**REASON FOR REQUESTING THE USE OF A PROHIBITED FERTILIZER OR PESTICIDE:**

- Is an emergency and threatens the public health and safety
- For the control of invasive plants that pose a threat to the environment (*For a list of Maine Invasive Plants visit: [http://www.maine.gov/dacf/mnap/features/invasive\\_plants/invsheets.htm](http://www.maine.gov/dacf/mnap/features/invasive_plants/invsheets.htm)*)
- Required to protect buildings or structures from damage
- Using a synthetic fertilizer on performance turf or for new development, with one or more the following conditions:
  - I. The soil temperature is less than 55 degrees Fahrenheit and reasonable grounds exist to justify fertilizer use at that location and at that time;
  - II. The turf is experiencing high stress due to high use and must be ready for high performance play when the sports season(s) begin; or
  - III. A suitable organic product that meets the nutrient needs of the soil as specified in a soil test is unavailable.

*Making the right pest identification is important and can be difficult. Resources for pest identification are available at: <http://www.maine.gov/dacf/php/gotpests/invasive-pests.htm>. NOTE: Applications for poisonous plants such as poison ivy, pests of significant health importance such as ticks and mosquitos, and destructive pests such as carpenter ants and termites are exempted under the ordinance. No waiver is necessary to address these pests.*
