any applicant seeking demolition of a noncontributing building as defined in this article may apply directly for a demolition permit without receiving approval from the historic preservation board or a certificate of economic hardship from the board of appeals.

(c) Any applicant seeking demolition of a portion of a contributing or landmark structure may request that the historic preservation board make a determination as to whether such portion of the structure is non-contributing based on the definition of that classification contained in Sec. 14-602 of the ordinance. IF the board determines the portion to be noncontributing, the applicant may apply directly for a demolition permit.
(Ord. No. 165-08/09, 3-16-09)

Sec. 14-646. - Sec. 14-649. Reserved.

DIVISION 7. STANDARDS FOR REVIEW OF APPLICATION FOR CERTIFICATE OF APPROPRIATENESS

Sec. 14-650. Standards for review of alteration.

In considering an application for a certificate of appropriateness involving alteration, the historic preservation board and the Planning Board shall apply the following general standards, as further described in the design manual and any design guidelines in the ordinance designating the landmark or district:

(a) Every reasonable effort shall be made to provide a compatible use for a property which requires minimal alteration to the character-defining features of the structure, object or site and its environment or to use a property for its originally intended purpose.

(b) The distinguishing original qualities or character of a structure, object or site and its environment shall not be destroyed. The removal or alteration of any historic material or distinctive architectural features should be avoided when possible.

(c) All sites, structures and objects shall be recognized as products of their own time, place and use. Alterations that have no historical basis or create a false sense of historical development, such as adding conjectural features or elements from other properties, shall be discouraged.

(d) Changes which may have taken place in the course of time are evidence of the history and development of a structure, object or site and its environment. Changes that have acquired significance in their own right shall not be destroyed.

(e) Distinctive features, finishes and construction techniques or examples of skilled craftsmanship which characterize a structure, object or site shall be treated with sensitivity.

(f) Deteriorated historic features shall be repaired rather than replaced wherever feasible. Where the severity of deterioration requires replacement of a distinctive feature, the new feature should match the feature being replaced in composition, design, texture and other visual qualities and, where possible, materials. Repair or replacement of missing historic features should be based on accurate duplications of features, substantiated by documentary, physical or pictorial evidence rather than on conjectural designs or the availability of different architectural elements from other structures or objects.

(g) The surface cleaning of structures and objects, if appropriate, shall be undertaken with the gentlest means possible. Chemical or physical treatments, such as

sandblasting, that cause damage to historic materials shall not be undertaken.

(h) Every reasonable effort shall be made to protect and preserve significant archeological resources affected by or adjacent to any project. If resources must be disturbed, mitigation measures shall be undertaken.

(i) Contemporary design for alterations and additions to existing properties shall not be discouraged when such alterations and additions do not destroy significant cultural, historical, architectural or archeological materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the size, scale, color, material and character of the property, neighborhood or environment.

(j) Wherever possible, new additions or alterations to structures and objects shall be undertaken in such a manner that, if such additions or alterations were to be removed in the future, the essential form and integrity of the historic property would be unimpaired.

(Ord. No. 235-90, 2-26-90; Ord. No. 220-93, § 12, 5-17-93)

Sec. 14-651. Standards for review of new construction.

In considering an application for a certificate of appropriateness involving new construction, the historic preservation board and the planning board shall apply the following general standards as may be applicable to the context of the proposed construction. The intent and application of the following standards are further described in the historic resources design manual and shall guide the board in its review.

(a) *Scale and form:*

1. ***Height.*** In addition to the applicable requirements of articles III, IV and V of this chapter, the proposed height shall be visibly compatible with surrounding structures when viewed from any street or open space and in compliance with any design guidelines.

2. ***Width.*** The width of a building shall be visually compatible with surrounding structures when viewed

from any street or open space and in compliance with any design guidelines.

3. ***Proportion of principal facades.*** The relationship of the width to the height of the principal elevations shall be visually compatible with structures, public ways and open spaces to which it is visually related.

4. ***Roof shapes.*** The roof shape of a structure shall be visually compatible with the structures to which it is visually related.

5. ***Scale of a structure.*** The size and mass of structures in relation to open spaces, windows, door openings, porches and balconies shall be visually compatible with the structures, public ways and places to which they are visually related.

6. ***Applicability to Congress Street historic district.*** In the Congress Street historic district, for new construction within the B3 zone, the historic preservation board shall not impose conditions more restrictive than the dimensional requirements (Sec 14-220) of the B3 zone.

(b) ***Composition of principal facades:***

1. ***Proportion of openings.*** The relationship of the width to height of windows and doors shall be visually compatible with structures, public ways and places to which the building is visually related.

2. ***Rhythm of solids to voids in facades.*** The relationship of solids to voids in the facade of a structure shall be visually compatible with structures, public ways and places to which it is visually related.

3. ***Rhythm of entrance porch and other projections.*** The relationship of entrances and other projections to sidewalks shall be visually compatible with the structures, public ways and places to which they are visually related.

4. ***Relationship of materials.*** The relationship of the color and texture of materials (other than paint color) of the facade shall be visually compatible with the predominant materials used in the structures to which they are visually related.

5. ***Signs.*** Any new sign, and any change in the appearance of an existing sign located on a landmark within an historic district or within an historic landscape district, which is readily visible from any street or open space shall not be incongruous to the historic character of the landmark or district and shall comply with the criteria and guidelines specified in the design manual.

(c) ***Relationship to street:***

1. ***Walls of continuity.*** Facades and site structures, such as masonry walls, fences and landscape masses, shall, when it is a characteristic of the area, form cohesive walls of enclosure along a street to ensure visual compatibility with the structures, public ways and places to which such elements are visually related.

2. ***Rhythm of spacing and structures on streets.*** The relationship of a structure or object to the open space between it and adjoining structures or objects shall be visually compatible with the structures, objects, public ways and places to which it is visually related.

3. ***Directional expression of principal elevation.*** A structure shall be visually compatible with the structures, public ways and places to which it is visually related in its directional character, whether this be vertical character, horizontal character or nondirectional character.

4. ***Streetscape, pedestrian improvements.*** Streetscape and pedestrian improvements and any change in the appearance thereof located adjacent to, or on a landmark, within an historic district or within an

historic landscape district which is readily visible from any street or open space shall not be incongruous to the historic character of the landmark or district and shall comply with the criteria and guidelines specified in the design manual.

(d) *Other standards:*

1. ***Compatible uses.*** Every reasonable effort shall be made to provide a compatible use for a property which requires minimal alteration to the character-defining features of the structure, object or site and its environment or to use a property for its originally intended purpose.

2. ***Distinguishing original character.*** The distinguishing original qualities or character of a structure, object or site and its environment shall not be destroyed. The alteration of any historic material or distinctive architectural features should be avoided when possible.

3. ***Archeological resources.*** Every reasonable effort shall be made to protect and preserve significant archeological resources affected by or adjacent to any project. If resources must be disturbed, mitigation measures shall be undertaken.

4. ***Contemporary design.*** Contemporary design for additions to existing properties shall not be discouraged when such alterations and additions do not destroy significant cultural, historical, architectural or archeological materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the size, scale, material and character of the property, neighborhood and environment.

5. ***Additions.*** Wherever possible, new additions to structures and objects shall be undertaken in such a manner that, if such additions were to be removed in the future, the essential form and integrity of the structure would be unimpaired.

(Ord. No. 235-90, 2-26-90; Ord. No. 220-93, § 13, 5-17-93; Ord. No. 165-08/09, 3-

Sec. 14-651.5. Standards for review of alternations to or redesign of noncontributing structures.

(a) In considering an application for a certificate of appropriateness involving alteration(s) to a noncontributing structure the standards for review of alterations set forth in section 14-650 shall apply as applicable. The intent of the review shall be to ensure no further erosion of any existing architectural character of the subject structure determined to be significant by the historic preservation board and, where practicable, to guide projects toward a more compatible relationship with the surrounding context.

(b) In considering an application for a certificate of appropriateness involving comprehensive redesign of a noncontributing structure, the standards for review of construction set forth in section 14-651 shall apply.
(Ord. No. 165-08/09, 3-16-09)

Sec. 14-652. Standards for review of relocation.

In acting upon an application for a certificate of appropriateness involving relocation, the historic preservation board and the planning board shall apply the following general standards and any design guidelines in the ordinance designating the landmark or district:

(a) Whether the historic or urban design character and aesthetic interest of the structure or object contribute to its present setting.

(b) If located within a district, whether there are definite plans for the area to be vacated and what the effect of those plans is on the character of the surrounding area. In such cases, consideration of additional design guidelines for construction to be imposed as a condition of approval is appropriate.

(c) Whether the relocation of the structure or object can be accomplished without significant damage to its physical integrity.

(d) Whether the proposed relocation area is compatible with

the cultural, historical or architectural character of the structure or object.

(Ord. No. 235-90, 2-26-90)

Sec. 14-652.5. Standards for review of signage.

In considering an application for a certificate of appropriateness involving the installation or modification of sign(s), including awning(s) which incorporate signage, the following standard shall apply:

(a) Signs shall be compatible with the subject building and its surrounding context as detailed in the signage design guidelines included in the historic resources design manual. If there is a conflict between this standard and the requirements of Article III, Division 22. Signs, the stricter standard shall apply.

(Ord. No. 165-08/09, 3-16-09)

Sec. 14-653. Qualification of applicant.

Prior to issuance of any certificate of appropriateness, any applicant shall demonstrate sufficient right, title or interest in the property, technical capacity and financial capacity to complete any change proposed to be undertaken under the certificate of appropriateness, upon reasonable request of the department. If the department determines that the applicant has failed or refused to demonstrate an ability to complete the proposed activity, it shall refer the issuance to the Planning Board, which shall make a final determination as to whether the applicant has demonstrated a sufficient capability to complete the proposed activity. Notwithstanding any other provision of this article, the historic preservation board or Planning Board may include reasonable conditions, including the provision of adequate financial security, to ensure that actions taken under a certificate of appropriateness will be successfully prosecuted to completion, as approved, in a timely and workmanlike manner.

(Ord. No. 235-90, 2-26-90)

Sec. 14-654. - Sec. 14-659. Reserved.

DIVISION 8. CERTIFICATE OF ECONOMIC HARDSHIP

Sec. 14-660. Applicability.

(a) Any applicant denied a certificate of appropriateness by the planning board within thirty (30) days thereafter and any applicant seeking demolition of a landmark or a contributing structure within a district may make application for a certificate of economic hardship from the board of appeals. The application shall be submitted to the department, together with the applicable fee.

(b) The department shall transmit a copy of the application to the board of appeals, with copies to the Planning Board and the historic preservation board, within ten (10) business days following receipt of a properly completed application.
(Ord. No. 235-90, 2-26-90)

Sec. 14-661. Standard to be applied.

(a) The board of appeals shall approve an application for a certificate of economic hardship only upon a determination that the denial of approval of the proposed activity or of the proposed demolition will result in the loss of all reasonable use of the structure as required by sections 14-664 and 14-666.

(b) In applying this standard, the board of appeals shall consider among other things any evidence presented concerning the following:

1. Any opinions from a licensed engineer or architect with experience in renovation, restoration or rehabilitation as to the structural soundness of the structure and its suitability for continued use, renovation, restoration or rehabilitation.

2. Any estimates of the cost of the proposed alteration, construction, demolition or removal and an estimate of any additional cost that would be incurred to comply with the recommendations of the planning board for changes necessary for it to be approved.

3. Any estimates of the market value of the property in its current condition; after completion of the proposed alteration, construction, demolition or removal; after any expenditures necessary to comply with the recommendations of the planning board for changes

necessary for it to approve a certificate of appropriateness; and in the case of a proposed demolition, after renovation of the existing structure for continued use.

4. In the case of a proposed demolition, any estimates from architects, developers, real estate consultants, appraisers or other real estate professionals experienced in rehabilitation as to the economic feasibility of restoration, renovation or rehabilitation of any existing structures or objects.

(Ord. No. 235-90, 2-26-90)

Sec. 14-662. Information to be supplied by applicant.

(a) The applicant shall submit by affidavit the following information for an application to be considered to be complete:

1. The assessed value of the property and/or the structure in the case of a demolition for the two (2) most recent assessments.

2. Real property taxes paid for the previous two (2) years.

3. The amount paid for the property by the owner, the date of purchase and the party from whom purchased, including a description of the relationship, if any, between the owner and the person from whom the property was purchased.

4. The current balance of any mortgages or any other financing secured by the property and the annual debt service, if any, for the previous two (2) years.

5. All appraisals obtained within the previous two (2) years by the owner or applicant in connection with purchase, offerings for sale, financing or ownership of the property, or state that none were obtained.

6. All listings of the property for sale or rent, price asked and offers received, if any, within the previous four (4) years, or state that none were obtained.

7. All studies commissioned by the owner as to profitable renovation, rehabilitation or utilization of any

structures or objects on the property for alternative use, or a statement that none were obtained.

8. For income-producing property, itemized income and expense statements from the property for the previous two (2) years.

9. Estimate of the cost of the proposed alteration, construction, demolition or removal and an estimate of any additional cost that would be incurred to comply with the recommendations of the planning board for changes necessary for it to approve a certificate of appropriateness.

10. Form of ownership or operation of the property, whether sole proprietorship, for-profit or not-for-profit corporation, limited partnership, joint venture or other.

(b) In the event that the information required to be submitted by the applicant is not reasonably available, the applicant shall file with the affidavit a statement of the information that cannot be obtained and shall describe the reasons why such information is unavailable.

(c) Notwithstanding the submission of the above information, the board of appeals may require additional evidence as provided in section 14-680.

(Ord. No. 235-90, 2-26-90)

Sec. 14-663. Public hearing.

(a) The board of appeals shall hold a public hearing on the application within thirty (30) days following receipt of the completed application form. Where the application requests the demolition of a landmark or a contributing structure within a district, the public hearing shall not be held less than ninety (90) days following receipt of the completed application, unless the applicant makes a clear showing that the delay will result in undue hardship of a unique or exceptional character which could not reasonably be or have been avoided. Upon such a showing, the department may waive all or any part of the ninety-day period and schedule the hearing before the board. Undue hardship shall not include mere inconvenience or incidental financial loss. No such waiver shall be granted without the department giving best practical notice to all persons entitled to notice of the hearing.

(b) Notice of the application and of the public hearing, and conduct of the hearing, shall be in accordance with the provisions of section 14-550. Where the application requests the demolition of a landmark or a contributing structure within a district, the department shall promptly notify any persons interested in historic preservation, who have registered in writing with him or her, give notice by mail to all owners of property within five hundred (500) feet of the structure, and shall require that the applicant immediately place a notice, to be supplied by the building official, in a prominent place on the structure and to maintain it there at all times during the pendency of the demolition application. The notice shall be substantially in the following form:

"This structure has been proposed to be demolished by its owner. For further information, contact Inspection Services of the City of Portland. 874-8300"

(c) The failure to give any notice required hereunder shall not affect the validity of any action taken by the department or the board of appeals.

(d) The Planning Board may provide a report or any other information, documentation or evidence or request the historic preservation board to assist the board of appeals in considering the extent of variance necessary, an appropriate incentive plan, or reasonable condition to be imposed.

(e) The board of appeals may continue a proceeding for such additional time as it reasonably takes an applicant, any other interested person, the historic preservation board or the planning board to comply with a request for additional information or evidence. The applicant shall be afforded the right to present rebuttal evidence.
(Ord. No. 235-90, 2-26-90)

Sec. 14-664. Determination by the board of appeals.

(a) The determination by the board of appeals shall be made within forty-five (45) days following close of the public hearing and submission of all information, documentation or evidence requested by the board. The determination shall be accompanied by findings of fact.

(b) The board of appeals shall not grant approval of an application involving demolition, unless the board determines, upon clear and convincing evidence, that one (1) or more of the following circumstances apply:

1. The structure is not subject to this article; or

2. Denial of a demolition permit would result in a hardship to the property owner so great that it would effectively deprive the owner of all reasonable use of the structure. The extent of any demolition permitted shall be limited to the amount necessary to allow reasonable use of the structure. Where the condition of the structure is claimed to prevent any reasonable use, the applicant shall establish that such condition is not the result of the acts or neglect of the owner or his predecessors in title occurring in whole or in part after August 1, 1988.

(Ord. No. 235-90, 2-26-90)

Sec. 14-665. Disapproval by board of appeals.

If the determination of the board of appeals is to disapprove the application for a certificate of economic hardship, the applicant shall be notified within five (5) business days. The notice shall include a copy of the findings of fact and report.
(Ord. No. 235-90, 2-26-90)

Sec. 14-666. Determination of no reasonable use.

(a) If the determination of the board of appeals is that the denial of the certificate of appropriateness has resulted in the denial of all reasonable use of the structure, or the entire property in the case of new construction, then the certificate of economic hardship shall be issued by the department ninety (90) days following the determination unless during that time the council approves an incentive plan pursuant to section 14-667.

(b) A copy of the determination of the board of appeals, together with the findings of fact, shall be mailed to the applicant and filed with the city clerk, the planning board and the historic preservation board within five (5) business days following the determination of economic hardship.
(Ord. No. 235-90, 2-26-90; Ord. No. 165-08/09, 3-16-09)

Sec. 14-667. Incentive plan.

The purpose of an incentive plan is to provide a mechanism to allow a reasonable use without the demolition of the complete structure or important architectural elements. The Planning Board, in cooperation with the historic preservation board and the owner, may prepare a report and recommend to the board of appeals an incentive plan to assure reasonable use of the structure. This incentive plan may include, but is not limited to, loans or grants from the City of Portland or other public or private sources, acquisition by purchase or eminent domain, building and safety code modifications to reduce cost of maintenance, restoration, rehabilitation or renovation, changes in applicable zoning regulations, including a transfer of development rights, or relaxation of the provisions of this article sufficient to allow reasonable use of the structure.
(Ord. No. 235-90, 2-26-90)

Sec. 14-668. City council consideration of incentive plan.

(a) Upon receipt of a report from the board of appeals recommending an incentive plan to assure reasonable use of the property, the council shall give prompt consideration to the determination of economic hardship and the report of the board, including the recommended incentive plan. The council shall approve or disapprove the incentive plan determined by the board of appeals to allow reasonable use of the structure within ninety (90) days following the determination by the board of appeals.

(b) A copy of the ordinance enacted by the council, together with the incentive plan, if any, shall be mailed to the applicant and transmitted to the board of appeals, the planning board and the historic preservation board within five (5) business days following the enactment of the ordinance.
(Ord. No. 235-90, 2-26-90)

Sec. 14-669. Issuance of certificate of economic hardship.

(a) Upon receipt by the board of appeals of a copy of council action disapproving an incentive plan, or upon failure of the council to act to either approve or disapprove an incentive plan within the time specified, the board of appeals shall approve a certificate of economic hardship to the applicant within thirty (30) days. The certificate may be subject to conditions including design guidelines for subsequent new construction not inconsistent with the standards set forth in this article and the design manual.

The certificate of economic hardship shall be valid for a period of one hundred twenty (120) days from approval by the board of appeals, except as provided in section 14-666 where an incentive plan has been proposed. Certificates of economic hardship shall not be transferable from the applicant to another subsequent owner of the same property.

(b) Upon presentation by the applicant of a valid certificate of economic hardship to the department, the certificate of appropriateness shall be issued to the applicant within five (5) business days.
(Ord. No. 235-90, 2-26-90; Ord. No. 165-08/09, 3-16-09)

Sec. 14-670. - Sec. 14-674 Reserved.

DIVISION 9. ADMINISTRATION

Sec. 14-675. Historic resources design manual.

(a) The historic preservation board may provide further guidance on how to meet the standards of this article in the historic resources design manual, which shall supplement this article, which may include but need not be limited to maps and descriptions of landmarks and districts, a listing of properties which have been determined to be eligible for listing on the National Register or for local designation, a glossary of terms and architectural styles, descriptions, and illustrations of how the standards of this article will be interpreted, and all designation ordinances, reports and design guidelines. All provisions of the design manual shall be consistent with the standards of this article and any designation ordinance adopted hereunder.

(b) Amendments to the design manual shall be forwarded to the council as a communication and shall become effective forty-five (45) days from the date on which said amendments are sent to the council, unless the council takes official action disapproving the amendments, in whole or in part, prior to the expiration of the 45-day period.

(c) The design manual shall be maintained by the department and available for inspection and copying during regular business hours.
(Ord. No. 235-90, 2-26-90; Ord. No. 220-93, § 14, 5-17-93; Ord. No. 165-08/09, 3-16-09)

Sec. 14-676. Reserved.

Sec. 14-677. Costs.

Any project may be subject to one or more of the following fees:

(a) Project Review.

1. Administrative review, $50.00.

2. Historic Preservation board review: $100.00

3. Historic preservation board review for projects involving new construction or building additions exceeding 1000 square feet or comprehensive rehabilitation or redesign of existing structures: $750.00

4. After-the-fact review $1,000.00 plus applicable application fee.

5. Historic preservation sign review $75.00

6. Applicant shall also pay a fee to cover the professional and administrative costs for review and analysis associated with project review, including but not limited to planning, legal, or other services. The fee shall be based on the hours of review and processing time and prevailing hourly rate for reimbursement of city costs. The city shall periodically invoice the applicant for such costs incrred by the city, which invoice shall be paid promptly by the applicant. No certificate of appropriateness, building, demolition, or other permit shall issue until all current charges due under this ordinance have been paid. The balance of any remaining review and administrative costs invoiced or incurred after a permit has been issued shall be paid in full by the developer prior the issuance of any temporary or permanent certificate of occupancy.

(b) Advertising expenses.

Every applicant shall bear the entire expense of giving notice by mail and publication in accordance with this article.

(Ord. No. 235-90, 2-26-90; Ord. No. 220-93, § 15, 5-17-93; Ord. No. 119-01/02, § 5, 12-3-01; Ord. No. 165-08/09, 3-16-09; Ord. No. 223-09/10, 5-17-10)

Sec. 14-678. Notices and public comment.

(a) Except as provided in sections 14-638 and 14-639, notice of proceedings upon any application for a certificate of appropriateness shall be given only when the proposed activity otherwise constitutes level III site plan. Notice of such proceedings also shall be furnished to any persons interested in historic preservation who have registered with the department, and to the historic preservation board and/or the planning board when the proceeding is pending before a different body. The failure to give any notice required by this article shall not affect the validity of any action taken.

(b) The historic preservation board, the planning board, the board of appeals and the council shall each invite public comment at a public meeting in accordance with their respective rules, prior to any final action being taken under this article.

(c) The department shall advise the historic preservation board and the planning board of any demolition permit application received by the department as to structures or objects that are noncontributing within nominated or designated districts, but there shall be no historic preservation board review of such permit applications.
(Ord. No. 235-90, 2-26-90; Ord. No. 278-09/10, 7-19-10)

Sec. 14-679. Expiration of approval.

An approval shall expire and become null and void upon the expiration of the authorization for the work, or for the development, under the applicable provisions of chapter 6 or of articles IV or V of this chapter.
(Ord. No. 235-90, 2-26-90)

Sec. 14-680. Applicant to supply necessary evidence.

In determining the existence of the circumstances specified in this article, the historic preservation board, planning board or board of appeals may require such additional documentation or evidence as they may respectively determine to be necessary, including plans, drawings and elevations, and notwithstanding any time limit for action or decision specified in this article, it may

continue a proceeding for such additional time as it reasonably takes an applicant or any other party to comply with the request for additional relevant documentation or evidence and may draw a negative inference with regard to the content of any material evidence not produced upon reasonable request.
(Ord. No. 235-90, 2-26-90)

Sec. 14-681. Appeals.

(a) The applicant, or any person who has participated in opposition to the application and demonstrates a particularized harm caused by the approval of the application, may appeal to superior court in accordance with Rule 80B of the Maine Rules of Civil Procedure from:

1. Any final action of the planning board, provided, however, only the applicant may appeal where no building permit or site plan review is required for the work which requires the issuance of the certificate of appropriateness; or

2. Any final decision of the board of appeals. If the decision of the board of appeals is subject to an incentive plan, the decision shall not be considered final until final action on the incentive plan by the council becomes final.

DIVISION 10. MAINTENANCE

Sec. 14-690. Preservation of protected structures.

(a) Minimum maintenance requirement. All landmarks, and all contributing structures located in an historic district, shall be preserved against decay and deterioration by being kept free from the following structural defects by the owner and any

other person or persons who may have legal custody and control thereof:

1. Deteriorated or inadequate foundation which jeopardizes its structural integrity;

2. Defective or deteriorated floor supports or any structural members of insufficient size to carry imposed loads with safety which jeopardize its structural integrity;

3. Members of walls, partitions or other vertical supports that split, lean, list or buckle due to defective material or deterioration which jeopardize its structural integrity;

4. Structural members of ceilings and roofs, or other horizontal structural members, which sag, split or buckle due to defective materials or deterioration or are of insufficient size to carry imposed loads with safety which jeopardize its structural integrity;

5. Fireplaces or chimneys which list, bulge or settle due to defective material or deterioration or are of insufficient size or strength to carry imposed loads with safety which jeopardize its structural integrity;

6. Lack of weather protection which jeopardizes the structural integrity of the walls, roofs or foundation.

(b) The owner or such other person shall repair such building, object or structure within a specified period of receipt of a written order to correct defects or repairs to any structure as provided by subsection (a) above, so that such structure shall be preserved and protected in accordance with the purposes of this article.

(c) Any such order shall be in writing, shall state the actions to be taken with reasonable particularity and shall specify dates for compliance, which may be extended by the department for reasonable periods to allow the owner to secure financing, labor or materials. Any such order may be appealed to the board of appeals within thirty (30) days. The board shall reverse such an order only if it finds that the department had no substantial justification for requiring action to be taken, that the measures required or

time periods specified were not reasonable under all of the circumstances. The taking of an appeal to the board or to court shall not operate to stay any order requiring structures to be secured or requiring temporary support, unless the board or court expressly stays such order. The court of competent jurisdiction to enforce any order.
(Ord. No. 235-90, 2-26-90)

Sec. 14-691. Reserved.
Sec. 14-692. Reserved.
Sec. 14-693. Reserved.
Sec. 14-694. Reserved.

DIVISION 11. PENALTIES, ETC.

Sec. 14-695. Fines for violation.

Failure to perform any act required by this article or performance of any act prohibited by this article or of any conditions or any certificate issued hereunder shall constitute a violation and be subject to a fine as provided in 30-A M.R.S.A. Section 4452. Each day on which there is failure to perform a required act or on which a violation exists shall constitute a separate violation for purposes of this section.
(Ord. No. 235-90, 2-26-90)

Sec. 14-696. Additional penalties for willful violation or gross negligence.

(a) In addition to the penalties authorized by section 14-695, a violation which is intentional, or occurs through gross negligence, shall be subject to the following provisions:

1. No permit shall be issued under chapter 6 of this Code for any alteration or new construction affecting such property for a period of five (5) years following the last date of the violation, other than permits necessary to correct the violation. However, upon presentation of evidence satisfactory to the planning board that the violation has been corrected, any remaining portion of the five-year prohibition on issuance of a permit may be waived.

2. For a period of twenty-five (25) years, any alteration or new construction on the property shall be subject to this

article, whether or not any remaining structure or object on the property continues to have the cultural, historical, architectural or archeological character and integrity that caused it to be nominated or designated as a landmark or part of a district.

3. As a condition for any new land use approval, the owner may be required to rebuild, reconstruct, restore or replicate the structure or object on the property.

(b) Paragraphs (1) and (2) of subsection (a) shall not apply to violations which are limited to noncontributing structures.
(Ord. No. 235-90, 2-26-90; Ord. No. 165-08/09, 3-16-09)

Sec. 14-697. Other remedies.

Notwithstanding the provisions of sections 14-695 and 14-696, the city may institute appropriate proceedings in law and equity to prevent or remedy any violation of this article.
(Ord. No. 235-90, 2-26-90)

Sec. 14-698. Liberal construction of article.

This article shall be liberally applied and construed to effectuate the purpose of preservation set forth in section 14-601.
(Ord. No. 235-90, 2-26-90)

Sec. 14-699. Exception for dangerous buildings.

This article shall not apply to any structure which has been ordered demolished by the municipal officers or a court, in accordance with 17 M.R.S.A. Section 2851 et seq., its equivalent, as it may be amended from time to time, or to any structure which has been partially destroyed and is determined by the department to represent an immediate hazard to the public health or safety, which hazard cannot be abated by reasonable measures specified by the department, including without limitation securing apertures and/or erecting fencing.
(Ord. No. 235-90, 2-26-90)

Sec. 14-700. Severability; effective date.

The provisions of section 1-14 shall apply to this chapter.

The provisions of this article shall be effective August 1,

1990.
(Ord. No. 235-90, 2-26-90)

DIVISION 12. LANDMARKS

Sec. 14-701. Structures designated as landmarks.

In addition to those structures designated as landmarks pursuant to section 14-631, the structures which are depicted as landmark buildings on the Map of Historic Districts with landmarks and historic landscape districts as adopted by the council and as amended from time to time shall be so designated.
(Ord. No. 42-91, 9-4-91; Ord. No. 165-08/09, 3-16-09)

Sec. 14-702. Historic landscape districts.

In addition to those areas designated as historic landscape districts pursuant to section 14-631, the areas which are depicted as historic landscape districts on the Map of Historic Districts with landmarks and historic landscape districts as adopted by the council and as amended from time to time shall be so designated.
(Ord. No. 61-93, 8-2-93; Ord. No. 165-08/09, 3-16-09)

Sec. 14-703. Historic districts.

In addition to those areas designated as historic districts pursuant to section 14-631, the following areas are depicted as historic districts on the Map of Historic Districts with landmarks and historic landscape districts as adopted by the council and as amended from time to time shall be so designated.
(Ord. No. 59-93, 8-2-93; Ord. No. 165-08/09, 3-16-09)

Sec. 14-704. Historic landmark sites.

In addition to those areas designated as historic landmark sites pursuant to section 14-631, the areas which are depicted as historic landmark sites on the Map of Historic Districts with landmarks and historic landscape districts as adopted by the council and as amended from time to time shall be so designated.

ARTICLE X. ALTERNATIVE ENERGY.

Sec. 14-751. Purpose.

The intent of this article is to allow the reasonable use of locally generated alternative sources of energy supply that help reduce greenhouse gas emissions consistent with the Sustainable Portland Report which was adopted on June 7, 2010. Alternative energy systems include but are not limited to wind, solar and geothermal energy generation.
(Ord. No. 33-11/12, 1-18-12)

Sec. 14-752. Reserved.

DIVISION 1. WIND ENERGY GENERATION.

Sec. 14-753. Purpose.

The purpose of this division is to allow for the construction and operation of public or private wind energy generation systems to produce energy for use on site or off site, by establishing appropriate locations and standards to ensure safe, effective and efficient use of wind energy systems compatible with surrounding uses.
(Ord. No. 33-11/12, 1-18-12)

Sec. 14-754. Applicability.

(a) No wind energy system, expansion of any existing wind energy system, or installation of any associated facilities, shall be installed unless it has been approved under this ordinance and has obtained a building permit and any other necessary state or local approvals prior to its installation. Wind energy generation systems determined to be permitted uses shall be reviewed and approved by the Zoning Administrator; wind energy systems determined to be conditional uses shall be reviewed and approved by the Zoning Board of Appeals (ZBA).

(b) Any physical modification to an existing and permitted wind energy system which alters the total rated capacity, the size or type of the system or its associated equipment shall require approval under this ordinance. Like-kind replacements or non-structural maintenance and repair shall not require approval under this ordinance but shall require a building permit.
(Ord. No. 33-11/12, 1-18-12)

Sec. 14-755. Definitions.

For the purposes of this division, the following words and phrases shall have the following meanings:

Abandonment: The date at which a wind energy system has been out

of service for a continuous period of 6 months.

DEP certification: Certification issued by the Maine Department of Environmental Protection (Maine DEP) pursuant to Title 35-A M.R.S.A. § 3456 for a wind energy development.

Horizontal wind energy system: A wind energy system that utilizes a generator shaft that is parallel to the ground and usually mounted on a tower.

Lattice tower: A tower constructed of vertical metal struts and cross braces forming a square or triangular structure in horizontal cross-section, which may or may not be supported by external guy wires and anchors.

Monitoring and maintenance plan: For permitted systems this would constitute the owner's manual requirements. For systems that may be allowed as a conditional use, this would constitute a more detailed and customized document.

Monopole tower: A tower constructed of a single, self-supporting metal tube, anchored to the foundation without guy wires.

Public industrial or utility facility: A facility operated by the City of Portland or Portland Water District that contains a major industrial or utility operation, such as a treatment plant, solid waste facility, materials storage yard or similar operation.

Residential building: A residence, nursing home/assisted living facility, or other building that is in use as an overnight residence but excluding hotels.

Total height of wind energy system: The vertical distance as measured from the average elevation of the finished grade adjacent to the fixed base of the support structure, to the tip of the wind generator blade or any other part of the system at its highest point. Where located on roof tops, the height shall be the total of the building and the wind energy system taken together.

Total rated capacity: The maximum rated output of electric power generation by the system in kilowatts (kW) ad identified by the manufacturer.

Useful life of the wind energy system: The period for which the system has been designed by the manufacturer to operate in a safe manner, including the period during which new parts and refurbishment

allow it to continue operating safely.

Vertical wind energy system: A wind energy system that utilizes a generator shaft that is positioned perpendicular to the ground.

Wind energy system: A wind energy generator and all associated facilities.

Wind energy system associated facilities: All elements of a wind energy system, other than its generating facilities, that are necessary for the proper operation and maintenance of the system, including but not limited to guy wires, remote electronic enclosures and fixtures, transformers, inverter, batteries, substations and similar equipment.

Wind energy generator: The device that converts kinetic wind energy into rotational energy that generates electricity, which may include components such as a base, blade, nacelle, rotor, tower, turbine, or vane.
(Ord. No. 33-11/12, 1-18-12)

Sec. 14-756. Reserved.

Sec. 14-757. Permitted uses.

(a) Freestanding wind energy systems that are accessory to the lawful principal use of the lot, primarily for the generation of energy for on-site consumption, and at or below 25 feet in total height, may be allowed as permitted uses in all residential, B1, I-B and residence-professional zones subject to the standards listed below in Section 14-761 (General Standards), 14-763 (Maintenance and Removal), and 14-765 (Submittal Requirements).

(b) Freestanding wind energy systems that are accessory to the lawful principal use of the lot, primarily for the generation of energy for on-site consumption, and meet the applicable height standards of the zone in which they are located and are no higher than 45 feet, may be allowed as permitted uses in all business zones except B1 and I-B, and in the office park, industrial zones, airport business zone, subject to the standards listed below in section 14-761 (General Standards), 14-763 (Maintenance and Removal), and 14-765 (Submittal Requirements).

(c) Roof mounted wind energy systems that are accessory to the lawful principal use of the lot, primarily for the generation of energy for on-site consumption, meet the applicable height standards of the zone in which they are located and are less than 10 feet above the highest part of the roof, may be allowed as permitted uses

in all zones except stream protection zone and recreation open space zone, subject to the standards listed below in section 14-761 (General Standards), 14-763 (Maintenance and Removal), and 14-765 (Submittal Requirements).
(Ord. No.33-11/12, 1-18-12)

Sec. 14-758. Conditional uses.

(a) Wind energy systems that do not meet the requirements for a permitted system may be allowed as conditional uses in all zones (including overlay zones but excluding stream protection and resource protection zones), subject to the provisions of section 14-430 (height and bulk exceptions/use exceptions); section 14-474 (conditional uses); and to the requirements and performance standards listed below in section 14-761(general standards), 14-763 (maintenance and removal), and 14-765 (submittal requirements). For the purposes of this provision, wind energy may be an accessory use in all zones or a principal use in all zones except residential zones, B1 zone, I-B zone, residence-professional zone and resource protection zone.

(b) Wind energy systems within recreation open space zones (including the island transfer station overlay zone) are allowed as a conditional use where they are co-located with public industrial or utility facilities as defined in section 14-755.
(Ord. No. 33-11/12, 1-18-12)

Sec. 14-759. Prohibited uses.

(a) Wind energy systems of any kind are prohibited in the stream protection and historic landscape districts [excepting the sewage treatment plan corner of Eastern Prom] and historic cemeteries.

(b) Wind energy systems are prohibited where they exceed the height limitations set out in Table 1 (below) and described in provision 14-761(c)(3).

Table 1: Summary Table of Permitting

Type and scale of wind energy system	***Stream Protection, Historic Landscape Districts & Historic Cemeteries***	***Resource Protection Zone***	***All Residential Zones, and Residential Professional Zone; B1 Zone; I-B Zone***	***Historic Districts*, and within 1000 ft of specified landmarks (see**)***	***Water-front Zones and B6***	***Business Zones B2 & B5 Indus-trial Zones I-L, I-Lb and I-Ma***	***Business Zones B3 and B7***	***B4 Zone, Office -Park Zone***	***Recreation Open Space (ROS) Zone where Co-located with public industrial or utility facilities as per 14-758(b)***	***Industrial Zones I-M, I-Mb, I-H; Airport Bus. (w/FAA approval)***
Roof mounted, accessory, <10 ft above roof) & below permitted height of zone	X	P	P	P	P	P	P	P	C	P
Freestanding; accessory; up to 25 ft	X	X	P	P	P	P	P	P	C	P
Freestanding or roof mounted: accessory; at or below permitted height of zone AND no higher than 45 ft	X	X	X if<.5 acre except C if .5 acre or larger	P	P	P	P	P	C	P
Freestanding or roof mounted; at or above permitted height of zone AND no higher than 45 ft	X	X	X Except C only where accessory & on institutional sites over 5 acres	C	C	C	C	C	C	C
Roof mounted or free-standing; at or below permitted height for that zone AND no higher than 65 ft	X	X	X Except C only in USM Overlay Area & for college, university or trade schools in the R5 zone	X Except C in B3 part Congress St. Historic District	C	C	C	C	C	C
Roof mounted or free-standing; above permitted height for that zone AND no higher than 65 ft	X	X	X	X Except C in B3 part Congress St. Historic District	C	C	C	C	C	C
Roof mounted; at or below permitted height for that zone AND no higher than 85 ft	X	X	X	X Except C in B3 part Congress St. Historic District	X	X	C	C	C	C
Freestanding;at or below permitted height for that zone AND no higher than 85ft	X	X	X	X Except C in B3 part Congress St. Historic District	X	X	X	C	C	C
Freestanding; above permitted height for that zone AND no higher than 85 ft	X	X	X	X	X	X	X	X	C	C
Roof mounted or freestanding; above 85 ft and no higher than 160 ft	X	X	X	X	X	X	X	X	C with increased setbacks (see 14-761(d)(6))	C with increased setbacks (see 14-761(d)(6))+

P= Permitted Use; needs Zoning Administrator approval plus building permit; if within 100 feet of a designated landmark, historic district or historic landscape district, also needs planning authority (HP) approval;

C=Conditional Use; needs ZBA approval plus building permit; if within 100 feet of a designated landmark, historic district or historic landscape district, also needs planning authority (HP) approval;
X=Prohibited

*Historic districts only (wind systems are prohibited in historic landscape districts and historic cemeteries); in historic districts if the maximum allowed height in this section is different from the allowable height associated with the underlying zone, the lower of the two height limits would apply regarding wind energy systems. Within the B3 part of the Congress Street Historic District, the height limits in this ordinance for the B3 zone shall apply.
**Specified landmarks are: Portland Observatory; Cathedral of Immaculate Conception; St Dominic's Cathedral; St Luke's Cathedral; State Street Church; and City Hall

Sec. 14-760. Reserved.

Sec. 14-761. General standards.

(a) *General*

1. *Application requirements:* All applications for approval under this ordinance shall address the submittal requirements set out in section 14-765 submittal requirements.

2. *Approvals:* All applicable state and local approvals shall be obtained prior to installation of any wind energy system, including FAA approval and MDEP certification for all systems 100kW and above in total rated capacity.

3. *Conditions:* The zoning administrator or zoning board of appeals (ZBA) may impose conditions to ensure compliance with the standards and purposes set out in this ordinance, including but not limited to post-construction certification of compliance by a licensed professional engineer or authorized factory representative.

(b) *Historic Resource*

1. Where any part of the proposed wind energy system (including associated facilities) is within an historic district, such development shall be reviewed and approved by the planning authority (historic preservation) in accordance with article IX historic preservation prior to a review under this ordinance by the zoning board of appeals.

2. Where any part of the proposed wind energy system (including tower base and associated facilities) is within one hundred (100) feet of any designated

landmark, historic district or historic landscape district, such development shall be determined by the planning authority (historic preservation)to be generally compatible with the major character-defining elements of the landmark or portion of the district in the immediate vicinity of the proposed system; such determination shall be made prior to a review under this ordinance by the zoning board of appeals. Character-defining elements of landmarks and historic districts are identified in the historic resources inventory and respective historic district designation reports. An appeal of the planning authority (historic preservation) determination may be made in accordance with section 14-767 (appeals).

(c) *Siting*

1. ***Location on site:*** In residential zones, B1 zone, I-b zone and residence-professional zone where the lot is less than .5 acre, any vertical element of the wind energy system (tower/pole) shall be located in the rear yard or on the rear half of the existing building. Wind energy systems and associated facilities shall be sited to maximize existing vegetative or other screening from nearby residential buildings and public ways. The location shall minimize changes to existing topography and existing natural vegetation which would result from construction or maintenance of the system.

2. ***Number per lot***: In residential zones, I-B zone and residence-professional zone and all business zones excluding B3, B4 and B7, a maximum of one (1) wind energy system shall be permitted per lot.

3. ***Overall height:*** The total height (including the supporting structure or building and the rotors or blades of the generator) of the wind energy system when operating shall be at or below the following maximum height limits.

   These limits do not apply within historic districts (except the Congress Street historic district)or

within 1000 feet of Portland Observatory; Cathedral of the Immaculate Conception; St Dominic's Cathedral; St Luke's Cathedral; State Street Church; and City Hall where the overall height of wind energy systems may be no higher than 45 feet. Within the Congress Street historic district, the overall height of wind energy systems may be no higher than 45 feet in those areas outside of the B3 zone and within the B3 zone the height limits below shall apply.

In addition, the actual height of any roof mounted wind energy system, as measured above the roof from the point of attachment, where allowed as a conditional use shall not exceed 35% of the height of the building on which it is mounted.

a. *Maximum of 45 feet*:

i. Roof mounted in R-6 zone if 10 feet or less above highest part of the roof and permitted by that zone.

ii. Residential zones, B1 zone, I-B zone and residence-professional zone if lot is .5 acre or larger and height permitted by that zone.

iii. Institutional uses in residential zones, B1 zone, I-B zone and residence-professional zone where lot is over 5 acres.

iv. Resource protection zone (roof mounted and up to height permitted by zone).

b. *Maximum of 55 feet:* College, university or trade school in R5 zone where conditional use requirements of the zone are met (14-118(b)(6)(g)).

c. *Maximum of 65 feet:*

i. Waterfront zones.

ii. Business zones B2, B5 and B6.

iii. Industrial zones I-L, IL-b and I-Ma

iv. Freestanding in business zones B3 and B7.

v. USM overlay zone if allowed by overlay heights.

d. *Maximum of 85 feet:*

i. Roof mounted in B3 and B7 if height permitted by overlay heights.

ii. Business zone B4 if height permitted by that zone.

iii. Office-park zone up to 75 feet where requirements of the zone are met (14-230.14(e)).

e. *Maximum of 160 feet (Increased setbacks if over 85 feet):*

i. Industrial zones I-M and IMb and I-H.

ii. Airport business zone.

iii. Recreation open space zones where allowed by 14-758(b).

(d) *Safety*

1. ***Generation equipment:*** All wind energy generation equipment shall be approved under a certification program certified by the US Department of Energy such as the Underwriters Laboratories, Germanishcer Lloyd Wind Energies, or other similar certifying organizations. Experimental, homebuilt, and prototype models shall not be permitted.

2. ***Design safety:*** Wind energy systems and associated facilities, including foundations and support structures, electrical connections and control equipment, associated site improvements and

construction techniques, shall be designed, engineered and installed to comply with all applicable local, state and federal construction and electrical codes/regulations and Federal Aviation Administration regulations and requirements.

3. ***Setbacks:*** Wind energy systems and associated facilities shall meet all setbacks for principal structures for the zone in which the wind energy system is located; where setbacks vary the largest setback shall apply. All parts of the wind energy system, including associated facilities and guy wires, shall be at least 10 feet from the property line (except where connecting to the grid), any utility line (in any direction) or other easement/ROW. The setback from utility lines, easements and ROW lines may be reduced where the owner/benefitted party provides written permission.

4. ***Safety setbacks (roof mounted systems):*** All roof mounted wind energy systems shall be set back from property boundaries and street right of way lines by a distance equal to or greater than 4 times the height of the system as measured from the roof surface at the point of attachment (including attachment structure to roof). For systems in and adjacent to waterfront zones, business zones (except B-1 and I-B), office park zone, industrial zones, island transfer station zone, and ROS zone, the setback from property boundaries and street right of way lines may be reduced to a minimum distance of 1.0 times the height of the system as measured from the roof surface at the point of attachment (including attachment structure to roof) where the system is incorporated into the architecture of the building and a certified engineer confirms that it would not present any public safety risk. The setback distance shall be measured to the center of the wind generator base.

5. ***Safety setbacks (freestanding systems no higher than 85 feet high):*** All freestanding wind energy systems with a total height of 85 feet or less shall be set back from property boundaries and

street right of way lines by a distance equal to or greater than 1.1 times the total height of the system, and from residential buildings and hospitals on other properties by a distance equal to or greater than 2 times the total height of the system. The setback distance shall be measured to the center of the wind generator base.

6. ***Safety setbacks (freestanding systems above 85 feet high):*** All freestanding wind energy systems with a total height above 85 feet shall be set back from property boundaries and street right of way lines by a distance equal to or greater than 2 times the total height of the system, and from residential buildings and hospitals on other properties by a distance equal to or greater than 4 times the total height of the system. For systems in and adjacent to waterfront zones, business zones (except B-1 and I-B), office park zone, industrial zones, island transfer station zone, and ROS zone, the setback from property boundaries and street right of way lines may be reduced to a minimum distance of 1.0 times the total height of the system where the Board determines it will be contrary to the public interest. The setback distance shall be measured to the center of the wind generator base.

7. ***Control of systems:*** Wind energy generators shall have automatic braking, governing or feathering systems to ensure rotational speeds remain within the design parameters of the proposed generator and its support structure and components and do not create intermittent high noise levels.

8. ***Security:*** The support structure (e.g. tower, pole) for freestanding wind generating systems shall not be climbable (no step bolts, ladder, or unshielded lattice structure readily accessible to the public) for a minimum height of twelve (12) feet above the surrounding ground level or accessible surface. All ground mounted electrical and control equipment shall be labeled and secured to prevent unauthorized access.

9. ***Clearances:*** All moving components of a wind energy

system shall be a minimum of twelve (12) feet from ground level or accessible surface.

10. ***Wiring:*** All on-site electrical wiring associated with the proposed wind energy system shall be located within the tower/pole/supporting structure and underground; above ground on-site connections near substations or to the electric grid shall be allowed.

11. ***Guy wires:*** The use of guy wires is discouraged; if required they shall be located away from pedestrian routes/access points and marked with visible, reflective, colored objects, such as flags, reflectors, or tape which shall be placed on the anchor points of guy wires and along the guy wires up to a height of ten feet from the ground.

(e) ***Impacts***

1. ***Sound impacts:*** The audible sound levels generated by the wind energy system* shall comply with the requirements of the underlying zone, except that the method of measurement shall be in accordance with this provision and with technical standards set out in the City of Portland Technical Manual. In addition:

   a. Where the underlying zone is residential and does not specify sound requirements, or where the system will be within 100 feet of a residential building, the audible sound levels generated by the wind energy system* shall not exceed forty-five (45) decibels on the A scale between the hours of 9:00 p.m. and 7:00 a.m., and fifty (50) decibels on the A scale between 7:00 a.m. and 9:00 p.m., as measured at the nearest property line in accordance with this provision and technical standards set out in the City of Portland Technical Manual.

   b. For any system over 45 feet in total height not in the recreation open space, resource protection or island transfer station zones, the maximum sound levels allowed by this

ordinance shall not be exceeded at the nearest property boundary and at the nearest point vertically above the property line that coincides with the maximum building height allowed in the abutting zone.

c. Any system located within the recreation open space, resource protection or island transfer station zones and more than 100 feet from a residential building shall not exceed fifty-five 955) decibels on the A scale as measured 50 feet from the base of the tower.

*The audible sound levels of the wind energy system shall include sounds generated in all conditions including low and high winds (furling, yawing, and flutter) and power outages (free wheeling).

If after installation the system is determined to be operating at levels above these limits (as measured at the property lines in accordance with this provision and technical standards set out in the City of Portland Technical Manual) the owner shall take (at the owners cost) remedial action to ensure compliance with these limits. Required action may include relocation nor removal of the system.

2. ***Significant wildlife:*** The proposed wind energy system shall not be located within 250 feet of any significant wildlife habitat, as defined by MDEP/MDIFW under provisions of the Natural Resources Protection Act (Title 38, M.R.S.A. § 480, et seq.) including wildlife habitat for species appearing on the official state and federal list of endangered or threatened animal species.

3. ***MDIFW comments:*** For all wind energy systems over 45 feet in height above the ground (however supported) or over 100kW the applicant shall provide evidence that the environmental coordinator of the Maine Department of Inland Fisheries and Wildlife, and the Maine Natural Area Program, have been notified of the location, height and design of the proposed wind energy system at least 3 weeks

prior to any final determination under this provision. Any comments received therefrom shall be addressed to the satisfaction of these state authorities prior to any final determination under this provision.

4. ***Signal interference:*** Wind energy systems shall be designed to avoid electromagnetic interference with the transmission or reception of radio, telephone, television, microwave, navigational or similar signals to neighboring areas.

5. ***Appearance:*** The wind energy system and associated facilities shall use non-reflective materials and neutral colors and textures that blend in with the surrounding environment. Ground-mounted systems and associated facilities shall be landscaped to integrate the proposed wind energy system into the existing landscape/streetscape. In the case of conditional uses the system shall be screened with a vegetated buffer from public areas and residential buildings.

6. ***Lighting:*** No part of the system may be illuminated, except as required (in writing) by the Federal Aviation Administration (FAA) or other authorities for safety and security purposes. Where lighting is required, it shall be at the lowest intensity allowable with fixtures shielded and directed to minimize glare and visibility from the ground.

7. ***Signs and advertising:*** There shall be no signs, advertisements, flags or decorative items on a wind energy system or any associated facilities, except for the manufacturer's/installer's/owner's identification (not exceeding 1 sq foot in size), appropriate warning signs, or lights if required by the FAA.

8. ***Impact of construction:*** The applicant shall avoid adverse impacts resulting from construction and maintenance of the wind energy system and obtain site plan approval (Article V, Site Plan) where applicable.

Sec. 14-762. Reserved.

Sec. 14-763. Maintenance and removal.

(a) A satisfactory monitoring and maintenance plan shall be required to ensure that all aspects of operation remain safe and in accordance with the approved design, engineering and installation details. All buildings, structures, fences, and property used in connection with a wind energy system shall be regularly inspected and maintained, through the life of the system, so that they remain: in good condition; in compliance with the standards set out in this ordinance (e.g., meeting sound limits); in safe working order; and so that paint and other external materials remain as approved and free from corrosion.

(b) The owner and operator shall, at their expense, complete the removal of the wind energy system within 6 months of the end of the useful life of the wind energy system or within 6 months of the date of abandonment.

(c) The City shall revoke any approvals and/or pursue removal of the wind energy system at the owner and operator's expense in the following circumstances:

1. The wind energy system is not installed and functioning within 12-months from the date of the approval under this ordinance; or

2. The wind energy system is at any time left in an unsafe condition in respect to federal, state and local safety standards (as determined by the City); or

3. The wind energy system has not been brought back to a safe condition/operation or removed from the site within required timeframe; or

4. The wind energy system is defective or abandoned and not been removed from the site within required timeframe.

(Ord. No. 33-11/12, 1-18-12)

Sec. 14-764. Reserved.

Sec. 14-765. Submittal requirements.

(a) The following information shall be submitted with an application for a review of a wind energy system and associated facilities under this ordinance.

1. A narrative describing the proposed wind energy system, including an overview of the project; the project location; the generating capacity of the wind energy system; dimensions and respective manufacturers, the sound levels generated by the wind energy system; and a description of associated facilities and how the system and associated facilities comply with the standards of this ordinance (including a plan or other graphics that demonstrate compliance with the required setbacks). Calculations of sound attenuation and anticipated sound levels shall be in accordance with technical standards set out in the City of Portland Technical Manual.

2. An accurate scaled site plan of the subject property showing the planned location of the proposed wind energy system and all associated facilities; property lines, adjoining streets and access; topographic contour lines; existing and proposed buildings, fencing, structures, substations, vegetation, driveways, parking, and curb cuts on the subject property; and specifications for all proposed electrical cabling/transmission lines, accessory equipment, and landscaping. The site plan shall show any proposed off-site modifications to access the installation and/or to maintain the proposed wind energy system. [Note: separate site plan applications may be required for some or all of the associated modifications; see Article V Site Plan]

3. A boundary survey where the location and dimensions of the wind energy system are determined to be uncertain by the Zoning Administrator.

4. Names and addresses of the owners of abutting properties and the location, dimensions, and types of all existing structures and uses within 100 feet of the property line.

5. A scaled elevation drawing showing the proposed wind energy system and all proposed structures, foundations, supports, fencing, vegetation and landscaping, indicating the height, color and materials of the system.

6. The wind energy system specifications, including manufacturer, model, dimensions of all components, height, tower/support type, total rated capacity and information on any connections to the grid including a copy of the application for interconnection with the electric utility provider where to be connected to the grid.

7. Documentation that the wind generation equipment has been approved under a recognized certification program as set out in paragraph 14-761(d)1 of this ordinance and that the system complies with all applicable local, state and federal codes/regulations and with the standards regarding signal interference. Electrical component and connection information shall be in sufficient detail to allow for a determination that it meets Maine electrical codes.

8. Engineered drawings of the structure, its foundations and associated facilities (stamped by a PE). In the case of conditional uses, the applicant shall provide a Safety Report prepared and stamped by a licensed professional engineer with their application that certifies that the proposed wind energy system design is safe and appropriate in terms of strength, stability, security, grounding, icing impacts, and maintenance, given local soil and climate conditions.

9. Evidence of compliance or non-applicability with FAA requirements, MDEP Certification pursuant to 35-A M.R.S.A. § 3456 for wind energy development (applies to systems over 100kW) and other federal and state regulations regarding potential impacts on wetlands, wildlife and other resources.

10. For any wind energy system that will exceed the height limit for buildings on the subject property, the following shall be submitted:

a. A scaled vicinity map showing the subject property and the proposed wind energy system and fencing in the context of all property located within a distance from the wind energy system equal to three (3) times the height of the wind energy system (in the case of a system 85 feet or higher, ten (10) times the height), showing within this area: all streets and existing buildings; significant structures: uses of any buildings; and topographic contours at five foot intervals.

b. Color photographs showing the current view of the wind energy system site from any adjoining public street or any other street within 200 feet of the proposed wind energy system and from the closest groupings of residential buildings located within an area from the proposed wind energy system equal to three (3) times the height of the proposed structure (ten (10) times the height for systems 85 feet), plus a second set of color photographs showing the same views with the proposed wind energy system superimposed onto the photographs.

11. Where lighting of the wind energy system is proposed (due to FAA requirements), a lighting plan for the proposed win energy system, indicating the location, color and intensity of the lighting, both as it will appear in daylight and at night, and indicating any mechanisms to prevent glare on adjacent properties and streets and to shield the lighting from residences.

12. Where the wind energy system manufacturer's sound level analysis does not clearly meet the sound standard of this ordinance, a statement by a professional engineer licensed in the State of Maine certifying that the proposed wind energy system will meet the sound standard of this ordinance. The technical standards set out in the City of Portland Technical Manual outline further information which may apply in this case.

13. A monitoring and maintenance plan in accordance with

section 14-763(a).

14. The following information shall be submitted with an application for a wind energy system proposed to be attached to the roof of a building or onto another structure:

a. Elevation drawings and details of the building or structure to which the proposed wind energy system will be attached, showing the placement of the wind system and its supports, indicating the location of any enclosures in relation to the surface to which it will be attached, and showing projection of the wind generator from the structure, marked with all necessary dimensions.

b. Design and engineering information for roof-mounted systems shall demonstrate that the structure on which it will be mounted has the structural integrity to carry the weight and wind loads of the system with minimal vibration impacts on the structure.

(Ord. No. 33-11/12, 1-18-12)

Sec. 14-766. Reserved.

Sec. 14-767. Appeals.

(a) Any aggrieved party may appeal a decision by the zoning administrator under the provisions of this ordinance by requesting in writing that it be referred to the zoning board of appeals within thirty (30) days of the decision being rendered. The date of the decision shall be the date of the letter from the zoning administrator documenting the decision.

(b) Any aggrieved party may appeal a decision of the planning authority determination under provision 14-761(b)(2) of this ordinance (compatibility if within 100 feet of a designated landmark, historic district or historic landscape district)by requesting in writing that it be referred to the historic preservation board within thirty (30) days of the determination. The date of the determination shall be the date of the letter from the planning authority documenting the decision. Appeals shall be considered by the historic preservation board as a de-novo review of the determination of compatibility.

(c) Any aggrieved party may appeal the final decision of the zoning board of appeals or the historic preservation board to the superior court in accordance with Rule 80B of the Maine Rules of Civil Procedure. The date of the final decision shall be the date of the board hearing or other board meeting at which a final decision was taken.

ARTICLE XI. PUBLIC ART PROGRAM

------ *__Editor's note—__Ord. No. 174-00, passed 4-24-00, repealed §§14-851-14-860 of this article and enacted new provisions as herein set out. ------

Sec. 14-850. Preamble.

It shall henceforth be the policy of the City to provide on an annual basis regular funding for the preservation, restoration and enhancement of its public art collection. This ordinance and the funding contemplated are in recognition of the fact that only by instituting a steady stream of funding for this effort and standing by that commitment, will the City over time be able to fulfill its role as steward of its public art collection and help nurture and enrich thereby the quality of life in this City.
(Ord. No. 174-00, 4-24-00)

Sec. 14-851. Purpose.

The purpose of the public art ordinance is to promote the educational, cultural, economic and general welfare of the City of Portland by providing the means to fund the acquisition and care of art works by the City of Portland, which shall be the city's public art collection. The public art program seeks to:

(a) Care for and maintain the public art collection of the City of Portland by documenting, preserving and restoring and repairing the collection;

(b) Commission or acquire works of public art, and to seek donations of art work for the city's public art collection;

(c) Provide curatorial expertise and project management for the care of Portland's public art collection;

(d) Enhance and enrich the lives of the city's residents, visitors and employees by incorporating the visual arts into public spaces;

(e) Contribute to the city's civic pride and sense of identity;

(f) Increase access to works of art for residents and visitors to the area;

(g) Enhance Portland's growing reputation as a city which celebrates the arts;

(h) Celebrate the multi-cultural and diverse character of Portland's communities with place specific art; and

(i) Encourage collaboration between artists, landscape architects, urban planners, architects, engineers and other designers.

(Ord. No. 246-91, 3-11-91; Ord. No. 174-00, 4-24-00; Ord. No. 140-08/09, 1-21-09)

Sec. 14-852. Definitions.

(a) For the purposes of this section, ***art work*** shall include:

1. Sculpture, statues or monuments in any material or combination of materials;

2. Painting;

3. Graphic arts, printmaking and drawing;

4. Photography;

5. Crafts in clay, fiber and textiles, wood, metal, plastics, glass and other materials; and

6. Mixed media, any combination of forms or media, including collage.

(7) Functional art such as street furniture, as defined on page two of the Portland public art committee guidelines.

(8) Environmental art consisting of landforms and artistic landscape composition.

(b) For the purposes of this ordinance ***public art*** shall not include:

1. Reproductions by mechanical or other means of original works of art, except for limited editions, controlled by the artist, of original prints, cast sculptures,

photographs or other works of art.

2. Decorative, ornamental, or functional elements which are designed by the building architect or consultants engaged by the architect which are a traditional and typical element of architectural design.

3. Those elements generally considered to be conventional components of a landscape architectural design including, but not limited to, plant materials, pools, paths, benches, receptacles, fixtures and planters except as allowed in subsection (a), paragraphs 7 and 8 above.

4. "Art objects" which are mass produced or of a standard design, such as playground sculpture or fountains, except pieces of historical significance to the city.

5. Directional or other functional elements, such as supergraphics, signage, color coding and maps, except where sculptural pieces are used to define gateways in the city.

6. Electrical, water or mechanical service for activation of the work.

7. Exhibitions and educational programs related to the work.

8. Performing Arts.

9. Art that displays slogans, logos, mascots or commercial advertising.

(c) ***Public art collection***: Art objects that are owned by the City of Portland which are permanently installed in public, accessible locations. Permanent public art must be located in a public place with public visibility and impact, and shall have a permanence at least comparable to associated capital projects.

(d) ***Public art guidelines***: The regulations adopted by the committee and approved by the city council which establish procedures to carry out the purpose of this ordinance. The guidelines shall include but not be limited to criteria for selection of artists and art works, maintenance of a file of interested artists, procedures for artistic competitions, and

requirements for the maintenance of works of art.
(Ord. No. 246-91, 3-11-91; Ord. No. 174-00, 4-24-00; Ord. No. 140-08/09, 1-21-09)

Sec. 14-853. Funding.

(a) Establishment of Public Art Fund

1. The city shall establish a special revenue fund designated as the "public art fund" in the city treasury from which expenditures may be made in accordance with this ordinance. The public art fund shall contain a capital account to fund permanent public improvements in the form of the purchase, acquisition or commission of new public art, or major restorations, and an operations and maintenance account. Authorized expenditures include, but are not limited to, associated site installation costs such as lighting and landscaping, and costs associated with the commission engineering, contract administration, unveiling and dedication activities. Also authorized are expenditures associated with preservation, conservation and repair of existing public art. Capital funds may come from any source, including the sale of general obligation bonds. The city’s capital improvement program shall contain an annual appropriation for the public art fund calculated in accordance with paragraph (b) below. Funds for the operation and maintenance account may come from any source except bonds.

(b) City Funded Projects.

1. A percentage of the city's capital improvement program (CIP) shall be calculated and appropriated annually to the Portland public art fund. The annual appropriation shall be .5% of the total annual CIP.

2. Nothing contained herein shall preclude funding the acquisition of art for municipal property in other ways.

(Ord. No. 246-91, 3-11-91; Ord. No. 174-00, 4-24-00; Ord. No. 140-08/09, 1-21-09)

Sec. 14-854. Administration.

(a) The city public art program shall be administered by the public art committee whose members shall be appointed by the city council, and shall have the following responsibilities:

1. Develop an annual art plan for Portland which shall be presented to the city council for approval.

2. Establish such guidelines as are necessary to carry out the purpose of the ordinance. The guidelines shall include but not be limited to criteria for selection of artists and art work, maintenance of a file of interested artists, review criteria for proposed gifts of art work to the city, procedures for artistic competitions, and requirements for the maintenance of art work. Any and all guidelines or changes to guidelines shall be placed on a city council agenda as a communication. The guideline shall take effect forty-five (45) days after the date of placement on the council agenda, unless the city council takes official action disapproving the guidelines, in whole or in part, prior to the expiration of the 45-day period. If a part of a guideline is vetoed, the remainder shall continue in effect. Any guideline adopted, which is not required by the statutes of the state or by this article, may be waived by the chair upon good cause being shown.

3. Recommend to the city council the expenditure of funds for the acquisition or commissioning of public art, for maintenance of public art and for administration of this program.

4. Seek private donations of funds and/or works of art for the purposes of expanding the public art collection, or the maintenance of the collection.

5. Oversee the maintenance, care and repair of the public art collection.

6. Review the appropriateness of proposed public art which is intended to fulfill all or part of the contribution required by this article.

7. Review potential gifts of art to the city on city property, and assist in the development process of such gifts, in accordance with the ***Guidelines for the City of Portland Public Art Committee.***

8. Recommend appropriate locations and accessibility to the

public for permanent art, with suggestion as to the type of art which is appropriate.

9. Solicit advice from arts professionals, the business community, and from local residents on the appropriateness of proposed art.

10. Recommend revisions to policies and guidelines for the improved implementation of this program.

11. Develop an annual art plan for Portland.

12. Ensure that the use of funds collected under this program will increase the amount of art in the city that is available to the public.

(b) Public art committee - structure.

1. The public art committee shall be composed of eleven voting members who are appointed by the city council. The city council shall appoint one of its members, the city manager shall recommend a member, and the Portland arts and cultural alliance shall recommend one of its members to serve on the public art committee. The city council shall appoint the remaining six members who shall be volunteers and have interest and/or expertise in public art. Such experience may include, but shall not be limited to, education and experience as an architect, a landscape architect, a professional curator, a professional artist and/or an art educator. Persons appointed to the public art committee must live or work in Portland and shall be appointed through the city's annual appointment process.

2. Each public art committee member shall serve for a period of three years. The appointments shall be staggered so that three appointments terminate each year.

3. Whenever a vacancy shall occur, the vacancy shall be filled by the city council.

4. The public art committee shall adopt its own rules for the conduct of its business not inconsistent with the statutes of the state and this article. Any and all rules or changes to rules shall be placed on a city

council agenda as a communication. The rule or rules shall take effect forty-five (45) days after the date of placement on the council agenda, unless the city council takes official action disapproving the rules, in whole or in part, prior to the expiration of the 45-day period

5. The members of the public art committee shall annually elect one (1) of their members as a chair to preside at all meetings and hearings and to fulfill the customary functions of that office, and another of their members as vice-chair.

(Ord. No. 246-91, 3-11-91; Ord. No. 174-00, 4-24-00; Ord. No. 14-08/09, 1-21-09)

ARTICLE XII. RELOCATION OF DISPLACED TENANTS

Sec. 14-861. Purpose.

The purpose of this article is to encourage the retention of a diverse housing supply throughout the downtown and in areas readily accessible to the downtown; to ensure that persons displaced as the result of redevelopment of residential units to nonresidential uses within the B-3 downtown business zone are treated fairly and consistently; and to ensure that persons so displaced will be relocated at the reasonable expense of the developer to comparable housing at a location providing comparable access to services and amenities.

(Ord. No. 246-91, 3-11-91)

Sec. 14-862. Notice and eligibility for relocation assistance.

When a proposed development will result in the displacement of residents of an existing structure, the developer of the property shall give all tenants written notice as set forth below and shall provide relocation assistance as set forth below for any tenant whose gross income is eighty (80) percent or less of the median income of the Portland SMSA, adjusted for family size, as

determined by the U.S. Department of Housing and Urban Development at the time the developer gives the tenant written notice of intent to cause removal of the residential unit. Such written notice shall be given to the tenant at least one hundred twenty (120) days before the tenant shall be required to vacate the premises and shall contain the following statement:

> The developer of this project is required by law to assist you in finding another place to live and in determining your eligibility for relocation payments. If you have questions about your rights under the law, or complaints about the way you have been treated by the developer, you may contact the Department of Planning and Urban Development, City of Portland, 389 Congress Street, Portland, Maine 04101 (telephone 874-8300).

(Ord. No. 246-91, 3-11-91)

Sec. 14-863. Relocation assistance for all tenants.

The developer shall provide, upon demand, assistance to all tenants who will be displaced by the development in the form of referrals to other reasonable accommodations and in determining the tenants' eligibility for relocation payments as provided herein.
(Ord. No. 246-91, 3-11-91)

Sec. 14-864. Relocation payments for eligible tenants.

The developer shall make relocation payments to eligible tenants in accordance with the schedule adopted by the city council.
(Ord. No. 246-91, 3-11-91)

***Editor's Note:** By separate order (Order 126-04/05, 6-6-05)the City Council passed the adoption of relocation payments for qualifying displaced tenants in the B-3 zone as follows:

WHEREAS, the Portland City Code §14-864 (adopted in 1991) requires a developer to provide financial and other assistance to relocate qualifying residential tenants in the B-3 zone, where such tenants are displaced due to the conversion of residential property to nonresidential property; and

WHEREAS, the Portland City Council was charged with adopting a schedule of relocation payments to be utilized in such circumstances; and

WHEREAS, the schedule, if any, adopted at that time cannot be located;

WHEREAS, the Housing Committee recommends the adoption of a payment

schedule equal to two months rent paid by a qualifying tenant.

NOW THEREFORE, it is hereby ordered that the City Council hereby adopts the following schedule pursuant to §14-864 of the Portland City Code:

SCHEDULE OF RELOCATION PAYMENTS FOR ELIGIBLE TENANTS

The developer shall, before the tenant is required by the developer to vacate, make a cash payment to the tenant in an amount equal to the amount of rent paid by the tenant for the immediately preceding two (2) months.

***Editor's note--**Ord. No. 127-98, adopted Oct. 19, 1998, repealed Art. XIII, §§ 14-900, 14-901, relative to moratorium on correctional prerelease facilities, which derived from Ord. No. 26-96, adopted June 17, 1996.

Sec. 14-900. Reserved.

Sec. 14-901. Reserved.

ARTICLE XIV. MORATORIUM ON DEMOLITION OF HOUSING UNITS

***Editor's Note**: Order No. 221-99 adopted February 1, 1999 enacted a moratorium on the demolition of buildings in the area of Bayside. The moratorium was in effect January 1, 1999 through May 1, 1999.

Sec. 14-902. Findings and declaration of emergency.

The city council hereby finds and declares:

(a) The strong economy has increased the demand for housing beyond the supply available in the city and the surrounding area;

(b) The rental vacancy rate in the city has been extremely tight (0 to 2%) for the last 3 years, well below the vacancy rate which is considered healthy for a community, allowing choice and maintaining moderate prices;

(c) The lack of supply has pushed rent levels beyond the level which low and moderate income families and individuals can afford;

(d) Due to high cost of construction and the lack of land, very few new affordable multifamily units are being built in the city;

(e) The lack of supply of affordable housing and high rents hurt the vulnerable populations the most, e.g. those with disabilities, the working poor and the elderly;

(f) Several pending developments in the City contemplate the demolition of residential property or its conversion to nonresidential use;

(g) Housing, because of its scarcity and high costs, is an extremely valuable resource in the City of Portland. Once lost, it is very difficult to replace; and

(h) The City currently has under consideration methods to preserve and expand existing housing as well as proposals to require the replacement of housing which is either demolished or converted to nonresidential use:

Now, therefore, in order to permit the development and implementation of methods which will preserve Portland's existing housing stock as well as to require replacement of dwelling units which are demolished or converted to nonresidential use, it is found and declared that a temporary moratorium is necessary to allow the City to accomplish those goals.
(Ord. No. 26-02/03, 8-5-02)

Sec. 14-903. Moratorium on demolition of housing units.

Notwithstanding any other provisions of this Code, including, but not limited to, the provisions of Chapters 6 and 14, no permit shall be issued or granted and no new applications shall be accepted by the Building Authority or the Planning Authority from and after August 5, 2002 up to and including Monday, October 7, 2002, for the demolition of any dwelling or dwelling units, including single-family, two-family, and multi-family dwellings, lodging houses, sheltered care group homes, and rooming units anywhere within the City of Portland.

It is further found and determined that it is necessary that this article take effect immediately as an emergency, pursuant to article II, section 8 of the City Charter.
(Ord. No. 26-02/03, 8-5-02)

Sec. 14-904. Exceptions.

(a) The moratorium hereunder shall not apply to any building found to be a dangerous building pursuant to 17 M.R.S.A. Secs. 2851 et seq.

(b) The moratorium hereunder shall not apply to property

which, although designed and intended for residential use, is, at the time of adoption of this section, a legally grandfathered non-residential use.

(c) Any demolition or conversion approved by the Portland Planning Board under the Site Plan Review and Conditional Use Standards of Chapter 14 of the Portland Code prior to July 1, 2002, so long as such approval is valid and in effect on the date of this ordinance.
(Ord. No. 26-02/03, 8-5-02)

ARTICLE XV. WATERFRONT CAPITAL IMPROVEMENT AND ECONOMIC REDEVELOPMENT ZONE AND ORDINANCE

Sec. 14-905. Title.

This ordinance shall be known as the Waterfront Capital Improvement and Economic Redevelopment Ordinance.
(Ord. No. 249-01, 6-4-01)

Sec. 14-906. Purposes.

The purpose of this ordinance is to implement those provisions of the Waterfront Economic Development Task Force Report, (Waterfront II) entitled "Investing in Our Working Waterfront: Final Report of the Mayor's Waterfront Task Force on Economic Development," dated September 2000, as adopted by the Portland City Council on June 4, 2001 which create a capital improvement plan for redevelopment on the Portland Waterfront. That plan includes funding the loan fund described in that report, the financing and installation of infrastructure to support the economy of that area of the City of Portland, such as parking facilities, utilities, traffic and congestion management installations, operating facilities for the cargo, fishing and other water-dependent, marine related industries, environmental protection and improvement, including the management and abatement of combined sewer overflows, appropriate assistance in the permitting and completion of dredging of siltation at piers, wharfs and weirs, and such other matters as the City Council shall approve from time to time. These activities shall be collectively known as the redevelopment program.
(Ord. No. 249-01, 6-4-01)

Sec. 14-907. Creation of the Waterfront Redevelopment Economic Zone (WREZ).

The Waterfront Redevelopment Economic Zone is hereby created.

Beginning at a point on the southerly side of the Eastern Promenade at the intersection of the Westerly side of the Portland House Condominium and the Easterly sideline of land now or formerly of Dan Haley.

Thence Southwesterly along the Southerly side of Eastern Promenade to Fore Street.

Thence Westerly along the Southerly side of Fore Street to the intersection of Fore Street and Mountfort Street.

Thence Northerly along Mountfort Street to the Southeast corner of the lot referenced as 20-C-2 on City of Portland Tax maps as of April first, 2001.

Thence Westerly along lot 20-C-2 about 72 feet.

Thence Northerly along 20-C-2 to 20-C-5.

Thence Westerly along 20-C-5 to the south corner of 20-C-5.

Thence Northwesterly along 20-C-5 to Newbury Street.

Thence Southwesterly along Newbury Street to Hancock Street.

Thence Southeasterly along Hancock Street to Middle Street.

Thence Southwesterly along Middle Street to 20-C-27.

Thence Southeasterly along the Northeast sideline of 20-C-27 about 99.99 feet.

Thence Southwesterly along the Southeast sideline of 20-C-27 to India Street.

Thence South along India Street to the Northern corner of 29-N-26.

Thence Westerly along the Northern side of lot 26 to lot 24.

Thence Westerly, Northerly, Westerly, and Southerly along 29-N-24 to Bradbury Court.

Thence Westerly along Bradbury Court to the Franklin Street Arterial.

Thence Northerly along Franklin Street Arterial to Fore Street.

Thence Westerly along Fore Street to Pearl Street.

Thence Southerly along Pearl Street to Gold Street.

Thence Westerly along Gold Street to Silver Street.

Thence Northerly along Silver Street to Fore Street.

Thence Westerly along Fore Street to Market Street.

Thence Southerly along Market to the dividing line between 32-S-3 and 32-S-4 & 5.

Thence Northerly along Moulton Street to Wharf Street.

Thence Westerly along Wharf Street to a passage between Assessor's map 32 blocks "T" and "U" leading to Commercial Street.

Thence Southerly along said passage about 28 feet to the dividing line between lots 32-U-3 and 32-U-5.

Thence Westerly, Southerly, and Westerly along the Southerly line of lot 5 to Dana Street.

Thence Westerly across Dana Street and following the Northern boundary of lots 32-V-2, 4, 5, 8, and 12 to Union Street.

Thence Northerly on Union Street to Fore Street.

Thence Westerly on Fore Street to parcel 38-F-8.

Thence Southerly along the Easterly sideline of 38-F-8.

Thence Westerly along the Southerly sideline of 38-F-8 to Cross Street.

Thence Northerly to Fore Street

Thence Westerly along Fore Street to 38-G-7.

Thence Southerly along the Easterly sideline of 38-G-7.

Thence Westerly along the Southerly sideline of 38-G-7 to the Easterly sideline of Center Street.

Thence Northerly along Center Street to the Southerly sideline of 40-F-11.

Thence Southwesterly along the Southerly sideline of 40-F-11 and 40-E-1.

Thence Westerly along the South side of 42-A-8.

Thence Northerly along the Westerly line of 42-A-7 to York Street.

Thence Westerly along the Southerly side of York Street to High Street.

Thence Southerly along High Street 44 feet ± to Southern sideline of 42-B-7.

Thence Westerly along the Southerly sideline of 44-B-2 to Park Street.

Thence Westerly across Park Street to the Southerly sideline of 43-C-7.

Thence Westerly along the Southern sideline of 43-C-7 to the edge of proposed State Street.

Thence Westerly across proposed State Street to the Southerly sideline of 43-E-8.

Thence Westerly along the Southerly sideline of 43-E-8 to the Casco Bay Bridge.

Thence Southeasterly along the Casco Bay Bridge to the Harbor Commissioner's Line.

Thence Northeasterly along the Harbor Commissioner's line to a point which is the intersection of the Harbor Commissioner's line and a line which is the extension of the lot line between the Southeasterly line of land now or formerly of Dan Haley and the Southwesterly line of the Portland House Condominium.

Thence Northwesterly along said line to the Southerly side of the Eastern Promenade at the point of beginning.

All as shown on a map dated April 13, 2001 entitled "Proposed Waterfront Redevelopment Area" on file in the Planning Office.

Any inconsistencies between this description and the map shall be controlled by the map.
(Ord. No. 249-01, 6-4-01)

Sec. 14-908. Financing Activities.

The following financing activities are authorized for the creation of funds to be used for the activities approved for funding by this ordinance:

(a) Tax Increment Financing Districts Revenues.

1. Within the Waterfront Redevelopment Economic Zone (WREZ) all activity except minor changes as defined below, which results in an increase in assessed value due to new construction, development or redevelopment, renovation, refitting or other physical change to structures or uses, including acquisition of equipment, shall be subject to designation as a Tax Increment Finance (TIF) District to support redevelopment activities within the WREZ pursuant to 30-A M.R.S.A. §§ 251-526, as amended.

   Minor changes shall mean those physical changes, minimal in scope or purpose, which when accumulated with previous and anticipated other changes, over a period of two years, increase the assessed value of the affected property by a cumulative total of $400,000 or less.

2. Affected properties shall mean those properties within the zone which undertake activity, except minor changes as defined above, which results in a change in assessed value due to new construction, development or redevelopment, renovation, refitting or other physical change to structures or uses, including acquisition of equipment.

Affected properties within the WREZ shall be designated for inclusion in this redevelopment program as a TIF District, and the tax increment from the captured assessed value shall be applied to the redevelopment program purposes, subject to approval by the City Council on a TIF-by-TIF basis.

A property is an affected property if it otherwise so qualifies, and the total aggregate amount of captured assessment in the TIF Districts devoted to this redevelopment program does not exceed 1.25% (.0125) of the total taxable valuation of the City of Portland, when adjusted as necessary to reflect 100% valuation, as determined by the City Assessor.

3. Paragraphs (1) and (2) notwithstanding, the Council may by Council order determine that the increases in assessed value that would otherwise be designated for the first time as TIF districts under (1) and (2) above for the next succeeding fiscal year shall not be so designated.

4. The redevelopment program shall be that series of investments, expenditures, guarantees and supports which are planned for project fund expenditures.

(b) Program Income and Other Revenues.

The City Manager will budget the program activities, including the program income and expense, of the redevelopment program annually for approval and implementation by the City Council. The redevelopment program is authorized to receive program income, grants, participations, joint ventures, investments and other revenues for the purposes of the redevelopment program as approved by the City of Portland from time to time.

(c) Updates to development plan.

Periodically, the city manager shall evaluate and propose updates to the Development Plan, and identify properties developed in the redevelopment zone which qualify as TIF District properties. The city manager shall report to the council on conditions and changes in conditions addressing the economic circumstances of the waterfront

economy, and shall include in said report detail on at least the following issues:

1. The utilization, adequacy and capital and operating position of the enterprise loan fund designed to assist water-dependant, marine-related properties and businesses;

2. The state of the fishing industry, the adequacy and demand for berthing space and operating facilities, financing, local markets and opportunities, and the operations of public operations pertaining to the fishing industry;

3. The status of other water dependant industries and operations along the Portland waterfront, including opportunities to develop or promote water dependent and marine resource dependant economic opportunities;

4. The status of dredge operations and needs at public and private piers, the nature of impediments to maintaining full depths at all working Portland piers;

5. The status of cargo operations in the Port of Portland, including analysis of surface transportation capacities serving the Port cargo operations, whether public or private;

6. The status of parking availability, public access to the waterfront and to water dependent recreational activities and pursuits;

7. The status of environmental concerns, programs and issues along the Portland waterfront, and particularly in the inner harbor; and

8. Such other information, data or findings concerning conditions as affects the economic and environmental health of the waterfront area, or recommendations concerning the operations of the loan fund or the capital improvement program.

(d) Recommendations.

As often as he or she deems prudent, the city manager shall submit to the city council a recommended capital improvement plan, utilizing the revenues of the WREZ. The finance committee of the city council or such other committee as the Council shall designate shall conduct public hearings on the recommended plan and refer the matter to the council for action.

(e) Adoption.

The City Council shall adopt amendments to the WREZ, designate TIF Districts and authorize expenditures and take such other actions as are necessary each year to implement this redevelopment plan and administer its revenues and expenses.

(Ord. No. 249-01, 6-4-01; Ord. No. 151-02/03, 2-3-03; Ord. No. 116-08/09, 12-1-08)

ARTICLE XVI. CITIZEN ADVISORY COMMITTEE

Sec. 14-1000. Purpose.

Pressures of growth in the community strain the relationship between neighborhoods and business and therefore a challenge exists to improve communication with, and timely participation by, Portland residents in the planning and development review process. There exists within Portland strong common ground and a desire to address the planning development challenges by constructively working and communicating with the public. The City desires a committee to meet on a quarterly basis that will 1) comment upon the integration and consistency of neighborhood plans with the Comprehensive Plan, 2) facilitate the exchange of information between existing and future planning task forces, 3) collate proposed, revised or amended components of the Comprehensive Plan to ensure internal consistency, 4) submit comments upon updates of

and additions to the Comprehensive Plan to the Planning Board for further review, and 5) respond to other undertakings as directed by the City Council.
(Sub. Ord. 222-01, 4-2-01; Ord. No. 93-03/04, 11-03)

Sec. 14-1001. Created.

There is hereby created a citizen advisory committee.
(Sub. Ord. 222-01, 4-2-01)

Sec. 14-1002. Composition.

The Citizen Advisory Committee shall be comprised of one (1) representative appointed by each City Councilor, as well as an individual representative of the Islands who shall be appointed by the Mayor.

Fourteen (14) additional members of the Citizen Advisory Committee, appointed by the mayor subject to Council approval, shall represent each of the following areas:

Housing	Business and Industry
Social Services	Youth
Parks and Recreation	Historic Preservation
Transportation	Education
Public Safety	Arts
Development	Waterfront
Open Space, Water Quality, and Trails	Residential Renter

All members of the Citizen Advisory Committee shall be Portland residents and all appointments shall be approved by the Council with the staggered terms of membership set by Council order.
(Sub. Ord. 222-01, 4-2-01; Ord. No. 93-03/04, 11-03-03)

Sec. 14-1003. Chair

The committee shall be chaired by a City Councilor and one (1) member of the Planning Board.
(Sub. Ord. 222-01, 4-2-01)

Memo Report

From: W. Mark Cummings, P.E.

To: Mr. Steve Bushey, Fay, Spofford, & Thorndike

CC:

Subject: Updated Fire Protection Review of Site Plans, ICW The Forefront at Thompson's Point

As requested, Fire Risk Management, Inc. (FRM) reviewed the information you provided with regards to the updated site plans for the new development at Thompson's Point in Portland, ME. The focus for this review was to further evaluate the fire protection features of the general layout for the proposed development to ensure that all State and Municipal codes, regulations, and ordinances are adequately addressed.

The primary codes and regulations used as reference for this review included;

1. The City of Portland Code of Ordinances; primarily Chapter 10, *Fire Prevention and Protection,* (Rev. 1-20-11),
2. City of Portland Technical Manual, Section 3 – Public Safety, (Rev. 6/17/11),
3. City of Portland Fire Department Rules and Regulations, and
4. National Fire Protection Association (NFPA) 1, the Fire Code® (2012 ed.).

For this review, the primary areas of interest are to ensure that an adequate water supply is available; including location and spacing of the new fire hydrants along the proposed private fire service main and that proper access to the various structures by firefighting equipment and personnel is available. The primary documentation reviewed in support of this evaluation included;

1. The Forefront at Thompson's Point Master Fire Protection Plan; Dwg C-6.00,
2. The Forefront at Thompson's Point Master Plan; Dwg C3.00, and
3. The Forefront at Thompson's Point Master Plan Application submittal package.

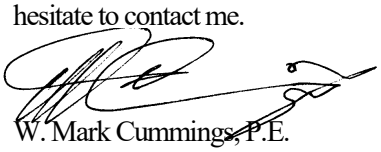
Although no updated fire water supply system data have been requested from the Portland Water District (PWD), the data provided for the previous review of this development indicated that the water supply to the site for the new development should be more than adequate to support the requirements outlined by NFPA 1, Ch. 18. Based on the most recent building construction data provided, it is understood that the new buildings being constructed will generally consist of Type IB or IIA construction and will comply with the requirements of the Maine Uniform Building and Energy Code (MUBEC), which mostly follows the requirements outlined in the International Building Code (IBC). The existing buildings that are identified to remain will generally meet a Type IIIB construction classification, as defined by the IBC. Equally, it was discussed that the construction plans call for all new buildings to be fully protected with automatic fire sprinkler systems and most, if not all, existing structures are likely to be retrofitted with a fire sprinkler system as part of their renovations. Some discussion indicated that since building B1 was planned to be an "open air" structure, this facility might not be provided with a fire sprinkler system. Given the type of occupancy classifications, along with the size and construction classifications for all buildings that are proposed for this development, the overall fire flow (firefighting water supply) requirements for each of the buildings, as defined by the requirements in NFPA 1, have been estimated. It is estimated that the "worst-case" demand will likely be that for both the Garage (building F1) and the Office building (building J1). Based strictly on the fire flow areas for these structures, along with a likely requirement that they will consist of Type I or II construction, a minimum fire flow demand of 4250 gpm

for four (4) hours would be required for each. However, given that these structures are planned to be fully sprinklered, this flow value can be reduced by 75%; to less than 1100 gpm. If building B1 is not to be provided with a fire sprinkler system, this building would then represent the worst case demand for the water supply system; 2500 gpm for two (2) hours. The hydrant flow test data previously provided by the PWD indicated that the 12" supply main serving this site can support more than 6000 gpm at the minimum of 20 psig residual pressure, which is used as that needed to be defined as "fire flow." No restriction was listed with regards to the duration for which this flow could be provided. As such, the existing water supply system for the City of Portland should have no problem acting as the primary source of fire water supply for this new development.

Based on the total fire flow demand, NFPA 1 (Annex E) would allow for a minimum spacing of either 450 ft or 500 ft between each hydrant, as measured along the fire department access road(s) [1]. Ultimately, this will depend on whether or not all buildings are provided with sprinkler systems. If, for example, building B1 is not provided with a fire sprinkler system and the requisite fire flow demand is 2500 gpm, the hydrant spacing should be no more than 450 ft along the various access roads; otherwise, the 1100 gpm demand would allow for a 500 ft spacing. Although the current Master Fire Protection Plan was developed using a maximum spacing of 500 ft between hydrants, most are already shown on the plan as not being greater than 450 ft apart and where those that may be slightly more than this distance, the final hydrant locations can easily be adjusted, if/as necessary, to meet this requirement without the need for additional hydrants. Equally, for any hydrant that is considered to be located along a "dead-end" street/access roadway/etc., the distance from any point measured along that street/roadway to a hydrant should not exceed 200 ft. Using these requirements and the information provided on the Master Plan drawings, it appears that the proposed hydrant locations that are adjacent to buildings J1 and J2 (northwest corner of the development) may need to be adjusted slightly to fully comply with this requirement. However, since this can easily be accomplished within the design of the final site plan, it would not be recommended that changes to this current layout occur until the overall site plan is finalized; including building sizes and locations and a definite determination of whether any buildings will not receive a fire sprinkler system.

The Portland Fire Department Rules and Regulations include additional requirements regarding the placement of hydrants. This includes a requirement that the Fire Department Connection(s) (FDCs) for each building must be within 100 ft of a hydrant. Additionally, NFPA 24 (along with the City) has a requirement that no hydrant should be located within 40 ft of a structure. Since the level of detail for the individual buildings provided at this point in the design process is such that it is not known where the FDCs will be located for each building, it cannot be determined as part of this review whether or not this requirement will be met. However, in other recent projects, the City has agreed to "waive" the requirement for a hydrant to be within 100 ft of the FDC; primarily since the genesis of this requirement isn't fully understood and this is not a "typical" requirement for most other municipal Fire Departments. It is understood that the hydrant that is currently depicted as being located adjacent to building H is within 40 ft of this structure. However, as discussed in a number of teleconferences between FST and FRM, it is recommended that this current location be retained. It is understood that the proximity of the access road along these buildings is so close to the property line that a hydrant cannot be installed on the other side of the access road. However, installation of the hydrant at this location has a greater advantage in meeting the overall water supply requirements for the site than the disadvantage of its close proximity to building H. Its removal would then result in the inability to meet the maximum spacing between hydrants. Given that if a fire is within building H, other hydrants are readily available to support firefighting operations, it is considered that the plan to install this hydrant in this location represents the best option for providing the overall site with adequate fire protection. Where it may be in the best interests of the overall firefighting plan for a building/site, the codes do allow for the Authority Having Jurisdiction (AHJ) to accept hydrant locations within the 40-foot limit.

NFPA 1 also requires that any portion of a building, or the exterior walls of the building, can be no more than 450 ft from an access road when the facility is fully protected by an automatic sprinkler system; it cannot be more than 150 ft if not sprinklered. Based on a review of the site plan, it appears that this requirement will easily be met. In addition to this requirement, NFPA 1 also requires that at least one exterior door for each building is within 50 ft. of an access



[1] Although FRM used the most recent edition of NFPA 1 for this review, no changes occurred from the previous edition that would alter the calculations/requirements used for this review.

roadway. The drawings provided for this review did not provide a level of detail for the individual buildings that would include locations for all available exterior doorways; albeit based on the locations of the roadways, driveways, and parking lots depicted on the Master Plan, it appears that this requirement too will easily met. However, it will still be necessary to ensure that during the design process for the individual buildings, that this requirement is accommodated.

Chapter 10 of the Portland City Ordinances has a requirement that, where available, the fire department vehicles should have access to at least two (2) sides of each building. Based on the current site plan provided, it will be possible for all buildings to be accessed from at least two sides. Both NFPA 1 and the City's regulations also include requirements for any "dead-end" access road greater than 150 ft to provide a means for fire department apparatus to turn-around. The only portion of the site access roads where this restriction applies is that section that provides access to building J2. The current Master Plan includes a general turn-around area on the west side of building J2. It will be necessary to verify that the final design for this turn-around will be compliant with the City's requirements. The City of Portland's Technical Manual includes a figure that generally depicts the recommended layout for this turn-around (Figure I-5).

Although this development is provided with only a single access point, the design of this roadway will far exceed the minimum requirements outlined by the City's Ordinances (20 ft minimum width where ladder truck may be needed). Unfortunately, the topography and the presence of a railway that isolate Thompson's Point from the remainder of the land mass restrict the ability to provide a second access point to this site. However, given the current plans for the access roadway design, having a single access is not considered to provide any significant increase in risk.

Should there be any questions regarding this assessment and the recommendations contained herein, please do not hesitate to contact me.

Subject: The Forefront at Thompson's Point
Major Site Plan Application - New Multi-Family Residential Building (G)

Dear Matthew:

On behalf of CPI Management, LLC (Cathartes) and Forefront Partners I, LP (Forefront), Placemaker Partners, LLC is pleased to provide the accompanying package of Major Site Plan submission materials representing the proposed development at 125 Thompson's Point Road, Portland, ME. The proposed Multi-Family Residential Building (labeled "G" on the attached Master Development Plan) with structured parking and outdoor living amenities will be located in the northwestern most portion of The Forefront at Thompson's Point Subdivision lots 17 thru 19, an area anecdotally referred to as the "panhandle". Cathartes, a prominent developer in the northeast with a driven focus on quality of life, has entered into an agreement with Forefront Partners I, LP to bring a vibrant and transformative residential development to Thompson's Point as contemplated in the approved Master Development Plan.

Cathartes is proposing to construct a six story 255-Unit market rate apartment building with a mix of units ranging in size from studios to 3-bedroom apartments. The building includes a variety of amenities and boasts a modern cohesion with the adjacent natural landscape, industrial history, and strong sense of community which Forefront has prioritized on Thompson's Point since the inception of its redevelopment efforts. The living units take full advantage of spectacular views down the Fore River estuary and a doorstep connection to well established multi-modal transportation including the local public trail system and METRO bus routes as well as regional connections on the Concord Trailway Bus and Amtrak railroad transportation center. An attached six (6) story 463 car parking structure, complete with bike storage room and EV charging, dedicated for residents and Thompson's Point managed parking supply, buffers much of the building from the adjacent railroad lines along the north side of the property.

The development proposal is a permitted use within the B-5 Mixed Use Zone and comprises of a portion of the 344 residential units approved under the Thompson's Point Master Development Plan. The multi-family development will be constructed on Lots formally shown as 17, 18, and 19 on the approved Forefront at Thompson's Point Sectional 4 Subdivision Recording Plat (dated May 2018 and last revised March 19, 2020). The Sectional 4 Recording Plat will be the last section to be recorded in the Cumberland County Registry of Deeds (CCRD) and, together with the previously recorded Sectional 1 through 3 Recording Plats, will complete the overall Forefront at Thompson's Point Subdivision. Simultaneously and combined with this Site Plan Application, Forefront is pursuing an amendment to Sectional 2 and 4 Subdivision Plats for review by the Planning Authority. Proposed alterations on the Sectional 4 Plat consolidate Lots 17 through 19 into a single development lot (the revised Lot 17). Lot 8 as described on Sectional 2 Recording Plat (CCRD Plan Book 223 Page 190) will be split into two development lots (the revised Lots 8 and 18). As a result, the amended overall 19 lot subdivision will be reduced to 18 total lots; however, the effective development area, common areas, and infrastructure remains the same.

The proposed development requires a Major Site Plan Submission Pursuant to Table 14-A: Site Plan Classifications in Section 14.3 – Project Classification of the Land Use Code. The applicant is proposing the following applicable development:

1. Construction of a new structure having a total floor area greater than 10,000 Sq. ft. (50,208 sq. ft.+/) and more than 3 (residential) units (255 units)
2. Stripping & grading work greater than 3 AC (4.51 AC)
3. Construction of Impervious Area greater than 1 AC (2.94 AC)
4. Construction of off-street vehicle parking spaces (498 Spaces)
5. Construction of Structures in the Shoreland Zone (Stormwater Outfalls)

This submission package is intended to demonstrate compliance with all documentation required by the Major Site Plan Checklist. The project meets all the requirements as outlined in the Site Plan Review Standards detailed in Section 14.6 of the Land Use Code of Ordinances. This includes but not limited to the following documents which have been uploaded to the City's CSS Portal:

- Application
- Project Plan Drawings – Site Plans, Architectural Drawings, Landscape Architect Drawings, and Photometric Plan
- Attachment A – Major Site Plan Checklist
- Attachment B – Major Site Plan Submission Supporting Narrative
- Attachment C – Evidence of Right, Title, and Interest
- Attachment D – Local, State, Federal, FAA, Historic Permits
- Attachment E – Zoning Analysis Table
- Attachment F – Conformity with Applicable Site and Zoning Standards
- Attachment G – Evidence of Financial and Technical Capacity
- Attachment H – General Construction Management Plan
- Attachment I – Traffic and Parking Generation Summary
- Attachment J – Supplemental Stormwater Management Memorandum
- Attachment K – Utility Correspondence and Wastewater application
- Attachment L – Fire Code Checklist

- Attachment M –Summit Geotechnical Data Report and local Soils information
- Attachment N – Agent Letter
- Attachment O – Summary of Easements
- Attachment P – Transportation Demand Management (TDM)
- Attachment Q – Lighting Specifications
- Attachment R – Site Photos

The Forefront at Thompson's Point development team appreciates your continued assistance on the development of this project. We are very excited to proceed with the residential component of the Thompson's Point neighborhood and look forward to continuing to work with the City of Portland to bring this project to fruition.

If you have any questions regarding these materials, please contact this office.

Sincerely,

PLACEMAKER PARTNERS, LLC

Bo Kennedy, P.E.
Project Manager/Engineer/Partner

G:\Development Projects\Thompson's Point\Panhandle\Site Permitting and Engineering\Permitting\Major Site Plan Application - Panhandle Resi\2024.08.30 Major Site Plan Application- Cover Letter.docx

Standard to be Waived: Cite Ordinance or Technical Manual Standard	**Cite Standard Language:** Cite specific language of applicable Ordinance or Technical Manual Standard	**Waiver Being Sought:** Describe waiver being sought. Ex. – We are requesting a two-way parking lot drive aisle width of 20' feet.	**Justification for Waiver:** Address specific waiver criteria, if applicable, and document reasons for the waiver request.
Technical Manual Section 10-Public Safety Standard – Subdivision Standards Table 10.5 Minimum Number of Access Roads	Subdivisions with an approved sprinkler system designed to NFPA #13D with ≥ 100 Units shall have Two (2) access roads	We are requesting a single three lane access road to the overall subdivision as designed, constructed, and accepted by the city's dpw with the intended purpose of serving the full build out of the approved master Development plan.	The development site's extreme land constraints (significant natural resources, topography, railroad) were the reason for the need of a waiver from this standard. The waiver request was extensively researched, discussed, and decided in collaboration with the city's officials during prior approvals of the MDP and Overall Subdivision. It was determined and documented that a single access road with a third lane, public rail crossing designed with emergency vehicles in mind, and a gated access for emergency vehicles only from Sewall Street is sufficient for the full build out of the uses contemplated in the MDP. The three-lane access roadway, together with a host of off-site improvements and safety measures intended to support the full buildout of the MDP, was designed and reviewed by the City, MaineDOT, and their consulting engineers at Gorrill Palmer following MDP approval and with the express understanding that the scope of this infrastructure was adequate to support all uses contemplated under the MDP including a large number of future residential units. Approval of this waiver is intended to formalize what was already presented and approved in prior applications.

Planning & Urban Development Department

MAJOR SITE PLAN
GENERAL DOCUMENT AND DRAWINGS CHECKLIST
Please submit each document as a separate PDF file.
Please confirm by electronically checking the boxes in the left-hand column.

**** PLEASE FILL OUT AND UPLOAD THE ZONING ASSESSMENT TABLE AND WAIVER TABLE SEPARATELY AS NOTED BELOW ****

At the time of application submission, please contact the Department of Public Works regarding E-911 addressing for your project.

GENERAL APPLICATION DOCUMENTS		
Yes	**NA**	**Project Description** Attachment A & B • Cover letter with detailed project description
Yes	**NA**	**Completed Checklist** (this document)
Yes	**NA**	**Evidence of Right, Title, and Interest** Attachment C • Deeds, leases, or purchase and sales agreements
Yes	**NA**	**Evidence of State or Federal Approvals** Attachment D • Permits or letters of non-jurisdiction, if applicable
Yes	**NA**	**Zoning Assessment** (see Zoning Assessment Table) Attachment E Summary of compliance with use and dimensional standards of the land use code
Yes	**NA**	**Site Plan Standards Assessment** (see Section 14.6 of the land use c Attachment F • Summary of project compliance with site plan standards of the land use code
Yes	**NA**	**Summary of Existing and/or Proposed Easements or Covenants, applicable.** • Evidence of existing easements and any proposed easements, covenants, public or private rights-of-way Attachment O
Yes	**NA**	**Waiver Requests** (see Waiver Table) • Written request for waiver describing request and compliance with applicable waiver standards
Yes	**NA**	**Financial Capability** Attachment G • Letter or evidence from a financial institution or third party verifying financial capacity to undertake project
Yes	**NA**	**Technical Capability** Attachment G • Evidence of technical capability of applicant and consultants – resumes and/or examples of past projects

MAJOR SITE PLAN
STANDARDS AND SUBMISSION CHECKLIST

Provide assessment of compliance with standards and include supplemental documentation, as applicable.
Please submit each document as a separate PDF file.

TRANSPORTATION	
Yes **NA**	**Impact on Surrounding Street Systems (14-14.6.1(A))** **Attachment I** ● Describe incremental volume of traffic impacts and mitigation measures. If needed
Yes **NA**	**Access and Circulation (14-14.6.1(B))** **Attachments F & Site Plan Drawing** Identify and describe the following: ● Site access and internal circulation, including ADA access ● Drive-up features, if applicable ● Loading and servicing needs, routes, and geometry, providing turning templates for delivery vehicles, if applicable ● Sidewalks and condition along street frontages and internal walkways ● Engineered details for ADA ramps and public sidewalks, meeting sidewalk material policy and construction requirements (Technical Manual, Section 1)
Yes **NA**	**Public Transit (14-14.6.1(C)), if applicable** **Attachments F** Identify and describe the following: ● Existing available transit service and proposed transit improvements, including design details, such as easement, pad base, and shelter
Yes **NA**	**Off-Street Parking (14-14.6.1(D)), if applicable** **Attachments F** Identify and describe the following: ● Proposed vehicular and bicycle parking supply (including ADA-compliant parking) in relation to applicable parking requirements in Article 19 of the land use code ● Curb cut separation and parking layout (Technical Manual, Section 1) ● Construction details for bicycle racks ● Management plan for snow storage and removal
Yes **NA**	**Transportation Demand Management (TDM) (14-14.6.1(E)), if applicable** ● Provide TDM plan drafted in accordance with Technical Manual Section 1 requirements **Attachment P**

ENVIRONMENTAL	
Yes NA	**Preservation of Significant Natural Features (14-14.6.2(A)), if applicable** Attachment F Identify and describe the following: ● High and moderate value waterfowl and wading habitat ● Aquifers (for Casco Bay Islands) ● Waterbodies (including wetlands, watercourses, significant vernal pools and floodplains) ● Proposed preservation areas and protection measures ● Documentation from environmental compliance consultants and determinations from applicable state and federal agencies
Yes NA	**Landscape Preservation (14-14.6.2(B))** Attachment F Identify and describe the following: ● Measures to preserve trees, including within required zoning setbacks (Technical Manual, Section 4) ● Measures to protect existing vegetation during construction
Yes NA	**Site Landscaping and Buffers (14-14.6.2(C))** Attachment F Identify and describe the following: ● Overall landscaping approach and consistency with standards ● The use of screening and buffering of service areas and between non-residential and residential uses ● Existing Heritage or Feature Trees on site and measures to preserve ● Compliance with street tree requirements
Yes NA	**Water Quality, Stormwater Management, and Erosion Control (14-14.6.2(D))** Attachment J Identify and describe the following: ● Erosion and sedimentation control plan and measures ● Evidence of compliance with Urban Impaired Stream Standards pursuant to DEP Chapter 500 stormwater law, as applicable ● Subsurface sanitary sewage disposal and groundwater protection measures

PUBLIC INFRASTRUCTURE AND COMMUNITY SAFETY	
Yes **NA**	**Consistency with City Master Plans (14-14.6.3(A))** **Attachment F** ● Describe proposed easements, rights and improvements to connect or continue off-premises public infrastructure, as applicable
Yes **NA**	**Public Safety and Fire Prevention (14-14.6.3(B))** **Attachment L** Identify and describe the following: ● Compliance with Crime Prevention through Environmental Design (CPTED) requirements (Technical Manual, Section 3) ● Emergency vehicle access ● Consistency with public safety standards (Technical Manual, Section 3)
Yes **NA**	**Availability and Adequacy of Public Utilities (14-14.6.3(C)) (Technical Manual, Sections 2 & 9)** **Attachment K** Identify and describe the following: ● Electrical services, including providing underground services ● Existing and proposed connections for public utilities and required public utility upgrades ● Sewer line connections
SITE DESIGN	
Yes **NA**	**Massing, Ventilations and Wind Impact (14-14.6.4(A))** Identify and describe the following: ● Wind and ventilation impacts on adjoining structures and/or adjacent public spaces, including wind study, if applicable ● Bulk, location, or height impacts on adjoining structures
Yes **NA**	**Shadows (14-14.6.4(B)), if applicable** ● Provide shadow analysis of impacts on publicly accessible open space (Technical Manual, Section 11)
Yes **NA**	**Snow and Ice Loading (14-14.6.4(C))** ● Describe building design measures to prevent snow and ice from loading or falling onto adjacent properties or public ways
Yes **NA**	**View Corridors (14-14.6.4(D)), if applicable** ● Describe any protection of designated view corridors (Portland Design Manual, Appendix. 1)
Yes **NA**	**Historic Resources (14-14.6.4(E)), if applicable** Identify and describe the following: ● The site's status as a designated landmark, within a historic district or historic landscape district, or within 100 feet of any designated landmark, historic district, or historic landscape district ● Compliance with standards for preservation and documentation of archaeological resources

Yes	NA	**Exterior Lighting (14-14.6.4(F))** **Attachment F & Q** ● Describe how the proposed site lighting will adhere to photometrics requirements as it relates to light trespass and full cutoff fixture design, pursuant to Technical Manual Section 12
Yes	NA	**Noise and Vibration (14-14.6.4(G))** **Attachment F** ● Provide data on noise levels for HVAC and other mechanical equipment, such as design specifications, to demonstrate consistency with state and federal noise emissions requirements as well as City code
Yes	NA	**Signage and Wayfinding (14-14.6.4(H)), if applicable** **Attachment F** ● Provide signage plan showing the location, dimensions, height and setback of all existing and proposed signs ● Provide drawings of all commercial and directional signage on site
Yes	NA	**Zone-Related Design Standards (14-14.6.4(I))** **Attachment F & E** ● Address any applicable design review standards by zone, including compliance with Design Manual

MAJOR SITE PLAN
DRAWINGS CHECKLIST

Please upload the following DRAWINGS with the listed details into e-Plan as separate pdfs.

All DRAWINGS ARE ON 30" X 42" SHEET SIZE FOR CONSISTENCY WITH PREVIOUS PLAN SETS

All drawings must be submitted in a 24 x 36 sheet size.

BOUNDARY SURVEY (stamped by a Maine Licensed Surveyor and drawn as per Technical Manual Sec. 13)

SITE PLAN(s) (stamped by a Maine Licensed Professional Engineer) including:

All sheets – Include a title block with project title and the following information:

- Project street address
- Name and address of property owner & applicant
- Licensed design professional, incl firm that produced plans
- North arrow
- Date of preparation and revision history block
- Tax parcel (chart, block, and lot) number

Existing Conditions Plan with the following:

- Existing structures, with distance from primary building façade(s) to the property line
- Approximate location of structures on abutting properties
- All streets and intersections adjacent to the site
- Existing driveways, pedestrian ways, and bicycle infrastructure, including dimensions and materials
- Existing public transit infrastructure
- Existing vehicle & bicycle parking areas
- Existing utilities on site and within adjacent rights-of-way
- Existing grades (two-foot contours preferred)
- Location of water courses, wetlands, and vegetation, or other significant natural features
- Existing soil conditions and location of test pits and borings
- Zoning boundary lines, including overlays
- Location of all existing easements and rights-of-way

Proposed Site Plan with the following:

- Proposed structures, including distance from primary building façade(s) to property lines
- Ground floor area, and finished floor elevations for all buildings
- Any proposed geometric modifications to streets and intersections adjacent to site
- Location, dimensions and materials of all proposed driveways, vehicle, bicycle, & pedestrian access ways with corresponding curb lines
- Engineered specifications/ cross-sections for proposed driveways, sidewalks & paved areas
- Location and dimensions of proposed loading areas, including turning templates
- Proposed transit infrastructure with dimensions/ engineering specifications
- Location of vehicle and bicycle parking with dimensions and engineering specifications
- Location of all snow storage areas
- Exterior lighting (please see Technical Manual Sec. 12 for photometrics requirements)

- Location of fire hydrants
- Location of solid waste management receptacles
- Location of all proposed HVAC and mechanical equipment, including proposed screening, where applicable
- Location of proposed easements and rights-of-way, including dimensions
- Please utilize color-coding and/or hatches and shading to delineate changes between the pre and post development condition as needed

UTILITY PLAN including:

- Proposed electrical infrastructure
- Location, sizing and directional flows of all proposed sewer and stormwater infrastructure
- Location and dimensions of off-premises public or publicly accessible infrastructure adjacent to site
- Electric utility infrastructure

GRADING AND DRAINAGE PLAN including:

- Proposed grades
- Proposed stormwater management measures meeting Technical Manual (Section 5) standards
- Any proposed alteration of a watercourse or wetlands
- Any groundwater protection measures
- Proposed buffers and preservation measures for wetlands or significant natural features

LANDSCAPE PLAN including:

- Existing vegetation to be preserved and preservation measures
- Proposed landscaping, screening, and street trees, including caliper widths for trees
- Planting schedule, including street trees

ARCHITECTURAL PLANS AND RENDERINGS including:

- Exterior building elevations, color renderings, illustrations of all sides
- Axonometric and street-level views for structures greater than three stories in height
- Provide context drawings, if applicable (Design Manual, page 1)
- Floor plans

CONSTRUCTION MANAGEMENT PLAN including:

- Specifics on traffic control, sidewalk sheds, and pedestrian rerouting
- Include a drawing and written narrative

OTHER

- Details and cross-sections, as necessary

MAJOR SITE PLAN SUBMISSION SUPPORTING NARRATIVE

In accordance with Section 16.1, City of Portland Technical Manual, Section 14.6., Land Use Code Chapter 14, and General Written Submission Checklist, we offer the following narrative describing the information supporting the Major Site Plan submission as Attachment B.

Section 16.1.A General Submissions Requirements

1. Application Form – Submitted on Portland's CSS Portal
2. Application Fees – Paid online as applicable
3. Project Description:
   See Cover Letter

4. Evidence of Right, Title, and Interest

   Copies for proof of land ownership and agreements are on file with the city and available upon request. A letter from Forefront Partners I, LP (current owners) stating the legitimacy of agreement to develop and authorization to seek entitlements is included in Attachment C.

5. Evidence of State and/or Federal Approvals; if applicable

   The Applicant has provided copies of the State and Federal Permits issued for the project including the Traffic Movement Permit, U.S. ACOE Permit, and MaineDEP NRPA Permit in Attachment D.

6. Written Assessment of Proposed Project's Compliance with Applicable Zoning Requirements

   A written summary is contained in Attachment E to this submission.

7. Written Assessment of Project's Compliance with Site Plan Standards

   A written summary is contained in Attachment F to this submission

8. Summary of existing and/or proposed easements, covenants, public or private rights-of-way, or other burdens on the site

   A summary of existing and proposed easements is included in Attachment O

9. Written requests for waivers from the city's site plan or technical standards, if applicable;

   No waivers are requested from technical standards.

10. Evidence of Financial and Technical Capacity

    The Applicant has enclosed a letter in Attachment G from M&T Bank affirming Cathartes has the financial capacity and technical expertise to complete the proposed project.

11. The Boundary and Topographic Survey Plans prepared by Sebago Technics and submitted as part of the original 2013 Level III approval documents, subsequent 2014 Master Plan approval, and 2016 Subdivision approval documents remain valid and are the basis of this Major Site Plan submission. The approved amended Sectional 4 Subdivision Recording Plat dated 03.19.2020, Sheet C-2.0 – Existing Conditions Plan, and C-2.1 Demolition and Removals Plan are included with the site plan drawing set.

Section 16.1B – Written Materials for Site Plan Applications

1. The construction management plan is enclosed in Attachment H of the site plan submission package.

2. A Traffic Study was completed as part of the approved MaineDOT Traffic Movement Permit for the previously reviewed and approved with the previously approved Master Development Plan, Overall Subdivision Plan, and Level III/Major site plan applications. The work proposed as part of this application is consistent with these approvals. The proposed scope of work has been estimated for trip generations as shown in the enclosed memorandum prepared by Gorrill Palmer Associates dated 2024.09.04 in Attachment I. The enclosed Memorandum states that the proposed project forecasted trip generation is well below the permitted number of trips.

3. Thompson's Point has some vegetation on the far westerly end of the panhandle where some mature trees have established, and which require protection under the Shoreland protection requirements. This phase of the project will not clear this vegetation. The residential project will fill a small coastal wetland area of significance to install a stormwater outfall plunge pool. Furthermore, the Fore River tidal flats, river, and protected shoreland bird habitat surround the perimeter of the peninsula. The proposed lot 17 site development area is not adjacent to migratory shore bird habitat and the Shoreland zone established during state agencies during the Master Development Plan and Subdivision Plan entitlement process. The future proposed activities on other lots with-in the subdivision adjacent to these zones have been previously reviewed and approved as part of the Master Development Plan, Subdivision Plan, and Level III Site Plan approval, by the MaineDEP under a Natural Resources Protection Act (NRPA) review and Army Corp of Engineering (ACOE).

   The proposed construction includes installation of two stormwater outfalls and landscaping in the shoreland zone. Temporary and permanent erosion and sediment control measures are proposed to protect the nearby resources during and after construction. A new stormwater management system will collect and convey runoff from the new development area to a stabilized outfall sized with the appropriate amount of energy dispersion for the design flows. This approach limits the potential for sediment entering the adjacent wetlands and Fore River.

4. A detailed narrative describing the existing site watershed hydrology, existing buildings, and existing land cover is included in the previously submitted stormwater management reports on file with the city and a new Supplemental Stormwater Memorandum addressing this phase of the project is included with this submission in Attachment J.

5. A memorandum detailing the proposed stormwater management components and runoff calculations is appended to this application. The proposed improvements included with this submission include the disturbance of 4.51 acres. The disturbance area is contained almost entirely within the site's previously developed impervious area (Pre-1975) and proposes the redevelopment of approximately 2.94 acres of new impervious area (roadway, building, and pedestrian access).

6. The proposed development was found to be consistent with the City Master Plans during the Master Development Plan and Subdivision Plan review process.

7. The applicant has received ability to serve letters for the currently proposed Master Development plan from all utilities. The development proposed on Lot 17 will utilize the common infrastructure sized and installed to accommodate the entire master plan. New utility services (Water, Sewer, Storm, Electrical) will be tapped on to the existing mains currently feeding the entire subdivision. Updated Letters from utilities specifically addressing this project are included in Attachment K. A new City of Portland Wastewater Capacity Application summarizing the estimated proposed wastewater flows is included in Attachment K.

8. All waste will be stored in roll out type bins inside a trash room. All residents will have access to the trash chute. These containers will be serviced by an independent solid waste contractor on a regular basis. The frequency at which the solid waste is collected will be determined by the management company on an as needed basis.

   All waste generated from the site preparation and general site work will be collected and sorted/separated on-site until they are removed and disposed of properly, off-site, by a private contractor.

   All construction waste will be collected and sorted/separated on-site and managed by the general contractor.

9. Fire/Building Codes:
   -The full Fire Department Development Checklist is made part of this submission in Attachment L.
   -The building will be designed in accordance with the city building code, as well as all applicable local, state, and federal codes/laws. The building will be fully sprinklered in accordance with NFPA 13, NFPA 14, and will have fire detection/alarm systems as dictated by NFPA 72 and the underlying codes. The proposed building construction is classified as follows:
   Group B: fitness, offices
   Group R-2: amenity, residential units
   Group S-2: parking, storage, MEP

   Technical Standard 3.2 - Fire Hydrants:
   -There are (2) Two proposed private fire hydrants and (1) one existing municipal fire hydrant located within 500 feet radius of the building. Please see the attached Fire Safety Compliance Plan C-9.0.

   Technical Standard 3.3 - Single and Two Family Residential Development:
   - Multi – Family Building will be Fully Sprinklered; Parking Structure will be Fully Sprinklered with a dry system.

   Technical Standard 3.4 - Site Access Standards:
   3.4.1. - Private road provides turnaround designed to accommodate 40' ladder truck
   3.4.2. - Fire department access is provided via Thompson's point access road and a private Drive for access to 2 sides of the building.
   3.4.3. - Zoning does not require building setbacks
   3.4.4. - Fire department access roads extend to within 50' of entrances to building
   3.4.5. - All site access provides no less than 9 feet in clearance height.
   3.4.6. - All elevators will accommodate an 80 x 24 stretcher.
   3.4.7. - The street numbering and 911 address has been reviewed and approved by the city of Portland public works.
   3.4.8. - The building will display the assigned street numbers. Approved 911 address is **125 Thompson's Point Road**

   Technical Standard 3.5 – Standards for Emergency Access Lanes and Gates:
   All access roads exceed 16' in Width and Road Radius can Accommodate a 40' long Fire Truck/ Single Body Vehicle

   Technical Standard 3.6 – Subdivision Standards
   The Subdivision Standards have been reviewed and approved by the City of Portland. This approval granted a waiver to permit a subdivision with 1 Access Road.

   Technical Standards 3.7 through 3.11 - Standards for blasting and regulation of explosives:

- Geotechnical explorations were performed and the subsurface condition does not contain bedrock. Based on the findings, large blast operations are not anticipated. Geotechnical data reports are enclosed in Attachment M.

10. A review of the Applicable Technical Design Standards of Section 3 is included in Attachment F of the application.

11. HVAC equipment has not been specified and selected yet, but Embarc, as an experienced licensed architects and engineers, will ensure that all equipment are specified and installed in full compliance with all codes and regulations, including but not limited to state and federal emissions requirements.

Section 16.1C – Plans Required for Site Plan Applications

1. Requirements 1 thru 4 - A Site Layout Plan – Sheet C-3.1 and a Grading Plan – Sheet C-5.0 accompanies this submission. These plans show the location and details for all disturbed surfaces.

5. The engineering specification and cross-sectional designs remain consistent with those approved during the Subdivision application review and are included on plan sheet C-8.8.

6. The proposed buildings will not have dedicated loading bays but will incorporate a 40 ft long loading zone space for 1 to 2 trucks to park at grade on the northerly side of the building. This space is in proximity to the service elevator and will be used for all loading, deliveries, as well as short term parking for moving vans.

7. Public transit is accessible at the near-by Portland Transportation Center via the METRO service. Forefront Partners is actively engaged with the METRO as part of the ongoing TDM effort. Two METRO stops on Thompson's Point Road are in close proximity to the front door of the residential building.

8. The design plans detail the (498) four hundred ninety-eight proposed vehicular parking spaces proposed in this application. (102) One hundred and two bicycle parking spaces are located in front of and inside the proposed Building (G). The developers will use Standard City of Portland Dero hitch bicycle posts on the exterior of the building consistent with the other onsite posts. The bike rooms will be equipped with wall mounted bike racks.

9. Snow storage is proposed to be located temporarily along the edges of the drive aisles and landscaped areas until such a time when the stockpiles need to be removed from the property. Snow removal on the parking roof deck will be plowed to a drop chute where it can be managed on the ground.

10. The plan includes a landscape preservation area and landscape plantings to screen the development from the existing trail.

11. This project does not propose alterations to any watercourses. The accompanying plan sheets show the site's proximity to existing watercourses which includes the Fore River.

12. Wetland boundaries and natural resources are shown on the referenced boundary and topographic plans. This portion of the project will fill a small area of the coastal wetlands for the installation of a new stormwater outfall. This wetland fill was approved by the ACOE and MeDEP.

13. The applicant's project proposes to setback the development from the delineated wetlands located on the panhandle portion of the site. The wetlands are preserved with the exception of a very small impact for the installation of a stormwater outfall.

14. Existing soil conditions are well documented in the previously approved Master Development Plan and Subdivision Plan. The site has a long history of heavy development and most of the surfaces are described as compacted gravel, pavement or building overlaying urban fill and clayey substrata. The existing surface land cover types are identified on the accompanying plan set. A geotechnical exploration data report for the area prepared by Summit GeoEngineering services is enclosed with this application in Attachment M further describing the underlaying soils.

15. The applicant proposes landscaping in pervious areas as shown on the enclosed Landscaping Plan L-1.0.

16. The Grading Plan Sheet C-5.0 and Overall Interim Stormwater Management Plan Sheet C-5.1 and Stormwater Management Plans 1 (C-5.2) and 2 (C-5.3) are included in the accompanying plan set. The proposed stormwater management plan is consistent with the previously approved Subdivision plan and utilizes multiple Jellyfish cartridge and Filterra bioretention filtration devices to satisfy Section 5 of the City of Portland Technical manual for stormwater quality treatment. A stormwater memorandum prepared by the engineer of record is appended to this application.

17. A Grading Plan Sheet C-5.0 accompanies this Major Site Plan submission. This plan shows the detailed site grading within the "disturbed areas" as defined in Section 5 III (F) of the City of Portland Technical Manual. The Erosion Control and Construction Management Plan C-6.0 depicts the erosion and sediment control measures meeting the Basic Standards as required as part of City of Portland's Technical Manual Section 5. Generally speaking, the site grades are greater than 13' above the 100-year floodplain as indicated on the latest Flood Hazard Maps for the City of Portland.

18. Sheet C-2.1 Demolition and Removals Plan details specific measures to handle groundwater dewatering during construction to comply with the approved MaineDEP Voluntary Response Action Program (VRAP). We anticipate very little need for groundwater dewatering during these interim phase activities. Additional ground water protection measures are included in the stormwater management treatment facilities by using an impermeable liner separating stormwater runoff and groundwater.

19. The applicant proposes two new 8" diameter sewer connections to an existing sanitary sewer manhole. The Utility Plan Sheet C-4.0 shows details for the proposed sewer services.

20. The enclosed Utility Plan Sheet C-4.0 shows the location of all existing and proposed fire hydrants. The Life Safety Compliance Plan C-9.0 shows all hydrants to be in service at the completion of this development project with service radius of 100' and 250'.

21. The existing 12" water main (publicly owned), 15" sewer main (publicly owned), and electrical/communications (private) duct bank serving the project is shown on the enclosed Utility Plan Sheet C-4.0. The proposed development will construct new utility stubs for the development lot.

22. No off-site infrastructure is required as part of this project application.

23. The residential building will have a dedicated 24' x 29' trash room and trash chute inside the building for on-site solid waste and recyclable storage receptacles. These containers will be

serviced by an independent solid waste contractor, on a regular basis. All waste generated from the site preparation and general site work will be collected and sorted/separated on-site until they are removed and disposed of properly, off-site, by a private contractor. All construction waste will be collected and sorted/separated on-site and managed by the general contractor.

24. C-3.0 Site Layout Plan shows the building location and orientation on the site. The enclosed architectural plans prepared by Embarc Designs show the proposed floor plans and building elevations for all sides of the building.

25. A shadow analysis is not applicable to this application.

26. The proposed development is not with-in a Historic preservation district. All non-determination letters are on-file with the city and included in Attachment D.

27. HVAC equipment has not been specified and selected yet, but Embarc Designs, as an experienced design architect with licensed architects and engineers, will ensure that HVAC systems are specified and installed in full compliance with all codes and regulations, including but not limited to state and federal emissions requirements. Currently, all HVAC systems are proposed to be centralized on the roof.

28. Lighting fixture locations are shown on sheet C-4.0 Utility Plan. An exterior Lighting Photometrics Plan Sheet E-0.0 is included and generally consistent with the lighting plan approved as part of the Subdivision Plan review with some updates to modernize the fixtures and bring them more in-line with current lighting technical standards.

29. A separate signage plan and application will be submitted under a separate cover and application. The applicant is anticipating signage on the canopy above the main entrance as well as a small freestanding monument sign near the intersection with Thompson's Point Road.

    Standard traffic signage shall meet MUTCD standards and is detailed in the included plan set.

30. All existing and proposed easements and rights of access are described in the Declaration of Covenants recorded in the county registry of deeds. A summary of easements specific to development Lot 17 is enclosed in Attachment O.

Dear Mr. Kraft,

On behalf of Forefront Partners I, LP, I am writing to confirm that we are under contract in a Purchase and Sale Agreement with Cathartes to purchase Lots 17-19 at Thompson's Point.

They have our express permission to pursue site plan approval and all necessary permitting for their proposed multi-family project and related improvements.

If you have any questions, please do not hesitate to contact me.

Thank you for your support and very best of regards,

Chris Thompson
President, Forefront GP, LLC

Re: Inclusionary Zoning Applicability – Thompson's Point

Chris,

On March 11, 2014, the Planning Board voted to approve your Master Development Plan (MDP) application for the Forefront at Thompson's Point. City of Portland Land Use Code*, Section 14.3.2.B Master Development Plan*, states that MDP approval confers pending proceeding status upon development with the effect of maintaining the applicability of regulations in effect at the time of approval for as long as the MDP approval remains valid.

On October 19, 2015, the City Council adopted Inclusionary Zoning regulations which went into effect on November 18, 2015 (Order 82-15/16). The Forefront at Thompson's Point Master Development Plan was approved before the Inclusionary Zoning regulations were implemented and therefore is not subject to Portland's Inclusionary Zoning requirements.

According to Section 14.12.2 of the City of Portland Land Use Code, a Master Development Plan (MDP) expires six years after approval if no site work or building construction has commenced. Since several phases of the Thompson's Point MDP have been constructed and continuous site work has been ongoing since its approval, the MDP remains valid.

Please reach out should you have any additional questions or concerns.

Sincerely,

Kevin Kraft

RE: Master Development Plan Pending Proceeding

A question was raised in the course of the review of recent site plan applications for Portland Foreside/58 Fore Street, regarding whether a Master Development Plan (MDP) approved under a previous iteration of the Land Use Code (Code) was subject to the expiration provisions of the current Code, or whether the section in the Code in place at the time of MDP approval (for 58 Fore Street, December 2016, but the question extends to all MDPs) would apply. The Planning & Urban Development Department has determined the current Code's expiration section applies to this and other previously approved MDPs. Discussion of prior and current expiration sections, how pending proceeding is determined, and how the applicable Code standard is determined follows below.

MDP Expiration Under 2016 & 2023 Versions Of The Land Use Code
The current Code states:

> *Master development plans approved under this article shall expire six years from the date of approval if no site work or building construction has commenced.* (sec. 14.12.2) and *Master development plan approvals may be extended by the Planning Authority up to two times, for up to two years from the date of expiration of the original master development plan approval.* (sec. 14.13.4).

The Code in effect in December 2016 states:

> *Master Development Plan approval may be sought separately or currently with the Phase I Final Level III site plan approval, and shall have an initial approval period of six (6) years, with potential extension periods as provided for in section 14-532(d). (14-524(f)(i))*
>
> *Prior to the expiration of the Master Development Plan, an applicant may submit a written request to the Planning Authority for an extension of a Master Development Plan approval and associated waivers. Only two (2) such extensions may be granted by the Planning Authority, and*

each such extension shall be limited to two (2) years from the date of expiration of the Master Development Plan. (14-532(d))

The expiration language currently in effect means that once site work has commenced, the MDP won't expire, whereas the 2016 MDP expiration language included a finite 10 year end, assuming two two-year extensions were granted. Under the current and 2016 versions of the Code, Individual Site Plan approvals, including those that are part of an MDP, expire in one year, with possible extensions up to a maximum of three years. Lapses in construction for a period in excess of 12 months will also result in a site plan expiration. (2016 14-532(c)(1), 2023 14.12.1; 14.13.3)

Pending Proceeding

Pending proceeding is a term that, in context of development applications, indicates that substantive review has begun, which, in turn, determines which set of regulations an application is reviewed under. For the purposes of applications that are within the jurisdiction of a land use (Historic or Planning) Board, pending proceeding status is conferred when the Board holds its first review, whether that is a workshop or public hearing. For the purposes of administrative/staff reviewed applications, this occurs when the first substantive comments are provided. For applications in-review when the City adopts, through Council action or referendum, amendments to the City Code, it is important to understand whether an application is pending in order to determine what standards they are held to. A submitted application, accepted for the purposes of beginning review, does not have pending proceeding status, but a development application that has been before the Board for an initial workshop does, and may continue in the review and approval process under the Code in effect at the time of the first workshop.

Determining when an application has pending proceeding status is not outlined in the Land Use Code, but there are two references to the term in the Land Use Code: 1) Section 14.5.1 states that voluntary, non-binding pre-application meetings do not confer pending proceeding status; and 2) Section 14.3.2 (formerly 2016 Section 14.524(f)(iv)) states MDP a*pproval shall confer pending proceeding status upon the development with the effect of maintaining the applicability of regulations in effect at the time of approval for as long as the master development plan approval remains valid, including permissible extensions if granted*.

Sec. 14.3.2 is the reason a subsequent site plan application (or subdivision application where applicable) that is a component of an MDP is still reviewed under the regulations in effect at the time of the MDP approval, even if standards of the Code are amended over time. Pending proceeding status is one of the benefits of an MDP approval, and it offers a degree of regulatory predictability for both property developers and the City for these large multi-year phased projects. Without pending proceeding status, it would be difficult to predict all of the potential regulatory changes that could impact a project that is expected to be built out over years. For instance, if maximum heights were reduced, or minimum parking standards increased (to name a few examples of standards that could change over time in the City's Code), site plans that are phases of previously approved MDPs are not held to more stringent or restrictive standards that were adopted during a valid MDP approval period.

Though an MDP and its associated applications have pending proceeding status for the life of the MDP's approval, nothing *prohibits* an applicant of an MDP approved under a previous version of the Code from seeking review under the current version of the Code. Becoming more conforming with the adopted Land Use Code is generally something the standards encourage; a previous approval may proceed under the Code it was reviewed under, but it is not compelled to remain non-compliant with current standards.

In the event an applicant proposes to develop a site to meet current regulations that differ from the regulations in effect at the time of MDP approval, they may do so. However, substantive changes to an approved MDP would require an amendment, and substantive amendments related to areas of the Code that have been changed since the application was originally approved would be reviewed under the current Code. An applicant with an approved site plan who wishes to make use of a new provision in the Land Use Code is also free to apply for an amendment, and this also could subject them to new sections of the current Code if the amendment broaches sections that have since been amended. For example, a proposed change to the total housing units would be reviewed for consistency not only with residential density standards, but with other applicable Code requirements such as inclusionary zoning; or, as previously mentioned, if maximum heights were lowered since an approval was granted, and an amendment to a prior approval was submitted to alter heights of buildings, the new standards would apply.

CBL: 201-A-5
Applicant: Forefront Partners I, LP
Planner: Nell Donaldson

Dear Mr. Thompson:

On February 11 and March 11, 2014, the Planning Board considered your master development plan application for the Forefront at Thompson's Point. The Planning Board reviewed the proposal for conformance with the master development plan standards of the city's land use code, made findings that the proposal met the required standards and voted to approve the application with the conditions presented below.

MASTER PLAN

The Planning Board voted (6-0, Boepple abstained) that the proposed plans are in conformance with the master plan standards of the city's land use code, subject to the following conditions of approval, which must be met prior to subdivision approval, unless otherwise stated:

1. The applicant shall provide a summary of existing and/or proposed easements, covenants, public or private rights-of-way, or other burdens on the site, including the proposed easement to the Department of Public Services to use the private drive system for turn-around access and easements and conditions relating to public use of trails and open space on the site, for review and approval by the Department of Public Services and the Planning Authority;

2. The applicant shall provide evidence of water capacity from the Portland Water District, for review and approval by the Planning Authority;

3. The applicant shall provide evidence of sewer capacity from the Department of Public Services, for review and approval by the Planning Authority;

4. The applicant shall submit a revised report from a certified fire protection engineer describing evacuation procedures; add a note to the master development plan indicating that all buildings will include sprinkler and fire alarm systems, except for buildings determined by the Fire Prevention Bureau to be exempt from such regulations; and revise the event management plan to indicate that free and clear fire access will be maintained at all times during events, for review and approval by the city's Fire Prevention Bureau;

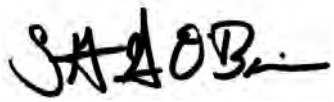
5. The off-site transportation-related improvements as heretofore required through prior approvals shall represent the off-site transportation-related improvements required for the master development plan and subsequent Level III subdivision and site plan review, so long as the existing Traffic Movement Permit applies; additional requirements for on-site transportation improvements shall be addressed through subdivision and site plan review.

The approval is based on the submitted plans and findings related to master development plan standards as contained in the Planning Board Report and Addendum for application 2013-262, which are attached.

STANDARD CONDITIONS OF APPROVAL & REQUIREMENTS
Please note the following standard conditions of approval and requirements for all approved master development plans:

1. **Separate Level III Subdivision/Site Plan Approvals Required** This approval establishes the general parameters to be adhered to for the development, including the supporting documentation for floor area ratio and/or residential density, general types of uses, building coverage, generalized open space plans and infrastructure systems. This master development plan approval shall not be construed as final authorization of the development. Approval shall confer pending proceeding status upon the development with the effect of maintaining the applicability of regulations in effect at the time of approval for as long as the master development plan approval remains valid, including permissible extensions if granted. Separate Level III subdivision and site plan approvals are required. Level III subdivision and site plans for each phase shall be in general conformance with the master development plan.

2. **Master Development Plan Amendments** A minor amendment to a master development Plan shall be defined as a change which is generally consistent with the approved master development plan layout of buildings, circulation infrastructure, and open spaces, and:



i. Does not propose any new general type of use beyond those approved initially;
ii. Does not increase the building ground coverage, floor area ratio or residential density of the Master Development Plan;
iii. Does not decrease any specified area regulations or enumerated parking ratios; and
iv. Does not substantially change access, circulation, or infrastructure on or adjacent to the site.

The Planning Authority shall be authorized to approve such minor amendments to a master development plan upon written application and explanation of the change(s) by the owner (or its agent) of the property. No further public hearings shall be required.

3. **Master Development Plan Expiration** An approved master development plan shall expire six (6) years from the date of approval unless, prior to the expiration of the master development plan, a written request for an extension is submitted to the Planning Authority. Only two (2) such extensions may be granted by the Planning Authority, and each such extension shall be limited to two (2) years from the date of expiration of the master development plan. The Planning Authority may grant an extension provided there have not been substantial changes to the underlying zoning or site plan standards since the date of the master development plan approval that would have a substantial impact on the approval. The Planning Authority may condition the extension on an amendment of the master development plan to comply with such applicable ordinance or site plan standard changes per *Section 14-532(d)* of the city's land use ordinance. Approved major or minor amendments to a master development plan do not alter the expiration date for the master development plan.

If there are any questions, please contact Nell Donaldson at (207) 874-8723.

Sincerely,

Stuart O'Brien, Chair
Portland Planning Board

Re:	Addendum to 2/11/14 Board report, Thompson's Point Master Development Plan
Project #:	2013-262 **CBL:** 201 A 005001
Meeting Date:	March 11, 2014

I. INTRODUCTION

On February 11, 2014, the Planning Board held a final hearing on the master development plan for the Forefront at Thompson's Point. This plan, which had been reviewed by the board at a previous workshop held on January 28, 2014, represented a reiteration of a prior, approved subdivision for the site. As such, the application relied heavily on materials submitted as a product of earlier reviews. Due to time constraints, the Planning Board was not able to deliberate fully on the final master development plan during the February 11 hearing. However, several questions, mainly related to potential transportation impacts and the approach to the site's existing Traffic Movement Permit (TMP), the form and scale of the proposed buildings, and the process of managing future amendments to the master development plan, were raised. The board elected to table the plan and requested that the applicant consider these aspects of the project and return to the board at the next available hearing date on February 25. The applicant subsequently requested to be moved to the March 11 hearing, based on staff availability and a desire to develop additional supporting materials.

This addendum to the February 11 Planning Board report reviews additional materials submitted by the applicant and discusses items which were raised in the Board hearing or in the intervening time. On the basis of these materials and items, this addendum also presents a revised motion with updated conditions of approval.

II. REVISED SUBMITTALS

Following several meetings with planning staff, the applicant provided additional supporting materials to the Planning Division during the week of March 3. The materials included a revised trip generation analysis for the master development plan, intended to fit within the limits of the existing TMP, a revised parking analysis, additional renderings, and revised master plan graphics. These materials are discussed in detail below.

1. Revised Trip Generation Analysis

At the February 11 hearing, board members and members of the public raised a number of concerns regarding potential traffic and transportation impacts resulting from the project. Staff's report to the board, which referenced comments from Thomas Errico, consulting traffic engineer, provided brief overviews of the master plan's approach to transportation infrastructure; the existing Traffic Movement Permit (TMP), including off-site mitigation currently funded through the EDA grant and FHWA funding processes; the parking plan; the draft events management plan; and the draft transportation demand management plan *(Attachment 1)*. It should be reiterated that Mr. Errico expressed his satisfaction with the applicant's request to rely on the previously-developed events management and transportation demand management plans; Mr. Errico's comments note that these plans will be more fully vetted under subdivision and site plan review.

Existing Traffic Movement Permit (TMP)
As previously discussed, the applicant's plan relies heavily on the existing Traffic Movement Permit for the site, developed as a product of previous reviews. This permit, which was issued by the Maine Department of Transportation in June of 2012, includes a number of assumptions regarding uses *(Attachment 1, See J under 'Applicants' Submittals')*. Based on these assumptions, the TMP permits a certain number of AM and PM peak hour weekday trips (734 AM and 1,091 PM trips to be exact). It should be noted that the permit speaks to allowable trips and not to specific uses; modification of uses is permissible under the existing TMP so long as the program does not generate traffic exceeding the number of permitted AM and PM trips.

Based on the projected trip generation and the quantity of permitted trips, the TMP requires a substantial degree of on-site and off-site mitigation. This includes:

1. Overhead illumination for all entrances;
2. Widening of the Thompson's Point Connector Road to include an 8 ft. shared bike/pedestrian path; 3 ft. shoulders, two 11 ft. travel lanes, and one 11 ft. concrete flush median (which would transition to an exclusive outbound left-turn lane at the Fore River Parkway and be used as a reversible lane during events);
3. A provision that no concerts/sporting events be held between 4-7 pm Monday-Friday;
4. A provision that, during 'large' concerts/sporting events, flaggers and uniformed police officers be present to manage the reversible lane on the Thompson's Point Connector Road; help pedestrians cross at crosswalks, manage inbound and outbound buses at the Portland Transportation Center (PTC) entrance, assist PTC patrons leaving the PTC parking lot in merging with the outbound flow, and direct traffic at the Thompson's Point Connector Road/Fore River Parkway;
5. Improvements to the Fore River Parkway/Thompson's Point Connector Road/I-295 Exit 5A SB intersection, including the reconstruction of the southbound off-ramp to include a separate 13 ft. left turn lane and a 13 ft. through lane, the addition of a queue detector to pre-empt the signal as necessary, and the modification of signal phasing;
6. Improvements to the Fore River Parkway/Congress Street/I-295 Exit 5B intersection, including widening the southbound off-ramp to include two 12 ft. right-turn lanes, the installation of a queue detector to pre-empt the signal as necessary, modification of signal phasing, and the restriping of Congress Street westbound to lengthen the existing left-turn lane;
7. Improvements to the Congress Street/Stevens Avenue intersection, including restriping Stevens Avenue to create an exclusive left turn lane and a shared left-through-right lane, modification of signal phasing, and payment of an impact fee of $15,000 for inlaid thermoplastic paint skips, retro-reflective back plates, and overhead lane signage;
8. Payment of an impact fee of $15,000 for inlaid thermoplastic paint skips, retro-reflective back plates, and overhead lane signage at the Congress Street/Westbrook Street intersection;
9. Payment of an impact fee of $15,000 for inlaid thermoplastic paint skips, retro-reflective back plates, and overhead lane signage at the Congress Street/Frost Street intersection; and
10. A provision that transportation demand management strategies be used to offset additional traffic impacts.

The TMP also states explicitly that, if any supporting data changes, the applicant shall "request in writing from MaineDOT a decision of what impacts those changes will have on the permit. The applicant will then be required to submit those changes for review and approval and additional mitigation as a result of those changes may be required at the expense of the applicant."

In terms of history, it should be noted that staff's final report to the Planning Board on the original subdivision/Level III site plan for the project, published in June 2012, discussed the improvements required as a product of the TMP. The report did not raise significant issues related to the off-site

mitigation requirements.

It should also be noted that, as a product of the original planning process, additional off-site traffic investments are planned which will provide capacity that will benefit the Forefront at Thompson's Point. These investments include sidewalk improvements, trail connections, and lighting improvements.

As discussed in the February 11 Planning Board report, the applicant originally proposed a development program for the master plan that resulted in trip generation exceeding the existing TMP thresholds cited above. The applicant suggested a monitoring approach and, as necessary, modification of the TMP under site plan review at later phases of the project. The city's consulting traffic engineer, Tom Errico, generally agreed with this approach. However, he requested a letter from MDOT verifying their concurrence and suggested that monitoring occur at each phase of site plan review to ensure that trip generation thresholds not be exceeded. These recommendations were included in the February 11 Board report as conditions of approval.

Revised Trip Generation Analysis
Recognizing that, regardless of Mr. Errico's or MDOT's comfort with the approach to the TMP, the Board and public had concerns regarding modifications to the TMP at later stages of buildout, the applicant has chosen to submit supplemental materials which alter their development program and reassess their trip generation numbers in an effort to fit within the trip generation thresholds of the existing TMP. The applicant's revised trip generation analysis describes their approach (*Attachment B).*

In their revised analysis, the applicant has generally achieved a reduction in trip generation through three mechanisms: the modification of uses, reduction in occupancy, and the reassessment of projected trip generation numbers using revised trip generation ratios from the Institute of Traffic Engineers (ITE). Together, these have the effect of reducing the projected AM peak hour trip generation from 1,146 to 800 and the PM peak hour trip generation from 1,314 to 1,015. The trip generation changes include the following:

- In the original master plan submittal, Building B3 was proposed as a 6,000 SF restaurant generating 69 AM and 66 PM peak hour trips. In the applicant's revised trip generation analysis, the building's use has been changed such that it will be "ancillary to the Depot building and will not generate additional traffic" *(Attachment B)*. In conversation, the applicant has further explained that this building will serve as back-of-house operations for the performance space contained in the adjacent Depot. As such, no trips are estimated to be generated as a product of this building.
- In the original master plan submittal, Building C1, the Circus Conservatory of America, was estimated to generate 123 AM and 104 PM peak hour trips. These trip generation figures were based on ITE rates for community colleges using square footage as the independent variable. In the revised submittal, the applicant has recalculated trip generation figures using the ITE rate for community colleges, but basing the total on student population and staffing numbers rather than on square footage. This results in a decrease in trip generation to 25 AM and 21 PM trips.
- The original master plan submittal projected 70 AM peak hour trips as a product of Building E1, the hotel. In the revised trip generation analysis, this figure has been reduced to 54 using an ITE-based trip generation rate referenced in prior approvals.
- Under the original master plan application, the event center was proposed with an occupancy of 2,866 and projected to generate 115 AM and 224 PM peak hour trips. In the revised submittal, the occupancy has been reduced to 2,500, resulting in a decrease in trip generation to 100 AM and 195 PM peak hour trips.
- Lastly, in the original master plan submittal, Building J1 was proposed as a 160,000 SF office building. In the revised trip generation analysis, this building has been converted to 160 residential condominium units. Based on ITE ratios, this results in a decrease in AM peak hour

trips from 273 to 70 and in PM peak hour trips from 258 to 83.

It should be noted that the revised trip generation analysis also assumes a 100 trip "buffer" customarily provided by MDOT when considering TMP thresholds. While the revised cumulative PM trip generation figure stands well below the TMP threshold of 1,091 trips, the total AM trip generation figure of 800 actually exceeds the 734 trips permitted under the TMP. The buffer is needed in this case in order to accommodate these excess trips.

The applicant states in their revised trip generation analysis that "[t]he MaineDOT requires any development that exceeds their permitted trips by more than 99 trip ends in any peak hour to receive a permit modification. Since the proposed Master Plan does not exceed the 99 trip end threshold, a MaineDOT permit modification is not required. This was confirmed with MaineDOT" *(Attachment B).*

Tom Errico, consulting traffic engineer, has reviewed the revised trip generation analysis. He writes,

> *The applicant has revised the trip generation analysis to reflect the current development program and I concur with the methods used and the conclusions. Accordingly, the proposed project will comply with the MaineDOT Traffic Movement Permit (TMP) from a trip generation threshold perspective. In the issuance of a TMP, MaineDOT allows for a "buffer" of 100 trips above that noted in the Permit before a modified permit is required. As detailed by the applicant, the Project will generate less trips during the AM and PM peak hours when considering the buffer trips. I find the Master Plan to be in compliance with the TMP.*

NNEPRA/Portland Transportation Center Consultation
At the hearing on February 11, Board members raised questions regarding the involvement of Northern New England Passenger Rail Authority (NNEPRA) and the Portland Transportation Center in the planning of traffic mitigation measures. In terms of history, a stakeholder meeting was held in September of 2011, as the traffic movement permit was being developed, in order to discuss potential improvements and user conflicts on the Thompson's Point Connector Road and its surroundings. Representatives of NNEPRA, Concord Coach Lines (who owns the adjacent Portland Transportation Center), Amtrak, the city, and MDOT attended.

It should be noted that this meeting coincided with NNEPRA's *Portland Station Location Evaluation,* which considered future rail service in the context of several alternatives to the existing Portland Transportation Center site. The NNEPRA study, concluded in October of 2011, resulted in the decision to remain in the current location and invest in its improvement as a "thriving transportation hub." This decision was based, at least in part, on the "potential for increased transit connections, expansion and development associated with the Forefront project." NNEPRA's Executive Director, Patricia Quinn, has more recently indicated her organization's endorsement of the project as revised under the master plan, noting that the "project as proposed provides wonderful and exciting opportunities for the Downeaster, the City of Portland, and all of southeastern Maine" *(Attachment PC-1).*

In terms of coordination with the Portland Transportation Center, as mentioned during the February 11 hearing, the PTC contracted with Sebago Technics to conduct an independent assessment of the Thompson's Point traffic impact study during the initial subdivision and site plan review. The TMP was revised following the release of this report in an effort to accommodate concerns raised by the PTC.

Revised conditions of approval
Given Mr. Errico's review of the revised trip generation analysis, original conditions from the February 11 Board report that required written approval from MDOT regarding the TMP approach and traffic

monitoring are no longer germane. (It should be noted that compliance with the TMP will be assessed as the applicant proceeds through site plan review.) As such, these conditions of approval have been eliminated.

Further, at the applicant's request, staff has added a condition of approval related to the off-site transportation improvements required through the TMP and prior planning work, to which the applicant has made significant financial commitment. This condition is intended to define the off-site mitigation required so long as the existing TMP applies.

2. Revised Parking Analysis

The applicant's additional materials also include a revised parking analysis that recalculates peak parking demand *(Attachments C and D)*. In the original master plan submittal, the peak parking demand, represented by an average day with a live theater event after 5 PM, was estimated at 1,877 spaces. In the revised analysis, this figure has dropped to 1,822 spaces "as a result of [a] minor modification of the "outbuildings" near the old Union Station Depot outdoor event structure at the tip of the point (the removal of the second restaurant use and its consolidation with the proposed boathouse/café structure next to the "Depot")" *(Attachment C).*

Mr. Errico noted in his comments in the February 11 Board report that the peak parking demand exceeds the proposed parking supply at full buildout, 1,290 spaces. Even under the revised parking analysis, this remains the case. Mr. Errico stated previously that "during the site plan approval process the applicant will be required to demonstrate that adequate parking supply will be provided for the proposed uses" *(Attachment 1).* Again, this will remain the case. The applicant has indicated that they intend to use a combination of transportation demand management strategies, many of which are outlined in the transportation demand management plan, to accommodate peak parking demand without "over-building" parking infrastructure. It should be noted that the proposed parking supply is more than adequate to meet the projected demand on the average day without events. Mr. Errico has reviewed the revised parking analysis and writes,

> *I have reviewed the parking demand analysis and I find the method and estimates to be reasonable. I would note that the evaluation of parking supply adequacy will be conducted during each phase of the project. In general the project will provide sufficient parking for typical days and during large events a host of strategies will be employed that may include off-site parking with shuttle services. The on-going review will be linked to the TDM plan and Event Management Plan and will be adjusted as actual parking needs and management are better understood. Accordingly, I find the parking program under the Master Plan to be acceptable.*

3. Additional Renderings

At the February 11, 2014 hearing, Board members also raised questions regarding the design and massing of the proposed master plan, particularly as seen from the adjacent neighborhood to the north. In response, the applicant has provided renderings showing the site from residential streets across the railroad tracks *(Attachment E)*. It should be noted that the applicant has also provided links to the walk-throughs shown at the February 11 hearing.

4. Revised Plans

In keeping with the changes to the development program as represented in the revised trip generation and parking analyses, the applicant has provided updated master plan graphics *(Plans 1 and 2).* The updated development program includes changes in uses for Buildings B3 (from restaurant to "ancillary") and J1 (from office to residential) and slight changes in the program for Building J2 (from 120 to160 residential units) and the event center (a decrease in occupancy). Altogether, these changes result in less commercial

square footage and more residential density. The increased emphasis on residential development advances the notion of the site as a transit-oriented development and in many ways allows for a more efficient use of the site overall. The revised development program is as follows:

Table 1: Forefront at Thompson's Point, Proposed Development Program

	Building	Height	Floor area	Footprint	Units	Rooms	Seats	Surface parking	Garage parking	Total parking
1A	Building A: Office, Café, Retail	Existing	34,000	34,000				71		*71*
1B	Building B1: Multi-Purpose (Live Theater)	Existing	14,000	14,000				436		*507*
	Boat Launch									
1C	Building C: Educational	1-2 Floors	41,000	33,750				(175)		*332*

2C	Building B3: Ancillary to B1	1 Floor	6,000	6,000						*1,290*
	TOTAL		***973,205***	***303,189***	***344***	***125***	***4,800***	***434***	***856***	***1,290***

III. ADDITIONAL DISCUSSION ITEMS & MODIFICATIONS TO CONDITIONS

In addition to the supplemental materials provided by the applicant, there are several discussion items which have emerged in the time since the February 11 hearing. All of these relate to the original conditions of approval from the February 11 Board report.

1. Trail and Open Space Access

Following the hearing, representatives of Portland Trails and the city's Department of Public Services raised questions regarding bike and pedestrian access along the northern edge of the site *(Attachment 3)*. The city's *Bicycle and Pedestrian Plan* and PACTS's *Regional Bicycle and Pedestrian Plan* identify the existing rail line in this location as an alignment for a future bike/pedestrian trail link, and Portland Trails and the city's Department of Public Services expressed a desire to identify this link in some capacity in the master plan. The link would serve a different purpose from the proposed perimeter trail, which has

always been a foundational element of the master plan; a bicycle/pedestrian way along the rail corridor, when combined with other bicycle and pedestrian links defined in regional long-range planning efforts, would provide a commutable alternative to Congress Street, with direct access from outlying neighborhoods to the peninsula.

In conversations following the correspondence with DPS and Portland Trails, the applicant stated clearly that a lack of space precludes the creation of a dedicated trail or bicycle lane paralleling the railroad tracks at the northern edge of the site. However, they also expressed a willingness, in concept, to create a bicycle/pedestrian way in some capacity, through pavement markings, signage, or other mechanisms, that would establish a more direct east-west route and link with the greater Portland Trails network. It is assumed that the details of this arrangement would be resolved under Level III site plan/subdivision review.

Also related to trails and open spaces, staff requested clarification from the applicant on the terms of public access to the perimeter trail, boat launch, and water on Thompson's Point. In conversation, the applicant stated explicitly that, as will be the case under the easement for the panhandle trail, the boat launch, water access, and perimeter trail will be accessible for public use through a license or other such agreement. That agreement would include provisions reserving the right of the applicant to limit public access at particular times (e.g. during events on site).

2. Fire

Staff has suggested a minor modification to the condition of approval relating to fire safety, based on conversations conducted with Chris Pirone of the Fire Prevention Bureau regarding the Depot building at the southern end of the peninsula. Captain Pirone has indicated that this building may not require a sprinkler, depending on its use. As such, staff has modified the condition of approval to state that all buildings will be sprinklered except as determined to be exempt by the Fire Prevention Bureau.

3. Phasing Plan

Lastly, staff was able to review the master phasing plan; as a result, the original condition of approval relating to this phasing plan has been eliminated.

IV. MASTER DEVELOPMENT PLAN AMENDMENTS

As noted in the February 11 report, the city's site plan ordinance includes language related to the procedure for processing master plan amendments (*Section 14-532(b)*). The ordinance defines "minor" amendments, or those that simply require administrative approval, as those which are "generally consistent" with the approved master plan layout, circulation, infrastructure, and open spaces. A minor amendment is qualified as a change which:

> *(i) Does not propose any new general type of use beyond those approved initially;*
> *(ii) Does not increase the building ground coverage, floor area ratio or residential density of the Master Development Plan;*
> *(iii) Does not decrease any specified area regulations or enumerated parking ratios; and*
> *(iv) Does not substantially change access, circulation, or infrastructure on or adjacent to the site.*

It is implied that changes which do not meet these conditions would require Planning Board review.

However, at the February 11 hearing, both board members and the applicant pressed for further clarification on thresholds triggering board review of future master plan changes. In internal discussions, as well as in discussions with the applicant, staff considered a series of thresholds, such as when an applicant proposes an increase in net square footage, a change of use, changes in trip generation, or

substantial changes in circulation or the location of buildings. On closer inspection, however, this list of potential additional thresholds was found to closely mirror the language of the existing ordinance. As such, no condition of approval related to amendments is suggested here.

V. STAFF RECOMMENDATION

Subject to the proposed motions and conditions of approval listed below, Planning Division staff recommends that the Planning Board approve the master development plan for the Forefront at Thompson's Point.

VI. PROPOSED MOTION – MASTER DEVELOPMENT PLAN

On the basis of the application, plans, reports and other information submitted by the applicant; findings and recommendations contained in the Planning Board report for the public hearing on February 11, 2014 and the addendum to said report for the public hearing on March 11, 2014 for application 2013-262 relevant to the master development plan regulations; and the testimony presented at the Planning Board hearing, the Planning Board finds that the plan **is/is not** in conformance with the master development plan standards of the land use code, subject to the following conditions of approval, which must be met prior to subdivision approval unless otherwise stated:

1. The applicant shall provide a summary of existing and/or proposed easements, covenants, public or private rights-of-way, or other burdens on the site, including the proposed easement to the Department of Public Services to use the private drive system for turn-around access and easements and conditions relating to public use of trails and open space on the site, for review and approval by the Department of Public Services and the Planning Authority;

2. The applicant shall provide evidence of water capacity from the Portland Water District, for review and approval by the Planning Authority;

3. The applicant shall provide evidence of sewer capacity from the Department of Public Services, for review and approval by the Planning Authority;

4. The applicant shall submit a revised report from a certified fire protection engineer describing evacuation procedures; add a note to the master development plan indicating that all buildings will include sprinkler and fire alarm systems, except for buildings determined by the Fire Prevention Bureau to be exempt from such regulations; and revise the event management plan to indicate that free and clear fire access will be maintained at all times during events, for review and approval by the city's Fire Prevention Bureau;

5. The off-site transportation-related improvements as heretofore required through prior approvals shall represent the off-site transportation-related improvements required for the master development plan, so long as the existing Traffic Movement Permit applies; additional requirements for on-site transportation improvements shall be addressed through subdivision and site plan review.

PLANNING BOARD REPORT
PORTLAND, MAINE

The Forefront at Thompson's Point, Portland, Maine
Master Development Plan
Application #2013-262
Thompson's Point Development Company, Inc., d/b/a Forefront Partners I, LP, Applicant

Submitted to: Portland Planning Board: Public Hearing Date: February 11, 2014 CBL: 201-A-5	Prepared by: Nell Donaldson, Planner Date: February 7, 2014

I. INTRODUCTION

The Thompson's Point Development Company, Inc, doing business as Forefront Partners I, LP, appears before the Planning Board for a final review of the proposed master development plan for the Forefront at Thompson's Point. The plans represent a final iteration of a preliminary application that was presented to the board at a workshop on January 28, 2014.

Thompson's Point consists of approximately 30 acres of land located adjacent to the Portland Transportation Center. The applicant's master development plan for the Forefront at Thompson's Point involves a mixed-use development including an event center, hotel, sports medicine facility, parking structure, educational facility, residential units, restaurants, and office uses.

The project is subject to master development plan review under *Section 14-524* of the city's ordinance. A total of 262 notices were sent to property owners within 500 feet of the site and a legal ad for the Planning Board hearing ran on February 3 and 4, 2014.

Applicant: Forefront Partners, I LP
Consultants: Stephen Bushey, FST, Inc; Owens McCullough, Sebago Technics; Bill Hopkins, Archetype

II. REQUIRED REVIEWS

Review	***Applicable Standards***
Master Development Plan	*Section 14-524(a)3c(iii)*
Site Location of Development Act	*Technical Manual Chapter 14 (to be completed at time of subdivision review)*

III. PROJECT DATA

Existing Zoning	B-5 Urban Mixed Use
Existing Use	Manufacturing, construction, and storage
Proposed Use	Mixed-Use/TOD
Parcel Size	32.67 acres

	Existing	*Proposed*	*Net Change*
Building Footprint	123,684 SF	303,189 SF	179,505 SF
Building Floor Area	123,684 SF	973,205 SF	849,521 SF
Impervious Surface Area	908,661 SF	761,430 SF	-147,231 SF
Parking Spaces	Undetermined	1,290	
Estimated Cost of Project	$100-110 million		

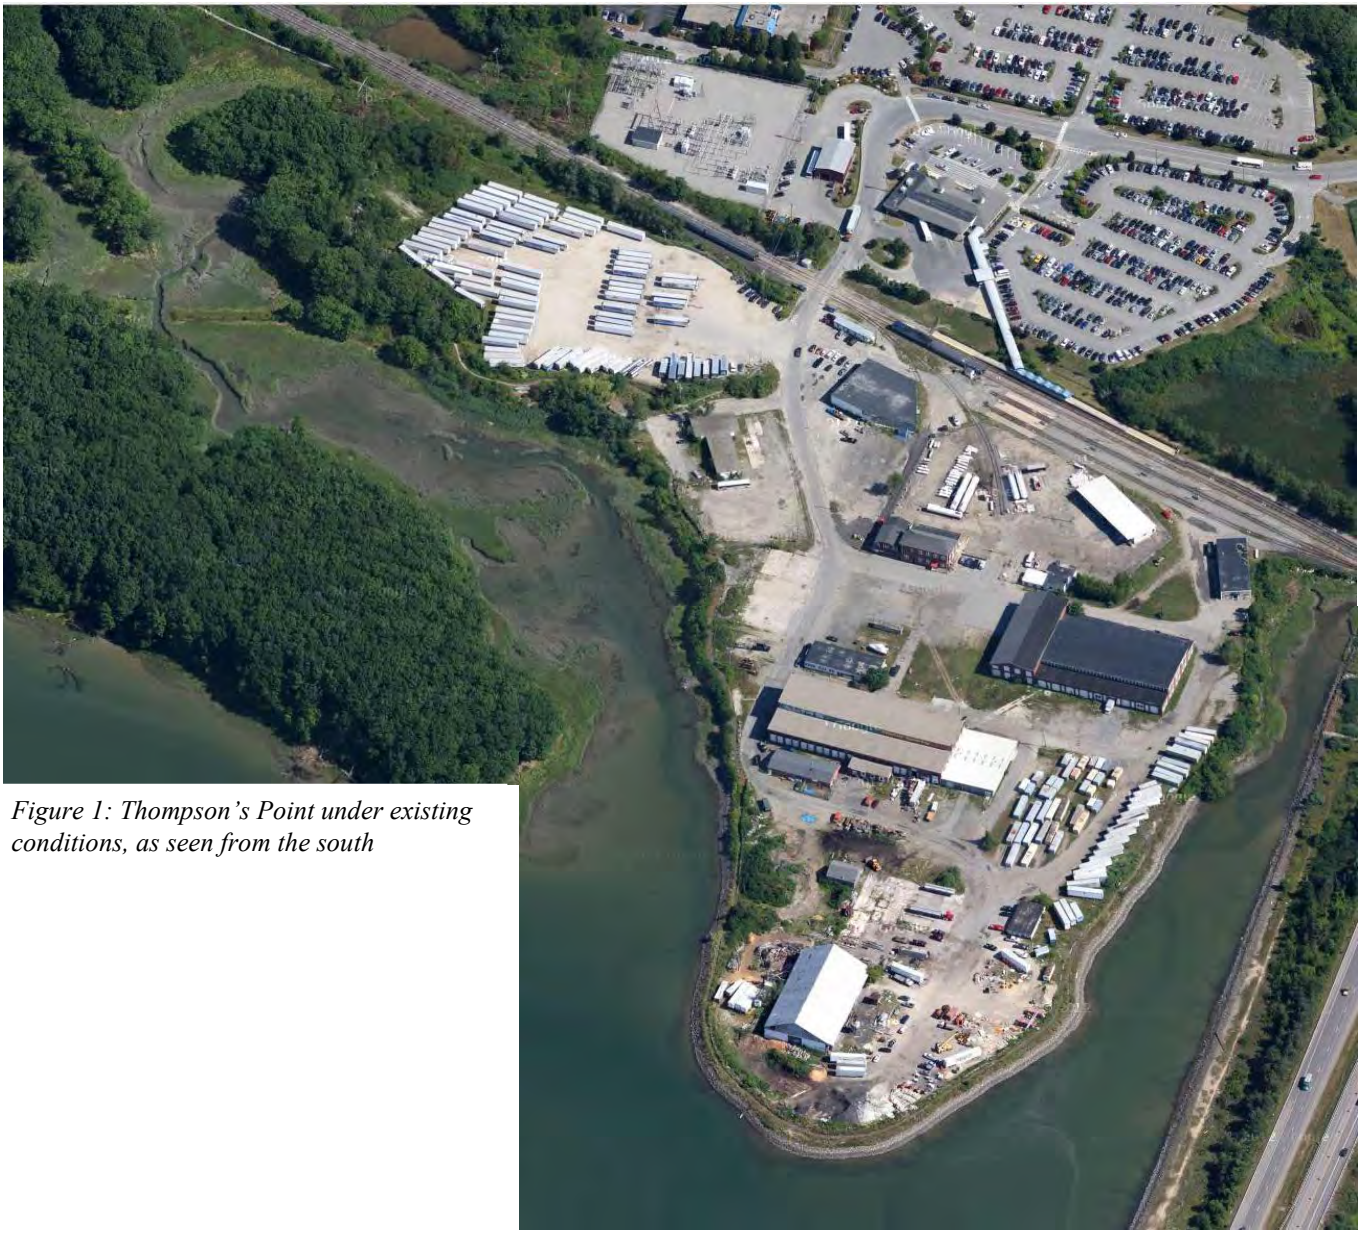

Figure 1: Thompson's Point under existing conditions, as seen from the south

IV. EXISTING CONDITIONS and BACKGROUND

Thompson's Point is a typical industrial site, bounded by railroad tracks to the north and the Fore River to the west, south, and east, and currently occupied by vacant buildings, semi-trailer box storage, and various other temporary uses *(Figure 1)*. The site does house an extension of the Fore River trail and some remnant natural areas on its western panhandle. It is a unique site in terms of its large size and its proximity to both the river and regional public transportation resources. It is zoned for urban commercial mixed-use development under the B-5 zone and is designated as a Tax Increment Financing (TIF) District.

The original plans for the Forefront at Thompson's Point, also submitted by the Thompson's Point Development Company, were approved on June 5, 2012. These plans included over 600,000 SF of non-garage building space dedicated to office, hotel, restaurant, and event center uses designed around a campus concept. In the spring of 2013, the proposed development program changed, and the applicant submitted reconfigured subdivision and site

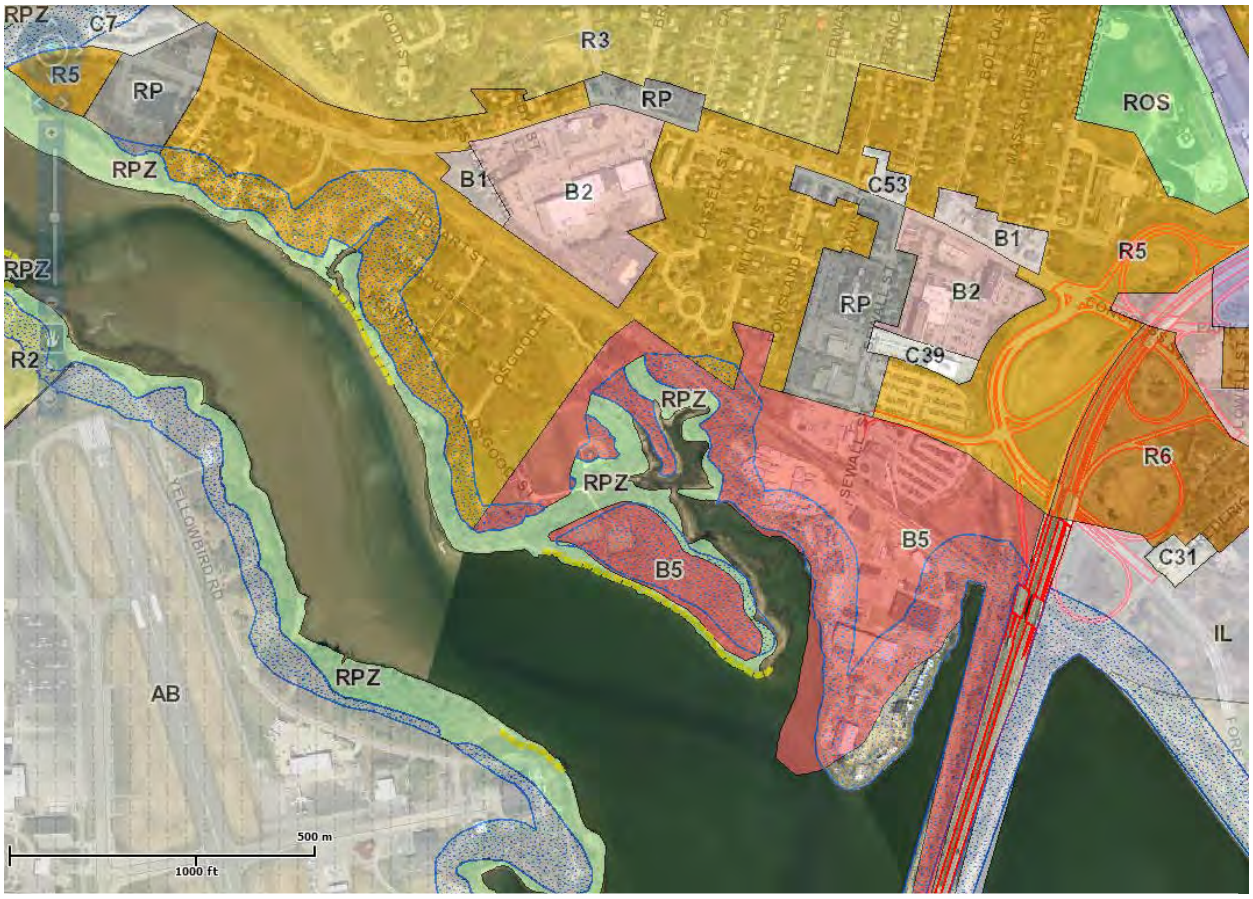

Figure 2: Thompson's Point, zoning context

plans designed to, among other things, retain existing rail-era brick buildings on the site. Amended subdivision and site plans, modified to include these buildings, were approved administratively on June 19, 2013.

In the time since these approvals, efforts to start work on off-site transportation-related improvements required through both MDOT Traffic Movement Permit (TMP) and city review processes has begun. These improvements are funded almost entirely by an EDA grant and include work to enhance bicycle and pedestrian connections, vehicular access to the adjacent highway and street networks, and the surrounding streetscape. The work is scheduled to begin in March 2014 and continue throughout the year.

V. PROPOSED DEVELOPMENT

In the time since the original approvals, the applicant has also engaged in negotiations to obtain purchase and sale agreements for two adjacent parcels critical to the development of the entire Thompson's Point peninsula. The recent acquisition of development rights to these parcels, owned by Suburban Propane and Northern New England Passenger Rail Authority (NNEPRA), has allowed the applicant to change its long-term vision for the site. In this vein, the applicant has submitted this new master development plan for the Forefront at Thompson's Point,. This plan encompasses many of the original programmatic elements of the approved subdivision. However, the physical design, affected by the additional acreage at the site's north end, is markedly different.

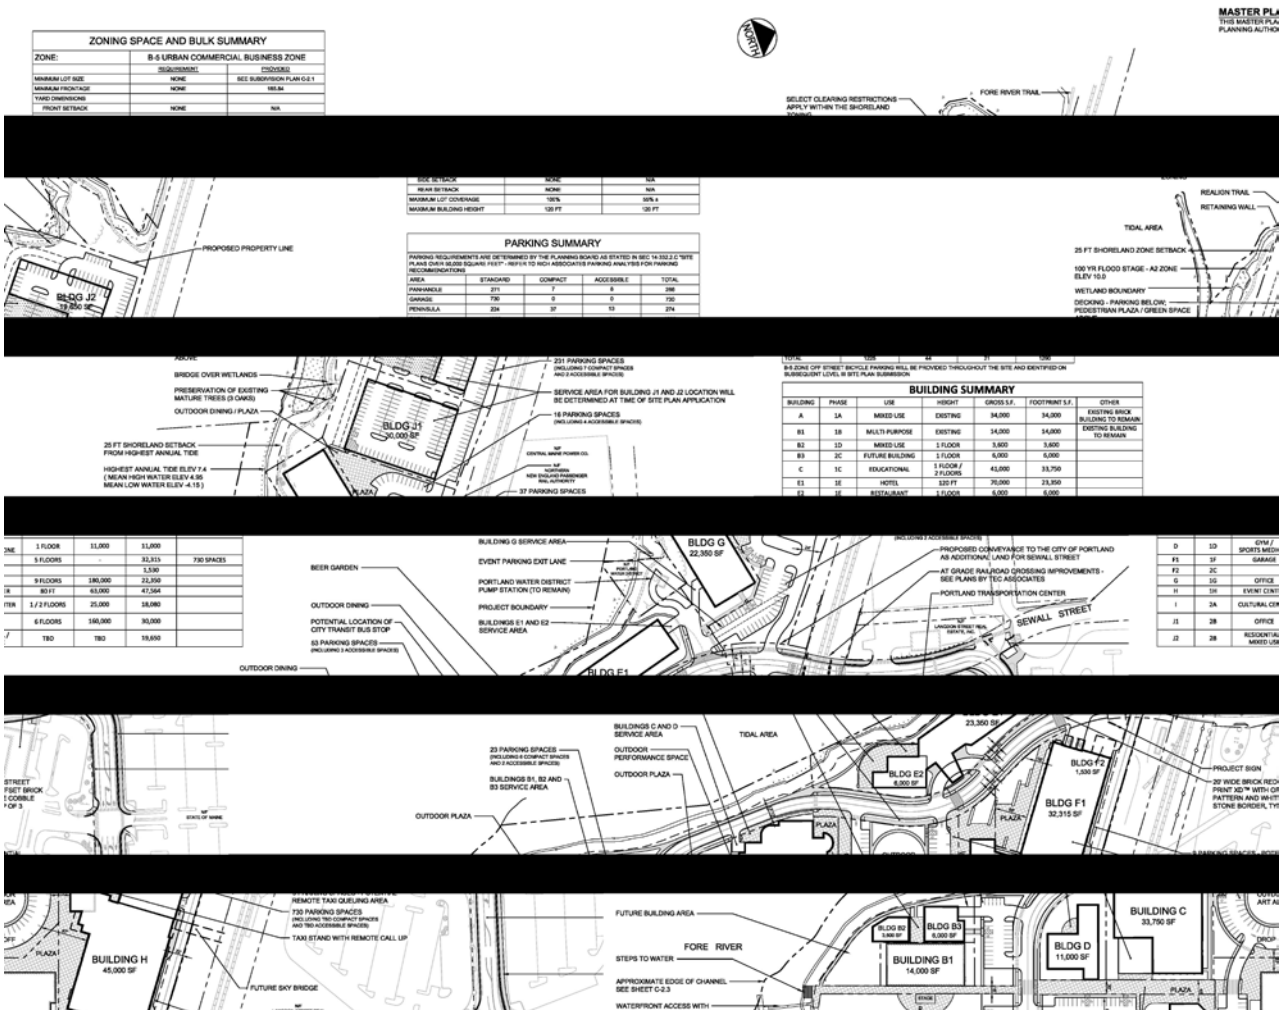

Figure 3: Revised Forefront at Thompson's Point master plan

The original Forefront at Thompson's Point plan demolished all existing structures and, as noted above, developed over 600,000 SF of non-garage square footage, comprised of institutional, office, restaurant, hotel, and event center uses. The centerpiece of the scheme was a 70,000 SF event center and concert hall. The plans included significant open space, surface parking, a perimeter trail, and public access to a shoreline boat launch. The amendments to these plans, approved in June of 2013, modified the plan to retain some of the existing buildings on site.

In the master development plan, much of this program remains. The applicant still envisions office, restaurant, educational/institutional, restaurant, hotel, event center, and garage space. The master development plan also includes live theater space, a post-secondary education complex, an 18,000 SF cultural center, and residential development. This 970,000 SF development program, by incorporating a more diverse mix of uses, including residential, advances the concept of the site as a transit-oriented development. The preliminary development program for the Forefront at Thompson's Point master plan is outlined in Table 1.

With the negotiations to acquire the Suburban Propane and NNEPRA sites and the decision to renovate four of the existing structures on the site under the master plan, the composition of the site has changed dramatically *(Figure 3)*. The master plan retains the trail surrounding the peninsula, but shortens the ring road. The development program is now organized around a stronger central core enclosed by the proposed event center and garage, a hotel and restaurant, the renovated Brick North building (to contain office, retail, and restaurant uses),

Table 1: Forefront at Thompson's Point, Proposed Development Program

Phase	Building	Height	Floor area	Footprint	Units	Rooms	Seats	Surface parking	Garage parking	Total parking
1A	Building A: Office, Café, Retail	Existing	34,000	34,000				71		*71*
1B	Building B1: Multi-Purpose (Live Theater)	Existing	14,000	14,000				436		*507*
	Boat Launch									
1C	Building C: Educational	1-2 Floors	41,000	33,750				(175)		*332*
1D	Building B2: Restaurant	1 Floor	3,600	3,600				(19)		*313*
	Building D: Gym & Medical Office	1 Floor	11,000	11,000						
	Portions of West Side Trail & Outdoor Stage									
1E	Building E1: Hotel & Condominiums	120 ft	70,000	23,350	24	125		144		*457*
	Building E2: Restaurant	1 Floor	6,000	6,000						
	Remainder of West Side Trail									
1F	Building F1: Parking Garage	5 Floors	161,575	32,315				15	730	*1,202*
	Building F2: Parking Garage		1,530	1,530						
1G	Building G: Office	9 Floors	180,000	22,350				58		*1,260*
1H	Building H: Event Center	80 ft	63,000	47,564			4,800	30		*1,290*
2A	Building I: Cultural Center	1-2 Floors	25,000	18,080						*1,290*
2B	Building J1: Office	6 Floors	160,000	30,000				(78)	78	*1,290*
	Building J2: Condominiums	TBD	196,500	19,650	120			(48)	48	
2C	Building B3: Restaurant	1 Floor	6,000	6,000						*1,290*
	TOTAL		***973,205***	***303,189***	***144***	***125***	***4,800***	***434***	***856***	***1,290***

the renovated Brick South building (to be occupied by the Circus Conservatory of America), the cultural center, and outdoor theater space/concert venue. Access from the Thompson's Point Connector Road is retained, and additional pedestrian access is provided via a sky bridge from the Portland Transportation Center.

This application is subject to master development plan review under *Section 14-524(a)3c(iii)* of the city's code. Following master development plan approval, the project will be reviewed under the city's subdivision and site plan ordinances. In addition to these municipal reviews, it should be noted that the original subdivision for the Forefront at Thompson's Point was reviewed under the state's Site Location of Development Act, for which the city had delegated review authority. Per correspondence with the Maine Department of Environmental Protection (MDEP), the city will remain the reviewing entity under the SLDA for the re-envisioned project considered here.

The original Forefront at Thompson's Point was also subject to the following state and federal permitting:

- U.S. Army Corps of Engineers General or Individual Permit (Wetland Impact)

- Natural Resources Protection Act (NRPA) Permit issued by Maine Department of Environmental Protection
- MDOT Traffic Movement Permit (issued by MDOT)
- MDEP Air Emissions License

The applicant has provided evidence of state and federal permits related to the approved subdivision plan *(Attachment J)*. In the final plan submission, the applicant has also provided a letter addressed to the Maine DEP outlining changes from the approved subdivision plan and the intent to comply with the conditions of the original NRPA permit *(Attachment L)*. Similar coordination with respect to other permitting entities will be required during subdivision review. Ultimately, evidence of new or updated permits, or documentation from reviewing entities regarding the applicability of the existing permits, will be required at the time of Level III subdivision and site plan review.

VI. PUBLIC COMMENT

The Planning Division has received no written comments from neighbors on the project. However, as noted in staff's prior workshop memo, the applicant has provided documentation from a neighborhood meeting held on December 23, 2013 *(Attachment J)*. The concerns expressed at this meeting generally focused on parking and traffic impacts, particularly during large events to be held on site. There was also some discussion of design and building height. These concerns were echoed during the board's workshop on January 28, 2014, where members of the public raised concerns regarding traffic impacts, event management, parking supply, trail access, and visual impacts from the abutting neighborhoods.

VII. RIGHT, TITLE, & INTEREST

The applicant has provided a deed demonstrating ownership of the original Thompson's Point site. In addition, the applicant has provided letters from Suburban Propane, Inc. and the Northern New England Passenger Rail Authority indicating that purchase and sale agreements have been signed for those adjacent parcels *(Attachment G)*.

VIII. FINANCIAL & TECHNICAL CAPACITY

The applicant has provided a copy of a letter from TD Bank attesting to the Thompson's Point Development Company's ability to complete the project and "see that it operates effectively over the long term" *(Attachment I)*.

IX. ZONING ANALYSIS

The Forefront at Thompson's Point lies in a B-5 zone, and is also subject to shoreland and floodplain regulations under the city's land use code. Marge Schmuckal, zoning administrator, has provided the following comments on the revised master plan:

> *I am under the realization that this review is only for a Master Plan and is not a site plan review. The applicant states that the team is working on an update to the acoustical study and compliance with B-5 Noise Performance Standards which will be forwarded upon completion. I will need that study during the Site Plan review stage.*
>
> *I have reviewed page C-3.00 where the HAT (Highest Annual Tide) for 2013 is denoted along with the 25 foot shoreland zone setback and the current 100 year flood elevation. All three of these meet the current Land Use Ordinance.*
>
> *The applicant mentions that they will comply with the Shoreland tree clearing certification as part of the Condition of Compliance. Again, I can confirm this regulation during the Site Plan Review process.*

In reference to off-street loading requirements, I will default the final review of this requirement, along with the other B-5 dimensional requirements during the Site Plan review application.

X. MASTER PLAN SUBMISSION REQUIREMENTS (*Section 14-527(e)*)

Section 14-527 of the city's site plan ordinance outlines master development plan submittal requirements. The applicant has generally met these requirements, including the submission of a digital 3D model of the development. In accordance with the submittal requirements, the city has requested a summary of existing and/or proposed easements, covenants, public or private rights-of-way, including the proposed easement to the Department of Public Services to use the private drive system for turn-around access and conditions relating to public use of trails and open space on the site, as requested under previous reviews. This has been included as a condition of approval.

XI. MASTER DEVELOPMENT PLAN STANDARDS (*Section 14-524(a)3.c(iii)*)

Section 14-524 of the city's land use code establishes standards under which master development plan applications must be reviewed. Per this section, master development plans must be:

a. A designated tract of land consisting of a parcel or parcels of contiguous land or land on both sides of a public street, totaling one (1) acre or more;
Altogether, the Thompson's Point site, when expanded to include the adjacent Suburban Propane and NNEPRA parcels, encompasses 32.67 acres.

b. Developed in a comprehensive, design-integrated manner, according to an overall master development plan;
The applicant has submitted a master plan for the Forefront at Thompson's Point which incorporates all major aspects of the site in a comprehensive manner.

c. Consistent with the objectives of this ordinance;
The application and development plan are generally consistent with the objectives of the city's ordinance, including the purpose of the B-5 zone, which is "to provide zones in areas of the peninsula near the central business district where a mixture of uses, including marine, industrial, commercial, and residential, is encouraged. The B-5 and B-5b zones are characterized by larger underdeveloped lots with great potential for denser, clustered, urban mixed use development and more efficient reuse of existing land and buildings. It is anticipated that such denser, mixed uses would rely on a shared infrastructure system, including service alleys, parking lots, public transportation facilities, stormwater management, and driveways."

d. Consistent with the City's Comprehensive Plan and consistent with City Council approved master plans and facility plans for off-premise infrastructure, including but not limited to, trails, pedestrian and bicycle network, view corridors, environmental management, sewer and stormwater, streets, or other facilities (see Section 15 of the Technical Manual);
The Forefront at Thompson's Point master plan is also generally consistent with the city's long-range transportation and economic planning work, including the following goals and policies from the comprehensive plan, among others:

- …Encourage sustainable development patterns and opportunities within the city by promoting efficient land use, conservation of natural resources, and easy access to public transportation, services, and public amenities (21);
- Create local multi-modal centers for the city's commuters and mass transit passengers, building on the presence of existing centers of activity, connected with each other and with regional transportation centers (24);
- Create a variety of job opportunities for the full spectrum of the labor pool which are appropriate to our current and potential skills, provide good pay and benefits, are rewarding/satisfying (37); and

- Encourage higher density housing for both rental and home ownership opportunities, particularly located near services, such as schools, businesses, institutions, employers, and public transportation (44).

e. Developed so as to locate buildings and improvements in a manner that provides usable open space, preserves significant natural features, as defined by the site plan ordinance standards, and preserves existing trees to the maximum extent possible;
As an industrial site, Thompson's Point is largely developed, with very few remaining natural features. Those natural features which do exist include emergent and existing wetlands and stands of trees along the westerly shoreline, at the far western end of panhandle, and along the northeastern shore. The Forefront at Thompson's Point master plan generally reorganizes the site in an efficient manner which allows for minimal wetland alteration, the preservation of some specimen trees, and the creation of significant new open spaces, both in hardscaped and landscaped areas.

In terms of landscape preservation, during the original approval process for the Forefront at Thompson's Point, the city arborist identified mature red oaks and a small stand of sapling white oaks meriting

Figures 4 & 5: Aerial view of the Forefront at Thompson's Point; rendering of the central 'quad area,' including the façade of the proposed event center

preservation in the western panhandle. In the revised submittal, these trees are shown on the master plan and referenced in the landscape narrative, where the applicant has stated that "several significant oak trees have been identified for preservation and all efforts will be made to protect the trees and provide adequate zones around them during construction" *(Attachment N)*. Notes have also been added to the master plan relating to clearing restrictions within the shoreland zone *(Plan 2)*. The applicant states in their narrative that "tree removal…will be certified by our forester to insure consistency with the Shoreland Zoning Vegetation Management requirements."

As noted previously, under the master plan, a central plaza, framed by the event center, renovated Brick North Building, and renovated Brick South building, forms the core element of the site's new open space network *(Figure 5)*. The plan links this plaza with a large, grassed open space area at the southern end of the peninsula, intended for outdoor concerts, via a tree-lined pedestrian walkway which runs the length of the peninsula's spine *(Figure 4)*. Exhibit, outdoor performance, and parking areas flank this corridor to the east and west. Additional, smaller hardscaped areas adjoin most of the site's proposed buildings. The applicant's landscape narrative emphasizes the use of native trees and shrubs, with a naturalized treatment at the perimeter of the site and more formal landscape design at the site's interior.

The plans also show a perimeter trail around the majority of the peninsula, much of which is proposed in the footprint of the existing trail. This path would link with the Fore River Trail and the Portland Trails network to the west. It would transition to sidewalk approximately one-third of the way up the eastern side of the peninsula.

Jeff Tarling, the city's arborist, has indicated his general approval of the master development plan. He writes,

> *The Thompson Point 'Landscape Master Plan' is a new look for many of the landscape treatment recommendations considered for this site in earlier renditions. Particularly important are guidelines for the shoreland zones and the upland parts of the site. 'Tree save' areas are shown for the Red Oak trees growing near the foot of the slope near building 'H' and Area 'A'.*
>
> *Overall, Thompson Point is a very visible and environmentally sensitive site with the location surrounded on three sides by the Fore River and Turning Basin. Creating a Master Plan will help guide future site work and the corresponding landscape treatment needed.*

f. Developed so as to be in conformance with Portland's Historic Preservation Ordinance standards for designated landmarks or for properties within designated historic districts or designated historic landscapes, if applicable. When proposed adjacent to or within one hundred (100) feet of designated landmarks, historic districts or historic landscapes, the Master Plan shall be developed so as to be generally compatible with the major character-defining elements of the landmark or portion of the district in the immediate vicinity of the proposed development;

The site is not located in a historic preservation district; nor is it adjacent to a designated landmark or designated historic landscape. However, the previous review for the Forefront at Thompson's Point included documentation from the Maine Historic Preservation Commission stating that the two existing brick buildings are likely eligible for designation under the National Register of Historic Places due to the lack of other existing early rail-era structures in the city. These are slated for redevelopment under the master plan. It should also be noted that the early 19th century Cumberland and Oxford Canal crossed the site; evidence of the channel and tow path remain visible in the western panhandle area. The previously-approved subdivision and site plans were deemed by the city to have no impact on these historical remnants. The applicant has noted their location and has stated that the master plan will, likewise, have no impact.

g. An efficient use of land which properly considers topography and protects significant natural features including, but not limited to, waterways, wetlands, floodplains and wildlife;
As noted above, the existing Thompson's Point site is largely developed with industrial buildings and associated paved and gravel areas. Generally, the proposed master plan respects the minimal natural features which do remain on the site.

The site is largely flat, with the exception of the northwestern panhandle, where there are several small bluffs and rocky outcroppings. These areas will require regrading under the proposed plans *(Plan 15)*. The panhandle buildings are proposed with a retaining wall.

The site is adjacent to the Fore River and its tidal flats, and as a result, the site houses fresh and saltwater wetlands on its perimeter. As with the original subdivision and site plan applications for the Forefront at Thompson's Point, the master plan proposes minimal activity in these areas, namely a seasonal dock at the southern end of the peninsula in the location of coastal wetlands and several drainage outfalls which coincide with freshwater wetlands in the panhandle area. The applicant has noted that the location and size of the seasonal dock slated for the southern end of the peninsula may change as subsequent subdivision and site plans evolve. All of these plan elements were previously reviewed under the National Resources Protection Act (NRPA) by the Maine Department of Environmental Protection (MDEP) as a product of the prior plans. As noted above, the applicant has provided a letter to MDEP generally stating their intent to comply with the conditions of the previous permit *(Attachment L)*. The original Thompson's Point approval also involved a permit from the Army Corps of Engineers regarding wetland impacts. As previously stated, the applicant will be required to provide evidence of updated permits, or the continued applicability of the previous ones, during Level III subdivision and site plan review.

During the original approval, the Maine Department of Inland Fisheries & Wildlife (MDIFW) reviewed the plans under NRPA and found that the mudflats and riparian zones below the highest annual tide (HAT) line on the western and eastern shorelines qualify as significant migratory shorebird feeding and roosting areas, respectively. This finding resulted in changes to the original plan for the site, including the selection of alternative plantings for shoreline areas to enhance screening between the shore and proposed trail yet minimize the potential for increased predatory activity. The applicant has identified these areas in the revised submittal, and, again, has reiterated the intent to comply with the conditions of the previous permit.

h. An efficient use of land demonstrating full coordination of its own site development and surrounding context including, but not limited to, the land uses and functions contemplated, architecture, open space and pedestrian networks, vehicular access and circulation, and all other infrastructure;
As noted above, in the Forefront at Thompson's Point master plan, the applicant has redesigned the Thompson's Point site to adaptively reuse existing buildings, increase densities in the panhandle area, and introduce a more balanced mix of uses, including residential development. These changes allow for a more efficient use of the site in general, and further the concept of the site as a transit-oriented development. The plans show development clustered at the northern end of the peninsula, with open space as an organizing concept linking the more developed portions of the site with the dominant open space feature at the southern end of the site and the shore. Circulation networks and infrastructure plans have been reviewed and have not elicited major concerns from staff *(Plans 15-19)*.

i. Linked and coordinated with surrounding land uses, infrastructure and off-site public facilities, including but not limited to the public school system, where appropriate, in a manner that is safe, efficient, non-injurious to the public, and an improvement or benefit to the public where possible; and
j. Designed with sizing of street and other infrastructure systems to accommodate the overall service demand of the Master Plan;
As noted during prior review processes, the Thompson's Point site both suffers and benefits from its isolated geography as a peninsula "across the tracks" and on the banks of the Fore River. Because of its isolation, the site essentially serves as its own neighborhood. Efforts have been made to coordinate uses with those surrounding the peninsula – the access to the regional transportation system lends itself to use for regional destinations such as the event center, theater, or higher education facility; the proposed medical and hotel uses integrate well with the neighboring medical office and hotel node immediately adjacent; and the residential use, though certainly different in scale and form, echoes residential uses found to the north. The master plan integrates open space uses in a manner that retains access from the greater neighborhood and provides for connections to regional open space, particularly to the west.

Circulation & Parking System
The site generally has limited vehicular access, although its proximity to a major interstate connection is an asset. The master development plan benefits from prior transportation planning work completed during the original site plan and subdivision review. This work resulted in funding for transportation-related improvements on the Thompson's Point Connector Road, Fore River Parkway, Sewall Street, and Congress Street. These improvements are intended to provide the capacity to handle trips to and from the site via all modes, and, as noted above, are slated for completion in 2014-2015. Likewise, the master plan benefits from developed events management and transportation demand management (TDM) plans created and vetted during prior review processes.

Generally, the site benefits from good transit, pedestrian, and bicycle access. Thompson's Point is located adjacent to the city's Transportation Center, including its local bus, intercity bus, intercity rail, and taxi service. As noted previously, the site also benefits from a high degree of trail connectivity.

The applicant has provided a trip generation and parking analysis, including trip generation calculations, and a revised master circulation plan in the final submittal *(Attachment M and Plan 19)*. The proposal continues to rely on one vehicular access point via the Thompson's Point Connector Road from Fore River Parkway. This three-lane connector road crosses the existing Portland Terminal Company railroad line at grade and, once past the proposed garage entrance, continues as a private two-lane, two-way perimeter road that circumnavigates the peninsula. Access to almost all of the site's buildings is provided via this ring road, with a subsidiary loop providing a connection to the western panhandle. A vehicular way is also provided through the center of the site.

Pedestrian access is proposed via sidewalk from both Sewall Street and the Fore River Parkway via the Thompson's Point Connector Road. (Note that while Sewall Street is a dead-end street with no vehicular access to the Thompson's Point Connector Road or the site, pedestrian, bike, and emergency vehicle access is proposed via a path and emergency gate.) Under the master development plan, the site would also be accessible via pedestrian or bicycle from the existing Portland Trails network to the west. The master plan depicts a skybridge to the Portland Transportation Center, which would ultimately provide a second major pedestrian access point to the north. It should be noted that the original approvals for the project included sidewalk connection on only one side of the Thompson's Point Connector Road across the Portland Terminal Company right-of-way. A waiver was granted for this condition. During prior review processes, staff also identified the need for additional pedestrian signal improvements at the Thompson's Point Connector Road/Fore River Parkway. These plan elements will be considered under

subdivision and site plan review. Generally, Tom Errico, the city's consulting engineer, has stated that he finds the master plan acceptable from a transportation perspective. He writes,

> *In general I find the Master Plan layout to be acceptable with the following comments that can be addressed during the site plan review process (a detailed review of site plan elements has not been conducted and so this should not be considered an approval of the site plan):*
>
> - *I believe the pedestrian crossing from the main entry roadway into the event center area (building H) needs special considerations.*
> - *A sidewalk connection from the back side of parking garage to the main roadway should be included.*
> - *I am concerned about the number of driveways that intersect the main circulation road in the vicinity of the hotel and parking garage.*
> - *The on-street parking spaces on the circulatory roadway do not have access to a sidewalk and will not work well for passengers entering and exiting vehicles.*

As noted in staff's prior memo to the board, the applicant has found that trip generation under the master plan exceeds thresholds from the existing Traffic Movement Permit (TMP), issued for the original site plan/subdivision by the Maine Department of Transportation (MDOT) *(Attachment J)*. The applicant has asked for master plan approval under the existing TMP, with a follow-up traffic analysis to be conducted after the completion of Phase I of the master plan, as the site is expected to approach approved trip generation levels. This analysis would assess actual trip generation and compare it against the TMP-approved trip generation levels. Pending the results of this study and projections for the remainder of the site, additional mitigation would be required. The city has requested a letter from MDOT verifying that they find this approach acceptable. The applicant has provided documentation requesting this letter *(Attachment P)* and has stated that MDOT has verbally agreed to this approach. Of the trip generation estimates and TMP, Tom Errico, the city's consulting traffic engineer, writes,

> *I have reviewed the updated traffic generation estimate conducted by the applicant and I generally concur with their findings. As noted the project is anticipated to exceed the trip threshold established by the current Traffic Movement Permit (TMP) and therefore modification to the TMP will be required in the future. I am comfortable with this approach, but would like to see documentation from MaineDOT supporting this approach. It is my suggestion that during each Site Plan approval phase, the applicant shall submit trip generation information that documents current trip generation levels (through both field monitoring and standard ITE trip generation methods), trip generation estimates for the Phase under consideration, and how the project complies with the TMP. I would note that the TMP is flexible on land use implementation and is relevant as it relates to trip levels during the peak hours of consideration.*

Conditions of approval related to MDOT's acceptance of the TMP approach, as well as Mr. Errico's request for trip generation estimates during Level III subdivision and site plan review, have been suggested.

Vehicular parking is proposed throughout the site, with a total of 1,290 spaces (approximately 856 garage spaces and 434 surface) at full buildout. Most of the proposed surface parking is located at the exterior of the site in double-loaded parking areas. Interior spaces are proposed in the event center garage and under residential and office buildings on the western panhandle. All of the garage parking is proposed for later phases of the project. The applicant's parking analysis calculates peak parking demand under each phase

of development, as well as peak cumulative parking demand at full buildout. It should be noted that the peak cumulative parking demand exceeds the proposed parking supply. Of this, Mr. Errico writes,

> *The application materials indicate that a total parking supply of 1290 parking spaces will be provided during full build-out of the project. According to the parking analysis conducted by Gorrill-Palmer, a parking demand of 1699 parking spaces is estimated during the weekday typical time period and 1877 parking spaces are estimated during evening event conditions. Accordingly, an insufficient parking supply will be provided under full build conditions. During the Site Plan approval process the applicant will be required to display that adequate parking supply will be provided for the proposed uses.*

The revised submittal includes the previous TDM plan, dated September 2011 *(Attachment J).* The TDM plan describes a scheme centered around the creation of what is functionally a transportation management association for the entire peninsula, which would coordinate the various entities on the site in a set of shared transportation demand management strategies designed to maximize the use of adjacent transit infrastructure, increase transit opportunities, reduce peak hour vehicle trip impacts, reduce parking demand, and encourage healthier transportation options. Proposed TDM-related strategies include the promotion of carpooling and car-sharing, the addition of express bus service, and the provision of shuttle service during peak events. This TDM plan will be fully reviewed at the time of Level III subdivision and site plan review. Mr. Errico notes,

> *The applicant has provided the TDM Plan that was developed in 2011 and approved as part of the original approval. In concept I find the TDM Plan to be acceptable but want to emphasize the importance of the measures included in the Plan and how the traffic study and parking analyses assume some level of TDM success. The applicant will be required to update the TDM Plan at the next Site Plan review stage to reflect the proposed implementation schedule (including what specific strategies are being implemented, implementation dates, and specific monitoring activities).*

The applicant has also provided an updated events management plan in the revised submittal *(Attachment O).* This plan restricts events to weekdays after 7 pm or weekends. The plan also includes various strategies, in conceptual form, which are designed to facilitate the movement of large numbers of visitors to and from the site. These include the use of a reversible lane on the Thompson's Point Connector Road, police officers to direct traffic at the Thompson's Point Connector Road/Fore River Parkway, traffic control personnel throughout the site (including the parking garage), and directional signage. As with the TDM plan, it is anticipated that this event management plan will be more fully vetted under subdivision and site plan review.

> *The applicant has provided a general approach to managing event traffic volumes as part of the Master Plan. I would note that a detailed traffic management plan was developed in conjunction with the original application and that plan should continue to be used (if the applicant suggests deviating from the Plan, those details should be provided). I would note that the Traffic Management Plan is a live plan and will be reviewed and adjusted over time as conditions in the area are monitored.*

It should be noted that the applicant has submitted documentation requesting that special events occur on the site during the coming summer. It is assumed that the applicant may not have completed subdivision or site plan review under the master development plan by that time. Of this, Mr. Errico writes,

> *It is my understanding that some events may occur during the summer of 2014 and those events will be permitted through the City Special Event Permit process. I would note that the applicant*

would be required to provide details on traffic management and parking under a scenario where the full EDA off-site traffic improvements are not in place. DPS would review the details of the traffic and parking analysis at the time of the requested permit and approval of the details is not issued as part of the Master Plan.

Master development plan approval should not be construed as approval for these special events.

During the initial review, the city raised concerns regarding pedestrian connections from the Connector Road to the panhandle trails. This concern was voiced previously by Portland Trails, which has noted the potential for through trail traffic coming from the Fore River Trail to the west and the Fore River Parkway pedestrian accommodations to the east. In the revised master plan, the applicant has added a pedestrian connection to the panhandle trail immediately north of Building E1.

John Peverada, the city's parking manager, has repeatedly stressed the need for taxi accommodations in the master development plan. The applicant has indicated in the revised master plan that a taxi queuing area may be provided on the inbound side of the loop road to the north of the event center garage. An additional taxi stand is shown in the circle directly in front of the event center.

Water
Regarding water infrastructure, an existing 12" water main terminates at a fire line supply meter pit at the end of the Sewall Street extension. Per their master utility plan and their utility analysis, the applicant intends to extend 8"+ water onto the site from this main, providing both domestic and fire protection service *(Attachment E and Plan 17)*. The applicant has requested an updated capacity letter from the Portland Water District (PWD). This has not yet been received, and has thus been included as a condition of approval. City staff has not identified areas of major concern with respect to water service provision.

Sewer
As with the original plans for the site, the applicant proposes to connect sanitary sewer services into the PWD pump station directly adjacent to the property. The PWD has previously provided a capacity letter indicating the ability to accept the project's sanitary sewer discharge. An updated letter has not yet been received by the city; as such, it has been included as a condition of approval. At the request of the Department of Public Services, the prior approval also included a condition relating to revised wastewater flow projections and the potential need for upgrades to the PWD pump station. It is assumed that this condition will be addressed during subdivision review. David Margolis-Pineo, of the city's Department of Public Services, adds,

The City expects, as originally proposed, that all sources of inflow into the sanitary sewers on Thompson Point be eliminated as build out of the Thompsons Point Master Plan progresses. Also that all abandoned laterals connected to the sanitary system be sealed at the sewer main.

The applicant has stated in their final narrative that they concur with this approach *(Attachment A)*.

Gas & Electric
In their master utility plan and utility analysis, the applicant shows new gas service extending onto the site from Sewall Street/Thompson's Point Connector Road and underground electric from an existing pole on the southwestern side of the railroad tracks. Public Services has indicated no concerns with this arrangement as proposed.

Stormwater

The applicant has provided a master grading and drainage plan which shows preliminary contour lines *(Plan 15)*. In addition, in the revised submittal, they have included a stormwater schematic which illustrates, in more detail, potential storage and water quality treatments proposed for each of the various stormwater management zones of the site *(Plan 16)*. This diagram includes notes relating the intent to comply with city and MDEP water quality treatment standards, as requested by David Senus, consulting civil engineer, during the preliminary review. Mr. Senus has indicated his satisfaction with the revisions as submitted *(Attachment 5).*

Fire
The applicant has provided an updated fire safety compliance plan showing hydrant locations and fire vehicle turning radii on the proposed master plan layout *(Plan 18)*. In addition, the applicant has submitted an assessment from a certified fire protection engineer *(Attachment O)*. Captain Chris Pirone, of the city's Fire Prevention Bureau, has reviewed the submittal and offers the following comments,

> *I am comfortable with the FPE's analysis regarding the issues he addressed in his report, which focused on water supply, hydrants and access roads.*
>
> *However, as requested in the most recent Thompson's Point meeting with their Team, I requested that the FPE report needed to analyze the evacuation procedures from the buildings once outside the buildings and where there staging areas would be.*
>
> *I encourage them to have the FPE contact me to discuss this process which then will need to be added to his report.*
>
> *Lastly, as a reminder, when Fire Chief LaMontagne gave the approval for the single access road the condition he placed on the development was that all buildings would need to have sprinkler and fire alarm systems even if codes did not require them. He also required and approved the event management plan that would always allow free and clear access into the point; basically an emergency access lane which would be maintained by event staff.*

A condition of approval relating to these comments has been suggested.

Schools
Lastly, the plan includes 144 residential units in high-density, high-rise settings. Both of the buildings intended for residential use appear on the western panhandle of the site. While these units may ultimately house families with school-age children, the applicant has stated that they expect "minimal impact on the city's public school system" *(Attachment C).* Any students from the development would likely attend Ocean Avenue Elementary and King Middle Schools.

k. Designed to create a street grid pattern that reflects average city block sizes of the neighborhood for street connectivity;
The master plan, which is proposed with private streets, is not organized around a traditional grid pattern *(Figure 2)*. In this way, it differs from those neighborhoods immediately to the north, which house long rectilinear blocks with limited connectivity. Instead, the project adheres to a campus-like concept, with a central 'quad' created by the hotel, existing Brick South building (slated for use as the Circus Conservatory of America), the Brick North building (slated for mixed use), and the garage and event center. Internal circulation patterns allow vehicles and pedestrians to cut through this quad or to circumnavigate the peninsula. A short loop is also provided to the panhandle area. As described above, vehicular access to the site as a whole, however, remains solely via the single access point at the

Figures 6 & 7: Aerial view of the Forefront at Thompson's Point from the north (above) and southeast, looking over the central open space feature (below)

Thompson's Point Connector Road. Pedestrian and bicycle connectivity is slightly higher, with access via the skybridge and trail, as well as the Thompson's Point Connector Road.

l. Designed as to create a cohesive identity through building scale, massing, and articulation; use of quality exterior materials, architectural detailing at pedestrian scale; consistency of design and materials for streetscape and pedestrian amenities; framing of outdoor open space and linkages; a clear conveyance of the function and significance of various buildings, entrances, and features; and to generally comply with design and development standards of the zone in which it is located;
The drawings for the Forefront at Thompson's Point master plan depict an overall scheme for the site which incorporates existing and new buildings, single-story industrial architecture with high-rise residential/hotel and event center/garage design, and significant open space *(Figures 4-7 and Attachment D)*. The applicant uses several tools to make the site cohere, namely consistent streetscape and landscaping, integrated plaza spaces, integrated design taking cues from the existing brick buildings slated for adaptive reuse, and a logical pattern of form and massing which announces entry and a clear progression onto the site.

The city's site plan standards state that projects "in the…B-5 zone…shall be designed to support the development of dense, mixed use neighborhoods with attractive, safe, and convenient street level pedestrian environments as demonstrated by compliance with all applicable design standards listed in the Design Manual." The B-5 design standards provide guidance related to building and parking lot siting. Generally, these standards are oriented toward more urban environments; many of the design standards reference proximity and orientation toward the street. Given the campus-like concept employed here, where an urban street grid is not used as an organizing concept, many of the standards don't apply. It should be noted that the applicant has generally oriented buildings towards the central spine of the site, with parking toward the perimeter, and has organized the site in an effort to create a dense and mixed-use neighborhood, in keeping with the spirit of the design standards.

m. Inclusive of provisions for the ownership and maintenance of usable open space as appropriate; and
Per the preliminary submittal, the open space slated for the Forefront at Thompson's Point is proposed on both independent and common lots. In the revised submittal, the applicant has stated that open space will be "owned and managed by the applicant's professional property management company. The trail area (easement to the city) will be maintained by Portland Trails; however the ownership and control of access is [to be] managed by the applicant. The boat launch and water access [will be] privately owned but he public [will be] encouraged to use the facilities within the rules established by the owner" *(Attachment X).* It is assumed that further details regarding ownership and maintenance of open space will be addressed under subdivision review.

n. For areas proposed as future development phase(s), the proposed interim conditions shall be managed and maintained to ensure stable, safe and attractive site conditions.
In the final submittal, the applicant has continued to provide a phasing plan consisting of two phases with 11 sub-phases. However, the applicant has also provided a master plan graphic which shows four simplified "sections" which may be used for future subdivision recording purposes *(Plan 22).* It is assumed that, under each of the eventual proposed sections, multiple site plan reviews would occur for distinct buildings which might come online at any time. Given the timing of this submittal, the city has not had an opportunity to fully review this sectional recording/phasing plan. As such, its review has been included as a condition of approval. It should be noted that, while this plan is labeled as a "subdivision plan," approval of the master development plan here should not be construed as approval of the subdivision.

XII. SITE LOCATION OF DEVELOPMENT ACT

As previously noted, under the prior subdivision and site plan review a site law permit was approved for the Forefront at Thompson's Point under the city's delegated review authority. The MDEP has granted the city the authority to continue delegated review of the Forefront at Thompson's Point under state site law. Chapter 14 of the city's *Technical Manual* enumerates standards for local site location of development review. All of these, including the standards regarding financial and technical capacity, traffic movement, and the protection of natural resources, echo master plan, subdivision, and site plan standards outlined in the city's land use ordinance. The applicant has stated their intent to comply with their existing SLDA permit. As noted previously, a formal review will occur at the time of subdivision application.

XIII. MASTER DEVELOPMENT PLAN AMENDMENTS

At the workshop on the Forefront master plan, Planning Board members raised questions regarding potential future amendments to the plan and the formal review process. The land use code includes language related to Planning Board decisions on the master plan, including the following,

> *(Section 14-524(a)3.f.(iv)) Decisions. The Planning Board shall approve, approve with conditions, or deny a MasterDevelopment Plan application based upon the applicable review standards…An approval, including an approval of waivers, establishes the general parameters to be adhered to for the development, including the supporting documentation for floor area ratio and/or residential density, general types of uses, building coverage, generalized open space plans and infrastructure systems.*

Under *Section 14-532(b) Revisions and amendments to Master Plans and approved site plans,* the land use ordinance further defines a "minor" master plan amendment, which, per the ordinance, may be approved administratively. According to the ordinance, a change qualifies as a minor amendment when it is "generally consistent" with the approved master plan layout, circulation, infrastructure, and open spaces, and:

(i) Does not propose any new general type of use beyond those approved initially;
(ii) Does not increase the building ground coverage, floor area ratio or residential density of the Master Development Plan;
(iii) Does not decrease any specified area regulations or enumerated parking ratios; and
(iv) Does not substantially change access, circulation, or infrastructure on or adjacent to the site.

It is implied that changes which do not meet these conditions would require Planning Board review.

XIV. STAFF RECOMMENDATION

Subject to the proposed motions and conditions of approval listed below, Planning Division staff recommends that the Planning Board approve the master development plan for the Forefront at Thompson's Point.

XV. PROPOSED MOTIONS – MASTER DEVELOPMENT PLAN

On the basis of the application, plans, reports and other information submitted by the applicant; findings and recommendations contained in the Planning Board Report for the public hearing on February 11, 2014 for application 2013-262 relevant to the master development plan regulations; and the testimony presented at the Planning Board hearing, the Planning Board finds that the plan **is/is not** in conformance with the master development plan standards of the land use code, subject to the following conditions of approval, which must be met prior to subdivision approval unless otherwise stated:

1. The applicant shall provide a summary of existing and/or proposed easements, covenants, public or private rights-of-way, or other burdens on the site, including the proposed easement to the Department of Public Services to use the private drive system for turn-around access and conditions relating to public use of trails and open space on the site, for review and approval by the Department of Public Services and the Planning Authority;

2. The applicant shall provide correspondence from the Maine Department of Transportation indicating their acceptance of the proposed approach to monitoring and traffic analysis related to the existing Traffic Movement Permit, for review and approval by the city's Department of Public Services;

3. For each Level III site plan/subdivision review, the applicant shall submit trip generation information that documents current trip generation levels and trip generation estimates complying with the TMP, for review and approval by the city's Department of Public Services;

4. The applicant shall provide evidence of water capacity from the Portland Water District, for review and approval by the Planning Authority;

5. The applicant shall provide evidence of sewer capacity from the Department of Public Services, for review and approval by the Planning Authority;

6. The applicant shall submit a revised report from a certified fire protection engineer describing evacuation procedures, add a note to the master development plan indicating that all buildings will include sprinkler and fire alarm systems, and revise the event management plan to indicate that free and clear fire access will be maintained at all times during events, for review and approval by the city's Fire Prevention Bureau; and

7. The applicant shall revise the master phasing plan for review and approval by the Planning Authority.

Project Name:	The Forefront at Thompson's Point Subdivision Alteration		
Project ID:	2017-102	CBL:	201/A/5,8,10 202/A/1, 4
Address:	10 Thompson's Point	Applicant:	Forefront Partners I, LP
Planner:	Shukria Wiar		

Dear Mr. Thompson:

On April 2, 2020, the Planning Authority approved minor alterations to the approved Sectional 1 through 4 subdivision plats for the Forefront at Thompson's Point. The decision is based on the documents and plans as submitted and prepared by Bo Kennedy, PE, of Placemaker Partners, LLC on behalf of Forefront Partners I, LP. The proposal was reviewed for conformance with the standards of Portland's Subdivision Ordinance and has been found to meet these standards. The scope of the alteration includes changes to the internal lot boundaries for the former Suburban Propane and Northern New England Rail Authority (NNEPRA) properties (lots 8 through 16) to facilitate a proposed 2,800 square foot bar and service building, an 11,400 square foot warehouse building, a 61-room hotel, and associated site improvements. The amendments will also document the execution of the second and final phase of the land exchange between Forefront Partners I, LP and NNEPRA. No change is proposed to any approved lot line, easement, infrastructure, proposed uses, or other components of the previous approval on January 12, 2016.

Standard Procedures

Note: The following standard conditions of approval and requirements apply to all approved site plans:

1. Site Plan Expiration The site plan approval will be deemed to have expired unless work has commenced within one (1) year of the approval or within a time period up to three (3) years from the approval date as agreed upon in writing by the City and the applicant. Requests to extend approvals must be received before the one (1) year expiration date.

2. Separate Building Permits Are Required This approval does not constitute approval of building plans, which must be reviewed and approved by the City of Portland's Permitting and Inspections Department.

3. Performance Guarantee and Inspection Fees A performance guarantee of $8,400 Division that covers the site improvements for the Phase III sidewalk and an inspection fee payment of $300 must be submitted to the Planning Division.

4. Construction Management Plans The applicant, contractor and subcontractors are required to conform to the approved Construction Management Plan, and all conditions contained within the project's approval, for the entire duration of the project. Any amendments to the approved Construction Management Plan shall be reviewed and approved by the Department of Public Works prior to the execution. The Planning Authority and the Department of Public Works have the right to seek revisions to an approved Construction Management Plan. The applicant shall coordinate the project's construction schedule with the timing of nearby construction activities to avoid cumulative impacts on a neighborhood and prevent unsafe vehicle and pedestrian movements. Accordingly, nearby construction activities could involve a delay in the commencement of construction.

5. Preconstruction Meeting Prior to the release of a building permit or site construction, a pre-construction meeting shall be held at the project site. This meeting will be held with the contractor, Development Review Coordinator, Public Works representative and owner to review the construction schedule and critical aspects of the site work.

6. Department of Public Works Permits If work or obstructions will occur within the public right-of-way, such as utilities, curb, sidewalk, driveway construction, site deliveries and equipment siting, a Street Opening and/or Occupancy Permits are required for your site. Please contact the Department of Public Works Permit Clerk at (207) 874-8300, ext. 8828. (Only excavators licensed by the City of Portland are eligible.)

7. Develop Site According to Plan The site shall be developed and maintained as depicted on the site plan and in the written submission of the applicant. Any modifications of an approved site plan or alteration of a parcel, which was the subject of site plan approval after May 20, 1974, shall require the prior approval of an amended site plan by the Planning Board or Planning Authority pursuant to the terms of Chapter 14, Land Use, of the Portland City Code.

8. Design Review of Exterior Elevations If the project is subject to design review, then the exterior elevations shall be constructed and maintained as depicted on the approved elevation drawings and in the written submission of the applicant. Modification of any approved exterior elevations shall require the approval of the revised plans by the Planning Board or Planning Authority pursuant to the terms of Chapter 14, Land Use of the Portland City Code.

9. Defect Guarantee A defect guarantee, consisting of 10% of the performance guarantee, must be posted before the performance guarantee will be released.

10. As-Built Final Plans Final sets of as-built plans shall be submitted digitally to the Planning and Urban Development Department, on a CD or DVD, in AutoCAD format (.dwg), release AutoCAD 2005 or greater.

11. Mylar Copies Mylar copies of the as-built drawings for the public streets and other public infrastructure in the subdivision must be submitted to Public Works prior to the issuance of a certificate of occupancy.

12. Impact Fees New development or changes of use that result in net new residential dwelling units, non-residential building square footage, or water meters, are subject to the City of Portland's impact fee ordinance (Chapter 14, Article XVII). Impact fees are calculated at the time of building permit and must be paid prior to the certificate of occupancy. For more information, visit https://www.portlandmaine.gov/2409/Impact-Fees

The Development Review Coordinator must be notified five (5) working days prior to the date required for final site inspection. The Development Review Coordinator can be reached at the Planning and Urban Development Department at (207) 874-8632. All site plan requirements must be completed and approved by the Development Review Coordinator prior to issuance of a Certificate of Occupancy. Please schedule any property closing with these requirements in mind.

If there are any questions, please contact Shukria Wiar at (207) 756-8083 or via email shukriaw@portlandmaine.gov.

Sincerely,

Christine Grimando, AICP

Project Name: The Forefront at Thompson's Point Project Level III Site Plan and Subdivision Application

ID: 2015-133 & 2015-159

Address: 1 Thompson's Point, Portland, Maine 04102 CBL: 201 A 005001
Applicant: Chris Thompson
Planner: Christine Grimando

Dear Mr. Thompson:

On January 12, 2016, the Planning Board considered a Level III Site Plan and Subdivision application for an amended subdivision plan consisting of 19 lots, an amended Site Location of Development Act approval, a Level III site plan for the renovation of an existing building (Brick South) for use as a flexible 2,500 person event/assembly space with associated parking, utilities and stormwater management within the 34,000 square foot building. Included in this site plan is coordination with a previous approval of Brick North and adjacent site work. Both the site plan and subdivision application are applications towards fulfillment of the previously approved Master Development Plan for this site. The Planning Board reviewed the proposal for conformance with the standards of the: Shoreland Zoning Regulations, Floodplain Management Regulations, Traffic Movement Permit, Subdivision Ordinance and Site Plan Ordinance, including the Site Development of Location Act. The Planning Board voted 5-0 (Elizabeth Boepple absent) to approve the application with the following waivers and condition(s) as presented below.

WAIVERS

On the basis of the application, plans, reports and other information submitted by the applicant, findings and recommendations, contained in the Planning Board Report for the public hearing on January 12, 2015 for applications #2015-133 and #2015-159 relevant to Portland's Technical and Design Standards and other regulations, and the testimony presented at the Planning Board hearing, the Planning Board voted 5-0 (Boepple absent) to waive the following Technical Manual standards regarding City street design:

1. 1.7.2.1, requiring a perpendicular driveway connection to the street, to allow for an alternative angle for the proposed Parking Garage Entrance (Lot 14/Building F1).
2. 1.7.2.9, requiring that vehicular circulation to be contained off-site and to not utilize the adjacent street system, to allow for anticipated delivery truck maneuvers.
3. 10.8, requiring a minimum aggregate base course thickness of 3 inches for collector roads, to allow for alternative road design specifications as noted on Sheet C7-0. .
4. Figure I-2 (Collector Street Cross-Section), requiring continuous sidewalks on both sides of the collector road to allow for sidewalk not to be built on an easterly portion of the road, as shown on the Site Layout Plan, sheet C-3.0, for the purposes of the Level III site plan (2015-159) subject to a condition of approval for completion of full sidewalk design as shown on Sheet C-3.0, *Overall Site Plan* is (2015-133) at a future phase.
5. Figure I-2 (Collector Street Cross-Section), requiring a minimum roadway width of 40 feet for collector roads, to allow for a variable width of 30-39 feet.
6. Figure I-2 (Collector Street Cross-Section), requiring a minimum esplanade width of 5 feet for collector roads, to allow for a 4ft wide esplanade.

SUBDIVISION REVIEW

The Planning Board voted 5-0 (Boepple absent) that the plan is in conformance with the subdivision standards of the Land Use Code and the Site Location of Development Act, subject to the following condition(s) of approval:

1. The applicant shall finalize the subdivision plat for review and approval by Corporation Counsel, the Department of Public Works, and the Planning Authority. The subdivision plats shall note all conditions of public access, all relevant easements including any for city vehicle access and turning, language regarding rights of lot ingress/egress/regress, and final street turnaround easement location and design in accordance with City of Portland Technical Manual section 1.3.

2. Prior to the issuance of certificates of occupancy, the applicant shall provide a revised Declaration of Easements, Covenants and Restrictions document for review and approval by Corporation Counsel;

3. Street Lighting: The proposed street lights on the 1st segment of the public portion of the Sewell Street extension are to be privately owned, metered and maintained by the Forefront at Thompson's Point. The City shall grant a license for such a purpose at the time of street acceptance.

SITE PLAN REVIEW

The Planning Board voted 5-0 (Boepple absent) that the plan is in conformance with the site plan standards of the Land Use Code, subject to the following condition(s) of approval:

1. Future phases of work in the vicinity of the outfall associated with "Stormwater Management Zone F" (as depicted on sheet C-4.1 of the Subdivision Application) shall incorporate water quality treatment measures that provide adequate treatment capacity for runoff from the untreated parking lot south of the Brick North Building in accordance with the General Standards. If no future work occurs on the site, the Applicant will not be held to completing this measure;

2. The applicant shall provide a full construction management plan for review and approval by the Public Works Department.

3. Sidewalks and Road Improvements: At the time a Site Plan application is submitted for Buildings F1/H (or alternate Level III proposal for Lots 14 & 15 as depicted on Sheet C-2.0, *Subdivision Plan*), the portion of roadway included in Sheet C-3.0, *Site Layout Plan*, including the easterly sidewalk and all remaining road improvements, shall include provisions for conformity with the road design depicted on Sheet C-3.0, *Overall Site Plan.*

4. Final landscape plan shall incorporate 2" caliper trees in 4 foot-wide esplanade.

5. The 8'x20' Concrete Pad for the storage of CO2 tanks and chiller equipment on the North Side of Brick North, as shown on Sheet C-3.0, Site Layout Plan, will be subject to review by the Inspections Division, and any associated life safety reviews, before construction.

The approval is based on the submitted plans and the findings related to site plan and subdivision review standards as contained in Planning Report for application 2015-133 & 2015-159 which is attached.

STANDARD CONDITIONS OF APPROVAL

Please note the following standard conditions of approval and requirements for all approved site plans:

1. **Subdivision Recording Plat** Revised recording plats listing all conditions of subdivision approval must be submitted for review and signature prior to the issuance of corresponding performance guarantees. Performance guarantees must be issued prior to the release of the recording plat for recording at the Cumberland County Registry of Deeds.

2. **Subdivision Waivers** Pursuant to 30-A MRSA section 4406(B)(1), any waiver must be specified on the subdivision plan or outlined in a notice and the plan or notice must be recorded in the Cumberland County Registry of Deeds within 90 days of the final subdivision approval).

3. **Develop Site According to Plan** The site shall be developed and maintained as depicted on the site plan and in the written submission of the applicant. Modification of any approved site plan or alteration of a parcel which was the subject of site plan approval after May 20, 1974, shall require the prior approval of a revised site plan by the Planning Board or the Planning Authority pursuant to the terms of Chapter 14, Land Use, of the Portland City Code.

4. **Separate Building Permits Are Required** This approval does not constitute approval of building plans, which must be reviewed and approved by the City of Portland's Inspection Division.

5. **Note on Stormwater Management Inspection and Monitoring** The applicant and all assigns must comply with the conditions of Chapter 32 Storm Water including Article III, Post-Construction Storm Water Management, which specifies the annual inspections and reporting requirements. The developer/contractor/sub-contractor must comply with conditions of the construction storm water management plan and sediment & erosion control plan based on the applicant's submitted materials and applicable city standards and state guidelines. A maintenance agreement for the stormwater drainage system, as attached, or in substantially the same form with any changes to be approved by Corporation Counsel, shall be submitted and signed prior to the issuance of a building permit with a copy to the Department of Public Works.

6. **Site Plan Expiration** The site plan approval will be deemed to have expired unless work has commenced within one (1) year of the approval or within a time period up to three (3) years from the approval date as agreed upon in writing by the City and the applicant. Requests to extend approvals must be received before the one (1) year expiration date.

7. **Subdivision Plan Expiration** The first section of the subdivision plat shall be recorded within three years of Planning Board approval. Subdivision plat approval of the remaining sections of the plat shall remain in effect for five (5) years after Planning Board approval.

8. **Performance Guarantee and Inspection Fees** A performance guarantee covering the

site improvements as well as an inspection fee payment of 2.0% of the guarantee amount and seven (7) final sets of plans must be submitted to and approved by the Planning Division and Public Works Department prior to the release of each sectional subdivision plat for recording at the Cumberland County of Deeds, and prior to the release of a building permit, street opening permit or certificate of occupancy for site plans. If you need to make any modifications to the approved plans, you must submit a revised site plan application for staff review and approval.

9. **Defect Guarantee** A defect guarantee, consisting of 10% of the performance guarantee, must be posted before the performance guarantee will be released.

10. **Preconstruction Meeting** Prior to the release of a building permit or site construction, a pre-construction meeting shall be held at the project site. This meeting will be held with the contractor, Development Review Coordinator, Public Service's representative and owner to review the construction schedule and critical aspects of the site work. At that time, the Development Review Coordinator will confirm that the contractor is working from the approved site plan. The site/building contractor shall provide three (3) copies of a detailed construction schedule to the attending City representatives. It shall be the contractor's responsibility to arrange a mutually agreeable time for the pre-construction meeting.

11. **Department of Public Works Permits** If work will occur within the public right-of-way such as utilities, curb, sidewalk and driveway construction, a street opening permit(s) is required for your site. Please contact Carol Merritt at 874-8300, ext. 8828. (Only excavators licensed by the City of Portland are eligible.)

12. **As-Built Final Plans** Final sets of as-built plans shall be submitted digitally to the Planning Division, on a CD or DVD, in AutoCAD format (*,dwg), release AutoCAD 2005 or greater.

13. **Mylar Copies** Mylar copies of the as-built drawings for the public streets and other public infrastructure in the subdivision must be submitted to the Department of Public Works prior to the issuance of a certificate of occupancy.

The Development Review Coordinator must be notified five (5) working days prior to date required for final site inspection. The Development Review Coordinator can be reached at the Planning Division at 874-8632. All site plan requirements must be completed and approved by the Development Review Coordinator prior to issuance of a Certificate of Occupancy. Please schedule any property closing with these requirements in mind.

If there are any questions, please contact Christine Grimando at 874-8608.

Sincerely,

Elizabeth Boepple, Chair
Portland Planning Board

PLANNING BOARD REPORT
PORTLAND, MAINE

The Forefront at Thompson's Point
Level III Site Plan and Subdivision Review
2015-133 (Subdivision) & 2015-159 (Level III Site Plan)
Chris Thompson, Forefront Partners I LP

Submitted to: Portland Planning Board Date: January 8, 2016 Public Hearing Date: January 12, 2016	Prepared by: Christine Grimando, Senior Planner CBL: 201 A005001 Project #: 2015-133 (Subdivision) & 2015-159 (Level III Site Plan)

I. INTRODUCTION

Forefront Partners I LP has requested a Level III site plan and subdivision review for a 19 lot subdivision, and a Level III site plan for the renovation of an existing building (Brick South) for use as a flexible 2,500 person event/assembly space with associated parking, utilities and stormwater management within the 34,000 square foot building. The application includes a summary of the proposed modifications to the approved master development plan and incorporation of another existing building (Brick North), and its associated site improvements. A time line of the multiple prior approvals for this site is below as background information.

1, Brick South

The total development area consists of over 30 acres. The site's approved master development plan is for a mixed-use development including an event center, hotel, sports medicine facility, parking structure, educational facility, residential units, restaurants, and office uses. The current Site Plan and Subdivision application includes a 19 lot subdivision, and a Level III site plan for assembly/event space and related infrastructure. This application represents the first to be submitted to the Planning Board towards fulfillment of the master development plan, approved in March 2014. The application also folds in a prior approval for Brick North– this was approved, and amended under the 2012 subdivision approval that preceded the 2014 plan for this property. It is included in this application as a means to facilitate superseding the pre-Master Development Plan approvals, and begin to fulfill build-out of the site under one, consolidated program. A previous Planning Board workshop was held for this application on October 13, 2015.

This development is being referred to the Planning Board for compliance with the site plan and subdivision standards. A total of 288 notices were sent to property owners within 500 feet of the site and a legal ad ran in the Portland Press Herald on December 28 and December 29, 2015.

A Neighborhood Meeting was held on Friday, October 9th. A notice dated September 29, 2015 was sent to property owners within 500 feet of the property. Notes from that meeting are included in Attachment O. Questions and comments from the Neighborhood Meeting regarded questions about bike parking, redevelopment aesthetics, and support for the current appearance of the site and recent uses.

Applicant: Chris Thompson, Forefront Partners I LP
Consultants: Bo Kennedy, P.E., Fay, Spofford & Thorndike; Lawrence E. Bartlett, P.E., Bartlett Design; Charles D. Marchese, Surveyor, Sebago Technics

Building Footprint	34,600 SF	34,600 SF	N/A
Building Floor Area	34,600 SF	34,600 SF	N/A
Impervious Surface Area	725,710 SF	687,813 SF	-37,897 sf site-wide total, +2.2 ac. this development phase
Parking Spaces (on site)	Unknown	118 (8 handicapped spaces)	118 delineated
Bicycle Parking Spaces	0	16	16
Estimated Cost of Project	$3,000,000		

IV. BACKGROUND & EXISTING CONDITIONS

Thompson's Point consists of 30+ acres immediately adjacent to the Portland Transportation Center, on a peninsula of land that extends into the Fore River. It has been a continuously occupied industrial site, and in recent years has begun its transition to a mixed-use destination, hosting events at the southern tip of the peninsula and securing new tenants to support the redevelopment of the property. Bound by railroad tracks to the north, surrounded by the Fore River on three sides, it is currently occupied by existing buildings, and a mixture of long term and temporary uses. The site also includes an extension of the Fore River trail. In recognition of its unusual potential to be a new destination in the City, and its proximity to existing public transit, it was made a Tax Increment Financing District, towards further transit improvements. Zoned B-5 (urban commercial mixed-use zone), it is immediately adjacent to residential, industrial, business and resource protection zones. Its size, proximity to both the natural resource of the Fore River and the transit resources of the Portland Transportation Center, and its location at the intersection of a variety of urban contexts make this a unique development site in Portland.

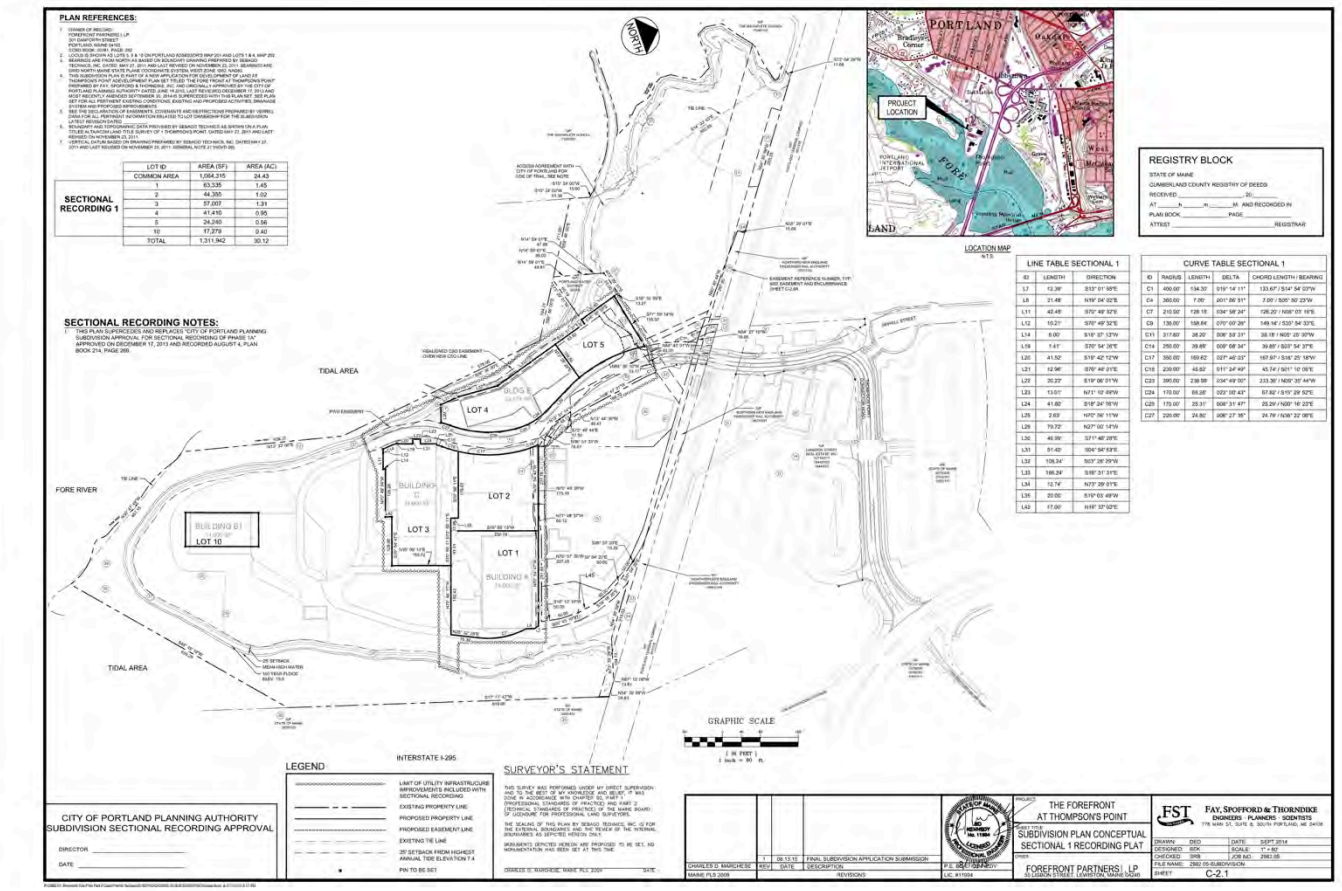
Applications Timeline

In June 2012 this site was approved for 600,000 sf of office, hotel, restaurant and event center uses. The original site plan and subdivision approval was amended in June 2013, to reflect an altered development program, as well as retention of modified existing brick buildings on the site.

In late 2013, a Level III site plan application was submitted for a portion of the site, specifically a segment of road, infrastructure, and site work supporting the re-use of Brick North (Phase 1A). This site plan was submitted under the still valid 2013 approval. Approved in January 2014, it was intended to allow development to proceed while the development program for the overall site was being considered in a newly envisioned master development program, submitted for planning board review on an overlapping time frame with the 1A application. In December of 2014 the 1A application was amended to bring the proposal into greater alignment with the master development plan, including road layout.

In January and February 2014 a master development plan application was reviewed by the Planning Board, and approved in March of that year. A master development plan is a tool that establishes a cohesive development program on larger parcels (one+ acre), allowing for multiple phases over an extended time frame of six years. An approval of a master development plan then requires subsequent site plan and subdivision applications with specific construction proposals towards fulfillment of the overarching master development plan approval.

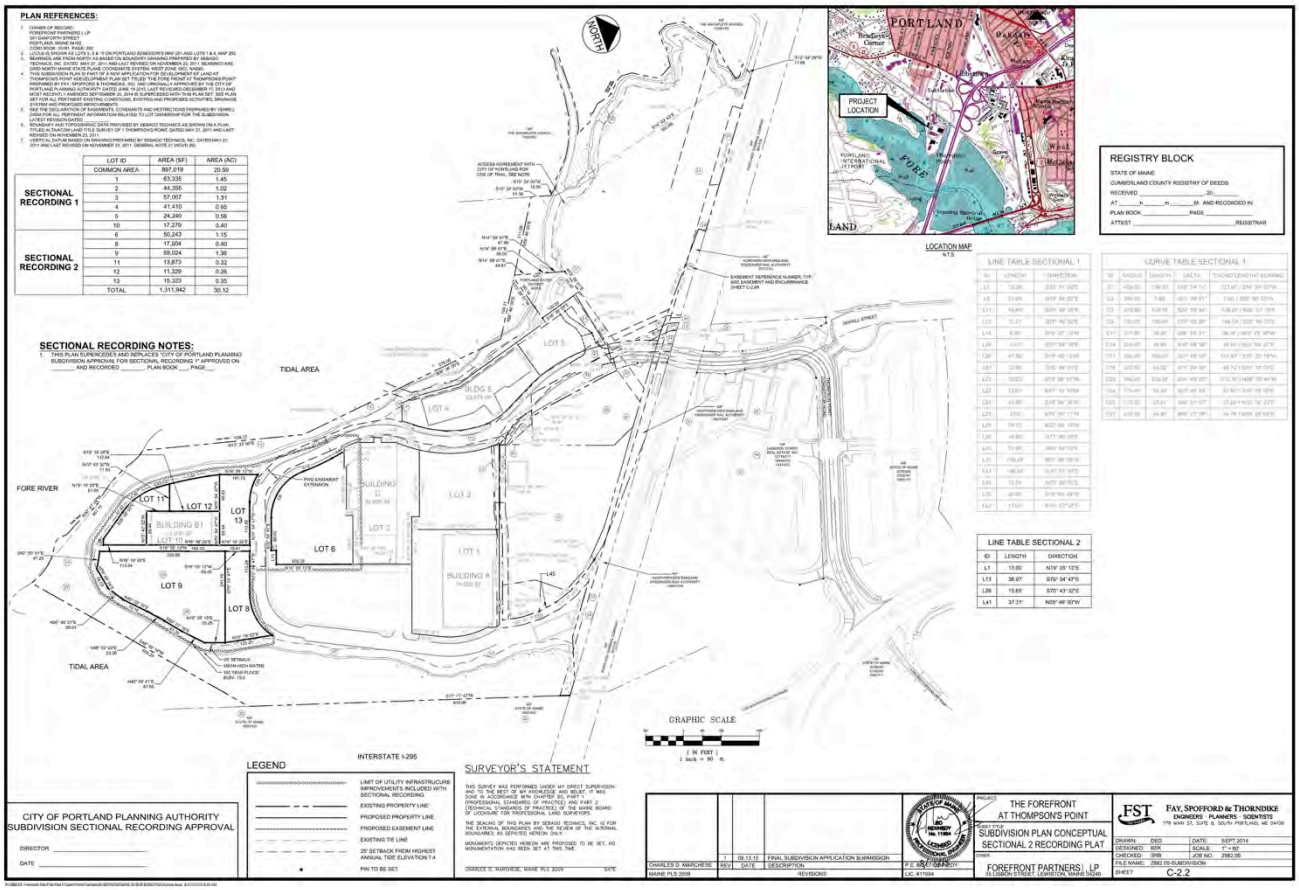
In June 2014 the applicant received a Level II approval for site work at the southern end of the Thompson's Point peninsula, in the area of the open air "Depot" structure (formerly the Barnstormers building), to allow for seasonal events. This application was amended in February 2015 to allow for additional site work and an extension of the seasonal event approval.



This application was originally scheduled for November 24th, and was postponed until January 12th. New information received since November is summarized in sections XVIII and XIV below.

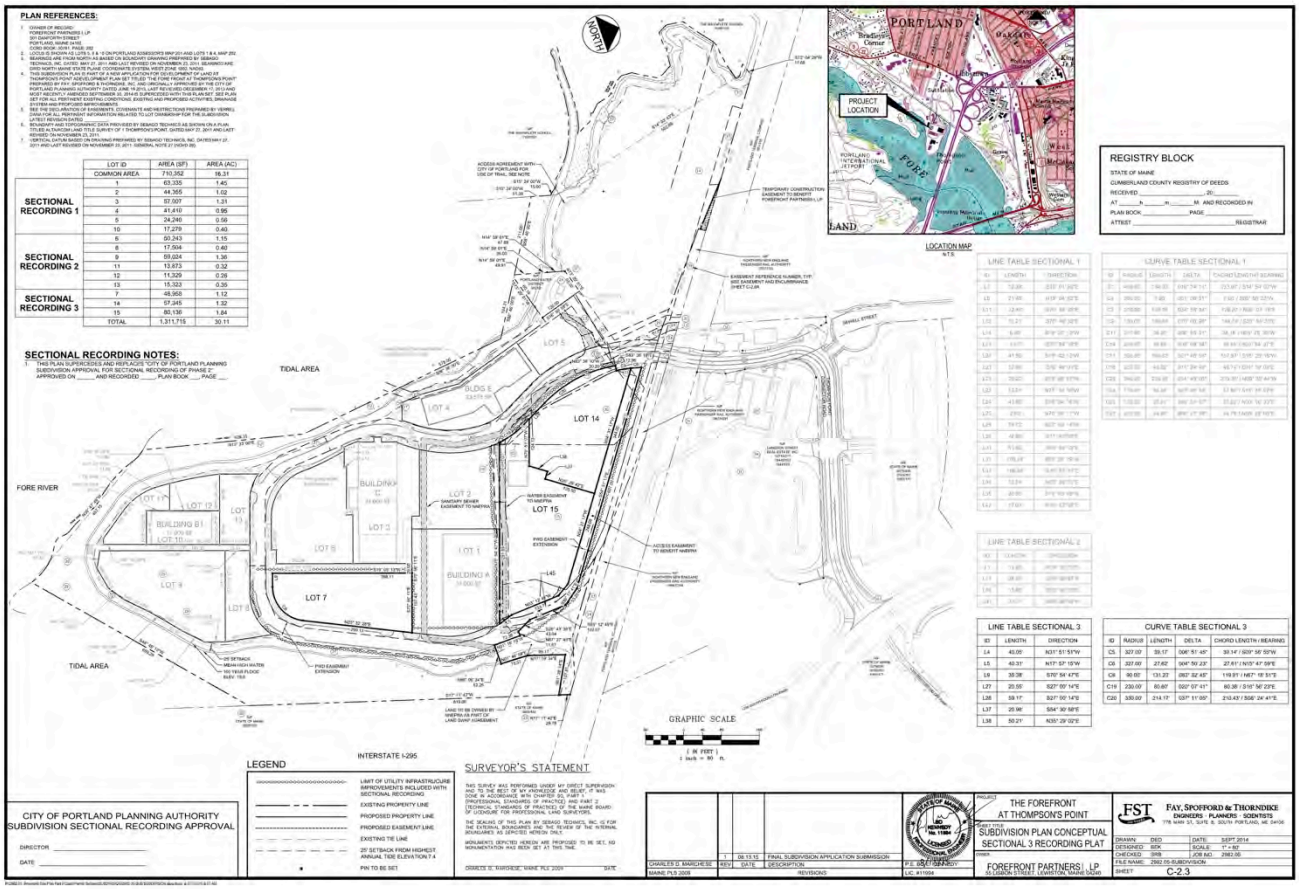
V. PROPOSED DEVELOPMENT

Subdivision



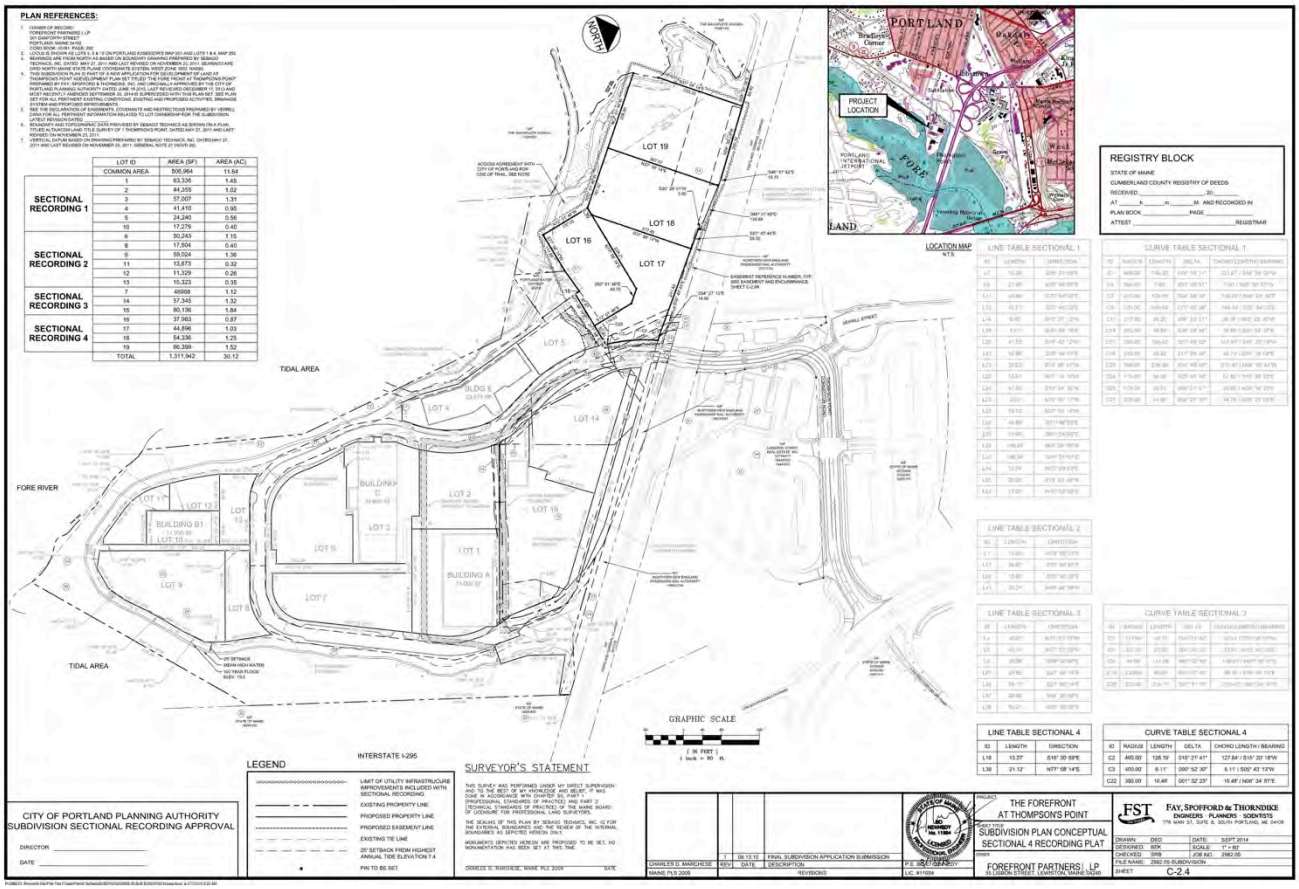
A new, site-wide subdivision plan has been submitted for review, consisting of nineteen lots. It will supersede the 2012/2013 subdivision approval. It reflects the most up to date, integrated development plan for the site, consisting of nineteen lots plus common area, and four sectional recordings. It includes detailed road geometries, grading, drainage, landscape design, and utility infrastructure details. The four proposed sectional recordings consist of the following:

Sectional 1: This encompasses six lots, two of which include Brick North and Brick South, as well as the Depot area, and two lots to the west of the access road. It incorporates redevelopment of the existing Brick North building for mixed uses, and supersedes a previously recorded sectional recording for this area. This plat encompasses the development area of the current Level III site plan application.



3, Sectional Recording 1

Sectional 2: The second sectional recording plat encompasses the land area surrounding Depot building. Sectional Recording 2 would create Lots 8, 9, and 11 to support The Depot as well as Lot 6 (temporary parking/future building pad) and Lots 12 and 13 (Restaurant and Parking). The area around the Depot is approved as a multi-purpose event space. An outdoor event space had previously been envisioned as adjacent to an event center in a previous iteration of the plan, but is now aligned with the Depot/Lot 10. This section also incorporates a future restaurant and an approved seasonal dock. The application indicates that the outdoor area was evaluated for public safety considerations last year: *the Fire Department asked us to assess the maximum capacity of the Depot area from a public safety perspective. It was determined by Mark Cummings, P.E. that it was feasible to accommodate 7,300 people safely on the site, assuming that an adequate off-site parking plan and temporary pedestrian safety layout could be provided, in the context of a business licensing scenario.*

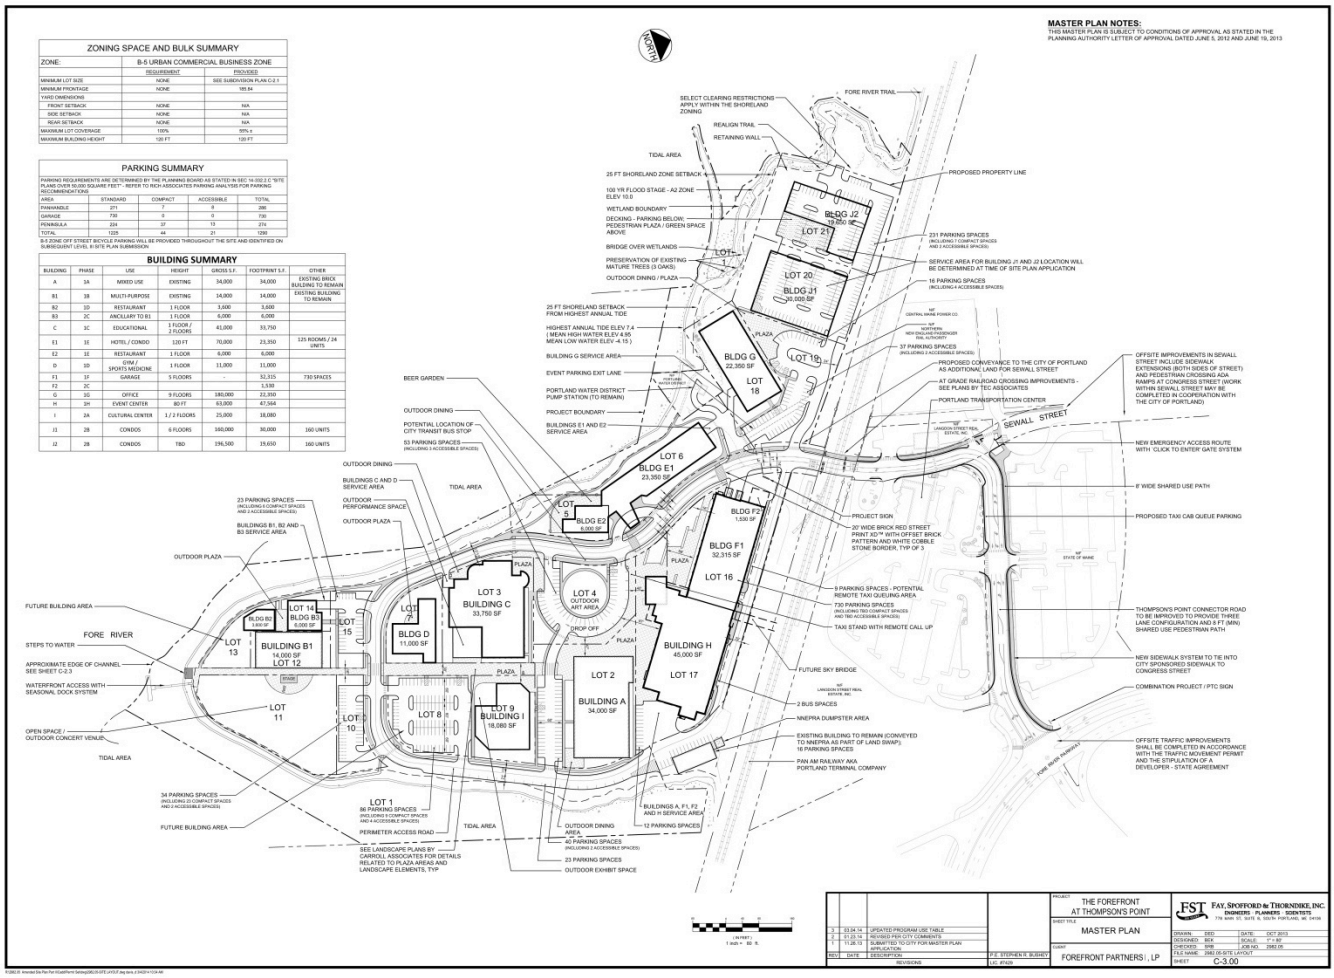


4, Sectional Recording 2

Sectional 3: Section three is premised on the closing of a land swap agreement with NNEPRA and the acquisition of the Suburban Propane property – this land will be consolidated into lots 14 and 15 for the purposes of a parking garage and event center, respectively. Lot 7 is anticipated to be the future location of a cultural center.

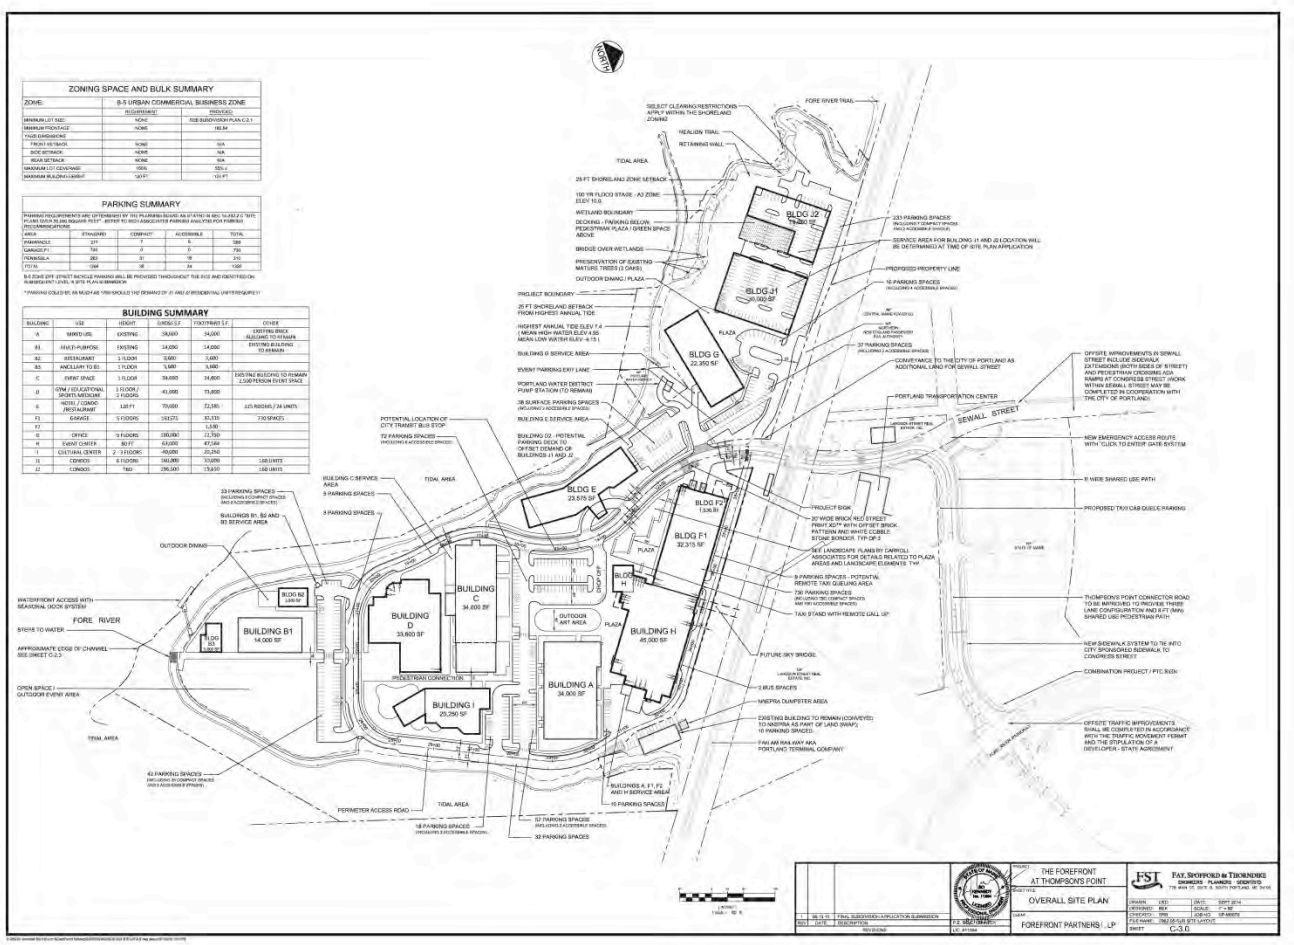
5, Sectional Recording 3

Sectional 4: This is anticipated to be the last recording of the full subdivision plan, and includes lots 16-19 in the northwestern "Panhandle" portion of the site. It's intended for use as office space and residential units.



6, Sectional Recording 4

Master Plan



The application outlines changes to the master development plan. The subdivision application (Attachment M) cover letter gives an overview of these changes, which result in similar layout, parking, total square footage and anticipated uses as the approved master development plan. Some elements of the development that were outlined in the original master development plan application have shifted location on the site. In the original, 2012 subdivision approval the existing brick buildings were to be removed; however subsequent applications, including the 2014 master development plan have shown these as retained with some significant modifications. The current application depicts Brick South retained in its entirety. The applicant summarizes the master development plan changes as follows:

- *At the heart of the layout adjustments, is Forefront's decision to retain and renovate the existing brick building referred to as Brick South in its entirety. Brick South shown as Building C on the enclosed plans will be used as assembly event space. The event space is meant to complement the proposed event center, the outdoor event area held at the Depot and the southern portion of the site, and is not intended to increase the overall size of events, or number of people at the site at one time. Brick South will be renovated to accommodate 2,500 people and support space such as a kitchen, meeting space, storage and bathrooms, and related ancillary services for the event space.*
- *The restaurant space (E2) has been incorporated into the hotel's ground floor. This allows space for additional surface parking next to the hotel.*

- *The educational building (Circus Conservatory) will be divided into their primary space in the new Building (D) and their current leased space in a portion of the Brick North Building (Building A). There is no change in total office space proposed for the overall site.*
- *The Cultural Center (Building I) has grown in gross square footage and building footprint; however, the program has remained the same.*

7, Approved master development plan layout

8, Current proposed site layout

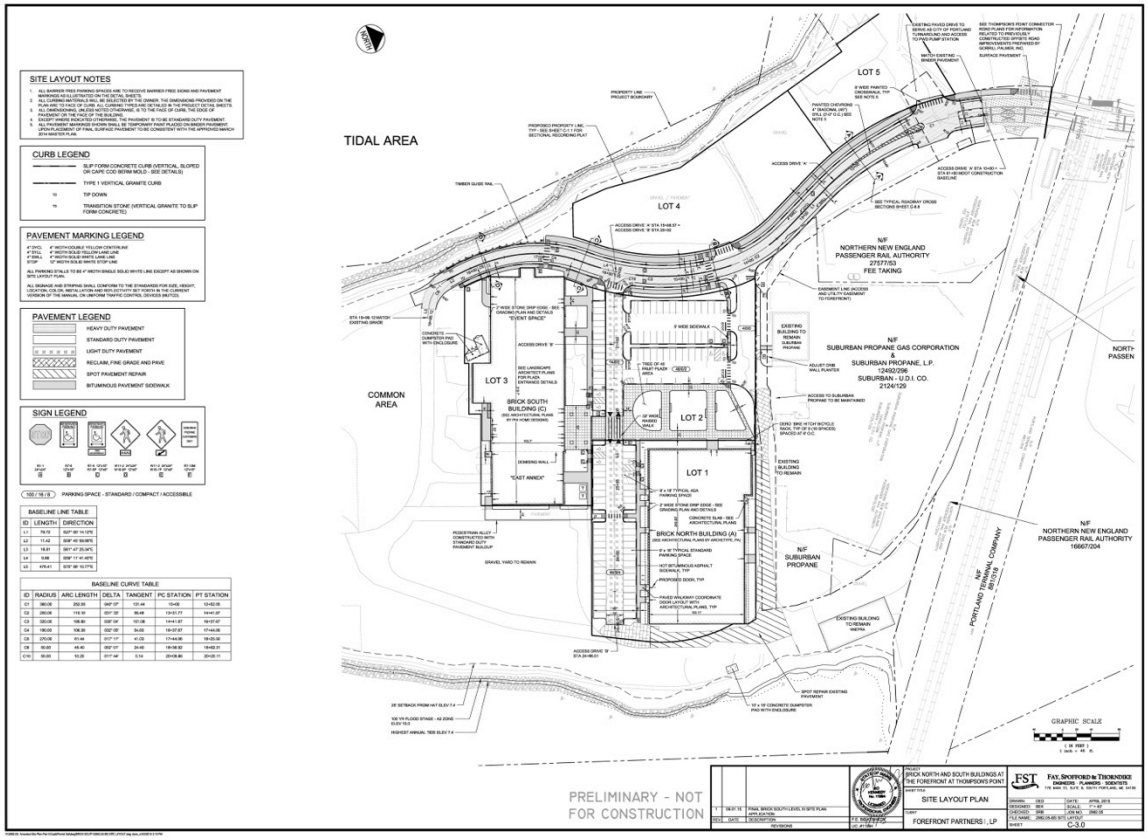
The modifications to the revised site layout are consistent with the overall master development plan approval – it is generally consistent with the approved layout of buildings, circulation infrastructure, open spaces, and uses, cumulative lot coverage, parking and circulation. The area west of Brick North (Lot 2/Building A) shows a modified interior circulation and parking area, the circular drive and art space being modified in shape and parking configuration. The overall proposed site circulation remains closely aligned to the originally approved master development plan.

The revised master development plan use program follows:

TABLE 1
MASTER PLAN PROGRAM

Building Master Plan		Master Plan - August 2015 Gross Size
Building A:	Mixed Use: Cellar Door Winery (5,840 SF) Circus Program (6,799 SF; 400 People) Big Room Studios (3,461 SF) Café (1377 SF) Brewery (10,068 SF) Distillery (5,284 SF) Color Me Mine (2,136 SF) Common (741 SF)	34,800 SF +/-
Building B1:	Multi-Purpose (Assume Live Theater)	4,800 Seats
Building B2:	Ancillary to B1 and Seasonal Dock	3,600 SF
Building B3:	Restaurant	3,600 SF
Building C:	Event/Assembly Space (2,500 People)	34,600 SF
Building D:	Educational/Gym/Sports Medicine	41,600 SF
Building E:	Hotel & Restaurant Condominiums	125 Rooms 24 Units
Buildings F1/F2:	Parking Garage *(see next page)	730 Spaces
Building G:	Office	180,000 SF
Building H:	Event Center	63,000 SF
Building I:	Cultural Center	40,000 SF
Building J1:	Condominiums (Assumed)	160,000 SF/160 Units
Building J2:	Condominiums (Assumed)	196,500 SF/160 Units
Total Non-Garage		**814,300 SF**

** Depending on the timing of garage construction which will follows the relocation of Suburban Propane and the commencement of the phase two buildings, it is conceivable that by the time the garage is ready to begin construction we may actually elect to add floors taking advantage of the 120' height limit to increase structured parking capacity. It may also be desirable to build the garage structure to provide for the possibility of adding floors in the future after the initial 730 spaces are built. We are continuing to assess these options now, but would suggest that the Master Plan retains the ability to plan for a dynamic future outcome without compromising the needs of the first phase of development.*



2014 master development plan square foot calculations are as follows, and show slightly higher square feet totals across the proposed use categories.

PROJECT DATA JUSTIFICATION
BUILDING AREA TABLE

Building	Height	Floor Area	Footprint
Building A: Office, Café, Retail	Existing	34,000	34,000
Building B1: Multi-Purpose (Live Theater)	Existing	14,000	14,000
Building B2: Restaurant	1 Floor	3,600	3,600
Building B3: Restaurant	1 Floor	6,000	6,000
Building C: Educational	1-2 Floors	41,000	33,750
Building D: Gym & Medical Office	1 Floor	11,000	11,000
Building E1: Hotel & Condominiums	120 ft	70,000	23,350
Building E2: Restaurant	1 Floor	6,000	6,000
Building F1: Parking Garage	5 Floors	161,575	32,315
Building F2: Parking Garage		1,530	1,530
Building G: Office	9 Floors	180,000	22,350
Building H: Event Center	80 ft	63,000	47,564
Building I: Cultural Center	1-2 Floors	25,000	18,080
Building J1: Office	6 Floors	160,000	30,000
Building J2: Condominiums	Assume 10 Floors (TBD)	196,500	19,650
TOTAL		**973,205**	**303,189**

Site Plan

The Level III site plan application encompasses the renovation of the existing Brick South (Building C/Lot 3), includes Brick North (Building A/Lot 1), currently under renovation under a prior approval, and includes a significant portion of roadway, as well as stormwater infrastructure, parking, circulation, landscaping, and utilities associated with both of these buildings. The street design for the Level III application differs from the full subdivision road design in several ways – full sidewalk on the eastern side is not proposed until a later phase, and eventual crosswalk placement, for instance. That these items be completed in a later phase of site development is noted as a condition of approval.

9, Level III Site Plan Layout

10, Renovated Brick South

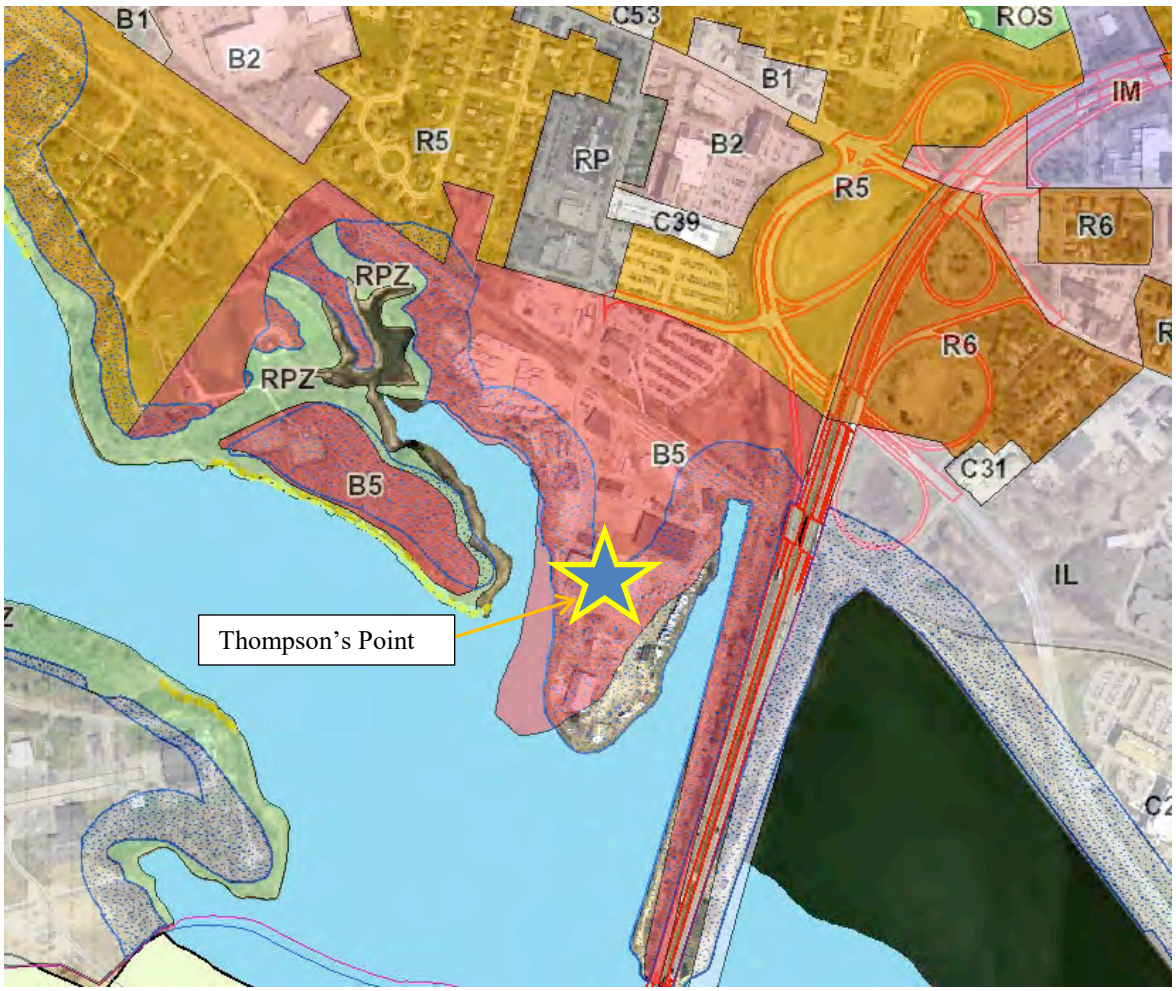
VI. PUBLIC COMMENT

No comments have been received to date.

VII. RIGHT, TITLE, & INTEREST

The applicant has provided evidence of Right, Title & Interest in Attachment J of the subdivision application. Included is a trail easement, a quitclaim deed with covenant for the property, a letter from Suburban Propane, Inc. and the Northern New England Passenger Rail Authority indicating that purchase and sale agreements have been signed for those adjacent parcels and that the applicant is authorized to seek entitlements for the redevelopment of the parcels.

VIII. FINANCIAL & TECHNICAL CAPACITY



The October workshop comments included a request for updated indication of financial capacity. On file is a letter from TD Bank from 2011 attesting to the Thompson's Point Development Company's ability to complete the project and "see that it operates effectively over the long term". The applicant has supplied a letter dated October 13, 2015, from Androscoggin Bank attesting to Forefront Partners I, LP's financial capacity.

IX. ZONING ANALYSIS

Thompson's Point lies in the B-5 zone, and is also subject to shoreland and floodplain regulations under the city's land use code. The application complies with floodplain and shoreland requirements. The buildings included in the current Level III application are not in the floodplain. Shoreland setbacks are a required minimum 25' for structures from the annual mean high tide line. There are areas on the site layout plan where the road hugs the 25' line, on the allowable side of that boundary; the proposed activity meets shoreland requirements.

The project meets the requirements of the B-5 zone use and dimensional standards. The B-5 zone allows for a wide range of commercial and mixed uses, and encourages urban patterns of development. There are no lot coverage limits or applicable setbacks in the B-5, and there is a height limit of 120 feet.

There are also B-5 standards in the City's Design Manual, concerned with shared infrastructure, the location of buildings to the street, and location of parking lots, none of which is applicable to a lot of this size, particular geography, or internal circulation pattern.

11, Thompson's Point Zoning Context

X. SITE PLAN SUBMISSION REQUIREMENTS (Section 14-527) and **SUBDIVISION PLAT AND RECORDING PLAT REQUIREMENTS (**Section 14-496)

The overall subdivision plan and the four sectional recording plats have been reviewed by the Department of Public Services for conformance with 14-496, and the applicant has already incorporated initial comments. The final versions of the plats, post-approval, will need to be reviewed by the Department of Public Services and Corporation Counsel before they can be finalized, signed by the Planning Board, and recorded.

With a subdivision of this size, with 19 lots, proposed to be developed in phases, and not all with frontage on the proposed road (not required in the B-5 zone), language is needed to secure ingress and egress and access to the proposed infrastructure. The Declaration of Easements, Covenants and Restrictions (Attachment L) includes provisions for this, that Corporation Counsel has suggested some changes to in the final, recorded version:

7.2. Ingress, Egress and Regress. Each Lot Owner, and the clients, customers, guests, employees, tenants, subtenants, invitees, agents, contractors and licensees of Lot Owners shall have an easement, subject to any rules and regulations established by the Board of Directors, in common with all other Lot Owners to use the entrances, exits, corridors and other Common Area roadways as a means of ingress, egress and regress to and from the Property and the adjoining public streets. ~~The Board of Directors shall not and cannot establish any rules and regulations depriving any Lot Owner of reasonable ingress, egress and regress to and from its Lot, the Property and Common Areas and the adjoining public streets. Notwithstanding the foregoing~~The Lot Owners' use of the entrances, exits, corridors and roadways as a means of ingress, egress and regress to and from the Property and the adjoining public streets, and to parking spaces and areas located on the Property shall be subject to the Event Management Plan generally described in Schedule D attached hereto and the Transportation Demand

Management Program generally described in Schedule E attached hereto, which Event Management Plan and Transportation Demand Management Program shall be incorporated into the Rules and Regulations as adopted by, and amended from time to time, by the Board of Directors. Notwithstanding the foregoing, the Board of Directors shall not and cannot establish any rules and regulations depriving any Lot Owner of reasonable ingress, egress and regress to and from its Lot, the Property and Common Areas and the adjoining public streets.

Similar language will be required on the final recording plat, to be reviewed and approved by Corporation Counsel before final signatures and recording of the plat.

XI. SUBDIVISION REVIEW (14-497(a). Review Criteria)

The proposed amendments have been reviewed by staff for conformance with the relevant review standards of the City of Portland's subdivision ordinance.

1. Water, Air Pollution

The site plan, grading and utility plans are designed to adequately address stormwater quality and to minimize pollution from the site. No detrimental water or air quality impacts are anticipated. Stormwater review comments are included in the Site Plan Review section, below.

2 & 3. Adequacy of Water Supply

The applicant has provided evidence of capacity from the Portland Water District (Attachment H).

4. Soil Erosion

The erosion and sedimentation control plans (Plans 21, 56, 65, 66) have been reviewed and found to adequately meet the standards of avoiding soil erosion impacts.

5. Impacts on Existing or Proposed Highways and Public Roads

This project is subject to a MDOT Traffic Movement Permit, issued in 2012 (Attachment H). Efforts have been made over the course of this project's multiple reviews to coordinate this project with the surrounding neighborhood and the transportation system it abuts, and to safely plan for anticipated road impacts. To that end the project developed events management and transportation demand management (TDM) plans that were reviewed in the course of the master development plan approval. Tom Errico, the City's consulting Transportation engineer, reviews all modifications and submissions in relation to conformity with that program and related city standards. Mr. Errico's preliminary comments are included below, as well as his updated assessments of where the issues her previously raised stand in bold. Additional comments on transportation and parking follow under XII, Site Plan Review, below.

- *In general I find the overall Subdivision Plan layout to be acceptable with specific site issues addressed during the site plan review process. The applicant should be specific about what triggers the full construction of the circulatory roadway or how it is being phased. Additionally, it is unclear where the public right-of-way terminates for the phasing of the circulation road given that EDA funding is extending the public roadway system.*

  Status: The applicant has provided information responding to this comment and DPW has been coordinating directly with the applicant on the roadway design and maintenance elements. I have no further comment.

Previous staff comments indicated the need for more information regarding phasing of the subdivision. Additional annotation on infrastructure required for each subdivision section has been added to revised plan sheets, as well as color utility plan sheets submitted for the November 24th public hearing, as well

Mr. Errico offers the following additional comments regarding trip generation and traffic management, requesting more detailed trip estimates for the Level III site plan application.

- *I have reviewed the updated traffic generation estimate conducted by the applicant and request that the applicant provide back-up information for the noted AM and PM peak hour trip estimate. Additionally, the applicant should provide supporting documentation for each specific use. An example is the Brewery where 8 entering and exiting vehicles were assumed in a peak hour, when occupancy of a tasting room may be indicative of greater trip activity during the PM peak hour. The applicant does note that the project is anticipated to exceed the trip threshold established by the current Traffic Movement Permit (TMP) during the AM peak hour while the PM peak hour is projected to be under the threshold. In an attempt to understanding specific project phasing traffic impacts, the applicant should also provide the trip estimate for the Level III Site Plan application.*

  Status: Given that the full-build out of the project has been permitted under the TMP, I concur that the current application is well below the trip threshold established by the TMP. I would note that I do not endorse the trip generation methods contained in the application (e.g. Brewery Trip activity) and will require future site plan review phases to quantify actual trip activity for buildings already occupied (to ensure the trip threshold dis not exceeded).

- *The applicant has provided a general approach to managing event traffic volumes as part of the Master Plan. I would note that a detailed traffic management plan was developed in conjunction with the original application and that plan should continue to be used (if the applicant suggests deviating from the Plan, those details should be provided). I would note that the Traffic Management Plan is a live plan and will be reviewed and adjusted over time as conditions in the area are monitored.*

  Status: I have no further comment.

Mr. Errico found the Master Plan materials sufficient, but has specific Level III Site Plan comments in XII., below.

6. Sanitary Sewer/Stormwater Disposal
A wastewater capacity letter from the Portland Water District, dated March 14, 2014 (Attachment H), indicated a capacity to serve. *The application's stormwater management plan has been reviewed by the City's consulting engineer, David Senus, who had the following comment (in addition to one Site Plan-specific comment addressed below in XII):*

> *The Applicant has presented revisions to the previously approved stormwater management plan to include technologies now considered acceptable by MaineDEP as of January 2015, specifically Filterra units without an isolator row and Jellyfish Filter Units. The approach presented by the Applicant provides an acceptable means of meeting the General Standards as outlined in MaineDEP Chapter 500 and by the City of Portland Technical Manual Section 5 for both the Subdivision Application and the Brick South Level III Site Plan Application.*

7. Solid Waste
The applicant has proposed trash enclosures in association with the site plan application, to be privately managed, as well as provided evidence of sewer capacity from the Portland Water District, and full utility plans to address waste disposal. In addition, in response to previous Public Works comments, updated sewer flow estimates have been submitted in the November 10, 2015 cover letter accompanying the new submission materials (Attachment N).

8. Will not have an undue adverse effect on the scenic or natural beauty of the area, aesthetics, historic sites, significant wildlife habitat identified by the department of inland fisheries and wildlife or by the city, or rare and irreplaceable natural areas or any public rights for physical or visual access to the shoreline.
The new subdivision application is not anticipated to affect original assessments related to historic sites, significant wildlife habitat, or irreplaceable natural areas. The property has been extensively evaluated on each of these measures over the course of prior reviews. The site is largely developed with pavement, gravel lots, and existing

buildings. The project has provided an extensive landscaping plan that the City's Arborist, Jeff Tarling, has approved:

> *I have reviewed the proposed landscape plans and find them acceptable as shown. To date we have refined the landscape goals and plans a number of times to a point where the current plan meets the objective of a site on the Fore River.*

The City Arborist submitted additional comments specifically regarding the area proposed as public ROW. Though the overall landscape plan has been approved, he notes that the esplanade in this area needs to be a minimum of 4 feet if trees are to be planted there. The esplanade width is 4 feet. He also recommends smaller trees than shown on the plan (see Attachment 7 for full comments). His planting suggestions are noted in the approval conditions.

In regard to historic sites, Brick North and Brick South were found eligible for National Register but are not included in the City of Portland Historic Preservation program. However, they will be retained and repurposed as part of this proposal.

Significant Wildlife/Natural Areas: The applicant has retained a Natural Resources Protection Act (NRPA) permit from the Department of Environmental Protection (Attachment G), that protects feeding and roosting areas for migratory shore birds along the westerly shore. The need to protect this habitat resulted in prior changes to the trail alignment and to the landscaping plan, both reflected in the current application.

Shoreline Access: The shoreline of the Thompson's Point peninsula is currently ringed with an unimproved trail, which is part of the Portland Trails network. The trail is now proposed to transition from a rustic unimproved path to a perimeter paved walkway along the primary access drive. A seasonal dock providing access to the Fore River with a kayak/small boat launch ramp has been previously approved. Terms and access to the water is included in the subdivisions Declaration of Easements, Covenants and Restrictions (Attachment L) and have been referenced on the revised plan set.

9. Is in conformance with the land development plan or its successor

The B-5 zone itself is in compliance with the Comprehensive Plan, and this project that complies to the B-5 zone it is also consistent. The application is also generally consistent with long range planning goals in the areas of transportation and economic development, such as the following goals of the Comprehensive Plan, Volume 1:

- Encourage sustainable development patterns and opportunities within the city by promoting efficient land use, conservation of natural resources, and easy access to public transportation, services, and public amenities (p21);
- Create local multi-modal centers for the city's commuters and mass transit passengers, building on the presence of existing centers of activity, connected with each other and with regional transportation centers (p. 24);
- Create a variety of job opportunities for the full spectrum of the labor pool which are appropriate to our current and potential skills, provide good pay and benefits, are rewarding/satisfying (p. 37); and
- Encourage higher density housing for both rental and home ownership opportunities, particularly located near services, such as schools, businesses, institutions, employers, and public transportation (p. 44)

10. Financial and Technical Capacity

See VIII above.

11. Wetland/Water Body Impacts

With the exception of necessary stormwater discharges, all structures and paved surfaces will be set 25 feet back from high water at the shoreline, as consistent with Shoreland Zoning regulations. There is a full stormwater management plan that has been reviewed and approved for the site as a whole, with comments on revisions and specific proposals for the Level III stormwater plan addressed in the Site Plan Standards, below. The site is currently almost entirely impervious, with no stormwater treatment – proposed stormwater management techniques

post-redevelopment will benefit water quality leaving the site.

12. Groundwater Impacts
There are no anticipated impacts to groundwater supplies.

13. Flood-Prone Area
The perimeter of the peninsula is located with the flood plain. Buildings in the current site plan application are not in the flood plain.

XII. SITE PLAN REVIEW

The proposed development has been reviewed by staff for conformance with the relevant review standards of the City of Portland's site plan ordinance. Staff comments are below.

Transportation Standards

1. *Impact on Surrounding Street Systems*
   The applicant has obtained a traffic movement permit to address impacts on the surrounding street systems. The project has provided off-site improvements through an EDA Grant Program towards this end. The project also has an approved Transportation Demand Management Plan (TDM) for managing and reducing traffic trips and parking demand.

2. *Access and Circulation*
   a. Site Access and Circulation.
   Thompson's Point's relatively isolated peninsula geography has provided access challenges for this site, off-set by its access to multiple forms of transit served at the Portland Transportation Center. There has been extensive coordination on the part of the applicant and the City of Portland to establish a safe and efficient system for all users. Served by Thompson's Point Connector Road, the approved master plan provides for vehicle, transit, bicycle and pedestrian access. As individual project phases are brought forward for review, each will have to be evaluated for compliance with the approved master development plan, and for the appropriateness of each stand-alone phase. Mr. Errico's review speaks to this issue, finding the current application generally acceptable, but needing some further refinement both at the level of subdivision phasing and Level III site plan detail:

   The applicant has provided the TDM Plan that was developed in 2011 and approved as part of the original approval. In concept I find the TDM Plan to be acceptable but want to emphasize the importance of the measures included in the Plan and how the traffic study and parking analyses assume some level of TDM success. Accordingly, the applicant should provide an update of the TDM Plan for the Level III Site Plan application to reflect the proposed implementation schedule (including what specific strategies are being implemented, implementation dates, and specific monitoring activities).

   Status: The applicant should identify if there are any TDM strategies that can be implemented as part of the Level III Site Plan buildings in conjunction with a typical non-event day.

   I find the Level III Site plan to be acceptable, although further review is required. I would note that the applicant should provide details on construction activities and how current parking and traffic will be managed.

   Status: I have reviewed the construction management plan and site plans and find them to be acceptable. I would note that specific traffic control plans will be required for the project and that information will be reviewed in conjunction with the pre-construction meeting. Given that the site only impacts Thompson's Point traffic and pedestrians activity (not the general public), I'm confident safe conditions can be detailed.

Since the workshop the applicant was asked to speak to accessibility and safe access for all users on the site (as referenced in Sec. 14-526.a.2) in greater detail than the preliminary application materials had provided. New application materials (Attachment N, which addresses issues raised in regard to Site Plan and Subdivision applications) include additional information summarizing ADA compliance:

The previously submitted Site Layout Plan C-3.0 shows the site vehicular and pedestrian circulation. All sidewalks represented on the plan have been designed to meet the 2010 ADA Standards for Accessible Design. An accessible route has been provided from the public street to all main entrances as well as from designated parking stalls to the main entrances. The plan proposes a total of 118 parking spaces of which 8 have been designed to meet the ADA standards. The design provides for ADA stalls in each separate parking facility and as a result the total number of provided ADA stalls exceeds both the required number of ADA spaces if computed holistically (5 required) or the required number of spaces when tallied up per parking area (7 required).

b. Loading and Servicing

Formal loading docks have not been proposed for the Level III site plan, but a service area has been designated on the southerly side of the Brick South Building, and large doors have been retained to allow for movement of event support equipment, delivery vehicles, etc.

c. Sidewalks

Sidewalks are proposed to both Brick North and Brick South (Plan 52). Overall site circulation (Plan 15) includes sidewalks, crosswalks and trail connections throughout the site.

3. *Public Transit Access*

The development is served by the existing transit service at Portland Transportation Center. The Level III site plan does not include additional transit facilities, though the project at full build-out will include a bus stop and shelter.

4. *Parking*

a. Location and number of parking spaces

The overall site layout contains an adequate number of parking spaces, meeting the City's dimensional requirements. Mr. Errico's traffic and parking review provided the following commentary on the parking analysis that accompanied the site plan application, requesting more detail regarding demand/supply allocation for the overall site, and for the Level III site plan application:

According to the parking analysis conducted by Gorrill-Palmer, a parking demand of 1790 parking spaces is estimated. The applicant should provide specific detail on parking demand/supply allocation for the entire Master Plan and for the Level III Site Plan application plan.

Status: From an overall parking generation perspective, I find the applicant estimate to be reasonable with the understanding that updated analyses will be needed as future project phases are implemented. The applicant has not provided information as it relates to the parking demand/supply adequacy for the Level III Site Plan application. My general sense is that sufficient parking will be provided for typical day-to-day activity at the Level III buildings following occupancy. The applicant should provide documentation that a sufficient parking supply will be provided.

The applicant has sufficiently answered site-wide parking supply questions, but should directly address the sufficiency of the parking proposed for the uses and space included in this Level III site plan application by the November 24th public hearing.

b. Location and number of bicycle parking
Fifteen parking spaces are required at this stage, with sixteen provided on the western face of Brick North.

c. Motorcycle and scooter parking
There is no required amount of motorcycle or scooter parking, only that the project provide access for these vehicles, which the site plan does through the provision of conventional parking spaces.

d. Snow Storage
On-site snow storage will be accommodated along the perimeter of the site.

e. TDM
As noted, the applicant has an approved Transportation Demand Management. Comments on the TDM in relation to this Level III application are in 2.a, above.

Environmental Quality Standards

1. *Preservation of Significant Natural Features*
Preservation of significant natural features is being met through maintaining a 25' buffer from the annual mean high tide, as required by shoreland regulations, as well as adhering to the MaineDEP NRPA permit regarding protection of the western shore.

2. *Landscaping and Landscape Preservation*
The existing tree population is concentrated in the northwest corner of the site, and received some protection within the shoreland zone. The current Level III application does not have bearing on this portion of the property. The City Arborist has given extensive feedback on the proposed landscape plan (Plans 42, 43, 78), and is satisfied with the landscaping for this application (Attachment 3).

3. *Water Quality/Storm Water Management/Erosion Control*
The applicant has submitted a stormwater management and erosion control plan for the overall site, and for the specific needs of the Level III site plan. It has previously met City of Portland standards as outlined in Section 5 of the Technical Manual, as well as the standards required by the MaineDEP Site Location and Development Permit. David Senus, the consulting Civil Engineer, commented in his peer review of the revisions, and the specific proposal for the Level III application that the revisions presented are acceptable, with the following additional comments:

- *The Applicant has presented revisions to the previously approved stormwater management plan to include technologies now considered acceptable by MaineDEP as of January 2015, specifically Filterra units without an isolator row and Jellyfish Filter Units. The approach presented by the Applicant provides an acceptable means of meeting the General Standards as outlined in MaineDEP Chapter 500 and by the City of Portland Technical Manual Section 5 for both the Subdivision Application and the Brick South Level III Site Plan Application.*
- *Consistent with the previous approval for the Brick North Level III Site Plan Application, Woodard & Curran recommends including a condition of approval for the Brick South Level III Site Plan Application requiring that future phases of work in the vicinity of the outfall associated with "Stormwater Management Zone F" (as depicted on sheet C-4.1 of the Subdivision Application) incorporate water quality treatment measures that provide adequate treatment capacity for runoff from the untreated parking lot south of the Brick North Building*

in accordance with the General Standards. This condition does not need to be contingent upon future phases of work occurring on the site; if no future work occurs on the site, the Applicant will not be held to completing this measure.

Public Infrastructure and Community Safety Standards

a. *Consistency with Related Master Plans*
The only area currently needing clarification in regard to consistency with City standards as they relate to public infrastructure is an extension of the public portion of the access road that is being supported by EDA funding. The applicant has indicated that this section will be public roadway with the applicant providing maintenance – the pertinent road segment, ownership status, and maintenance agreements should be indicated on the final plan set.

b. *Public Safety and Fire Prevention*
The proposal has been reviewed for public safety and fire prevention, and has been found to allow for emergency response vehicles to move around all areas of the site. It provides for new and existing fire hydrants. A Fire Safety Compliance Plan (Plan 69) and Attachment E, a review of fire protection provisions for the site, have been submitted towards meeting the public safety requirements for the site.

c. *Availability and Capacity of Public Utilities*
The applicant has provided letters indicating the capacity to serve for water, sewer, gas, and power. All utility work has been reviewed with conformance with the city's Technical Manual, including all stormwater management standards. Trash will be stored in dumpsters, eventually to be served by a contracted waste management company.

Site Design Standards

1. *Massing, Ventilation, and Wind Impact*

These standards are concerned primarily with bulk, location, or height of buildings incurring health, safety, unsafe wind conditions, and direct impact of buildings on abutters. As the proposed buildings do not have direct abutters, these standards are not applicable to this site.

2. *Shadows*

As in the massing standards in 1, above, these standards are concerned with impacts on direct abutters, and are not applicable.

3. *Snow and Ice Loading*

This standard is concerned with snow and ice loading as it impacts neighboring properties and public ways, and is not applicable.

4. *View Corridors*

This standard is in regard to impacts on public view corridors, and is not applicable.

5. *Historic Resources*

The property is not in an historic district, and contains no designated landmarks. It has, however, received state review regarding the historic integrity of the brick existing buildings, and correspondence regarding this is included in Attachment G.

There are no known archeological resources on site.

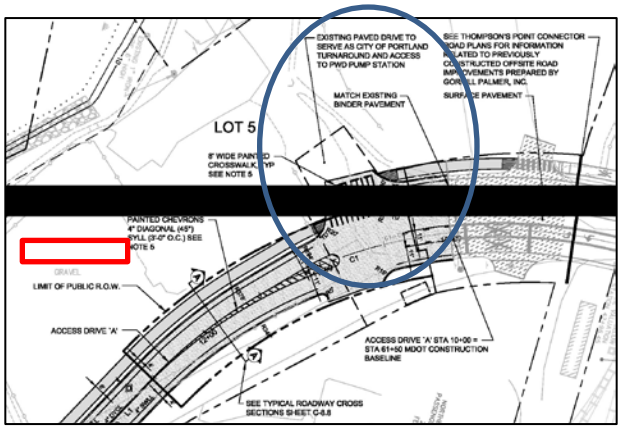
6. *Exterior Lighting*

Lighting and photometric information has been submitted in Plans 37 and 76.

7. *Noise and Vibration*

The proposal does not anticipate exceeding current noise levels for the permanent uses on the site, or overall permitted noise levels.

8. Signage and Wayfinding
Signage and wayfinding is proposed to be submitted under a separate application, and is not included in this submission.



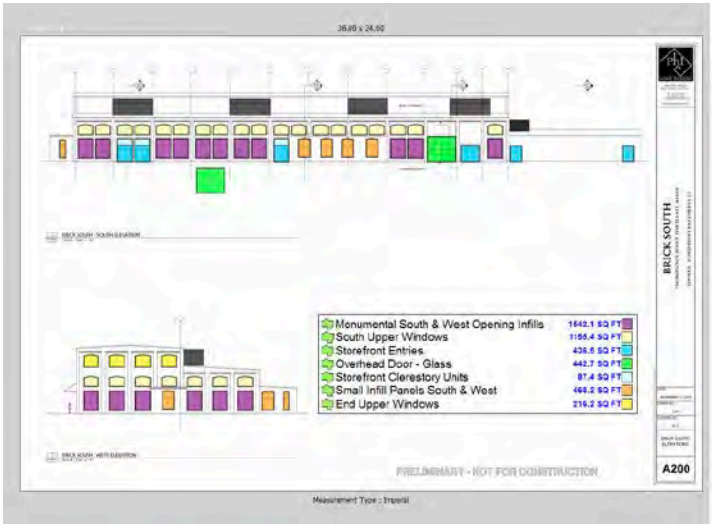
9. Zoning-Related Design Standards
Zoning-related design standards encourage dense, mixed-use development, and attractive pedestrian environments. The Design Manual standards for the B-5 zone encourages shared circulation, parking and transportation infrastructure wherever possible, and several standards for building orientation towards public streets, not applicable to this site.

XIII. EDA ROAD EXTENSION

A portion of the roadway system, approximately 400 feet, will be funded by an EDA grant. The previous subdivision review for this site included 150 linear feet of roadway on the Thompson's Point side of the new railroad crossing. Recently the EDA-funded portion of the roadway was extended another 250 feet. The terms of the EDA contract require that such rights of way be publicly owned. The revised submission materials show the limits of this extension in Plan 83 and Plan 87. DPW, through discussions with the applicant, have concurred the proposed road design specifications are acceptable. An itemized list of how these specifications diverge from the City's Technical Manual has been included as Attachment Q. The road layout, sidewalk design, site circulation, and stormwater management specifications are unchanged. The City and the applicant have agreed there will be ongoing general maintenance expectations for the applicant, including snow plowing, sanding, salting, and street sweeping.

Variations from the Technical Manual are bundled into one general waiver. An explanation of each item follows. All section references are to the City of Portland Technical Manual.

- 1.3. Requirement for turnaround on dead-end streets. This is in reference to the City street terminating without a turnaround at the end – the street itself continues, and does not physically dead-end. Since the applicant will be assuming general maintenance responsibilities beyond where the existing City turnaround currently sits on the plan, it is not being requested for this to be moved to the end of the area delineated as the Limit of Public ROW (see Figure 12).
- 1.7.2.1. This is a requirement for a perpendicular driveway connection to street. Tom Errico, consulting traffic engineer, reviewed this with the following comment: *The applicant is requesting a waiver as it relates to the angle of the Parking Garage Entrance. Given the direction of most traffic movements, the proposed design would be expected to operate adequately and therefore I support a waiver.*



12, Turnaround, ROW limits

- 1.7.2.9. A requirement for vehicular circulation to be contained off-site and not use the adjacent street system. The designation of a portion of the development's road as a public right of way results in some of the anticipated deliveries using a public rather than a private street, triggering this standard. Mr. Errico's comments: *The applicant is requesting a waiver for use of the public street for delivery truck maneuvers. Given that few large truck deliveries are anticipated for the proposed office building, I support a waiver.*
- 1.10.8. A requirement for a minimum aggregate base course thickness of 3 inches for collector roads. The application meets MaineDOT material standards which do not meet City standards, but exceed City's materials standard.

- Figure I-2. A requirement for continuous sidewalks on both sides of the collector road. There is a sidewalk planned for full length of the western side of the road, and a facing sidewalk that begins partway in to the first lot on the eastern side (suburban propane/Lots 14 & 15/location of Building F1/H on the overall site plan). The Level III site plan does not include the eastern sidewalk. Mr. Errico's comments*: The current Level III Site Plan for the Brick North/South phase does not include a sidewalk on the east side of Thompson's Point Road Extension. I support a waiver for building this sidewalk under this phase with the condition that the applicant will be responsible for construction of a sidewalk (and any necessary improvements to the Thompson's Point Road Extension) during the construction of Building H/F1, as depicted on the overall site plan.*
- Figure I-2. A requirement for a minimum roadway width of 40 feet for collector roads. The road design shows a range of 30-39 feet. Mr. Errico notes in his comments that he is comfortable with the proposed roadway cross-section.
- Figure I-2. Requirement for a minimum esplanade width of 5 feet for collector roads. Plan depicts a 4 foot esplanade.

XIV. SUPPLEMENTAL MATERIALS

On January 6th supplemental materials were submitted that included the following changes: the Level III site plan has been revised to include an 8'x20' Concrete Pad for the storage of CO2 tanks and chiller equipment on the North Side of Brick North to serve the brewery tenant in the Brick North building (Plan 87); updated Brick South Building elevations showing window openings with faux glass infill intended to replicate glass windows but eliminate the need for most event users having to cover the windows with large shades (Plan 88 & 89). There are no transparency standards in the B-5 zone that would prohibit this change. The concrete pad is a minor change, but one that will require Inspections review, and any associated life safety review before construction.

13, Brick South Elevation, Plan 88

XV. STAFF RECOMMENDATION

Subject to the proposed motions and conditions of approval listed below, Planning Division staff recommends that the planning board approve the proposed subdivision and site plan for The Forefront at Thompson's Point.

XVI. PROPOSED MOTIONS

A. WAIVERS

On the basis of the application, plans, reports and other information submitted by the applicant; findings and recommendations contained in the planning board report for the public hearing on January 12, 2016 for applications 2015-133 and 2015-159 relevant to Portland's technical and design standards and other regulations; and the testimony presented at the planning board hearing:

1. The planning board **finds/does not find**, based upon the Department of Public Works and City Engineer review *(Attachments 5 & 6),* that extraordinary conditions exist or undue hardship may result from strict compliance with the Technical Manual standards *(Sections 1.3; 1.7.2.1; 1.7.2.9; 1.10.8; I-2*), that substantial justice and the public interest are secured with the variation from these standards, and that the variation is consistent with the intent of the

ordinance. The planning board **waives/does not waive** the Technical Manual standards *(Sections 1.3; 1.7.2.1; 1.7.2.9; 1.10.8; I-2),* applicable to the extension of the public ROW.

B. SUBDIVISION

On the basis of the application, plans, reports and other information submitted by the applicant; findings and recommendations contained in the planning board report for the public hearing on January 12, 2016 for application 2015-133 relevant to the subdivision regulations; and the testimony presented at the planning board hearing, the planning board finds that the plan **is/is not** in conformance with the subdivision standards of the land use code, subject to the following condition of approval, which must be met prior to the signing of the plat:

1. The applicant shall finalize the subdivision plat for review and approval by Corporation Counsel, the Department of Public Services, and the Planning Authority. The subdivision plats shall note all conditions of public access, all relevant easements including any for city vehicle for access and turning, language regarding rights of lot ingress/egress/regress, and any applicable road maintenance limits and agreements;

2. Prior to the issuance of certificates of occupancy, the applicant shall provide a revised Declaration of Easements, Covenants and Restrictions document for review and approval by Corporation Counsel;

3. Street Lighting: The proposed street lights on the 1st segment of the public portion of the Sewell Street extension are to be privately owned, metered and maintained by the Forefront at Thompson's Point. The City shall grant a license for such a purpose at the time of street acceptance.

C. DEVELOPMENT REVIEW

On the basis of the application, plans, reports and other information submitted by the applicant; findings and recommendations contained in the Planning Board Report for the public hearing on January 12, 2016 for application 2015-159 relevant to the site plan regulations; and the testimony presented at the planning board hearing, the planning board finds that the plan **is/is not** in conformance with the site plan standards of the land use code, subject to the following conditions of approval that must be met prior to the issuance of a building permit, unless otherwise stated:

1. Future phases of work in the vicinity of the outfall associated with "Stormwater Management Zone F" (as depicted on sheet C-4.1 of the Subdivision Application) shall incorporate water quality treatment measures that provide adequate treatment capacity for runoff from the untreated parking lot south of the Brick North Building in accordance with the General Standards. If no future work occurs on the site, the Applicant will not be held to completing this measure;

2. The applicant shall provide a full construction management plan for review and approval by the Public Works Department.

4. Sidewalks and Road Improvements: At the time a Site Plan application is submitted for Buildings F1/H (or alternate Level III proposal for Lots 14 & 15 as depicted on Sheet C-2.0, *Subdivision Plan*), the portion of roadway included in Sheet C-3.0, *Site Layout Plan*, including the easterly sidewalk and all remaining road improvements, shall include provisions for conformity with the road design depicted on Sheet C-3.0, *Overall Site Plan*.

5. Final landscape plan shall incorporate 2" caliper trees in 4 foot-wide esplanade.

6. The 8'x20' Concrete Pad for the storage of CO2 tanks and chiller equipment on the North Side of Brick North, as shown on Sheet C-3.0, Site Layout Plan, will be subject to review by the Inspections Division, and any associated life safety reviews, before construction.

MAINE GENERAL PERMIT (GP)
AUTHORIZATION LETTER AND SCREENING SUMMARY

Forefront Partners I, LP
55 Lisbon Street, Suite 2400
Lewiston, Maine 04240

CORPS PERMIT #: NAE-2012-00992 amendment
CORPS PGP ID# 12-154
STATE ID# L-25672-2G-A-N

DESCRIPTION OF WORK:
Department of the Army permit NAE-2012-00992 authorized you to construct and maintain an 8' x 9' landing with an attached 4.33' x 40' aluminum ramp leading to a 10' x 10' intermediate float with a 12' x 20' float attached perpendicular extending southwest in Fore River off Thompson's Point. As requested your permit is hereby amended to shift the pier location slightly west and construct a 6' x 16' pile and timber pier with an attached 4' x 50' ramp leading to an 12'X24' intermediate float cut at an angle with a 10' x 60' line of bottom moored floats attached at an angle extending southwest in Fore River off lot 13 at Thompson's Point at Portland, Maine as shown on the attached plans entitled " the Forefront at Thompson's Point Seasonal Dock System by FST" in 3 sheets

LAT/LONG COORDINATES : 43.64897 N 70.29191 W **USGS QUAD:** ME-Portland West

I. CORPS DETERMINATION:
Based on our review of the information you provided, we have determined that your project will have only minimal individual and cumulative impacts on waters and wetlands of the United States. **Your work is therefore authorized by the U.S. Army Corps of Engineers under the enclosed Federal Permit, the Maine General Permit (GP).** Accordingly, we do not plan to take any further action on this project.

You must perform the activity authorized herein in compliance with all the terms and conditions of the GP [including any attached Additional Conditions and any conditions placed on the State 401 Water Quality Certification including any required mitigation]. Please review the enclosed GP carefully, including the GP conditions beginning on page 5, to familiarize yourself with its contents. You are responsible for complying with all of the GP requirements; therefore you should be certain that whoever does the work fully understands all of the conditions. You may wish to discuss the conditions of this authorization with your contractor to ensure the contractor can accomplish the work in a manner that conforms to all requirements.

If you change the plans or construction methods for work within our jurisdiction, please contact us immediately to discuss modification of this authorization. This office must approve any changes before you undertake them.

Condition 41 of the GP (page 18) provides one year for completion of work that has commenced or is under contract to commence prior to the expiration of the GP on October 12, 2015. You will need to apply for reauthorization for any work within Corps jurisdiction that is not completed by October 12, 2016.

This authorization presumes the work shown on your plans noted above is in waters of the U.S. Should you desire to appeal our jurisdiction, please submit a request for an approved jurisdictional determination in writing to the undersigned.

No work may be started unless and until all other required local, State and Federal licenses and permits have been obtained. **This includes but is not limited to a Flood Hazard Development Permit issued by the town if necessary.**

EMORANDUM FOR FILE

SUBJECT: Forefront Partners I,LP NAE-2012-00992 amendment

1. PRELIMINARY JURISDICTIONAL DETERMINATION:

__X__ The State of Maine has performed a **preliminary jurisdictional determination** with which the Corps concurs. **(OR)**
___Our preliminary determination of jurisdiction is that the aquatic resources within the review area are waters of the United States due to the presence of: (Check all that apply)
__X__TNWs, including territorial seas
___Wetlands adjacent to TNWs
___Relatively permanent waters (RPWs) that flow directly or indirectly into TNWs
___Non-RPWs that flow directly or indirectly into TNWs
___Wetlands directly abutting RPWs that flow directly or indirectly into TNWs
___Wetlands adjacent to but not directly abutting RPWs that flow directly or indirectly into TNWs
___Wetlands adjacent to non-RPWs that flow directly or indirectly into TNWs
___Impoundments of jurisdictional waters
___Isolated (interstate or intrastate) waters, including isolated wetlands

2. SECTION 106 COORDINATION
Coordination with the State Historic Preservation Officer Yes/ N/A **(circle one)**. Determination & date:
_____No effect by 10 day default; 8/10/12 No effect; _____May effect; _____No Adverse effect

Coordination with the Tribal Historic Preservation Officer(s) Yes/ N/A **(circle one)**.
Determination & date: 5/27/12 No effect by default;_____No effect;_____May effect; ___No Adverse effect

3. ENDANGERED SPECIES CONSULTATION: USFWS/NMFS (circle one or both).
Determination & date: 6/7/12 No effect;_____Not likely to adversely effect

4. ESSENTIAL FISH HABITAT (EFH): EFH PRESENT Y / N (circle one).
IF YES: Based on the terms and conditions of the PGP, which are intended to ensure that authorized projects cause no more than minimal environmental impacts, the Corps of Engineers has preliminary determined that this project will not cause more than minimal adverse effects to **EFH** identified under the Magnunson-Stevens Fisheries Conservation and Management Act.
Determination & date:_____No recommendations received; ___No effect; 6/7/12 May Adversely effect.
EFH recommendations: Normal TOYR construction window and Cat 2 Standards for installation.

IMPACTS: 0.0 Short-term; _____ Long-term; 0.0 Cumulative. (Brief description)

Environmental impacts are minimal both individually and cumulatively Y / N (circle one).
The original permit authorized an 8' x 9' landing with an attached 4.33' x 40' aluminum ramp leading to a 10' x 10' intermediate float with a 12' x 20' float attached perpendicular extending southwest in Fore River off Thompson's Point. This amendment authorizes the permittee to shift the pier location slightly west and construct a 6' x 16' pile and timber pier with an attached 4' x 50' ramp leading to an12'X24' intermediate float cut at an angle with a 10' x 60' line of bottom moored floats attached at an angle extending southwest in Fore River off lot 13 at Thompson's Point at Portland. The structure meets Corps guidelines for structures placed in navigable waters and there are no FNP's in the vicinity. Impacts to navigation in the immediate vicinity are considered minimal. The federal resource agencies have reviewed the original project and recommended normal TOYR restriction for construction. They determined the project is eligible for a Cat 2 GP as proposed. The permit is conditioned accordingly.

IMPORTANT: IF THE SIGNATURE BELOW IS NOT THE APPLICANT'S SIGNATURE, ATTACH LETTER OF AGENT AUTHORIZATION SIGNED BY THE APPLICANT.

By signing below the applicant (or authorized agent), certifies that he or she has read and understood the following :

DEP SIGNATORY REQUIREMENT

PRIVACY ACT STATEMENT

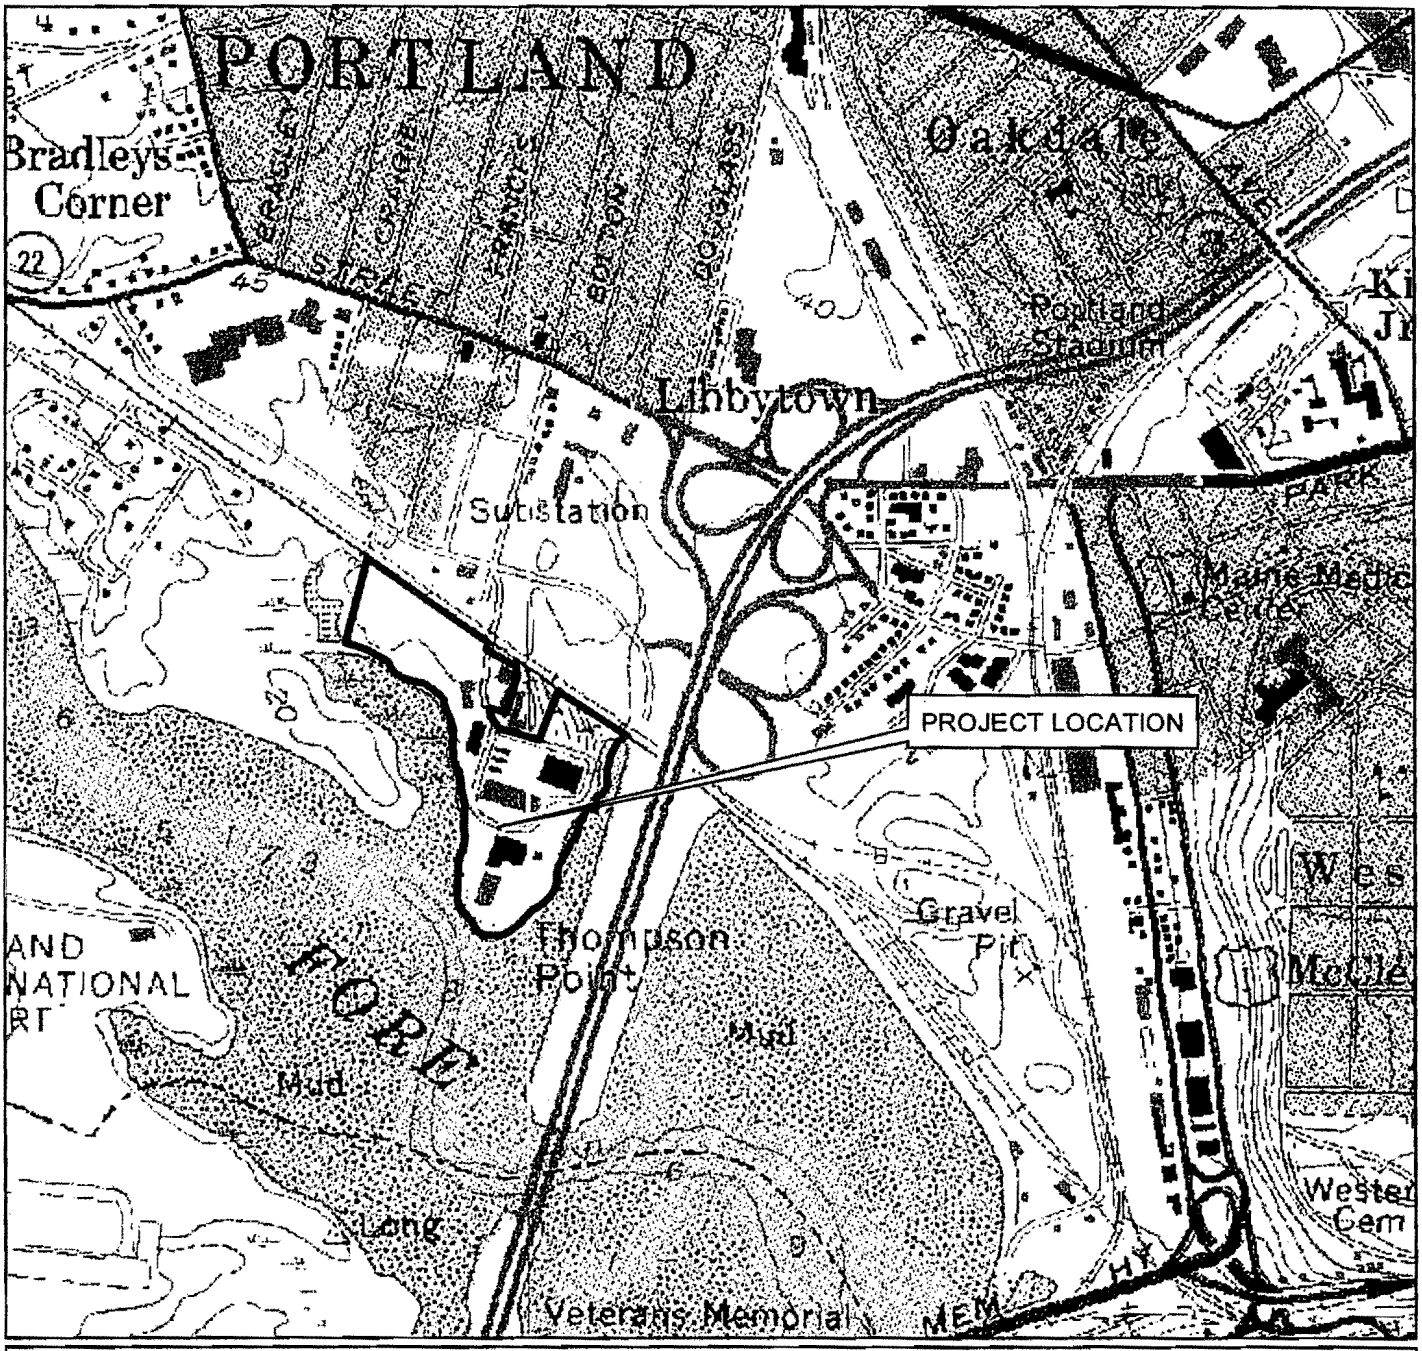
Authority: 33 USC 401, Section 10; 1413, Section 404. Principal Purpose: These laws require permits authorizing activities in or affecting navigable waters of the United States, the discharge of dredged or fill material into waters of the United States, and the transportation of dredged material for the purpose of dumping it into ocean waters. Disclosure: Disclosure of requested information is voluntary. If information is not provided, however, the permit application cannot be processed nor a permit be issued.

CORPS SIGNATORY REQUIREMENT

USC Section 1001 provides that: Whoever, in any manner within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals, or covers up any trick, scheme, or disguises a material fact or makes any false, fictitious or fraudulent statements or representations or makes or uses any false writing or document knowing same to contain any false, fictitious or fraudulent statements or entry shall be fines not more than $10,000 or imprisoned not more than five years or both. I authorize the Corps to enter the property that is subject to this application, at reasonable hours, including buildings, structures or conveyances on the property, to determine the accuracy of any information provided herein.

DEP SIGNATORY REQUIREMENT

I certify under penalty of law that I have personally examined the information submitted in this document and all attachments thereto and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe the information is true, accurate, and complete. I authorize the Department to enter the property that is the subject of this application, at reasonable hours, including buildings, structures or conveyances on the property, to determine the accuracy of any information provided herein. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.



Further, I hereby authorize the DEP to send me an electronically signed decision on the license I am applying for with this application by emailing the decision to the address located on the front page of this application (see #4 for the applicant and #8 for the agent).

SIGNATURE OF AGENT/APPLICANT

Date: 4/26/12

NOTE: Any changes in activity plans must be submitted to the DEP and the Corps in writing and must be approved by both agencies prior to implementation. Failure to do so may result in enforcement action and/or the removal of the unapproved changes to the activity.

**** FEASIBILITY REPORT ****

The Federal Aviation Administration has conducted a limited aeronautical review concerning the feasibility of a structure described as follows:

Structure:	Feasibility Study (commercial buildings)
Location:	Portland, ME
Latitude:	43-39-03.79N NAD 83
Longitude:	70-17-28.48W
Heights:	150 feet above ground level (AGL)
	175 feet above mean sea level (AMSL)

The results of this review can be found on the attached page(s).

NOTE: THE RESULTS OF OUR LIMITED REVIEW IS NOT AN OFFICIAL DETERMINATION OF FINDINGS BUT ONLY A REPORT BASED ON THE GENERAL OR ESTIMATED INFORMATION SUPPLIED FOR THE STRUCTURE. ANY FUTURE, OFFICIAL AERONAUTICAL STUDY MAY REVEAL DIFFERENT RESULTS.

If we can be of further assistance, please contact our office at (847) 294-7575. On any future correspondence concerning this matter, please refer to Aeronautical Study Number 2010-ANE-904-OE.

Additional Information

Additional information for ASN 2010-ANE-904-OE

Feasibility Study for Aeronautical Study No. 2010-ANE-904-OE

This informal feasibility report is based on the data submitted by the sponsor. This is not a formal determination but only a report based on the information furnished to this office. Please keep in mind that there is always a possibility that the final outcome of a formal aeronautical study might prove to be different from the results of this informal feasibility study.

1. The proposed site would be located approximately 3279 feet (0.53 nautical miles) northeast of the Runway 29 threshold of the Portland International J Airport (PWM) in Portland, ME.

2. Based on Part 77, notice to the FAA would be required and the structure does not exceed the obstruction standards. This information is based on airport information currently on file with the FAA.

3. This informal feasibility report does not supercede or override any state, county or local laws or ordinances.

4. Based on the unofficial nature of this study, the FAA shall not be held responsible for any type of commitment entered into by the sponsor based solely on this informal feasibility report.

5. If the location or overall AMSL height changes, the results of this feasibility study are will not apply.

6. Please refer to the ASN noted above on any future correspondence concerning this feasibility report or if you do file formal notice with the FAA concerning the structure.

Project: MHPC #0812-11; Forefront at Thompson's Point, proposed commercial development; Maine Historic Building Record documentation
Location: Portland, ME

Dear Mr. Mitchell:

The Commission is in receipt of the final Maine Historic Building Record narrative history and description from Sutherland Conservation & Consulting for the subject project. This narrative meets the requirements of the Schedule of Documentation for the former Maine Central Railroad Machine Shop and Car Repair Shop/Planing Mill at Thompson's Point, Portland, Maine.

Under separate cover from Todd Caverly, we have received the photographic documentation for the Thompson's Point facility. The photographic documentation meets the requirements of the Schedule of Documentation.

The submittals described above satisfy Stipulation A of the Memorandum of Agreement between the Economic Development Administration, the Maine State Historic Preservation Officer, the City of Portland, and Forefront Partners I, LP.

If you have any questions regarding this matter, please feel free to contact me.

Sincerely,

Kirk F. Mohney
Deputy State Historic Preservation Officer

MAINE DEPARTMENT OF TRANSPORTATION

RAIL DECISION - RR # 364

REGARDING:

Petition pursuant to 23 M.R.S.A. § 7202 by the City of Portland to Establish a Public Highway Crossing Over Railroad Tracks at Sewall Street in Portland, Maine.

ABSTRACT:

On September 7, 2011, the City of Portland petitioned the Maine Department of Transportation to establish a public grade crossing for highway traffic on Sewall Street in Portland, Maine at Railroad Mile Post 1.92 on the Mountain Division Branch Line. Portland Terminal Company has owned a private railroad crossing at that location for decades. Rail traffic is operated by Springfield Terminal Railway Company. The owner of the rails and the operator of rail traffic are owned by Pan Am Railways. This decision, RR # 364, establishes a public grade crossing on Sewall Street after the conditions outlined herein are satisfied.

Hearing was held February 27, 2012

Location of hearing: Portland City Hall

The petition is granted

Date of Decision: April 3, 2012

Commissioner: David Bernhardt, P.E.

Hearing Officer: Richard N. Hewes, Esq.

I. PROCEDURAL BACKGROUND

On September 7, 2011, pursuant to 23 M.R.S.A. § 7202, the City of Portland ("City") petitioned the Maine Department of Transportation ("Department") to establish a public highway crossing ("Crossing") over railroad tracks in Portland at Sewall Street. The tracks are owned by Portland Terminal Company, train traffic is operated by Springfield Terminal Railway Company and Pan Am Railways owns Portland Terminal Company and Springfield Terminal Railway Company (these three entities are separately and collectively referred to as the "Railroad"). Tracks currently cross over a private way immediately to the south of the terminus of Sewall Street at Mile Post 1.92 on the Mountain Division Branch Line. The City requests that a public crossing be established where the private crossing now exists.

Hearing on the aforementioned petition was ordered to be held at the City Hall in Portland at 6:00 o'clock in the evening on November 22, 2011. Asserting membership in a class that could be substantially and directly affected by Railroad Decision #364, Pan Am applied for intervenor status. At the November 22, 2011 hearing, Pan Am's motion for intervenor status was granted without objection. The City asked for a continuance. Representatives of the railroad were present and did not object. The City and Pan Am had not yet finalized an agreement on fundamental aspects of the Crossing, but felt they could reach agreement on those issues through further communications. The hearing was continued and rescheduled for January 12, 2012. The January hearing was cancelled because of a snow storm. The matter was rescheduled and a public hearing was held February 27, 2012 at Portland City Hall.

II. NOTICE

Exhibit 18 is a copy of the January 18, 2012 cover letter with attached notice of the February 27, 2012 hearing that was sent to the following interested parties, including abutters and stakeholders:

City of Portland
Nathan Moulton, Manager, Rail Transportation, MaineDOT.
George Thayer, Springfield Terminal Railway Company/Maine Central Railroad
David Fink, President, Pan Am Railways
Central Maine Power Co.
Cumberland County Commissioners
Langdon Street Real Estate
Mercy Hospital
Northern New England Rail Authority
Portland Terminal Co.
Portland Water District
Thompson's Point Inc.
The Waynflete School
Kat Beaudoin, Integrated Planning Solutions
Robert Bremm, Ritter Project Management
Tony Donovan, Maine Rail Transit Coalition

Exhibits 19 and 20 are pages from the February 7 and 13, 2012 editions of the Portland Press Herald, a newspaper that has general circulation in the area affected by the City's petition. These pages contain notices which state that the hearing would be held February 27, 2012 at 6:00 p. m, in the Portland City Hall. Notice was proved to have been given in the manner prescribed by 23 MRSA § 7202 and 5 MRSA § 8053. Hearing on the aforementioned petition was held at the time and place stated in the notice. The hearing officer viewed the crossings on the day of the hearing and his observations are part of the evidence.

III. EVIDENCE

A. Exhibits.

Exhibit #

1. September 7, 2011 hearing request from Danielle P. West-Chuhta, Esq., Counsel for the City of Portland.

2. Sign-up sheet for November 22, 2011 hearing.

3. Maine Sunday Telegram's Classified Section's Tear Sheet of Notice of Hearing published October 30, 2011 which indicated the hearing would be held at the Portland Transportation Center on November 22, 2011 at 6:00 p.m.

4. Notice of Hearing which indicated that the hearing would be held at the Portland Transportation Center on November 22, 2011 at 6:00 p.m.

5. Copy of Letter to Danielle P. West-Chuhta, Esq. and Interested Parties dated October 27, 2011 enclosing the Notice of Hearing which indicated that the hearing would be held at the Portland Transportation Center.

6. Notice of Hearing indicating a new location for the hearing being held on November 22, 2011 to be the Portland City Hall.

7. Copy of Letter to Danielle P. West-Chuhta, Esq. and Interested Parties dated November 3, 2011 enclosing the Notice of Hearing indicating the new location for the hearing to be held on November 22, 2011 to be the Portland City Hall.

8. Undeliverable return envelope with hearing notice mailed to Northern New England Rail Authority.

9. Email to Patricia Quinn at NNEPRA dated November 15, 2011, enclosing a copy of the Notice of Hearing with the new location of Portland City Hall incorporated.

10. Portland Press Herald Newspaper Classified Section Tear Sheet with Notice of

Hearing published November 4, 2011 with the new location of Portland City Hall incorporated.

11. Maine Sunday Telegram Classified Section Tear Sheet with Notice of Hearing published November 6, 2011 with the new location of Portland City Hall incorporated.

12. Pan Am Railways Application for Intervenor Status.

13. Email from Danielle West-Chuhta, Esq. waiving the City of Portland's objections to the Application for Intervenor Status.

14. November 22, 2010 hearing transcript.

15. Portland Press Herald Newspaper's Classified Section's Tear Sheet of Notice of Hearing published December 22, 2011.

16. Portland Press Herald Newspaper's Classified Section's Tear Sheet of Notice of Hearing published December 29, 2011.

17. Letter to Danielle P. West-Chuhta, Esq. and Interested Parties dated December 12, 2011 with Notice of the January 12, 2012 Hearing.

18. Letter to Danielle P. West-Chuhta, Esq. and Interested Parties dated January 18, 2012 with Notice of the February 27, 2012 Hearing.

19. Portland Press Herald Newspaper Tear Sheet (p. D 6) published February 7, 2012 with Advertised Notice of February 27, 2012 Hearing.

20. Portland Press Herald Newspaper Tear Sheet (p. D 3) published February 13, 2012 with Advertised Notice of February 27, 2012 Hearing.

21. Sign-in Sheet for Attendees of the February 27, 2012 Public Hearing.

22. September 7, 2012 petition for hearing with margin notations.

23. Subdivision plat of the area of the proposed Sewall Street crossing.

24. Written testimony by Gregory Mitchell, City of Portland.

25. Public Hearing Submission by City of Portland with photos, plans and descriptions of proposed crossing and Thompson's Point development.

26. Email (two pages) confirming that Pan Am Railways and the developer of Forefront at Thompson's Point reached agreement relative to the Crossing.

A. Public Comments.

Danielle P. West-Chuhta, Esquire, Associate Corporation Counsel for the City, spoke in support of the petition to establish the Crossing. Ms. West offered Exhibit 22, the request for hearing, and Exhibit 23, a plat map showing the area surrounding the Crossing and the planned extension of Sewall Street. The Crossing is located at Mile Post 1.92 on the Mountain Division Branch Line. Trains travel at 10 miles per hour through the Crossing area. The Crossing will be at grade and the purpose of the Crossing will be to create a way for highway traffic to travel to and from Thompson's Point, which will be developed in the near future.

The terminus of Sewall Street, a town way, is at the northern boundary of the railroad corridor. A private way, also known as Sewall Street, continues through the Crossing and runs into Thompson's Point. The tracks currently run through that private way. The City plans to extend Sewall Street about 130 feet to the south of the existing crossing. When this piece of road is accepted as a public way, the tracks will be located within a public street. The City requests that a public crossing be established where the private crossing now exists.

Gregory Mitchell, Acting Director of the City's Department of Planning and Urban Development said that the Crossing is part of a larger plan to develop Thompson's Point, a peninsula to the south of the Crossing that extends into the Fore River. The planned development will be a world class destination that will provide access to cultural functions, athletic events and other entertainment activities. Officials from the Portland Fire Department have reviewed plans for the proposed Crossing and approve of the design.

Christopher Thompson, a representative of Forefront Partners I, LP, the company that plans to develop Thompson's Point, said that Thompson's Point will be converted into a 27 acre complex called the Forefront at Thompson's Point. The development will have an event center, a concert hall and amphitheater, a sports medicine facility, a hotel, a restaurant, office buildings and a parking garage. The event center will offer 3500 basketball fans the chance to view Portland's local professional team. Vendors and entrepreneurs will be able to display their wares at trade shows in a 44,000 foot facility. Music enthusiasts will have the opportunity to enjoy concerts at a 4500 seat auditorium and office space will be available as well. The Forefront at Thompson's Point will serve to connect walking trails to the Portland Transportation Center. Given the large number of people expected to use this facility, the existing crossing must be upgraded to facilitate the flow of public highway traffic to and from Thompson's Point.

Stephen Bushey, an engineer who works for Deluca Hoffman Associates, spoke in favor of the Crossing. He offered Exhibit 25, a brochure entitled Public Hearing Submission by City of Portland. Exhibit 25 contains photos, plans and descriptions of the Crossing area, including the planned development. Surface parking will be available for 712 vehicles and the parking garage will have space for 732 cars.

The Crossing will be constructed sometime between 2012 and 2014 at a cost of about $500,000 - $600,000. The two sets of tracks currently in place, a main line and a siding, will be in the proposed Crossing. The Crossing will be about 36 feet wide and will have three lanes for automobiles. Incoming and outgoing traffic will each have a dedicated lane. The middle lane

will be reversible to accommodate incoming or outgoing automobiles when traffic is heavy. A path on the west side of the inbound automobile lane will be available for pedestrians.

Flashing warning lights will be attached to a cantilevered structure over the Crossing to warn highway travelers about passing rail traffic. Pedestrian access will be controlled by automatic gates. Gates will not be installed over automobile lanes. The reversible middle lane will be used for heavy traffic during peak hours. Traffic control workers will direct traffic as needed. According to Exhibit 26, the developer has concluded an agreement with the Railroad that obligates the developer to reimburse the cost of improving the Crossing.

To access the planned development, highway traffic must enter the Thompson's Point Access Road from the Fore River Parkway. Once on the access road, travelers will move in an easterly direction until they turn onto Sewall Street at a 90 degree angle and travel south toward the Crossing. Southbound motorists travel down a slight decline that begins about 50 feet north of the Crossing. The tracks cross Sewall Street in an east-west direction at the bottom of that dip in the road. Sewall Street runs in a north-south direction and intersects the tracks at a ninety degree angle. The approach for motorists leaving Thompson's Point is level.

Automobile traffic is expected to pass through the proposed crossing during peak hours at the rate of 955 total trips. The highway speed limit at the crossing will be 25 miles per hour. After southbound motorists turn onto Sewall Street, they will have sight distance of about 500 feet to the Crossing. Highway traffic approaching from Thompson's Point can view the Crossing from a distance of 300 feet.

Two to four freight trains per week move through the Crossing. No passenger train traffic uses the Crossing at this time. Track speed is ten miles per hour. Randall Pike, P. E., a member of the firm that will design the Crossing, said that eastbound trains will have sight distance on their approach to the Crossing of several thousand feet and westbound trains will have sight distance of about 1000 feet to the Crossing.

The surrounding area is generally industrial. A parking lot and passenger loading area in the rear of the Portland Transportation Center are on the northeast quadrant of the Crossing. A power transmission facility and two story metal building are on the northwest quadrant. An Amtrak office resembling a mobile home is on the southeast quadrant. A fenced parking lot that holds dozens of trailers is on the southwest quadrant. An Amtrak passenger station is located about 600 feet to the east of the Crossing.

Nathan Moulton, Manager of Rail Transportation for the Department, said that the Department supports the proposed Crossing. Exhibit 26 states that the Department will be provided with plans of the Crossing for review and approval. Signage, pavement markings, gates, lights and other safety installations must be approved by the Department and will conform to the Manual on Uniform Traffic Control Devices.

Robert Burns, a lawyer for the Railroad, confirmed that the Railroad and the developer were close to reaching an agreement for the development of the Crossing. James Howard, a lawyer for the developer of Thompson's Point, said that the parties were close to finalizing

financial concerns and that safety and design issues were resolved. Robert Haines, a Portland resident, spoke in favor of the Crossing, but expressed doubt that the access road would accommodate inevitable congestion during big events. Dory Waxman, a former City Councilor and a resident of Portland, spoke in favor of the Crossing and stressed that traffic during big events would be manageable because designers would anticipate traffic congestion problems.

IV. FINDINGS AND CONCLUSIONS

Based on exhibits, hearing testimony and site visits, the following findings are made:

1. Parties. The City of Portland petitioned the Maine Department of Transportation to issue an order establishing a public crossing. Portland Terminal Company owns the railroad in the proposed crossing area and Springfield Terminal Railway Company operates rail traffic. Pan Am Railways owns these two entities.

2. Location of Proposed Crossing. The proposed Crossing will be located at Mile Post 1.92 on the Mountain Division Branch Line, the site of a private crossing.

3. Status of Existing Crossing. The existing crossing is private. The terminus of Sewall Street, a town way, ends on the northern edge of the rail corridor. A private way, also named Sewall Street, runs in a southerly direction over the tracks to Thompson's Point. The City plans to extend Sewall Street an additional 130 feet south of the existing crossing. When this road is accepted as a public way, the tracks will be located within a public street.

4. Crossing Geometry. Two sets of tracks, a mainline and a siding, run through Sewall Street to form a double-track crossing. The rails run in an east-west direction and intersect Sewall Street at a 90 degree angle. Sewall Street runs in a north-south direction.

5. Sight Distance. Eastbound trains will have sight distance on the approach to the Crossing of several thousand feet and westbound trains will have sight distance of about 1000 feet. Southbound motorists will approach on a decline and will have a clear view of the Crossing for about 500 feet. Motorists traveling north on Sewall Street from Thompson's Point will have sight distance of about 300 feet.

6. Railroad Traffic. Four trains pass through the Crossing each week. Timetable speed over the rails is 10 miles per hour.

7. Highway Traffic. Automobile traffic is expected to pass through the Crossing during peak hours at the rate of 955 total trips. The speed limit for automobiles will be 25 miles per hour. The highway in the Crossing will be 36 feet wide with three lanes for automobile traffic. One lane will be dedicated for incoming highway traffic and one lane will be dedicated to outgoing vehicles. The middle lane will be reversible to accommodate either incoming or outgoing vehicles when traffic is heavy. A paved path will facilitate the flow of pedestrian traffic.

8. Purpose. The Crossing will allow public highway traffic to pass through the railroad corridor and flow into the planned development at Thompson's Point.

9. Area Land Use. A parking lot and passenger loading area for the Portland Transportation Center are on the northeast quadrant of the Crossing. A power transmission facility and a two story metal building occupy the northwest quadrant. An Amtrak office resembling a mobile home is on the southeast quadrant. A parking lot that holds dozens of trailers is on the southwest quadrant. An Amtrak passenger station is located about 600 feet to the east of the crossing.

10. Construction and maintenance. The Crossing is expected to be constructed between 2012 and 2014. The estimated cost is $500,000 to $600,000.

11. Design. The Railroad and Forefront Partners I, LP have reached agreement on the design of the Crossing. The Department will be provided with the plans for review and approval to ensure that the design meets safety requirements. Officials from the Portland Fire Department approve of the proposed Crossing.

V. ORDER

Based upon the evidence and the applicable law, it is hereby ORDERED that the City of Portland's Application to Establish a public highway crossing along the planned extension of Sewall Street at Mile Post 1.92 on the Mountain Division Branch Line is granted upon the fulfillment of the following conditions:

1. The City shall lay out and accept a public way across the Mountain Division Branch Line at Railroad Mile 1.92 in Portland.

2. The following actions shall be taken and safety measures installed:

   a) All safety measures including signalization, gates, bells, signage, lights and pavement shall be properly designed and constructed in accordance with the Department's Standard Specifications and Standard Details in effect at the time the Department approves the Crossing.

   b) All safety measures that are required or recommended by the Manual on Uniform Traffic Control Devices (MUTCD) in effect when the Department approves the Crossing shall be properly located and installed.

   c) Final design plans for traffic lanes at or near the Crossing shall be submitted to the Department for approval at least 30 days before construction of the Crossing commences. Construction shall not begin until the Department approves the plans.

d) The Railroad and the City shall coordinate the planning, construction and testing of all signals and other safety devises to ensure that they are properly synchronized and in good working order before the Crossing is opened for use.

e) All pedestrian access transitions at the Crossing shall be designed and installed in compliance with the Americans with Disabilities Act (ADA).

f) Street lighting shall be installed at the crossing. Said lighting shall comply with all federal, state and local requirements.

g) The City shall be responsible for the cost of constructing the Crossing. The Railroad shall be responsible for operating and maintaining the Crossing.

h) If the Crossing has not been approved by the Department for public use by January 1, 2017, then the authority to establish the Crossing under this order shall expire unless the City or the Railroad petitions the Department before January 1, 2017 to modify this Decision for an extension of the deadline.

MAINE DEPARTMENT OF TRANSPORTATION

David Bernhardt, P. E.
Commissioner

VI. APPEAL RIGHTS

Pursuant to 23 M.R.S.A. § 7202, this decision shall be final and binding on all parties unless an appeal from this decision is taken. Any party wishing to appeal must, within 14 days from the date of the filing of this decision, file in the office of the Maine Department of Transportation its reasons for appeal and shall cause to be served on any other interested parties, a copy of the reasons for appeal certified by the department. The department must be made a party to the appeal.

Pursuant to the requirements of 5 M.R.S.A. § 11001 et seq. appellate procedures also apply to an appeal of this decision. Pursuant to 5 M.R.S.A. § 11002, a petition for review of this decision shall be filed within 30 days after receipt of notice of this decision if the appeal is taken by a party to the proceeding for this decision. Any other person aggrieved shall have 40 days from the date the decision was rendered to petition for review. If the review sought is from the Department's failure or refusal to act, the petition for review shall be filed within 6 months of the expiration of the time within which the action should reasonably have occurred.

Pursuant to 5 M.R.S.A. § 11002 (2), the petition shall specify the persons seeking review, the manner in which they are aggrieved and the final agency action which they wish reviewed. It shall also contain a concise statement as to the nature of the action or inaction to be reviewed, the grounds upon which relief is sought and a demand for relief which may be in the alternative. Copies of the petition for review shall be served by Certified Mail, Return Receipt Requested, upon the Maine Department of Transportation, all parties to the proceedings, and the Department of the Maine Attorney General.

Applicant:	Chris Thompson Forefront Partners I, LP 501 Danforth Street Portland, Maine 04102
Project Location:	1 Thompson's Point Rd. Portland, Maine 04102
Parcel #	201 A005001
Project:	Thompson's Point/Mixed-use Development
Identification #:	Reg. 01-00155-A-N
Permit Category:	200 Plus PCE
Traffic Engineer:	Thomas Gorrill/Randy Dunton Gorrill-Palmer Consulting Engineers 300 Southborough Dr., #200 South Portland, ME 04106

Pursuant to the provision of 23 M.R.S.A. § 704-A and Chapter 305 of the Maine Department of Transportation's (MaineDOT) Regulations, the City of Portland and MaineDOT have determined that a one-time extension of the Traffic Movement Permit issued for Thompson's Point is warranted. The permit will be considered expired if construction of the project has not been completed by March 1, 2027, unless a modification is approved prior to this date.

In the event the permit expires prior to construction being completed by the end of the one-time extension date, the Applicant shall submit a new permit, with information pertaining to Sections 1 thru 6 of the General Submission Requirements and a Notice of Intent to File, as outlined in Chapter 305, and address any changes in facts since the initial analysis and approval. Consistent with Section 8 of Chapter 305, in the event the Applicant completes all mitigation required for the Development, but cannot complete the Project within the one-time extension date, the Developer will be required to submit a TMP Modification that includes any programmatic changes to the Development for review and approval. An applicant may be required to provide additional mitigation of permitted trips as a result of changes to the Development program increase beyond the initial approval. Additionally, the Developer may be required to attend a Scoping Meeting, unless the Maine Department of Transportation waives this requirement.

389 Congress Street, Portland, Maine 04101 | ph: 207.874.8608 | cdg@portlandmaine.gov

All required terms and mitigation of the original TMP approval remain in effect.

Applicant:	Thompson's Point Development Company Inc.
Project Location:	Thompson's Point Rd, Portland, ME Portland Tax Map 201Lot(s) 8, 9 and 10 and Map 202 Lots 2, 4 and 5
Project:	Mixed use Development
Identification #:	Reg. 01-00155-A-N
Permit Category:	200 Plus PCE
Traffic Engineer:	Thomas Gorrill Gorrill-Palmer Consulting Engineers PO Box 1237 15 Shaker Rd. Gray, ME 04039

Pursuant to the provision of 23 M.R.S.A. § 704-A and Chapter 305 of the Department's Regulations, the Maine Department of Transportation (MaineDOT) has considered the application of Thompson's Point Development Company Inc with supportive data, agency review and other related materials on file.

PROJECT DESCRIPTION

The applicant proposes to construct a 97,697 sf event center/convention hall/exhibit hall; 32,000 sf concert hall plus outdoor venue for up to 4,800 attendees; 378,000 sf of office space; 4,000 sf of medical office space; 20,000 sf gym and rehabilitation center; 125 room hotel; 6,000 sf of restaurant space (high-turnover sit down). The site is forecast to generate 734 AM and 1,091 PM weekday peak hour trip ends.

Findings

Based on a review of the files and related information, MaineDOT approves the Traffic Movement Permit Application of Thompson's Point Development Company Inc. subject to the following conditions:

MITIGATION

On-Site Mitigation

All Site Entrances

All entrances shall have overhead illumination provided, if not existing, to illuminate the intersections per MaineDOT standards at a minimum. Overhead lighting shall have an average of

0.6 to 1.0 foot candles, with the maximum to minimum lighting ratio of not more than 10:1 and an average to minimum light level of not more than 4:1.

Thompson's Point Road

Thompson's Point Road shall be widened to accommodate an 8 foot shared bike/pedestrian path, a 3 foot wide grass esplanade, a 3 foot shoulder with granite curb, an 11 foot wide outbound lane, and 11 foot wide flush concrete median, an 11 foot wide inbound lane and a 3 foot shoulder with granite curb. This section will be constructed from the site driveway to the Fore River Parkway. The 250 feet of flush median closest to Fore River Parkway shall be designated as an exclusive left turn lane outbound. The shared bike/pedestrian path shall have a crossing built at the Sewall Street cul de sac and the path extended to the existing sidewalk on Sewall Street. Another pedestrian crossing shall be installed where the current pedestrian crossing is at the bus/train station. Both crossings shall have solar powered/radio interconnected pedestrian activated rectangular rapid flashing beacon lights installed.

Thompson's Point Development

No sporting events or concerts shall begin between 4 pm and 7pm Monday through Friday.

During large sporting and concert events, the applicant shall ensure that there are flaggers and uniformed police officers present to ensure that there will be two inbound lanes prior to the event and two exit lanes after the event. Flaggers/uniformed police officers shall be stationed to ensure that pedestrians are able to cross at either of the two crosswalks, at the Transportation Center Entrance to let busses in or out and also at the transportation center parking lot entrances to ensure that transportation center patrons leaving the parking lots are merged into the out-bound flow. Uniformed police officers shall be present after an event to direct traffic at the Thompson's Point Road/Fore River Parkway intersection. Retro-reflective traffic cones shall be used by the development to create the reversible lane. Flaggers will direct vehicles into the proper lanes.

Off-Site Mitigation

Fore River Parkway/Thompson's Point Road/I-295 Exit 5A off-ramp

The Southbound off ramp at Exit 5 A shall be reconstructed to have a separate 13 foot wide left turn lane and 13 foot wide through lane. The widths include the

required curb offset. The left lane shall extend back 200 feet. Install Queue detector at the ramp gore area to act as pre-emption for the signal should the queue spill back that far.

Modify traffic signal timing and phasing accordingly.

Fore River Parkway/Congress St/I-295 Exit 5 B off-ramp

Widen the southbound off-ramp to accommodate a 5 foot wide right shoulder, two 12 foot wide right turn lanes and a 2 foot curb offset for a distance of 125 feet with an appropriate taper. Install Queue detector at the ramp gore area to act as pre-emption for the signal should the queue spill back that far.

Re-stripe Congress Street Westbound to accommodate a longer westbound left turn lane, extend back to the end of the island (to the slip lane from Park Ave to Congress St).

Modify traffic signal timing and phasing accordingly.

Congress St/Stevens Ave

Restripe Steven's Avenue to an exclusive left and a shared left/thru/right and modify traffic signal timing and phasing accordingly.

The developer shall pay an impact fee in the amount of $15,000 for inlaid thermoplastic paint skips, retro-reflective back plates and overhead lane usage signage. This money will be put towards improvements funded by PIN 19078.00.

Congress St/Westbrook St

The developer shall pay an impact fee in the amount of $15,000 for inlaid thermoplastic paint skips, retro-reflective back plates and overhead lane usage signage. This money will be put towards improvements funded by PIN 19078.00.

Congress/Frost St

The developer shall pay an impact fee in the amount of $15,000 for inlaid thermoplastic paint skips, retro-reflective back plates and overhead lane usage signage. This money will be put towards improvements funded by PIN 19078.00.

Transportation Demand Management

In lieu of additional mitigation, Transportation Demand Management shall be used to offset the traffic impacts on the roadway network. The City has implemented a Transportation Oriented Development Tax Increment Financing District for the Thompson's Point Development. This development would benefit from some increased transit connections to the airport and Old Port, funding for handicap accessible taxis or for increase in parking at the Transportation Center.

Overall

A. Provide all necessary auxiliary signs, striping and pavement markings to implement the improvements described herein according to State of Maine and/or National standards.

B. All plantings and signs (existing and/or proposed; permanent and/or temporary) shall be placed and maintained such that they do not block available sight distances and do not violate the State's "Installations and Obstructions" law. No signage or plantings shall be allowed within the "clear zone" if they constitute a deadly fixed object as determined by MaineDOT. All signs shall meet MRSA Title 23, Chapter 21, Section 1914: "On-Premise Signs".

C. If any of the supporting data or representations for which this permit is based changes in any way or is found to be incorrect / inaccurate, the applicant shall request in writing from MaineDOT a decision of what impacts those changes will have on the permit. The applicant will then be required to submit those changes for review and approval and additional mitigation as a result of those changes may be required at the expense of the applicant.

D. Because the proposed project affects the state highway and drainage systems and requires improvement to that system, the applicant must obtain approval of the design plans and coordinate work through MaineDOT's State Traffic Engineer, who can be reached at (207)-624-3620 in Augusta.

Re: The Forefront at Thompson's Point, Portland:
Voluntary Response Action Program- No Action Assurance Letter

Dear Mr. Thompson:

The Maine Department of Environmental Protection (Department) has received and reviewed an application submitted in June 2012, by your environmental consultant Credere Associates, LLC (Credere) to the Department's Voluntary Response Action Program (VRAP) for the Thompson's Point property located at 1 Thompson's Point in Portland, Maine. The following reports were compiled for this site as part of the Greater Portland Council of Government's (GPCOG) Brownfields Program and were reviewed along with this application: A Phase One Environmental Site Assessment (ESA) for the Thompson's Point property prepared by Credere, dated December 5, 2011, a Phase II ESA for Thompson's Point, prepared by Credere dated July 11, 2012, as well as a Voluntary Response Action Program Work Plan, Revision 2 dated February 27, 2013 (Work Plan). Additional documentation submitted to MDEP previously for review included two Phase I ESAs prepared by Gemini Geotchnical Associates (GGA) dated February 6, 1991 and May 16, 2006, a December 15, 1998 Test Pit Investigation report prepared by GGA, and a February 26, 1999 No Further Action Assurance Letter issued by MEDEP VRAP to a previous applicant. The current application was submitted to the Department with the request that the site participate in the VRAP and that Forefront Partners I, LP (Forefront Partners), as the applicant to the VRAP, receive the protections provided by the VRAP Law.

The Thompson's Point Property (the site) is composed of five City of Portland tax map lots (Map 201 Lots A-5, A-8, and A-10, and Map 202 Lots A-1 and A-4) totaling approximately 27.5 acres located on a peninsula along the Fore River in Portland. Land use in the area is currently primarily commercial. The site has been used historically for the following activities: a train car maintenance yard, automobile repair facilities, utility distributors (natural gas and propane), building supply retailers, metal working, concrete block manufacturing, bomb shell casing manufacturing (ordinance plant), textile manufacturing, various construction contractor offices, paperboard production, trailer storage, trucking facilities, and warehousing. The Credere Phase ESA identified the past commercial/industrial use of the property as an environmental concern and identified eight specific Recognized Environmental Concerns for further Phase II

investigation. The Phase II investigation concluded that there is soil and groundwater contaminated with petroleum and hazardous substances, and that other universal and special wastes are located on the site, including building materials.

Based on the information presented in the above listed reports, the Department agrees with the following recommended actions as proposed in the Work Plan:

1. Known and/or potentially contaminated soils that are disturbed during redevelopment of the site will be managed according to the Work Plan and associated December 12, 2012 Soil Management Plan (SMP). Contaminated soils that are within 12 inches of the developed ground surface or removed and replaced onsite will be covered with a marker layer and a minimum of 12 inches of clean fill, and/or 6 inches of clean sand and gravel over the contaminated soil and at least 3 inches of asphalt/concrete or brick. If excess contaminated soil is generated that cannot be re-used onsite, the material will be disposed offsite at an appropriate facility as special waste.

2. Known and/or potentially contaminated groundwater that is encountered during site redevelopment work will be managed in accordance with the Work Plan and associated December 12, 2012, Groundwater Management Plan.

3. Universal, special, and hazardous waste will be properly managed and removed from the site and disposed at an appropriate facility.

4. PCB containing building materials will be characterized and managed in an appropriate manner and in accordance with the applicable provisions of the Toxic Substances Control Act 40 CFR 761 et seq. Plans for such characterization and management shall be submitted concurrently to USEPA Region 1 and the Department for review and approval.

5. Asbestos abatement and/or management activities in onsite buildings will be conducted in accordance with all applicable State and Federal rules and regulations.

6. Lead based paint abatement/management issues shall be conducted as discussed in the Work Plan and in accordance with all applicable state and federal regulations.

7. A soil screening program will be conducted after the demolition of the site buildings and removal of the concrete slabs as discussed in the Work Plan. Activities that will be completed based on the results of the screening program are discussed in the Work Plan.

8. A deed restriction will be recorded at the Cumberland County Registry of Deeds that:
    1) Prohibits excavation/disturbance of soils onsite without notification of the Department, and references the existence of an Environmental Management Plan that will be developed for the site and submitted for approval by the Department prior to deed restriction recording.
    2) Prohibits withdrawal of groundwater without notification of the Department, and references the existence of an Environmental Management Plan that will be developed for the site and submitted for approval by the Department prior to deed restriction recording.

These restrictions will be placed as Declaration of Environmental Covenants consistent with this letter and in a manner that is acceptable to the Department.

Provided that the actions described above are completed to the satisfaction of the Department, Forefront Partners I, LP and its successors and/or assigns, as well as those persons identified in 38 M.R.S.A. § 343-E(6), will be granted the liability protection provided by 38 M.R.S.A. § 343-E(1) for the property located at 1 Thompson's Point, in Portland, Maine identified as Map 201 Lots A-5, A-8, and A-10, and Map 202 Lots A-1 and A-4. The Department will take no action against Forefront Partners I, LP, its successors and assigns, and all those persons identified in 38 M.R.S.A. § 343-E(6).

Once the proposed and recommended remedial measures at the property have been implemented to the satisfaction of the Department, a report demonstrating the successful completion of the tasks must be forwarded to the VRAP. A report may be submitted when all of the remedial activities have been completed for the entire property or in stages as portions of the property are remediated and ready for redevelopment. Upon determining successful conclusion of the remedial tasks, the Department will issue a Commissioner's Certificate(s) of Completion to Forefront Partners I, LP for those portions of the property where remedial activities have been completed.

If you have any questions, please call me at 207-287-4853.

Sincerely,

Gordon Fuller

Re: Thompson's Point, Portland: Revised Voluntary Response Action
No Action Assurance Letter-Revised January 11, 2018*

Dear Mr. Thompson:

At your request, the Maine Department of Environmental Protection (MEDEP) is issuing this revised No Action Assurance (NAA) letter for Thompson's Point in Portland, Maine. This letter amends the original NAA letter issued by the Department on March 6, 2013.

The MEDEP has received and reviewed an application submitted in June 2012, by your environmental consultant Credere Associates, LLC (Credere) to the Department's Voluntary Response Action Program (VRAP) for the Thompson's Point property located at 1 Thompson's Point in Portland, Maine. The following reports were compiled for this site as part of the Greater Portland Council of Government's (GPCOG) Brownfields Program and were reviewed along with this application: A Phase One Environmental Site Assessment (ESA) for the Thompson's Point property prepared by Credere, dated December 5, 2011, a Phase II ESA for Thompson's Point, prepared by Credere dated July 11, 2012, as well as a Voluntary Response Action Program Work Plan, Revision 2 dated February 27, 2013 (Work Plan). Additional documentation submitted to MDEP previously for review included two Phase I ESAs prepared by Gemini Geotechnical Associates (GGA) dated February 6, 1991 and May 16, 2006, a December 15, 1998 Test Pit Investigation report prepared by GGA, and a February 26, 1999 No Further Action Assurance Letter issued by MEDEP VRAP to a previous applicant. The current application was submitted to the Department with the request that the site participate in the VRAP and that Forefront Partners I, LP (Forefront Partners), as the applicant to the VRAP, receive the protections provided by the VRAP Law.

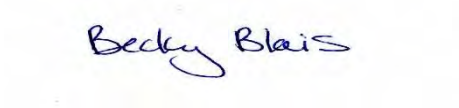
    2) Prohibits withdrawal of groundwater without notification of the Department, and references the existence of an Environmental Management Plan that will be developed for the site and submitted for approval by the Department prior to deed restriction recording.



These restrictions will be placed as Declaration of Environmental Covenants consistent with this letter and in a manner that is acceptable to the Department.

Provided that the actions described above are completed to the satisfaction of the Department, Forefront Partners I, LP and its successors and/or assigns, as well as those persons identified in 38 M.R.S.A. § 343-E (6), will be granted the liability protection provided by 38 M.R.S.A. § 343- E(l) for the property located at 1 Thompson's Point, in Portland, Maine identified as Map 201 Lots A-5, A-8, and A- 10, and Map 202 Lots A-1 and A-4. The Department will take no action against Forefront Partners I, LP, its successors and assigns, and all those persons identified in 38 M.R.S.A. § 343-E (6).

Once the proposed and recommended remedial measures at the property have been implemented to the satisfaction of the Department, a report demonstrating the successful completion of the tasks must be forwarded to the VRAP. A report may be submitted when all of the remedial activities have been completed for the entire property or in stages as portions of the property are remediated and ready for redevelopment. Upon determining successful conclusion of the remedial tasks, the Department will issue a Commissioner's Certificate(s) of Completion to Forefront Partners I, LP for those portions of the property where remedial activities have been completed.

If you have any questions, please call me at 207-446-2564.

Sincerely,

Becky Blais

Re: Voluntary Response Action Program
Brick North property-No Revised No Action Assurance Letter

Dear Ms. Drouin:

As we discussed in email correspondence on December 11, 2017, the Department did not issue a revised No Action Assurance (NAA) letter upon receipt of the revised VRAP application, which was submitted to the Department on January 25, 2017 and included the addition of Lots 14 & 15 (the Suburban Propane lots). The Department accepted the revised application and included these additional lots under the existing March 6, 2013 NAA, which covers the overall Site.

If you have any questions, please do not hesitate to contact me.

Sincerely,

Becky Blais

DEPARTMENT ORDER

IN THE MATTER OF

FOREFRONT PARTNERS I LP	) NATURAL RESOURCES PROTECTION ACT
Portland, Cumberland County	) COASTAL WETLAND ALTERATION
GRADING, LANDSCAPING,	) SIGNIFICANT WILDLIFE HABITAT
STORMWATER OUTFALLS, GRANITE	)
STAIRS, LANDSCAPING, PIER SYSTEM	)
L-25672-4P-H-N	)
L-25672-FS-I-N	) WATER QUALITY CERTIFICATION
L-25672-2G-J-N	) FINDINGS OF FACT AND ORDER

Pursuant to the provisions of 38 M.R.S. §§ 480-A–480-JJ, Section 401 of the Clean Water Act (33 U.S.C. § 1341), and Chapters 310, 315, and 335 of Department rules, the Department of Environmental Protection (Department) has considered the application of FOREFRONT PARTNERS I LP (applicant) with the supportive data, agency review comments, and other related materials on file and FINDS THE FOLLOWING FACTS:

1. PROJECT DESCRIPTION:

A. History of Project: Thompson's Point is an approximately 27.5-acre peninsula of land extending into the Fore River that has a 150-year history of industrial development. In the early part of the twentieth century the site was used primarily as a railroad maintenance facility. It was later used by the federal government for war-related activities such as munitions production. Subsequent uses included the operation of a concrete products manufacturing facility and other commercial activities, and the staging and stockpiling of construction materials. In Department Order #L-25672-2G-A-N/L-25672-FS-B-N, dated July 27, 2012, the Department approved a number of activities on the site located within 75 feet of the highest annual tide (HAT) line, including: clean up and removal of existing debris, stockpiles, and solid waste; building demolition; clearing and grubbing in advance of new topsoil for soil stabilization, landscaping, and trails; access drive and parking area construction; new buildings; installation or replacement of stormwater outfalls; installation of utilities; installation of a pier system at the south end of the peninsula; and a public access ramp. In Department Order #L-25672-4P-F-N/L-25672-FS-G-N, dated June 30, 2014, the Department approved relocation and reconfiguration of the approved pier system. Both licenses expired because the authorized activities were not undertaken within the time frames specified in the licenses.

B. Summary: The applicant proposes to complete the activities authorized in the previous licenses. The pier/boat launch system will consist of a six-foot wide by 16-foot long pier, a four-foot wide by 50-foot long gangway, a gangway landing float, and a 10-foot wide by 60-foot long seasonal float that will be located parallel to the shoreline. Approximately 386 square feet of freshwater wetlands adjacent to a coastal wetland will be altered by the construction of a new stormwater outfall. Other activities will include

landscaping; grading; trail construction; installation of granite block stairs for water access extending to, but not beyond, the HAT line; access drive and parking area construction; new buildings; installation or replacement of stormwater outfalls; and installation of utilities. Some of these activities will occur within 75 feet of the HAT line. Activity below the HAT line will be limited to installation of the gangway and floats for the pier system.

The proposed activities are shown on plans submitted with the 2012 and 2014 applications, included with the application by reference, and supplemented with the following: a plan titled "The Forefront at Thompson's Point Building B2 and Dock – Grading Plan," and "The Forefront at Thompson's Point Building B2 and Dock – Erosion Control and Construction Management Plan," both prepared by Placemaker Partners, LLC dated December 2022, with a latest revision date of March 17, 2023; and a plan titled "The Forefront at Thompson's Point Building B2 and Dock – Planting Plan," prepared by Carroll Associates Landscape Architects and dated December 2022, with a latest revision date of May 4, 2023.

The applicant submitted a Notice of Intent (NOI) to comply with the standards and requirements of the Maine Construction General Permit. NOI #77187 was accepted by the Department on June 13, 2023.

C. Current Use of the Site: Thompson's Point is located adjacent to Interstate 295 and is accessed by the Thompson's Point Connector Road. The parcel is identified as Lots 1, 5, 10/6, and 8 through 23 on Maps 201 and 202 of the City of Portland's tax maps. The area of the proposed project is currently a mix of urban filled land with compacted surfaces and grassed area.

2. EXISTING SCENIC, AESTHETIC, RECREATIONAL OR NAVIGATIONAL USES:

The Natural Resources Protection Act (NRPA), in 38 M.R.S. § 480-D(1), requires the applicant to demonstrate that the proposed project will not unreasonably interfere with existing scenic, aesthetic, recreational and navigational uses.

In accordance with Chapter 315, *Assessing and Mitigating Impacts to Scenic and Aesthetic Uses* (06-096 C.M.R. ch. 315, effective June 29, 2003), the applicant previously submitted a copy of the Department's Visual Evaluation Field Survey Checklist as Appendix A to the application along with a description of the property and the proposed project. The applicant previously submitted photographs of the project site and surroundings including an aerial photograph of the project site. Department staff visited the project site several times during previous application reviews involving the project site.

The proposed project is located in and adjacent to the Fore River, which is a scenic resource visited by the general public, in part, for the use, observation, enjoyment and appreciation of its natural and cultural visual qualities. The project site has been undergoing redevelopment over the last approximately ten years from a completely

developed industrial site with buildings in disrepair, construction staging areas, a wood salvage operation, and semi-trailer box storage to a mixed-use development that includes renovated buildings and an integrated landscape plan. The proposed activities are expected to further improve the visual appeal of the site from the resource.

The Department staff utilized the Department's Visual Impact Assessment Matrix in its evaluation of the proposed project and the Matrix showed an acceptable potential visual impact rating for the proposed project. Based on the information submitted in the application, the visual impact rating, and the previous site visits, the Department determined that the location and scale of the proposed activity is compatible with the existing visual quality and landscape characteristics found within the viewshed of the scenic resource in the project area.

The Department determined that based on the nature of the proposed project and its location, there are no existing recreational or navigational uses of the resource that would be unreasonably impacted.

3. SOIL EROSION:

The NRPA, in 38 M.R.S. § 480-D(2), requires the applicant to demonstrate that the proposed project will not cause unreasonable erosion of soil or sediment nor unreasonably inhibit the natural transfer of soil from the terrestrial to the marine or freshwater environment.

The applicant submitted the erosion control plan referenced in Finding 1, which includes measures to prevent erosion such as inlet protection, riprap outlet protection, erosion control blanket and mesh, and reinforced turf. Activities associated with installation of the ramp and floats is not expected to cause significant erosion into the resource.

The Department finds that the activity will not cause unreasonable erosion of soil or sediment nor unreasonably inhibit the natural transfer of soil from the terrestrial to the marine or freshwater environment.

4. HABITAT CONSIDERATIONS:

The NRPA, in 38 M.R.S. § 480-D(3), requires the applicant to demonstrate that the proposed project will not unreasonably harm significant wildlife habitat, freshwater wetland plant habitat, threatened or endangered plant habitat, aquatic or adjacent upland habitat, travel corridor, freshwater, estuarine or marine fisheries or other aquatic life.

In previous Department reviews of the site, the Maine Department of Inland Fisheries and Wildlife (MDIFW) commented that the mudflats and riparian areas below the HAT line are a valuable shorebird feeding area on the west side of the peninsula and a roosting area on the east side of the peninsula, both of which are significant wildlife habitats as defined in the NRPA. As a result of MDIFW site visits and multiple revisions to the delineation of the roosting area and the feeding area buffers based on onsite conditions, MDIFW

determined that neither buffer extends onto the project site more than 50 feet from mean high water.

In its previous review, MDIFW commented that the applicant's efforts to relocate the proposed pier system would result in less disruption to the shorebird habitats, and recommended that the applicant reiterate its commitment to installing interpretive signage in the vicinity of the pier structure and a viewing platform overlooking the salt marsh and mudflat communities in the northwest portion of the site. The applicant confirmed that it intends to comply with the findings in Department Order #L-25672-4P-F-N/L-25672-FS-G-N, dated June 30, 2014, that required the installation of a viewing platform and educational placards.

The Department finds that the applicant has avoided and minimized Significant Wildlife Habitat impacts to the greatest extent practicable, and that the proposed project represents the least environmentally damaging alternative that meets the overall purpose of the project.

The Department further finds that the activity will not unreasonably harm any freshwater wetland plant habitat, threatened or endangered plant habitat, aquatic or adjacent upland habitat, travel corridor, freshwater, estuarine or marine fisheries or other aquatic life.

5. WATER QUALITY CONSIDERATIONS:

The applicant proposes to use lumber treated with chromated copper arsenate (CCA) to construct the pier. To protect water quality, all CCA-treated lumber must be cured on dry land in a manner that exposes all surfaces to the air for 21 days prior to the start of construction.

As discussed in Finding 3, the applicant proposes to use erosion and sediment control measures during construction to minimize impacts to water quality from siltation.

Provided that CCA-treated lumber is cured as described above, the Department finds that the proposed project will not violate any state water quality law, including those governing the classification of the State's waters.

6. WETLANDS AND WATERBODIES PROTECTION RULES:

The applicant proposes to directly alter 386 square feet of freshwater wetland of special significance to construct a stormwater outfall. The wetland is considered significant because of its proximity to the coastal wetland. Approximately 1,028 square feet of coastal wetland will be indirectly altered due to shading effects from the gangway and floats. Coastal wetlands are wetlands of special significance.

The *Wetlands and Waterbodies Protection Rules*, 06-096 C.M.R. ch. 310 (last amended November 11, 2018), interpret and elaborate on the Natural Resources Protection Act (NRPA) criteria for obtaining a permit. The rules guide the Department in its

determination of whether a project's impacts would be unreasonable. A proposed project would generally be found to be unreasonable if it would cause a loss in wetland area, functions and values and there is a practicable alternative to the project that would be less damaging to the environment. Each application for a NRPA permit that involves a coastal wetland alteration must provide an analysis of alternatives in order to demonstrate that a practicable alternative does not exist.

A. Avoidance. An applicant must submit an analysis of whether there is a practicable alternative to the project that would be less damaging to the environment, and this analysis is considered by the Department in its assessment of the reasonableness of any impacts. Additionally, for activities proposed in, on, or over wetlands of special significance, the activity must be among the types listed in Chapter 310, § 5(A) or a practicable alternative less damaging to the environment is considered to exist and the impact is unreasonable. A pier is a water dependent use and its proposed construction is among the activities specifically provided for in Chapter 310, § 5(A)(1)(c). The stormwater outfall is associated with the expansion of an existing development and its proposed construction is among the activities specifically provided for in Chapter 310, § 5(A)(1)(d).

The applicant submitted an alternatives analysis for the proposed project in previous Department reviews. Because the proposed project is a transit-oriented development, the applicant selected the project site due to its proximity to the highway, passenger rail service, and bus service, all within a short distance to the Portland Jetport. There are currently no other sites in Portland that can offer the amount of land availability and the location required for this type of project, which will offer a range of activities integrating office, hospitality, and cultural uses with a focus on sustainability. Additionally, the overall project constitutes redevelopment and reuse of a former industrial site. The proposed layout includes approximately 386 square feet of wetland fill within the northwesterly "panhandle" of the site associated with a drainage outfall and grading. This alteration was determined to be unavoidable.

The pier system as approved in Department Order #L-25672-4P-F-N/L-25672-FS-G-N was relocated to a different location on the peninsula to minimize impacts to significant wildlife habitat but was also increased in size to accommodate local rowing organizations that desired access. Because of the nature of the proposed pier system, some impact to the coastal wetland is unavoidable.

B. Minimal Alteration. In support of an application and to address the analysis of the reasonableness of any impacts of a proposed project, an applicant must demonstrate that the amount of coastal wetland to be altered will be kept to the minimum amount necessary for meeting the overall purpose of the project. For the pier system, the applicant designed the size of the floats to facilitate the launch of eight oar crew boats, or shells, which are approximately 60 feet long, out into the bay. The increased pier length from the pier system approved in Department Order #L-25672-2G-A-N/L-25672-FS-B-N is needed to walk the shell down the gangway and launch it into the water and is designed at the minimum length necessary to launch rowing shells.

Regarding the wetland fill proposed in the panhandle of the project site, this alteration is necessary to manage stormwater runoff from existing and proposed developed areas on the site and has been minimized to the greatest practicable extent.

C. Compensation. In accordance with Chapter 310, § 5(C)(6)(b), compensation may be required to achieve the goal of no net loss of coastal wetland functions and values. This project will not result in over 500 square feet of fill in either the freshwater wetland of special significance or the coastal wetland, which is the threshold over which compensation is generally required. Further, the proposed project will not have an adverse impact on marine resources or wildlife habitat as determined by the Department. For these reasons, the Department determined that compensation is not required.

The Department finds that the applicant has avoided and minimized coastal wetland impacts to the greatest extent practicable, and that the proposed project represents the least environmentally damaging alternative that meets the overall purpose of the project.

7. OTHER CONSIDERATIONS:

The Department finds, based on the design, proposed construction methods, and location, the proposed project will not inhibit the natural transfer of soil from the terrestrial to the marine environment, will not interfere with the natural flow of any surface or subsurface waters, and will not cause or increase flooding. The proposed project is not located in a coastal sand dune system, is not a crossing of an outstanding river segment, and does not involve dredge spoils disposal or the transport of dredge spoils by water.

BASED on the above findings of fact, and subject to the conditions listed below, the Department makes the following conclusions pursuant to 38 M.R.S. §§ 480-A–480-JJ and Section 401 of the Clean Water Act (33 U.S.C. § 1341):

A. The proposed activity will not unreasonably interfere with existing scenic, aesthetic, recreational, or navigational uses.

B. The proposed activity will not cause unreasonable erosion of soil or sediment.

C. The proposed activity will not unreasonably inhibit the natural transfer of soil from the terrestrial to the marine or freshwater environment.

D. The proposed activity will not unreasonably harm any significant wildlife habitat, freshwater wetland plant habitat, threatened or endangered plant habitat, aquatic or adjacent upland habitat, travel corridor, freshwater, estuarine, or marine fisheries or other aquatic life.

E. The proposed activity will not unreasonably interfere with the natural flow of any surface or subsurface waters.

F. The proposed activity will not violate any state water quality law including those governing the classifications of the State's waters provided that CCA-treated lumber is cured as described in Finding 5.

G. The proposed activity will not unreasonably cause or increase the flooding of the alteration area or adjacent properties.

H. The proposed activity is not on or adjacent to a sand dune.

I. The proposed activity is not on an outstanding river segment as noted in 38 M.R.S. § 480-P.

THEREFORE, the Department APPROVES the above noted application of FOREFRONT PARTNERS I, LP to install drainage outfalls, perform grading and landscaping, install granite block stairs, install a pier/boat launch system, and perform other related activities, all as described in Finding 1, SUBJECT TO THE ATTACHED CONDITIONS, and all applicable standards and regulations:

1. Standard Conditions of Approval, a copy attached.

2. The applicant shall take all necessary measures to ensure that its activities or those of its agents do not result in measurable erosion of soil on the site during the construction of the project covered by this approval.

3. Severability. The invalidity or unenforceability of any provision, or part thereof, of this License shall not affect the remainder of the provision or any other provisions. This License shall be construed and enforced in all respects as if such invalid or unenforceable provision or part thereof had been omitted.

4. All CCA-treated lumber shall be cured on dry land in a manner that exposes all surfaces to the air for 21 days prior to the start of construction.

THIS APPROVAL DOES NOT CONSTITUTE OR SUBSTITUTE FOR ANY OTHER REQUIRED STATE, FEDERAL OR LOCAL APPROVALS NOR DOES IT VERIFY COMPLIANCE WITH ANY APPLICABLE SHORELAND ZONING ORDINANCES.

DONE AND DATED IN AUGUSTA, MAINE, THIS 15th DAY OF JUNE, 2023.

RE: Natural Resources Protection Act Application, Portland
DEP #L-25672-4P-F-N/L-25672-FS-G-N

Dear Applicant:

Please find enclosed a signed copy of your Department of Environmental Protection land use permit. You will note that the permit includes a description of your project, findings of fact that relate to the approval criteria the Department used in evaluating your project, and conditions that are based on those findings and the particulars of your project. Please take several moments to read your permit carefully, paying particular attention to the conditions of the approval. The Department reviews every application thoroughly and strives to formulate reasonable conditions of approval within the context of the Department's environmental laws. You will also find attached some materials that describe the Department's appeal procedures for your information.

If you have any questions about the permit or thoughts on how the Department processed this application please get in touch with me directly. I can be reached at (207) 592-1692 or at Marybeth.richardson@maine.gov.

Sincerely,

Marybeth Richardson

DEPARTMENT ORDER

IN THE MATTER OF

FOREFRONT PARTNERS I, LP	) NATURAL RESOURCES PROTECTION ACT
Portland, Cumberland County	) COASTAL WETLAND ALTERATION
PIER SYSTEM	) SIGNIFICANT WILDLIFE HABITAT
L-25672-4P-F-N (approval)	) WATER QUALITY CERTIFICATION
L-25672-FS-G-N (approval)	) FINDINGS OF FACT AND ORDER

Pursuant to the provisions of 38 M.R.S.A. Sections 480-A et seq. and Section 401 of the Federal Water Pollution Control Act, the Department of Environmental Protection has considered the application of FOREFRONT PARNTERS I, LP with the supportive data, agency review comments, and other related materials on file and FINDS THE FOLLOWING FACTS:

1. PROJECT DESCRIPTION:

A. History of Project: Thompson's Point is an approximately 27.5-acre peninsula of land extending into the Fore River that has a 150-year history of industrial development. In the early part of the twentieth century the site was used primarily as a railroad maintenance facility. It was later used by the federal government for war-related activities such as munitions production. Subsequent uses included the operation of a concrete products manufacturing facility and other commercial activities, and the staging and stockpiling of construction materials.

In Department Order #L-25672-2G-A-N/L-25672-FS-B-N, dated July 27, 2012, the Department approved a number of activities on the site that will occur within 75 feet of the highest annual tide (HAT) line, including: clean up and removal of existing debris, stockpiles, and solid waste; building demolition; clearing and grubbing in advance of new topsoil for soil stabilization, landscaping, and trails; access drive and parking area construction; new buildings; installation or replacement of stormwater outfalls; installation of utilities; installation of a pier system at the south end of the peninsula; and a public access ramp.

B. Summary: The applicant proposes to shift the location of the pier system to the west from its previously-approved location at the southerly tip of the Thompson's Point peninsula to align better with the proposed master plan pedestrian access. The proposed pier system will include a longer float than the previously-approved pier system that will be large enough to accommodate crew boats, or rowing shells, and will be positioned so that water access will be available during all-tide conditions. The system will consist of a permanent six-foot wide by 16-foot long timber pier located at the top of the bank, which will serve as the top/landing approach to a four-foot wide by 50-foot long seasonal gangway and a seasonal, 10-foot wide by 60-foot long float.

The proposed pier system is shown on two plans, the first titled "The Forefront at Thompson's Point Seasonal Dock System," prepared by Fay, Spofford & Thorndike and dated March 13, 2014, and the second titled "Layout Concept for Portland Rowing," prepared by Custom Float Services, Inc. and dated March 6, 2014.

C. Current Use of the Site: A realigned combined sewer overflow has been constructed along the westerly side of the peninsula. A walking trail along the "panhandle" area of the site has also been constructed. The majority of the approximately 4,100 linear feet of shoreline at the site was previously armored with riprap. Approximately five acres of the site lie below the HAT line. There are several buildings on the site that will be demolished.

2. EXISTING SCENIC, AESTHETIC, RECREATIONAL OR NAVIGATIONAL USES:

In accordance with Chapter 315, Assessing and Mitigating Impacts to Scenic and Aesthetic Uses, the applicant submitted a copy of the Department's Visual Evaluation Field Survey Checklist as Appendix A to the application along with a description of the property and the proposed project. The applicant also submitted several photographs of the proposed project site including aerial photographs. Department staff visited the project site in July 2011.

The proposed project is located adjacent to the Fore River, which is a scenic resource visited by the general public, in part, for the use, observation, enjoyment and appreciation of its natural and cultural visual qualities. The project site is currently almost completely developed with paved areas, gravel areas, and a number of buildings and foundations. Some of the buildings are functional and contain commercial space and others are in various stages of disrepair. The developed areas extend to the top of the slope down to the river, which is armored with riprap. Existing wooded areas are limited to the far northwest corner of the site.

Overall, the existing site is heavily developed with little visual appeal. Current uses include construction staging, a wood salvage operation, and semi-trailer box storage. Most of the existing structures appear to be marginally maintained and are in average to poor condition. The proposed project is not expected to significantly change the visual impact of the redeveloped site as approved in Department Order #L-25672-2G-A-N/ L-25672-FS-B-N.

The proposed project was evaluated using the Department's Visual Impact Assessment Matrix and was found to have an acceptable potential visual impact rating. Based on the information submitted in the application, the visual impact rating, and the site visit, the Department determined that the location and scale of the proposed activity is compatible with the existing visual quality and landscape characteristics found within the viewshed of the scenic resource in the project area.

The Department did not identify any issues involving existing recreational and navigational uses.

The Department finds that the proposed activity will not unreasonably interfere with existing scenic, aesthetic, recreational or navigational uses of the protected natural resource.

3. SOIL EROSION:

Construction of the proposed project is expected to take several weeks. The float systems will be prefabricated and the permanent pier section will be constructed onsite and set into place. The permanent pier section will be supported on concrete foundations. Construction will be accomplished by excavating small holes that will be backfilled with concrete. The seasonal floats will be anchored with moorings. These activities are not anticipated to cause any significant source of sedimentation.

The Department finds that the activity will not cause unreasonable erosion of soil or sediment nor unreasonably inhibit the natural transfer of soil from the terrestrial to the marine or freshwater environment.

4. HABITAT CONSIDERATIONS:

The Department of Marine Resources (DMR) reviewed the project approved in Department Order #L-25672-2G-A-N/L-25672-FS-B-N and stated that it should not cause any significant adverse impact to marine resources.

The Maine Department of Inland Fisheries and Wildlife (MDIFW) reviewed the project approved in Department Order #L-25672-2G-A-N/L-25672-FS-B-N and stated that the mudflats and riparian areas below the HAT line are a valuable shorebird feeding area on the west side of the peninsula and a roosting area on the east side of the peninsula. MDIFW commented that the proposed project includes activities within the associated upland buffer areas that may have the potential to adversely affect shorebirds using the mudflats in the area. As a result of two site visits and multiple revisions to the delineation of the roosting area and the feeding area buffers based on onsite conditions, neither buffer extends onto the project site more than 50 feet from mean high water.

During the Department's review of the original application in 2012, MDIFW expressed concerns about the initial design of the project because it proposed rowing floats at the northeasterly corner of the site, directly adjacent to the shorebird roosting area and its associated upland buffer. This float system was subsequently deleted from the plan, and the plan that was approved by the Department included a small hand carry boat/kayak launch float at the southern tip of the site as described in Finding 1. MDIFW did not express concerns about this seasonal structure and stated that the project when complete would not result in any significant adverse impact to the habitat.

The applicant now proposes to relocate the pier and float structure from the southernmost tip of Thompson's Point to a point on the shoreline approximately 108 feet west of the previously approved pier system, further from the shorebird roosting area, but still within

the shorebird feeding area. MDIFW reviewed the proposed project and stated in a review memorandum dated June 25, 2014, that the pier system has been relocated to an area that will be less disruptive to wildlife than the original location. MDIFW recommended that the applicant reiterate its commitment to installing interpretive signage in the vicinity of the pier structure and a viewing platform overlooking the salt marsh and mudflat communities in the northwest portion of the site. The applicant confirmed that it intends to comply with the previous permit conditions that required the installation of a viewing platform and educational placards.

The Department finds that the activity will not unreasonably harm any significant wildlife habitat, freshwater wetland plant habitat, threatened or endangered plant habitat, aquatic or adjacent upland habitat, travel corridor, freshwater, estuarine or marine fisheries or other aquatic life.

5. WATER QUALITY CONSIDERATIONS:

The applicant proposes to use lumber treated with chromated copper arsenate (CCA) to construct the pier system. To protect water quality, all CCA-treated lumber must be cured on dry land in a manner that exposes all surfaces to the air for 21 days prior to the start of construction.

Provided that CCA-treated lumber is cured as described above, the Department finds that the proposed project will not violate any state water quality law, including those governing the classification of the State's waters.

6. WETLANDS AND WATERBODIES PROTECTION RULES:

The applicant proposes to indirectly alter a total of 1,028 square feet of coastal wetland as a result of shading from the proposed pier system. The permanent pier section's supports will be located above the HAT line; therefore, no direct wetland impacts are proposed. The pier system as originally approved in Department Order #L-25672-2G-A-N/L-25672-FS-B-N included 513 square feet of indirect wetland alteration due to shading.

The Wetland Protection Rules interpret and elaborate on the Natural Resources Protection Act (NRPA) criteria for obtaining a permit. The rules guide the Department in its determination of whether a project's impacts would be unreasonable. A proposed project would generally be found to be unreasonable if it would cause a loss in wetland area, functions and values and there is a practicable alternative to the project that would be less damaging to the environment. Each application for a NRPA permit that involves a coastal wetland alteration must provide an analysis of alternatives in order to demonstrate that a practicable alternative does not exist.

A. Avoidance. No activity may be permitted if there is a practicable alternative to the project that would be less damaging to the environment. The applicant submitted an alternatives analysis for the proposed project completed by Fay, Spofford & Thorndike and dated May 27, 2014 and June 12, 2014. When the project was first proposed in 2012,

the site in question was contemplated as water access for small personal kayaks, canoes and a water shuttle/taxi. The applicant stated that the purpose of the revised configuration, location, and increase in float size is to allow water access for local rowing organizations. The applicant proposes to increase the size of the floats in order to launch eight oar crew boats, or shells, which are approximately 60 feet long, out into the bay. The increased pier length is needed to walk the shell down the gangway and launch it into the water. The pier system is not intended for boats to be anchored or moored for extended periods. Because of the nature of the project purpose, some increase in impact to the coastal wetland is unavoidable.

B. Minimal Alteration. The amount of coastal wetland to be altered must be kept to the minimum amount necessary for meeting the overall purpose of the project. A permanent pier has been added to the system, but will be located above the HAT line. The gangway will be 10 feet longer than originally proposed, and the float size has been expanded to accommodate a local rowing club as descried above. The proposed 60-foot long float is the minimum size necessary to safely launch rowing shells.

C. Compensation. In accordance with Chapter 310 Section 5(C)(6)(b), compensation is not required to achieve the goal of no net loss of coastal wetland functions and values since the project will not result in over 500 square feet of fill in the resource, which is the threshold over which compensation is generally required. Further, the proposed project will not have an adverse impact on marine resources or wildlife habitat as determined by DMR and MDIFW. For these reasons, the Department determined that compensation is not required.

The Department finds that the applicant has avoided and minimized wetland impacts to the greatest extent practicable, and that the proposed project represents the least environmentally damaging alternative that meets the overall purpose of the project.

7. OTHER CONSIDERATIONS:

The Department did not identify any other issues involving existing scenic, aesthetic, or navigational uses, soil erosion, habitat or fisheries, the natural transfer of soil, natural flow of water, water quality, or flooding.

BASED on the above findings of fact, and subject to the conditions listed below, the Department makes the following conclusions pursuant to 38 M.R.S.A. Sections 480-A et seq. and Section 401 of the Federal Water Pollution Control Act:

A. The proposed activity will not unreasonably interfere with existing scenic, aesthetic, recreational, or navigational uses.

B. The proposed activity will not cause unreasonable erosion of soil or sediment.

C. The proposed activity will not unreasonably inhibit the natural transfer of soil from the terrestrial to the marine or freshwater environment.

D. The proposed activity will not unreasonably harm any significant wildlife habitat, freshwater wetland plant habitat, threatened or endangered plant habitat, aquatic or adjacent upland habitat, travel corridor, freshwater, estuarine, or marine fisheries or other aquatic life.

E. The proposed activity will not unreasonably interfere with the natural flow of any surface or subsurface waters.

F. The proposed activity will not violate any state water quality law including those governing the classifications of the State's waters provided that CCA-treated lumber is cured as described in Finding 5.

G. The proposed activity will not unreasonably cause or increase the flooding of the alteration area or adjacent properties.

H. The proposed activity is not on or adjacent to a sand dune.

I. The proposed activity is not on an outstanding river segment as noted in Title 38 M.R.S.A. Section 480-P.

THEREFORE, the Department APPROVES the above noted application of FOREFRONT PARTNERS I, LP to relocate and enlarge a previously approved pier system at Thompson's Point as described in Finding 1, SUBJECT TO THE ATTACHED CONDITIONS, and all applicable standards and regulations:

1. Standard Conditions of Approval, a copy attached.

2. The applicant shall take all necessary measures to ensure that its activities or those of its agents do not result in measurable erosion of soil on the site during the construction of the project covered by this approval.

3. Severability. The invalidity or unenforceability of any provision, or part thereof, of this License shall not affect the remainder of the provision or any other provisions. This License shall be construed and enforced in all respects as if such invalid or unenforceable provision or part thereof had been omitted.

4. All CCA-treated lumber shall be cured on dry land in a manner that exposes all surfaces to the air for 21 days prior to the start of construction.

THIS APPROVAL DOES NOT CONSTITUTE OR SUBSTITUTE FOR ANY OTHER REQUIRED STATE, FEDERAL OR LOCAL APPROVALS NOR DOES IT VERIFY COMPLIANCE WITH ANY APPLICABLE SHORELAND ZONING ORDINANCES.

DONE AND DATED IN AUGUSTA, MAINE, THIS 30th DAY OF June, 2014.

PLEASE NOTE THE ATTACHED SHEET FOR GUIDANCE ON APPEAL PROCEDURES...

MR/L25672FNGN/ATS#77793, 77794

Natural Resources Protection Act (NRPA)
Standard Conditions

THE FOLLOWING STANDARD CONDITIONS SHALL APPLY TO ALL PERMITS GRANTED UNDER THE NATURAL RESOURCE PROTECTION ACT, TITLE 38, M.R.S.A. SECTION 480-A ET.SEQ. UNLESS OTHERWISE SPECIFICALLY STATED IN THE PERMIT.

A. Approval of Variations From Plans. The granting of this permit is dependent upon and limited to the proposals and plans contained in the application and supporting documents submitted and affirmed to by the applicant. Any variation from these plans, proposals, and supporting documents is subject to review and approval prior to implementation.

B. Compliance With All Applicable Laws. The applicant shall secure and comply with all applicable federal, state, and local licenses, permits, authorizations, conditions, agreements, and orders prior to or during construction and operation, as appropriate.

C. Erosion Control. The applicant shall take all necessary measures to ensure that his activities or those of his agents do not result in measurable erosion of soils on the site during the construction and operation of the project covered by this Approval.

D. Compliance With Conditions. Should the project be found, at any time, not to be in compliance with any of the Conditions of this Approval, or should the applicant construct or operate this development in any way other the specified in the Application or Supporting Documents, as modified by the Conditions of this Approval, then the terms of this Approval shall be considered to have been violated.

E. Time frame for approvals. If construction or operation of the activity is not begun within four years, this permit shall lapse and the applicant shall reapply to the Board for a new permit. The applicant may not begin construction or operation of the activity until a new permit is granted. Reapplications for permits may include information submitted in the initial application by reference. This approval, if construction is begun within the four-year time frame, is valid for seven years. If construction is not completed within the seven-year time frame, the applicant must reapply for, and receive, approval prior to continuing construction.

F. No Construction Equipment Below High Water. No construction equipment used in the undertaking of an approved activity is allowed below the mean high water line unless otherwise specified by this permit.

G. Permit Included In Contract Bids. A copy of this permit must be included in or attached to all contract bid specifications for the approved activity.

H. Permit Shown To Contractor. Work done by a contractor pursuant to this permit shall not begin before the contractor has been shown by the applicant a copy of this permit.

Revised (12/2011/DEP LW0428)

DEPLW0386 A2012

DEP INFORMATION SHEET

Appealing a Department Licensing Decision

Dated: March 2012 **Contact: (207) 287-2811**

SUMMARY

There are two methods available to an aggrieved person seeking to appeal a licensing decision made by the Department of Environmental Protection's ("DEP") Commissioner: (1) in an administrative process before the Board of Environmental Protection ("Board"); or (2) in a judicial process before Maine's Superior Court. An aggrieved person seeking review of a licensing decision over which the Board had original jurisdiction may seek judicial review in Maine's Superior Court.

A judicial appeal of final action by the Commissioner or the Board regarding an application for an expedited wind energy development (35-A M.R.S.A. § 3451(4)) or a general permit for an offshore wind energy demonstration project (38 M.R.S.A. § 480-HH(1)) or a general permit for a tidal energy demonstration project (38 M.R.S.A. § 636-A) must be taken to the Supreme Judicial Court sitting as the Law Court.

This INFORMATION SHEET, in conjunction with a review of the statutory and regulatory provisions referred to herein, can help a person to understand his or her rights and obligations in filing an administrative or judicial appeal.

I. ADMINISTRATIVE APPEALS TO THE BOARD

LEGAL REFERENCES

The laws concerning the DEP's *Organization and Powers*, 38 M.R.S.A. §§ 341-D(4) & 346, the *Maine Administrative Procedure Act*, 5 M.R.S.A. § 11001, and the DEP's *Rules Concerning the Processing of Applications and Other Administrative Matters* ("Chapter 2"), 06-096 CMR 2 (April 1, 2003).

HOW LONG YOU HAVE TO SUBMIT AN APPEAL TO THE BOARD

The Board must receive a written appeal within 30 days of the date on which the Commissioner's decision was filed with the Board. Appeals filed after 30 calendar days of the date on which the Commissioner's decision was filed with the Board will be rejected.

HOW TO SUBMIT AN APPEAL TO THE BOARD

Signed original appeal documents must be sent to: Chair, Board of Environmental Protection, c/o Department of Environmental Protection, 17 State House Station, Augusta, ME 04333-0017; faxes are acceptable for purposes of meeting the deadline when followed by the Board's receipt of mailed original documents within five (5) working days. Receipt on a particular day must be by 5:00 PM at DEP's offices in Augusta; materials received after 5:00 PM are not considered received until the following day. The person appealing a licensing decision must also send the DEP's Commissioner a copy of the appeal documents and if the person appealing is not the applicant in the license proceeding at issue the applicant must also be sent a copy of the appeal documents. All of the information listed in the next section must be submitted at the time the appeal is filed. Only the extraordinary circumstances described at the end of that section will justify evidence not in the DEP's record at the time of decision being added to the record for consideration by the Board as part of an appeal.

WHAT YOUR APPEAL PAPERWORK MUST CONTAIN

Appeal materials must contain the following information at the time submitted:

1. *Aggrieved Status*. The appeal must explain how the person filing the appeal has standing to maintain an appeal. This requires an explanation of how the person filing the appeal may suffer a particularized injury as a result of the Commissioner's decision.
2. *The findings, conclusions or conditions objected to or believed to be in error.* Specific references and facts regarding the appellant's issues with the decision must be provided in the notice of appeal.
3. *The basis of the objections or challenge.* If possible, specific regulations, statutes or other facts should be referenced. This may include citing omissions of relevant requirements, and errors believed to have been made in interpretations, conclusions, and relevant requirements.
4. *The remedy sought.* This can range from reversal of the Commissioner's decision on the license or permit to changes in specific permit conditions.
5. *All the matters to be contested.* The Board will limit its consideration to those arguments specifically raised in the written notice of appeal.
6. *Request for hearing.* The Board will hear presentations on appeals at its regularly scheduled meetings, unless a public hearing on the appeal is requested and granted. A request for public hearing on an appeal must be filed as part of the notice of appeal.
7. *New or additional evidence to be offered.* The Board may allow new or additional evidence, referred to as supplemental evidence, to be considered by the Board in an appeal only when the evidence is relevant and material and that the person seeking to add information to the record can show due diligence in bringing the evidence to the DEP's attention at the earliest possible time in the licensing process or that the evidence itself is newly discovered and could not have been presented earlier in the process. Specific requirements for additional evidence are found in Chapter 2.

OTHER CONSIDERATIONS IN APPEALING A DECISION TO THE BOARD

1. *Be familiar with all relevant material in the DEP record.* A license application file is public information, subject to any applicable statutory exceptions, made easily accessible by DEP. Upon request, the DEP will make the material available during normal working hours, provide space to review the file, and provide opportunity for photocopying materials. There is a charge for copies or copying services.
2. *Be familiar with the regulations and laws under which the application was processed, and the procedural rules governing your appeal.* DEP staff will provide this information on request and answer questions regarding applicable requirements.
3. *The filing of an appeal does not operate as a stay to any decision.* If a license has been granted and it has been appealed the license normally remains in effect pending the processing of the appeal. A license holder may proceed with a project pending the outcome of an appeal but the license holder runs the risk of the decision being reversed or modified as a result of the appeal.

WHAT TO EXPECT ONCE YOU FILE A TIMELY APPEAL WITH THE BOARD

The Board will formally acknowledge receipt of an appeal, including the name of the DEP project manager assigned to the specific appeal. The notice of appeal, any materials accepted by the Board Chair as supplementary evidence, and any materials submitted in response to the appeal will be sent to Board members with a recommendation from DEP staff. Persons filing appeals and interested persons are notified in advance of the date set for Board consideration of an appeal or request for public hearing. With or without holding a public hearing, the Board may affirm, amend, or reverse a Commissioner decision or remand the matter to the Commissioner for further proceedings. The Board will notify the appellant, a license holder, and interested persons of its decision.

II. JUDICIAL APPEALS

Maine law generally allows aggrieved persons to appeal final Commissioner or Board licensing decisions to Maine's Superior Court, see 38 M.R.S.A. § 346(1); 06-096 CMR 2; 5 M.R.S.A. § 11001; & M.R. Civ. P 80C. A party's appeal must be filed with the Superior Court within 30 days of receipt of notice of the Board's or the Commissioner's decision. For any other person, an appeal must be filed within 40 days of the date the decision was rendered. Failure to file a timely appeal will result in the Board's or the Commissioner's decision becoming final.

An appeal to court of a license decision regarding an expedited wind energy development, a general permit for an offshore wind energy demonstration project, or a general permit for a tidal energy demonstration project may only be taken directly to the Maine Supreme Judicial Court. See 38 M.R.S.A. § 346(4).

Maine's Administrative Procedure Act, DEP statutes governing a particular matter, and the Maine Rules of Civil Procedure must be consulted for the substantive and procedural details applicable to judicial appeals.

ADDITIONAL INFORMATION

If you have questions or need additional information on the appeal process, for administrative appeals contact the Board's Executive Analyst at (207) 287-2452 or for judicial appeals contact the court clerk's office in which your appeal will be filed.

Note: The DEP provides this INFORMATION SHEET for general guidance only; it is not intended for use as a legal reference. Maine law governs an appellant's rights.

ATTN: Chris Thompson

RE: Natural Resources Protection Act Application, Portland
DEP #L-25672-2G-A-N / #L-25672-FS-B-N

Dear Mr. Thompson:

Please find enclosed a signed copy of your Department of Environmental Protection land use permit. You will note that the permit includes a description of your project, findings of fact that relate to the approval criteria the Department used in evaluating your project, and conditions that are based on those findings and the particulars of your project. Please take several moments to read your permit carefully, paying particular attention to the conditions of the approval. The Department reviews every application thoroughly and strives to formulate reasonable conditions of approval within the context of the Department's environmental laws. You will also find attached some materials that describe the Department's appeal procedures for your information.

If you have any questions about the permit or thoughts on how the Department processed this application please get in touch with me directly. I can be reached at (207) 592-1692 or at Marybeth.richardson@maine.gov.

Sincerely,

Marybeth Richardson, Project Manager
Division of Land Resource Regulation
Bureau of Land and Water Quality

DEPARTMENT ORDER

IN THE MATTER OF

FOREFRONT PARTNERS I, LP	) NATURAL RESOURCES
PROTECTION	
Portland, Cumberland County	) COASTAL WETLAND ALTERATION
THE FOREFRONT AT THOMPSON'S POINT	) SIGNIFICANT WILDLIFE HABITAT
L-25672-2G-A-N (approval)	) WATER QUALITY CERTIFICATION
L-25672-FS-B-N (approval)	) FINDINGS OF FACT AND ORDER

Pursuant to the provisions of 38 M.R.S.A. Sections 480-A et seq. and Section 401 of the Federal Water Pollution Control Act, the Department of Environmental Protection has considered the application of FOREFRONT PARTNERS I, LP with the supportive data, agency review comments, and other related materials on file and FINDS THE FOLLOWING FACTS:

1. PROJECT DESCRIPTION:

A. History of Project: Thompson's Point is an approximately 27.5-acre peninsula of land extending into the Fore River that has a 150-year history of industrial development. In the early part of the twentieth century the site was used primarily as a railroad maintenance facility. It was later used by the federal government for war-related activities such as munitions production. Subsequent uses included the operation of a concrete products manufacturing facility and other commercial activities, and the staging and stockpiling of construction materials.

B. Summary: The applicant proposes to demolish existing structures and redevelop almost the entire project site with a number of buildings, including an events center and concert hall, outdoor amphitheater, hotel, sports medicine and athletic performance lab, parking structure, office building, surface parking, trails, public space, and small boat/kayak access. Activities contemplated by the applicant that require Natural Resources Protection Act review are those that will occur within 75 feet of the highest annual tide (HAT) line, including clean up and removal of existing debris, stockpiles, and solid waste; building demolition; clearing and grubbing in advance of new topsoil for soil stabilization, landscaping, and trails; access drive and parking area construction; new buildings; installation or replacement of stormwater outfalls; installation of utilities; installation of a seasonal dock at the south end of the peninsula; a small hand carry boat/kayak launch; and a public access ramp. Within 25 feet of the HAT line, the only proposed activities will be grading for new landscaping and drainage work.

The proposed project will result in approximately 386 square feet of freshwater wetland fill within the northwesterly "panhandle" of the site associated with a drainage outfall and grading. Under current conditions, the shoreline is riprapped around the majority of the project site. In areas not containing riprap currently, the shoreline is naturally vegetated. No significant disturbance is proposed within these areas. A total of ten drainage outfalls

are proposed and the total extent of riprap enhancement associated with the drainage work is approximately 100 linear feet.

The proposed project is shown on a set of plans, the first of which is titled "The Forefront at Thompson's Point," prepared by DeLuca-Hoffman Associates, Inc. and dated August 2011, with a latest revision date on any sheet of July 12, 2012. The project site is located on Thompson's Point, off Congress Street, in the City of Portland.

The proposed project is subject to review under the Site Location of Development Act. Pursuant to M.R.S.A. Section 489-A, the City of Portland has delegated review authority and is conducting that review.

C. Current Use of the Site: A portion of the project site is utilized as storage for refrigerated dairy trailers. Various other commercial tenants lease space throughout the remaining site. There are currently nine structures and at least several additional foundations located on the site. The majority of the approximately 4,100 linear feet of shoreline at the site has been armored with riprap. Approximately five acres of the site lie below the HAT line.

2. EXISTING SCENIC, AESTHETIC, RECREATIONAL OR NAVIGATIONAL USES:

In accordance with Chapter 315, Assessing and Mitigating Impacts to Scenic and Aesthetic Uses, the applicant submitted a copy of the Department's Visual Evaluation Field Survey Checklist as Appendix A to the application along with a description of the property and the proposed project. The applicant also submitted several photographs of the proposed project site including an aerial photograph of the project site. Department staff visited the project site in July of 2011.

The proposed project is located adjacent to the Fore River, which is a scenic resource visited by the general public, in part, for the use, observation, enjoyment and appreciation of its natural and cultural visual qualities. The project site is currently almost completely developed with paved areas, gravel areas, and a number of buildings and foundations. Some of the buildings are functional and contain commercial space and others are in various stages of disrepair. The developed areas extend to the top of the slope down to the river, which is armored with riprap. Existing wooded areas are limited to the far northwest corner of the site.

Overall, the existing site is heavily developed with little visual appeal. Current uses include construction staging, a wood salvage operation, and semi-trailer box storage. Most of the existing structures appear to be marginally maintained and are in average to poor condition. The proposed project is expected to increase the visual appeal of the site by introducing new buildings and implementing an integrated landscape enhancement plan.

The proposed project was evaluated using the Department's Visual Impact Assessment Matrix and was found to have an acceptable potential visual impact rating. Based on the information submitted in the application, the visual impact rating, and the site visit, the Department determined that the location and scale of the proposed activity is compatible with the existing visual quality and landscape characteristics found within the viewshed of the scenic resource in the project area.

The Department did not identify any issues involving existing recreational and navigational uses.

The Department finds that the proposed activity will not unreasonably interfere with existing scenic, aesthetic, recreational or navigational uses of the protected natural resource.

3. SOIL EROSION:

The applicant submitted an erosion control report and supporting plans for the proposed project, dated March 2012. Based on its review of this information, the Department finds that the activity will not cause unreasonable erosion of soil or sediment nor unreasonably inhibit the natural transfer of soil from the terrestrial to the marine or freshwater environment.

4. HABITAT CONSIDERATIONS:

The Department of Marine Resources (DMR) stated that the proposed project should not cause any significant adverse impact to marine resources, navigation or recreation.

The Maine Department of Inland Fisheries and Wildlife (MDIFW) reviewed the proposed project and stated that the mudflats and riparian areas below the HAT line are valuable shorebird feeding area on the west side of the peninsula and roosting area on the east side of the peninsula. MDIFW commented that the proposed project includes activities within the associated upland buffer areas that may have the potential to adversely affect shorebirds using the mudflats in the area. As a result of two site visits and multiple revisions to the delineation of the roosting area and the feeding area buffers based on onsite conditions, neither buffer extends onto the project site more than 50 feet from mean high water.

In response to MDIFW's concerns, the applicant revised the layout of the project to avoid and minimize potential impacts within the buffer areas, and worked with MDIFW to develop a landscape plan (revision dated July 12, 2012) that provides adequate vegetative screening of the mapped shorebird feeding area between the shoreline and proposed pedestrian trail, and limits vegetation within the shorebird roosting area buffer to lower profile shrubs that are expected to maintain visibility for the shorebirds and minimize the threat of increased raptor predation. The applicant has agreed to install interpretive signage at the proposed south end boat launch. The signage will identify the presence and significance of shorebird habitat and will be designed with MIDFW's input. Additionally, the applicant has agreed to install a raised viewing platform overlooking the salt marsh and mudflat communities in the northwest portion of the site.

In a review memorandum dated July 13, 2012, MDIFW commented: "Given the steps that the applicant has taken to maintain and enhance mapped Significant Wildlife Habitats at this site we do not feel that project completion will result in any significant adverse impact to the resource."

Based on MDIFW's review, the Department finds that the activity will not unreasonably harm any significant wildlife habitat, freshwater wetland plant habitat, threatened or endangered plant habitat, aquatic or adjacent upland habitat, travel corridor, freshwater, estuarine or marine fisheries or other aquatic life.

5. WATER QUALITY CONSIDERATIONS:

The applicant may use lumber treated with chromated copper arsenate (CCA) to construct the floats. To protect water quality, any CCA treated lumber must be cured on dry land in a manner that exposes all surfaces to the air for 21 days prior to the start of construction. Provided any CCA treated lumber is cured as described above, the Department finds that the proposed project will not violate any state water quality law, including those governing the classification of the State's waters.

The Department does not anticipate that the proposed project will violate any state water quality law, including those governing the classification of the State's waters.

6. WETLANDS AND WATERBODIES PROTECTION RULES:

The applicant proposes to alter 386 square feet of an emergent freshwater wetland in the northwestern portion of the site to regrade an area and install a stormwater outfall pipe. Other proposed impacts below the HAT line include less than 100 square feet of alteration associated with the installation of multiple drainage outfalls, most of which will replace existing outfalls. Additionally, approximately 513 square feet of coastal wetland will be altered, through shading, as a result of the seasonal installation of floats at the south end of the peninsula.

The Department's Wetlands and Waterbodies Protection Rules, Chapter 310, require that the applicant meet the following standards:

A. Avoidance. No activity may be permitted if there is a practicable alternative to the project that would be less damaging to the environment. Each application for a coastal wetland alteration permit must provide an analysis of alternatives in order to demonstrate that a practicable alternative does not exist. The applicant submitted an alternatives analysis for the proposed project completed by DeLuca-Hoffman Associates, Inc. Because the proposed project is a transit-oriented development, the applicant selected the project site due to its proximity to the highway, passenger rail service, and bus service, all within a short distance to the Portland Jetport. There are currently no other sites in Portland that can offer the amount of land availability and the location required for this type of project, which will offer a range of activities integrating office, hospitality, and cultural uses with a focus on sustainability. The proposed layout includes approximately 386 square feet of wetland fill within the northwesterly "panhandle" of the site associated with a drainage outfall and grading. This alteration was determined to be unavoidable.

B. Minimal Alteration. The amount of wetland to be altered must be kept to the minimum amount necessary for meeting the overall purpose of the project. The site is currently almost completely developed and the proposed project offers opportunities to improve the scenic character of the area as well as the water quality of runoff from the site. The applicant incorporated a number of measures into the project design and layout to minimize potential impacts to shorebird roosting and feeding areas as described in Finding 4.

C. Compensation. In accordance with Chapter 310 Section 5(C)(6)(b), compensation is not required to achieve the goal of no net loss of coastal wetland functions and values since the project will not result in over 500 square feet of fill in the resource, which is the threshold over which compensation is generally required. Further, the proposed project will not have an adverse impact on marine resources or wildlife habitat as determined by DMR and MDIFW. For these reasons, the Department determined that compensation is not required.

The Department finds that the applicant has avoided and minimized wetland impacts to the greatest extent practicable, and that the proposed project represents the least environmentally damaging alternative that meets the overall purpose of the project.

7. OTHER CONSIDERATIONS:

The Department did not identify any other issues involving existing scenic, aesthetic, or navigational uses, soil erosion, habitat or fisheries, the natural transfer of soil, natural flow of water, water quality, or flooding.

BASED on the above findings of fact, and subject to the conditions listed below, the Department makes the following conclusions pursuant to 38 M.R.S.A. Sections 480-A et seq. and Section 401 of the Federal Water Pollution Control Act:

A. The proposed activity will not unreasonably interfere with existing scenic, aesthetic, recreational, or navigational uses.

B. The proposed activity will not cause unreasonable erosion of soil or sediment.

C. The proposed activity will not unreasonably inhibit the natural transfer of soil from the terrestrial to the marine or freshwater environment.

D. The proposed activity will not unreasonably harm any significant wildlife habitat, freshwater wetland plant habitat, threatened or endangered plant habitat, aquatic or adjacent upland habitat, travel corridor, freshwater, estuarine, or marine fisheries or other aquatic life.

E. The proposed activity will not unreasonably interfere with the natural flow of any surface or subsurface waters.

F. The proposed activity will not violate any state water quality law including those governing the classifications of the State's waters provided any CCA treated lumber used for the project is cured on dry land as described in Finding 5.

G. The proposed activity will not unreasonably cause or increase the flooding of the alteration area or adjacent properties.

H. The proposed activity is not on or adjacent to a sand dune.

I. The proposed activity is not on an outstanding river segment as noted in Title 38 M.R.S.A. Section 480-P.

THEREFORE, the Department APPROVES the above noted application of FOREFRONT PARTNERS I, L.P. to alter coastal wetlands and adjacent areas as described in Finding 1, SUBJECT TO THE ATTACHED CONDITIONS, and all applicable standards and regulations:

1. Standard Conditions of Approval, a copy attached.

2. The applicant shall take all necessary measures to ensure that its activities or those of its agents do not result in measurable erosion of soil on the site during the construction of the project covered by this approval.

3. Severability. The invalidity or unenforceability of any provision, or part thereof, of this License shall not affect the remainder of the provision or any other provisions. This License shall be construed and enforced in all respects as if such invalid or unenforceable provision or part thereof had been omitted.

4. Any CCA treated lumber shall be cured on dry land in a manner that exposes all surfaces to the air for 21 days prior to the start of construction.

THIS APPROVAL DOES NOT CONSTITUTE OR SUBSTITUTE FOR ANY OTHER REQUIRED STATE, FEDERAL OR LOCAL APPROVALS NOR DOES IT VERIFY COMPLIANCE WITH ANY APPLICABLE SHORELAND ZONING ORDINANCES.

DONE AND DATED IN AUGUSTA, MAINE, THIS 27th DAY OF July, 2012.

Natural Resource Protection Act (NRPA)
Standard Conditions

THE FOLLOWING STANDARD CONDITIONS SHALL APPLY TO ALL PERMITS GRANTED UNDER THE NATURAL RESOURCE PROTECTION ACT, TITLE 38, M.R.S.A. SECTION 480-A ET.SEQ. UNLESS OTHERWISE SPECIFICALLY STATED IN THE PERMIT.

A. Approval of Variations From Plans. The granting of this permit is dependent upon and limited to the proposals and plans contained in the application and supporting documents submitted and affirmed to by the applicant. Any variation from these plans, proposals, and supporting documents is subject to review and approval prior to implementation.

B. Compliance With All Applicable Laws. The applicant shall secure and comply with all applicable federal, state, and local licenses, permits, authorizations, conditions, agreements, and orders prior to or during construction and operation, as appropriate.

C. Erosion Control. The applicant shall take all necessary measures to ensure that his activities or those of his agents do not result in measurable erosion of soils on the site during the construction and operation of the project covered by this Approval.

D. Compliance With Conditions. Should the project be found, at any time, not to be in compliance with any of the Conditions of this Approval, or should the applicant construct or operate this development in any way other the specified in the Application or Supporting Documents, as modified by the Conditions of this Approval, then the terms of this Approval shall be considered to have been violated.

E. Time frame for approvals. If construction or operation of the activity is not begun within four years, this permit shall lapse and the applicant shall reapply to the Board for a new permit. The applicant may not begin construction or operation of the activity until a new permit is granted. Reapplications for permits may include information submitted in the initial application by reference. This approval, if construction is begun within the four-year time frame, is valid for seven years. If construction is not completed within the seven-year time frame, the applicant must reapply for, and receive, approval prior to continuing construction.

F. No Construction Equipment Below High Water. No construction equipment used in the undertaking of an approved activity is allowed below the mean high water line unless otherwise specified by this permit.

G. Permit Included In Contract Bids. A copy of this permit must be included in or attached to all contract bid specifications for the approved activity.

H. Permit Shown To Contractor. Work done by a contractor pursuant to this permit shall not begin before the contractor has been shown by the applicant a copy of this permit.

Revised (12/2011/DEP LW0428)

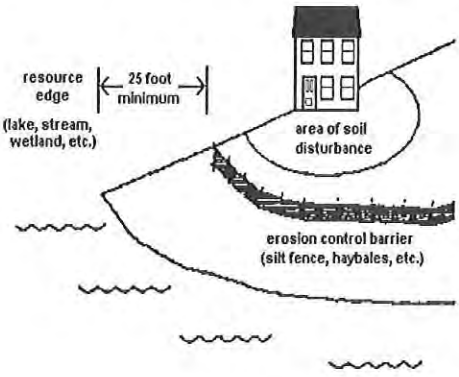
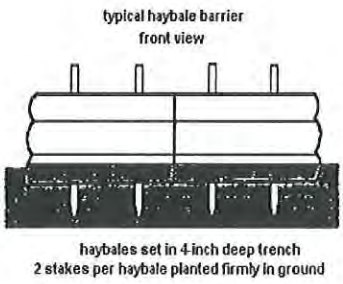
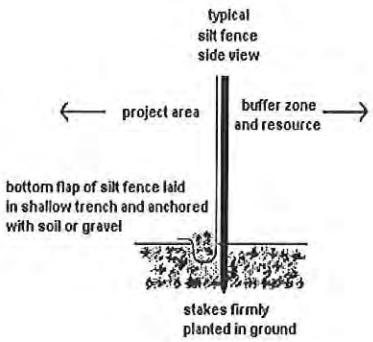
Erosion Control for Homeowners



Before Construction



1. If you have hired a contractor, make sure you discuss your permit with them. Talk about what measures they plan to take to control erosion. Everybody involved should understand what the resource is, and where it is located. Most people can identify the edge of a lake or river. However, the edges of wetlands are often not so obvious. Your contractor may be the person actually pushing dirt around, but you are both responsible for complying with the permit.



2. Call around to find where erosion control materials are available. Chances are your contractor has these materials already on hand. You probably will need silt fence, hay bales, wooden stakes, grass seed (or conservation mix), and perhaps filter fabric. Places to check for these items include farm & feed supply stores, garden & lawn suppliers, and landscaping companies. It is not always easy to find hay or straw during late winter and early spring. It also may be more expensive during those times of year. Plan ahead -- buy a supply early and keep it under a tarp.

3. Before any soil is disturbed, make sure an erosion control barrier has been installed. The barrier can be either a silt fence, a row of staked hay bales, or both. Use the drawings below as a guide for correct installation and placement. The barrier should be placed as close as possible to the soil-disturbance activity.

4. If a contractor is installing the erosion control barrier, double check it as a precaution. Erosion control barriers should be installed "on the contour", meaning at the same level or elevation across the land slope, whenever possible. This keeps stormwater from flowing to the lowest point along the barrier where it can build up and overflow or destroy the barrier.

During Construction

1. Use lots of hay or straw mulch on disturbed soil. The idea behind mulch is to prevent rain from striking the soil directly. It is the force of raindrops hitting the bare ground that makes the soil begin to move downslope with the runoff water, and cause erosion. More than 90% of erosion is prevented by keeping the soil covered.

2. Inspect your erosion control barriers frequently. This is especially important after a rainfall. If there is muddy water leaving the project site, then your erosion controls are not working as intended. You or your contractor then need to figure out what can be done to prevent more soil from getting past the barrier.

3. Keep your erosion control barrier up and maintained until you get a good and healthy growth of grass and the area is permanently stabilized.

After Construction

1. After your project is finished, seed the area. Note that all ground covers are not equal. For example, a mix of creeping red fescue and Kentucky bluegrass is a good choice for lawns and other high-maintenance areas. But this same seed mix is a poor selection for stabilizing a road shoulder or a cut bank that you don't intend to mow. Your contractor may have experience with different seed mixes, or you might contact a seed supplier for advice.

2. Do not spread grass seed after September 15. There is the likelihood that germinating seedlings could be killed by a frost before they have a chance to become established. Instead, mulch the area with a thick layer of hay or straw. In the spring, rake off the mulch and then seed the area. Don't forget to mulch again to hold in moisture and prevent the seed from washing away or being eaten by birds or other animals.

3. Keep your erosion control barrier up and maintained until you get a good and healthy growth of grass and the area is permanently stabilized.

Why Control Erosion?

To Protect Water Quality

When soil erodes into protected resources such as streams, rivers, wetlands, and lakes, it has many bad effects. Eroding soil particles carry phosphorus to the water. An excess of phosphorus can lead to explosions of algae growth in lakes and ponds called blooms. The water will look green and can have green slime in it. If you are near a lake or pond, this is not pleasant for swimming, and when the soil settles out on the bottom, it smothers fish eggs and small animals eaten by fish. There many other effects as well, which are all bad.

To Protect the Soil

It has taken thousands of years for our soil to develop. It usefulness is evident all around us, from sustaining forests and growing our garden vegetables, to even treating our septic wastewater! We cannot afford to waste this valuable resource.

To Save Money ($$)

Replacing topsoil or gravel washed off your property can be expensive. You end up paying twice because State and local governments wind up spending your tax dollars to dig out ditches and storm drains that have become choked with sediment from soil erosion.

DEP INFORMATION SHEET

Appealing a Department Licensing Decision

Dated: March 2012 **Contact: (207) 287-2811**

SUMMARY

There are two methods available to an aggrieved person seeking to appeal a licensing decision made by the Department of Environmental Protection's ("DEP") Commissioner: (1) in an administrative process before the Board of Environmental Protection ("Board"); or (2) in a judicial process before Maine's Superior Court. An aggrieved person seeking review of a licensing decision over which the Board had original jurisdiction may seek judicial review in Maine's Superior Court.

A judicial appeal of final action by the Commissioner or the Board regarding an application for an expedited wind energy development (35-A M.R.S.A. § 3451(4)) or a general permit for an offshore wind energy demonstration project (38 M.R.S.A. § 480-HH(1)) or a general permit for a tidal energy demonstration project (38 M.R.S.A. § 636-A) must be taken to the Supreme Judicial Court sitting as the Law Court.

This INFORMATION SHEET, in conjunction with a review of the statutory and regulatory provisions referred to herein, can help a person to understand his or her rights and obligations in filing an administrative or judicial appeal.

I. ADMINISTRATIVE APPEALS TO THE BOARD

LEGAL REFERENCES

The laws concerning the DEP's *Organization and Powers*, 38 M.R.S.A. §§ 341-D(4) & 346, the *Maine Administrative Procedure Act*, 5 M.R.S.A. § 11001, and the DEP's *Rules Concerning the Processing of Applications and Other Administrative Matters* ("Chapter 2"), 06-096 CMR 2 (April 1, 2003).

HOW LONG YOU HAVE TO SUBMIT AN APPEAL TO THE BOARD

The Board must receive a written appeal within 30 days of the date on which the Commissioner's decision was filed with the Board. Appeals filed after 30 calendar days of the date on which the Commissioner's decision was filed with the Board will be rejected.

HOW TO SUBMIT AN APPEAL TO THE BOARD

Signed original appeal documents must be sent to: Chair, Board of Environmental Protection, c/o Department of Environmental Protection, 17 State House Station, Augusta, ME 04333-0017; faxes are acceptable for purposes of meeting the deadline when followed by the Board's receipt of mailed original documents within five (5) working days. Receipt on a particular day must be by 5:00 PM at DEP's offices in Augusta; materials received after 5:00 PM are not considered received until the following day. The person appealing a licensing decision must also send the DEP's Commissioner a copy of the appeal documents and if the person appealing is not the applicant in the license proceeding at issue the applicant must also be sent a copy of the appeal documents. All of the information listed in the next section must be submitted at the time the appeal is filed. Only the extraordinary circumstances described at the end of that section will justify evidence not in the DEP's record at the time of decision being added to the record for consideration by the Board as part of an appeal.

WHAT YOUR APPEAL PAPERWORK MUST CONTAIN

Appeal materials must contain the following information at the time submitted:

1. *Aggrieved Status.* The appeal must explain how the person filing the appeal has standing to maintain an appeal. This requires an explanation of how the person filing the appeal may suffer a particularized injury as a result of the Commissioner's decision.
2. *The findings, conclusions or conditions objected to or believed to be in error.* Specific references and facts regarding the appellant's issues with the decision must be provided in the notice of appeal.
3. *The basis of the objections or challenge.* If possible, specific regulations, statutes or other facts should be referenced. This may include citing omissions of relevant requirements, and errors believed to have been made in interpretations, conclusions, and relevant requirements.
4. *The remedy sought.* This can range from reversal of the Commissioner's decision on the license or permit to changes in specific permit conditions.
5. *All the matters to be contested.* The Board will limit its consideration to those arguments specifically raised in the written notice of appeal.
6. *Request for hearing.* The Board will hear presentations on appeals at its regularly scheduled meetings, unless a public hearing on the appeal is requested and granted. A request for public hearing on an appeal must be filed as part of the notice of appeal.
7. *New or additional evidence to be offered.* The Board may allow new or additional evidence, referred to as supplemental evidence, to be considered by the Board in an appeal only when the evidence is relevant and material and that the person seeking to add information to the record can show due diligence in bringing the evidence to the DEP's attention at the earliest possible time in the licensing process or that the evidence itself is newly discovered and could not have been presented earlier in the process. Specific requirements for additional evidence are found in Chapter 2.

Other Considerations in Appealing a Decision to the Board

1. *Be familiar with all relevant material in the DEP record.* A license application file is public information, subject to any applicable statutory exceptions, made easily accessible by DEP. Upon request, the DEP will make the material available during normal working hours, provide space to review the file, and provide opportunity for photocopying materials. There is a charge for copies or copying services.
2. *Be familiar with the regulations and laws under which the application was processed, and the procedural rules governing your appeal.* DEP staff will provide this information on request and answer questions regarding applicable requirements.
3. *The filing of an appeal does not operate as a stay to any decision.* If a license has been granted and it has been appealed the license normally remains in effect pending the processing of the appeal. A license holder may proceed with a project pending the outcome of an appeal but the license holder runs the risk of the decision being reversed or modified as a result of the appeal.

What to Expect Once You File a Timely Appeal with the Board

The Board will formally acknowledge receipt of an appeal, including the name of the DEP project manager assigned to the specific appeal. The notice of appeal, any materials accepted by the Board Chair as supplementary evidence, and any materials submitted in response to the appeal will be sent to Board members with a recommendation from DEP staff. Persons filing appeals and interested persons are notified in advance of the date set for Board consideration of an appeal or request for public hearing. With or without holding a public hearing, the Board may affirm, amend, or reverse a Commissioner decision or remand the matter to the Commissioner for further proceedings. The Board will notify the appellant, a license holder, and interested persons of its decision.

II. JUDICIAL APPEALS

Maine law generally allows aggrieved persons to appeal final Commissioner or Board licensing decisions to Maine's Superior Court, see 38 M.R.S.A. § 346(1); 06-096 CMR 2; 5 M.R.S.A. § 11001; & M.R. Civ. P 80C. A party's appeal must be filed with the Superior Court within 30 days of receipt of notice of the Board's or the Commissioner's decision. For any other person, an appeal must be filed within 40 days of the date the decision was rendered. Failure to file a timely appeal will result in the Board's or the Commissioner's decision becoming final.

An appeal to court of a license decision regarding an expedited wind energy development, a general permit for an offshore wind energy demonstration project, or a general permit for a tidal energy demonstration project may only be taken directly to the Maine Supreme Judicial Court. See 38 M.R.S.A. § 346(4).

Maine's Administrative Procedure Act, DEP statutes governing a particular matter, and the Maine Rules of Civil Procedure must be consulted for the substantive and procedural details applicable to judicial appeals.

ADDITIONAL INFORMATION

If you have questions or need additional information on the appeal process, for administrative appeals contact the Board's Executive Analyst at (207) 287-2452 or for judicial appeals contact the court clerk's office in which your appeal will be filed.

Note: The DEP provides this INFORMATION SHEET for general guidance only; it is not intended for use as a legal reference. Maine law governs an appellant's rights.

Comments - Environmental Project Review
Maine Department of Inland Fisheries and Wildlife

Wildlife Division Comments – Region A	
Applicant's Name: Forefront Partners I, LP (Forefront at Thompson's Point)	
Project: L-25672-2G-A-N	Regulatory Agency: MDEP
Project Type: NRPA	Project Manager: Richardson
Comments Due Date:	Date Comments Sent: 7/13/12
Project Location	
Town: Portland	County: Cumberland
Waterbody: Fore River	
Wildlife Biologist(s): Camuso, Tudor, Walker	

After review of the application and consideration of the proposal's probable effect on the environment, and on our agency's programs and responsibilities, we provide the following comments:

I. Project Description/Resource Affected: Forefront Partners I, LP proposes to develop the 22.5 +/- acre Thompson's Point as a mixed use commercial and entertainment development to include an events center and concert hall, outdoor amphitheater, hotel, sports medicine facility, office complex, parking garage and surface parking for 780 vehicles. Additionally, the proposed development includes public amenities such as trails and a water access site. A seasonal rowing facility has also been suggested in the northeast corner of the site. It is our understanding that this last element has been removed from the current proposal and will potentially be reconsidered at a future date.

MDIF&W has mapped two Significant Wildlife Habitats in this portion of the Fore River, both of which include upland buffers that extend into the proposed development area. The mapped habitats include a Significant Shorebird Feeding Area along the western side of the peninsula and a Significant Shorebird Roosting Area along the eastern shoreline. Shorebirds that frequent Maine during the spring on their way to breeding grounds in the open tundra of northern Canada, and again in mid to late summer on their return trip south are dependent on open mudflats for feeding and, at times of high tide, require specific shoreline conditions that provide secure areas for roosting. Upland buffers associated both habitat types are critical in minimizing disturbance to migratory shorebirds by proximate human activities. Additionally, the vegetated condition of buffers associated with roosting habitat is an important factor in determining viability of the roost. Shorebirds will abandon roosts where tall woody vegetation that provides cover for raptors becomes established. Several of the shorebird species that frequent Maine during their migrations have shown long-term populations declines. These declines are, in part, due to significant losses of both migratory feeding and roosting stop over habitats.

II. Comments/Recommended Considerations or Conditions:

Wildlife Considerations:
MDIFW originally mapped Shorebird Significant Wildlife Habitats and associated buffers in 2006. At that time, shorebird roosting areas were digitized with a 250-foot associated upland

buffer based on scientific literature that documented human disturbance effects. Similarly, feeding areas were digitized with a 100-foot buffer intended to minimize unnecessary disturbance to shorebird activity on the mudflats. Where roosts occur proximate to developed areas, development was clipped out of the original buffers by GIS staff to account for existing disturbances. In the case of Thompson's Point, the originally mapped roost habitat buffer varied from 25-feet offset from mean high water to 150-feet offset from mean high water based on best available aerial photos at the time. As a result of two recent site walks and multiple revisions of the delineation of the roost area and the feeding area buffers based on on-the-ground conditions, neither buffer now extends into the site more than 50-feet from mean high water.

The applicant has adjusted the initially submitted project site plan to avoid and minimize impacts within these revised buffers and has worked closely with our Department to develop a landscape plan that at once creates adequate vegetative screening of the mapped shorebird feeding area between the shoreline and proposed pedestrian trail, and limits vegetation within the shorebird roost area buffer to shrubs that will likely not exceed 4-feet in height and thereby maintain visibility for the shorebirds and minimize the threat of increased predator activity. Additionally, the applicant has agreed to install interpretive signage at the proposed south end boat launch. The signage will identify the presence of shorebird habitat and explain the significance of these habitats. Our Department will assist the applicant in designing the signage to be installed. The applicant has also agreed to install a raised viewing platform overlooking the saltmarsh and mudflat communities in the northwestern portion of the site. This structure will serve as both an attractive amenity for the project and help to build local awareness of and appreciation for local bird life.

Given the steps that the applicant has taken to maintain and enhance mapped Significant Wildlife Habitats at this site we do not feel that project completion will result in any significant adverse impact to the resource.

Should the rowing club be constructed during a subsequent phase of development, we do feel that the structure extending into the roost and resulting presence of shells passing along the frontage of the roost will eliminate existing habitat values. With the proposed placement of the facility, it is unlikely that any mitigation for the loss of the roost could take place on-site. We would therefore recommend mitigation for the loss of this Significant Wildlife Habitat feature in the form of a contribution to the Maine Natural Resource Conservation Program for future shorebird roost protection and monitoring. The total square footage of the revised roosting habitat is 63,764sf. Should the rowing club locate in this area, the Department feels that a contribution to the MNRCP fund of $90,544 (63,764x0.71x2 per MDEP guidance) would be appropriate.

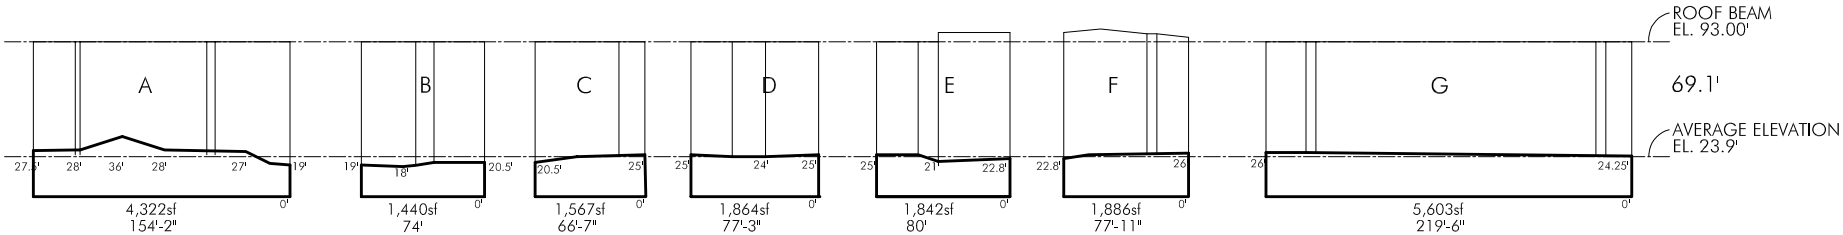
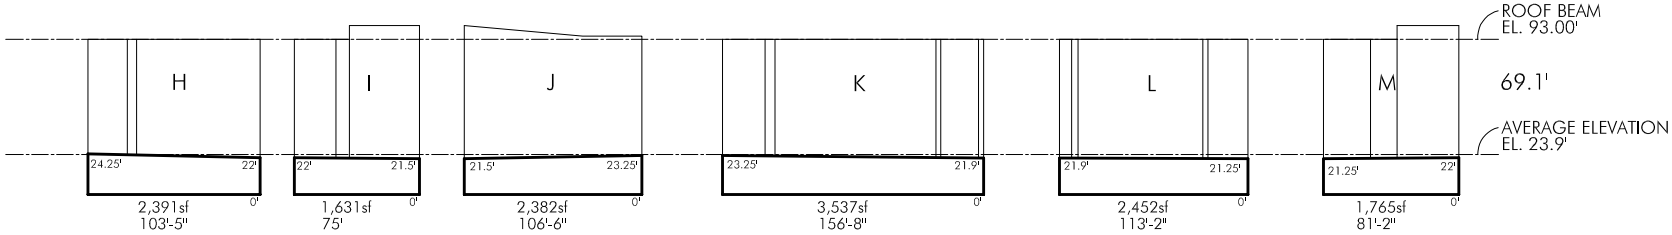
BUILDING HEIGHT CALCULATIONS

Pre-development spot grades are based on site survey prepared by Sebago Technics titled "Alta/ACSM Land Title Survey" May 27, 2011, revised Nov. 23, 2011.

The pre-development average grade has been calculated by dividing the total area between elev. 0' and the 2011 grade against the proposed building by the length of the proposed building's perimeter.



Building height has been calculated from highest roof beam elevation to the pre-development average grade per City of Portland Land Use Code, Section 7, Dimensional Standards.



TOTAL AREA ABOVE ELEV. 0' TO PRE-DEVELOPMENT GRADE:
48,438 sf

TOTAL BUILDING PERIMETER:
2,026 linear ft

$$\frac{48{,}438 \text{ sf}}{2{,}026 \text{ linear ft}} = 23.9' \text{ average elevation}$$

ROOF BEAM ELEV:	EL. 93.00'
AVERAGE GRADE:	EL. 23.9'
BUILDING HEIGHT:	69.1'

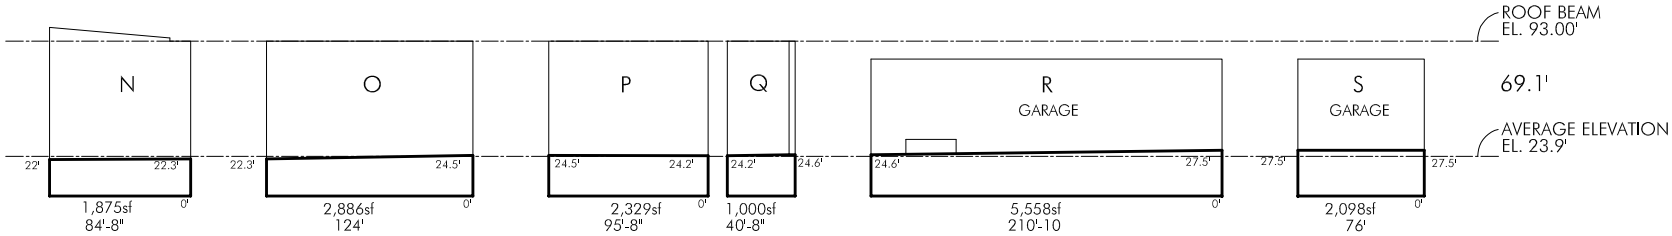


TABLE 7-E: MIXED-USE ZONE DIMENSIONAL STANDARDS

		B-1/B-1b	B-2/B-2b/B-2c	B-3/B-3b/B-3c	B-4	B-5/B-5b	B-6	B-7

	B-1/B-1b	B-2/B-2b/B-2c	B-3/B-3b/B-3c	B-4	B-5/B-5b	B-6	B-7
Structure height (max.)	On-Peninsula: 45 ft., except 50 ft. along Congress Street if commercial first floor and residential above[2] Off-Peninsula: 35 ft.	45 ft., except 50 ft. if first floor is in commercial use, 65 ft. in B-2 and B-2c on lots >5 ac. if required side and rear setbacks are increased by 1 foot for each foot of height over 45 ft., or as otherwise governed by the Bayside Height Overlay Map	See Downtown and Bayside Height Overlay Maps	65 ft.	65 ft., except in B-5b along W. Commercial St. south of Danforth St.[5] and 120 ft. on Thompson's Point[6]	65 ft. or as otherwise governed by the B-6 Building Height Overlay Map	See Bayside Height Overlay Map
Lot coverage (max.)			25% of lot area for portions of structures exceeding 125 ft. in height[4]				
Impervious surface ratio (max.)	90%	Residential: None Other uses in B-2 and B-2c: 80% Other uses in B-2b: 90%		80%			

[1] Uses in structures which existed prior to the date of enactment of the B-1/B-1b zones are exempt.
[2] The commercial first floor uses shall utilize at least 75 % of the first-floor frontage along Congress Street and shall have an average depth of at least 20 ft.
[3] A building will be determined to have an active street frontage upon meeting the following guidelines to the greatest extent practicable: the primary building façade shall be within 10 ft. feet of the front lot line; there shall be no parking on the lot within 35 ft. of the front lot line; no more than 25% of the first floor primary façade shall consist of access to garages, unutilized space, service entrances, storage or mechanicals and the remaining minimum 75% shall have an average depth of a minimum of 20 ft. for residential or commercial uses; and all primary ground floor entries to multi-family buildings must orient to street, not to interior blocks or parking lots.
[4] Except that no floor area shall be required to be less than 10,500 SF, gross.
[5] For parcels of land in the B-5b zone located along W. Commercial St. south of Danforth St.: West of the projection of the centerline of the Fletcher St. right-of-way, the maximum building height shall be 45 ft.; and, east of the projection of the centerline of the Fletcher St. right-of-way and west of the projection of the centerline of the Emery St. right-of-way, the maximum building height shall be 55 ft. A projection of the centerline of a street is defined by extending the centerline of the referenced street right-of-way along its most southerly block to the centerline of W. Commercial St. Furthermore, notwithstanding Subsection 7.5.1, no rooftop structure located between the projections of the centerlines of Emery St. and Fletcher St., as described above. shall exceed a height of 62 ft as measured from average grade of the building at its foundation.
[6] Applies only to parcels subject to an approved master development plan. Thompson's Point is defined as the contiguous parcels of upland occupying the peninsula bounded on the east by Route 295, on the north by the Mountain Division Rail right-of-way, and on the south and west by the Fore River and its associated wetlands. Nearby lands accessed from Hobart and Osgood Streets are not included.
[7] Does not apply to parking garages and public transportation facilities. Notwithstanding required setbacks, new structures located in the blocks located south of Fore Street and north of Commercial Street and its extension shall build to the key building envelopes shown on the B6 Building Height Overlay & Building Envelopes map. Buildings located in the area east of the Fore Street Connector shall not have a maximum front setback and shall not be required to build to the key building envelope perimeter. Parking structures and the buildings for public transportation facilities may, however, be set back beyond the key building envelopes (toward the interior of blocks), but may not occupy the land between the key building envelope and the street right-of-way.
[8] For buildings fronting on two or more streets, the minimum building wall on one street may be decreased so long as the frontage is proportionally increased on other streets in so far that the building wall on the secondary street is not reduced to less than 25 ft. Buildings in the area east of the Fore Street Connector shall not be subject to this requirement.
[9] Does not apply to additions to or relocations of designated historic structures or structures determined to be eligible by the Historic Preservation Board.

CONFORMITY WITH APPLICABLE DESIGN STANDARDS
(Site Plan and Zoning)

The following statement is made in accordance with the City of Portland Code of Ordinances, Chapter 14 Land Use, Section 14.6 – Site Plan Review Standards.

OVERVIEW

This project conforms with all the applicable design standards of Section 14.6, Site Standards as demonstrated in the following narrative.

Section 14.6.1 Transportation Standards

A. Impact on Surrounding Street Systems:

The applicant has obtained a Traffic Movement Permit which addresses impacts on surrounding street systems. A summary of calculated site trip generation with the proposed use is enclosed with this application.

B. Access and Circulation:

1) Site Access and Circulation.

a. Thompson's Point development site is accessed via Thompson's Point Road at the intersection of Fore River Parkway. The applicant has worked with fire safety and city officials to make access and circulation safe for all vehicular and pedestrian users. The proposed development includes an on-site two-way dead-end driveway with (498) four hundred ninety-eight parking stalls and a turn around hammer head. The driveway utilizes an existing 22ft curb cut and has been designed to accommodate a fire truck apparatus, emergency vehicles, small to mid-sized moving trucks, trash vehicles, and passenger vehicles.

b. Proposed pedestrian circulation connects the residences to both the adjacent public trail system and paved multi-use trail on Thompson's Point Road. The closest transit stop is 665 ft (0.13 miles) barrier free walking distance from the front door.

c. Access to the site has been designed to separate and reduce conflict between pedestrian and vehicular access.

d. The site is designed to have both visitor/short term parking near the front entrance and private long term residential parking in the parking garage. The entrance to the garage is internal to the site by several hundred feet providing ample stacking capacity for vehicles waiting to access the parking structure.

2) Loading and Servicing.

a. A short-term loading area is proposed to be at finished grade near the building utility corridor. The area of the building includes a service elevator and trash room with the ability to drive a vehicle up to an internal trash room. The loading area is designed to be separate and not interfere with site circulation of traffic, pedestrians, or bicycle access.

3) Sidewalks.

a. A 6 ft wide sidewalk and a vegetated esplanade atop 6" high curb is proposed on the front side of the residential building which connects to the existing campus sidewalk network on Thompson's Point Road.

b. The development sidewalk improvements are relatively new, and the existing sidewalks are in good working condition.

c. The development provides pedestrian access and is not requesting a waiver from this standard.

C. Public Transit access

1) The new development does not require, nor does it propose the construction of a new transit shelter along its frontage. Thompson's Point has worked closely with METRO to coordinate public transit services to and from the City of Portland in an efficient and convenient way for METRO and their riders. This includes local and regional bus service on Thompson's point.

a. The development is not located on a lot having frontage on a federally classified arterial roadway

b. The residential development will be served by (2) two existing transit stops on Thompson's Point, both of which access downtown Portland via the Number 1 Bus as well as fast regional service to Brunswick via the Breeze. The closest and most convenient stop is located at the Portland Transportation Center. This transit stop is 1/8th (665 ft) of mile from the front door. The second stop on Thompson's point, near the intersection of Resurgam Place and Thompson's Point Road is just over ¼ of a mile (1504 ft) from the front door. Both locations are accessible via barrier -free routes and benefit from a transit shelter.

2) The transit stops on Thompson's point are connected to public sidewalk system.

3) The development meets the standard for public transit access and does not request any waivers from this standard.

D. Parking:

1) Vehicular parking:

a. The Forefront at Thompson's Point Master Development Plan and Subdivision was approved ***without*** a minimum parking requirement based on the completed parking study per the Technical Manual. The development is required to be consistent with the principles of the approved parking study. The current site plan proposes (498) four hundred ninety-eight permanent paved onsite spaces for residents, visitors, and Thompson's Point managed supply. Of which, 463 parking stalls are located in a 6-story parking structure,

b. Forefront has prepared a TDM strategy report approved in 2011, updated in 2015, and March 30, 2018. The Thompson's Point TDM Coordinator has provided subsequent annual progress updates to the city in accordance with the City's reporting protocol for all sites participating in TDM strategies. Thompson's Point is proud to be a very proactive member of the TDM program and is always seeking to improve their TDM initiatives. Thompson's Point was named "Best Workplace for Commuters Site" by the Center for Urban Transportation Research in 2019. This honor was in large part to their execution of

the TDM Strategies. Copies of the TDM materials are on file with the city and are available upon request.

Specifically, the applicant of the residential development includes several TDM initiatives such as promoting safe and convenient bicycle access routes and secure inside storage. The bike storage room in the parking structure and second room inside the building amenity space that can hold a total of 90 bicycles in addition to the 12 exterior bicycle parking spaces near the main entrance. Site selection close to a multi-modal transportation center was a significant factor in the construction of a large-scale residential development on Thompson's Point. The applicant's management team will communicate with the designated Thompson's Point TDM coordinator to work on initiatives, strategies, and reporting updates

c. N/A

d. The site layout plan shows compliant parking stall and drive aisle dimensions. Combined on-site parking garage and surface spaces total 498 parking spaces and consist of 378 standard parking stalls, 94 compact parking stalls, and 26 ADA parking stalls pursuant the dimensional standards described in Section 1 – Transportation Systems and Street Design Standards of the City's Technical Manual.

2) Bicycle Parking:

a. Section 19 of the LUC Minimum off-street parking requirements does not apply to Thompson's Point because it is in the B-5 Zone. However, the applicant values the importance of secured and user-friendly bicycle storage for their tenants and provided the 2 bikes/5 units typically required (255units/5units=51*2 = 102 Bikes). Specifically, (66) sixty-six bicycle stalls for the residents are provided in the secured bike room of the garage. The bike room can be accessed from inside the parking structure or directly from the outside sidewalk system. An additional (24) twenty-four bicycle stalls for the residents are provided in the secured bike room off the amenity area of the residential building. The bike room can be accessed from inside the common area hallway or directly from the outside sidewalk system near the main entrance. A combined total of (12) twelve exterior bike stalls are in two locations near the front of the site; (4) four exterior bicycle stalls (2 Dero bicycle hitching posts or approved equal) are proposed near the main entrance and (8) (4 Dero bicycle hitching posts or approved equal) adjacent to the sidewalk near the entrance to the visitors parking area.

b. Motorcycles and Scooter Parking.

(i) The proposed structured parking does not have special provisions for motorcycles or scooters. They are anticipated to use the standard spaces designated to the unit.

3) Snow Storage
a. Snow storage will primarily be managed by removing temporary small on-site stockpiles to other designated areas of the campus or hauled off campus.
b. The garage will be plowed and utilize a shoot apparatus as required.

4) Electric Vehicle (EV) Charging

a. The City's Technical Manual cites a goal for 20 % of the parking spaces having Level 2 chargers (or higher) to meet the estimated EV Charging demand; however, given the applicant's directly applicable experience in similar real estate markets and regulatory

latitude given to structured parking structures of greater than 100 spaces, the applicant has prepared a practical EV Charging approach aimed to meet the intent of Technical Manual's section 1.14 – Electrical Vehicle Infrastructure. The proposal outlined below is believed to more than satisfy today's demand as well as future ready the parking infrastructure for years to come.

Based on the applicant's experience with owning and operating multifamily properties (currently combined for a total management of 620 units and nearly 1000 spaces) they have observed EV charging demand substantially below 20% of parking spaces, with electric vehicle (EV) chargers often unused. In the parking garages and surface lots they own and manage; they have provided Level 2 EV chargers for 1% of the parking spaces and made another 1% of the spaces EV-ready. Despite these preparations, there has been insufficient demand to justify converting these EV-ready spaces into fully operational charging stations. The applicant recognizes the EV industry is expected to continue to grow and with that in mind proposes several charging solutions to prepare for growth.

The proposed garage at Thompson's Point is primarily being used for residential use; therefore, we believe that longer-term or overnight charging solutions are more appropriate. Designing for the end user, of the 463 spaces inside the garage, we propose the following solution for 10% of the spaces (46 spaces):

- **2% +/- or (9) nine of the spaces will be equipped with Level 2 chargers**.
- **3% +/- or (14) fourteen of the spaces will be equipped with Level 1 chargers**.
- **5% +/- or (23) of the spaces will be made EV-ready for future demand.**

This proposal reflects the actual demand experienced and aligns with the nature of our primarily residential garage. We are confident that this approach will effectively meet the needs of our residents while ensuring the efficient use of resources.

Whereas, the bulk of remaining surface parking spaces are designated for Thompson's Point managed parking supply, EV charging is largely accounted for in the proximity of the building generating the parking demand rather than in these remote spaces. It is paramount to install EV infrastructure in a location where the vehicle owner will have access to the vehicle. Therefore, EV charging solutions for the surface spaces proposed for this phase take place in other areas of the shared use parking supply across the campus.

E. Transportation Demand Management (TDM):

1) The applicant has developed a campus-wide TDM Plan pursuant to the City of Portland's Code of Ordinances.

2) The TDM Plan incorporates the City goals by integrating elements described in the Technical Manual. Specifically, Thompson's Point operations team has a history of promoting and implementing TDM strategies for their employees and visitors. The Cathartes management staff will coordinate with the Thompson's Point TDM Coordinator to strategize, implement, and set SOV reduction goals. The Cathartes asset management team uses several programs in other properties that will be implemented upon opening the building here on Thompson's Point. TDM initiatives are further outlined in Attachment P.

Section 14.6.2 Environmental Quality Standards

A. Preservation of Significant Natural Features:

1) The project site is a previously developed suburban site. The applicant has preserved the very limited significant natural features to the extent practicable.

a. There are no known populations of trees or plants present on the site that have been classified as Endangered and Threatened in Maine.
b. There are no known habitats/communities, present that appear on the state or federal endangered or threatened animal list.
c. The project will not impact any moderate or high value waterfowl or wading bird habitat, nesting or feeding areas due to setbacks from such
d. No aquifers are present
e. Some wetland impact will occur but will be minimized. The project received approvals from the Army Corps of Engineer and Maine DEP to fill 386 SF of coastal wetland for the purpose of a stormwater outfall.

2) The proposed buildings are located in an area of the site that was previously developed and designed to complement, enhance, and preserve the adjacent significant natural features. Some additional clearing must occur for development but it is minor and not areas set aside for preservation or part of continuous habitat blocks.

3) The applicant is not requesting a waiver from this standard.

B. Landscaping Preservation:

1) Limited tree removal is required due to the previously developed nature of the site.

2) Fencing will be located around the dripline of individual trees and larger clusters of trees to remain. These areas will be preserved and protected from construction activities. There are a handful of significant oaks along the southern property line that had previously been requested for preservation by the former City Arborist. These are shown on the plans.

3) The significant trees for preservation had previously been identified by the City Arborist and are shown on the plans. The remaining vegetation is either non-native, invasive or scrub.

4) Not applicable. No waiver is being requested

5) The project is proposing to plant 93 new trees along with hundreds of plants on the project site

C. Site Landscaping and Buffers.

1) The combination of 93 proposed trees and hundreds of shrubs, new fencing and existing vegetation to remain should more than satisfy this requirement.
2) Buffers

a. Trash and utility service rooms are located within the building. The service portion of the building is heavily screened with trees, shrubs and ornamental grasses. All ground mounted utility structures are located within the core of the site so not visible from the public sidewalk due to distance and proposed landscaping.

b. Not applicable. Project is residential.

c. The project proposes significant plantings and also proposes to preserve existing vegetation wherever possible in the areas where detrimental impacts on the site may occur.

3) Parking Lot Landscaping

a. The project proposes significant landscaping around vehicular travel and parking areas.

b. Landscape islands are proposed to meet the standard.
c. Not applicable. No waiver is being requested.

4) Street Trees

a. Street trees have been proposed in location and quantities where possible. The project frontage along Sewall Street Extension is full of significant underground utilities so a limited number of trees can be planted in this zone. However, the rest of the site is heavily planted. Selected trees are of species that have been historically accepted/approved by the City.
b. Site constraints along the project frontage / right-of-way prevent the installation of street trees so have been located on-site but within view from the public way. The applicant understands the likely need to pay into the street tree fund due to the limited frontage and tree per dwelling unit requirement.

D. Water Quality, Stormwater Management and Erosion Control:

1) The Forefront at Thompson's Point has been designed to meet all City and State Stormwater management standards for Site Location of Development projects as part of the Subdivision Application. A supplemental stormwater management memorandum detailing how this portion of the project complies with the overall stormwater management plan has been prepared and included in this application in Attachment J.

a. All stormwater draining onto the site from adjacent properties will be directed in such a way to prevent the creation of ponding or flooding.

b. All stormwater runoff is proposed to discharge directly to the Fore River. The project will not adversely impact adjacent lots.

c. All stormwater runoff is proposed to discharge directly to the Fore River. The project will not adversely impact adjacent lots.

2) The Stormwater Management Plan demonstrates the project meets the requirements and goals of the Technical Manual.

3) The stormwater management system includes groundwater protection measures. All proposed inlets or filters are self-contained isolated from groundwater infiltration.

Section 14.6.3 Public Infrastructure and Community Safety Standards.

A. Consistency with City Master Plans:

1. The project has been designed to be consistent with the City's Zoning Ordinance and off-site infrastructure.

2. The Thompson's Point overall site proposed the conveyance of land to the City for the sole purpose of public access to the site. The City has successfully petitioned for a Public Railroad Crossing at the entrance to the site.

B. Public Safety and Fire Prevention:

1. The project aims to incorporate CPTED

a. The site has been designed to promote safe and inviting public meeting and gathering spaces.

b. The proposed development allows for emergency response vehicles to access multiple sides of the proposed building with controlled access.

c. The public gathering spaces and private patios are landscaped, fenced, and otherwise designed to create a feeling of backyard privacy and ownership one would protect as their own.

2. The site plan provides multiple points of clear access to and around the building.

C. Public Utilities:

1) The newly installed private infrastructure has been sized to accommodate the proposed residential units (255) and will tie into public infrastructure previously reviewed for compatibility with the entire subdivision.

2) The primary power electrical service will extend underground to/from a proposed pad mounted transformer sized to accommodate this new load.

3) New separate sanitary and storm infrastructure has been sized and installed in accordance with the City's technical manual.

4) The existing site sanitary sewer system is connected to the Thompson's Point sanitary pump station owned and operated by the Portland Water District. All sanitary waste discharge will be tied into the existing public wastewater system. Onsite wastewater treatment is not proposed.

5) The project will use interior dumpsters to store trash and recyclables temporarily until a contracted waste management company can pick up and dispose of the solid waste. The project proposes to remove all temporary trash receptacles at regularly scheduled intervals.

Section 14.6.4 Site Design Standards.

A. Massing, Ventilation and Wind Impact:

1) The new building will have been designed to not result in adverse impacts to other buildings or abutting properties. The proposed building is a standalone structure standing a significant distance from other existing or proposed buildings such that no unsafe wind conditions will be created.

2) The new building will have been designed to not result in adverse impacts to other buildings or abutting properties.

3) All HVAC venting is located on the roof or vented in an area that will not affect any public spaces or adjacent properties.

B. Shadows:

a. The development is located in the B5 Zone and this standard is not applicable.

C. Snow and Ice Loading:

a. The proposed roof is a flat roof and will store snow and ice until running off to adjacent areas. The roof is designed to store snowfall and not create dangerous falling snow conditions onto adjacent sidewalks, balconies, or public spaces.

D. View Corridors:

a. This standard is not applicable, the project site is located outside the Downtown Vision View Corridor Protection Plan.

E. Historic Resources:

1) This standard is not applicable, the development is not located in a historic district, historic landscape district or City designated landmark.

2) This standard is not applicable, the development is not located adjacent to or within 100 feet of a designated landmark, historic district, or historic landscape district.

3) There are no known archaeological resources on the site.

F. Exterior Lighting:

1) Site Lighting.
   a. All permanent exterior site and building mounted lighting has full cut off fixtures. Proposed site lighting is consistent with other lighting installed on the site and consists of LED cut off fixtures mounted a maximum of 20 ft high.
   a. Specialty ground bollard lighting has been added in gathering areas and shown on the enclosed Photometrics and lighting design plan.

G. Noise and Vibration:

a. HVAC and Mechanical Equipment.
   (i) All equipment will be located on the interior portion of the roof (centrally located to the site) and naturally screened from ground view due to the height of the building. All venting and emissions will meet applicable state and federal emission requirements.
   (ii) If applicable, the generator will be limited to one hour of routine maintenance per week.

H. Signage and Way finding:

1) All building signage and specialty wayfinding signage will be submitted under a separate application package. The project will include building address and modest identification signage above the main entrance canopy as well as on a freestanding monument sign near the entrance driveway.
   a. The size of signage will be complimentary in nature and not compete with architecture of the building while providing emergency response identification consistent with 911 requirements.
   b. The size of signage will be complimentary in nature and fit the scale of the building as not to detract from the building.
   c. The freestanding sign will be set back about 50 ft from the driveway intersection due to existing underground utilities and will not affect visibility at the intersection
   d. Sign Lighting will meet city standards to avoid glare and upward lighting.
   e. Signage is not proposed above the 1st floor.

2) Standard traffic signage is shown on the enclosed Site Layout Plan and designed to meet MUTCD recommendations.

I. Zoning Related Design Standards:

1) The proposed residential building is a permitted use in the B-5 Zone. The development meets all Zoning Dimensional standards as summarized in the table below:

Summary of Zoning Dimensional Requirements:		
Requirement Description	**Required**	**Provided**
Minimum Lot Size	None	4.637 acres
Minimum Frontage	None	139 +/- Ft
Yard Dimensions:		
Front	None	34 +/- FT
Side	None	10 FT
Rear	None	39 FT
Maximum Lot Coverage:	100%	63%
Maximum Building Height	120 FT	69.1’

The following statement is made in accordance with the City of Portland Design Manual Zone B-5 Urban Commercial Business Zone.

Design Manual Design Standards:

a. Shared Infrastructure: The proposed lot 17 development is part of an integrated subdivision which shares utilities and stormwater infrastructure, public transportation, pedestrian and vehicular circulation, and loading/waste facilities with other lots with-in the development.
b. The proposed building is located as close to the street as possible. Due to the presence of significant public infrastructure along the frontage of the development lot the building cannot be any closer to the street. The building shape takes advantage of the lot, views, and visibility of the main entry from the road onto Thompson’s Point.
c. The proposed building has a main entrance easily visible from the street; however, the small frontage of the lot compared to its depth prevents the bulk of the building being oriented towards the street. The residential wing adjacent to the street includes windows and façade consistent with architecture of the rest of the building.
d. On-site parking is centrally located on the site and almost entirely provided in a structure hidden from the street view. Shared parking with residences and campus parking managed supply is an integral part of the proposal. A very small amount of short-term parking is located at the front entrance to support visitors and prospective tenants.

ATTACHMENT G
TECHNICAL AND FINANCIAL CAPACITY

OVERVIEW

The applicant has retained a highly-qualified team of professionals to undertake planning, permitting and design tasks on this project. Services will be provided by the following companies and their respective team leaders.

CONSULTANT TEAM

Discipline	Common Area Road (Phase I)
Civil Engineer	Bo E. Kennedy P.E. Placemaker Partners, LLC 18 Van Aken Way Portland, ME 04102 (207) 747-5288 – Work bo@placemakerpartners.com
Surveyor	Chris LaMotte, PLS Sebago Technics, Inc. 75 John Roberts Road So. Portland, ME 04106 (207) 200.2100 – Work clamotte@sebagotechnics.com
Architect	Robert Del Savio, RA Embarc Design 500 Harrison Ave Suite 2W, Boston, MA 02118 1(617) 765-8000 – Work rdelsavio@embarcdesign.com
Landscape Architect	Patrick Carroll Carroll Associates 217 Commercial Street, Suite 204 Portland, ME 04101 Pcarroll@carroll-assoc.com
Geotechnical Consultant	Craig Coolidge, PE SUMMIT GEOENGINEERING SERVICES 210 Maine Ave Farmingdale, Maine 04344 PO Box 515 Gardiner, Maine 04345 (207) 318-7761 ccoolidge@summitgeoeng.com
Environmental Engineer	Rip Patten Credere Associates, Inc. 776 Main Street Westbrook, ME 04092 (207) 828-1272 – Work Crederellc.com

EXPERIENCE OF PROJECT TEAM

All members of the project team have significant expertise and experience on the project site. Resumes for key personnel can be provided upon request.

FINANCIAL CAPACITY

The applicant has adequate financial resources to undertake this project at Thompson's Point. A reference letter on behalf of Cathartes speaking to their good financial standing and project backing is enclosed in this Attachment G.

CONSTRUCTION COST ESTIMATE

A breakdown of the preliminary project cost estimates includes the following:

- Construction Cost: $70 million (Building, Garage, and Site Work)
- Soft Costs: $1 million
- **Total Costs: $71 million**

M&T Bank

July 24th, 2024

Planning and Urban Development
City of Portland, Maine
389 Congress Street
Portland, ME 04101

Re: Thompson's Point Residential
Developer Qualifications and Financial Capacity

By way of introduction, I am Executive Vice President and Maine Regional President, and Senior Group Manager for the Maine, New Hampshire and Vermont Commercial Real Estate divisions for M&T, a strong Super Regional Bank with a significant presence in and commitment to the Greater Portland Region, including our offices in Westbrook and downtown Portland.

For more than ten years, I have done business with Cathartes and its principals James Goldenberg and Jeff Johnston and I am pleased to have the opportunity to provide information to you regarding the longstanding banking relationships that I, personally, and that M&T Bank, have enjoyed with this company and its principals.

During the course of our relationship with Cathartes, the Bank has provided approximately $200,000,000 in construction and permanent financing for seven properties, which have included a variety of property types, such as mixed-use multifamily, hotels, and condominiums, and the principals have always performed as agreed. Throughout these years, the principals have consistently exhibited a savvy knowledge of their markets, an impressive ability to attract and maintain high quality tenants, strong property repositioning and construction expertise, and always a high level of integrity.

Cathartes is highly regarded in the commercial real estate industry, and the firm has been recognized as the developer responsible for transforming Portsmouth's former underutilized Parade Office Mall in the city's Northern Tier into Portwalk Place, creating a destination that includes 149 apartment units, 379 hotel rooms and nearly 50,000 SF of ground floor retail and restaurant activity, which has served to reconnect the area to downtown Portsmouth and further spur additional investment in the neighborhood following its success, and more recently has spurred additional private investment into the downtown area of historic riverfront city Dover, NH by redeveloping a significantly sized underutilized parcel in the core of the downtown into 130 Class A residential units. M&T is proud to have financed multiple phases of the Portwalk project, including one of the hotels and the mixed-use multifamily component, as well as the aforementioned Dover project.

We have had preliminary discussions regarding the proposed Thompson's Point site with Cathartes, and M&T Bank would be very interested in reviewing the opportunity to finance the proposed 255-unit $100 million project for the team. This project will provide additional housing inventory within Portland's Thompson's Point district and provide further economic development for the City and its residents, and Cathartes is a highly qualified team well-suited to execute.

(M&T Bank is a $210+ billion bank, following its acquisition of People's United Bank, the largest regional bank headquartered in New England, providing substantial lending capacity.)

I'm happy to provide any additional information that would be helpful to you as you move through the review process for this proposed project.

Sincerely,

Philip C. Cohen
Executive Vice President | Maine Regional President

Construction Management Plan

Cathartes – Multi-Family Residential Building at 125 Thompson's Point Road

A. Construction Management Principles

The following narrative provides an overview of the construction management principles that the Cathartes and Placemaker Partners, LLC has identified to minimize impacts from the construction, such as noise, vibrations, ground movement, truck traffic, and other construction related factors to the surrounding building and communities.

B. Development Review of Construction Management Plan

Cathartes and Placemaker Partners, LLC submits this construction management plan that provides a comprehensive logistics and safety program for the construction project, which will be reviewed and approved as part of the site plan review process. Minimizing impacts to areas surrounding the building/construction site will be primary considerations in the process.

C. Performance Guarantees, Inspection Fees, Preconstruction Meeting, and Permits

Prior to scheduling a preconstruction meeting and the issuance of any city required permits, the general contractor (TBD) will meet all of the requirements contained in Section 14-530, Development Review Fees and post approval requirements and 14-532, General requirements and enforcement of Portland's Land Use Code.

Other permits, as applicable, include

1. **Street Opening and Street Occupancy Permits:** These permits will be filed at the time of construction.
2. **Blasting:** Blasting will not be required.
3. **Building Code:** Employ the best practices, as applicable, of Chapter 33 Safeguards During Construction, from the 2009 International Building Code.

D. Construction Administration and Communication

Cathartes or its assigned will work diligently to implement a communication strategy as outlined below. The communication strategy is intended to ensure that all construction operations are performed in accordance with all agreements, ordinances and special permits applicable to this project. The Construction Manager will work closely with adjacent abutters, businesses and all parties informed, as far in advance as possible, of scheduled work, particularly work anticipated to cause significant noise, vibrations, or dust. The final construction management plan shall provide for the following:

1. Contact Person for Cathartes or its assigned is the designated construction owner's representative. Owner's Representative is Rob Simmons (Ph. 617-840-4778) robs@cathartes.com.
2. Construction Signage will be posted on the site with Contact Information for Cathartes assigned construction manager.
3. The assigned construction manager site project manager will be in constant contact via email or phone with the Owner's Representative. The Owner's Rep will provide weekly and additional as need construction updates to neighboring business to inform them of any work that could possibly impact their day to day operations.
4. All construction site signage is temporary and will be removed at project completion.

E. Construction Schedule

1. The project is anticipated to break ground approximately Q4 2025 and be completed Q4 2027. This project will not be phased. See the preliminary construction schedule in Attachment 1.
2. Hours of Construction. Construction will occur during the daytime hours as defined in Section 17-18. Construction Activities for Building permit (Attachment 2) and Section 25-129, Noise, dust and debris (Attachment 3).
3. Extended Hours or Night Work: Pursuant to Section 17-18, this section not apply to emergency utility work or "Situations where the public works authority or the office of building inspections determines that the construction activity is of a unique character which cannot reasonably be completed or performed during the permitted hours and which is not of a recurring nature, provided that prior to engaging in such activity the contractor or his representatives gives notice of the time and scope of such proposed activity, the notice to be given in a manner approved by the public works authority."
4. Material Deliveries: Deliveries will take place between 7:00 a.m. and 5:00 p.m. Deliveries will be received in the designated laydown areas as shown on the Construction Management Plan.

F. Security & Public Safety

1. The Construction Management Plan (Attachment 4) depicts proposed construction fencing and access gates. Gates will have City of Portland Knox locking devices. Fencing separates the construction site from all other surrounding uses.
2. There are no existing structures being altered or demolished under this contract. Construction of the new structure will comply with NFPA 1 Chapter 16.
3. Fire Safety Program.
    - Good Housekeeping: All contractors and subcontractors are required per contract to clean up after their work on a daily basis.
    - On-site security: Chain link fence system (where required) with locked gates will be installed around the perimeter of the construction site.
    - Installation of new fire protection systems as construction progresses: Fire extinguishers will be located on each floor per OSHA standards and IBC 2009. A standpipe system per IBC Section 3311.1 will be provided concurrent with building construction.
    - Preservation of existing systems during demolition: There are no existing systems.
    - General Contractor will meet with local fire department prior to construction and develop a pre-fire plan.
    - The General Contractor will have a published contact list and chain of command for all rapid communication strategies that are in place.
    - Consideration of special hazards resulting from previous occupancies: There are no special hazards from previous occupancies. The site contractor will follow all Maine DEP VRAP work plan requirements for soil and groundwater handling. Trained personnel and appropriate PPE will be supplied while all sitework is being performed.
4. Blasting will not be required
5. Temporary on-site security lighting will be provided upon the request of the owner. All exterior security lighting will be pointed downward and be full cut off fixtures.

G. Construction Permitting and Traffic Control Plans

1. Construction Activity in Public Streets: There will be limited in-street utility work. All lane closures will always maintain access to Thompson's Point campus and be coordinated with the City Public Works with a documented and approved traffic control plan meeting the City's Technical Manual.
2. Sewer and Stormwater: Sewer connections are controlled by Chapters 24 of the City Code of Ordinance. There will be two new connections to the City of Portland Sanitary System currently connected to the Sewall Street Pump Station. Required permits for new connections to the existing private line have been obtained through the City Site Plan review process. Two of three Stormwater connections will discharge directly to the Fore River in a private outfall. One stormwater connection is proposed in Thompson's Point Road and discharged to the Fore River pursuant to city and state permits previously approved. The Stormwater system has been designed to meet Chapter 32 of the City Code of Ordinance.
3. Traffic Control Plans: Construction activity in the existing public street will have a traffic control plan meeting the City's MOT plan requirements. This will be submitted at the time of final Construction Management Plan approval.

H. Site Management and Controls

The final Construction Management Plan will address maintaining the site in a safe condition and will include the following:

1. Trash and debris removal management will be provided by separating recyclable and non-recyclable wastes into multiple construction dumpsters. Trash will be separated, disposed of in a proper waste facility.
2. Street cleaning and damage controls: This project will have erosion control construction entrances at the entrances to the project site. All sediment tracked off the project site and onto public streets will be swept daily and disposed of onsite in accordance with the approved erosion and sediment control plan. A truck washdown station may be required at the discretion of the owner or its assigned personnel.
3. Dust controls: The construction will comply with Portland's requirements under Section 25-129 on Noise, dust and debris (Attachment 3).
4. Noise: The construction will comply with Portland's requirements under Section 17-18 of the City Code (Attachment 2) and Section 25-129 on Noise, dust and debris Attachment 3).
5. Rodent Control will not be needed as this is new construction.
6. Snow Removal: Pursuant to Section 25-173 Contractors to ensure a safe means of travel within the work zone.
    1) Snow/ice removal or commence automatically from (1" of snow and up) or Ice
    2) Remove snow as needed within the work zone, including parking spaces & not to block any driveways or sight lines with the piles of snow.
    3) Clear all walks & ramps with the work zone
    4) Sand or Salt as needed
    5) Clear all basin or drainage to help snow melt
    6) This would include Monday-Friday Sat/Sunday/Holidays

I. Erosion Control and Preservation of Trees

1. Site Contractor will install all erosion and sedimentation controls as depicted on the approved erosion and sedimentation control plan prior to the pre-construction meeting for inspection by the City. Site Contractor will regularly inspect the control measures, no less than weekly and after significant storm events, and maintain any installed temporary or permanent stormwater management systems in working order. The Site Contractor will document all inspection activities and corrective actions and be prepared to provide these documents for inspection by the City, Maine Department of Environmental Protection or the U.S. Environmental Protection Agency upon request.
2. There is currently minimal small trees and landscaping within the limits of construction which will be removed. Trees of significance requiring protection will be protected as shown on the landscape architectural plans.
3. Storage areas are indicated on the Construction Management Plan (Attachment 4).

J. Construction Staging Area

1. The Construction Management Plan depicts location of the material staging areas, the location on onsite temporary construction trailers, the location on onsite truck delivery holding areas, the location onsite truck washing stations, masonry mixing stations, the general location of the construction security fence and the general location of temporary construction dumpsters. An open storage areas is shown on the plan.
2. Delivery Truck Holding Areas On-Site: The delivery holding area is shown on the plan and will not be blocked during construction. On days when the construction activities require multiple truck deliveries, these deliveries will be carefully scheduled so that there is always adequate on-site area for the holding of the trucks until they can be unloaded. Once at Thompson's Point all vehicles will be brought within the fence line. There will be no queueing on public streets or common area (privately owned) roadways without prior notice and coordination with the owner. Construction truck traffic will not alter normal traffic patterns or emergency vehicle access to or around the Thompson's Point Campus.
3. Delivery Truck Holding Areas Off-Site: An offsite holding area may be designated by the owner with prior approval from the owner. Offsite holding areas shall be minimized to short term parking only and will not prevent the normal operations of the site.

K. Parking During Construction

1. Construction Parking: Adequate parking for construction workers will be provided on site. The parking areas have been indicated on the Construction Management Plan.
2. Parking: There are no existing parking spaces available to the public within the construction limits that will remain operational during construction.
3. Truck Routes and Volumes: The Construction Management Plan indicates the designated truck routes. Truck volume is expected to be approximately 5-6 trucks per week.

L. Special Measures as Necessary

Construction will take approximately 22 months. Construction is not located near sensitive uses (e.g. medical care facilities, schools). Construction activity is not expected to impact the adjacent railroad operations or property; however, if a temporary condition arises the Contractor will take appropriate measures and communication to address impacts.

ATTACHMENT 1

Preliminary Construction Schedule (Subject to Change)

ATTACHMENT 2

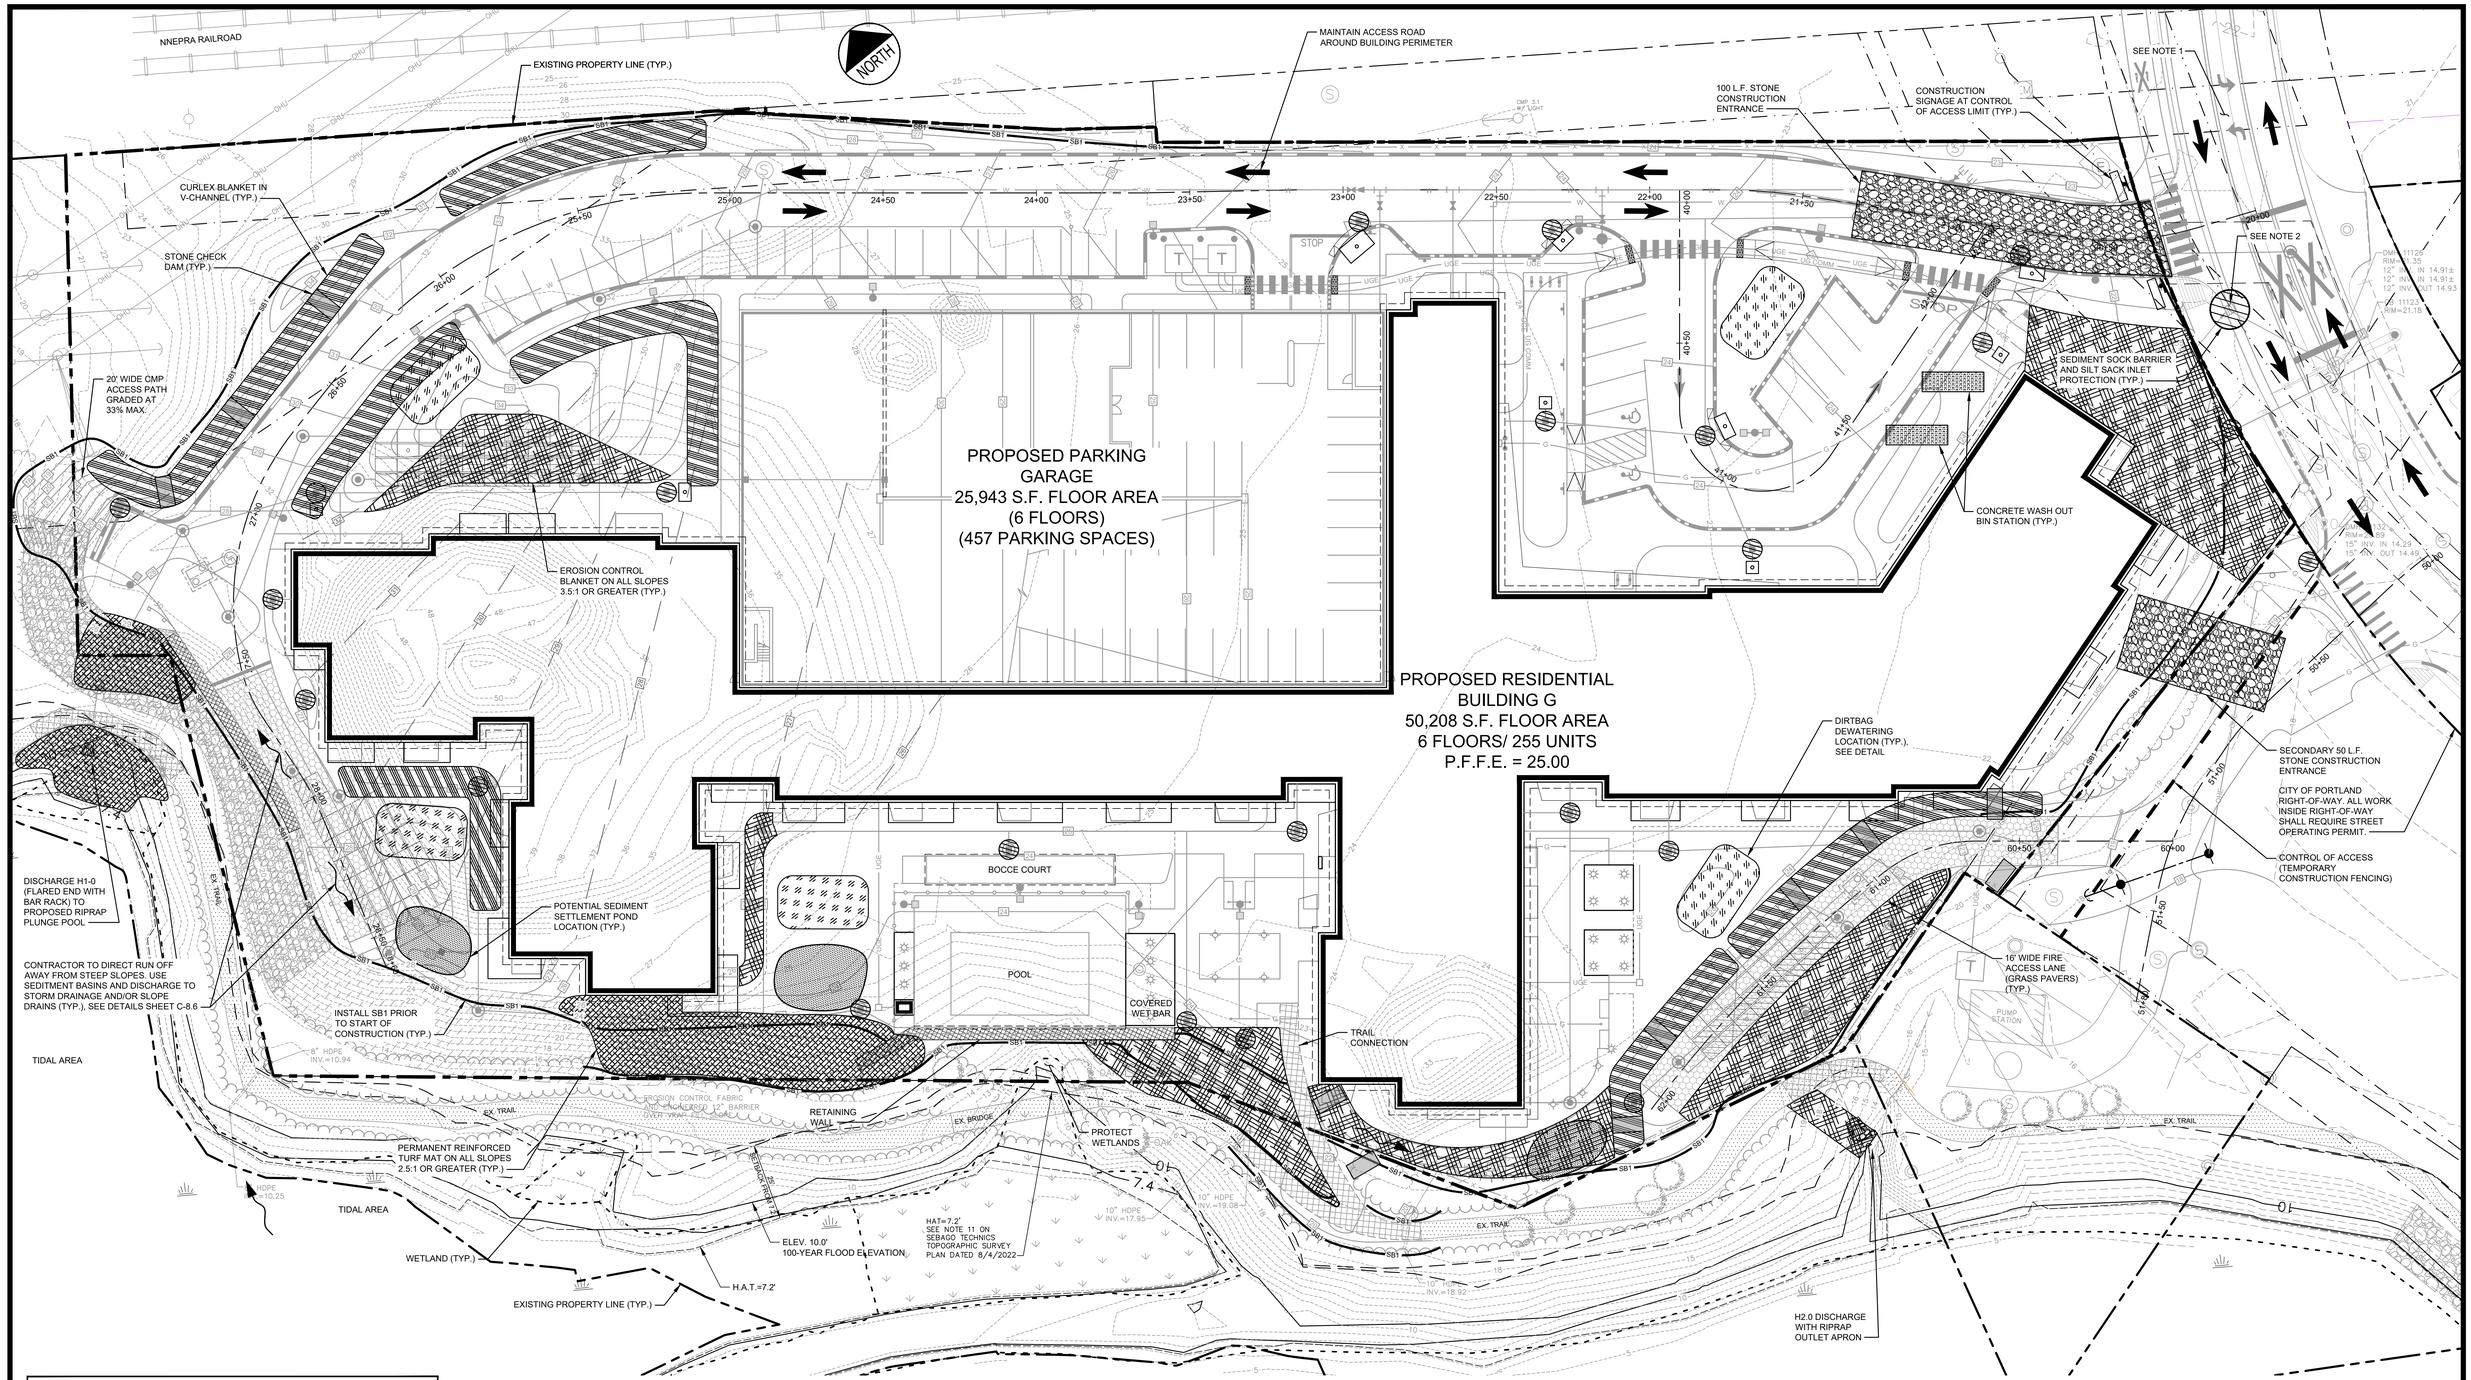
Sec. 17-18. Construction activities.

(a) Within the R-zones, from September 1st to May 31st, no person shall engage in construction activities generating noise exceeding fifty (50) decibels, between the hours of 7:00 p.m. and 7:00 a.m., of the following day within five hundred (500) feet of any building used for residential, hospital or nursing home purposes. From June 1st to August 31st construction activity may continue until 8:00 p.m. Any other language notwithstanding, no construction activity shall begin before 8:00 a.m. on a Saturday, Sunday or legal holiday.

(b) Construction activities shall include, but not be limited to, the following:

(1) The use or operation of power or heavy equipment in connection with road, street, or bridge construction, reconstruction or repair;
(2) The use or operation of power or heavy equipment in connection with the installation or repair of utility lines, pipes, wires or cables;
(3) The use or operation of power or heavy equipment in connection with the construction of buildings, including specifically excavation for foundations or landscaping work of any kind;
(4) The renovation, repair, remodeling or demolition of the exterior or foundation of any building or structure

(c) This section shall not apply in the following situations:



(1) Emergency repair work on any utility line, pipe, wire or cable required to restore normal utility service;

(2) Situations where the public works authority or the office of building inspections determines that the construction activity is of a unique character which cannot reasonably be completed or performed during the permitted hours and which is not of a recurring nature, provided that prior to engaging in such activity the contractor or his representatives gives notice of the time and scope of such proposed activity, the notice to be given in a manner approved by the public works authority.

ATTACHMENT 3

Sec. 25-129. Noise, dust and debris. Each permittee shall conduct and carry out excavation work in such manner as to avoid unnecessary inconvenience and annoyance to the general public and occupants of neighboring property. To the fullest extent practicable, the permittee shall take appropriate measures to reduce noise, dust and unsightly debris in the performance of the excavation work. Excavation work, including the use of any tool, appliance, or equipment, shall be performed between the hours of 7:00 a.m. and 10;00 p.m. only, exclusive of emergency work. Time waiver requests may be submitted to the public works authority for work outside of this time period and will be subject to neighborhood concerns. Excavation work shall not occur on Sundays, holidays or on major holiday weekends, unless expressly authorized by the public works authority or as a result of emergency need.

LEGEND

- INLET PROTECTION (STONE OR HAY SEDIMENT BARRIER)
- FILTERRA INLET PROTECTION (PER MANUFACTURERS REQUIREMENTS)
- RIPRAP OUTLET PROTECTION
- CURLEX BLANKET
- PERMANENT REINFORCED TURF MAT
- EROSION CONTROL BLANKET
- WASH DOWN AREA
- STONE CONSTRUCTION ENTRANCE
- DIRTBAG DEWATERING
- POTENTIAL SEDIMENT SETTLEMENT POND
- STONE CHECK DAM

Summary of Storm Water Discharges

Discharge ID	Approximate Drainage Area (Ac)	Full Build Out 25 Yr Peak Flow (CFS)	Outlet Pipe Size (In)	Description	*Minimum Required Riprap D50 (IN)
HB-0	1.86	8.89	24	RCP Flared End W/ Bar Rack, Riprap Slope Apron	12
HC-0	0.87	4.62	15	RCP Flared End W/ Bar Rack, Riprap Slope Apron	12

* D50 is a median rock size. Riprap should be a well graded mix of angular rock from about 1.5 to 0.25 times the size of the D50. The contractor shall protect existing riprap slope or replace rock to the meet the minimum required D50 stone size.

SCHEDULE OF SILT BARRIER REQUIREMENTS

SILT BARRIER	TYPE PURPOSE	TIME OF INSTALLATION
SB1 TYPE 1 SILT BARRIER	TO TRAP SEDIMENT ALONG THE GRADING EDGE WHERE THE NEW CONTOURS NEARLY PARALLEL THE EXISTING CONTOURS	AT INITIAL SITE PREPARATION; PRIOR TO OTHER WORK

NOTES:

1. EXISTING PAVEMENT TO REMAIN AS TRACKING PAD. SWEEP CLEAN DAILY OR MORE FREQUENTLY AS REQUIRED TO PREVENT TRACKING SEDIMENT ALONG THOMPSON'S POINT ROAD. SHOULD SEDIMENT BE TRACKED OFFSITE, CONTRACTOR IS RESPONSIBLE FOR SWEEPING/CLEARING PAVEMENT AS NECESSARY TO PROTECT EXISTING STORMWATER COLLECTION INLETS. CONTRACTOR MAY BE REQUIRED TO INSTALL WASHING STATION OR OTHER TRACKING PREVENTATIVE MEASURE AT NO ADDITIONAL COST TO OWNER.
2. DISCHARGE OF EXCAVATION DEWATERING MAY BE DIRECTED TO EXISTING DRAINAGE STRUCTURES IF ALL TREATMENT REQUIREMENTS ARE MET. REFER TO ENVIRONMENTAL ASSESSMENT REPORT BY CREDERE ASSOCIATES, LLC AND PROJECT SPECIFICATIONS FOR ALL DEWATERING REQUIREMENTS.
3. ALL RUNOFF FROM DISTURBED AREAS SHALL BE DIRECTED TO A FILTERING DEVICE DESIGNATED TO LIMIT TURBIDITY IN ALL DISCHARGE TO THE FORE RIVER. THE FILTERING DEVICE MAY BE BUT IS NOT LIMITED TO SAND FILTERS, EROSION CONTROL MIX, STRAW WHATTLES, FLOCCULATION CHEMICALS, DIRT GLUE AND SILT FENCE.
4. ALL CATCH BASINS TO HAVE 4" UNDERDRAIN PER DETAIL 'L' ON SHEET C-8.5.
5. ALL SUBSURFACE DETENTION AREAS ARE NOT TO BE PLACED "ON-LINE" UNTIL TRIBUTARY AREA IS STABILIZED WITH PAVEMENT OR 75% VEGETATION COVERAGE
6. STOCKPILES TO BE TEMPORARILY SEEDED AND MULCHED AS REQUIRED BY THE PROJECT SPECIFICATIONS.
7. THE CONTRACTOR SHALL TREAT DISTURBED AREAS AND CONSTRUCTION HAUL PATH WITH DUST CONTROL BMPS TO LIMIT ALL FUGITIVE DUST.
8. ALL EXCESS COMMON BORROW SHALL BE PLACE IN DESIGNATED STOCKPILE ON PANHANDLE DETAILS INCLUDED IN SEPARATE PLAN SET BY REFERENCE.

Trip Generation and Parking Demand Summary
Thompson's Point
September 2024 – (Revised 12-10-24)

Date: September 4, 2024 (Revised 12-10-24)
Subject: Updated Trip Generation and Parking Demand
Thompson's Point
To: Bo Kennedy, Placemaker Partners, LLC
From: Randy Dunton / Kyle Brennan, Gorrill Palmer (JN 4346)

Gorrill Palmer (GP) has prepared this updated trip generation and parking demand summary for the Thompson's Point development in Portland, Maine. The full build out of the project received a MaineDOT Traffic Movement Permit (TMP) in 2012 (Reg. 01-00155-A-N) for 734 trip ends during the AM peak hour and 1,091 trip ends during the PM peak hour. The Traffic Movement Permit received an extension in 2024 out to March 1, 2027. The documentation for the extension is attached. The project is being constructed in phases and each phase must be evaluated to ensure that the total site trip generation does not exceed the permitted trip generation. The following is a summary of the forecast trip generation and parking demand for the existing and previously approved uses, and the proposed residential development on site. A site plan is attached showing the location of each building.

Existing and Previously Evaluated Trip Generation Summary

The trip generation for the existing Thompson's Point site is based on discussions with Bo Kennedy, project manager/engineer for the site. The trip generation was calculated using the same methodology as that used in previous trip generation evaluations for the site, including using the Institute of Transportation Engineers' publication, *Trip Generation*, 7th Edition, except where otherwise noted, and applying a 10% reduction to the total site trip generation to account for other modes of transportation and shared uses on the site. The following table summarizes the trip generation for the existing site:

Existing and Approved Site Trip Generation

Building	Description	Size	AM Peak Hour	PM Peak Hour
Building A Brick North				
	Halo (Event Space) – Previously approved	400 attendees	16	31
	Office Space – 7 Emp.	7 Employees	7	7
	Brewery & Sit-Down Restaurant – LUC 932 + 7 Emp.	14,644 sf (4,624 sf Rest. & 10,020 sf Brewery)	7	49 (42+7)
	Brewery Tap Room – LUC 932 + 5 Emp.	5,284 sf	16 (11+5)	16 (11+5)
	Color Me Mine – Previously Approved	2,136 sf	2	6
	International Cryptozoology Museum – Previously approved (doubled in size)	1919 sf	2	2
	Leisure Time Cocktails – LUC 975	1725 sf	N/A	20

	Coffee Roasting – Assumed (Employee only)	675 sf	1	1
	Brick North Total		**51**	**132**
Building C Brick South				
	Event/Assembly Space – Previously approved	2,500 Seats	100	195
	Annex	7,384 sf	--*	--*
	Brick South Total		**100**	**195**
Building F1				
	Warehouse – Previously approved	14,200 sf	11	9
	Building F1 Total		**11**	**9**
Building F2				
	Artist Studio Space – Previously approved	1,940 sf	3	4
	Building F2 Total		**3**	**4**
Building L				
	Office Space – Previously forecasted potential future development	4,000 sf	7	9
	Event Space – Previously forecasted potential future development	100 Attendees	4	8
	Existing Storage – Previously forecasted potential future development	1,760 sf	0**	0**
	Existing Office Space (Credit)	4,000 sf	(-7)	(-9)
	Building L Total		**4**	**8**
Building B2				
	Concession Building – Previously approved	960 sf	4	4
	Building B2		**4**	**4**
Building D				
	Proposed Hotel (2024 Construction Start) – Previously proposed development	148 Rooms	68	87
	Hotel Total		**68**	**87**
Building I Children's Museum and Theatre of Maine (CMTM)				
	CMTM– Previously approved	29,096 sf	33	33
	Children's Museum Total		**33**	**33**
Existing Subtotal			**274**	**472**

*Maximum of 2,500 people in the building for events. Highest trip generation would be an event in the Event space, not the Annex.
**Trip generation assumed to be negligible.

Since initially approved, there have been some minor changes to the uses. The "Rosemont Market" (2,724 sf) and Brewery & Sit-Down Restaurant (11,920 sf) have been combined and identified as "Brewery & Sit-Down Restaurant" (14,644 sf). For the purposes of this evaluation, the previously individual square footages have been combined. Trip generation for the "Brewery & Sit-Down Restaurant" was based on previously accepted "Bissell Brewery & Restaurant" methodology, where the restaurant trip generation is based on LUC 932 – High Turnover (Sit Down) Restaurant (4,624 SF) and trip generation for the brewery portion

(10,020 SF) is based on the 7 employees.

The previously approved coffee shop "Rwanda Bean" (2,400 sf) has been split with "Leisure Time Cocktails". "Rwanda Bean" (675 sf) is still occupying part of the space for coffee roasting, but the remaining space is now occupied by "Leisure Time Cocktails" (1725 sf).

The previously approved "Big Room Studios" (3,461 sf) has been replaced with an "Office Space". The square footage of the area is the same, but because the office space only has 7 employees, trip generation was based on employee trips.

The previously approved "Distillery" (5,284 sf) has been replaced with a "Brewery Tap Room" (5,284 sf). For the purposes of this evaluation due to similar use the previously approved individual square footage and trip generation will be used for the "Brewery Tap Room". Trip generation for the "Brewery Tap Room" is based on 1,200 SF of restaurant space (LUC 932) and 4,084 SF of brewery space (5 employees).

The previously approved "International Cryptozoology Museum" (993 sf) has doubled in size. Due to the "International Cryptozoology Museum" (1919 sf) doubling in size the trip generation will double from the previous report.

The site has moved onto its next phase of development, which includes Building's L, B2, and D. Building's L and B2 were identified as proposed development in the previous report. Building D was identified as potential future development in the previous report. Building's L, B2, and D will contribute 76 & 99 trip ends in the AM & PM peak hours respectively.

As shown in the table, the existing site is forecast to generate 274 trip ends during the AM peak hour and 472 trip ends during the PM peak hour.

Proposed Site Trip Generation

Our understanding is that the site is now moving into its next phase of development, which will include a 255-unit six story apartment building (identified as Building G on the enclosed site plan).

Trip generation for the proposed use has been based on the following:

- 255 Units of Residential Development – New Construction

The trip generation for the proposed use was calculated using the updated Institute of Transportation Engineers' publication, *Trip Generation*, 11th Edition (LUC 221 – Mid-Rise Apartment). It should be noted that LUC 221 provides two different trip generations, "not close to rail transit" and "close to rail transit". It is our understanding that ITE refers "close to rail transit" as more local transit, such as subways. The Amtrak located near Thompson's point, in our opinion, does not meet the intent for "close to rail transit". The following table summarizes the trip generation for the proposed uses:

Forecast Trip Generation

Building	Description	Size	AM Peak Hour	PM Peak Hour
Building G Residential				
	Apartments – LUC 221	255 Units	101	100
Forecast Trip Generation			**101**	**100**

As shown in the table, the proposed residential use is forecast to generate an additional 101 trip ends and 100 trip ends during the AM and PM peak hours of the adjacent street, respectively.

Site Trip Generation

The trip generation for the existing site has been combined with the trip generation for the proposed new and remodeled buildings to yield the total site trip generation.

Total Site Trip Generation Summary

Site	Building	AM Peak Hour	PM Peak Hour
Existing			
	Building A – Mixed Used (Brick North)	51	137
	Building C – Events (Brick South)	100	195
	Building F1 – Warehouse	11	9
	Building F2 – Artist Studio	3	4
	Building L – Office	4	8
	Building B2 – Concessions	4	4
	Building D – Hotel	68	87
	Building I – Children's Museum and Theatre of Maine	33	33
	Existing Total	**274**	**472**
Proposed			
	Market Rate Apartments	101	100
	Forecast Total	**101**	**100**
Site Subtotal		**375**	**572**
Reduction (10%) for Bus / Train / Shared Use		(-37)	(-57)
Proposed Site Trip Generation		**338**	**515**
Permitted Trip Ends		734	1091
Difference Between Permitted and Proposed Site		**396**	**576**

As shown in the table, the site inclusive of the proposed residential development is forecast to generate 338 trip ends during the AM peak hour and 515 trip ends during the PM peak hour. This yields an overall trip generation that is 396 trip ends **less** than the permitted trip generation during the AM peak hour and 576 trip ends **less** than the permitted trip generation during the PM peak hour.

Parking Demand

Proposed Apartments: Parking for the new apartments is based on the ITE Parking Generation Manual, 5th Edition. The parking demand rate (1.31 spaces/unit) is based on Land Use Code (LUC) 221 – Multifamily

Housing (Mid-Rise). Because of the nature of the housing use, the peak parking demand (334 spaces) occurs overnight with the lowest parking demand (164 spaces) occurring during the day (1:00 – 2:00 PM). This complements the other uses on site well, since they will have the highest demand around noon time, with little to no demand (approximately 26-70 spaces) overnight.

Overall Site: The overall site parking demand is based on a combination of shared and designated parking methodologies. The shared methodology (majority of the site) assumes there are parking spaces not designated for specific uses and can be shared between the uses. There are some spaces on site such as the panhandle/residential garage that are proposed to use designated parking and be specifically residential or non-public Thompson's Point managed supply spaces. The attached parking demand calculations show the detailed time of day distribution for each use and the forecast demand. Based on the calculations the peak parking demand is between 6:00 PM and 10:00 PM for the overall site. The peak parking demand (without an event in Brick South or Halo) is 475 spaces and is anticipated to occur at 10:00 PM, of which 405 is the parking demand for the hotel and apartments which have designated spaces. Excluding the hotel and apartments, the peak parking demand is 165 spaces and occurs around noon. As identified in the approval for the master development plan, when special events of a certain attendance threshold occur, additional parking measures will be implemented on an as needed basis.

Conclusions

The following is a summary of the conclusions:

1. The site (including existing and proposed uses) is forecast to generate a total of 338 trip ends during the AM peak hour and 515 trip ends. This trip generation is 396 trip ends less than the permitted trip generation during the AM peak hour and 576 trip ends less than the permitted trip generation during the PM peak hour.

2. The peak parking demand for the proposed apartments (334 spaces) occurs overnight after 10:00 PM, when there is little to no demand from the other on-site uses, with the exception of the hotel demand (110 spaces). Excluding the hotel and apartments, the overall site parking demand peaks around noon, when the hotel and apartments are near their lowest parking demand.

TMP Extension – Dated 3/1/24 & 3/12/24

Planning and Urban Development
Christine Grimando, AICP
Director

City of portland

Applicant:	Chris Thompson Forefront Partners I, LP 501 Danforth Street Portland, Maine 04102
Project Location:	1 Thompson's Point Rd. Portland, Maine 04102
Parcel #	201 A005001
Project:	Thompson's Point/Mixed-use Development
Identification #:	Reg. 01-00155-A-N
Permit Category:	200 Plus PCE
Traffic Engineer:	Thomas Gorrill/Randy Dunton Gorrill-Palmer Consulting Engineers 300 Southborough Dr., #200 South Portland, ME 04106

Pursuant to the provision of 23 M.R.S.A. § 704-A and Chapter 305 of the Maine Department of Transportation's (MaineDOT) Regulations, the City of Portland and MaineDOT have determined that a one-time extension of the Traffic Movement Permit issued for Thompson's Point is warranted. The permit will be considered expired if construction of the project has not been completed by March 1, 2027, unless a modification is approved prior to this date.

In the event the permit expires prior to construction being completed by the end of the one-time extension date, the Applicant shall submit a new permit, with information pertaining to Sections 1 thru 6 of the General Submission Requirements and a Notice of Intent to File, as outlined in Chapter 305, and address any changes in facts since the initial analysis and approval. Consistent with Section 8 of Chapter 305, in the event the Applicant completes all mitigation required for the Development, but cannot complete the Project within the one-time extension date, the Developer will be required to submit a TMP Modification that includes any programmatic changes to the Development for review and approval. An applicant may be required to provide additional mitigation of permitted trips as a result of changes to the Development program increase beyond the initial approval. Additionally, the Developer may be required to attend a Scoping Meeting, unless the Maine Department of Transportation waives this requirement.

389 Congress Street, Portland, Maine 04101 | ph: 207.874.8608 | cdg@portlandmaine.gov

All required terms and mitigation of the original TMP approval remain in effect.

Trip Generation Evaluation & Summary
Thompson's Point
June 13, 2022

Date: June 13, 2022
Subject: Updated Trip Generation
Thompson's Point
To: Bo Kennedy, P.E. - Placemaker Partners, LLC
From: Randy Dunton, P.E., PTOE

Gorrill Palmer (GP) has prepared this updated trip generation summary for the Thompson's Point development in Portland, Maine. The full build out of the project received a MaineDOT Traffic Movement Permit (TMP) in 2012 (Reg. 01-00155-A-N) for 734 trip ends during the AM peak hour and 1,091 trip ends during the PM peak hour. The project is being constructed in phases and each phase must be evaluated to ensure that the total site trip generation does not exceed the permitted trip generation. The following is a summary of the forecast trip generation for the existing and previously approved uses, currently proposed and potential future development and the total site trip generation. A Thompsons Point Campus Directory is attached showing the location of each building for the existing conditions. Exact location of proposed and potential future buildings is still being refined.

Existing Trip Generation Summary

The trip generation for the existing Thompson's Point site has been based on discussions with your office and previously approved uses. Where relevant, trip generation that was previously approved was maintained in this evaluation. Trip generation for change in tenants permitted under current approvals is based on ITE Trip Generation, 11th Edition or through observations at the site. As previously approved for this site, a 10% reduction has been applied to the total site trip generation to account for other modes of transportation and shared uses on the site. The following tables summarize the trip generation for the existing site:

Table 1 – Existing Site – Trip Generation

Building	Description	Size	AM Peak Hour	PM Peak Hour
Brick North				
	Rosemont Market – Based on observations	2,724 sf	0	29
	Rwanda Bean – Based on observations	2,400 sf	18	21
	Halo (Event Space) – 3.5 people / car – Night Event	400 attendees	16	31
	Big Room Studios – LUC 712	3,461 sf	6	7
	Bissell Brewery & Restaurant – LUC 932 + 7 Emp.	11,920 sf	25 (18+7)	24 (17+7)
	Distillery – LUC 932 + 5 Emp.	5,284 sf	16 (11+5)	16 (11+5)
	Color Me Mine – previously approved	2,136 sf	2	6
	International Cryptozoology Museum - assumed	993 sf	1	1
	Brick North Total		**84**	**135**

Brick South				
	Event/Assembly Space – 3.5 people / car – Night Event	2,500 Seats	100	195
	Annex	7,384 sf	--*	--*
	Brick South Total		**100**	**195**
Building F1				
	Warehouse – LUC 110	14,200 sf	11	9
	Building F1 Total		**11**	**9**
Building F2				
	Proposed Artist Studio – LUC 712	1,940 sf	3	4
	Building F2 Total		**3**	**4**
Satellite Building				
	Children's Museum – provided by Museum – previously approved	29,096 sf	33	33
	Satellite Building Total		**33**	**33**
	Existing Site Subtotal		**228**	**376**
	Reduction for Existing Site Shared Trips		**(-23)**	**(-38)**
Total			**205**	**338**

*Maximum of 2,500 people in the building for events. Highest trip generation would be an event in the Event space, not the Annex.

Since initially approved, there has been some minor changes to the uses. The "Locally Sauced (formerly Big J's Chicken) and the Bissell "Brewery" have been combined and identified above as "Bissell Brewery & Restaurant". For the purposes of this evaluation, the previously approved individual square footages and trip generations have been combined.

The previously approved Cellardoor "Winery" (5,890 sf) has been replaced with a Rosemont Market with wine bar (2,724 SF) and a Rwanda Bean (2,400 SF). The difference between the square footages is a bathroom area that is shared between the two uses. The Rosemont Market and Rwanda Bean are described in more detail as follows:

Rosemont Market – this is a boutique type store with approximately 12 seats in the café area and 15 seats at the wine bar. The store hours during a weekday are 10AM – 8PM for the store & café area and 2PM-8PM for the wine bar. Since the use is unique, it does not fit into a typical ITE category for the purpose of determining trip generation. Since the use is not open during the AM peak hour of adjacent street traffic, the trip generation for the AM peak hour was assumed to be none. To estimate the PM peak hour of adjacent street traffic, the use was counted on Thursday, April 21, 2022 from 4PM – 6PM. Both of the accesses to the facility were observed, and it was estimated who may have arrived in their own car. Based on our observations, the peak hour occurred from 4PM – 5PM with an estimated total of 11 vehicles entering and 18 vehicles exiting, for a total of 29 vehicles.

Rwanda Bean – similar to the market, this is a boutique type store with approximately 25 seats, with areas for both cooking goods and a relatively large area for the roasting and packaging of the coffee. The store hours during a weekday are 8AM – 4PM. Since the use is unique, it does not fit into a typical ITE category. The use was counted on Thursday, April 21, 2022 from 7AM – 9AM and again from 3:30PM – 4:30 PM. Similar to the market, all of the accesses to the facility were observed, and it was estimated who may have arrived in their own car. Based on our observations, the AM peak hour occurred from 8AM – 9AM. There was only one hour counted for the PM since they close at 4PM. Based on our observations, the AM experienced a total of 18 vehicles (11 entering and 7 exiting) and the PM experienced a total of 21 vehicles (11 entering and 10 exiting). Even though the PM adjacent street peak hour typically occurs between 4PM – 6PM, to be conservative we used the 3:30PM – 4;30PM counts.

As shown in the table, the existing site subtotal is forecast to generate 228 trip ends during the AM peak hour and 376 trip ends during the PM peak hour. Based on observations at the site, there are significant shared trips between the activities on site (such as Children's Museum) and the food establishments such as Rwanda Bean & Rosemont Market. Additional significant shared trips would also be expected between activities on site and Bissell Brewery & Restaurant and potentially the Distillery. Although a 10% reduction is applied to the site as a whole, that 10% also includes those taking other modes of transportation, so only a portion of that reduction is shared trips. Given the significant shared use that has been observed on site, an additional 10% was subtracted from the existing site traffic to reflect the existing shared use. Therefore, the resulting trip generation for the existing site is forecast to be 205 trip ends during the AM peak hour and 338 trips ends during the PM peak hour.

Proposed Site Trip Generation

Our understanding is that the site is now moving into its next phase of development, which will include an approximately 148 room hotel and a concession building (Building B2). A smaller Hotel (125 room) was included in the original TMP with a trip generation of 70 and 74 trips ends during the AM & PM peak hours of adjacent street traffic respectively. We understand that the final number of rooms is still being refined and may be something less than the 148.

The currently proposed concession building is intended to supplement existing uses on site and not generate significant trips from off-site. For the purposes of this evaluation, we have considered trip generation to be 4 employees during both the AM and PM peak hours.

The following Table 2 summarizes the forecast trip generation for the hotel and concession building.

Table 2 - Currently Proposed Development - Trip Generation

Building	Description	Size	AM Peak Hour	PM Peak Hour
Hotel				
	Hotel – LUC 310	148 Rooms	68	87
	Hotel Total		**68**	**87**
Building B2				
	Concession Building	960 sf	4	4
	Building B2 Total		**4**	**4**
Currently Proposed Development Trip Generation			**72**	**91**

As shown in the Table 2, the proposed uses are forecast to generate an additional 72 trip ends and 91 trip ends during the AM and PM peak hours of the adjacent street, respectively.

Potential Future Development Trip Generation

In addition to the existing and currently proposed development, there is potential future development that could occur on-site and bring the site to its full potential as envisioned in the Master Development Plan. Those potential future uses were also described in the previous May 14, 2020 evaluation and are repeated here:

"Building K – New Construction
- *Proposed Inn: 61 rooms + potential 22 room expansion*
- *The Inn is proposed to include a bar that is intended to serve primarily hotel guests and potentially guests of other Thompson's Point uses. However, it is not anticipated to draw significant outside traffic, so the trip generation for the bar is forecast to be negligible."*

"Building L – Renovation
- *Existing Office: 4,000 sf*
- *Existing Storage: 1,760 sf*
- *Proposed Office: 5,760 sf"*

The 344 apartments that are currently identified as potential future development were originally approved in the "Revised Master Plan" as J1-(160 units), J2-(160 units) and 24 units on the top of the hotel. The trip generation for the apartments is based on the ITE Trip Generation 11th Edition for Land Use Code 221 – Multifamily Housing (Mid-Rise) – between 4 & 10 stories.

The following table summarizes the trip generation for the potential future development uses:

Table 3 - Potential Future Development - Trip Generation

Building	Description	Size	AM Peak Hour	PM Peak Hour
Building K				
	Inn – LUC 310	61 Rooms	28	36
	Inn Expansion – LUC 310	22 Rooms	10	13
	Building K Total		**38**	**49**
Building L				
	Proposed Office – LUC 712	4,000 sf	7	9
	Proposed Event Space	100 attendees	4	8
	Existing Office (Credit)	4,000 sf	(-7)	(-9)
	Existing Storage	1,760 sf	0*	0*
	Building L Total		**4**	**8**
Apartments				
	Market Rate Apartments – LUC 221	344 Units	127	134
	Apartments		**127**	**134**
Potential Future Development Trip Generation			**169**	**191**

*Trip generation assumed to be negligible.

Site Trip Generation

The trip generation for the existing site has been combined with the trip generation for the currently proposed development and the potential future development to yield the site trip generation upon full development of the uses identified herein. The total site trip generation has been compared to the permitted trip generation to identify remaining available permitted trips for other approved uses within the master plan.

Table 4 - Total Site Trip Generation Summary

Condition	AM Peak Hour	PM Peak Hour
Existing Site	205	338
Currently Proposed Development	72	91
Potential Future Development	169	191
Site Subtotal	446	620
Reduction (10%) for Bus / Train / Shared Use	(-45)	(-62)
Revised Site Trip Generation	**401**	**558**
Permitted Trip Ends (2012 TMP – Reg. 01-00155-A-N)	734	1091
Difference Between Permitted and Proposed Site	**333**	**533**

As shown in Table 4, the total site uses after consideration of other modes of transportation are forecast to generate 401 trip ends during the AM peak hour and 558 trip ends during the PM peak hour. This yields an overall site trip generation that is 333 trip ends less than the permitted trip generation during the AM peak hour and 533 trip ends less than the permitted trip generation during the PM peak hour.

Trip Generation and Parking Demand Summary – April 2020

GORRILL PALMER

707 Sable Oaks Drive, Suite 30
South Portland, Maine 04106
207.772.2515

Trip Generation and Parking Demand Summary
Thompson's Point
April 2020

Date: May 14, 2020
Subject: Updated Trip Generation and Parking Demand
Thompson's Point
To: Bo Kennedy, Placemaker Partners, LLC
From: Randy Dunton / Emily Leighton, Gorrill Palmer (JN 3646)

Gorrill Palmer (GP) has prepared this updated trip generation and parking demand summary for the Thompson's Point development in Portland, Maine. The full build out of the project received a MaineDOT Traffic Movement Permit (TMP) in 2012 (Reg. 01-00155-A-N) for 734 trip ends during the AM peak hour and 1,091 trip ends during the PM peak hour. The project is being constructed in phases and each phase must be evaluated to ensure that the total site trip generation does not exceed the permitted trip generation. The following is a summary of the forecast trip generation and parking demand for the existing and previously approved uses, the proposed Buildings K and F1, the renovation of Buildings L and F2, and the proposed Building B2 that replaces existing mobile stations. A site plan is attached showing the location of each building. Additionally, the following includes a comparison of the total trip generation to the permitted trip generation.

Existing and Previously Evaluated Trip Generation Summary

The trip generation for the existing Thompson's Point site has been based on information provided by Bo Kennedy in an email dated August 22, 2017. The trip generation was calculated using the same methodology as that used in previous trip generation evaluations for the site, including using the Institute of Transportation Engineers' publication, *Trip Generation*, 7th Edition and applying a 10% reduction to the total site trip generation to account for other modes of transportation and shared uses on the site. The following table summarizes the trip generation for the existing site:

Existing Site Trip Generation

Building	Description	Size	AM Peak Hour	PM Peak Hour
Brick North				
	Winery	5,890 sf	4	16
	Halo (Event Space)	400 attendees	16	31
	Big Room Studios	3,461 sf	13	20
	Locally Sauced (formerly Big J's Chicken)	1,852 sf	21	20
	Brewery	10,068 sf	7	7
	Distillery	5,284 sf	4	4
	Color Me Mine	2,136 sf	2	6
	International Cryptozoology Museum	993 sf	1	1
	Brick North Total		**68**	**105**

Brick South				
	Event/Assembly Space	2,500 Seats	100	195
	Annex	7,384 sf	--*	--*
	Brick South Total		**100**	**195**
Hotel				
	Hotel	148 Rooms	83	87
	Proposed Total		**83**	**87**
Under Construction				
	Children's Museum	29,096 sf	33	33
	Under Construction Total		**33**	**33**
Approved Subtotal			**284**	**420**

*Maximum of 2,500 people in the building for events. Highest trip generation would be an event in the Event space, not the Annex.

As shown in the table, the existing site is forecast to generate 284 trip ends during the AM peak hour and 420 trip ends during the PM peak hour.

Proposed Site Trip Generation

The trip generation for the proposed uses has been based on the following:

- Building K – New Construction
  - Proposed Inn: 61 rooms + potential 22 room expansion
- Building F1 – New Construction
  - Proposed Warehouse: 14,200 sf
- Building L – Renovation
  - Existing Office: 4,000 sf
  - Existing Storage: 1,760 sf
  - Proposed Office: 4,000 sf
  - Proposed Event Space: 1,760 sf / 100 attendees maximum
- Building F2 – Renovation
  - Existing Garage Workspace: 1,940 sf
  - Proposed Artist Studio Space: 1,940 sf
- Building B2 – Replacement of Temporary Structures
  - Existing: Seasonal concession stands
  - Proposed Concession Building: 2,800 sf

The trip generation has also been based on the following assumptions:

- Building K:
  - The Inn is proposed to include a bar that is intended to serve primarily guests of the inn and potentially guests of other Thompson's Point uses. However, it is not anticipated to draw significant outside traffic, so the trip generation for the bar is forecast to be negligible.
- Building F2:
  - The proposed artist studio space in Building F2 is anticipated to operate most similarly to a shared office space, although this is likely a conservative assumption, since all users are not expected to enter and exit the site during the AM and PM peak hours and are more likely to be distributed throughout the day. It may be used as meeting or assembly space for less than 100 people, however the trip generation as an event space would be less than the trip generation forecast as an office.

- Building B2:
    - This building replaces existing temporary facilities and is intended to supplement existing uses on site. The proposed building will be open daily independently of the licensed seasonal uses. The building as proposed is consistent, albeit slightly smaller, than the building included in the approved Master Development Plan. For the purposes of trip generation and parking demand, it has been assumed that this use will often serve as a supplemental use to the existing activity on site, that will generate its own site traffic and parking demand.

The trip generation for the proposed uses was calculated using the same methodology as that used to calculate the trip generation in the original master plan. It should be noted that MaineDOT allows trip generation credit to be taken for existing uses on the site that have been operational within the last 10 years, so the trip generation for the existing building uses has been subtracted from the trip generation for the proposed building uses. The following table summarizes the trip generation for the proposed uses:

Proposed Site Addition Trip Generation

Building	Description	Size	AM Peak Hour	PM Peak Hour
Building K				
	Inn	61 Rooms	34	36
	Inn Expansion	22 Rooms	12	13
	Building K Total		**46**	**49**
Building F1				
	Warehouse	14,200 sf	6	7
	Building F1 Total		**6**	**7**
Building F2				
	Proposed Artist Studio	1,940 sf	8	8
	Existing Garage Space (Credit)	1,940 sf	(-6)	(-7)
	Building F2 Total		**2**	**1**
Building L				
	Proposed Office	4,000 sf	14	13
	Proposed Event Space	100 attendees	4	8
	Existing Office (Credit)	4,000 sf	(-14)	(-13)
	Existing Storage	1,760 sf	0*	0*
	Building L Total		**0**	**0**
Building B2				
	Concession Building	2,800 sf	32	31
	Building B2 Total		**32**	**31**
Proposed Addition Trip Generation			**90**	**96**

*Trip generation assumed to be negligible.

As shown in the table, the proposed uses are forecast to generate an additional 90 trip ends and 96 trip ends during the AM and PM peak hours of the adjacent street, respectively.

Site Trip Generation

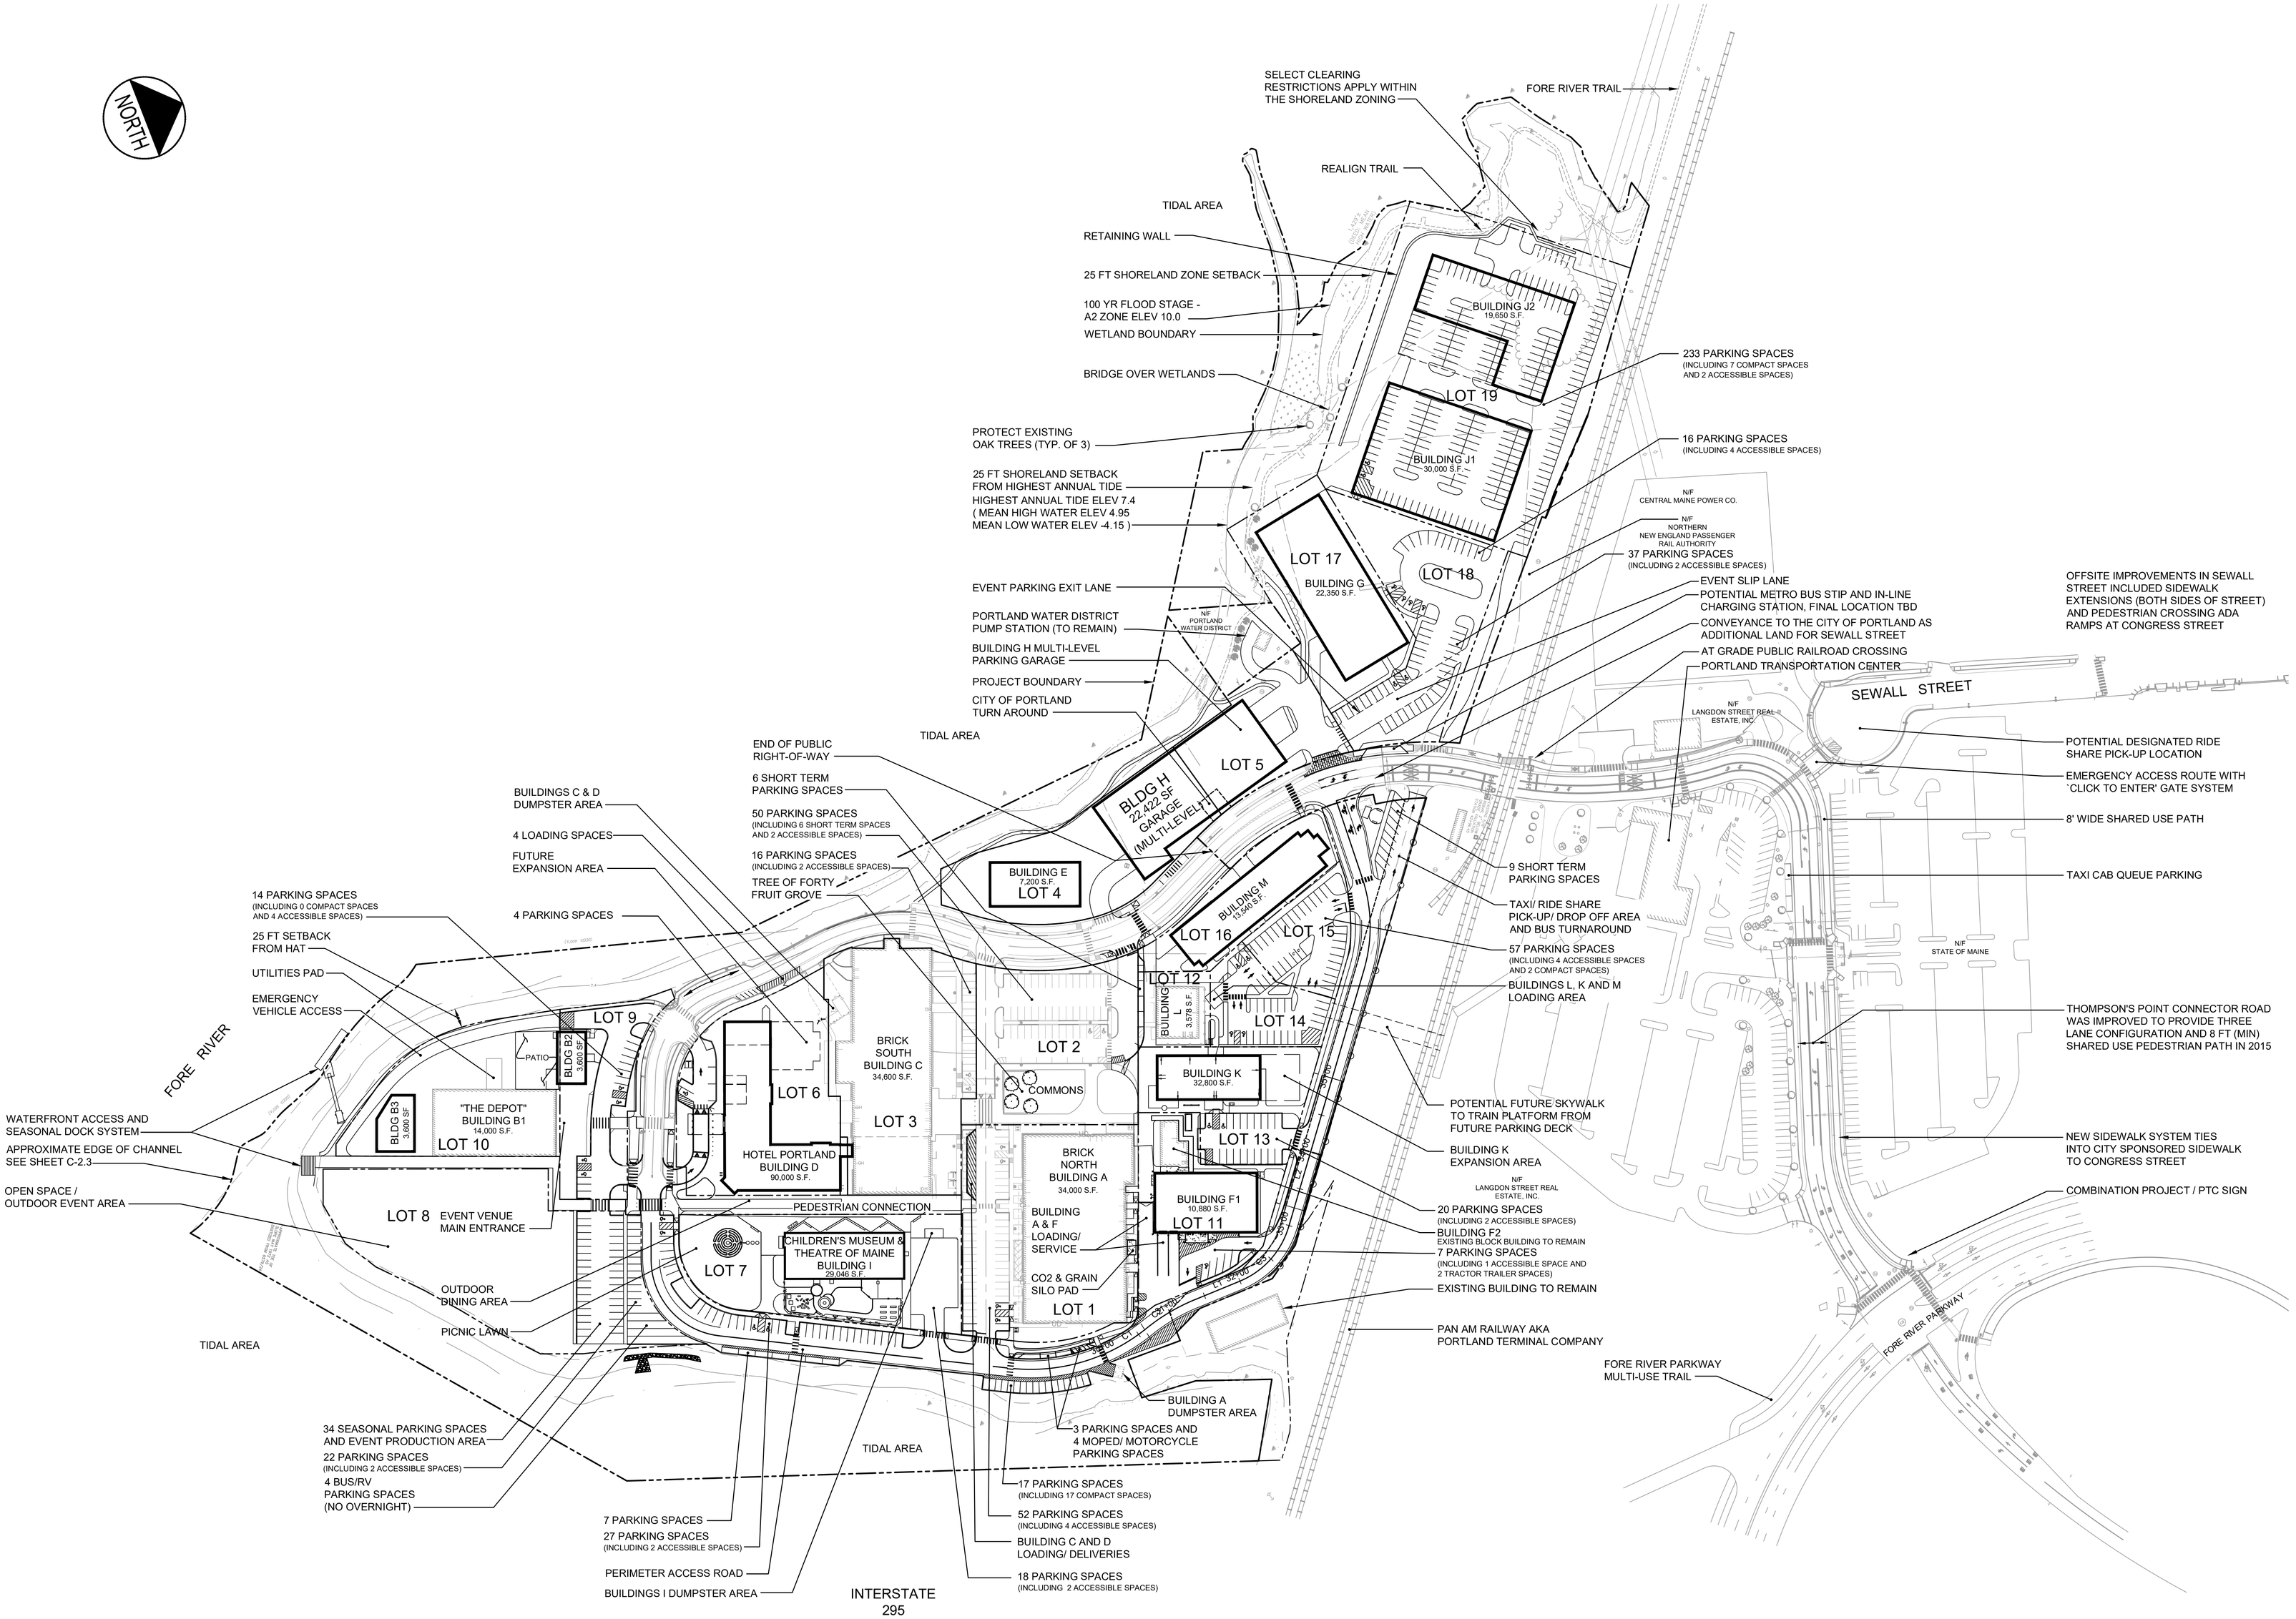
The trip generation for the existing site has been combined with the trip generation for the proposed new and remodeled buildings to yield the site trip generation. The total site trip generation after the construction of the Inn has been compared to the permitted trip generation to identify the remaining available permitted trips.

Site Trip Generation Summary

Site	Building	AM Peak Hour	PM Peak Hour
Existing			
	Brick North	68	105
	Brick South	100	195
	Hotel	83	87
	Children's Museum	33	33
	Existing Total	**284**	**420**
Proposed			
	Building K (Including Future Expansion)	46	49
	Building F1	6	7
	Building F2	2	1
	Building L	4	8
	Building B2	32	31
	Proposed Total	**90**	**96**
Proposed Site Subtotal		**374**	**516**
Reduction (10%) for Bus / Train / Shared Use		(-37)	(-52)
Proposed Site Trip Generation		**337**	**464**
Permitted Trip Ends		734	1091
Difference Between Permitted and Proposed Site		**397**	**627**

As shown in the table the proposed site uses are forecast to generate 337 trip ends during the AM peak hour and 464 trip ends during the PM peak hour. This yields an overall trip generation that is 397 trip ends less than the permitted trip generation during the AM peak hour and 627 trip ends less than the permitted trip generation during the PM peak hour.

Parking Demand



The parking demand for the site with the proposed additions added has been calculated using the same methodology as that used in the Master Development Plan. The parking demand is based on shared parking methodology, which assumes that parking spaces are not designated for specific uses or businesses, and can be used by any vehicles visiting the site. This methodology is very beneficial for mixed use developments with complementary uses such as office, whose parking demand is higher during the day, and hotel, whose parking demand is higher overnight. The attached parking demand calculations show the detailed time of day distribution for each use and the forecast shared demand. Based on the calculations the peak parking demand for the site (without an event in Brick South or Halo) is 193 spaces and is anticipated to occur at 5:00 PM. As identified in the approval for the master development plan, when special events of a certain attendance threshold occur, additional parking measures will be implemented on an as needed basis.

Conclusions

The following is a summary of the conclusions:

1. The site (including existing and proposed uses) is forecast to generate a total of 337 trip ends during the AM peak hour and 464 trip ends. This trip generation is 397 trip ends less than the permitted trip generation during the AM peak hour and 627 trip ends less than the permitted trip generation during the PM peak hour.

2. The peak parking demand for the site after the additional development is forecast to be 193 parking spaces and is forecast to occur at 5:00 PM.

MaineDOT Traffic Movement Permit - Thompson's Point Development Company Inc. – Signed 6/13/12

STATE OF MAINE
DEPARTMENT OF TRANSPORTATION
16 STATE HOUSE STATION
AUGUSTA, MAINE 04333-0016

Paul R. LePage
GOVERNOR

David Bernhardt
COMMISSIONER

Applicant:	Thompson's Point Development Company Inc.
Project Location:	Thompson's Point Rd, Portland, ME Portland Tax Map 201Lot(s) 8, 9 and 10 and Map 202 Lots 2, 4 and 5
Project:	Mixed use Development
Identification #:	Reg. 01-00155-A-N
Permit Category:	200 Plus PCE
Traffic Engineer:	Thomas Gorrill Gorrill-Palmer Consulting Engineers PO Box 1237 15 Shaker Rd. Gray, ME 04039

Pursuant to the provision of 23 M.R.S.A. § 704-A and Chapter 305 of the Department's Regulations, the Maine Department of Transportation (MaineDOT) has considered the application of Thompson's Point Development Company Inc with supportive data, agency review and other related materials on file.

PROJECT DESCRIPTION

The applicant proposes to construct a 97,697 sf event center/convention hall/exhibit hall; 32,000 sf concert hall plus outdoor venue for up to 4,800 attendees; 378,000 sf of office space; 4,000 sf of medical office space; 20,000 sf gym and rehabilitation center; 125 room hotel; 6,000 sf of restaurant space (high-turnover sit down). The site is forecast to generate 734 AM and 1,091 PM weekday peak hour trip ends.

Findings

Based on a review of the files and related information, MaineDOT approves the Traffic Movement Permit Application of Thompson's Point Development Company Inc. subject to the following conditions:

MITIGATION

On-Site Mitigation

All Site Entrances

All entrances shall have overhead illumination provided, if not existing, to illuminate the intersections per MaineDOT standards at a minimum. Overhead lighting shall have an average of

0.6 to 1.0 foot candles, with the maximum to minimum lighting ratio of not more than 10:1 and an average to minimum light level of not more than 4:1.

Thompson's Point Road

Thompson's Point Road shall be widened to accommodate an 8 foot shared bike/pedestrian path, a 3 foot wide grass esplanade, a 3 foot shoulder with granite curb, an 11 foot wide outbound lane, and 11 foot wide flush concrete median, an 11 foot wide inbound lane and a 3 foot shoulder with granite curb. This section will be constructed from the site driveway to the Fore River Parkway. The 250 feet of flush median closest to Fore River Parkway shall be designated as an exclusive left turn lane outbound. The shared bike/pedestrian path shall have a crossing built at the Sewall Street cul de sac and the path extended to the existing sidewalk on Sewall Street. Another pedestrian crossing shall be installed where the current pedestrian crossing is at the bus/train station. Both crossings shall have solar powered/radio interconnected pedestrian activated rectangular rapid flashing beacon lights installed.

Thompson's Point Development

No sporting events or concerts shall begin between 4 pm and 7pm Monday through Friday.

During large sporting and concert events, the applicant shall ensure that there are flaggers and uniformed police officers present to ensure that there will be two inbound lanes prior to the event and two exit lanes after the event. Flaggers/uniformed police officers shall be stationed to ensure that pedestrians are able to cross at either of the two crosswalks, at the Transportation Center Entrance to let busses in or out and also at the transportation center parking lot entrances to ensure that transportation center patrons leaving the parking lots are merged into the out-bound flow. Uniformed police officers shall be present after an event to direct traffic at the Thompson's Point Road/Fore River Parkway intersection. Retro-reflective traffic cones shall be used by the development to create the reversible lane. Flaggers will direct vehicles into the proper lanes.

Off-Site Mitigation

Fore River Parkway/Thompson's Point Road/I-295 Exit 5A off-ramp

The Southbound off ramp at Exit 5 A shall be reconstructed to have a separate 13 foot wide left turn lane and 13 foot wide through lane. The widths include the

required curb offset. The left lane shall extend back 200 feet. Install Queue detector at the ramp gore area to act as pre-emption for the signal should the queue spill back that far.

Modify traffic signal timing and phasing accordingly.

Fore River Parkway/Congress St/I-295 Exit 5 B off-ramp

Widen the southbound off-ramp to accommodate a 5 foot wide right shoulder, two 12 foot wide right turn lanes and a 2 foot curb offset for a distance of 125 feet with an appropriate taper. Install Queue detector at the ramp gore area to act as pre-emption for the signal should the queue spill back that far.

Re-stripe Congress Street Westbound to accommodate a longer westbound left turn lane, extend back to the end of the island (to the slip lane from Park Ave to Congress St).

Modify traffic signal timing and phasing accordingly.

Congress St/Stevens Ave

Restripe Steven's Avenue to an exclusive left and a shared left/thru/right and modify traffic signal timing and phasing accordingly.

The developer shall pay an impact fee in the amount of $15,000 for inlaid thermoplastic paint skips, retro-reflective back plates and overhead lane usage signage. This money will be put towards improvements funded by PIN 19078.00.

Congress St/Westbrook St

The developer shall pay an impact fee in the amount of $15,000 for inlaid thermoplastic paint skips, retro-reflective back plates and overhead lane usage signage. This money will be put towards improvements funded by PIN 19078.00.

Congress/Frost St

The developer shall pay an impact fee in the amount of $15,000 for inlaid thermoplastic paint skips, retro-reflective back plates and overhead lane usage signage. This money will be put towards improvements funded by PIN 19078.00.

Transportation Demand Management

In lieu of additional mitigation, Transportation Demand Management shall be used to offset the traffic impacts on the roadway network. The City has implemented a Transportation Oriented Development Tax Increment Financing District for the Thompson's Point Development. This development would benefit from some increased transit connections to the airport and Old Port, funding for handicap accessible taxis or for increase in parking at the Transportation Center.

Overall

A. Provide all necessary auxiliary signs, striping and pavement markings to implement the improvements described herein according to State of Maine and/or National standards.

B. All plantings and signs (existing and/or proposed; permanent and/or temporary) shall be placed and maintained such that they do not block available sight distances and do not violate the State's "Installations and Obstructions" law. No signage or plantings shall be allowed within the "clear zone" if they constitute a deadly fixed object as determined by MaineDOT. All signs shall meet MRSA Title 23, Chapter 21, Section 1914: "On-Premise Signs".

C. If any of the supporting data or representations for which this permit is based changes in any way or is found to be incorrect / inaccurate, the applicant shall request in writing from MaineDOT a decision of what impacts those changes will have on the permit. The applicant will then be required to submit those changes for review and approval and additional mitigation as a result of those changes may be required at the expense of the applicant.

D. Because the proposed project affects the state highway and drainage systems and requires improvement to that system, the applicant must obtain approval of the design plans and coordinate work through MaineDOT's State Traffic Engineer, who can be reached at (207)-624-3620 in Augusta.

By:

Stephen Landry, P.E.
Assistant State Traffic Engineer

SUPPLEMENTAL STORMWATER MANAGEMENT REPORT

1.0 Introduction

The proposed Multi-Family Residential Building is depicted on the Master Development Plan (approved Jan. 2015) and more specifically referenced on the Overall Subdivision Plan (approved January 12, 2016, last revised March, 2020) in a twin tower configuration on development lots 18 and 19. The currently proposed Residential Building as presented here-in is configured in an a long linear shape with two residential wings extending southerly on development lot 17 (consolidated Lots 17-19) in place of the previously contemplated office and residential building cluster. The Multi-Family Building plans contained in a standalone City of Portland Major Site Plan Application dated September 20, 2024 provides additional construction details and refines another area of the evolving Master Development Plan.

This supplemental report relies upon assumptions and design approaches previously discussed and approved as part of previous Stormwater Management Reports associated with The Forefront at Thompson's Point Master Development Plan Application, Subdivision Application, and Level II or III Site Plan applications (Now referred to as Minor and Major, respectively). Some of these assumptions pertinent to this report include but are not limited the following list:

- A waiver from the Flooding Standards was previously approved;
- A waiver from Channel Protection requirements (such as isolator row requirements associated with Filterra Treebox filters) was previously approved; and
- Prorated treatment credits for treatment of stormwater runoff from on-site existing impervious surfaces (MeDEP Chapter 500 rules dated 2010) that have been retained (primarily consisting of renovated buildings) are applicable to the overall treatment percentage computation.

This supplemental report details the stormwater management systems proposed for the site plan improvements associated with the construction of a Multi-Family Residential with amenities at Thompson's Point as well as demonstrates the integration of stormwater treatment and conveyance infrastructure approved under the Master Development and Subdivision Plans Stormwater Management Strategy. The enclosed computations show that this phase of the project has been designed to meet the Portland Stormwater Management Standards adopted 7/19/10, General Stormwater Standards of MeDEP (revised 2015), and Maine Stormwater Management Design Manual Technical Design Manual (Dated May 2016) and are consistent with the overall goals presented in previous Stormwater Reports. The intent and principals of the stormwater management design, erosion and sediment control, and Inspection and Maintenance Manual have remained the same as approved on June 5, 2012 and include full compliance with Chapter 32 of the City's Technical Manual Stormwater rules and Chapter 500 of the MeDEP Stormwater law.

This phase of the project will have a cumulative redeveloped area of 4.51 acres of which 2.85 acres are re-developed impervious surfaces.

2.0 Stormwater Management Zone Revisions

This supplemental report summarizes the changes to the water quality treatment zones and provides detailed land cover computations of development tributary to the respective stormwater management systems sized to convey and treat stormwater runoff from the proposed re-development.

The previously approved Stormwater Management approach combined sub catchments and treatment areas labeled as 200, 201, and 202 to a single Zone H Discharge outfall as shown on the approved Overall Stormwater Management Sheet C-4.1 dated September 2014 and last revised 2016.09.16. Due to the size and linear nature of the proposed residential building footprint a single treatment and outlet (Zone H) approach is no longer feasible as originally contemplated under the original plan. The new site plan maintains three treatment areas; however, divided into three drainage discharge zones identified as Zone Ha, Hb, and Hc on the Overall Stormwater Management Plan C-5.1 dated August 2024 last revised 09.06.2024. The Stormwater Management Zones are organized and labeled based on tributary treatment area and discharge location.

A northeasterly portion of the property will be the driveway entrance and main access drive to the development lot and includes an entrance loop with short term parking. The drainage infrastructure from this subcatchment Zone Ha (formerly a portion of 200 and 201) will be connected to an existing 12" storm drain system, and the upper end of a main storm drainage trunk line installed in the Thompson's Point Road ROW as part of the roadway constructed during the summer of 2017. This trunk line follows Thompson's Point Road onto the Thompson's Point private road and ultimately discharging to the Fore River through an existing 36" SD pipe labeled as D0.

The bulk of the new building, parking structure, central courtyard, and northerly courtyards will drain to a series of roof drains, catch basin inlets, and storm drain piping to convey runoff to a treatment system shown as Zone Hb (formerly zones 201 and 202). Zone Hb discharges to the far southwesterly corner of the development and directly to the adjacent coastal wetland and Fore River inlet branch.

Runoff from the easterly portion of the new building and the southerly courtyard are collected in roof drains and series of catch basin inlets and storm drain piping shown as Zone Hc (formerly a portion of 200). Zone Hc is tributary to a treatment system and discharges to an existing drainage channel directly connected to the Fore River inlet branch.

The area of proposed development included with this application affects the zones and subzones identified on the Overall Stormwater Management Plan as Zone H and summarized in Table 1 below:

TABLE 1 – Summary of Changes to Stormwater Management Zones

Subdivision Plan Discharge Zone ID	CB Inlet ID	Description of Change
H-200(north half)	Ha2 thru Ha9	This subcatchment (Ha) has split into two distinct areas separated north and south at the building line. This drainage area includes the northerly site developed areas only and drains towards the street. Rather than combine with Hb it will discharge to the street storm drainage system.
H-200 (south half)	Hc4 thru Hc8	This subcatchment (Hc) has split into two distinct areas separated north and south at the building line. This drainage area includes the building roof and southerly courtyard. Rather than combine with Hb it will have its own discharge.
H-201 and H-202	Hb7 thru Hb 23	This subcatchment (Hb) is similar to the previous drainage area in land cover and development area and

		continues to discharge in a single combined location; however, the discharge outfall has been shifted to the westerly side of the site from its more centrally located

The C-5.1 and C-5.2 Stormwater Management Plans show the updated stormwater management zones and proposed stormwater infrastructure and attached in Appendix E. An updated Water Quality Treatment table is shown on Plan Sheet C-5.4 Stormwater Management Plan-3 and enclosed in Appendix D.

3.0 Stormwater Quality Treatment (General Standards)

Stormwater treatment strategies have changed from the prior Subdivision approval which contemplated subsurface underdrained sand filters. The new treatment strategy for each distinct portion of Zone H is described below.

3.1 Zone Ha (Front Entrance, Visitor Parking, and Drive Aisle):

Zone Ha – Areas Ha2, 4, 5,6,7,8,9, and 10
The stormwater treatment approach to these subcatchments utilizes a proprietary high-performance bio-filtration system known as Filterra manufactured and distributed by Contech Engineered Solutions. The owner reserves the right to use an or equal system by another manufacture provided it holds the same MeDEP proprietary preapproval and is sized per the approved criteria. The proposed Filterra system has been sized and configured in accordance with the preapproval letter from Maine DEP to Contech Engineered Solutions dated February 2, 2017 and enclosed for reference in Appendix A. A Filterra system is required to be sized based on table listed in the aforementioned letter.

The resultant sizing computations are detailed in Appendix D and conclude two types of Filterra form factors will be used.

- Ha-2– Requires a 4’x8’ box with tree grate and adequate for up to 0.202 Ac of tributary area
- Ha-4– Requires a 4’x6’ box with tree grate and adequate for up to 0.151 Ac of tributary area
- Ha-5 – Requires a 6’x10’ box with tree grate and adequate for up to 0.378 Ac of tributary area
- Ha-6 – Requires a 4’x8’ box with tree grate and adequate for up to 0.202 Ac of tributary area
- Ha-7, 8, and 9 – Requires a 4’x4’ box with no top (bioscapes configuration) and adequate for up to 0.1 Ac of tributary area

The Filterra (or equal) filters are considered adequate to meet and exceed the Chapter 500 General Standards for water quality treatment in this zone.

3.2 Zone Hb (Garage, Building Roof, Westerly Portion of Site):

Zone Hb - Areas Hb – 21 and 22
The stormwater treatment approach to these subcatchments (surface runoff from the northerly courtyard) utilizes a proprietary high-performance bio-filtration system known as Filterra manufactured and distributed by Contech Engineered Solutions.

The resultant sizing computations are detailed in Appendix D and conclude the following Filterras will be used.

- Hb-21 and 22 – Requires a 4’x4’ box with no top (bioscapes configuration) and adequate for up to 0.1 Ac of tributary area.

The discharge from these two units will combine downstream with the effluent of the Zone Hb Jellyfish treatment unit and discharge at the same outfall Hb-0

Zone Hb - Areas H-Gr,Hb-5,7,9,17,19,20, H-R4, and HR5

The Zone Hb subcatchment areas numbered H-Gr, Hb-5,7,9,17,19,20, H-R4, and HR5 associated with the building, parking structure, and courtyards are tributary to a Contech Jellyfish™ Treatment Unit.

Jellyfish™ units are precast concrete manholes that utilize membrane filtration treatment cartridges. Flow enters the Jellyfish™ from an upstream pretreatment and storage chamber system and flows into a settling tank portion of the unit. Once the settling tank is filled with water, flow from the bottom of the tank is forced up through hi-flow cartridges and continues to the outlet on the by-pass conveyance trunk line. A baffle wall is located between the inlet and outlet compartments to ensure that un-treated flow from small storm events is not mixed with treated flow. When the hi-flow treatment cartridge has filled, a drain down cartridge(s) is activated treating the remaining water quality volume. A vertical orifice drilled into the cap on the Jellyfish inlet pipe will control the outflow of the pretreatment storage system. As stipulated by the MeDEP in the proprietary letter of approval, the outlet orifice has been sized to drawdown the water quality volume at a rate not to exceed a maximum drain down time of 48 hours or minimum of 24 hours. This drawdown time restriction regulates the flow to far less than the maximum flow rate each Jellyfish™ cartridge unit is designed to discharge with an approved flow rate of 80 GPM/cartridge out of the Hi-flo cartridges and 40 GPM/cartridge from the low flow drain down cartridges.

To meet Chapter 500, the Water Quality/Channel Protection Volume when provided with-in a Jellyfish™ System should be equal to or greater than the following:

1”/12 x impervious area plus 0.4”/12 x landscaped area = Water Quality/Channel Protection Volume (cubic feet)

Computations of Water Quality/Channel Protection Volume for Zone Hb can be found in Appendix D. It is noted that the project has received prior waivers from the Channel Protection Volume because the collected runoff does not impact any downstream channels and discharges directly to a coastal tidal river. The applicant reserves the right to apply this waiver to the water quality/channel protection volume provided the Jellyfish system is adequately sized to meet the flow demand.

The water quality/channel protection volume is provided in a subsurface arched chamber storage system. This portion of the design is identical to the system installed as part of the Brick North and Brick South, Hotel, and Children’s Museum and Theatre of Maine development projects on Thompson’s Point.

Jellyfish™ units are designed based on a mass sediment loading calculation. Each treatment hi-flow cartridge has a mass capacity of 125 1bs and each low-flow (draindown) cartridge has a capacity of 63 lbs. The mass loading for each zone was determined by Maine DEP sediment loading standards, assuming a 50% sediment removal from a designed pre-treatment StormTech® Isolator row.

Discharge from larger storm events are controlled over a broad crested weir housed in a precast concrete outlet control structure set above the water quality volume. The overflow piping network is sized to handle runoff from a 25-year storm event. A rain event exceeding the storm

drainage network would likely flood the catch basin inlet, into the courtyard and over the sloped bank to the river.

Pretreatment for flow entering from all inlet pipes to the storage area will be provided via the installation of a StormTech® Isolator row(s) and deep sump catch basins with hooded outlets.

Therefore, water quality goals for the Jellyfish™ Proprietary Systems meet the General Stormwater Standards of the November 2005 Chapter 500 Rules of MeDEP (rev. January 2015).

The Jellyfish™ treatment system and Filterra® are considered adequate to meet the Chapter 500 General Standards in this zone.

3.3 Zone Hc (Building Roof, Southeast Portion of Site):

Zone Hc - Areas Hc-3 and 4, H-R1, R2, and R3
The Zone Hc subcatchment areas numbered Hc-3 and 4, H-R1, R2, and R3 associated with the easterly portion of the building, and southerly courtyard are tributary to a Contech Jellyfish™ Treatment Unit.

Jellyfish™ units for Zone Hc are designed to the same standards used in Zone Hb.

Computations of Water Quality Volume for Zone Hc can be found in Appendix D.

The Jellyfish™ treatment system is considered adequate to meet the Chapter 500 General Standards in this zone.

3.4 Zone H (Landscaped slope around perimeter of the development area):

Zone H – Landscaped Slope
The proposed development area has significant topography differences from west to east and the design team has designed a stepped building approach to limit the amount of earthwork required to construct a suitable building pad to the extent practicable. The proposed site grading creates a fill slope around the southerly perimeter of the development that extends to an existing trail at the toe edge, limiting the development area. The fill slope will be covered with a geotextile net, planted with meadow seed mix, and landscaped to prevent erosion and function as a planted buffer before runoff passes under the trail in existing culverts and to the coastal tidal wetland. The fill slope is included in the redevelopment area calculations as untreated and factored into the overall treatment percentage.

4.0 Conclusion

The stormwater management strategies for this phase of the project presented herein are consistent with the Master Development Plan and Subdivision Plan Strategies. The overall Thompson's Point stormwater management strategy provides a blueprint for treating a minimum of 95% of the net new redeveloped impervious area and 80% of the net new developed area. This phase of the amended site plan treats 80.8% or 3.64 ac of the 4.51 ac. redeveloped area, and 96.87% or 2.86 ac. of the 2.96 ac. redeveloped impervious area.

When this phase of the amended site plan is added to the portion of the overall subdivision developed to date the cumulative treatment computes to be 86.21% or 12.35 ac of the 14.32 ac. redeveloped area and 95.51% or 9.64 ac. of the 10.10 ac. redeveloped impervious area.

The individual systems have been adjusted to accommodate current detailed site plan revisions but ultimately the design strategies continue to be consistent with that of the approved plans and meets or exceeds the City of Portland Stormwater Management Requirements.

Filterra and Jellyfish Approval and Sizing letter from MeDEP

STATE OF MAINE
DEPARTMENT OF ENVIRONMENTAL PROTECTION

PAUL R. LEPAGE
GOVERNOR

PAUL MERCER
COMMISSIONER

February 2, 2017

Derek Berg
Filterra Bioretention Systems
Contech Engineered Solutions LLC
71 US Route 1, Suite F
Scarborough, ME 04074

Dear Mr. Berg:

This letter replaces the April 19, 2016 approval from the Department of Environmental Protection (Department) that authorized the use of the Filterra Bioretention System. The Filterra Bioretention System (FBS) was permitted for use by the Department of Environmental Protection (Department) on November 12, 2009, as part of a stormwater treatment train that included the use a StormTech Isolator Row following the structure as an approved alternative to the General Standards (Section 4.C) of the Stormwater Management Rules (Chapter 500). Based on new testing data, the installation of FBS structures without the StormTech Isolator Row was approved on an interim use by the Department on January 21, 2015.

The FBS structures sizing criteria must be revised based on data you provided of an appropriate rainfall intensity rate that would allow for the full treatment of 90% of an average annual runoff volume. Therefore, the Department will review and approve, on a case-by-case basis, the use of the FBS when the system is sized, installed and maintained in accordance with the following provisions:

1. The structure may be a standard concrete box or a soft shell system that is filled with the Filterra engineered filter media, provided it is sized to meet the requirements of the General Standards (Section 4.C) and is installed, operated and maintained in accordance with the manufacturer's specifications.

2. The FBS must be sized in accordance with the manufacturer's standard New England testing results and revised sizing guidelines outlined in the following table to treat 90% of the annual runoff volume:

AUGUSTA
17 STATE HOUSE STATION
AUGUSTA, MAINE 04333-0017
(207) 287-7688 FAX: (207) 287-7826

BANGOR
106 HOGAN ROAD, SUITE 6
BANGOR, MAINE 04401
(207) 941-4570 FAX: (207) 941-4584

PORTLAND
312 CANCO ROAD
PORTLAND, MAINE 04103
(207) 822-6300 FAX: (207) 822-6303

PRESQUE ISLE
1235 CENTRAL DRIVE, SKYWAY PARK
PRESQUE ISLE, MAINE 04769
(207) 764-0477 FAX: (207) 760-3143

website: www.maine.gov/dep

Filterra Model Number	*Area in Acres*	*Treatment Flow Rate at 140"/hr (cfs)*	*Outlet Pipe Size*
4x4	0.100	0.05	4"
4x6	0.151	0.08	4"
4x8	0.202	0.10	4"
6x6	0.227	0.12	4"
6x8 / 4x12	0.301	0.16	4"
6x10	0.378	0.19	6"
6x12	0.454	0.23	6"
7x13	0.573	0.29	6"

Alternatively, the runoff from the entire contributing drainage area, including all pervious areas, may be modelled to provide treatment of the 0.95" storm at the approved hydraulic loading rate of 140" per hour.

3. When designed with the standard curb inlet design, the FBS must be configured "off-line" with the surface elevation at the FBS unit being up gradient of an overflow inlet. When designed with the grated inlet design, the FBS must incorporate an internal bypass and will not require an overflow inlet. The applicant must demonstrate that the proposed design meets all the manufacturer's specifications prior to submission for Department approval. Review and approval of the proposed design by the manufacturer will be sufficient to demonstrate conformance with the manufacturer's specifications.

4. The treated flow and bypass flow must be combined and directed to a detention system/structure that will store the water quality/channel protection volume (WQv) consisting of the first 1.0 inch of runoff from impervious areas and 0.4 inch of runoff from lawns and landscaped areas. An external outlet control structure must control the flow out of the system and the WQv must be detained between 24 hours and 48 hours.

5. When a boxed structure is proposed, the FBS must be delivered to the site with the engineered filter media and plumbing fully installed. The concrete box must be sealed to prevent debris and sediment from entering the system during construction. The activation of the FBS and opening of the protective mesh cover, installation of plant(s) and mulch layers as necessary, can be performed only by the supplier (Contech or its authorized dealer). The activation process must not commence until the project site is fully stabilized and cleaned (i.e., full landscaping, grass cover, final paving and street sweeping completed), minimizing the risk of construction materials contaminating the FBS system.

6. When a soft shell structure is proposed, the FBS(s) must be built on site and must include all the components of a boxed structure. The FBS must be designed per the manufacturer's specifications and must be installed on-site by the manufacturer's representative.

7. Prior to construction, a five-year binding inspection and maintenance contract must be provided for review and approval by the Department, and must be renewed before contract expiration. The contract will be with a professional with knowledge of erosion and stormwater control, including a detailed working knowledge of the proposed system. The first year's maintenance must be provided by the manufacturer to ensure that the system is operating according to the established specifications.

8. The overall stormwater management design must meet all Department criteria and sizing specifications and shall be reviewed and approved by the Department prior to use.

9. Each project must be reviewed and approved by the manufacturer for proposed use, layout and sizing of the system and for conformance with their design specifications. The system must be installed under the manufacturer's representative supervision.

10. This approval is conditional to on-the-ground experience confirming that the FBS's pollutant removal efficiency and sizing are appropriate. The "permit shield" provision (Section 14) of the Chapter 500 rules will apply, and the Department will not require the replacement of the system if, with proper maintenance, pollutant removals do not satisfy the General Standard Best Management Practices.

We look forward to working with you as these stormwater management structures are installed on new projects. Questions concerning this decision should be directed to Jeff Dennis at (207) 215-6376.

Sincerely,

Mark Bergeron, P.E.
Director
Bureau of Land Resources

cc: Don Witherill, Maine DEP

STATE OF MAINE
DEPARTMENT OF ENVIRONMENTAL PROTECTION

PAUL R. LEPAGE
GOVERNOR

PATRICIA W. AHO
COMMISSIONER

January 21, 2015

CONTECH Engineered Solutions LLC
71 US Route 1, Suite F
Scarborough, ME 04074
ATTN: Derek Berg

Dear Mr. Berg:

This letter is to inform you that the Department of Environmental Protection (Department) will review and approve, on a case-by-case basis, applicants' requests to use the Jellyfish Filter, manhole or vault housing, a cartridge deck supporting membrane filtration cartridges, as a low flow rate filter meeting the requirements of the General Standards (Section 4.B.) of the Stormwater Management Rules (Chapter 500) when sized, installed and maintained in accordance with the following provisions:

1. The Jellyfish Filter must be sized in accordance with the tested hydraulic loading rate, and is approved for a maximum rate of 80 gallons per minute (gpm) for each 54-inch long membrane filter cartridge (1.48 gpm per inch of cartridge length). The structure must include at least one draindown cartridge, which is approved for a hydraulic loading rate of 40 gpm per 54" cartridge (0.74 gpm per inch of cartridge length).
2. Upstream storage must be provided for the water quality/channel protection volume (WQv) consisting of the first 1.0 inch of runoff from impervious areas and 0.4 inch of runoff from lawns and landscaped areas. The WQv should be hydraulically isolated from any additional storage provided onsite by weirs or other means so that only the WQv is routed through the Jellyfish Filter. Additionally, the WQv must be detained for a minimum of 24 hours and a maximum of 48 hours (emptying time). Storage can typically be provided in an underground facility such as corrugated metal pipe, polypropylene chambers, concrete vaults or similar means.
3. All storage systems must include sufficient maintenance access for the removal of accumulated sediment and debris. It is desirable that a pretreatment structure be located upstream of the WQv storage to facilitate capture of coarse solids and trash.
4. The Jellyfish Filter must be delivered to the site and installed under the supervision of the manufacturer's representative.
5. The system must be inspected at least once every six months, and the filters maintained yearly per the manufacturer's guidelines to maintain the established efficiency for pollutant removal. A five-year binding inspection and maintenance contract must be provided prior to review and approval by the Department, and must be renewed before contract expiration.
6. The overall stormwater management design must meet all Department criteria and sizing specifications and shall be reviewed and approved by the Department prior to use.
7. Review and approval by the manufacturer for the proposed use and sizing of the Jellyfish Filter at each specific project is required to ensure conformance with the manufacturer's design specifications.

8. This approval is conditional to on-the-ground experience confirming that the Jellyfish Filter's pollutant removal efficiency and sizing are appropriate. The "permit shield" provision (Section 14) of the Chapter 500 rules will apply, and the Department will not require the replacement of the system if pollutant removals do not satisfy the General Standard Best Management Practices.

We look forward to working with you as these stormwater management structures are installed on new projects. And, we hope that this stormwater BMP will be included in our manual in the near future.

Questions concerning this decision should be directed to Marianne Hubert at (207) 215-6485 or Jeff Dennis at (207) 215-6376.

Sincerely,

Mark Bergeron, P.E.
Director, Division of Land Resource Regulation
Bureau of Land & Water Quality

C: Don Witherill, Maine DEP

H.) Total New Impervious Area untreated (SF)	63,280.60	**1.45**
I.) Total New Impervious Area (SF) = G+H	439,742.34	**10.10**
J.) Existing Impervious Area Treated (SF)	72,596.00	**1.67**
K.) Adjusted Existing Impervious Area Treated (SF)	43,557.40	**1.00**
L.) Total Net Impervious Area Treated (SF) = G+K	420,019.14	**9.64**

Treatment Breakdown	Required	Cumulative Campus Provided
% of Net Developed Area Treated = F/C	80.00%	86.21%
% of Net Impervious Area Treated = L/I	95.00%	95.51%

Development Projects Included in Cumulative Review (inorder of input):

Brick North and Brick South (Lots 1, 2, 3)
West Loop Rd (Common)
Hotel Portland (Lot 6)
East Loop Rd (Common)
CMTM (Lot 7)
Warehouse (Lot 11)
Concessions (Lot 9)
Multi-Family (Lot 17)

NOTES AND ASSUMPTIONS:

1. All areas are based on the Placemaker Partners Permit drawings dated Sept 2024.
2. The required water quality volumes have been computed based on Sections 7.4, 7.5 and 7.6 of the Maine DEP Volume III BMP's Technical Design Manual. The volume is computed to be 1" times the subcatchments impervious area and 0.4" times the subcatchments vegetated area. Existing buildings to remain are not required to be treated since they predate 1975 clean water act requirements.
3. The 1 year peak flow rates have been computed using the rational method. The rainfall intensities are derived from the Cumberland County IDF curve.
4. Subsurface storage system sizing is based on a Stormtech SC-740 chamber system. All isolator rows have been computed per a 7/29/2016 letter from State of Maine to Stormtech re: Pretreatment Isolator Row of the Maine DEP Volume III BMP's Technical Manual. One chamber is required for each 0.2 cfs of the computed tributary 1 year peak flow rate.
5. The required number of Jelly Fish treatment units have been computed based on Contech Sizing requirements. The water quality volume for each unit is storage up stream and the amount of treatment cartridges are computed based sediment mass loading.
6. The owner reserves the right to use an alternate tree box filter device provided it has been approved by the Maine DEP Chapter 500 delegated review authority of the City of Portland. Area listed is max tributary area for size selected
7. Provided Water Quality Volume for stormtreat storage system computed using 61.38 CF of storage per chamber based on Storm Tech Chamber Design Manual. This includes volume from Chamber and Surrounding stone only, excluding oversized perimeter stone, and distribution piping.
8. Vacant
9. According to Chapter 500 Maine DEP stormwater rules Dated 2015; the department allows applicants to take credit for the treatment of existing impervious areas on site. For existing roofs the credit can be calculated by multiplying the total treated area by 0.6. The overall project was approved using this methodology.
10. The MEDEP will now accept a Filterra tree box filter as a stand alone treatment unit and does not require an Isolator Row for eligible projects. This project meets the eligibility criteria noted in a letter dated June 27th, 2014 from the MEDEP and updated February 2, 2017.

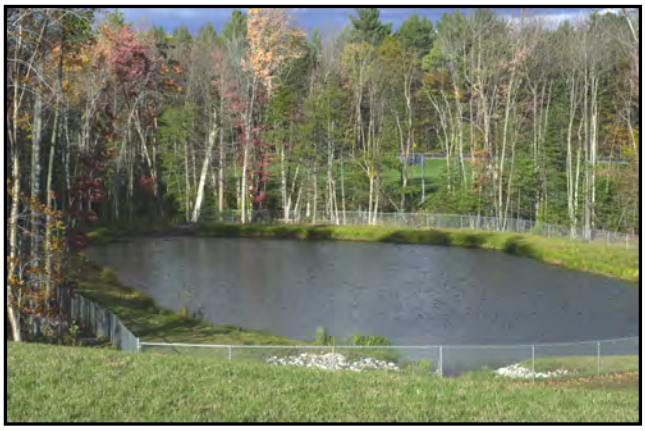
Appendix A – Sample Inspection Logs



Appendix B – Permits for Project

Appendix C – Summary Checklist for Inspection and Maintenance

I. INTRODUCTION

Relatively complex stormwater management facilities are commonly installed in development projects including, commercial facilities, and many other developments. The complexity and goals of these systems vary with the nature of the receiving water, as well as the type of development. Runoff from developed areas of the project, including rooftops, paved or lawn areas, typically contain materials that can impact the receiving waters. Source control and the installation of wet ponds, infiltration galleries, and water quality units, often combined with pretreatment measures or followed by vegetated buffer strips and other best management practices, can significantly reduce the non-point pollution discharge from the developed area. These measures are particularly important to projects in the watersheds of sensitive water bodies, or projects with potential impacts to groundwater. With the increased cost of land and development, there is an increased tendency to construct portions of the stormwater management systems underground.

The effectiveness of water quality management provisions and other components of the stormwater management system are dependent on their design, upkeep, and maintenance to assure they meet their intended function over an extended period of years. It is critical that the stormwater management facilities are regularly inspected, and that maintenance is performed on an as-needed basis. It must also be recognized that the effectiveness of these facilities, and their maintenance requirements, are related to the stormwater drainage facilities that collect and transport the flow to the ponds, infiltration galleries, and other treatment measures. Thus, maintenance should be directed to the total system, not just the pond or primary stormwater management facility.

The purpose of this document is to define, in detail, the inspection and maintenance requirements deemed necessary to assure that the stormwater management facilities function as intended when they were designed. Subsequent sections identify individual maintenance items, give a brief commentary of the function and need for the item, a description of the work required, and a suggested frequency of accomplishment. While the suggested programs and schedules must be adapted to projects, the material presented should provide guidance for a successful long-term program for operation and maintenance. A supplemental section provides guidance for construction monitoring of the facilities during their installation and more detailed checklists. Certain facilities, specifically the groundwater recharge and infiltration beds are not intended to be placed in service until the tributary catchment area has the permanent cover in place and any contributing turf areas have achieved a 90% catch of vegetation (i.e. established).

A. GUIDELINES OVERVIEW

A summary of the individual components of stormwater management facilities has been prepared. The format used in the summary is as follows:

Preface: A general description of what function/benefit the element is intended to provide. This is a short summary and not intended to provide the design basis which can be found in other sources.

Inspection: This section provides the inspection requirements for the individual component.

Maintenance: The section provides general information on the routine maintenance requirements of this element.

Frequency: This section outlines the best judgment of the designer on the system to the frequency of maintenance.

Comments: This section provides any particular comment on the site-specific features of this element. This is a summary only. The owner/operator should review the design drawings and documents carefully to understand the particular elements of the project. The end of this section should allow for the owner/operator to make notes on the specific program. This may include the selected maintenance procedure, cross-references to applicable design drawings, etc.

A list of the individual inspection/maintenance elements is provided in the table of contents. The guidelines are proposed for initial use with adjustments made as appropriate based upon specific project experience.

II. PROJECT OVERVIEW

Key permits issued (or applied for) on the project include:

- MeDEP Site Location of Development (City of Portland Delegated Review Authority)
- City of Portland Site Plan Review

The permit applications pending for the project include the design information for the stormwater system.

A copy of the permits and Stormwater Management Report should be appended to this manual as Appendix B. The Owner/Operator of the stormwater management system should review these permits for a general description and background of the project, as well as any specific permit conditions or requirements of the project.

The applicant has retained Stantec Consulting Services Inc. for civil engineering for The Forefront at Thompson's Point mixed-use commercial project in Portland, Maine. Stantec Consulting Services Inc. has prepared the design for the stormwater management facilities and may be contacted at:

Stantec Consulting Services Inc.
482 Payne Road
Scarborough, Maine 04074
(207) 883-3355

It is recommended the preparer of the plan be contacted with any particular questions on the design intent or similar issues.

The applicable plans/design documents which apply to the project are:

1. Civil Site Plans/Permit Applications Prepared by Stantec Consulting Services Inc.
2. The Erosion Control/Sedimentation Control Plan for the project.
3. The Stormwater Management Plan for the project.

A copy of these documents should be retained with the manual.

The site is tributary to the Fore River watershed.

The proposed design will include deep sump catch basins, oil absorbent sorbent booms, underground detention including the use of an arched chamber system, subsurface sand filter, Jellyfish® filter, Filterra® tree box filters (or approved equal), and collection, conveyance, and discharge systems.

The project is subject to the requirements of the City of Portland Code of Ordinances, Chapter 32. Specifically, the post construction stormwater management plan. The City requirements have been reiterated for ease of reference; however, the owner shall be responsible to meet the current City code.

"Any person owning, operating or otherwise having control over a BMP required by a post construction stormwater management plan shall maintain the BMP's in accordance with the approved plan and shall demonstrate compliance with that plan as follows:

(a) Inspections. The owner of operator of a BMP shall hire a qualified post-construction stormwater inspector to at least annually, inspect the BMP's, including but not limited to any parking areas, catch basins, drainage swales, detention basins and ponds, pipes and related structures, in accordance with all municipal and state inspection, cleaning and maintenance requirements of the approved post-construction stormwater management plan.

(b) Maintenance and repair. If the BMP requires maintenance, repair or replacement to function as intended by the approved post-construction stormwater management plan, the owner or operator of the BMP shall take corrective action (s) to address the deficiency or deficiencies as soon as possible after the deficiency is discovered and shall provide a record of the deficiency and corrective action (s) to the department of public services ("DPS") in the annual report.

(c) Annual report. The owner or operator of a BMP or a qualified post-construction stormwater inspector hired by that person, shall, on or by June 30 of each year, provide a completed and signed certification to DPS in a form provided by DPS, certifying that the person has inspected the BMP (s) and that they are adequately maintained and functioning as intended by the approved post-construction stormwater management plan, or that they require maintenance or repair, including the record of the deficiency and corrective action (s) taken.

(d) Filing fee. Any persons required to file an annual certification under this section shall include with the annual certification a filing fee established by DPS to pay the administrative and technical costs of review of the annual certification.

(e) Right of entry. In order to determine compliance with this article and with the post-construction stormwater management plan, DPS may enter upon property at reasonable hours with the consent of the owner, occupant or agent to inspect the BMP's."

III. STANDARD INSPECTION/MAINTENANCE DESCRIPTIONS

The following narratives describe the inspection/maintenance provisions for the Stormwater Management area. These O&M procedures will complement scheduled sweeping of the pavement areas anticipated to occur at least twice per year. The MeDEP will require the stormwater system be certified to meet the basis of design at five year increments. Proper O&M is necessary to make sure the system can be certified.

A. POND OVERFLOW

Preface: The stormwater detention facilities proposed for the project includes underground detention systems under the paved parking areas. The underground units are a proprietary system called StormTech® SC-740 Chambers. The storage portion of the 30-inch high chambers will travel to the Jellyfish® filter or down through a sand filter. The upper storage portion will bypass the treatment system for major storm events. If the detention storage volume were exceeded, water would spill over the overflows of the underground systems and flow to the next inlet or sheet flow over the curb line and down the perimeter slope to the Fore River.

Inspection: There are inspection ports that should be checked semiannually to make sure that water is not ponded due to blockage.

Maintenance: The upstream measures are intended to reduce and presumably eliminate maintenance cleanings. Major cleaning would likely require excavation of the system although some success has been reported with fire flow flushing.

B. CONTROL STRUCTURES

Preface: The proposed underground storage systems will serve as a detention pond controlled by the hydraulic outlet control structure. The outlet control structure will be designed to detain the water quality volume with a slow release through the treatment measure (Jellyfish® or Sand Filter) and discharge runoff for storm events larger than 1". Therefore, flow is anticipated to be released during and after every major storm event. Minor events will likely filter through the sand filter or pass through the Jellyfish® filter. The Jellyfish® filters have a controlled low flow discharge of 0.066 cfs per unit. The control structure will be designed to be inspected by removing the manhole covers and inspection of the valve, orifice, weir, and channels. Debris should be removed whenever observed and reported to key maintenance personnel since any debris would indicate lack of proper system O&M in the collection and conveyance system. Entry may require CONFINED SPACE ENTRY procedures and appropriately trained personnel.

Inspection: The outlet control structures must be inspected to assure it maintains its intended hydraulic characteristics. The inspection would note any debris or sediment which may accumulate in the structure and in the inlet and

outlet pipes. It is noted that it does not take much debris or silt to alter the hydraulic characteristics of the discharge. The inlet should be inspected to assure it is not blocked or restricted or there is sediment to the extent that its flow characteristics may be altered.

Maintenance: Maintenance of the control structure will consist primarily of removing debris which may accumulate and sealing the bulkhead if leakage occurs.

Frequency: The control structure should be inspected quarterly, and after a high intensity rainfall event (in excess of 3 inches in a 24-hour period).

Maintenance/Inspection Responsibility:

Inspection Personnel: The maintenance personnel will be an outside agent hired by Forefront Partners I, LP and will perform the scheduled maintenance/inspection.

Dates of inspections, maintenance performed, and any observed problems should be noted in the logs/records maintained by the outside agent.

Outside Contract Services: The outlet structure should be opened/inspected by the outside agent of Forefront Partners I, LP on a quarterly basis. The logs and records of inspections and maintenance of the control structures should be maintained during each 5-year re-certification interval.

Replacement Parts/Repairs: No normal replacement parts are required. Inspection personnel should have a bucket to remove debris from the structure. If leakage of the bulkhead occurs, it is recommended that repairs be made by a professional contractor familiar with hydraulic grouts.

C. STORMWATER INLETS

Preface: The success of any stormwater facility relies on the ability to intercept stormwater runoff at the design locations. Stormwater inlets may include catch basins, open culverts, culverts with bar screens, and field inlets. Inlets exist throughout the system at the points of collection as well as at the outlet of many ponds. Bar racks are common on many inlet locations which intercept an open channel. This section is directed at maintenance of the actual inlet point. A later section addresses more substantive maintenance of the structures and conveyance facilities. The inlets contain oil absorbent sorbent booms to retain oils and avoid discharge to downgradient areas. These will become saturated with oil over time and require replacement.

Inspection: The inspection of inlet points will need to be coordinated with other maintenance items, these include:

- Roadway/parking lot maintenance areas
- Building maintenance areas
- Grounds maintenance

The key elements of the inspection are to assure the inlet entry point is clear of debris and will allow the intended water entry.

Maintenance: The key maintenance is the removal of any blockage which restricts the entry of stormwater to the inlet. The removed material should be taken out of the area of the inlet and placed where it will not reenter the runoff collection system. Snow should be removed from inlets in parking lots/roadway areas. Grass clippings and leaves should be bagged and removed particularly near the yard inlets near the building.

Frequency: All inlets should be inspected on a monthly basis, and after/during significant storm events. A windshield survey is suitable for most inlets but off road inlets and pond structures require more rigorous inspection.

Maintenance/Inspection Responsibility:

Maintenance Personnel: The outside agent will perform the normal maintenance/inspections of the inlets and culvert crossings.

Comments: Maintenance of inlets is critical on this project.

POORLY STABILIZED INLET ALLOWS ENTRANCE OF DEBRIS AND REDUCED CAPACITY

STABILIZED INLETS REDUCE DEBRIS ACCUMULATION AND MAINTAIN DESIGN CAPACITY

D. TRIBUTARY DRAINAGE SYSTEM

Preface: Stormwater from most of the project will be directed through a conveyance system which transports the flow to water quality units, underground sand filter, Filterra® units, or Jellyfish® filter. This conveyance system will be principally overland flow discharging to piped drain systems. Most of the sediment carried by the drainage system is intended to be trapped in the catch basin isolator rows or water quality units. Maintenance of this system can play a major role in the long-term maintenance costs and the effectiveness of the treatment systems.

Inspection: The tributary drainage system should be periodically inspected to assure that it is operating as intended, and that its carrying capacity has not been diminished by accumulations of debris and sediment or other hydraulic impediments. On piped systems the inlets must be inspected to ensure the rims are set at the proper elevation to optimize flow entry and are not clogged with leaves or other debris. The inlet basins are normally equipped with sumps which will remove large sediment particles from the flow stream with hooded outlets. The inlet basins may be equipped with oil absorbent sorbent booms which should be inspected for saturation. Once the boom becomes saturated it will appear brown or black in color and will be ineffective at removing oils.

The level of sediment in the sumps should be checked to assure their effectiveness. Pipelines connecting the inlets should be checked to determine if siltation is occurring. This will be most critical on drain lines laid at minimal slopes. This can usually be accomplished by a light and mirror procedure.

In some projects most of the stormwater is carried in open swales, channels, or ditches. These conveyance channels may be rip rapped or vegetated, depending on the gradient and expected flow velocities. These facilities must be inspected to insure debris or sedimentation does not reduce their carrying capacity. Excess vegetative growth must also be noted. The surface protection

for the channels, either stone or vegetation, must be inspected to insure its integrity. Any areas subject to erosion should be noted.

Maintenance: Maintenance of the storm drainage system must assure that it continues to serve its design function on a long term basis, and that its operation does not transport excessive sedimentation to any downstream detention pond, or the receiving waters. Elevations on the rim of catch basins should be adjusted as needed to assure optimal water entry. Depending on the frost susceptibility of the soil, the rims may become elevated over time causing flow to circumvent the inlet. When the sump in an inlet restricts capacity and is half full with silt or other deleterious materials, the catch basin cleaning would normally be accomplished with vacuum trucks contracted as a maintenance service for the development center. The removed material must be disposed of at an approved site for such materials. The removed and replaced sorbent boom shall be disposed of in accordance with local and state regulations.

If sediment in the pipeline exceeds 20% of the diameter of the pipe, it should be removed. This may be accomplished by hydraulic flushing, or by mechanical means. If hydraulic flushing is used the downstream conditions should be analyzed. In general a sump or sediment trap should be used where it can be flushed into the underground detention pond, since it will reduce pond volume and hasten the time when it must be cleaned.

Frequency: The piped drainage system should be inspected on an annual basis. Adjustment of inlet rim elevations should be on an as needed basis. Cleaning catch basin sumps and pipelines will depend on the rate of accumulation.

Maintenance/Inspection Responsibility:

Maintenance Personnel: Outside agent appointed by Forefront Partners I, LP.

Special Services: The owner will elect to contract with an independent agent for cleaning catch basins, sumps, pipelines, and replacement of sorbent booms. Remedial source control measures may be performed by the owner or an outside service depending upon the nature of the particular situation.

Comments: Maintenance of inlets is critical on this project.

A WELL STABILIZED VEGETATED SWALE SHOWS LITTLE SIGNS OF EROSIVE VELOCITIES OR FLOWS. THIS SWALE ALSO FUNCTIONS AS A POND SPILLWAY

E. JELLYFISH® FILTER

Preface: The primary purpose of the Jellyfish Filter is to capture and remove pollutants from stormwater runoff. As with any filtration system, these pollutants must be removed to maintain the filter's maximum treatment performance. Regular inspection and maintenance are required to insure proper functioning of the system.

It is recommended that Jellyfish Filter inspection and maintenance be performed by professionally trained individuals, with experience in stormwater maintenance and disposal services. Maintenance procedures may require manned entry into the Jellyfish structure. Only professional maintenance service providers trained in confined space entry procedures should enter the vessel. Procedures, safety and damage prevention precautions, and other information, included in these guidelines, should be reviewed and observed prior to all inspection and maintenance activities.

Inspection: Inspection of the Jellyfish Filter is key in determining the maintenance requirements for, and to develop a history of the site's pollutant loading characteristics. In general, inspections should be performed at the times indicated below; or per the approved project stormwater quality documents (if applicable), whichever is more frequent.

- Post-construction inspection is required prior to putting the Jellyfish Filter into service. All construction debris or construction-related sediment within the device must be removed, and any damage to system components repaired.
- A minimum of two inspections during the first year of operation to assess the sediment and floatable pollutant accumulation, and to ensure proper functioning of the system.
- Inspection frequency in subsequent years is based on the inspection and maintenance plan developed in the first year of operation. Minimum frequency should be once per year. Inspection is recommended after each major storm event.
- Immediately after an upstream oil, fuel or other chemical spill.

Inspection activities are typically conducted from surface observations and include:

- Observe if standing water is present
- Observe if there is any physical damage to the deck or cartridge lids
- Observe the amount of debris in the Maintenance Access Wall (MAW)

The following procedure is recommended when performing inspections:

- Provide traffic control measures as necessary.
- Inspect the MAW for floatable pollutants such as trash, debris, and oil sheen.
- Measure oil and sediment depth by lowering a sediment probe through the

MAW opening until contact is made with the floor of the structure. Retrieve the probe, record sediment depth, and presences of any oil layers and repeat in multiple locations within the MAW opening. Sediment depth of 12 inches or greater indicates maintenance is required.

- Inspect cartridge lids. Missing or damaged cartridge lids to be replaced.
- Inspect the MAW, cartridge deck, and backwash pool weir, for cracks or broken components. If damaged, repair is required.
- Dry weather inspections: inspect the cartridge deck for standing water.
  - No standing water under normal operating condition.
  - Standing water inside the backwash pool, but not outside the backwash pool, this condition indicates that the filter cartridges need to be rinsed.
  - Standing water outside the backwash pool may indicate a backwater condition caused by high water elevation in the receiving water body, or possibly a blockage in downstream infrastructure.
- Wet weather inspections: observe the rate and movement of water in the unit. Note the depth of water above deck elevation within the MAW.
  - Less than 6 inches, flow should be exiting the cartridge lids of each of the draindown cartridges (i.e. cartridges located outside the backwash pool).
  - Greater than 6 inches, flow should be exiting the cartridge lids of each of the draindown cartridges and each of the hi-flo cartridges (i.e. cartridges located inside the backwash pool), and water should be overflowing the backwash pool weir.
  - 18 inches or greater and relatively little flow is exiting the cartridge lids and outlet pipe, this condition indicates that the filter cartridges are occluded with sediment and need to be rinsed.

Maintenance: Maintenance frequencies and requirements are site specific and vary depending on pollutant loading. Maintenance activities may be required in the event of an upstream chemical spill or due to excessive sediment loading from site erosion or extreme runoff events. It is a good practice to inspect the system after major storm events. Recommended maintenance activities typically include:

- Removal of oil, floatable trash and debris.
- Removal of collected sediments.
- Rinsing and re-installing the filter cartridges.
- Replace filter cartridge tentacles, as needed.

Required maintenance for the Jellyfish Filter is based upon results of the most recent inspection, historical maintenance records, or the site specific water quality management plan; whichever is more frequent. In general, maintenance requires some combination of the following:

- Sediment removal for depths reaching 12 inches or greater, or within 3 years of the most recent sediment cleaning, whichever occurs sooner.
- Floatable trash, debris, and oil must be removal.
- Filter cartridges rinsed and re-installed as required by the most recent inspection results, or within 12 months of the most recent filter rinsing, whichever occurs sooner.
- Replace filter cartridge if rinsing does not remove accumulated sediment from the tentacles, or if tentacles are damaged or missing. It is recommended that tentacles should remain in service no longer than 5 years before replacement.
- Damaged or missing cartridge deck components must be repaired or replaced as indicated by results of the most recent inspection.
- The unit must be cleaned out and filter cartridges inspected immediately after an upstream oil, fuel, or chemical spill. Filter cartridge tentacles should be replaced if damaged by the spill.

The following procedures are recommended when maintaining the Jellyfish Filter:

- Provide traffic control measures as necessary.
- Open all covers and hatches. Use ventilation equipment as required, according to confined space entry procedures.
- Caution: Dropping objects onto the cartridge deck may cause damage. Perform Inspection Procedure prior to maintenance activity.
- To access the cartridge deck for filter cartridge service, descend the ladder and step directly onto the deck. Caution: Do not step onto the maintenance access wall (MAW) or backwash pool weir, as damage may result. Note that the cartridge deck may be slippery.
- Filter Cartridge Rinsing Procedure
    - Remove a cartridge lid.
    - Remove the cartridge from the receptacle using the lifting loops in the cartridge head plate. Caution: Should a snag occur, do not force the cartridge upward as damage to the tentacles may result. Rotate the cartridge with a slight sideways motion to clear the snag and continue removing the cartridge.
    - Thread a rope or cord through the lifting loops and lift the filter cartridge from the cartridge deck to the top surface outside the structure.
    - Caution: Immediately replace and secure the lid on the exposed empty receptacle as a safety precaution. Never expose more than one empty cartridge receptacle.
    - Repeat the filter cartridge removal procedure until all of the cartridges are located at the top surface outside the structure.
    - Disassemble the tentacles from each filter cartridge by rotating counter-clockwise. Remove the tentacles from the cartridge head plate.

- Position a receptacle in a plastic tub or garbage can such that the rinse water is captured. Using a low-pressure garden hose sprayer, direct a wide-angle water spray at a downward 45° angle onto the tentacle membrane, sweeping from top to bottom along the length of the tentacle. Rinse until all sediment is removed from the membrane. Caution: Do not use a high pressure sprayer or focused stream of water on the membrane. Excessive water pressure may damage the membrane.
- Remove rinse water from rinse tub or garbage can using a vacuum hose as needed.
- Slip the O-ring over the pipe nipple on the top end of the tentacle and reassemble onto the cartridge head plate; hand tighten.
- If rinsing is ineffective in removing sediment from the tentacles, or if tentacles are damaged, provisions must be made to replace the spent or damaged tentacles with new tentacles. Contact Contech to order replacement tentacles.
- Lower a rinsed filter cartridge to the cartridge deck. Remove the cartridge lid on a receptacle and carefully lower the filter cartridge into the receptacle until the head plate gasket is seated squarely on the lip of the receptacle. Caution: Should a snag occur when lowering the cartridge into the receptacle, do not force the cartridge downward; damage may occur. Rotate the cartridge with a slight sideways motion to clear the snag and complete the installation.
- Replace the cartridge lid on the exposed receptacle. Check the fit before completing rotation to a firm hand-tight attachment. Rinse away any accumulated grit from the receptacle threads if needed to get a proper fit.
- Repeat cartridge installation until all cartridges are installed.

- Vacuum Cleaning Procedure
  - Caution: Perform vacuum cleaning of the Jellyfish Filter only after filter cartridges have been removed from the system. Access the lower chamber for vacuum cleaning only through the maintenance access wall (MAW) opening, being careful not to damage the flexible plastic separator skirt that is attached to the underside of the deck. The separator skirt surrounds the filter cartridge zone, and could be torn if contacted by the wand. Do not lower the vacuum wand through a cartridge receptacle, as damage to the receptacle will result.
  - To remove floatable trash, debris, and oil, lower the vacuum hose into the MAW opening and vacuum floatable pollutants off the surface of the water. Alternatively, floatable solids may be removed by a net or skimmer.
  - Using a vacuum hose, remove the water from the lower chamber to the sanitary sewer, if permitted by the local regulating authority, or into a separate containment tank.
  - Remove the sediment from the bottom of the unit through the MAW opening.

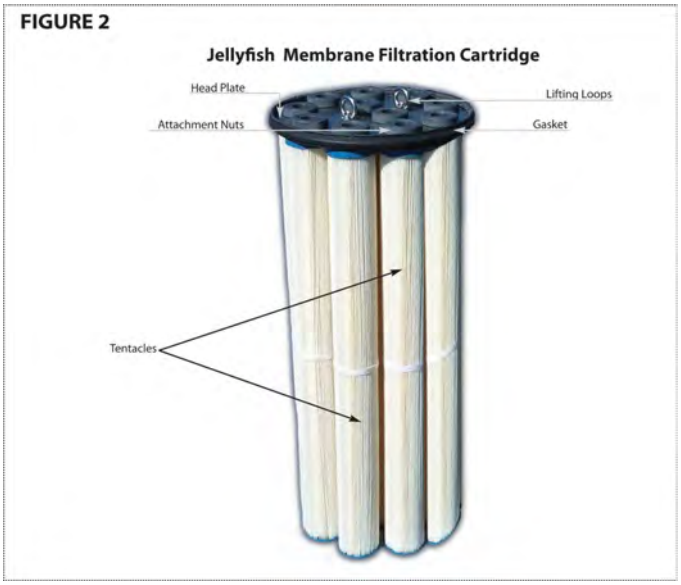
- For larger diameter Jellyfish Filter manholes (8-ft, 10-ft, 12-ft diameter), complete

  sediment removal may be facilitated by removing a cartridge lid from an empty receptacle and inserting a jetting wand (not a vacuum wand) through the receptacle. Use the sprayer to rinse loosened sediment toward the vacuum hose in the MAW opening, being careful not to damage the receptacle.

- After the unit is clean, re-fill the lower chamber with water if required by the local jurisdiction, and re-install filter cartridges.

- Dispose of sediment, floatable trash and debris, oil, spent tentacles, and water according to local regulatory requirements.

- Chemical Spills
  - Caution: If a chemical spill has been captured by the Jellyfish Filter, do not attempt maintenance. Immediately contact the local hazard response agency, and contact Contech Engineered Services.



Below is a cut-away schematic of the Jellyfish Filter manhole with key components identified (6-ft. diameter manhole is depicted):

The Jellyfish Filter has no moving parts to wear out and therefore maintenance activities are generally focused on pollutant removal and filter cartridge service.

Below is a schematic of a Jellyfish Filter membrane filtration cartridge. Tentacles can be easily removed from the head plate and rinsed or replaced as needed.

FIGURE 2

Frequency: The Jellyfish Filter should be inspected a minimum of 2 times during the first year of operation and a minimum of once per year in subsequent years. Inspection is also recommended after each major storm event or immediately after an upstream oil, fuel or other chemical spill.

Maintenance/Inspection Responsibility:

Inspection Personnel: It is recommended that Jellyfish Filter inspection and maintenance be performed by professionally trained individuals, with experience in stormwater maintenance and disposal services. Maintenance procedures may require manned entry into the Jellyfish structure. Only professional maintenance service providers trained in confined space entry procedures should enter the vessel. Procedures, safety and damage prevention precautions, and other information, included in these guidelines, should be reviewed and observed prior to all inspection and maintenance activities.

Replacement Parts/Repairs: Jellyfish Filter cartridges, replacement tentacles, cartridge lids, and other system components can be ordered by contacting: Contech Engineered Solutions, 1-800-548-4667.

Comments: The benefits of regular inspection and maintenance are many from ensuring maximum operation efficiency, to keeping maintenance costs low, to the continued protection of natural waterways and provide the key to the Jellyfish Filter's long and effective service life.

F. PRETREATMENT SOLIDS REMOVAL (WATER QUALITY UNITS)

Preface: Certain vendors provide pre-manufactured systems which are effective in removal of suspended sediment particularly sand used for winter maintenance. Some of the units operate on a vortex principal with the sediment being swept from the stormwater stream and stored in the base of the unit. Other units are long linear units designed in accordance with Stokes Law. The units are constructed of durable materials requiring little maintenance of the physical component and typically are accessible via an at grade manhole cover.

The vendor of the unit should provide information on suggested maintenance which should be appended to this manual.

These units typically do not remove nutrients, metals, and dissolved materials.

Inspection: Most water quality units have an access manhole cover for inspection. The sediment storage zone is the bottom of the system and lies below the vortex in this type of unit or along the bottom. Because of the depth, a pole staff, or sludge judge is helpful in determining the depth of the sediment. Inspection should comply with applicable confined space regulations and vendor recommendations. Oil and floatables are also trapped in certain devices and should be removed.

Maintenance: The typical unit maintenance is the removal of sediment. Stantec Consulting Services Inc. typically recommends the units be inspected in the spring and late fall with adjustments based on historic operating experience.

The vendor may have specific scheduled maintenance schedules which should be followed.

The structural components of the system are principally stainless steel, concrete, and or climate resistant plastics.

Frequency: Twice per year or as outlined above.

Applicability: This system has three water quality units. The three linear units are in Zone A upstream of the underground sand filter.

Special Notes: These units are designed for a specific flow and catchment area. If the contributing watershed is increased, the need for design modifications or supplements to the water quality units should be examined.

G. IN-LINE STORAGE (UNDERGROUND DETENTION)

Preface: In-line storage may be used for storage of water ahead of treatment systems, or for buried underdrained filters. Because of the difficulty in access for inspection and maintenance, the units will be preceded with pretreatment to remove sediment.

The underground storage systems for this project include StormTech® chamber system for detention ahead of water quality treatment units or underground sand filter.

In-line storage systems typically have a restrictive outlet when used for detention. This outlet is a separate downstream appurtenance with orifices, weirs, and overflows.

Specific design cautions should be considered if in-line storage is used as part of a stormwater management system. In-line storage systems have multiple inspection ports. The locations should consider the need for confined space entry.

Inspection*:* Inspection of in-line storage systems should follow all protocols for confined space entry. Inspections should include:

- Observations of standing water and monitoring drainage to make sure drainage is achieved 72 hours after a rainfall of 1 inches or greater (annually) for Jellyfish® filter systems and 48 hours for underground sand filters.
- Sedimentation
- Outlet Controls
- Inlets
- Inspection of each isolated tank series, run of pipe, distribution of manhole, and header pipe

Maintenance*:* Maintenance of in-line storage systems will vary depending upon the extent of pretreatment, the nature of the receiving bodies, and the design. Leakage, accumulated sediment, and repairs of any damaged portion of the system should be performed immediately upon discovery.

Maintaining Responsibility: A contract for third party maintenance needs to be established before occupancy.

Frequency*:* After successful operation of the in-line storage system for one year or two major storms (whichever is longer), quarterly inspections are recommended except the drawdown test after a one-inch rain may be annually only. Maintenance repairs should be performed as soon as possible. The Site Location of Development Permit will require recertification on a periodic basis as stipulated by the permit conditions.

Applicability*:* Underground detention will be employed on this project

H. FILTERRA® TREE BOX FILTERS

Preface: The Filterra® units consist of a concrete container with an underdrain at the base, proprietary filtration media, a top layer of mulch and plants specifically selected for nutrient transformation and uptake. Access is provided through a surficial tree grate. Water enters through a curb inlet and discharges through the underdrain at the base of the tank. The Filterra® tree box type soil filter is installed upstream of an overflow catch basin.

Inspection:
Inspection of the Filterra® unit should include review of the health and condition of the plant material, the surficial mulch for

degradation and accumulation of debris and litter, and the curb inlet for clogging and debris.

Maintenance: Prune plant material during the spring and fall and replace top layer of mulch annually. The first year's maintenance shall be provided by the Manufacturer to ensure the systems are operating as intended. Ongoing inspection and maintenance shall be performed by a professional with knowledge of erosion and stormwater control, including a working knowledge of the Filterra®.

Frequency: Inspect quarterly and at any time when sustained ponding is observed near the inlet.
Maintenance/Inspection Responsibility: A third party inspection company with knowledge of stormwater controls, including a working knowledge of the Filterra® system.

Maintenance Personnel: An outside agent of Forefront Partners I, LP.

Comments: Maintenance of units are critical on this project to prevent short term clogging and replacement.

Applicability: There are several Filterra® units for the project.

I. SORBENT BOOMS

Preface: During construction, sorbent booms will be installed in the catch basins which have pavement areas. The intent of these is to absorb oil and runoff from new pavement surfaces. These will be removed and replaced when construction of the project is complete and should be inspected quarterly for the first year and annually thereafter.

Inspection: The sorbent boom should be raised out of the inlet, inspected, and replaced if necessary. Inspection should occur for the first year and annually thereafter concurrent with the catch basin cleaning.

Recommendation: It is recommended this project have additional sorbent booms or pillows onsite in the event of an unexpected spill or if oil sheen is observed frequently on any inlet.

Maintenance: The inspection and replacement should be conducted as part of a third party O&M contract and require disposal of used sorbent booms as "special wastes".

J. PARKING LOT CLEANING

To protect the catch basin sediment sumps, underground storage, Filterra® tree box, and Jellyfish® filter, it is recommended the parking lot be swept at mid winter and spring and that power washing with an appropriate vacuum/power wash vehicle be done once a year.

Maintenance: It is recommended this service be contract with the firm that maintains lawns and landscaping.

K. LITTER

Litter should be removed as a matter of course by workers and a part of the grounds maintenance contract.

L. SUMMARY CHECKLIST

The above described inspection and maintenance items have been summarized on a checklist appended hereto as Appendix C.

IV. PROGRAM ADMINISTRATION

A. GENERAL

A reliable administrative structure must be established to assure implementation of the maintenance programs described in the foregoing section. Key factors that must be considered in establishing a responsive administrative structure include:

1. Administrative body must be responsible for long-term operation and maintenance of the facilities.

2. Administrative body must have the financial resources to accomplish the inspection and maintenance program over the life of the facility.

3. The administrative body must have a responsible administrator to manage the inspection and maintenance programs.

4. The administrative body must have the staff to accomplish the inspection and maintenance programs, or must have authority to contract for the required services.

5. The administrative body must have a management information system sufficient to file, retain, and retrieve all inspection and maintenance records associated with the inspection and maintenance programs.

If any of the above criteria cannot be met by the entity assigned inspection and maintenance responsibilities, it is likely that the system will fail to meet its water quality objectives at some point during its life. While each of the above criteria may be met by a variety of formats, it is critical to clearly establish the assigned administrative body in a responsible and sustainable manner.

B. RECORD KEEPING

Records of all inspections and maintenance work accomplished must be kept and maintained to document facility operations. These records should be filed and retained for a minimum 5-year time span. The filing system should be capable of ready retrieval of data for periodic reviews by appropriate regulatory bodies. Where possible, copies of such records should also be filed with the designated primary regulatory agency for their review for compliance with permit conditions. Typical inspection and maintenance record forms are attached hereto as Appendix B.

C. CONTRACT SERVICES

In some instances or at specific times, the Maintenance Personnel may not have the staff to conduct the required inspection and/or maintenance programs as outlined in this document. In such cases the work should be accomplished on a contractual basis with a firm or organization that has the staff and equipment to accomplish the required work.

The service contract for inspection and maintenance should be formal, well written legal document which clearly defines the services to be provided, the contractual conditions that will apply, and detailed payment schedules. Liability insurance should be required in all contracts.

Phone: 207-747-5288 ext 5 Fax: 207-747-5288 E-mail: bo@placemakerpartners.com

Note: Consultants and Developers should allow +/- 15 days, for capacity status, prior to Planning Board Review.

3. Please, Submit Domestic Wastewater Design Flow Calculations.

Estimated Domestic Wastewater Flow Generated: 38,670 GPD

Peaking Factor/ Peak Times: 6/ Morning Hours

Specify the source of design guidelines: *(i.e. "Handbook of Subsurface Wastewater Disposal in Maine," __ "Plumbers and Pipe Fitters Calculation Manual," __ Portland Water District Records, Other (specify)* Maine Subsurface Disposal Rules

Note: Please submit calculations showing the derivation of your design flows, either on the following page, in the space provided, or attached, as a separate sheet.

4. Please, Submit External Grease Interceptor Calculations.

Total Drainage Fixture Unit (DFU) Values: N/A

Size of External Grease Interceptor: N/A

Retention Time: N/A

Peaking Factor/ Peak Times: N/A

Note: In determining your restaurant process water flows, and the size of your external grease interceptor, please use The Uniform Plumbing Code. Note: In determining the retention time, sixty (60) minutes is the minimum retention time. Note: Please submit detailed calculations showing the derivation of your restaurant process water design flows, and please submit detailed calculations showing the derivation of the size of your external grease interceptor, either in the space provided below, or attached, as a separate sheet.

5. Please, Submit Industrial Process Wastewater Flow Calculations

Estimated Industrial Process Wastewater Flows Generated: N/A GPD

Do you currently hold Federal or State discharge permits? Yes ____ No ____

Is the process wastewater termed categorical under CFR 40? Yes ____ No ____

OSHA Standard Industrial Code (SIC): *(http://www.osha.gov/oshstats/sicser.html)*

Peaking Factor/Peak Process Times: _____

Note: On the submitted plans, please show where the building's domestic sanitary sewer laterals, as well as the building's industrial-commercial process wastewater sewer laterals exits the facility. Also, show where these building sewer laterals enter the city's sewer. Finally, show the location of the wet wells, control manholes, or other access points; and, the locations of filters, strainers, or grease traps.

Note: Please submit detailed calculations showing the derivation of your design flows, either in the space provided, or attached, as a separate sheet.

Proposed and Existing Forefront at Thompson's Point Development

---

Hello Rob,

I'm writing on behalf of Cathartes, a development group partnering with Forefront Partners to construct a 255 Unit Multi-Family residential building (referred to as Building G on the updated Master Development Plan) in the North westerly corner of the Subdivision Plan. Development on Lot 17 of the Sectional 4 Subdivision Plat, anecdotally referred to as the "Panhandle", is being developed in accordance with the Master Development Plan and Subdivision Plan approved on or about 2014 and 2015, respectively. This portion of the project will be submitted for the Planning Authority and Planning Board review as part of a Major Site Plan Application.

I have enclosed some Draft plans, the City's Wastewater Application, and peak domestic water flow spreadsheet for review and consideration in advance of the imminent Site Plan Application Submission. I am also sending this information to the City of Portland Wastewater Department for their Review.

I am seeking an updated "Ability To Serve" letter from all utilities at this time. If your department can provide the applicant with this level of assurances, we will continue to work with the Department on the design details over the course of the Site Plan Review.

Please contact me if you have any questions.

Sincerely,

Bo Kennedy P.E.
Project Manager/Engineer

Re: Ability to Serve for 125 Thompson's Point Rd, Portland ME

Dear Bo,

Thank you for your interest in using natural gas for the above referenced project.

This is to confirm that natural gas can be made available from our distribution system to serve your proposed project.

Any improvements to the existing distribution system that are necessary to provide this service, as well as the design of the gas system in the project itself, will be established as the overall design and scope of your project progresses.

All work necessary to provide service will be performed in accordance with the Maine Public Utilities Commission requirements.

If you have any further questions or require additional information, please contact me directly at (207) 541-2536 or email at morrisons@unitil.com.

Sincerely,

Sara Morrison

RE: 125 Thompson's Point Road in Portland
Letter of Ability to Serve Request

SAP: 10301097388
Project Description:

The proposed development includes 255-unit residential building and approximately 455 car structured garage with Electric Vehicle charging located at 125 Thompson's Point Road, Portland, ME 04102. The proposed residential development is expected to provide 255 units consisting of Studio, 1 bedroom, 2 bedroom, and 3-bedroom apartments with commons areas and amenities.

CMP has the ability to serve the proposed project in accordance with our CMP Handbook (web link below). We can provide you the desired pad or pole mounted transformers per your request and city approval, in accordance with our CMP Handbook of Standard Requirements. If you have any questions on the process, or need help in completion of the documents, please contact CMP at 800-565-3181.

Here is our typical process for getting your three phase or CT rated single phase service installed. If you have any questions, please let us know. The underlined links will redirect you to the appropriate site for additional information.

Service Milestones for Three Phase Services and CT Rated Single Phase Services. There are additional requirements for primary metered Solar Service Installations listed in the Chapter 324 Interconnections section below. Please refer to CMP Installation Checklists for other installations.

- Call 800-750-4000 option 4 to establish a new account (if needed) and an SAP work order. Please provide both of these to me.
- Submit Load information. Please complete the attached EDET (excel file) using load information. Please complete this and email back to me. If the loads are over 500 kw, more in depth load studies may be required with our Distribution Planning and Transmission Planning Departments. Be advised that these will involve more detailed load information, a load study agreement (signed contract), as well as other items. This additional study process may add up to two additional months to completion of the job.

- Submit the easement information worksheet, including where any CMP structures may be on ANY private property (Poles, Wires, Anchors). You are responsible for obtaining all information for all required easements. Please complete this form and either email or fax back to me.
- Submit any electronic drawings (PDF (preferred) or DWG files) of the site layout and proposed electrical connections.
- For Primary Metered installations (including PV), please have the access road in for pole staking.
- Preliminary meetings with CMP Advisor and Engineer to determine details of job (I will need to schedule with your electrician/contractor-please let me know who this is)
- Field planner design appointment scheduled once the preliminary information is complete. This will allow us to cost out the job and develop a CMP Invoice. The invoice is typically generated 5-6 weeks after the design appointment. This expires after 90 days from the invoice date.
- Submit completed W9 so that your bill can be properly processed. This is a new CMP process.
- CMP submits invoice to the customer for payment (typically via email). Payment received from customer.
- Easements (based on easement information worksheet) sent out, signed and originals returned to CMP.
- Job scheduled for completion after the electrical inspection has been received.

This process can take several months, depending upon several factors including transformer or materials delivery, return of completed paperwork, and other jobs in the system that may be ahead of yours. In addition, contact with the other utilities, including telephone and cable, should be commenced as soon as practical. They may have additional work or charges in addition to the CMP work required to bring your project on line.

As you may be aware, there are global supply chain issues impacting the utility industry. CMP is closely monitoring and managing their inventory in order to serve our customers. Larger padmount transformers may not be readily available for the date that you will need to be energized. Please consider this as part of your construction plan. The energy service advisor will continue to work closely with you and let you know as soon as the transformer becomes available. Should you have any questions or concerns throughout this process, please do not hesitate to contact your ESA directly at the number or email provided.

Please complete the attached forms (the specific instructions are on each form). Please email them at your earliest convenience. If you are returning an Easement Form, a 1190 or State Permit please be sure to send those documents to lineclerknewservice@cmpco.com, All W9's should be sent to gettingconnected@cmpco.com. All other forms including the EDET (load sheet) and technical information should be sent to me.

For your convenience, here is a link to the CMP Website which contains our Handbook with details on most service requirements: CMP Handbook of Standard Requirements An additional resource is our Distribution Construction Standards: CMP Distribution Construction Standards CMP Distribution Construction Standards.

You will be responsible for installing the customer connections, conduits, and metering in accordance with the CMP Handbook of Standard Requirements The transformer will be sized based on your submitted load sheets.

Your deposit amount will be typically based on an estimated two month bill, calculated from your completed load sheet unless otherwise determined by CMP.

In addition, we have recently added on an online map that shows single phase and three phase power locations within CMP. Here is that link: CMP ArcGIS Information

Metering:

All metering (including locations) must be preapproved by CMP. If you have any questions, please consult the CMP Handbook of Standard Requirements

Chapter 324 Interconnections:

Please be advised that if you plan to install solar/wind/hydro generation, you must complete an application under the MPUC mandated Chapter 324 Interconnection Standards. If you go to Chapter 324 Interconnection Standards and follow the instructions for the Small Generator Interconnection Procedures, CMP can do this work in parallel to your service request that will be handled by me. If you project is under 660 KW You will be able to have a Customer Net Energy Billing contract. Information concerning Customer Net Energy Billing can be accessed thru the Chapter 324 website or by clicking here: Net Energy Billing

Reallocation/Line Extensions:

Recently, changes were made to the three-phase construction policy, which require CMP to reallocate construction costs paid by customers. If applicable, those projects identified as "developments" do not qualify for reallocation of funds. Please see this document at our website for details about the reallocation conditions. Any reallocation charges will be specifically denoted on your invoice. The website address for this is: PolyphaseLineExtension.

This line extension will be part of Central Maine Power's distribution system. In the event the property served under this Agreement is sold or otherwise conveyed, all rights and obligations of the Agreement shall stay with the property. Please note that if you rent or lease this property to another and you want to receive the reimbursement payments, you must make special arrangements with the Central Maine Power Company. Otherwise, any reimbursement payments will be sent to the "Customer" taking service at the service location.

Electricity Supplier Information:

Central Maine Power Company (CMP) will provide your facility with electric delivery service. If you don't already have a provider, you will need to make arrangements with a competitive electricity provider in order to receive electricity supply for your facility. In the event you fail to choose a

competitive electricity provider, you will receive Standard Offer service arranged by the Maine Public Utilities Commission. If you wish to be served by a competitive electricity provider immediately upon establishment of delivery service, you must arrange for this service directly through your chosen competitive electricity provider, who must enroll your account no later than 5 PM on the business day prior initiation of delivery service by CMP. An up-to-date list of competitive suppliers can be found at the:

1. Maine Public Utilities Commission (MPUC) web site- **Maine PUC**
2. By calling the MPUC at (207) 287-3831

12. A code summary shall be included referencing NFPA 1 and all fire department. Technical standards.
    See Plan Sheet C9.0 (Fire Safety Plan)

Some structures may require Fire flows using annex H of NFPA 1

3. CODE SUMMARY PER NFPA 1 AND FIRE DEPT. TECHNICAL STANDARDS FOR PROPOSED MULTI-FMILY HOUSING

FIRE/BUILDING CODES:

-THE BUILDING WILL BE DESIGNED IN ACCORDANCE WITH THE CITY BUILDING CODE, AS WELL AS ALL APPLICABLE LOCAL, STATE, AND FEDERAL CODES/LAWS. THE BUILDING WILL BE FULLY SPRINKLERED IN ACCORDANCE WITH NFPA 13, AND WILL HAVE FIRE DETECTION/ALARM SYSTEMS AS DICTATED BY NFPA 72 AND THE UNDERLYING CODES.

TECHNICAL STANDARD 3.2 - FIRE HYDRANTS:

-THERE IS (1) MUNICIPAL FIRE HYDRANT AND (2) PROPOSED PRIVATE HYDRANT LOCATED WITHIN 500 FEET RADIUS OF THE BUILDING. PLEASE SEE THE ATTACHED FIRE SAFETY COMPLIANCE PLAN C-9.0.

TECHNICAL STANDARD 3.3 - SINGLE AND TWO FAMILY RESIDENTIAL DEVELOPMENT:

-MULTI-FAMILY BUILDING WILL BE FULLY SPRINKLERED

TECHNICAL STANDARD 3.4 - SITE ACCESS STANDARDS:

3.4.1. - PRIVATE ROAD PROVIDES TURNAROUND DESIGNED TO ACCOMODATE 45' LADDER TRUCK

3.4.2. - FIRE DEPARTMENT ACCESS IS PROVIDED VIA THOMPSON'S POINT ACCESS ROAD AND A PRIVATE DRIVE FOR ACCESS TO 2 SIDES OF THE BUILDING.

3.4.3. - ZONING DOES NOT REQUIRE BUILDING SETBACKS

3.4.4. - FIRE DEPARTMENT ACCESS ROADS EXTEND TO WITHIN 50' OF ENTRANCES TO BUILDING

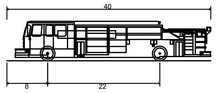
3.4.5. - ALL SITE ACCESS PROVIDES NO LESS THAN 9 FEET IN CLEARANCE HEIGHT.

3.4.6. - ALL ELEVATORS WILL ACCOMMODATE AN 80 X 24 STRETCHER.

3.4.7. - THE STREET NUMBERING AND 911 ADDRESS HAS BEEN REVIEWED AND APPROVED BY THE CITY OF PORTLAND PUBLIC WORKS.

3.4.8. - THE BUILDING WILL DISPLAY THE ASSIGNED STREET NUMBERS. ANTICIPATED 911 ADDRESS IS 125 THOMPSON'S POINT ROAD.

TECHNICAL STANDARD 3.5 - STANDARDS FOR EMERGENCY ACCESS LANES AND GATES:



ALL ACCESS ROADS EXCEED 16' IN WIDTH AND ROAD RADIUS CAN ACCOMMODATE A 40' LONG FIRE TRUCK

TECHNICAL STANDARD 3.6 - SUBDIVISION STANDARDS:

APPROVED SUBDIVISION WITH 1 ACCESS ROAD

TECHNICAL STANDARDS 3.7 THROUGH 3.11 - STANDARDS FOR BLASTING AND REGULATION OF EXPLOSIVES:

-GEOTECHNICAL EXPLORATIONS WERE PERFORMED AND THE SUBSURFACE CONDITION DOES NOT CONTAIN BEDROCK. BASED ON THE FINDINGS, LARGE BLAST OPERATIONS ARE NOT ANTICIPATED.

APPENDIX B

EXPLORATION SUMMARY TABLES

EXPLORATION LOGS

SUMMIT
GEOENGINEERING SERVICES

Project Name: Forefront at Thompson's Point
Location: Portland, ME
Project Number: 24098
Dates: 5/20/24 to 5/23/24

EXPLORATION SUMMARY TABLE (BORINGS)

EXPLORATION NUMBER	SURFACE ELEVATION	FILL	MARINE DEPOSIT	REFUSAL DEPTH	GROUNDWATER DEPTH	NOTES
B-1	23.0	0 to 5	5 to 77	77	6.3	Probe refusal on probable bedrock
B-2	26.0	0 to 5	5 to 67	67	10.3	Probe refusal on bedrock
B-3	29.0	0 to 15	15 to 51	NE	11.0	No Refusal
B-4	40.0	0 to 20	20 to 22	NE	5.5	No Refusal
B-5	11.3	0 to 5	5 to 22	NE	11.3	No Refusal
B-6	26.0	0 to 1	10 to 24	NE	5.0	No Refusal
B-7	24.0	0 to 5	5 to 31	NE	5.0	No Refusal
B-8	23.0	0 to 2	2 to 31	NE	11.0	No Refusal
B-9	23.0	0 to 5	5 to 24	NE	5.0	No Refusal

NOTES:

1.) Test borings were performed by Summit Geoengineering Services on May 20th to May 23rd, 2024 using a 9580 VTR ATV Drill Rig.

2.) Explorations were field located by SGS by measuring off existing site features.

3.) Surface elevations are estimated using 1-ft contours provided on the Conceptual Grading Plan, The Forefront at Thompson's Point Residential Building prepared by Placemaker Partners, LLC dated February, 2024.

4.) Groundwater is based upon measured depth within open borehole upon completion.

GEOENGINEERING SERVICES

Project Name: Forefront at Thompson's Point
Location: Portland, ME
Project Number: 24098
Dates: 5/17/24

EXPLORATION SUMMARY TABLE (TEST PITS)

EXPLORATION NUMBER	SURFACE ELEVATION	FILL	MARINE DEPOSIT	REFUSAL DEPTH	GROUNDWATER DEPTH	NOTES
TP-1	43.0	0.5 to 10	10 to 11.5	NE	9.8	Hole caved to 8', Reworked Native
TP-2	38.0	0 to 7.5	7.5 to 10	10	7.5	Refusal on Concrete/Cement Rubble
TP-3	37.0	0 to 9	9 to 10	NE	8.5	Hole caved to 7', Reworked Native
TP-4	35.0	0.5 to 7	7 to 9.5	NE	7.5	Hole caving. Reworked Native
TP-5	27.0	0.5 to 11.5	NE	NE	10.0	No Refusal
TP-6	27.0	0 to 1.5	1.5 to 11.8	NE	8.4	No Refusal
TP-7	24.0	0 to 3	3 to 12	NE	9.0	No Refusal
TP-8	22.0	0 to 2.3	2.3 to 12	NE	5.0	No Refusal
TP-9	23.0	0 to 1.5	1.5 to 12	NE	9.0	No Refusal
TP-10	24.0	0 to 2.5	2.5 to 12	NE	9.0	No Refusal
TP-11	23.0	0 to 2	2 to 11.8	NE	9.5	No Refusal
TP-12	22.0	0.2 to 3	3 to 12	NE	7.0	No Refusal

NOTES:

1.) Test pit explorations were performed by Summit Geoengineering Services on May 17th, 2024 using a Kubota KX040 rubber track excavator. Test pits were excavated to a depth of 10 to 12 feet below ground surface (BGS).

2.) Explorations were field located by SGS by measuring off existing site features.

3.) Surface elevations are estimated using 1-ft contours provided on the Conceptual Grading Plan, The Forefront at Thompson's Point Residential Building prepared by Placemaker Partners, LLC dated February, 2024.

4.) Groundwater is based upon measured sidewall seeage or depth within open test pits during excavation.

SUMMIT
GEOENGINEERING SERVICES

Project Name: Forefront at Thompson's Point
Location: Portland, ME

Project Number: 24098
Dates: 5/20/24 to 5/23/24

EXPLORATION SUMMARY TABLE (CPT)

EXPLORATION NUMBER	SURFACE ELEVATION	FILL	MARINE DEPOSIT	REFUSAL DEPTH	GROUNDWATER DEPTH	NOTES
CPT-1	32 +/-	0 to 15 +/-	15 to 75.6	76	21.3	Refusal on Probable Bedrock
CPT-2	26 +/-	0 to 15 +/-	16 to 63.3	63	7.6	Refusal on Probable Bedrock
CPT-3	36 +/-	0 to 18 +/-	18 to 81	81	6.8	Refusal on Probable Bedrock
CPT-4	27 +/-	0 to 5 +/-	5 to 45.2	45	7.3	Refusal on Probable Bedrock
CPT-5	25 +/-	0 to 5 +/-	5 to 68.8	69	7.3	Refusal on Probable Bedrock
CPT-6	24 +/-	0 to 3 +/-	3 to 75.3	75	5.7	Refusal on Probable Bedrock
CPT-7	23 +/-	0 to 10 +/-	10 to 88	88	5.8	Refusal on Probable Bedrock
CPT-8	22 +/-	0 to 2 +/-	2 to 76.5	77	9.7	Refusal on Probable Bedrock
CPT-9	22 +/-	0 to 3 +/-	3 to 75.9	76	5.5	Refusal on Probable Bedrock

NOTES:

1.) CPT explorations were performed by Summit Geoengineering Services on May 20th to May 23rd, 2024 using a 9500 VTR ATV Drill Rig. Piezocone penetration tests (CPT) were explored to a depth of push refusal ranging from 45.0 to 88.0 feet below ground surface (BGS).

2.) Explorations were field located by SGS by measuring off existing site features.

3.) Surface elevations are estimated using 1-ft contours provided on the Conceptual Grading Plan, The Forefront at Thompson's Point Residential Building prepared by Placemaker Partners, LLC dated February, 2024. Bedrock depths were measured from the ground surface to the nearest tenth of a foot. Accuracy of bedrock elevations published in the table above are limited by the accuracy of surface elevations.

4.) Groundwater is based upon measured depth within open CPT borehole upon completion.

SUMMIT GEOENGINEERING SERVICES	TEST PIT LOG	Test Pit # TP-1
	Project: Forefront at Thompson's Point Portland, Maine	Project #: 24098
		Groundwater: 9.8 ft
Contractor: Summit Geoengineering Services	Ground Surface Elevation: 43 ft	
Equipment: Kubota KX040-4	Reference: "Conceptual Grading Plan" by Placemarker Partners	
Summit Staff: J.Barnes, E.I.	Date: 5/17/2024	Weather: Sunny

Depth (ft)	DESCRIPTION	
	ENGINEERING	GEOLOGIC/GENERAL
	Brown Sandy SILT, rootlets, loose, humid, ML	TOSPSOIL
1	Dark brown SAND, some Silt,some to little Gravel,	0.5'
	ocassional brick pieces, loose, moist to damp, SM	FILL

EXPLORATION COVER SHEET

The exploration logs are prepared by the geotechnical engineer from both field and laboratory data. Soil descriptions are based upon the Unified Soil Classification System (USCS) per ASTM D2487 and/or ASTM D2488 as applicable. Supplemental descriptive terms for estimated particle percentage, color, density, moisture condition, and bedrock may also be included to further describe conditions.

Drilling and Sampling Symbols:

SS = Split Spoon Sample
UT = Thin Wall Shelby Tube
SSA = Solid Stem Auger
HSA = Hollow Stem Auger
RW = Rotary Wash
SV = Shear Vane
PP = Pocket Penetrometer
RC = Rock Core Sample
FV = Field Vane Shear Test
PS = Concrete Punch Sample
Hyd = Hydraulic Advancement of Drilling Rods
Push = Direct Push of Drilling Rods
WOH = Weight of Hammer
WOR = Weight of Rod
PI = Plasticity Index
LL = Liquid Limit
W = Natural Water Content
USCS = Unified Soil Classification System
Su = Undrained Shear Strength
Su(r) = Remolded Shear Strength

Water Level Measurements:

Water levels indicated on the boring logs are the levels measured in the boring at the times indicated. In pervious soils, the indicated elevations are considered reliable groundwater levels. In impervious soils, the accurate determination of groundwater elevations may not be possible, even after several days of observations. Groundwater monitoring wells may be required to record accurate depths and fluctuation.

Gradation Description and Terminology:

Boulders:	Over 12 inches	Trace:	Less than 5%
Cobbles:	12 inches to 3 inches	Little:	5% to 15%
Gravel:	3 inches to No.4 sieve	Some:	15% to 30%
Sand:	No.4 to No. 200 sieve	Silty, Sandy, etc.:	Greater than 30%
Silt:	No. 200 sieve to 0.005 mm		
Clay:	less than 0.005 mm		

Density of Granular Soils and Consistency of Cohesive Soils:

CONSISTENCY OF COHESIVE SOILS		DENSITY OF GRANULAR SOILS	
SPT N-value blows/ft	**Consistency**	**SPT N-value blows/ft**	**Relative Density**
0 to 2	Very Soft	0 to 4	Very Loose
2 to 4	Soft	5 to 10	Loose
5 to 8	Firm	11 to 30	Compact
9 to 15	Stiff	31 to 50	Dense
16 to 30	Very Stiff	>50	Very Dense
>30	Hard

LL = Liquid Limit, PI = Plastic Index, FV = Field Vane Test
Bedrock Joints Su = Undrained Shear Strength, Su(r) = Remolded Shear Strength
Shallow = 0 to 35 degrees
Dipping = 35 to 55 degrees
Steep = 55 to 90 degrees

Boulders = diameter > 12 inches, Cobbles = diameter < 12 inches and > 3 inches
Gravel = < 3 inch and > No 4, Sand = < No 4 and >No 200, Silt/Clay = < No 200

Soil Moisture Condition
Dry: S = 0%
Humid: S = 1 to 25%
Damp: S = 26 to 50%
Moist: S = 51 to 75%
Wet: S = 76 to 99%
Saturated: S = 100%

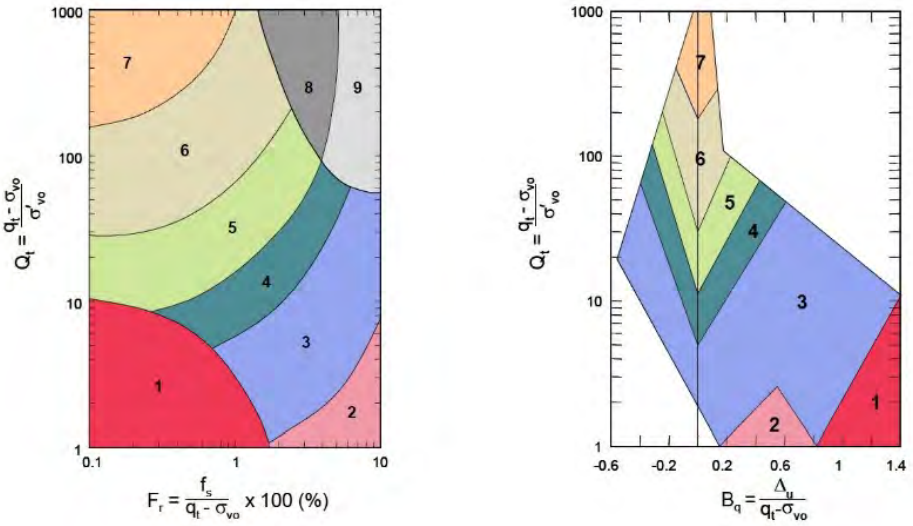
CPT EXPLORATION COVER SHEET



Piezocone penetration test (CPT) is performed by a cone on the end of a series of rods pushed into the ground at a constant rate (2 cm/s) to obtain near continuous measurements of soil parameters. Parameters obtained during the CPT test include cone tip resistance, sleeve friction, and piezocone pore pressure per ASTM D5778 and shear wave velocity per ASTM D7400. These parameters are presented graphically on the CPT log.

CPT Data Symbols:

q_c = Tip Resistance	u_2 = Pore Pressure	q_t = Total Resistance
f_s = Sleeve Friction	v_s = Shear Wave Velocity	c_h = Coefficient of Consolidation

Soil Behavior Type:

Soil behavior type is interpreted from CPT data as one of 9 soil behavior types published by Robertson et al. 1990, shown below. Each soil behavior type (SBT) is assigned a color which correlates to the SBT plot on the CPT log.

Zone	Soil Behavior Type
1	Sensitive, Fine Grained
2	Organic Soils-Peats
3	Clays; Clay to Silty Clay
4	Silt Mixtures; Clayey Silt to Silty Clay
5	Sand Mixtures; Silty Sand to Sandy Silt
6	Sands; Clean Sands to Silty Sands
7	Gravelly Sand to Sand
8	Very Stiff Sand to Clayey Sand*
9	Very Stiff Fine Grained*

*Overconsolidated or Cemented

THIN WALLED TUBE SAMPLING - ASTM D1587

PROJECT NAME:	The Forefront at Thompson's Point	PROJECT #:	24098
PROJECT LOCATION:	Thompson's Point, Portland, Maine	CLIENT:	Cathartes
COLLECTION DATE:	5/22/2024	SAMPLE #:	UT-1
TEST DATE:	6/3/2024	TECHNICIAN:	Colleen Sullivan, E.I.

Test Boring Information

Boring Number: B-1
Drilling Method: Rotary Wash
Drilling Tooling: 4-inch Casing
Sampling Method: Tube Push

Sample Information

Tube Length: 30"
Recovery: 28"
Tube Diameter: 3"
Depth: 15.5' - 18'

Trial / Specimen Number	Moisture Content	Unit Weight	Torvane
1*	32.2%	115 pcf	200 psf
2*	33.7%	112 pcf	300 psf
3	44.5%	111 pcf	500 psf
Average	36.8%	112 pcf	340 psf

* Specimen 1 & 2 performed on Clay w/ frequent Silt-Sand seams indicating lower moisture content

Visual Description (ASTM D2488):

Gray Silty CLAY, occasional Silt-Sand seams from 15.5' - 17.5', frequent Silt-Sand seams from 17.5' - 18', soft, wet, CL

APE Model D19-42 Single Acting Diesel Impact Hammer

D19-42 driving H-beam.

MODEL D19-42 (1.9 metric ton ram)

SPECIFICATIONS

Stroke at maximum rated energy	135 in (343 cm)
Maximum rated energy (Setting 4)	47,132 ft-lbs (63.63 kNm)
Setting 3	39,119 ft-lbs (52.81 kNm)
Setting 2	31,107 ft-lbs (41.99 kNm)
Minimum rated energy (Setting 1)	23,566 ft-lbs (31.81 kNm)
(Variable throttle allows for infinite fuel settings)	
Maximum obtainable stroke	150 in (381 cm)
Maximum obtainable energy	52,362 ft-lbs (71 kNm)
Speed (blows per minute)	34-52

WEIGHTS (Approximate)

Ram	4,189 lbs (1900 kg)
Anvil	749 lbs (340 kg)
Anvil cross sectional area	124.42 in² (802.71 cm²)
Hammer weight (includes trip device)	8,400 lbs (3,810 kg)
Typical operating (weight with DB26 and H-beam insert)	11,052 lbs (5,013 kg)

CAPACITIES

Fuel tank (runs on diesel or bio-diesel)	8.3 gal (31.41 liters)
Oil tank	2.3 gal (8.7 liters)

CONSUMPTION

Diesel or Bio-diesel fuel	1.3 gal/hr (6.6 liters/hr)
Lubrication	0.13 gal/hr (.49 liters/hr)
Grease	8 to 10 pumps every 20 minutes of operation time.

Optional Variable Throttle.

STRIKER PLATE FOR DB 26

Weight	628 lbs (284 kg)
Diameter	22.5 in (57.15 cm)
Area	398 in² (2567.74 cm²)
Thickness	6 in (15.24 cm)

STRIKER PLATE FOR DB 20

Weight	440 lbs (199 kg)
Diameter	17.75 in (45.08 cm)
Area	247 in² (1593.55 cm²)
Thickness	6 in (15.24 cm)

CUSHION MATERIAL

Type	Monocast MC 904
Diameter-DB26	22.5 in (57.15 cm)
Diameter-DB20	17.75 in (45.08 cm)
Thickness	2 in (5.08 cm)
Elastic-modulus	285 ksi (1,965 mpa)
Coeff. of restitution	0.8

Drive Base Assembly.

DRIVE CAP

DB 26:	1,076 lbs (488 kg)
DB 20:	750 lbs (340 kg)

INSERT WEIGHT

H-Beam insert for 12” (305 mm) and 14” (355 mm):	948 lbs (430 kg)
Large pipe insert for sizes 12” to 24” diameter:	1,830 lbs (830 kg)

MINIMUM BOX LEAD SIZE/OPERATING LENGTH

Minimum box leader size	8 in x 21 in (20.32 cm x 53.34 cm)
Operating length w/ base and insert	348 in (883.92 cm)

APE/SEMW Model D30-32 Single Acting Impact Hammer

German technology and ISO 9001 quality

Optional hydraulic trip and throttle available. Fits FEC tube leads or box type.

Direct drive available

MODEL D30-32 (3.0 metric ton ram)

(APE offers diesel hammers with ram weights up to 22,000 lbs.)

SPECIFICATIONS

Maximum rated energy	69,898 ft-lbs
Minimum rated energy	35,383 ft-lbs
Stroke at rated energy	10 feet 6 inches
Maximum obtainable stroke	12 feet 5 inches
Speed (blows per minute)	36-52

WEIGHTS

Ram	6,615 lbs
Avil	1,360 lbs
Hammer weight (includes trip device)	12,155 lbs
Typical operating (weight with drive cap)	14,600 lbs

striker plate

STRIKER PLATE

Weight (D^2 X 3.14/4 X 6 X .283=	675 lbs
Diameter	22.5 inches
Thickness (the 6 in above equation is thickness of plate)	6 inches

cushion

CUSHION MATERIAL

Type	Monocast MC 901
Diameter	22.5 inches
Thickness	2 inches
Elastic-Modulus	285 kips per square inch
Coeff. of Restitution	.8

drive cap

DRIVE CAP (HELMET)

Weight (fits 8 by 26" leads)	1,166 lbs
Note: if using 32 inch leads the drive cap will weigh:	1,550 lbs

insert

DRIVE CAP INSERT WEIGHT

Square box inserts size 10" through 20 inch:	1,400 lbs
Pipe inserts for pipe size 12" to 24" diameter:	2,545 lbs

CAPACITIES

Fuel tank (runs on diesel or bio-diesel)	17.70 gal
Oil tank	2.4 gal

CONSUMPTION

Diesel or Bio-diesel fuel	2.64 gal/hr
Lubrication oil	0.26 gal/hr
Grease:	Grease twice per day or after 45 minutes of continous driving

DIMENSIONS OF HAMMER

a	Length overall	207.1 inches
a	Length over cylinder extension	246.4 inches
b	Impact block diameter	22.0 inches
c	Width over bolts	30.7 inches
d	Hammer width overall	28.3 inches
e	Width for guiding- face to face	21.2 inches
f	Hammer center to pump guard	15.9 inches
g	Hammer center to bolt center	9.2 inches
h	Hammer depth overall	28.1 inches
H	Minimum clearance for leads	19.7 inches

Applicants Letter of Authorization

This letter is to authorize Bo Kennedy of Placemaker Partners, LLC, located at 18 Van Aken Way, Portland, ME 04102, Inc. to represent the interest of CPI Management, LLC (Applicant) in all site design and permitting matters for the proposed development project located at 125 Thompson Point, Portland, ME 04102. This authorization shall include any required signatures for local, state and federal permit applications.

Sincerely,

DocuSigned by: Rob Simmons F303420CFE6043A...	Rob Simmons	8/16/2024

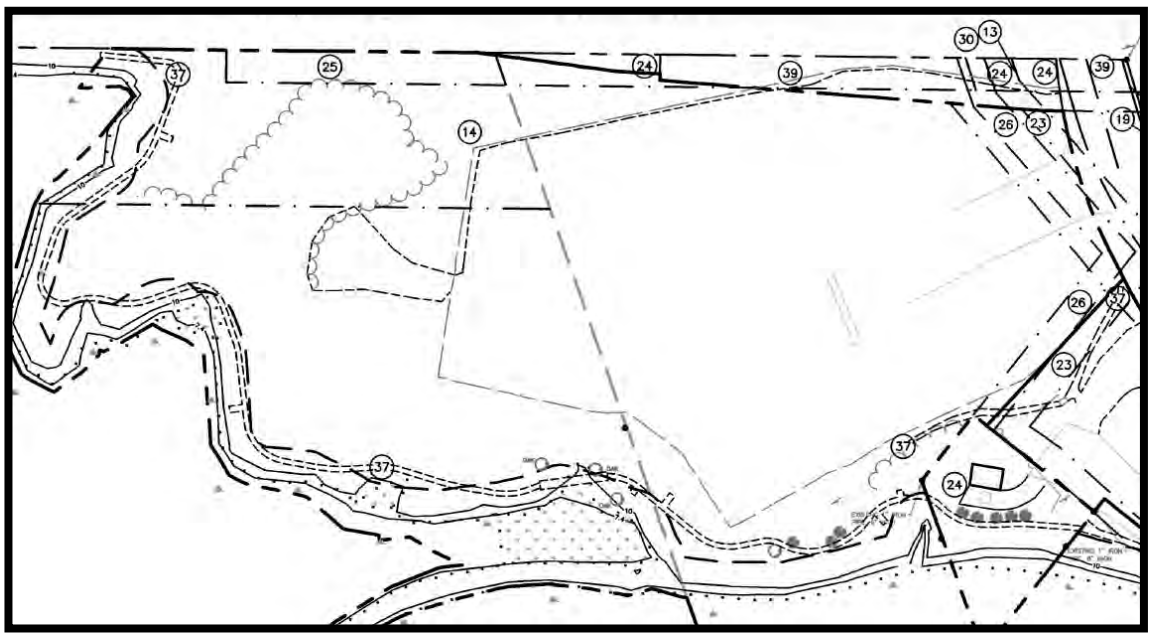
SUMMARY OF EXISTING AND/OR PROPOSED EASEMENTS OR COVENANTS



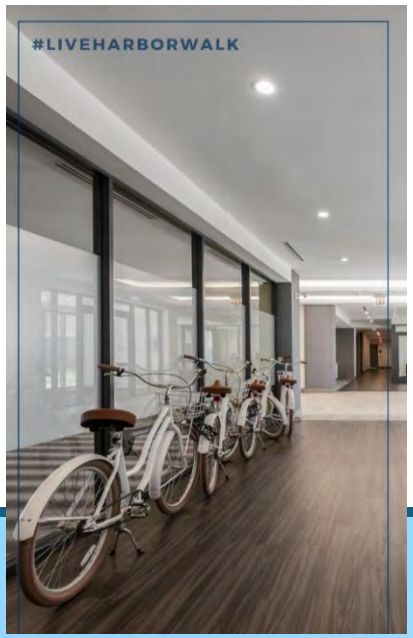
There are several existing easements around the perimeter of the property described as Lot 17 on the Forefront at Thompson's Point Subdivision Sectional 4 Plat, last revised 2024.08.23. Furthermore, a plan sheet titled C-2.0A Subdivision Plan – Easements and Encumbrances dated September 2014, last revised 2016.08.22 and recorded in CCRD Plan book 223, page 133 depicts and lists all existing easements. A summary list of existing easements is noted below.

Existing Easements Encumbering Lot 17:

- CMP Transmission Corridor
- CMP Aerial Power Lines
- CMP Underground Power Lines
- CMP Access Easement (Not Depicted)
- PWD Sanitary Sewer
- PWD CSO Sewer
- PWD Water Main
- PWD water service to pumpstation
- City of Portland Trail Easement
- City of Portland Sewer
- Forefront at Thompson's Point – Declaration of Easements, Covenants and Restrictions

Proposed Easements:

- -Drainage Easement (Thompson's Point ROW)



ATTACHMENT P
TDM – Multi-Family Residential

Forefront has prepared a TDM strategy report approved in 2011, updated in 2015, and March 30, 2018. The Thompson's Point TDM Coordinator has provided subsequent annual progress updates to the city in accordance with the City's reporting protocol for all sites participating in TDM strategies. Thompson's Point is proud to be a very proactive member of the TDM program and is always seeking to improve their TDM initiatives. Copies of the TDM materials are on file with the city and are available upon request. The TP TDM coordinator will continue to work with Cathartes to pursue the TDM measures noted below and more.

Cathartes asset management team has TDM programs in place for its residents to take advantage of and reduce their reliance on Single Occupant Vehicles. Some of those initiatives are summarized below:

- Shareable bikes and e-scooters that can be checked out for free by residents (photos attached).
- Promote indoor, secured bike storage. (upwards of 90 bikes)
- Provide work from home spaces so that residents working from home don't have to commute to a co-work or cafe location.
- Tenants can walk to restaurants & entertainment available to them on-campus.
- Tenants have close access to local and regional bus and train lines.
- Tenants have direct connection to local multi-use trails maintained by Portland Trails.
- Thompson's Point reserves space for Portland Bike Share program (Tandem Mobility) to have a Bike Station
- Thompson's Point was named Best Workplace for Commuters site by the Center for Urban Transportation Research in 2019

Description

The Lumenpulse Lumenblade Bollard is an outdoor LED luminaire that uses a rectilinear version of the Lumencentro light engine to create a continuous line of light. Options include: heights of either two feet or three feet, with a Single or Dual head. Its seen-but-not-seen, minimalist design is sustainable, blends with both contemporary and heritage architectures, provides a high level of security, and is sensitive to the natural environment with low outputs and with a BUG rating of 0.

Features

Mounting	Single head, Dual head, Unlit bollard
Height	2 ft, 3 ft
Color and Color Temperature	Amber, 2200K, 2700K, 3000K, 3500K, 4000K, 5700K
Distributions	Type II, Type III or Type IV (with or without backlight shield), Type V, Type V square
Optical Option (factory installed)	Louver
Vibration Rating	Meets ANSI C136.31-2018 vibration rating for Bridge & Overpass applications
Options	Vibration Rated for Bridge and Overpass, Corrosion-resistant coating for hostile environments, Surge protector, Photoelectric Cell Button Type, Ground Fault Duplex Receptacle, Duplex receptacle with USB A and USB C
Warranty	5-year limited warranty

Performance

Output (nominal lumens)	Minimum 200lm (single head)/ Maximum 2000lm (dual head)
Efficacy	Up to 86 lm/W (N10 lumen output, 4000K, CRI 70+, Type III)
Color Rendering	3 SDCM for CRI 70+, 2 SDCM for CRI 80+ and CRI 90+
Lumen Maintenance	TM-21 L70 > 145,000 hrs (reported, Ta 25 - 50 °C [77 - 122 °F])
Dark Sky	Dark sky compliant (2200K, 2700K, 3000K and Amber color

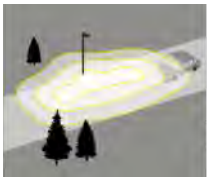
temperatures, BUG rating of U0)

Physical

Housing Material	Extruded aluminium 6000 alloy series
Lens Material	Optical tempered clear glass (Clearsite lens), Optical tempered frosted glass (Frostsite lens), Optical tempered half-frosted glass (Half-Frostsite lens)
Head Option	Bollard Head
Surface Finish	Super durable resistant exterior polyester powder coating meets AAMA 2604-98 requirements (5-years Florida exposure) a corrosion resistant finish (CRC) pre-finish is available to meet ASTM B-117 & ASTM D-1654 (salt spray resistance) and ASTM D-2247 requirements (humidity resistance).
Weight	16.53 lbs

Electrical and control

Voltage	120 volts, 208 volts, 240 volts, 277 volts, 347 volts, 480 volts
Control	On/Off control, 0-10V dimming, Lumentalk



Environmental

Storage Temperature	-40°C to 50°C [-40°F to 122°F] (device must reach start-up temperature value before operating)
Operating Temperature	-40°C [-40 °F] to 50°C [122 °F]
Start-up Temperature	-25°C [-13 °F] to 50°C [122 °F]
Impact Resistance Rating	IK06 (glass lens), IK10 (frame) *IK10 polycarbonate lens option available, consult factory
Ingress Protection Rating	IP66 (optical chamber), Wet location rated
Environment	Dry/damp/wet location

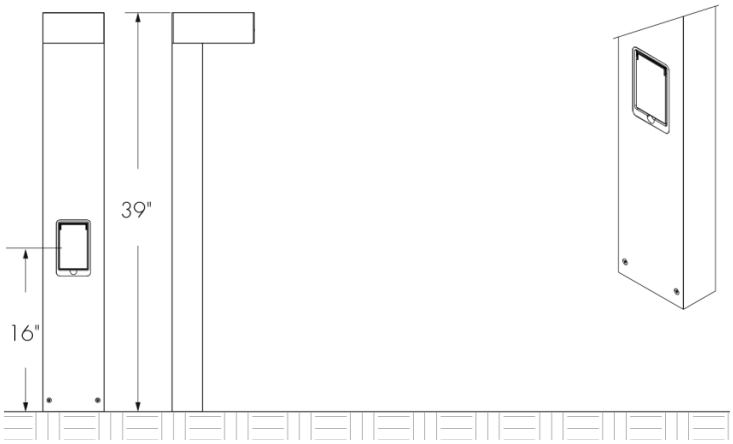
Anchoring details

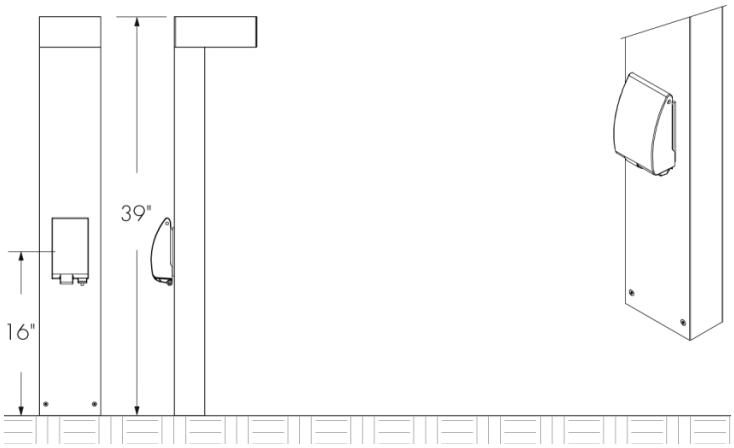
Standard anchoring

A - (2x) Ø1/2 in by 12 in long anchor bolts with flats washers and nuts for each
B - Between 2.5 in and 3 in of the anchor bolts must be above ground for installation
C - Bolt circle
D - Hole for conduit (conduit by others)
E - Street side/Light side

BLDB-VRBO anchoring



A - (4x) Ø3/4 in by 26 in long anchor bolts with flats washers and nuts for each
B - Between 2.5 in and 3 in of the anchor bolts must be above ground for installation
C - Bolt circle
D - Access door and street side



LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately

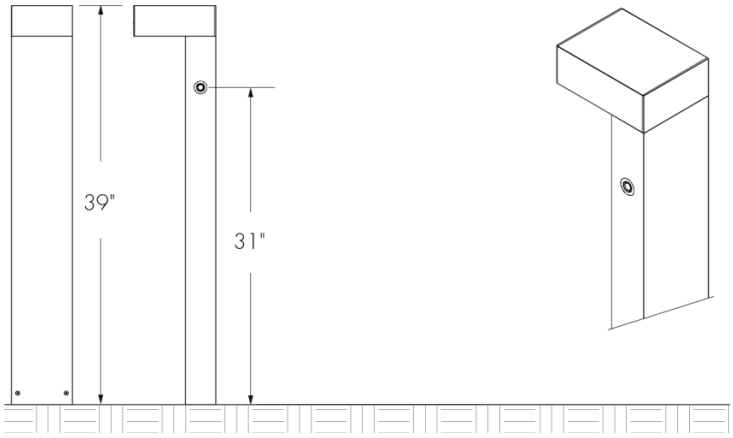
Duplex Receptacle installation dimensions

DRG - Ground fault duplex receptacle
USB - Duplex receptacle with USB A and USB C



DRG IU - Ground Fault Duplex Receptacle (while in use)
USB IU - Duplex receptacle with USB A and USB C (while in use)

The duplex receptacle must be installed in accordance with applicable national and local electrical and construction codes by a person familiar with the construction and operation of the product and the hazards involved. Refer to national and local electrical codes before selecting a duplex receptacle to ensure all requirements are met.

Photoelectric Cell Button installation dimensions

PB - Photoelectric Cell Button Type

Notes:

1. A ground fault duplex receptacle (DRG or DRG IU) and a duplex USB receptacle (USB or USB IU) cannot be combined with TM2 mounting.
2. Not available with LT control option.
3. Standard IK06 rating for glass lens. IK10 rated polycarbonate lens available, please consult factory.
4. Not available with type 5 distribution.
5. Available with type 3 and 5 distributions only.
6. Available with type 2, 3 and 4 distributions only.
7. Available for N03, N05, N07 and N10 outputs only.
8. Lumen output will vary according to the lens and distribution specified for the fixture. Please consult the photometric information section of the specification sheet for more details.
9. Available with AMB color temperature only.
10. Not available for FSL and HFSL lens.
11. Available with N02 output only.
12. Available for CRI 80 only.
13. Available for CRI 80 and CRI 90 only.
14. Available for CRI 70 and CRI 80 only.
15. Binning within a 3-step McAdam ellipse, with the exception of 5700K.
16. Binning within a 2-step MacAdam ellipse, with the exception of 2200K and 5700K.
17. Binning within a 2-step MacAdam ellipse
18. Available with CSL and HFSL lenses only.
19. Factory installed, not field changeable.
20. Specify RAL number followed by "TX" for textured finish (ex: RAL9007TX) or STX for Sandtex finish (ex: RAL9007STX). Textured or Sandtex finishes are recommended for the durability of all products. If a finish is not specified with the RAL number (ex: RAL9007), a glossy finish will be provided. Please consult factory for other RAL textures and glosses, or to match alternate color charts. Final color matching results may vary.
21. Setup charges apply for RAL colors. Consult factory for details.
22. Longer lead times can be expected for custom RAL color finishes.
23. DIM control can be used as NO (On/off control) if no data is required.
24. Not available with PB option.
25. When combined with 2 ft height option, Lumentalk cannot be combined with a ground fault duplex receptacle (DRG or DRG IU) or a duplex USB receptacle (USB or USB IU).

LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately

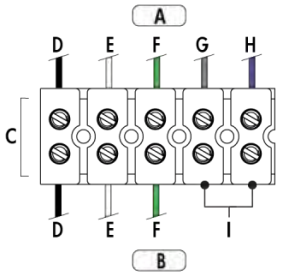
Typical Wiring Diagrams

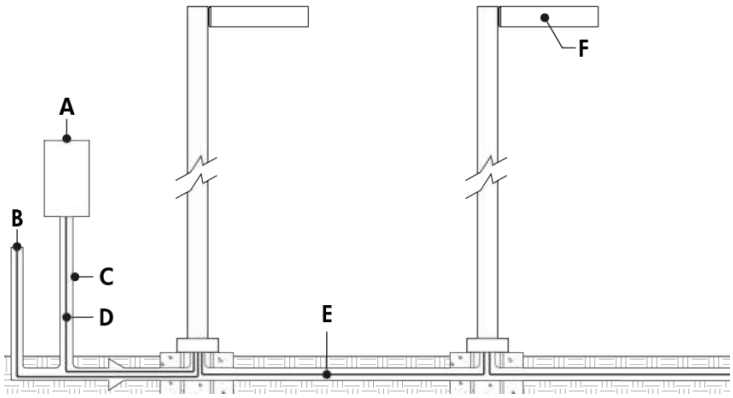
Wiring Color Code



Color	Black	White	Green	Purple	Gray
Use	Line	Line/Neutral	Ground	0-10V+	0-10V -

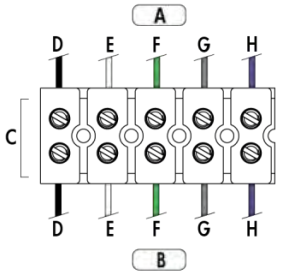
On/Off Control (NO)

A - Power input (120-480V, wiring by others)
B - Conduit (by others)
C - Power wiring (by others)
D - Lumenblade



On/Off control (NO) - Terminal Connector Wiring Detail

A - To driver
B - Power input or from previous fixture
C - Terminal connector
D - Line
E - Line/Neutral
F - Ground
G - 0-10V -
H - 0-10V +
I - Not required

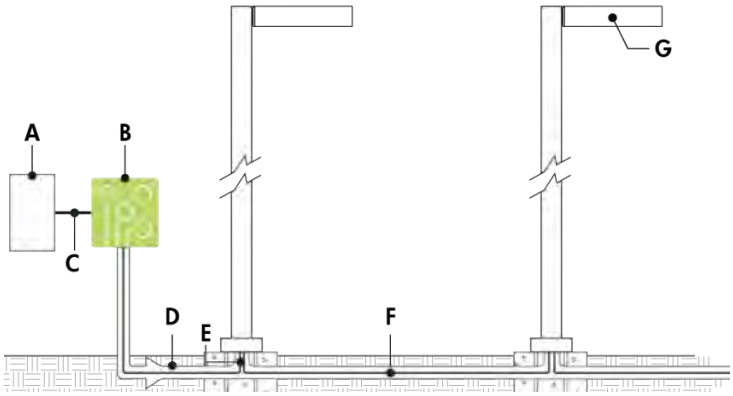


- Consult factory for specific applications and maximum fixture count/cable length recommendations.

0-10V Dimming (DIM)

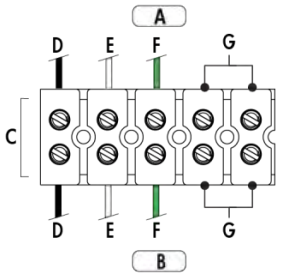
A - Dimmer (by others)
B - Power input (120-480V, wiring by others)
C - Conduit (by others)
D - Data wiring (by others)
E - Power and data wiring (by others)
F - Lumenblade

0-10V Dimming (DIM) - Terminal Connector Wiring Detail



A - To driver
B - Power input or from previous fixture
C - Terminal connector
D - Line
E - Line/Neutral
F - Ground
G - 0-10V -
H - 0-10V +

- Consult factory for specific applications and maximum fixture count/cable length recommendations.
- 0-10V mA ratings: passive dimmer (Current Sink): 3mA per fixture, active dimmer (Current Source): 0.5mA per fixture.
- 1% minimum dimming value.



LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately

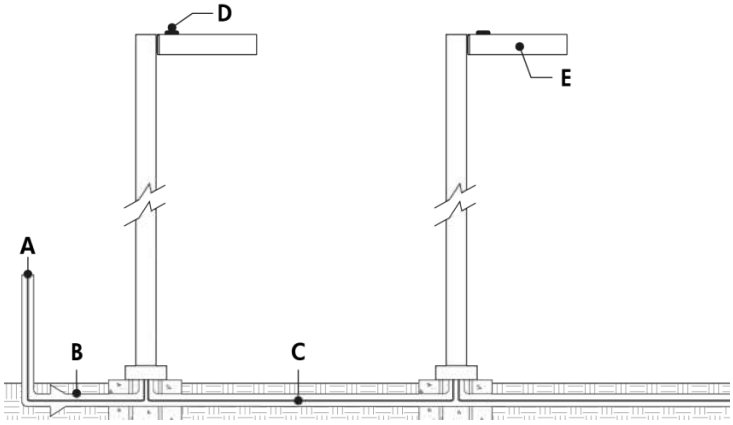
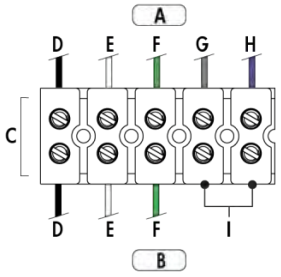
Lumentalk (LT)

A - Third party dimmer/controller
B - Lumentranslator (LTL-010)
C - Data wiring (by others)
D - Power line (120-277V, wiring by others)
E - Conduct (by others)
F - Power wiring (by others)
G - Lumenblade



Lumentalk (LT) - Terminal Connector Wiring Detail

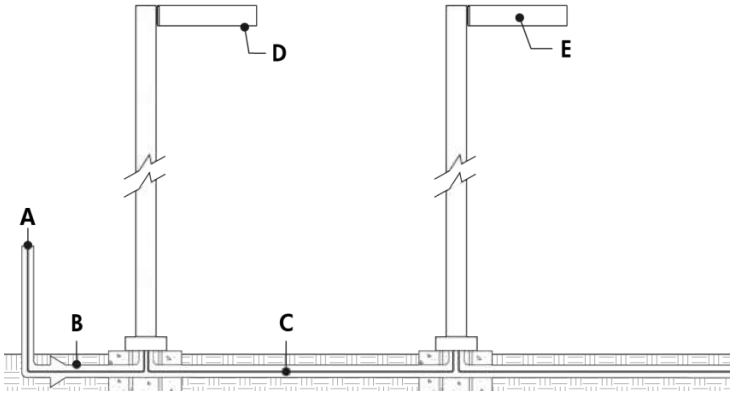
A - To driver
B - Power input or from previous fixture
C - Terminal connector
D - Line
E - Line/Neutral
F - Ground
G- Not required



- Consult factory for specific applications and maximum fixture count/cable length recommendations.
- Lumentalk enabled fixtures must be commissioned using LumentalkID software and a LID-LT. Consult factory for details.
- Maximum of 1 transmitter (Lumentranslator or Lumenlink) per system.
- No third party fixtures allowed on the same circuit

3 pins, 5 pins and 7pins Receptacle Control (SPR3, SPR3 SC, SPR5, SPR5 SC, SPR7, SPR7 SC)

A - Power input (120-480V, wiring by others)
B - Conduit (by others)
C - Power wiring (by others)
D - Photoelectric control
E - Lumenblade



3 pins, 5 pins and 7pins Receptacle Control (SPR3, SPR3 SC,SPR5, SPR5 SC, SPR7, SPR7 SC) - terminal connector wiring detail

A - To driver
B - Power input or from previous fixture
C - Terminal connector
D - Line
E - Line/Neutral
F - Ground
G - 0-10V -
H - 0-10V +
I - SPR3: Not required. SPR5/SPR7: From photocell receptacle

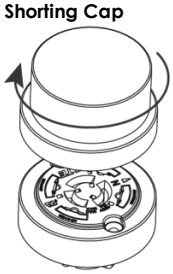
2023.06.26 copyright © 2023 LMPG Inc.

Motion Detector Control (MDxx)

A - Power input (120-480V, wiring by others)
B - Conduit (by others)
C - Power wiring (by others)
D - Motion detector
E - Lumenblade

Motion Detector (MDxx) - Terminal Connector Wiring Detail



A - To driver
B - Power input or from previous fixture
C - Terminal connector
D - Line
E - Line/Neutral
F - Ground
G- Not required

Options

SPR3, SPR5 and SPR7 - 3-Pin, 5-Pin and 7-Pin Receptacles

SPR3 SC, SPR5 SC and SPR7 SC - 3-Pin, 5-Pin and 7-Pin Receptacles with Shorting Cap

- Dimming receptacle meets ANSI C136.41 Standard

LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately

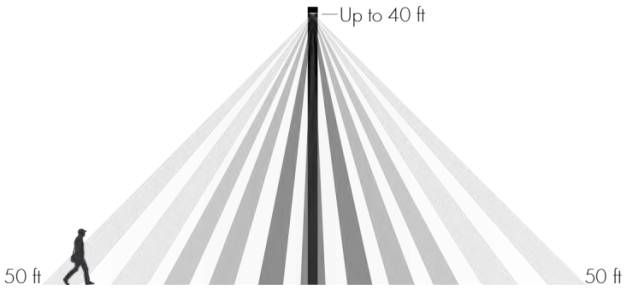
Photocell On/Off [9]	Dis	Dis	Dis	• Disable • 1fc - 250fc (Increment: **1fc**) — Dis

[1] When the sensor detects motion, the dimming control output ramps up to the selected HIGH light level.
[2] After the sensor stops detecting motion and the time delay expires, the dimming control output fades down to the selected LOW light level.
[3] The selected time period that must elapse after the last time the sensor detects motion for the electric lights to fade to LOW mode.
[4] The time period that must elapse after the lights fade to LOW mode, and the sensor detects no motion for the electric lights to turn OFF.
[5] When enabled, the selectable ambient light level threshold that will hold the electric lights off or at LOW level when the sensor detects motion.
[6] The response of the PIR detector to motion within the sensor's coverage area.
[7] Time period for light level to increase from LOW to HIGH.
[8] Time period for light level to decrease from HIGH to LOW.
[9] When enabled, the sensor will force the load OFF after the light level has exceeded the selected photocell setpoint PRIOR SAVE SEND for at least a minute. It will also force the load ON when the light level goes below the setpoint, even if no motion is detected.
[10] The motion detector programming can be modified on site. A remote is required, order separately. See Remote section in the specification sheet for details.

Dimming: When motion is detected within the sensor's coverage area, the sensor sends a signal to ramp the load up to the selectable High Mode level unless the ambient light level is higher than the selected setpoint. When no motion is detected for the duration of the time delay setting, the lights will go to the selectable Low Mode level based on the signal from the sensor. If desired, a cut off time delay will trigger to eventually turn the lights OFF.
Non dimming: When motion is detected within the sensor's coverage area, the sensor sends a signal to turn the load ON unless the ambient light level is higher than the selected setpoint. When no motion is detected for the duration of the time delay setting, the lights will go OFF based on the signal from the sensor.
Dusk to dawn control: When photocell on/off is enabled, and the ambient light falls below the photocell setpoint, the sensor ramps the load up to the selectable High Mode level. If no motion is detected for the duration of the time delay setting, the lights will go to the selectable Low Mode level. If the cut off time delay is disabled, the load will remain on, at High or Low level, based on motion detection, until the ambient light increases above the photocell setpoint.

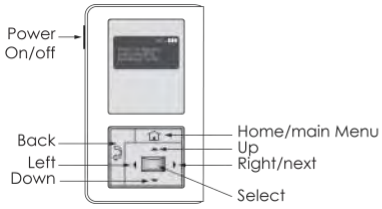


Coverage Area

Narrow Lens (MD10N, MD30N, MD50N and MDPN)*

* Maximum 20 ft height, 40 ft diameter coverage area

Wide Lens (MD10W, MD30W, MD50W and MDPN)*



* Maximum 40 ft height, 100 ft diameter coverage area (Lumenpulse maximum pole height: up to 30 ft consult relative pole specification sheets for more details).

High temperatures at the covered area (above 88 °F - 91 °F) reduce the detection zone of the sensor. Consider adding more sensors if the ambient temperatures are expected to be high. Additionally, high floor level temperature may require larger movement for detection. Coverages shown in the diagrams are maximum, measured in linear feet. They represent coverage for walking motion, with no obstacles.

Notes:

1. Product code is for a single fixture only (S1E configuration). For double configuration (S2E), a second product code must be completed.
2. Not available with LT control option.
3. Consult factory for Softsite lens option. Available for 3000lm (1 board), 5000lm (2 boards), 7000lm (3 boards) and 10000lm (4 boards) outputs.
4. Motion detector options add 6 1/4 in to total length of fixture.
5. Available up to 277V.
6. Available for CRI 80 only.
7. Available for CRI 80 and CRI 90 only.
8. Available for CRI 70 and CRI 80 only.
9. Binning within a 3-step McAdam ellipse, with the exception of 5700K.
10. Binning within a 2-step MacAdam ellipse, with the exception of 2200K and 5700K.
11. Binning within a 2-step MacAdam ellipse
12. Specify RAL number followed by "TX" for textured finish (ex: RAL9007TX) or STX for Sandtex finish (ex: RAL9007STX). Textured or Sandtex finishes are recommended for the durability of all products. If a finish is not specified with the RAL number (ex: RAL9007), a glossy finish will be provided. Please consult factory for other RAL textures and glosses, or to match alternate color charts. Final color matching results may vary.
13. Setup charges apply for RAL colors. Consult factory for details.
14. Longer lead times can be expected for custom RAL color finishes.
15. DIM control can be used as NO (On/off control) if no data is required.
16. Not available with SPR3, SPR3 SC, SPR5, SPR5 SC, SPR7 and SPR7 SC 3-Pin, 5-Pin, and 7-Pin receptacles options and MD10N, MD10W, MD30N, MD30W, MD50N, MD50W, MDPN and MDPW motion detector options.
17. Available with S40, S60, M80 and M100 output options only.
18. Use only when exposed to salt spray. This option is not required for normal outdoor exposure.
19. Setup charges apply. Consult factory for details.
20. Only one receptacle can be specified per fixture, cannot be combined with motion detector option.
21. The motion detector programming can be modified on site. A remote is required, order separately. See Remote section in the specification sheet for details.
22. Only one motion detector can be specified per fixture, cannot be combined with a receptacle.
23. The motion detector is programmed in the factory, as per the settings requested at the time of the order.
24. Consult Pole Mounting Adaptor section for standard available configurations.

Description

The Lumenpulse Lumenblade Column is an outdoor LED luminaire that uses a rectilinear version of the Lumencentro light engine to create a continuous line of light. Options include: heights of either 10 feet or 12 feet, with a Single or Dual head. Its seen-but-not-seen, minimalist design is sustainable, blends with both contemporary and heritage architectures, provides a high level of security, and is sensitive to the natural environment with low outputs and with a BUG rating of 0.

Features

Mounting	Single head, Dual head
Height	10 ft, 12 ft
Color and Color Temperature	Amber, 2200K, 2700K, 3000K, 3500K, 4000K, 5700K
Distributions	Type II, Type III or Type IV (with or without backlight shield), Type V, Type V square
Optical Option (factory installed)	Louver
Vibration Rating	Meets ANSI C136.31-2018 vibration rating for Bridge & Overpass applications
Options	Vibration Rated for Bridge and Overpass, Corrosion-resistant coating for hostile environments, Surge protector, Photoelectric Cell Button Type, Ground Fault Duplex Receptacle, Duplex receptacle with USB A and USB C, 3-Pin Receptacle with or without shorting cap, 5-Pin Receptacle with or without shorting cap, 7-Pin Receptacle with or without shorting cap, Motion detector, Direct Burial
Warranty	5-year limited warranty

Performance

Output (nominal lumens)	Minimum 300lm (single head)/ 200lm for bollard head option, Maximum 5000lm (dual head)
Efficacy	Up to 106 lm/W (XS10 lumen output, 4000K, CRI 70+,Type III)

Color and Color Temperature

Control

ON/OFF 0-10V LT

Ratings

IP66 (optical chamber) IK06 (lens) IK10*(frame)

*IK10 polycarbonate lens option available, consult factory.

Motion detector options

Certifications

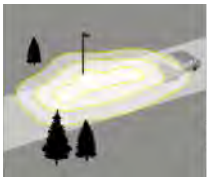
Color Rendering	3 SDCM for CRI 70+, 2 SDCM for CRI 80+ and CRI 90+
Lumen Maintenance	TM-21 L70 > 145,000 hrs (reported, Ta 25 - 50 °C [77 - 122 °F])
Dark Sky	Dark sky compliant (2200K, 2700K, 3000K and Amber color temperatures, BUG rating of U0)

Physical

Housing Material	Extruded aluminium 6000 alloy series
Lens Material	Optical tempered clear glass (Clearsite lens), Optical tempered frosted glass (Frostsite lens), Optical tempered half-frosted glass (Half-Frostsite lens)
Head Option	Bollard Head, Column head
Head Option Height	3 ft
Surface Finish	Super durable resistant exterior polyester powder coating meets AAMA 2604-98 requirements (5-years Florida exposure) a corrosion resistant finish (CRC) pre-finish is available to meet ASTM B-117 & ASTM D-1654 (salt spray resistance) and ASTM D-2247 requirements (humidity resistance).
Weight	22.5 lbs for single head option (10 ft fixture)

Electrical and control

Voltage	120 volts, 208 volts, 240 volts, 277 volts, 347 volts, 480 volts
Control	On/Off control, 0-10V dimming, Lumentalk



Environmental

Storage Temperature	-40°C to 50°C [-40°F to 122°F] (device must reach start-up temperature value before operating)
Operating Temperature	-40°C to 50°C [-40°F to 122°F]
Start-up Temperature	-25°C [-13 °F] to 50°C [122 °F]
Ingress Protection Rating	IP66 (optical chamber), Wet location rated
Impact Resistance Rating	IK06 (glass lens), IK10 (frame) *IK10 polycarbonate lens option available, consult factory
Environment	Dry/damp/wet location

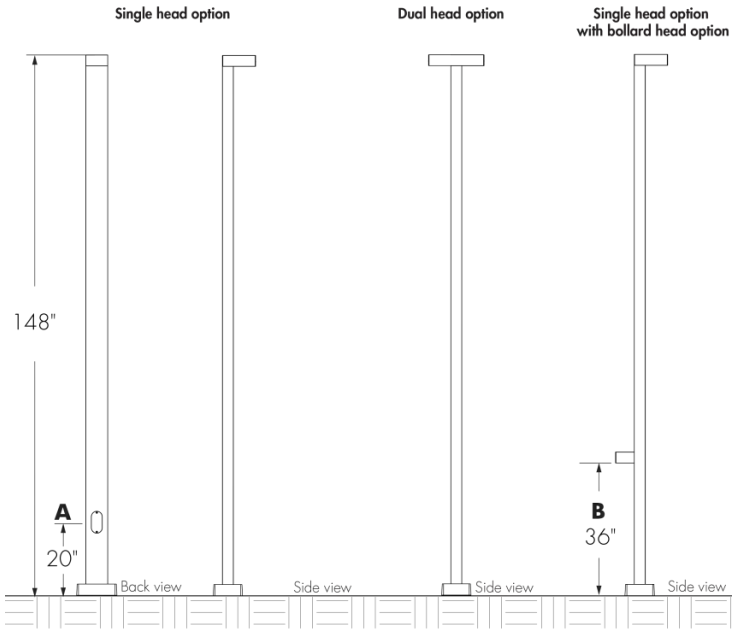
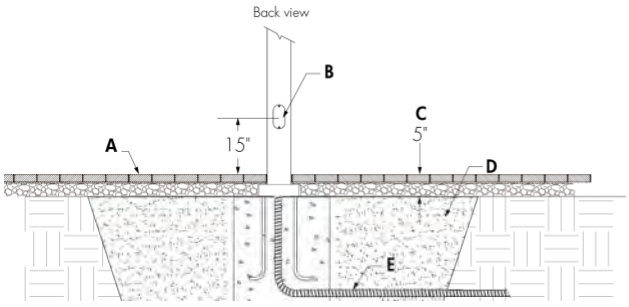
Standard installation assembly details



A - (4x) Ø3/4 in by 26 in long anchor bolts with flats washers and nuts for each
B - Between 2.5 in and 3 in of the anchor bolts must be above ground for installation
C - Bolt circle
D - Access door and street side

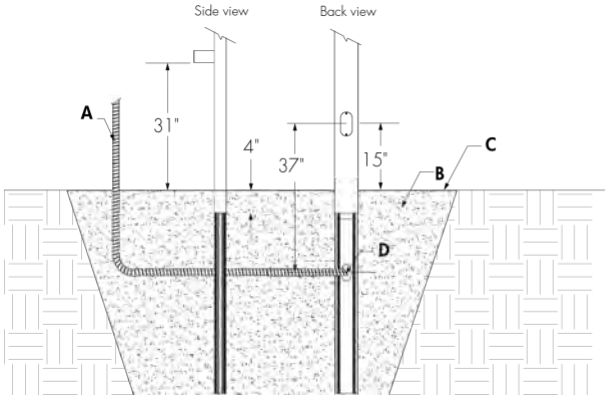
Standard installation dimensions

10 ft column



12 ft column

A - Access door (distance from ground to center of access door)
B - Bollard head option (distance from ground to bollard head)



Semi-buried installation assembly details

A - Finished grade
B - Access door
C - Buried section, at least 5 in
D - Filling
E - Conduit (by others)

LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately

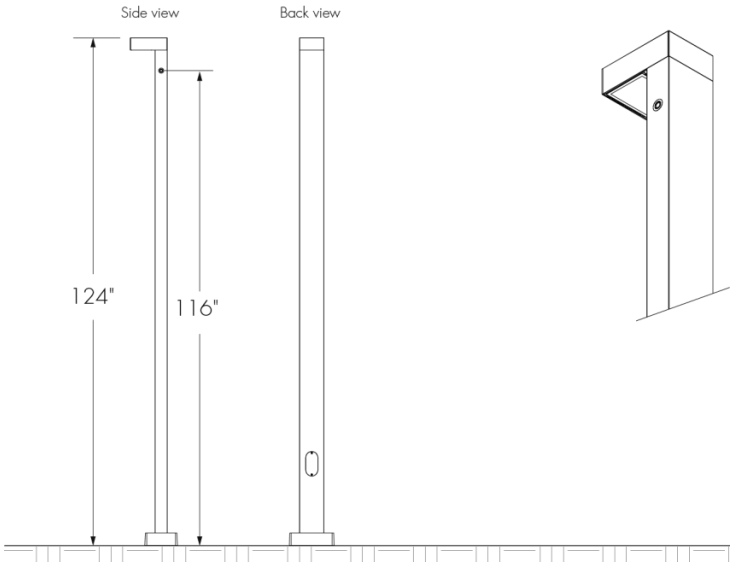
Duplex Receptacle installation dimensions

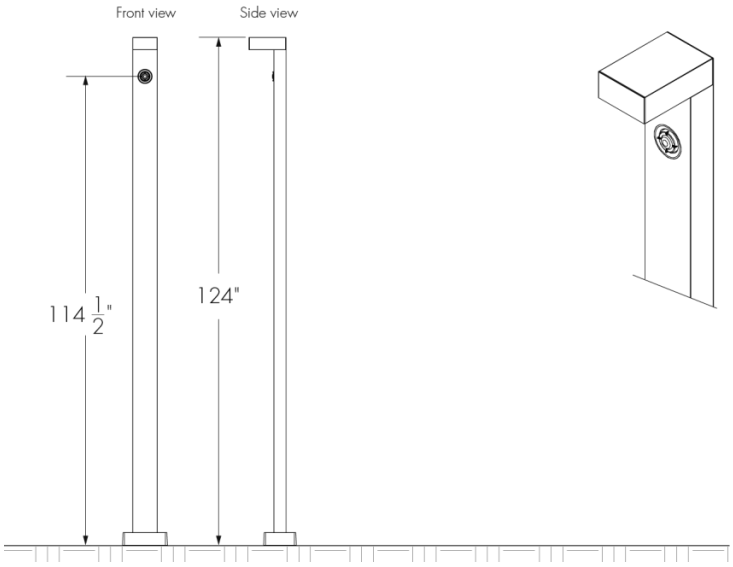
DRG - Ground fault duplex receptacle
USB - Duplex receptacle with USB A and USB C



DRG IU - Ground Fault Duplex Receptacle (while in use)
USB IU - Duplex receptacle with USB A and USB C (while in use)

The duplex receptacle must be installed in accordance with applicable national and local electrical and construction codes by a person familiar with the construction and operation of the product and the hazards involved. Refer to national and local electrical codes before selecting a duplex receptacle to ensure all requirements are met.

Photoelectric Cell Button installation dimensions



PB - Photoelectric Cell Button Type

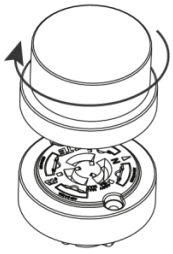
Motion detector installation dimensions

Motion detector (MD10N, MD30N, MD50N, MDNL and MDPN)

Remote (order separately)

MDRC001 - Remote to program motion detector on site



- Compatible with all motion detector options.

3-Pin, 5-Pin and 7-Pin Receptacles Options

SPR3, SPR5 and SPR7 - 3-Pin, 5-Pin and 7-Pin Receptacles

SPR3 SC, SPR5 SC and SPR7 SC - 3-Pin, 5-Pin and 7-Pin Receptacles with Shorting Cap

- Dimming receptacle meets ANSI C136.41 Standard

LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately

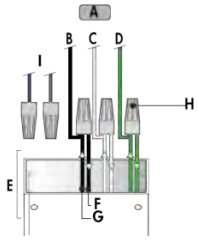
Typical Wiring Diagrams

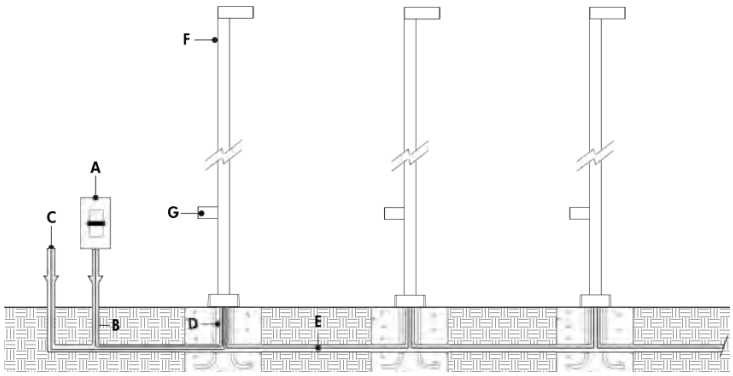
Wiring Color Code



Color	Black	White	Green	Purple	Gray
Use	Line	Line/Neutral	Ground	0 -10V+	0 -10V -

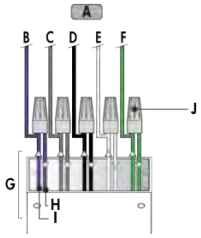
On/Off Control (NO)

A - Power input (120-480V)
B - Conduit (by others)
C - Power wiring (by others)
D - Lumenblade Column
E - Bollard head option



On/Off Control (NO) - wiring detail

A - To fixture
B - Line
C - Line/Neutral
D - Ground
E - Conduit (by others)
F - To next fixture
G - Power input or from previous fixture
H - Wire-nuts (by others)
I - Not required

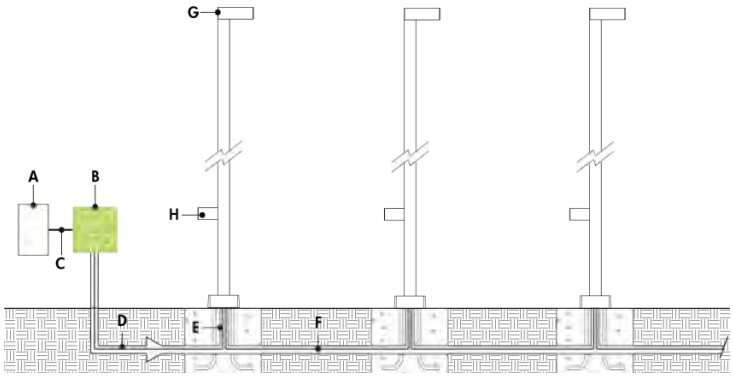


- Consult factory for specific applications and maximum fixture count/cable length recommendations.

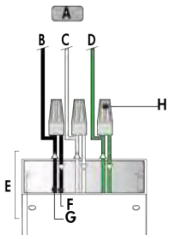
0-10V dimming (DIM)

A - Dimmer (by others)
B - Data wiring (by others)
C - Power input (120-480V, wiring by others)
D - Conduit (by others)
E - Power and data wiring (by others)
F - Lumenblade Column
G - Bollard head option

0-10V dimming (DIM) - wiring detail



A - To fixture
B - 0-10V +
C - 0-10V -
D - Line
E - Neutral
F - Ground
G - Conduit (by others)
H - To next fixture
I - Power input or from previous fixture
J - Wire-nuts (by others)



- Consult factory for specific applications and maximum fixture count/cable length recommendations.
- 0-10V mA ratings: passive dimmer (Current Sink): 3mA per fixture, active dimmer (Current Source): 0.5mA per fixture.
- 1% minimum dimming value.

LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately

Lumentalk (LT)

A - Third party dimmer/controller
B - Lumentranslator (LTL-010)
C - Data wiring (by others)
D - Power line (120-277V, wiring by others)
E - Conduct (by others)
F - Power wiring (by others)
G - Lumenblade Column
H - Bollard head option

A - To fixture
B - Line
C - Line/Neutral
D - Ground
E - Conduit (by others)
F - To next fixture
G - Power input or from previous fixture
H - Wire-nuts (by others)

- Consult factory for specific applications and maximum fixture count/cable length recommendations.
- Lumentalk enabled fixtures must be commissioned using LumentalkID software and a LID-LT. Consult factory for details.
- Maximum of 1 transmitter (Lumentranslator or Lumenlink) per system.
- No third party fixtures allowed on the same circuit.
- DRG or USB option must be on a separated circuit.

Photocell [9] **On/Off**	Dis		Dis		Dis		• Disable • 1fc - 250fc (Increment: **1fc**)	Dis

[1] When the sensor detects motion, the dimming control output ramps up to the selected HIGH light level.
[2] After the sensor stops detecting motion and the time delay expires, the dimming control output fades down to the selected LOW light level.
[3] The selected time period that must elapse after the last time the sensor detects motion for the electric lights to fade to LOW mode.
[4] The time period that must elapse after the lights fade to LOW mode, and the sensor detects no motion for the electric lights to turn OFF.
[5] When enabled, the selectable ambient light level threshold that will hold the electric lights off or at LOW level when the sensor detects motion.
[6] The response of the PIR detector to motion within the sensor's coverage area.
[7] Time period for light level to increase from LOW to HIGH.
[8] Time period for light level to decrease from HIGH to LOW.
[9] When enabled, the sensor will force the load OFF after the light level has exceeded the selected photocell setpoint PRIOR SAVE SEND for at least a minute. It will also force the load ON when the light level goes below the setpoint, even if no motion is detected.
[10] The motion detector programming can be modified on site. A remote is required, order separately. See Remote section in the specification sheet for details.

Dimming: When motion is detected within the sensor's coverage area, the sensor sends a signal to ramp the load up to the selectable High Mode level unless the ambient light level is higher than the selected setpoint. When no motion is detected for the duration of the time delay setting, the lights will go to the selectable Low Mode level based on the signal from the sensor. If desired, a cut off time delay will trigger to eventually turn the lights OFF.
Non dimming: When motion is detected within the sensor's coverage area, the sensor sends a signal to turn the load ON unless the ambient light level is higher than the selected setpoint. When no motion is detected for the duration of the time delay setting, the lights will go OFF based on the signal from the sensor.
Dusk to dawn control: When photocell on/off is enabled, and the ambient light falls below the photocell setpoint, the sensor ramps the load up to the selectable High Mode level. If no motion is detected for the duration of the time delay setting, the lights will go to the selectable Low Mode level. If the cut off time delay is disabled, the load will remain on, at High or Low level, based on motion detection, until the ambient light increases above the photocell setpoint.

Coverage area

Narrow lens (MD10N, MD30N, MD50N and MDPN)*

* Maximum 12 ft height, 24 ft diameter coverage area.

High temperatures at the covered area (above 88 °F - 91 °F) reduce the detection zone of the sensor. Consider adding more sensors if the ambient temperatures are expected to be high. Additionally, high floor level temperature may require larger movement for detection. Coverages shown in the diagrams are maximum, measured in linear feet. They represent coverage for walking motion, with no obstacles.

Notes:

1. Not available with CH head option.
2. Not available with BH head option.
3. Not available with HFSL lens.
4. Not available with LT control option.
5. Standard IK06 rating for glass lens. IK10 rated polycarbonate lens available, please consult factory.
6. Not available with type 5 distribution.
7. Available with type 3 and 5 distributions only.
8. Lumen output will vary according to the lens and distribution specified for the fixture. Please consult the photometric information section of the specification sheet for more details.
9. Available with AMB color temperature only.
10. Available with column head XS03 output only.
11. Available for CRI 80 only.
12. Available for CRI 80 and CRI 90 only.
13. Available for CRI 70 and CRI 80 only.
14. Binning within a 3-step McAdam ellipse, with the exception of 5700K.
15. Binning within a 2-step MacAdam ellipse, with the exception of 2200K and 5700K.
16. Binning within a 2-step MacAdam ellipse
17. Available with CSL lens only.
18. Factory installed, not field changeable.
19. Specify RAL number followed by "TX" for textured finish (ex: RAL9007TX) or STX for Sandtex finish (ex: RAL9007STX). Textured or Sandtex finishes are recommended for the durability of all products. If a finish is not specified with the RAL number (ex: RAL9007), a glossy finish will be provided. Please consult factory for other RAL textures and glosses, or to match alternate color charts. Final color matching results may vary.
20. Setup charges apply for RAL colors. Consult factory for details.
21. Longer lead times can be expected for custom RAL color finishes.
22. DIM control can be used as NO (On/off control) if no data is required.
23. Not available with PB photoelectric cell, SPR3, SPR3 SC, SPR5, SPR5 SC, SPR7 and SPR7 SC 3-Pin, 5-Pin, and 7-Pin receptacles and MD10N, MD30N, MD50N, MDPN and MDNL motion detector options.

Notes:

1. Not available with CH head option.
3. Not available with HFSL lens.
4. Not available with LT control option.
5. Standard IK06 rating for glass lens. IK10 rated polycarbonate lens available, please consult factory.
6. Not available with type 5 distribution.
11. Available for CRI 80 only.
12. Available for CRI 80 and CRI 90 only.
13. Available for CRI 70 and CRI 80 only.
14. Binning within a 3-step McAdam ellipse, with the exception of 5700K.
15. Binning within a 2-step MacAdam ellipse, with the exception of 2200K and 5700K.
16. Binning within a 2-step MacAdam ellipse
18. Factory installed, not field changeable.
24. Vibration tested in accordance with ANSI 136.31 2018 for bridge and overpass applications at 5Gv.
25. Specify only if a bridge or overpass application is required.
26. Use only when exposed to salt spray. This option is not required for normal outdoor exposure.
27. Setup charges apply. Consult factory for details.
28. Not available for 480V voltage option.
29. Not available with MD10N, MD30N, MD50N, MDPN and MDNL motion detector options.
30. A ground fault duplex receptacle (DRG or DRG IU) and a duplex USB receptacle (USB or USB IU) cannot be combined.
31. Only one receptacle can be specified per fixture, cannot be combined with motion detector option.
32. Not available with PB option.
33. The motion detector programming can be modified on site. A remote is required, order separately. See Remote section in the specification sheet for details.
34. Only one motion detector can be specified per fixture, cannot be combined with a receptacle.
35. MD10N, MD30N, MD50N and MDPN are Wattstopper motion detectors.
36. MDNL is an N-Light motion detector.
37. Consult factory for details.
38. Not available for 347V and 480V voltage options.
39. The motion detector is programmed in the factory, as per the settings requested at the time of the order.
40. Available for N02, N03, N05, N07 and N10 bollard head outputs only.
41. Available for XS03, XS10, XS15, XS20 and XS25 column head outputs only.
42. Not available with type 5 distribution when head option is specified for the Lumenblade column.
43. Available with type 3 and type 5 distributions when a head option is specified for the Lumenblade column.
44. Available with type 2, type 3 and type 4 distributions when a bollard head is specified for the Lumenblade column.
45. Available for N03, N05, N07 and N10 bollard head outputs only.
46. Available with AMB head color temperature only.
47. Available with N02 output when a bollard head is specified. Available with XS03 output when a second column head is specified for the Lumenblade column.
48. Not available for FSL and HFSL lens.
49. Not available for FSL lens.

BRICK-OD OUTDOOR

FOR INDOOR, REFER TO MODEL #: 1575

Catalog Number:
7075-12-TW-H08-30K

TYPE WP-1

BROWNLEE

7075-12” in Textured Black (TB)

7075-24” in Textured Black (TB)

7075 LED

The BRICK-OD (outdoor) is a minimal, clean and contemporary exterior sconce with exceptional versatility: Three ADA compliant sizes (8”, 12” and 24”), single direction LED distribution, and three finishes to choose from. Perfect for exterior facades, entryways, columns, and breezeways. Since this is a wet-listed unit, it can also be used in healthcare applications requiring durable luminaires which can be wiped down. Available with integral battery backup.

FINISHES

TB TG TW

BRICK-OD OUTDOOR

FOR INDOOR, REFER TO MODEL #: 1575

PROJECT:
MODEL #:
FIXTURE TYPE:

STANDARD SPECIFICATIONS - *SINGLE DIRECTION DISTRIBUTION (7075)*

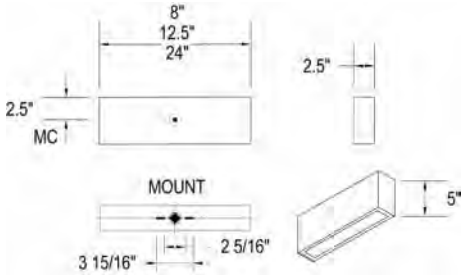
OUTER FRAME & MOUNT PLATE
Formed and welded aluminum. Countersunk fasteners located on top of fixture. No exposed hardware on sides or bottom of fixture. Closed cell foam gasket on rear mount plate.

DIFFUSER
UV stabilized frosted acrylic diffuser. Smooth uniform illumination.

LED PERFORMANCE - 3500K STANDARD - TYPE 2 DISTRIBUTION
120-277V - 3500K, L80 rating - 60,000 hrs - L70 rating (projected) - 100,000 hrs
Amperage rated @ 110V input
Operating ambient temperature: -20°C / -4°F - 50°C / 122°F

Delivered 3500K lumens noted. Consult Brownlee.com for performance of all CCTs.
08 Size: C13 – 13W nominal, .10 A input - 1165 lm. Dimmable (0-10V). 82 CRI Standard.
12 Size: H08 – 8W nominal, .07 A input - 860 lm. Dimmable (0-10V). 90+ CRI Standard.
12 Size: H16 – 16W nominal, .14 A input – 1490 lm. Dimmable (0-10V). 90+ CRI Standard.
12 Size: H21 – 21W nominal, .18 A input – 1725 lm. Dimmable (0-10V). 90+ CRI Standard.
24 Size: H16 – 16W nominal, .14 A input – 1470 lm. Dimmable (0-10V). 90+ CRI Standard.
24 Size: H32 – 32W nominal, .27 A input – 3030 lm. Dimmable (0-10V). 90+ CRI Standard.
24 Size: H41 – 41W nominal, .35 A input – 3410 lm. Dimmable (0-10V). 90+ CRI Standard.

MOUNTING
Fixture mounts to a 4x4 junction box (by others).
Wet-listed in the downward orientation only (light source facing down).



FINISH
Durable corrosion resistant powder coat finish.
Custom colors available, contact factory.

WARRANTY
5 year limited warranty on this LED product.
Consult factory for details.

BBC[2]	Integral Battery Backup, Cold Weather - 15W (-4F minimum) (24 Size Only)

Battery must be connected to continuous power supply within 7 Mo. of shipping. See Warranty Note 3.

DTR[4]	Triac (Line Voltage) Dimming (120V) (Cannot be combined with BBI/BBC)
ES[6]	ENERGY STAR® (All except H08, H21, H41)
FCL[7]	French Canadian Label
PO1	Photo Control (120V)
PO2	Photo Control (208, 240, 277V)
T24[9]	Title 24 JA8 Compliant (H16 & H32 only)

Universal Footnotes (only applies if option is listed on spec sheet): (0) 90R - 90 CRI output-loss multiplier: 0.85 (estimate). Cannot be combined with ES. **1) BAC** - cannot be combined with FCL. **(2) BBI/BBS/BBC** - cannot be combined with ECW or EXT. **(3) BLD** - includes integral microwave motion sensor (do not combine with OCC option). Cannot be combined with DTR. **(4) DTR** - cannot be combined with BLD. **(5) ECW** - cannot be combined with BBI, BBC, or DTR. **(6) ES** - cannot be combined with 90R or T24. **(7) FCL** - cannot be combined with BAC. **(8) OCC** - integral microwave motion sensor (ON/OFF). **(9) T24** - includes JA8 labeling and 90 CRI LEDs (do not combine with 90R option). Cannot be combined with ES. **(10) PCH/PC4** - cannot be combined with BLD or OCC. **Add'l Notes: *BBI/BBC** - BBI minimum operating temp: 10C/50F unless otherwise stated. BBC minimum operating temp: -20C/-4F. ****BLD** - integral microwave motion sensor with step-dim control. 1: Motion is detected, illuminate to 100%. 2: Motion no longer detected, dim to set level. 3: Remain in continuous dimmed state or turn off after set period. Configurable via onboard dip switches.

Description

The Lumenpulse Lumenblade Nano is an outdoor LED luminaire that uses a rectilinear version of the Lumencentro light engine to create a continuous line of light. Side Mount or Wall Mount options are available. Its seen-but-not-seen, minimalist design is sustainable, blends with both contemporary and heritage architectures, provides a high level of security, and is sensitive to the natural environment with low outputs and with a BUG rating of 0.

Features

Mounting	Side Mounting, Wall Mounting
Color and Color Temperature	True Amber 585nm-595nm (Turtle-Friendly), 2200K, 2700K, 3000K, 3500K, 4000K
Distributions	Type II, Type III or Type IV (with or without backlight shield), Type V, Type V square
Optical Option (factory installed)	Louver
Vibration Rating	Meets ANSI C136.31-2018 vibration rating for Bridge & Overpass applications
Option	Vibration Rated for Bridge and Overpass Corrosion-resistant Coating for Hostile Environments
Warranty	5-year limited warranty

Performance

Output (Nominal Lumens)	Minimum 200lm/ Maximum 2500lm
Efficacy	Up to 127 lm/W (XS10 lumen output, 4000K, CRI 70+, Type VS)
Color Rendering	3 SDCM for CRI 70+, 2 SDCM for CRI 80+ and CRI 90+
Lumen Maintenance	TM-21 L70 > 145,000 hrs (reported, Ta 25 - 50 °C [77 - 122 °F])
Dark Sky	Dark sky compliant (2200K, 2700K, 3000K and Amber color temperatures, BUG rating of U0)

Physical

Housing Material	Extruded aluminium 6000 alloy series
Lens Material	Optical tempered clear glass (Clearsite lens), Optical tempered frosted glass (Frostsite lens), Optical tempered half-frosted glass (Half-Frostsite lens)
Surface Finish	Super durable resistant exterior polyester powder coating meets AAMA 2604-98 requirements (5-years Florida exposure). A corrosion resistant finish (CRC) pre-finish is available to meet ASTM B-117 & ASTM D-1654 (salt spray resistance) and ASTM D-2247 requirements (humidity resistance).
Weight	1.87 lbs to 4.84 lbs, refer to EPA and fixture weight tables for details

Electrical and Control

Voltage	120 volts, 208 volts, 240 volts, 277 volts
Control	On/Off Control, 0-10V Dimming

Environmental

Storage Temperature	-40°C to 50°C [-40°F to 122°F] (device must reach start-up temperature value before operating)
Operating Temperature	-40°C to 50°C [-40°F to 122°F]
Start-up Temperature	-25°C to 50°C [-13°F to 122°F]
Ingress Protection Rating	IP66 (optical chamber) Wet location rated
Impact Resistance Rating	IK06 (glass lens) IK10 (frame) *IK10 polycarbonate lens option available, consult factory
Environment	Dry/damp/wet location

EPA And Fixture Weight Tables

*Fixture weights are estimated.

Notes:

1. Available with all pole mounting options.
2. Available with W1H2, WIH4 and W1HSJB adaptors only.
3. When combined with CSL lens, only AMB color temperature is available.
4. Available with Type 2, 3 and 4 distributions only.
5. Standard IK06 rating for glass lens. IK10 rated polycarbonate lens available, please consult factory.
6. Not available with type 5 distribution.
7. Available with type 3 and 5 distributions only.
8. Available for N03, N05, N07 and N10 outputs only.
9. Lumen output will vary according to the lens and distribution specified for the fixture. Please consult the photometric information section of the specification sheet for more details.
10. Available with AMB color temperature only.
11. Not available for FSL and HFSL lens.
12. Available with N02 and XS03 outputs only.
13. Backlight shield distributions not available if combined with WM option.
14. Available for CRI 80 only.
15. Available for CRI 80 and CRI 90 only.
16. Available for CRI 70 and CRI 80 only.
17. Binning within a 3-step McAdam ellipse, with the exception of 5700K.
18. Binning within a 2-step MacAdam ellipse, with the exception of 2200K and 5700K.
19. Binning within a 2-step MacAdam ellipse.
20. Available with CSL and HFSL lenses only.
21. Factory installed, not field changeable.
22. Specify RAL number followed by "TX" for textured finish (ex: RAL9007TX) or STX for Sandtex finish (ex: RAL9007STX). Textured or Sandtex finishes are recommended for the durability of all products. If a finish is not specified with the RAL number (ex: RAL9007), a glossy finish will be provided. Please consult factory for other RAL textures and glosses, or to match alternate color charts. Final color matching results may vary.
23. Longer lead times can be expected for custom RAL color finishes.
24. Setup charges apply for RAL colors. Consult factory for details.
25. DIM control can be used as NO (On/Off control) if no data is required.
26. Vibration tested in accordance with ANSI 136.31 2018 for bridge and overpass applications at 5Gv.
27. Specify only if a bridge or overpass application is required.
28. Not available for W1HSJB mounting adaptor.
29. Use only when exposed to salt spray. This option is not required for normal outdoor exposure.
30. Setup charges apply. Consult factory for details.
31. The WM-W1HSJB mounting is designed for installation on a round exterior (weatherproof) surface junction box (Ø4 in diameter and 1 5/8 in deep). For all other types of junction box, consult the factory.
32. Not available with VRBO option.

LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately.

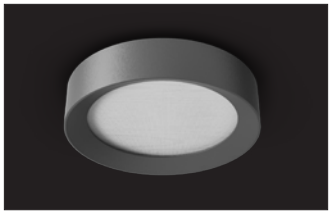
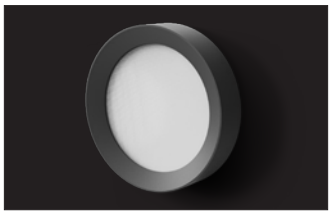
SN800/SN800C
SCENA
WALL/CEILING



PROJECT NAME: QUANTITY: TYPE:



ORDERING CODE:

ADA COMPLIANT

① Corrosion resistant diecast aluminum housing.
② Integrated standard 0-10V driver.
③ Light guide LED technology for uniform lambertian light distribution.
④ Impact resistant patterned tempered glass.
⑤ Sealed enclosure with durable gaskets.
⑥ All hardware in stainless steel.

SN800C

SN800

MATERIALS

Scena is made of aluminum diecast offering exceptional precision and durability. The main housing is perfectly sealed with durable gaskets. The integrated LED light module and 0-10V driver are protected by a patterned tempered glass. With a distinctive look and perceptible quality, Scena is designed for uniform lighting performance.

ELECTRICAL DRIVER

Standard driver is 0-10V dimming-ready (min. dim 5% / dim-to-off)* with: 120-277 multivolt compatibility, operating temperature range of -40°C/-40°F to 85°C/185°F*, over current and output short circuit protection.

LED LIGHT ENGINE

Offered in 2700K, 3000K, 3500K & 4000K / 80CRI.
70% LED lumen maintenance at 60,000 hours (L70/B50) based on IESNA LM-80-08 LED extrapolated life, calculated per IESNA TM-21-21.

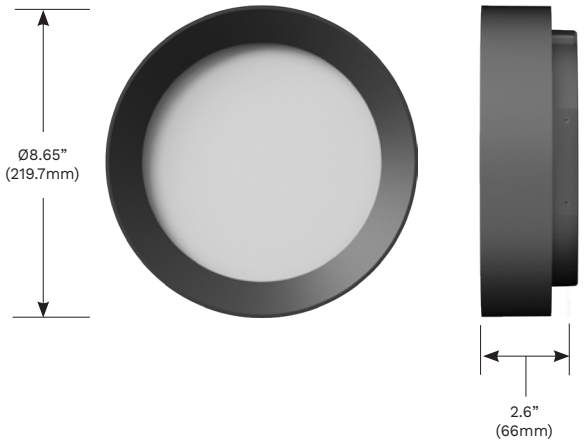
FINISH

Five-stage preparation process includes preheating of cast aluminum parts for air extraction. Polyester powder coating is applied through an electrostatic process, and oven cured for long term finish.

CERTIFICATION

UL certified to Canadian and U.S. safety standards. Certified for use in wet locations. Rated IP65 / IK10. Photometric testing performed by an independent laboratory in accordance with IES LM-79-08 standards at 25°C. Actual performance may differ as a result of end-user environment and application.

WARRANTY



5-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: https://www.luminis.com/technical/warranty/

MOUNTING

The mounting plate is designed to fit on a 4" (102mm) octagonal electrical box using 3.5" (89mm) C/C mounting holes. Fixture must be installed on a wall or a finished ceiling for exterior applications and/or when exposed to inclement weather.

MEASUREMENTS

Maximum weight: 3.8 lbs (1.7 kg)

* L1L23 light output dims to min. 1% / dim-to-off and has an operating temperature of -20°C/-4°F to 50°C/122°F

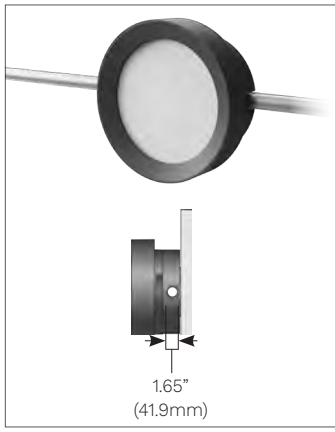
TYPICAL PHOTOMETRY SUMMARY

SN800-L1L11

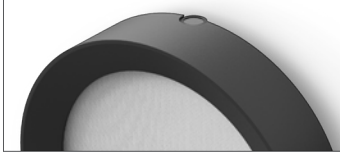
Total Lms: 1189 Lumens
Total Input Watts: 14 W
Efficacy: 85 Lumens/Watt
CCT/CRI: 4000K/80
Maximum Candela: 342.45 @ 0°H/92.5°V
BUG Rating: B0-U3-G2

SN800-L1L23



Total Lms: 2306 Lumens
Total Input Watts: 29 W
Efficacy: 79.5 Lumens/Watt
CCT/CRI: 4000K/80
Maximum Candela: 761 @ 0°H/92.5°V
BUG Rating: B0-U5-G3

LUMEN CONVERSION FACTOR (LCF)		
CCT	CRI	LCF
2700K	80	0.92
3000K	80	0.94
3500K	80	0.98
4000K	80	1.00



All Photometry shown use the 80CRI 4000K LEDs.

OPTION DETAILS

SWK
Surface (wall or ceiling) mounting option for Ø4” weatherproof junction box (3/4” conduit trade size). Weatherproof junction box, conduit and connectors by others. The SWK option adds 1.65" to the total depth of the product. (Not ADA compliant).

PH
Button-size photocell mounted on top casted housing. Instant turn-on, standard 5-10 second turn-off time delay.

CB
Decorative cross blades. (LCF 0.93)

Description

The Lumenpulse Lumenblade Bollard is an outdoor LED luminaire that uses a rectilinear version of the Lumencentro light engine to create a continuous line of light. Options include: heights of either two feet or three feet, with a Single or Dual head. Its seen-but-not-seen, minimalist design is sustainable, blends with both contemporary and heritage architectures, provides a high level of security, and is sensitive to the natural environment with low outputs and with a BUG rating of 0.

Features

Mounting	Single head, Dual head, Unlit bollard
Height	2 ft, 3 ft
Color and Color Temperature	Amber, 2200K, 2700K, 3000K, 3500K, 4000K, 5700K
Distributions	Type II, Type III or Type IV (with or without backlight shield), Type V, Type V square
Optical Option (factory installed)	Louver
Vibration Rating	Meets ANSI C136.31-2018 vibration rating for Bridge & Overpass applications
Options	Vibration Rated for Bridge and Overpass, Corrosion-resistant coating for hostile environments, Surge protector, Photoelectric Cell Button Type, Ground Fault Duplex Receptacle, Duplex receptacle with USB A and USB C
Warranty	5-year limited warranty

Performance

Output (nominal lumens)	Minimum 200lm (single head)/ Maximum 2000lm (dual head)
Efficacy	Up to 86 lm/W (N10 lumen output, 4000K, CRI 70+, Type III)
Color Rendering	3 SDCM for CRI 70+, 2 SDCM for CRI 80+ and CRI 90+
Lumen Maintenance	TM-21 L70 > 145,000 hrs (reported, Ta 25 - 50 °C [77 - 122 °F])
Dark Sky	Dark sky compliant (2200K, 2700K, 3000K and Amber color

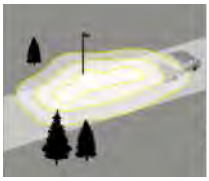
temperatures, BUG rating of U0)

Physical

Housing Material	Extruded aluminium 6000 alloy series
Lens Material	Optical tempered clear glass (Clearsite lens), Optical tempered frosted glass (Frostsite lens), Optical tempered half-frosted glass (Half-Frostsite lens)
Head Option	Bollard Head
Surface Finish	Super durable resistant exterior polyester powder coating meets AAMA 2604-98 requirements (5-years Florida exposure) a corrosion resistant finish (CRC) pre-finish is available to meet ASTM B-117 & ASTM D-1654 (salt spray resistance) and ASTM D-2247 requirements (humidity resistance).
Weight	16.53 lbs

Electrical and control

Voltage	120 volts, 208 volts, 240 volts, 277 volts, 347 volts, 480 volts
Control	On/Off control, 0-10V dimming, Lumentalk



Environmental

Storage Temperature	-40°C to 50°C [-40°F to 122°F] (device must reach start-up temperature value before operating)
Operating Temperature	-40°C [-40 °F] to 50°C [122 °F]
Start-up Temperature	-25°C [-13 °F] to 50°C [122 °F]
Impact Resistance Rating	IK06 (glass lens), IK10 (frame) *IK10 polycarbonate lens option available, consult factory
Ingress Protection Rating	IP66 (optical chamber), Wet location rated
Environment	Dry/damp/wet location

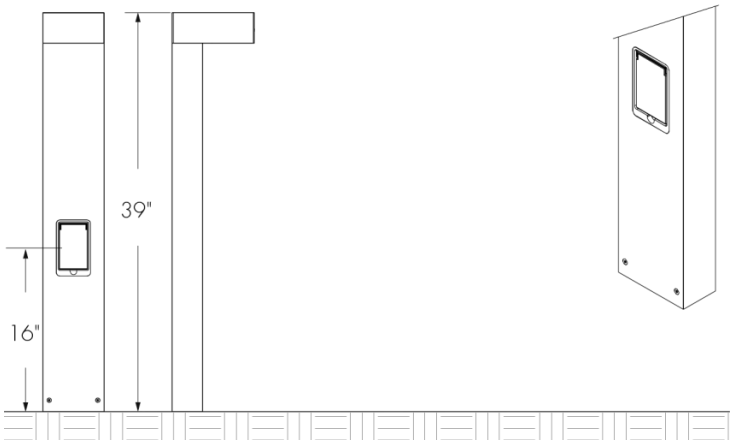
Anchoring details

Standard anchoring

A - (2x) Ø1/2 in by 12 in long anchor bolts with flats washers and nuts for each
B - Between 2.5 in and 3 in of the anchor bolts must be above ground for installation
C - Bolt circle
D - Hole for conduit (conduit by others)
E - Street side/Light side

BLDB-VRBO anchoring



A - (4x) Ø3/4 in by 26 in long anchor bolts with flats washers and nuts for each
B - Between 2.5 in and 3 in of the anchor bolts must be above ground for installation
C - Bolt circle
D - Access door and street side

Notes:

1. A ground fault duplex receptacle (DRG or DRG IU) and a duplex USB receptacle (USB or USB IU) cannot be combined with TM2 mounting.
2. Not available with LT control option.
3. Standard IK06 rating for glass lens. IK10 rated polycarbonate lens available, please consult factory.
4. Not available with type 5 distribution.
5. Available with type 3 and 5 distributions only.
6. Available with type 2, 3 and 4 distributions only.
7. Available for N03, N05, N07 and N10 outputs only.
8. Lumen output will vary according to the lens and distribution specified for the fixture. Please consult the photometric information section of the specification sheet for more details.
9. Available with AMB color temperature only.
10. Not available for FSL and HFSL lens.
11. Available with N02 output only.
12. Available for CRI 80 only.
13. Available for CRI 80 and CRI 90 only.
14. Available for CRI 70 and CRI 80 only.
15. Binning within a 3-step McAdam ellipse, with the exception of 5700K.
16. Binning within a 2-step MacAdam ellipse, with the exception of 2200K and 5700K.
17. Binning within a 2-step MacAdam ellipse
18. Available with CSL and HFSL lenses only.
19. Factory installed, not field changeable.
20. Specify RAL number followed by "TX" for textured finish (ex: RAL9007TX) or STX for Sandtex finish (ex: RAL9007STX). Textured or Sandtex finishes are recommended for the durability of all products. If a finish is not specified with the RAL number (ex: RAL9007), a glossy finish will be provided. Please consult factory for other RAL textures and glosses, or to match alternate color charts. Final color matching results may vary.
21. Setup charges apply for RAL colors. Consult factory for details.
22. Longer lead times can be expected for custom RAL color finishes.
23. DIM control can be used as NO (On/off control) if no data is required.
24. Not available with PB option.
25. When combined with 2 ft height option, Lumentalk cannot be combined with a ground fault duplex receptacle (DRG or DRG IU) or a duplex USB receptacle (USB or USB IU).

LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately

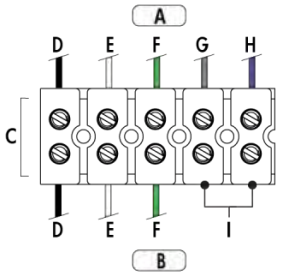
Typical Wiring Diagrams

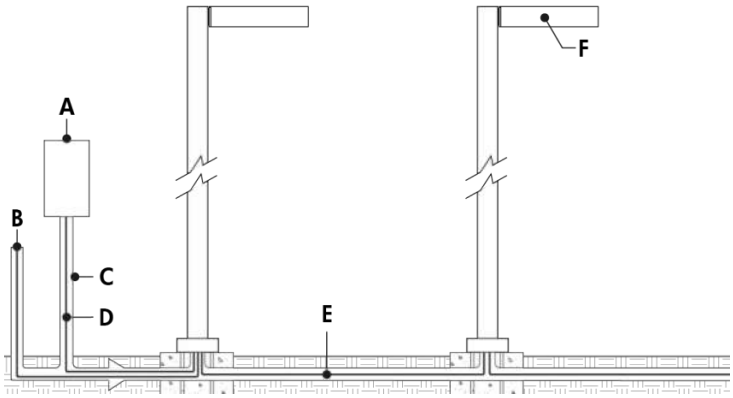
Wiring Color Code



Color	Black	White	Green	Purple	Gray
Use	Line	Line/Neutral	Ground	0-10V+	0-10V -

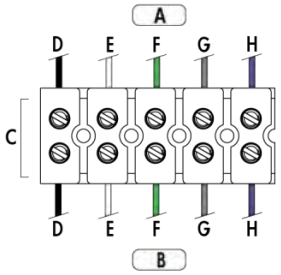
On/Off Control (NO)

A - Power input (120-480V, wiring by others)
B - Conduit (by others)
C - Power wiring (by others)
D - Lumenblade



On/Off control (NO) - Terminal Connector Wiring Detail

A - To driver
B - Power input or from previous fixture
C - Terminal connector
D - Line
E - Line/Neutral
F - Ground
G - 0-10V -
H - 0-10V +
I - Not required

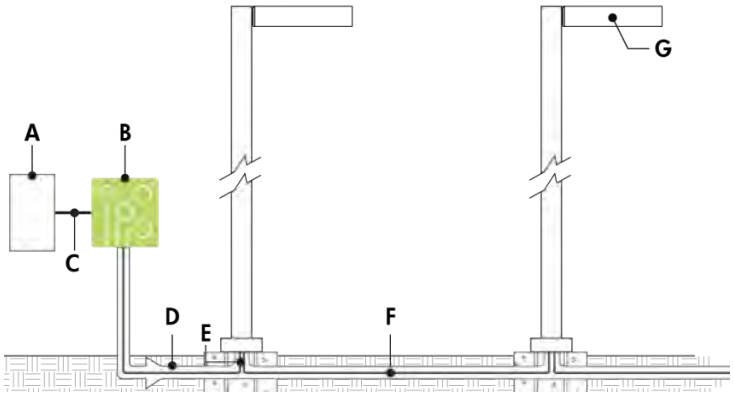


- Consult factory for specific applications and maximum fixture count/cable length recommendations.

0-10V Dimming (DIM)

A - Dimmer (by others)
B - Power input (120-480V, wiring by others)
C - Conduit (by others)
D - Data wiring (by others)
E - Power and data wiring (by others)
F - Lumenblade

0-10V Dimming (DIM) - Terminal Connector Wiring Detail



A - To driver
B - Power input or from previous fixture
C - Terminal connector
D - Line
E - Line/Neutral
F - Ground
G - 0-10V -
H - 0-10V +

- Consult factory for specific applications and maximum fixture count/cable length recommendations.
- 0-10V mA ratings: passive dimmer (Current Sink): 3mA per fixture, active dimmer (Current Source): 0.5mA per fixture.
- 1% minimum dimming value.

LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately
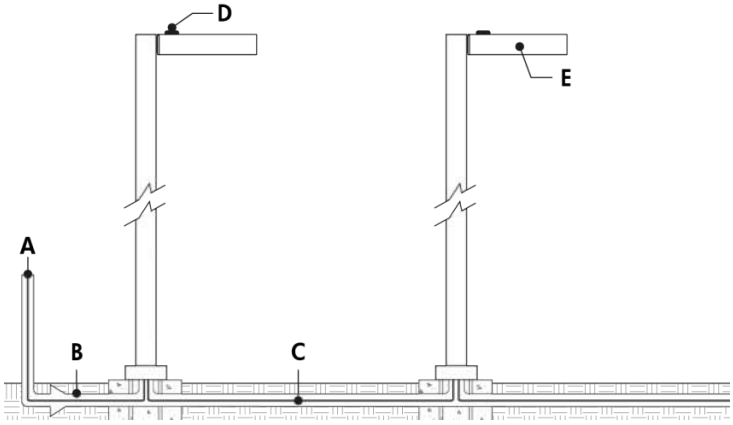
2023.06.26 copyright © 2023 LMPG Inc.

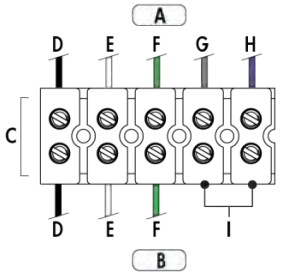
Lumentalk (LT)

A - Third party dimmer/controller
B - Lumentranslator (LTL-010)
C - Data wiring (by others)
D - Power line (120-277V, wiring by others)
E - Conduct (by others)
F - Power wiring (by others)
G - Lumenblade



Lumentalk (LT) - Terminal Connector Wiring Detail

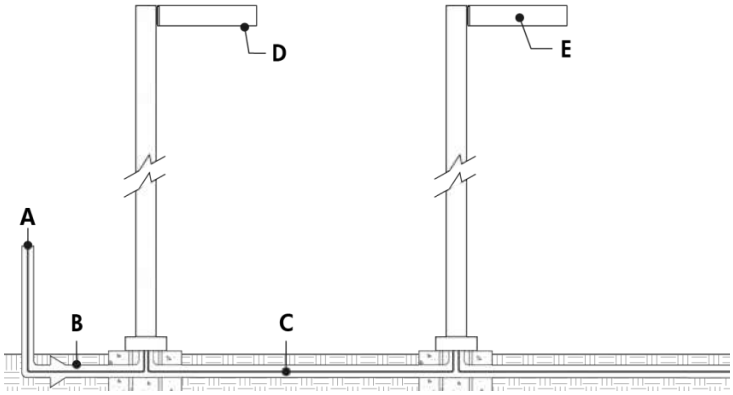
A - To driver
B - Power input or from previous fixture
C - Terminal connector
D - Line
E - Line/Neutral
F - Ground
G- Not required



- Consult factory for specific applications and maximum fixture count/cable length recommendations.
- Lumentalk enabled fixtures must be commissioned using LumentalkID software and a LID-LT. Consult factory for details.
- Maximum of 1 transmitter (Lumentranslator or Lumenlink) per system.
- No third party fixtures allowed on the same circuit

3 pins, 5 pins and 7pins Receptacle Control (SPR3, SPR3 SC, SPR5, SPR5 SC, SPR7, SPR7 SC)

A - Power input (120-480V, wiring by others)
B - Conduit (by others)
C - Power wiring (by others)
D - Photoelectric control
E - Lumenblade



3 pins, 5 pins and 7pins Receptacle Control (SPR3, SPR3 SC,SPR5, SPR5 SC, SPR7, SPR7 SC) - terminal connector wiring detail

A - To driver
B - Power input or from previous fixture
C - Terminal connector
D - Line
E - Line/Neutral
F - Ground
G - 0-10V -
H - 0-10V +
I - SPR3: Not required. SPR5/SPR7: From photocell receptacle

LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately
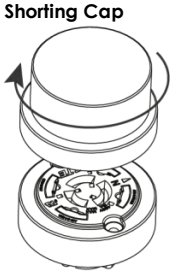
2023.06.26 copyright © 2023 LMPG Inc.

Motion Detector Control (MDxx)

A - Power input (120-480V, wiring by others)
B - Conduit (by others)
C - Power wiring (by others)
D - Motion detector
E - Lumenblade

Motion Detector (MDxx) - Terminal Connector Wiring Detail



A - To driver
B - Power input or from previous fixture
C - Terminal connector
D - Line
E - Line/Neutral
F - Ground
G- Not required

Options

SPR3, SPR5 and SPR7 - 3-Pin, 5-Pin and 7-Pin Receptacles

SPR3 SC, SPR5 SC and SPR7 SC - 3-Pin, 5-Pin and 7-Pin Receptacles with Shorting Cap

- Dimming receptacle meets ANSI C136.41 Standard

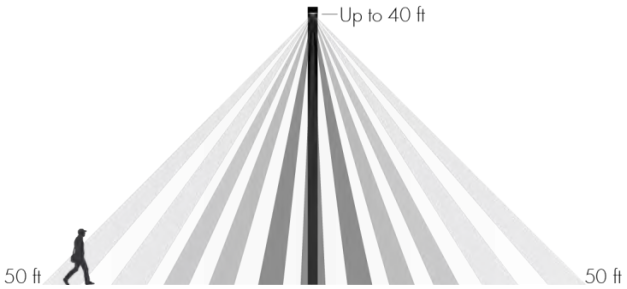
Photocell On/Off [9]	Dis	Dis	Dis	• Disable • 1fc - 250fc (Increment: **1fc**) — Dis

[1] When the sensor detects motion, the dimming control output ramps up to the selected HIGH light level.
[2] After the sensor stops detecting motion and the time delay expires, the dimming control output fades down to the selected LOW light level.
[3] The selected time period that must elapse after the last time the sensor detects motion for the electric lights to fade to LOW mode.
[4] The time period that must elapse after the lights fade to LOW mode, and the sensor detects no motion for the electric lights to turn OFF.
[5] When enabled, the selectable ambient light level threshold that will hold the electric lights off or at LOW level when the sensor detects motion.
[6] The response of the PIR detector to motion within the sensor's coverage area.
[7] Time period for light level to increase from LOW to HIGH.
[8] Time period for light level to decrease from HIGH to LOW.
[9] When enabled, the sensor will force the load OFF after the light level has exceeded the selected photocell setpoint PRIOR SAVE SEND for at least a minute. It will also force the load ON when the light level goes below the setpoint, even if no motion is detected.
[10] The motion detector programming can be modified on site. A remote is required, order separately. See Remote section in the specification sheet for details.

Dimming: When motion is detected within the sensor's coverage area, the sensor sends a signal to ramp the load up to the selectable High Mode level unless the ambient light level is higher than the selected setpoint. When no motion is detected for the duration of the time delay setting, the lights will go to the selectable Low Mode level based on the signal from the sensor. If desired, a cut off time delay will trigger to eventually turn the lights OFF.
Non dimming: When motion is detected within the sensor's coverage area, the sensor sends a signal to turn the load ON unless the ambient light level is higher than the selected setpoint. When no motion is detected for the duration of the time delay setting, the lights will go OFF based on the signal from the sensor.
Dusk to dawn control: When photocell on/off is enabled, and the ambient light falls below the photocell setpoint, the sensor ramps the load up to the selectable High Mode level. If no motion is detected for the duration of the time delay setting, the lights will go to the selectable Low Mode level. If the cut off time delay is disabled, the load will remain on, at High or Low level, based on motion detection, until the ambient light increases above the photocell setpoint.

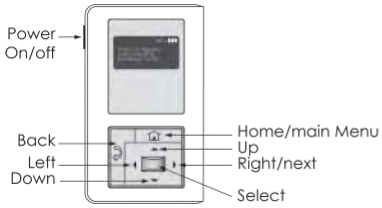


Coverage Area

Narrow Lens (MD10N, MD30N, MD50N and MDPN)*

* Maximum 20 ft height, 40 ft diameter coverage area

Wide Lens (MD10W, MD30W, MD50W and MDPN)*



* Maximum 40 ft height, 100 ft diameter coverage area (Lumenpulse maximum pole height: up to 30 ft consult relative pole specification sheets for more details).

High temperatures at the covered area (above 88 °F - 91 °F) reduce the detection zone of the sensor. Consider adding more sensors if the ambient temperatures are expected to be high. Additionally, high floor level temperature may require larger movement for detection. Coverages shown in the diagrams are maximum, measured in linear feet. They represent coverage for walking motion, with no obstacles.

Notes:

1. Product code is for a single fixture only (S1E configuration). For double configuration (S2E), a second product code must be completed.
2. Not available with LT control option.
3. Consult factory for Softsite lens option. Available for 3000lm (1 board), 5000lm (2 boards), 7000lm (3 boards) and 10000lm (4 boards) outputs.
4. Motion detector options add 6 1/4 in to total length of fixture.
5. Available up to 277V.
6. Available for CRI 80 only.
7. Available for CRI 80 and CRI 90 only.
8. Available for CRI 70 and CRI 80 only.
9. Binning within a 3-step McAdam ellipse, with the exception of 5700K.
10. Binning within a 2-step MacAdam ellipse, with the exception of 2200K and 5700K.
11. Binning within a 2-step MacAdam ellipse
12. Specify RAL number followed by "TX" for textured finish (ex: RAL9007TX) or STX for Sandtex finish (ex: RAL9007STX). Textured or Sandtex finishes are recommended for the durability of all products. If a finish is not specified with the RAL number (ex: RAL9007), a glossy finish will be provided. Please consult factory for other RAL textures and glosses, or to match alternate color charts. Final color matching results may vary.
13. Setup charges apply for RAL colors. Consult factory for details.
14. Longer lead times can be expected for custom RAL color finishes.
15. DIM control can be used as NO (On/off control) if no data is required.
16. Not available with SPR3, SPR3 SC, SPR5, SPR5 SC, SPR7 and SPR7 SC 3-Pin, 5-Pin, and 7-Pin receptacles options and MD10N, MD10W, MD30N, MD30W, MD50N, MD50W, MDPN and MDPW motion detector options.
17. Available with S40, S60, M80 and M100 output options only.
18. Use only when exposed to salt spray. This option is not required for normal outdoor exposure.
19. Setup charges apply. Consult factory for details.
20. Only one receptacle can be specified per fixture, cannot be combined with motion detector option.
21. The motion detector programming can be modified on site. A remote is required, order separately. See Remote section in the specification sheet for details.
22. Only one motion detector can be specified per fixture, cannot be combined with a receptacle.
23. The motion detector is programmed in the factory, as per the settings requested at the time of the order.
24. Consult Pole Mounting Adaptor section for standard available configurations.

Description

The Lumenpulse Lumenblade Column is an outdoor LED luminaire that uses a rectilinear version of the Lumencentro light engine to create a continuous line of light. Options include: heights of either 10 feet or 12 feet, with a Single or Dual head. Its seen-but-not-seen, minimalist design is sustainable, blends with both contemporary and heritage architectures, provides a high level of security, and is sensitive to the natural environment with low outputs and with a BUG rating of 0.

Features

Mounting	Single head, Dual head
Height	10 ft, 12 ft
Color and Color Temperature	Amber, 2200K, 2700K, 3000K, 3500K, 4000K, 5700K
Distributions	Type II, Type III or Type IV (with or without backlight shield), Type V, Type V square
Optical Option (factory installed)	Louver
Vibration Rating	Meets ANSI C136.31-2018 vibration rating for Bridge & Overpass applications
Options	Vibration Rated for Bridge and Overpass, Corrosion-resistant coating for hostile environments, Surge protector, Photoelectric Cell Button Type, Ground Fault Duplex Receptacle, Duplex receptacle with USB A and USB C, 3-Pin Receptacle with or without shorting cap, 5-Pin Receptacle with or without shorting cap, 7-Pin Receptacle with or without shorting cap, Motion detector, Direct Burial
Warranty	5-year limited warranty

Performance

Output (nominal lumens)	Minimum 300lm (single head)/ 200lm for bollard head option, Maximum 5000lm (dual head)
Efficacy	Up to 106 lm/W (XS10 lumen output, 4000K, CRI 70+,Type III)

Ratings

IP66 (optical chamber) IK06 (lens) IK10*(frame)
*IK10 polycarbonate lens option available, consult factory.

Motion detector options

Certifications

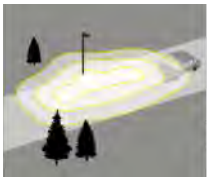
Color Rendering	3 SDCM for CRI 70+, 2 SDCM for CRI 80+ and CRI 90+
Lumen Maintenance	TM-21 L70 > 145,000 hrs (reported, Ta 25 - 50 °C [77 - 122 °F])
Dark Sky	Dark sky compliant (2200K, 2700K, 3000K and Amber color temperatures, BUG rating of U0)

Physical

Housing Material	Extruded aluminium 6000 alloy series
Lens Material	Optical tempered clear glass (Clearsite lens), Optical tempered frosted glass (Frostsite lens), Optical tempered half-frosted glass (Half-Frostsite lens)
Head Option	Bollard Head, Column head
Head Option Height	3 ft
Surface Finish	Super durable resistant exterior polyester powder coating meets AAMA 2604-98 requirements (5-years Florida exposure) a corrosion resistant finish (CRC) pre-finish is available to meet ASTM B-117 & ASTM D-1654 (salt spray resistance) and ASTM D-2247 requirements (humidity resistance).
Weight	22.5 lbs for single head option (10 ft fixture)

Electrical and control

Voltage	120 volts, 208 volts, 240 volts, 277 volts, 347 volts, 480 volts
Control	On/Off control, 0-10V dimming, Lumentalk



Environmental

Storage Temperature	-40°C to 50°C [-40°F to 122°F] (device must reach start-up temperature value before operating)
Operating Temperature	-40°C to 50°C [-40°F to 122°F]
Start-up Temperature	-25°C [-13 °F] to 50°C [122 °F]
Ingress Protection Rating	IP66 (optical chamber), Wet location rated
Impact Resistance Rating	IK06 (glass lens), IK10 (frame) *IK10 polycarbonate lens option available, consult factory
Environment	Dry/damp/wet location

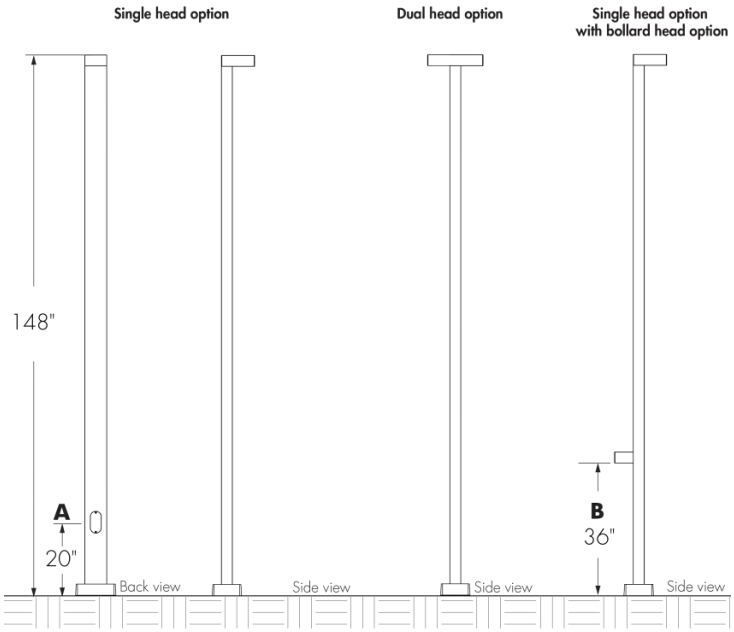
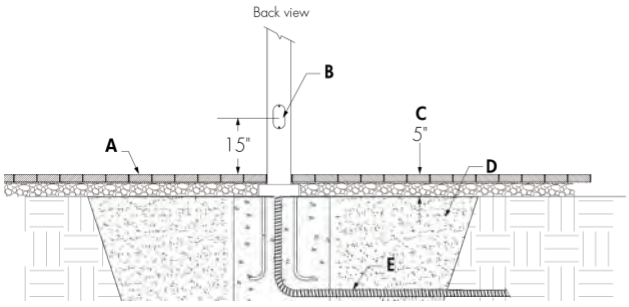
Standard installation assembly details



A - (4x) Ø3/4 in by 26 in long anchor bolts with flats washers and nuts for each
B - Between 2.5 in and 3 in of the anchor bolts must be above ground for installation
C - Bolt circle
D - Access door and street side

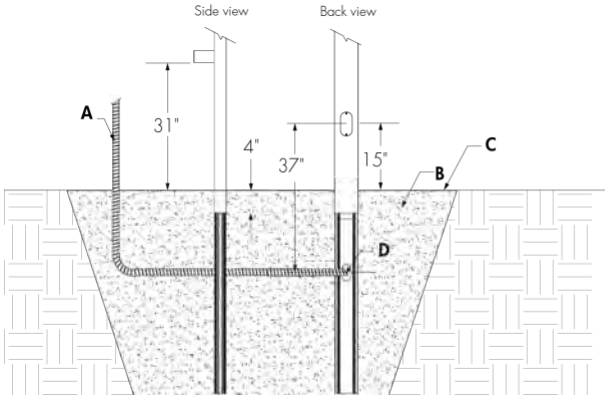
Standard installation dimensions

10 ft column



12 ft column

A - Access door (distance from ground to center of access door)
B - Bollard head option (distance from ground to bollard head)



Semi-buried installation assembly details

A - Finished grade
B - Access door
C - Buried section, at least 5 in
D - Filling
E - Conduit (by others)

LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately

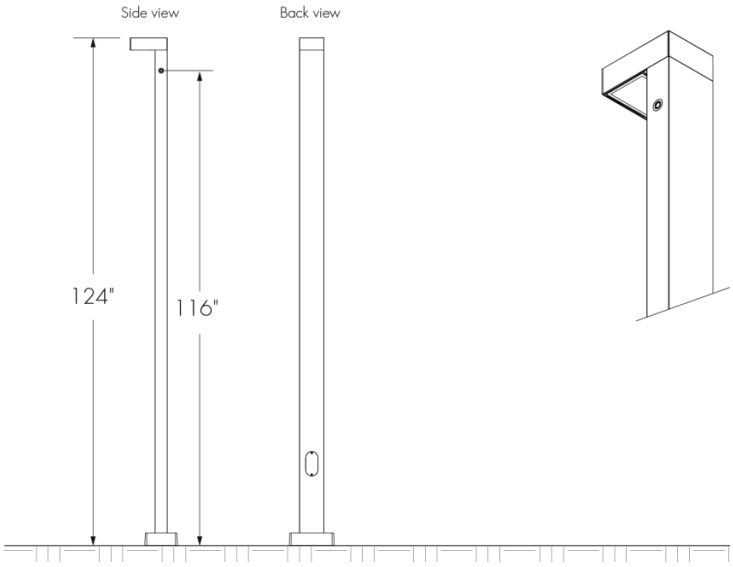
Duplex Receptacle installation dimensions

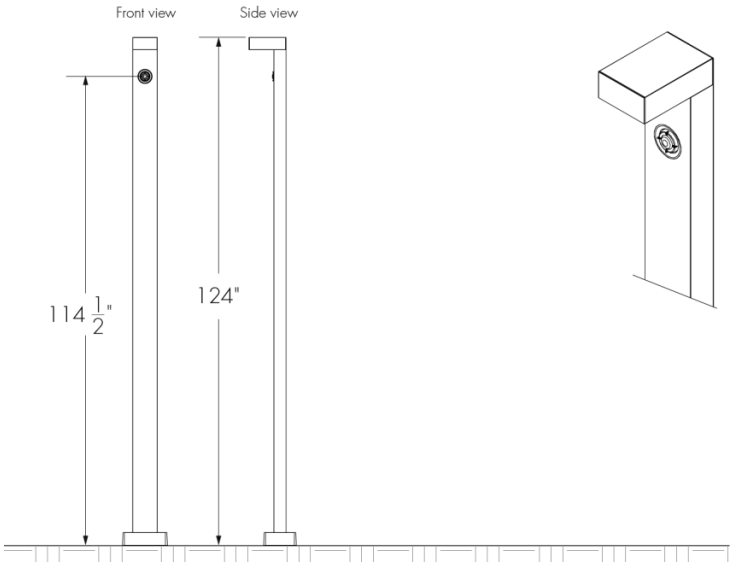
DRG - Ground fault duplex receptacle
USB - Duplex receptacle with USB A and USB C



DRG IU - Ground Fault Duplex Receptacle (while in use)
USB IU - Duplex receptacle with USB A and USB C (while in use)

The duplex receptacle must be installed in accordance with applicable national and local electrical and construction codes by a person familiar with the construction and operation of the product and the hazards involved. Refer to national and local electrical codes before selecting a duplex receptacle to ensure all requirements are met.

Photoelectric Cell Button installation dimensions



PB - Photoelectric Cell Button Type

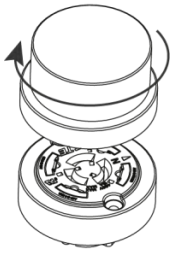
Motion detector installation dimensions

Motion detector (MD10N, MD30N, MD50N, MDNL and MDPN)

Remote (order separately)

MDRC001 - Remote to program motion detector on site



- Compatible with all motion detector options.

3-Pin, 5-Pin and 7-Pin Receptacles Options

SPR3, SPR5 and SPR7 - 3-Pin, 5-Pin and 7-Pin Receptacles

SPR3 SC, SPR5 SC and SPR7 SC - 3-Pin, 5-Pin and 7-Pin Receptacles with Shorting Cap

- Dimming receptacle meets ANSI C136.41 Standard

LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately

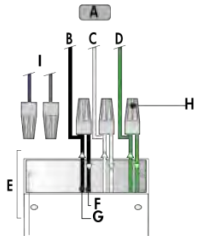
Typical Wiring Diagrams

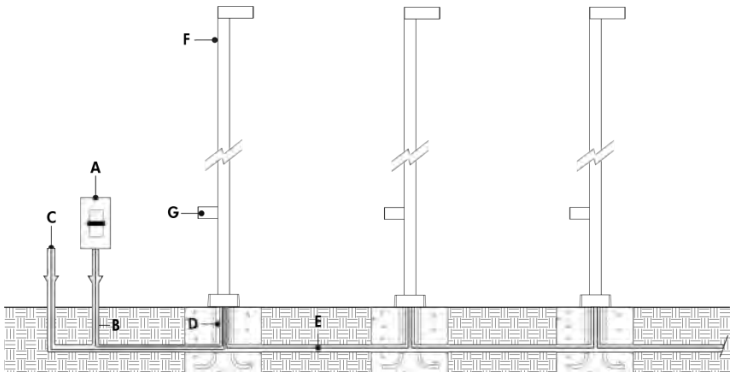
Wiring Color Code



Color	Black	White	Green	Purple	Gray
Use	Line	Line/Neutral	Ground	0 -10V+	0 -10V -

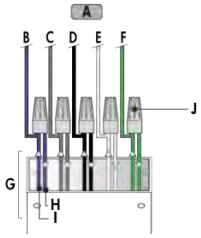
On/Off Control (NO)

A - Power input (120-480V)
B - Conduit (by others)
C - Power wiring (by others)
D - Lumenblade Column
E - Bollard head option



On/Off Control (NO) - wiring detail

A - To fixture
B - Line
C - Line/Neutral
D - Ground
E - Conduit (by others)
F - To next fixture
G - Power input or from previous fixture
H - Wire-nuts (by others)
I - Not required

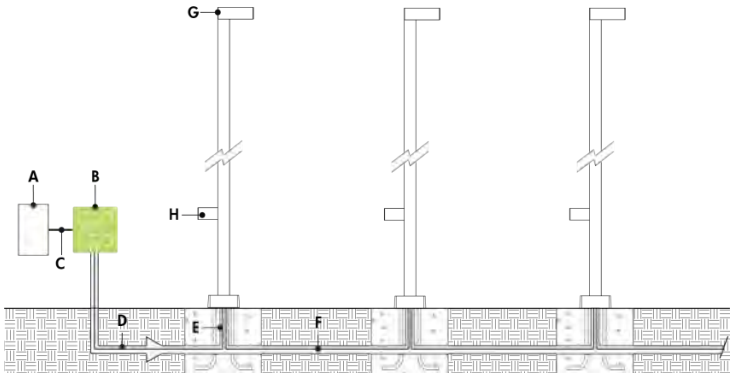


- Consult factory for specific applications and maximum fixture count/cable length recommendations.

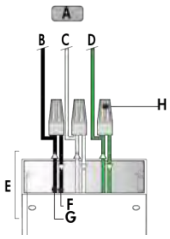
0-10V dimming (DIM)

A - Dimmer (by others)
B - Data wiring (by others)
C - Power input (120-480V, wiring by others)
D - Conduit (by others)
E - Power and data wiring (by others)
F - Lumenblade Column
G - Bollard head option

0-10V dimming (DIM) - wiring detail



A - To fixture
B - 0-10V +
C - 0-10V -
D - Line
E - Neutral
F - Ground
G - Conduit (by others)
H - To next fixture
I - Power input or from previous fixture
J - Wire-nuts (by others)



- Consult factory for specific applications and maximum fixture count/cable length recommendations.
- 0-10V mA ratings: passive dimmer (Current Sink): 3mA per fixture, active dimmer (Current Source): 0.5mA per fixture.
- 1% minimum dimming value.

LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately

Lumentalk (LT)

A - Third party dimmer/controller
B - Lumentranslator (LTL-010)
C - Data wiring (by others)
D - Power line (120-277V, wiring by others)
E - Conduct (by others)
F - Power wiring (by others)
G - Lumenblade Column
H - Bollard head option

A - To fixture
B - Line
C - Line/Neutral
D - Ground
E - Conduit (by others)
F - To next fixture
G - Power input or from previous fixture
H - Wire-nuts (by others)

- Consult factory for specific applications and maximum fixture count/cable length recommendations.
- Lumentalk enabled fixtures must be commissioned using LumentalkID software and a LID-LT. Consult factory for details.
- Maximum of 1 transmitter (Lumentranslator or Lumenlink) per system.
- No third party fixtures allowed on the same circuit.
- DRG or USB option must be on a separated circuit.

Photocell [9] **On/Off**	Dis		Dis		Dis		• Disable • 1fc - 250fc (Increment: **1fc**)	Dis

[1] When the sensor detects motion, the dimming control output ramps up to the selected HIGH light level.
[2] After the sensor stops detecting motion and the time delay expires, the dimming control output fades down to the selected LOW light level.
[3] The selected time period that must elapse after the last time the sensor detects motion for the electric lights to fade to LOW mode.
[4] The time period that must elapse after the lights fade to LOW mode, and the sensor detects no motion for the electric lights to turn OFF.
[5] When enabled, the selectable ambient light level threshold that will hold the electric lights off or at LOW level when the sensor detects motion.
[6] The response of the PIR detector to motion within the sensor's coverage area.
[7] Time period for light level to increase from LOW to HIGH.
[8] Time period for light level to decrease from HIGH to LOW.
[9] When enabled, the sensor will force the load OFF after the light level has exceeded the selected photocell setpoint PRIOR SAVE SEND for at least a minute. It will also force the load ON when the light level goes below the setpoint, even if no motion is detected.
[10] The motion detector programming can be modified on site. A remote is required, order separately. See Remote section in the specification sheet for details.

Dimming: When motion is detected within the sensor's coverage area, the sensor sends a signal to ramp the load up to the selectable High Mode level unless the ambient light level is higher than the selected setpoint. When no motion is detected for the duration of the time delay setting, the lights will go to the selectable Low Mode level based on the signal from the sensor. If desired, a cut off time delay will trigger to eventually turn the lights OFF.
Non dimming: When motion is detected within the sensor's coverage area, the sensor sends a signal to turn the load ON unless the ambient light level is higher than the selected setpoint. When no motion is detected for the duration of the time delay setting, the lights will go OFF based on the signal from the sensor.
Dusk to dawn control: When photocell on/off is enabled, and the ambient light falls below the photocell setpoint, the sensor ramps the load up to the selectable High Mode level. If no motion is detected for the duration of the time delay setting, the lights will go to the selectable Low Mode level. If the cut off time delay is disabled, the load will remain on, at High or Low level, based on motion detection, until the ambient light increases above the photocell setpoint.

Coverage area

Narrow lens (MD10N, MD30N, MD50N and MDPN)*

* Maximum 12 ft height, 24 ft diameter coverage area.

High temperatures at the covered area (above 88 °F - 91 °F) reduce the detection zone of the sensor. Consider adding more sensors if the ambient temperatures are expected to be high. Additionally, high floor level temperature may require larger movement for detection. Coverages shown in the diagrams are maximum, measured in linear feet. They represent coverage for walking motion, with no obstacles.

Notes:

1. Not available with CH head option.
2. Not available with BH head option.
3. Not available with HFSL lens.
4. Not available with LT control option.
5. Standard IK06 rating for glass lens. IK10 rated polycarbonate lens available, please consult factory.
6. Not available with type 5 distribution.
7. Available with type 3 and 5 distributions only.
8. Lumen output will vary according to the lens and distribution specified for the fixture. Please consult the photometric information section of the specification sheet for more details.
9. Available with AMB color temperature only.
10. Available with column head XS03 output only.
11. Available for CRI 80 only.
12. Available for CRI 80 and CRI 90 only.
13. Available for CRI 70 and CRI 80 only.
14. Binning within a 3-step McAdam ellipse, with the exception of 5700K.
15. Binning within a 2-step MacAdam ellipse, with the exception of 2200K and 5700K.
16. Binning within a 2-step MacAdam ellipse
17. Available with CSL lens only.
18. Factory installed, not field changeable.
19. Specify RAL number followed by "TX" for textured finish (ex: RAL9007TX) or STX for Sandtex finish (ex: RAL9007STX). Textured or Sandtex finishes are recommended for the durability of all products. If a finish is not specified with the RAL number (ex: RAL9007), a glossy finish will be provided. Please consult factory for other RAL textures and glosses, or to match alternate color charts. Final color matching results may vary.
20. Setup charges apply for RAL colors. Consult factory for details.
21. Longer lead times can be expected for custom RAL color finishes.
22. DIM control can be used as NO (On/off control) if no data is required.
23. Not available with PB photoelectric cell, SPR3, SPR3 SC, SPR5, SPR5 SC, SPR7 and SPR7 SC 3-Pin, 5-Pin, and 7-Pin receptacles and MD10N, MD30N, MD50N, MDPN and MDNL motion detector options.

Notes:

1. Not available with CH head option.
3. Not available with HFSL lens.
4. Not available with LT control option.
5. Standard IK06 rating for glass lens. IK10 rated polycarbonate lens available, please consult factory.
6. Not available with type 5 distribution.
11. Available for CRI 80 only.
12. Available for CRI 80 and CRI 90 only.
13. Available for CRI 70 and CRI 80 only.
14. Binning within a 3-step McAdam ellipse, with the exception of 5700K.
15. Binning within a 2-step MacAdam ellipse, with the exception of 2200K and 5700K.
16. Binning within a 2-step MacAdam ellipse
18. Factory installed, not field changeable.
24. Vibration tested in accordance with ANSI 136.31 2018 for bridge and overpass applications at 5Gv.
25. Specify only if a bridge or overpass application is required.
26. Use only when exposed to salt spray. This option is not required for normal outdoor exposure.
27. Setup charges apply. Consult factory for details.
28. Not available for 480V voltage option.
29. Not available with MD10N, MD30N, MD50N, MDPN and MDNL motion detector options.
30. A ground fault duplex receptacle (DRG or DRG IU) and a duplex USB receptacle (USB or USB IU) cannot be combined.
31. Only one receptacle can be specified per fixture, cannot be combined with motion detector option.
32. Not available with PB option.
33. The motion detector programming can be modified on site. A remote is required, order separately. See Remote section in the specification sheet for details.
34. Only one motion detector can be specified per fixture, cannot be combined with a receptacle.
35. MD10N, MD30N, MD50N and MDPN are Wattstopper motion detectors.
36. MDNL is an N-Light motion detector.
37. Consult factory for details.
38. Not available for 347V and 480V voltage options.
39. The motion detector is programmed in the factory, as per the settings requested at the time of the order.
40. Available for N02, N03, N05, N07 and N10 bollard head outputs only.
41. Available for XS03, XS10, XS15, XS20 and XS25 column head outputs only.
42. Not available with type 5 distribution when head option is specified for the Lumenblade column.
43. Available with type 3 and type 5 distributions when a head option is specified for the Lumenblade column.
44. Available with type 2, type 3 and type 4 distributions when a bollard head is specified for the Lumenblade column.
45. Available for N03, N05, N07 and N10 bollard head outputs only.
46. Available with AMB head color temperature only.
47. Available with N02 output when a bollard head is specified. Available with XS03 output when a second column head is specified for the Lumenblade column.
48. Not available for FSL and HFSL lens.
49. Not available for FSL lens.

BRICK-OD OUTDOOR

FOR INDOOR, REFER TO MODEL #: 1575

Catalog Number:
7075-12-TW-H08-30K

TYPE WP-1

BROWNLEE

7075-12” in Textured Black (TB)

7075-24” in Textured Black (TB)

7075 LED

The BRICK-OD (outdoor) is a minimal, clean and contemporary exterior sconce with exceptional versatility: Three ADA compliant sizes (8”, 12” and 24”), single direction LED distribution, and three finishes to choose from. Perfect for exterior facades, entryways, columns, and breezeways. Since this is a wet-listed unit, it can also be used in healthcare applications requiring durable luminaires which can be wiped down. Available with integral battery backup.

FINISHES

TB TG TW

BRICK-OD OUTDOOR

FOR INDOOR, REFER TO MODEL #: 1575

PROJECT:
MODEL #:
FIXTURE TYPE:

STANDARD SPECIFICATIONS - *SINGLE DIRECTION DISTRIBUTION (7075)*

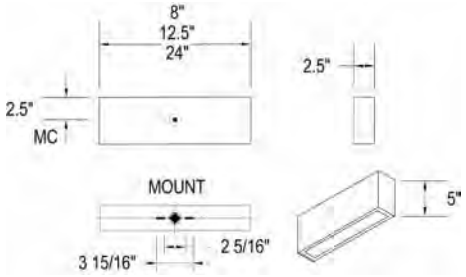
OUTER FRAME & MOUNT PLATE
Formed and welded aluminum. Countersunk fasteners located on top of fixture. No exposed hardware on sides or bottom of fixture. Closed cell foam gasket on rear mount plate.

DIFFUSER
UV stabilized frosted acrylic diffuser. Smooth uniform illumination.

LED PERFORMANCE - 3500K STANDARD - TYPE 2 DISTRIBUTION
120-277V - 3500K, L80 rating - 60,000 hrs - L70 rating (projected) - 100,000 hrs
Amperage rated @ 110V input
Operating ambient temperature: -20°C / -4°F - 50°C / 122°F

Delivered 3500K lumens noted. Consult Brownlee.com for performance of all CCTs.
08 Size: C13 – 13W nominal, .10 A input - 1165 lm. Dimmable (0-10V). 82 CRI Standard.
12 Size: H08 – 8W nominal, .07 A input - 860 lm. Dimmable (0-10V). 90+ CRI Standard.
12 Size: H16 – 16W nominal, .14 A input – 1490 lm. Dimmable (0-10V). 90+ CRI Standard.
12 Size: H21 – 21W nominal, .18 A input – 1725 lm. Dimmable (0-10V). 90+ CRI Standard.
24 Size: H16 – 16W nominal, .14 A input – 1470 lm. Dimmable (0-10V). 90+ CRI Standard.
24 Size: H32 – 32W nominal, .27 A input – 3030 lm. Dimmable (0-10V). 90+ CRI Standard.
24 Size: H41 – 41W nominal, .35 A input – 3410 lm. Dimmable (0-10V). 90+ CRI Standard.

MOUNTING
Fixture mounts to a 4x4 junction box (by others).
Wet-listed in the downward orientation only (light source facing down).



FINISH
Durable corrosion resistant powder coat finish.
Custom colors available, contact factory.

WARRANTY
5 year limited warranty on this LED product.
Consult factory for details.

40K	4000K color temperature

6. AVAILABLE OPTIONS

90R[0]	90 CRI (C-Series Wattages: 30K only)
BAC[1]	Buy American Compliant
BBI[2]	Integral Battery Backup - 10W (32F minimum)
BBC[2]	Integral Battery Backup, Cold Weather - 15W (-4F minimum) (24 Size Only)

Battery must be connected to continuous power supply within 7 Mo. of shipping. See Warranty Note 3.

DTR[4]	Triac (Line Voltage) Dimming (120V) (Cannot be combined with BBI/BBC)
ES[6]	ENERGY STAR® (All except H08, H21, H41)
FCL[7]	French Canadian Label
PO1	Photo Control (120V)
PO2	Photo Control (208, 240, 277V)
T24[9]	Title 24 JA8 Compliant (H16 & H32 only)

Universal Footnotes (only applies if option is listed on spec sheet): (0) 90R - 90 CRI output-loss multiplier: 0.85 (estimate). Cannot be combined with ES. **1) BAC** - cannot be combined with FCL. **(2) BBI/BBS/BBC** - cannot be combined with ECW or EXT. **(3) BLD** - includes integral microwave motion sensor (do not combine with OCC option). Cannot be combined with DTR. **(4) DTR** - cannot be combined with BLD. **(5) ECW** - cannot be combined with BBI, BBC, or DTR. **(6) ES** - cannot be combined with 90R or T24. **(7) FCL** - cannot be combined with BAC. **(8) OCC** - integral microwave motion sensor (ON/OFF). **(9) T24** - includes JA8 labeling and 90 CRI LEDs (do not combine with 90R option). Cannot be combined with ES. **(10) PCH/PC4** - cannot be combined with BLD or OCC. **Add'l Notes: *BBI/BBC** - BBI minimum operating temp: 10C/50F unless otherwise stated. BBC minimum operating temp: -20C/-4F. ****BLD** - integral microwave motion sensor with step-dim control. 1: Motion is detected, illuminate to 100%. 2: Motion no longer detected, dim to set level. 3: Remain in continuous dimmed state or turn off after set period. Configurable via onboard dip switches.

Description

The Lumenpulse Lumenblade Nano is an outdoor LED luminaire that uses a rectilinear version of the Lumencentro light engine to create a continuous line of light. Side Mount or Wall Mount options are available. Its seen-but-not-seen, minimalist design is sustainable, blends with both contemporary and heritage architectures, provides a high level of security, and is sensitive to the natural environment with low outputs and with a BUG rating of 0.

Features

Mounting	Side Mounting, Wall Mounting
Color and Color Temperature	True Amber 585nm-595nm (Turtle-Friendly), 2200K, 2700K, 3000K, 3500K, 4000K
Distributions	Type II, Type III or Type IV (with or without backlight shield), Type V, Type V square
Optical Option (factory installed)	Louver
Vibration Rating	Meets ANSI C136.31-2018 vibration rating for Bridge & Overpass applications
Option	Vibration Rated for Bridge and Overpass Corrosion-resistant Coating for Hostile Environments
Warranty	5-year limited warranty

Performance

Output (Nominal Lumens)	Minimum 200lm/ Maximum 2500lm
Efficacy	Up to 127 lm/W (XS10 lumen output, 4000K, CRI 70+, Type VS)
Color Rendering	3 SDCM for CRI 70+, 2 SDCM for CRI 80+ and CRI 90+
Lumen Maintenance	TM-21 L70 > 145,000 hrs (reported, Ta 25 - 50 °C [77 - 122 °F])
Dark Sky	Dark sky compliant (2200K, 2700K, 3000K and Amber color temperatures, BUG rating of U0)

Physical

Housing Material	Extruded aluminium 6000 alloy series
Lens Material	Optical tempered clear glass (Clearsite lens), Optical tempered frosted glass (Frostsite lens), Optical tempered half-frosted glass (Half-Frostsite lens)
Surface Finish	Super durable resistant exterior polyester powder coating meets AAMA 2604-98 requirements (5-years Florida exposure). A corrosion resistant finish (CRC) pre-finish is available to meet ASTM B-117 & ASTM D-1654 (salt spray resistance) and ASTM D-2247 requirements (humidity resistance).
Weight	1.87 lbs to 4.84 lbs, refer to EPA and fixture weight tables for details

Electrical and Control

Voltage	120 volts, 208 volts, 240 volts, 277 volts
Control	On/Off Control, 0-10V Dimming

Environmental

Storage Temperature	-40°C to 50°C [-40°F to 122°F] (device must reach start-up temperature value before operating)
Operating Temperature	-40°C to 50°C [-40°F to 122°F]
Start-up Temperature	-25°C to 50°C [-13°F to 122°F]
Ingress Protection Rating	IP66 (optical chamber) Wet location rated
Impact Resistance Rating	IK06 (glass lens) IK10 (frame) *IK10 polycarbonate lens option available, consult factory
Environment	Dry/damp/wet location

EPA And Fixture Weight Tables

*Fixture weights are estimated.

Notes:

1. Available with all pole mounting options.
2. Available with W1H2, WIH4 and W1HSJB adaptors only.
3. When combined with CSL lens, only AMB color temperature is available.
4. Available with Type 2, 3 and 4 distributions only.
5. Standard IK06 rating for glass lens. IK10 rated polycarbonate lens available, please consult factory.
6. Not available with type 5 distribution.
7. Available with type 3 and 5 distributions only.
8. Available for N03, N05, N07 and N10 outputs only.
9. Lumen output will vary according to the lens and distribution specified for the fixture. Please consult the photometric information section of the specification sheet for more details.
10. Available with AMB color temperature only.
11. Not available for FSL and HFSL lens.
12. Available with N02 and XS03 outputs only.
13. Backlight shield distributions not available if combined with WM option.
14. Available for CRI 80 only.
15. Available for CRI 80 and CRI 90 only.
16. Available for CRI 70 and CRI 80 only.
17. Binning within a 3-step McAdam ellipse, with the exception of 5700K.
18. Binning within a 2-step MacAdam ellipse, with the exception of 2200K and 5700K.
19. Binning within a 2-step MacAdam ellipse.
20. Available with CSL and HFSL lenses only.
21. Factory installed, not field changeable.
22. Specify RAL number followed by "TX" for textured finish (ex: RAL9007TX) or STX for Sandtex finish (ex: RAL9007STX). Textured or Sandtex finishes are recommended for the durability of all products. If a finish is not specified with the RAL number (ex: RAL9007), a glossy finish will be provided. Please consult factory for other RAL textures and glosses, or to match alternate color charts. Final color matching results may vary.
23. Longer lead times can be expected for custom RAL color finishes.
24. Setup charges apply for RAL colors. Consult factory for details.
25. DIM control can be used as NO (On/Off control) if no data is required.
26. Vibration tested in accordance with ANSI 136.31 2018 for bridge and overpass applications at 5Gv.
27. Specify only if a bridge or overpass application is required.
28. Not available for W1HSJB mounting adaptor.
29. Use only when exposed to salt spray. This option is not required for normal outdoor exposure.
30. Setup charges apply. Consult factory for details.
31. The WM-W1HSJB mounting is designed for installation on a round exterior (weatherproof) surface junction box (Ø4 in diameter and 1 5/8 in deep). For all other types of junction box, consult the factory.
32. Not available with VRBO option.

LMPG Inc. reserves the right to make changes to this product at any time without prior notice and such modification shall be effective immediately.

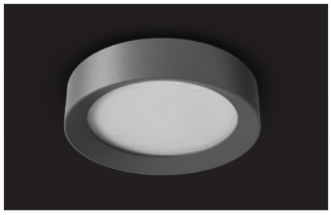
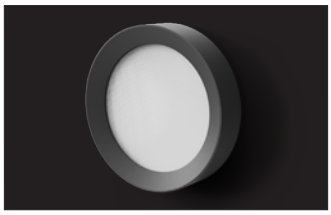
SN800/SN800C
SCENA
WALL/CEILING



PROJECT NAME: QUANTITY: TYPE:



ORDERING CODE:

ADA COMPLIANT

① Corrosion resistant diecast aluminum housing.
② Integrated standard 0-10V driver.
③ Light guide LED technology for uniform lambertian light distribution.
④ Impact resistant patterned tempered glass.
⑤ Sealed enclosure with durable gaskets.
⑥ All hardware in stainless steel.

SN800C

SN800

MATERIALS

Scena is made of aluminum diecast offering exceptional precision and durability. The main housing is perfectly sealed with durable gaskets. The integrated LED light module and 0-10V driver are protected by a patterned tempered glass. With a distinctive look and perceptible quality, Scena is designed for uniform lighting performance.

ELECTRICAL DRIVER

Standard driver is 0-10V dimming-ready (min. dim 5% / dim-to-off)* with: 120-277 multivolt compatibility, operating temperature range of -40°C/-40°F to 85°C/185°F*, over current and output short circuit protection.

LED LIGHT ENGINE

Offered in 2700K, 3000K, 3500K & 4000K / 80CRI.
70% LED lumen maintenance at 60,000 hours (L70/B50) based on IESNA LM-80-08 LED extrapolated life, calculated per IESNA TM-21-21.

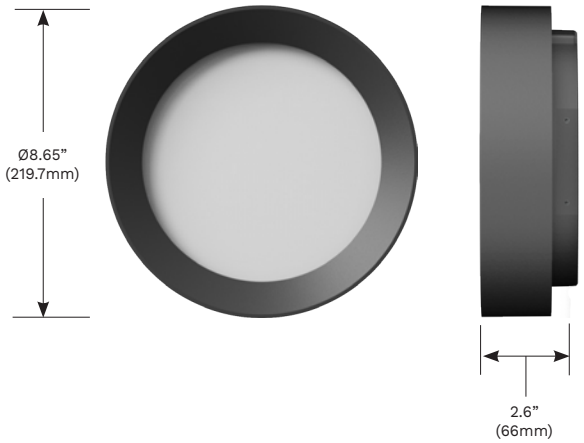
FINISH

Five-stage preparation process includes preheating of cast aluminum parts for air extraction. Polyester powder coating is applied through an electrostatic process, and oven cured for long term finish.

CERTIFICATION

UL certified to Canadian and U.S. safety standards. Certified for use in wet locations. Rated IP65 / IK10. Photometric testing performed by an independent laboratory in accordance with IES LM-79-08 standards at 25°C. Actual performance may differ as a result of end-user environment and application.

WARRANTY



5-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: https://www.luminis.com/technical/warranty/

MOUNTING

The mounting plate is designed to fit on a 4" (102mm) octagonal electrical box using 3.5" (89mm) C/C mounting holes. Fixture must be installed on a wall or a finished ceiling for exterior applications and/or when exposed to inclement weather.

MEASUREMENTS

Maximum weight: 3.8 lbs (1.7 kg)

* L1L23 light output dims to min. 1% / dim-to-off and has an operating temperature of -20°C/-4°F to 50°C/122°F

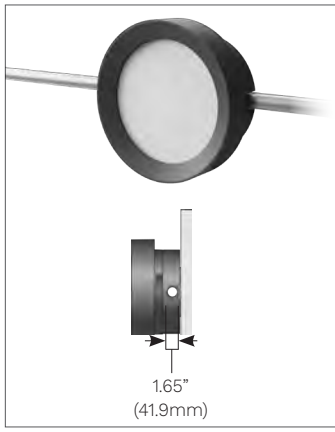
TYPICAL PHOTOMETRY SUMMARY

SN800-L1L11

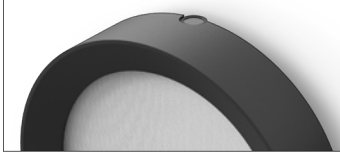
Total Lms: 1189 Lumens
Total Input Watts: 14 W
Efficacy: 85 Lumens/Watt
CCT/CRI: 4000K/80
Maximum Candela: 342.45 @ 0°H/92.5°V
BUG Rating: B0-U3-G2

SN800-L1L23



Total Lms: 2306 Lumens
Total Input Watts: 29 W
Efficacy: 79.5 Lumens/Watt
CCT/CRI: 4000K/80
Maximum Candela: 761 @ 0°H/92.5°V
BUG Rating: B0-U5-G3

LUMEN CONVERSION FACTOR (LCF)		
CCT	CRI	LCF
2700K	80	0.92
3000K	80	0.94
3500K	80	0.98
4000K	80	1.00



All Photometry shown use the 80CRI 4000K LEDs.
Please visit our web site www.luminis.com for complete I.E.S. file.

OPTION DETAILS

SWK
Surface (wall or ceiling) mounting option for Ø4” weatherproof junction box (3/4” conduit trade size). Weatherproof junction box, conduit and connectors by others. The SWK option adds 1.65" to the total depth of the product. (Not ADA compliant).

PH
Button-size photocell mounted on top casted housing. Instant turn-on, standard 5-10 second turn-off time delay.

CB
Decorative cross blades. (LCF 0.93)
